- Gas flow in supersonic wind tunnel measured with high speed photography, noting experimental techniques and applications 22 p3886 A66-40199
- Langmuir type probe in argon arc jet, discussing surface contamination problems, causes of high electron temperature and development of automatic cleaning technique 22 p3899 A66-40368
- Hydraulic analogy methods for simulation of internal gas flows containing combination zone 22 p3901 A66-40500
- Characteristic equation for linear flutter problem of elastic cylindrical shell immersed in gas flow, discussing energy radiation, traveling wave propagation and discontinuity problem 22 p3995 A66-40510
- Probe design for mass flux, stagnation point heat transfer and total enthalpy measurements of high temperature hypersonic gas flows [AIAA PAPER 66-750] 22 p3919 A66-40635
- Wind tunnel test program for simulation of gas-particle rocket exhaust plume, separated flow around nozzle and base recirculation [AIAA PAPER 66-767] 22 p3895 A66-40648
- Reentry aerodynamics research in Japan including sounding rocket program, optimum reentry trajectory, nonequilibrium flow in nose region of blunt body, wind tunnels, etc [ICAS PAPER 66-36] 22 p3847 A66-40659
- Adiabatic gas flow pattern in plane parallel channel near critical point 22 p3902 A66-40815
- Particle-in-cell /PIC/ method for approximate solution of propagation and reflection of plane shock waves in dusty gases 23 p4054 A66-41158
- Moment method in hypersonic flow of rarefied gas around bodies of arbitrary shape 23 p4054 A66-41357
- Supersonic gas flow problems around lattice of conical blades solved in any approximation of perturbation theory 23 p4008 A66-41358
- Supersonic unsteady gas flow around bodies at low Strouhal numbers, noting angle of attack amplitude and leading edge shock wave 23 p4009 A66-41719
- Unsteady supersonic gas flow around lattice of thinly curved plates for calculation of aerodynamic forces and moments acting on oscillating profile 23 p4009 A66-41722
- Thermal transport in channel-gas flow, discussing integral equation and power series solution 23 p4150 A66-41869
- Asymptotic solutions for viscous flow of transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 23 p4057 A66-41881
- Radiative cooling of uniform gas flow to determine reduction of heat flux incident on space vehicle surface, considering nose cap radiation during reentry 23 p4150 A66-41905
- Steady state inviscid gas flow around conical bodies solved, using stabilization method for three-dimensional supersonic flow around smooth body 23 p4013 A66-42012
- Unification of various small-epsilon theories of real gas flows based on assumption of specific-heat ratio near unity 23 p4151 A66-42050
- Magnetically driven shock tube as tool for aerodynamic studies of high velocity high enthalpy flows 24 p4190 A66-42172
- High density highly ionized nitrogen flow in plasma wind tunnel 24 p4191 A66-42192
- Electrostatic probe and VHF microwave reflectometry study of nitrogen flow around models in hotshot wind tunnels, determining plasma sheath physical characteristics 24 p4191 A66-42193
- Leak specifications for gas-filled electronic enclosures, discussing molecular, slow viscous, capillary and ordinary leak patterns 24 p4182 A66-42574
- Isentropic two-dimensional nonstationary flow of polytropic gas adjoining region with quiescent gas, constructing approximate picture of motion near arbitrary discontinuities 24 p4195 A66-42723
- Motion of continuous medium with solid or liquid particles treated by two-velocity model 24 p4195 A66-42839
- GAS-GAS INTERACTION**  
Phase behavior in helium-xenon system exhibiting gas-gas equilibria 13 p2018 A66-26444
- GAS GENERATOR**  
Oxygen regeneration in solid electrolyte cell, constructed from zirconia based ceramic material for space flights [AICE PREPRINT 20E] 17 p2848 A66-32672
- Gas generator systems, discussing applications such as auxiliary power units, servosystem power sources and pressurization devices 18 p3054 A66-34189

Sea level and high altitude ignition of fuel-rich gas generator/turbine manifold assembly 24 p4294 A66-42640

## GAS GENERATOR ENGINE

Analog design technique for pellet motors, gas-generating devices in which propellant is in form of numerous small individual grains [AIAA PAPER 65-193] 03 p0415 A66-12759

Hypersonic wind tunnel, noting hot gas generation by piston drive in gun barrel, stagnation temperatures and other operating parameters 17 p2904 A66-32895

Computer-simulated mathematical model of thermal environmental effects on expulsion system design parameters for liquid-propellant gas-generator rocket engine [AIAA PAPER 66-686] 18 p3163 A66-34228

## GAS GUN

High precision transient measurement of submicrosecond response of shock-loaded materials by instrumentation techniques and target alignment 08 p1226 A66-19694

Glass tube containing pressurized helium progressively imploded by coaxial explosive charge, considering application to hypervelocity guns 11 p1686 A66-22840

Explosive gas guns for hypervelocity acceleration 11 p1686 A66-22841

Helium gas gun for studying penetration and shock reflection from hypervelocity impact 11 p1687 A66-23263

Projectile-borne and gaseous impurity effects on spectroscopic turbulence and velocity measurements at reentry simulating range 24 p4190 A66-42184

Microwave reflectometer instrumentation for Ames light-gas guns, measuring time-distance values of projectiles during acceleration 24 p4209 A66-42185

## GAS HEATING

Gas clouds in dense star clusters compared with quasar properties, analyzing possible energy sources like supernova explosions, stellar collisions and star gas interaction 01 p0137 A66-10494

Breakdown of gases under influence of laser spark phenomena with subsequent absorption of laser radiation and gas heating 01 p0082 A66-10646

Applicability of Pascal law in nonuniformly heated gases verified by measuring pressure anisotropy vs temperature gradient in gas sample 03 p0393 A66-13187

Light pulse absorption in gas and measurement of temperatures attained noting hydrodynamic, breakdown and radiative transfer mechanisms and wave velocities 08 p1319 A66-19276

Time duration and length of compressed region and heated gas behind shock wave front determined by thermal probe 11 p1682 A66-22593

Internal resistance shock tube driver gas heating system to heat helium driver gas to 1000 degrees F at 15,000 psia 11 p1685 A66-22836

MHD power generation by pulsating preheated gas with shock waves, noting thermodynamic cycle composition, efficiency and parameters 13 p2001 A66-26258

Breakdown of gases under influence of laser spark phenomena with subsequent absorption of laser radiation and gas heating 17 p2933 A66-32061

Electropneumatic transducer using principle that heating moving gas increases velocity 19 p3362 A66-36811

Spectral characteristics of gases heated by shock waves, noting absorption capacity distribution as function of wavelength 21 p3726 A66-39078

Pressure distribution in slug of shock wave excited in electrical discharge shock tube 24 p4242 A66-42405

Gas heating in wall stabilized electric arcs with axial flow applied to nitrogen arc, obtaining highest enthalpy flux and efficiency 24 p4295 A66-43060

## GAS INJECTION

Dynamic measurements of speed of pumping by activated charcoal cooled to liquid nitrogen temperatures to evaluate cryosorption 02 p0261 A66-11591

Vortex effect in rotating flow of compressed gas injected into vortex tube, noting role of turbulent heat transfer 03 p0354 A66-12390

Qualitative and quantitative solution of

linearized approximations to boundary layer equations, noting free jet and wall-slot injection into moving stream [ASME PAPER 65-APMW-6]

Motion, temperature distribution, concentration and change in electric conductivity of ionized gas in initial section of plane channel 04 p0512 A66-14212

Heat exchange, friction and mass exchange in laminar multicomponent boundary layer during injection of extraneous gases 04 p0557 A66-14432

Qualitative and quantitative solution of linearized approximations to boundary layer equations, noting free jet and wall-slot injection into moving stream [ASME PAPER 65-APMW-6]

Heat exchange, friction and mass exchange in laminar multicomponent boundary layer during injection of extraneous gases 10 p1523 A66-21470

Pressure distribution and air injection effects in transitional separated flow over spiked hemisphere at supersonic speed 11 p1688 A66-22591

Heat transfer and mass transfer near stagnation point during injection and suction of various gases through blunt body surface 11 p1635 A66-23004

Vortex effect in rotating flow of compressed gas injected into vortex tube, noting role of turbulent heat transfer 12 p1979 A66-24427

Thermal insulation of surfaces by cold gas injection into laminar compressible boundary layer of air in chemical equilibrium 13 p1993 A66-26730

Tests on rocket thrust vector control using hot injectant gas from same fuel and oxidizer as main engine, tabulating data 16 p2810 A66-30902

Effect of injected plasma on curvilinear magnetic field, noting polarization effect 17 p2962 A66-31825

Plasma injection into programmed magnetic field 17 p2963 A66-31828

Turbulent heat transfer measurements on transpiring flat plate in Mach 8 tunnel using nitrogen, helium and argon as injection gases 17 p2838 A66-32439

Turbulent boundary layer in gas flow past curvilinear permeable surface with gas injection into flow kernel 19 p3342 A66-36464

Plasma generating gun using coaxial electrodes, gas injection and preionization device for regulation with plasma purification by injection into magnetic field with double curvature 19 p3427 A66-36572

Protective cooling of insulated plane surface by multislot and network type gas injection into turbulent boundary layer of incident flow 20 p3681 A66-38123

Viscous drag on flat plate in supersonic flow injected with gas in boundary layer, examining exit cone of rocket nozzle 22 p3970 A66-39875

Time lag effect on dynamic stability determined, using wind tunnel tests with 10 degree cone as test body simulating ablation process by gas injection into boundary layer [AIAA PAPER 66-757] 23 p4008 A66-41330

Dispersion equation for cyclotron electromagnetic waves for magnetoactive plasma injected with charged particles 24 p4245 A66-43016

## GAS-ION INTERACTION

Average energy loss per ion pair of low energy nitrogen and oxygen ions in nitrogen, argon and helium 01 p0107 A66-11096

Neutral atomic beam used to measure total ionization cross section of argon atoms incident on low density argon gas 07 p1083 A66-18421

## GAS JET

Measuring thermal fluxes in solid bodies by high temperature gas jets, noting Kastelin-Bronskiy method 04 p0596 A66-13653

Radial distribution of electrical conductivity in ionized gas jet based on value measured by induction method and known temperature distribution 06 p0919 A66-16880

Axial deviation of gas flow resulting from mixing turbulent gas jets 07 p1019 A66-17395

Rotating satellite stability assuming inertia

axis is oriented toward Sun, noting dependency on jets of cold gas and nozzle calibration 09 p1401 A66-200

Axisymmetric liquid nitrogen turbulent propagating under supercritical pressure gaseous nitrogen medium 12 p1864 A66-24

Stabilization of lifted diffusion flame turbulent methane jet flow field measurements of gas flow velocity turbulence and gas composition 15 p2479 A66-290

Problems of various subsonic gas jets finite width around dihedral obstacle solved with Chaplygin hodographic method 16 p2627 A66-30

Expansion of axisymmetrical heated gas in homogeneous slipstream experiments, studied and compared with equivalent problem in theory of heat conduction 19 p3342 A66-36

Spray ejector operating in pulse rather than steady state regime, noting capabilities and formation of de Laval nozzle 19 p3450 A66-36

Mass transfer and hydrodynamics of gas injection into liquid surface, deriving empirical equations for hollow truncated point formed around injection point 21 p3336 A66-38

Laminar gas jet mixing as affected by periodic vorticity produced by mechanical vibration of orifice 23 p4055 A66-41

Line-of-sight velocities in gas in peculiar extragalactic radio source NGC 4038 measured in orientations across object 23 p4129 A66-41

Acceleration of gas during compression conditions of acute angled geometry, using collapsing chamber rather than shay charge 24 p4196 A66-42

## GAS LASER

Peak power transients of near confocal helium-neon laser working at 6328 angstrom on pulsed discharge basis 01 p0080 A66-10

Coherence properties of helium-neon laser with superimposed modes examined interference pattern 01 p0081 A66-10

Self-locked gas laser mode dependence cavity length and position of laser medium in cavity 01 p0081 A66-10

Electron beam pumping of noble gas laser 01 p0081 A66-10

Laser action at 5401 angstroms in neon pulsed high voltage discharge 01 p0081 A66-10

Laser with diffraction limited radiation pattern 01 p0082 A66-10

Current and voltage distribution on length of HF discharge in helium-neon laser 01 p0082 A66-10

Phase relations of longitudinal modes of gas laser with annular resonator 01 p0082 A66-10

Aluminum cold cathodes with single 6328 angstrom helium-neon gas laser lifetimes exceeding 3000 hours 01 p0043 A66-10

Gas laser interferometers for plasma electron density measurement 01 p0069 A66-10

Plasma ring discharge excitation used drive high current density electrodeless for exciting gas ion laser transitions 01 p0083 A66-10

UV and visible laser oscillations fluorine, phosphorus and chlorine atoms pulsed chlorine, phosphorus fluoride and sulfur fluoride gas discharges 01 p0083 A66-10

Ruby crystal optical properties investigated by interference rings from reflecting He laser beam from crystal face 01 p0083 A66-10

Metallic plasma tube for ion lasers allowed them to run at higher current densities than with ceramic tubes 02 p0239 A66-11

Pressure dependence of output of helium-neon gaseous laser in high pressure range 02 p0239 A66-11

Laser with hollow cathode discharge neon-hydrogen mixture and cavity formed by cylindrical mirrors 02 p0239 A66-11

Helium-neon laser output dependence hollow cathode discharge conditions electron transitions in neon 02 p0239 A66-11

Laser transition in vibrational state ground electronic state of CN from

rotational level 8 to 7 with population inversion as result 02 p0240 A66-11451  
Helium-neon laser amplifier as function of mixture ratio, gas pressure, input signal level and electrical power input to amplifier tube 02 p0242 A66-12206  
Width of decay quanta in gas lasers depends on energies and lifetimes of atomic levels involved in stimulated transitions and nonlinear response of 03 p0376 A66-12303  
Gain and bandwidth narrowing in regenerative helium-xenon laser amplifier 03 p0376 A66-12308  
Current discharge of helium neon laser on laser action 03 p0376 A66-12439  
Laser with diffraction limited radiation pattern 03 p0380 A66-13313  
Multireflector Fabry-Perot laser resonators, discussing suppression effect against unwanted modes 03 p0380 A66-13325  
Periodic variation of quality factor of He-Ne gas laser cavity by vibrating quartz-modulation of light beam 04 p0529 A66-13477  
Excitation and inversion method in gas lasers noting characteristics of helium-neon laser and ionized and three-level laser system 04 p0530 A66-13951  
Experiments on helium-neon FM lasers covering phase-locked and FM region power output, modulation index and distortion experiments 04 p0530 A66-13955  
High power Brewster window laser with gas fills, discussing power output and efficiency parameters 04 p0531 A66-13983  
CW gas laser, measuring vibrational rotational translation frequencies of carbon monoxide 04 p0531 A66-13984  
Static characteristics of gas laser internal modulation circuit, using electro-optical crystal inserted into gas laser resonator 04 p0531 A66-14059  
Rise time and output power of single pulse in He-Ne laser measured by method of changing Q-factor by plate located in resonant cavity 04 p0533 A66-14332  
Small particle detection capability of low-gain helium-neon gas laser enhanced by use of Stokes settling law and layered sedimentation technique 05 p0692 A66-14583  
Helium-neon laser output characteristics as function of laser parameters 05 p0694 A66-14897  
Traveling wave oscillations of ion ring laser in mirror-ring resonator 05 p0694 A66-14903  
Two lenses with focal ratios of  $f/4$  and  $f/2.65$  used to collimate light from helium-neon laser 05 p0695 A66-14921  
Microwave beats identified between modes in bromine-argon mixture 05 p0695 A66-14923  
Electrodeless excitation of discharge in helium-neon gas laser tube applied to voice transmission 05 p0696 A66-14924  
CW laser oscillation between 11.48 and 11.55 microns from nitrogen-carbon disulfide system 06 p0890 A66-16384  
Wavelength of  $3s2-2p4$  transition of neon measured, using helium-neon laser 06 p0890 A66-16387  
Helium-neon gas lasers, discussing amplitude variation suppression technique 06 p0892 A66-16670  
CW high-power carbon dioxide-nitrogen-helium laser operation, noting helium addition 06 p0892 A66-16754  
Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluoro iodo methylidyne 06 p0892 A66-16771  
Advantages of gas lasers as light sources in aerodynamic research 06 p0893 A66-16944  
Interferometers 06 p0893 A66-16944  
Interference phenomenon of serrated system of rings surrounding central beam of gas laser analyzed, using helium neon tube placed between two exterior mirrors 06 p0893 A66-17064  
Intensity of polarized light transmitted through laser amplifier and linear polarizer, as function of axial magnetic field strength 07 p1041 A66-17292  
Intensity distribution of fringe systems used to verify phase inversion between two lobes of laser in TEM-10 mode 07 p1043 A66-17453  
Electron energy spectra in neon, xenon and helium-neon laser discharges, calculating

production and destruction rate parameters 07 p1045 A66-18354  
Gas laser direct modulation 07 p1045 A66-18355  
Frequency stabilization of gas lasers, using atomic resonance and interferometers 07 p1045 A66-18357  
Beat frequencies and coherence properties in circularly polarized atomic transitions of gaseous lasers with axial magnetic fields 07 p1046 A66-18429  
Beat frequency and rotation of polarization plane in He-Ne laser with axial magnetic field 07 p1046 A66-18430  
Anode-current spectrum of photomultiplier illuminated by light of time-varying intensity and derivation of moments of photoelectron counts 07 p1047 A66-18432  
Helium-neon gas discharge intensification for 6328A laser wavelength, discussing measurement techniques, gain parameters and results 08 p1232 A66-18632  
Laser development, discussing basic theory, pumping methods and laser types 08 p1233 A66-18700  
Higher order calculation of laser output, noting approximation method for linewidth parameter and Lamb dip shape accuracy 08 p1233 A66-19063  
Helium-neon gas laser used in Raman spectroscopy 08 p1233 A66-19232  
Gas laser emission solution by determining emission field density dependence on resonator parameters, relaxation characteristics and atom excitation in gas discharge plasma 08 p1234 A66-19271  
Nonlinear Zeeman effect for gas laser 08 p1234 A66-19638  
Micromachining with pulsed helium-neon gas laser, noting experimental techniques, operation and application 08 p1232 A66-19734  
Isolation of 1.0621 line in He-Ne gas laser by multilayer dielectric-coated mirrors with sharp spectral cut-off characteristics 09 p1386 A66-20517  
Gas laser end reflector using Pellin-Broca prism for spectral line selection 09 p1386 A66-20518  
Isotope shift measurement for 6328 angstroms helium-neon laser transition 10 p1540 A66-21070  
Optical second harmonic generation in focus of lowest transverse mode of continuous wave Gaussian gas laser beam 10 p1541 A66-21175  
Simultaneous action of RF perturbation between Zeeman sublevels of atomic transition which is also producing laser oscillation 10 p1541 A66-21177  
Laser induced gas breakdown at high pressures, noting effect of plasma density on index of refraction via optical frequency resonance measurement 10 p1542 A66-21564  
CW laser action on triple state phosphorus-sulfur transition, using hydrogen sulfide-noble gas mixtures 10 p1543 A66-21577  
Microwave antenna simulation at optical frequency, using neon-helium continuous gas laser 11 p1662 A66-22539  
Absolute wavelength stability of helium-neon laser measured by direct interferometric comparison with Hg 198 standard lamp 11 p1712 A66-22868  
Wavelength measurement of helium-neon laser emission by double-channel recording interferometer, using krypton-86 primary standard 11 p1712 A66-22874  
Design and operation of helium-neon laser noting radiation, frequency structure, power density, external magnetic field effect, application, etc 11 p1713 A66-22980  
Mode suppression techniques for gas laser single axial mode operation for large mirror separations 11 p1713 A66-23093  
Ruby crystal optical properties investigated by interference rings from reflecting He-Ne laser beam from crystal face 11 p1714 A66-23292  
Current and voltage distribution over length of HF discharge in helium-neon laser 11 p1714 A66-23309  
Q-switching of carbon dioxide and nitrous oxide gas laser transitions 11 p1714 A66-23354  
Vibrational and rotational relaxations in carbon dioxide and nitrous oxide laser systems, using Q-switching techniques 11 p1714 A66-23355

Laser action on rotational line in carbon dioxide and nitrous oxide vibrational spectra in both P and R branches up to J values of over 50 11 p1714 A66-23357  
Continuous wave measurement of optical nonlinearity of ammonium dihydrogen phosphate, using helium-neon laser 12 p1912 A66-23716  
Polish-made He-Ne red gas lasers, describing power outputs, gas pressure, He/Ne ratio, mirror transmission coefficient and interferometric application 12 p1889 A66-23946  
Balanced mixer action for optical heterodyning, using Magic-T optical mixer 12 p1890 A66-24153  
Longitudinal magnetic field effect upon gas discharge, Zeeman effect and Faraday effect in He-Ne gas laser 12 p1890 A66-24224  
Two-level atom interaction with multimode gas laser cavity, obtaining stationary state and solving unique eigenvalue in special cases 12 p1891 A66-24568  
Dependence of emission intensity of gas laser on longitudinal and transverse magnetic fields, using simplified model 12 p1891 A66-24885  
Optical resonator diffraction loss, noting laser oscillations in high loss arrangements, output beam power, field patterns, etc 13 p2090 A66-25195  
Nonlinear dielectric laser light absorption by neutral gas resulting in avalanche breakdown of gas due to thermal ionization 13 p2090 A66-25425  
Metal wall ionized argon lasers, discussing use of water-cooled quartz discharge channels, CW lasers, development of satisfactory metal, etc 13 p2091 A66-25555  
Output power of 6328 angstrom He-Ne gas laser as function of laser gain, cavity loss and output coupling 13 p2091 A66-25651  
Alignment of laser mirrors using gas laser with highly collimated beam of small diameter 13 p2092 A66-25824  
Solar noise in optical communications, background radiation dependence on detector aperture, noise power and application to GaAs diodes and gas lasers 13 p2024 A66-25833  
Helium-neon laser multibeam generation in gas discharge tube, using spherical mirrors and tapered plates 13 p2093 A66-26053  
He-Ne laser homodyne spectrometer observation of broadening of spectral profile of light scattered from carbon dioxide near critical temperature and density due to density fluctuations 13 p2133 A66-26168  
Far-IR laser molecular spectroscopy including IR laser oscillators, photon noise, detectors and nuclear optics 13 p2100 A66-26195  
Optical and IR-maser spectroscopy of inhomogeneously broadened resonances, using gas lasers 13 p2100 A66-26196  
Organic gas magnetically tuned laser spectroscopy, discussing resolution, absorption spectra and vibrational deactivation 13 p2100 A66-26197  
Helium-neon gas laser used to study pressure effect on line shape of  $2s-2p$  optical transitions of neon excited states 13 p2100 A66-26198  
Pressure effects in Fabry-Perot lossy-cavity gas laser output 13 p2101 A66-26199  
Dependence of Zeeman beat frequency on interferometer tuning in single-mode He-Ne laser with various gas pressures and magnetic field strengths 13 p2101 A66-26201  
Laser action on vibrational-rotational transitions and vibration energy transfer 13 p2101 A66-26204  
Electron impact excitation mechanism of argon-ion continuous and long pulse lasers 13 p2102 A66-26206  
Transition probabilities and lifetimes in ionized argon gas lasers 13 p2102 A66-26207  
High resolution piezoelectrically scanned Fabry-Perot interferometer used to study gain profiles, mode structures and emission line widths of CW Ar, Kr and Xe ion lasers and Hg-He pulsed laser 13 p2102 A66-26208  
Photoelectron counts of photomultiplier illuminated by gas laser light source 13 p2102 A66-26211  
Models of matter-electromagnetic field interaction for gas lasers, using perturbation theory 13 p2103 A66-26216

Helium-neon gas laser used to determine electron density variation, spatial and temporal, in afterglow of Z-pinch in H at 100 torr 13 p2104 A66-26239

Magnitude and phase of complex spatial coherence of He-Ne laser 13 p2104 A66-26334

Helium-neon laser emission on 6401 angstrom line, noting intensity vs mirror shift and optical cavity 13 p2104 A66-26336

instability 13 p2104 A66-26336

Raman diffusion spectra from crystals excited by gas laser 13 p2104 A66-26345

Alignment of angular positions of spherical mirror and grating of Fastie-Ebert spectrometer, using bright collimated monochromatic beam of He-Ne laser 13 p2084 A66-26564

Maximum output power approximated for 6328 angstrom He-Ne gas laser, noting optimum mirror transmission and laser geometry 13 p2105 A66-26571

Cataphoresis, moving striations and associated noise in He-Ne laser 13 p2105 A66-26591

Dust particles in laser cavity observed for angular stabilization and constant velocities 13 p2105 A66-26594

IR and visible helium-neon laser modulation using Faraday rotation in YIG 14 p2305 A66-26881

Vibrational-rotational line strengths and widths in carbon dioxide, using carbon dioxide-neon laser 14 p2306 A66-27030

Current changes in gas discharge as affected by lasing action 14 p2306 A66-27055

Effective lifetime of excited state of gas laser, with account of near photon transfer 14 p2306 A66-27135

Effect of longitudinal magnetic field on output power of gas laser operating in IR spectrum, noting gas-mixture pressure in discharge tube role 14 p2307 A66-27156

LF fluctuations in emission of He-Ne gas laser measured, using Fabry-Perot resonator and ring-type resonator 14 p2307 A66-27186

Lateral shearing interferometer with gas-laser light source for testing large optical systems 14 p2307 A66-27320

Helium-neon laser afterglow and metastable helium atoms under long pulse excitation 14 p2307 A66-27335

Laser oscillator study of coherent stimulated emission of IR transitions in rare gases 14 p2308 A66-27336

Oscillation types for gas-laser semiconcentric resonator 14 p2310 A66-28160

Precision automatic tracking using CW He-Ne laser, noting performance and application 14 p2245 A66-28448

Optical beam deflection technique using interferometer cavity illuminated by gas laser beam 15 p2512 A66-28689

Optical beam scattering of gas laser for measurement of photoelastic constants and application to lithium niobate 15 p2512 A66-28692

Temperatures, Lorentzian widths and drift velocities of excited neutral and ionic species in argon-ion laser, noting thermal equilibrium achievement 15 p2512 A66-28695

Gas laser output wavelength stabilization by use of external passive optical interferometer 15 p2513 A66-28835

Pulsed toroidal excitation of gas ion lasers extended to drive high power CW laser transitions in Ar, Kr, Cl and Br, noting operating parameters and power output 15 p2513 A66-28877

Mark I SMASER design, submillimeter wave gas laser capable of continuous wave or pulse operation 15 p2514 A66-29009

118-micron wavelength water vapor gas laser with 4-inch diameter two-meter focal length mirror resonator 15 p2514 A66-29010

Experimental evidence of inverse bremsstrahlung and electron-impact ionization in low pressure argon ionized by giant pulse laser 15 p2544 A66-29115

Dipole moment calculation for gas laser in magnetic field 15 p2516 A66-29348

Relation between laser parameters and cathode diameter in excitation of He-Ne mixture by discharge of hollow cylinder 15 p2516 A66-29357

Pulsed nitrogen laser action in wind tunnel-simulated supersonic

flow 15 p2516 A66-29384

Hysteresis phenomena in He-Ne gas laser in axial magnetic field and polarization of oscillating mode within certain tuning region 15 p2516 A66-29385

Frequency stability and spectral purity of p-n junction laser output improved by synchronization with gas laser beam 15 p2518 A66-29717

Output power frequency response of single mode helium neon laser, determining effects of atomic collisions on frequency response of individual atoms 15 p2518 A66-29812

Transverse and axial magnetic field effects on gas lasers, deriving expression for atomic and macroscopic polarization, determining oscillation mode characteristics, frequency responses, etc 15 p2518 A66-29813

Isotope shifts and Fermi resonance role in carbon dioxide IR laser 16 p2716 A66-30176

Actual line shape expected from accelerating radiating ion, errors due to Lorentzian approximation and results for ion laser transition in rare gas lasers 16 p2716 A66-30181

Optical harmonic generation in IR in zinc blende, hexagonal and trigonal crystals, using unfocused carbon dioxide laser in CW and Q-switched operation 16 p2716 A66-30182

Unmodulated laser output at controlled frequency, using correcting beats from reference laser 16 p2717 A66-30205

Demodulation method in which phase modulation of laser beam is converted to amplitude modulation by autocorrelation 16 p2717 A66-30616

Near-Bose-Einstein probability distribution of photoelectron counts produced by He-Ne gas laser narrow band Gaussian light source operating slightly below oscillation threshold 16 p2717 A66-30645

Semiclassical theory of quantum generators, examining laser system response to effect of monochromatic standing wave based on kinetic equation for density matrix 16 p2718 A66-30865

Collision broadened linewidth and saturation parameters for 6328 angstrom transition of Ne in He-Ne laser 16 p2718 A66-31084

Mode locking in gaseous laser whose cavity is length modulated at mode separation frequency 16 p2719 A66-31095

Small signal modulation effect on photoelectron counting of He-Ne laser intensity fluctuations 16 p2719 A66-31097

Large screen real time projection display technique using Ne-He gas laser 16 p2708 A66-31412

Particle velocity in gas particle two-phase nozzle expansion using gas laser and Fabry-Perot interferometer for rocket engine propulsion [AIAA PAPER 66-522] 16 p2708 A66-31500

Helium-neon laser modulation by positive and negative voltage pulses 16 p2720 A66-31559

Gas lasers for interferometric measurements of lengths, noting methods that stabilize wavelengths of lasers 16 p2720 A66-31697

Near-field diffraction of helium-neon laser at circular apertures 16 p2720 A66-31727

Multiphoton plasma production and stimulated recombination radiation in lead telluride, considering electron-hole pair production rate 17 p2975 A66-31884

Cyclotron resonance excitation of upper level of gas-ion laser 17 p2933 A66-31937

Static characteristics of gas laser internal modulation circuit, using electro-optical crystal inserted into gas laser resonator 17 p2933 A66-32225

Gas laser emission in weak longitudinal magnetic field assuming Zeeman splitting is much smaller than Doppler linewidth 17 p2934 A66-32319

Laser and maser development, discussing design improvements and application for television, space communications, etc 17 p2934 A66-32353

Fluctuations in mean refractive index over long path through turbulent atmosphere examined, using Michelson interferometer with He-Ne laser source 17 p2948 A66-32618

Internal phase modulation in He-Ne laser using electro-optic effect in crystal quartz, observing spectrum and RF mode

beats 17 p2934 A66-32618

Coherent gas laser light to microscopy requirements of streak photography time-resolved flow 17 p2935 A66-32619

visualization 17 p2935 A66-32619

Power enhancement in pulsed He-lasers, noting overshooting for RF discharge modulation with square wave 17 p2935 A66-32619

Carbon dioxide laser principle of performance 17 p2936 A66-32620

High-power molecular laser based vibrational-rotational energy level, not carbon dioxide-neon-helium laser design 17 p2936 A66-32620

Ion lasers involving electron transitions, atoms or molecules with lost electrons 17 p2937 A66-32621

Frequency stabilization of gas laser servomechanism and Lamb dip method 17 p2937 A66-32621

Michelson interferometer used to study modes of red He-Ne laser 17 p2937 A66-32621

Measuring amplification of coherent optical radiation in neon-helium filled tube 17 p2938 A66-32622

Competition of transitions and emission, He-Ne laser, using resonator with dispersing prism 17 p2938 A66-32622

Laser radar ranging system using pseudorandom code modulation, considering application to pulse and digital circuit, statistical communication theory and electrical engineering 18 p3117 A66-33017

First- and second-order sidebands due to strong CW signal intermodulation effects, 3.39 mu He-Ne laser 18 p3117 A66-33017

Vibrational excitation, population inversion and coupling out of carbon dioxide-nitrogen water vapor laser 18 p3118 A66-33018

Ionized noble gas lasers, considering problems at higher powers, especially those of inversion mechanism and magnetic field effects 18 p3118 A66-33018

Ultrasonic cell which modulates intensity of He-Ne laser beam for communication, intelligence 18 p3118 A66-33018

Nonlinear Zeeman effect for gas laser 18 p3119 A66-33019

Traveling waves interaction in gas laser, explaining forcing-of-oscillations and traveling wave suppression effect 18 p3119 A66-33019

Decay cross section of pumped metastable He atoms in He-Ne laser 18 p3119 A66-33019

Ne-He laser output dependence on pressure and nonexcited atom concentration 18 p3119 A66-33019

Radiation from high-energy-level transitions excited in He-Ne laser during optical pumping with He lamp 18 p3120 A66-33020

High temperature flow characteristics of free piston shock tube measured by means of pulsed light of He-Ne gas laser 19 p3339 A66-33539

Helium-neon laser assessment as source of high precision range measurements 19 p3372 A66-33632

Gas laser output and threshold population inversion from photodissociation of methyl iodide and fluoriodoacetylene 19 p3372 A66-33632

Gas laser used to determine residue wedge angle in optical flats and display of relief maps 19 p3373 A66-33633

CW He-Ne laser measurement of light scattering in crystals noting laser output performance and crystal imperfections 19 p3373 A66-33633

Atomic time standards, describing cesium beam standard, ammonia maser and gas type clocks 19 p3354 A66-33634

Spatial coherence measurement of He laser output 19 p3373 A66-33633

Gas laser with generalized polarization characteristics, noting role of degenerate atomic energy levels 19 p3374 A66-33634

Pulsed discharges of OCS molecular laser 19 p3375 A66-33635

Dipole moment calculation for gas laser magnetic field 20 p3576 A66-33636

Relation between laser parameters and cathode diameter in excitation of He mixture by discharge of hollow cylinder 20 p3576 A66-33636

Nonreciprocal effects associated with excitation current observed in DC-excited He-Ne ring laser, noting coupling

- phenomena between right and left waves 20 p3577 A66-37408
- Magnitude of Hanle effect of neon atoms emitted by laser dependence on excitation discharge intensity explained by multiple coherent diffusion at metastable level 20 p3577 A66-37409
- Continuous wave gas laser as light source in scattered light static photoelasticity 20 p3577 A66-37443
- Spherical coupler for fastening mirrors and plane-parallel plates at Brewster angle in gas laser 20 p3578 A66-37523
- Identification of number of lines at 11 microns emitted from pulsed carbon dioxide laser as P branch of carbon dioxide vibrational transition 20 p3579 A66-37629
- Phase relations of longitudinal modes in gas laser with annular resonator 20 p3579 A66-37663
- Upper laser states deriving population through cascade transitions from higher laser states of argon ion noting consistency of laser output current dependence with current dependence of cascade rate 20 p3579 A66-37774
- Coupling between oppositely directed traveling waves in He-Ne ring laser in form of mutual backscattering of energy from each beam into direction of other 20 p3579 A66-37778
- Degradation of continuous argon laser performance when positioned in axial magnetic field, noting role of quenching, radiation trapping and excitation mechanisms 20 p3579 A66-37779
- Discharge current and laser light noise measurements effect in gas discharge helium-neon laser, using equivalent circuit 20 p3580 A66-38240
- Frequency stabilization of gas laser to lock output to center of atomic resonance, using error signal 20 p3580 A66-38241
- Pulsed nitrogen laser delivering high average power without complications of conventional Q-switching 20 p3581 A66-38266
- Spontaneous emission noise power added to amplified signal in laser amplifier in He-Xe gas discharge and saturation relation to population inversion 20 p3581 A66-38387
- Laser machining, discussing hole drilling, microwelding metal removal and application to hard brittle materials [ASME PAPER 66-MD-28] 21 p3742 A66-38484
- Second-harmonic generation by focused laser beams based on experiments using He-Ne gas laser, noting SHG should be strongly peaked when focus is at either of crystal surfaces 21 p3746 A66-38554
- General nonequilibrium system in contact with reservoir described via correlation functions of quantized field operators, noting influence of cavity and optical pump 21 p3746 A66-38633
- Hyperfine spectrum of xenon in 3.5 mm maser transition noting experimental setup, gain profiles for various input power levels and structural properties 21 p3746 A66-38763
- Self-induced divergence of continuous wave He-Ne laser beams when traversing transparent liquid, noting nonlinear effect in propagation of light 21 p3748 A66-39164
- Wave synchronization in gas laser with ring resonator cavity 21 p3748 A66-39301
- Atomic collisions, excitation transfer processes and energy level transition probabilities in plasma of gas lasers 21 p3748 A66-39305
- Gas laser frequency and emitted power dependence on resonator tuning 21 p3748 A66-39308
- Gas laser alignment, obtaining oscillation on three lines of He-Ne laser 22 p3930 A66-39718
- Atomic degeneracy influence on mode interactions in gas laser 22 p3931 A66-39930
- Light reflection from shock waves clarified through propagation in shock tubes, using gas laser 22 p3898 A66-40012
- Pulsed coaxial transmission line nitrogen gas laser, noting pressure effect 22 p3932 A66-40107
- Intracavity interferometer laser measurements of power gain and output in single-frequency Ar laser and 6328-angstrom Ne isotope shift 22 p3932 A66-40110
- Longitudinal magnetic field effect upon gas discharge, Zeeman effect and Faraday effect in He-Ne gas laser 22 p3933 A66-40586
- Dependence of emission intensity of gas laser on longitudinal and transverse magnetic fields, using simplified model 23 p4076 A66-41092
- Plasma fluctuation effect on gas laser noise, noting relation between modulation amplitude of light output and frequency noise and oscillation spectrum 23 p4077 A66-41294
- Electron and neutral atom densities in helium and argon afterglow plasma obtained by two helium-neon laser interferometers, noting temporal dependence of electron decay 23 p4101 A66-41364
- Performance characteristics for pulse type Ar laser with external interferential system of quasi-confocal spherical mirrors 23 p4078 A66-41452
- Radiative power amplification of He-Ne laser with nearly confocal resonators 23 p4078 A66-41453
- Competition, hysteresis and reactive Q-switching in carbon dioxide lasers at 10.6 microns, using moving mirror technique 23 p4079 A66-41631
- Resonator misalignment effect on output of neon-helium laser with spherical mirrors 23 p4079 A66-41830
- Measuring amplification of coherent optical radiation in neon-helium filled tube 24 p4219 A66-42125
- Competition of transitions and emission in He-Ne laser, using resonator without dispersing prism 24 p4219 A66-42127
- Zeeman laser interferometer, using axial magnetic field to obtain simultaneous left- and right-hand circularly polarized oscillation modes at upper and lower cavity resonances 24 p4219 A66-42248
- Conductivity modulation by heavy-to-light hole transitions in p-type germanium noting carrier lifetime and ringing of laser pulse 24 p4219 A66-42249
- 10.6 micron output of carbon dioxide-He laser modulated, using Bragg diffraction from longitudinal acoustic waves in Te 24 p4219 A66-42251
- Book on lasers covering optical cavities, gas lasers, solid state lasers, optical pumping, Q-switching, population inversion, etc 24 p4220 A66-42319
- Saturation induced optical nonreciprocity in He-Ne ring laser plasma, eliminating frequency locking by using Faraday effect 24 p4221 A66-42552
- Laser Doppler velocimeter for gas and liquid flow velocity measurement 24 p4211 A66-42557
- Scattering matrix analysis of single frequency Michelson type He-Ne gas laser, including frequency and amplitude stability analysis of oscillation spectrum 24 p4223 A66-42566
- Gas-discharge CW lasers, particularly He-Ne, carbon dioxide, argon-ion and pulsed self-terminating lasers, discussing classification, power output and gain, Doppler width, coherence and noise 24 p4224 A66-42801
- Pressure- and gain-dependent frequency shift measurements in stabilized 6328 angstrom He-Ne laser 24 p4224 A66-42803
- Optical heterodyne receiver antenna properties, noting effective aperture of capture cross section vs directional tolerance and detection of doppler shifts in liquid scattered coherent light 24 p4174 A66-42809
- Effect of longitudinal magnetic field on output power of gas laser operating in IR spectrum, noting gas-mixture pressure in discharge tube 24 p4225 A66-42977
- Laser oscillation effect on characteristics of electron gas of helium-neon laser plasma studied in terms of wave attenuation in plasmaguide 24 p4225 A66-43006
- Beating of oscillating frequencies corresponding to two directions of travel of annular cavity laser with active gas medium in movement 24 p4225 A66-43007
- LF fluctuations in emission of He-Ne gas laser measured, using Fabry-Perot resonator and ring-type resonator 24 p4226 A66-43084
- GAS-LIQUID INTERACTION**
- Discrete gas-into-liquid flow process, compensating absence of mass forces and unfavorable load directions with motion of liquid 02 p0218 A66-11657
- Equilibrium flow of ideal gas and condensing vapor mixture from nozzle, using basic equations to describe process 12 p1863 A66-24368
- Motion of gas bubble in weightless viscous fluid with temperature gradient 14 p2273 A66-26786
- Localization of gas-liquid interface by capillary effects, noting error in adverse acceleration equation 16 p2685 A66-30917
- Mass transfer in gas-liquid dispersions, noting effect of flow rate, bubble size, etc 18 p3266 A66-34736
- High speed photographic investigation of propagation and disintegration of interaction of two-phase gas-liquid flow in venturi scrubber 18 p3114 A66-35059
- Thermodynamic properties and solubilities of He molecular nitrogen, molecular oxygen, Ar and nitrogen trioxide in liquid nitrogen tetroxide 19 p3449 A66-36368
- GAS LUBRICANT**
- Ball bearing lubrication with vapor from volatile organic compounds for wide temperature range and long term operation [ASLE PREPRINT 65-LC-24] 02 p0237 A66-12248
- Gas-lubricated bearing equations derived that are valid for wide range of temperature and Mach numbers 04 p0526 A66-14156
- Continuous fluid film self-acting cylindrical journal bearing theory and design data, introducing isothermal bulk modulus into lubrication equations [ASLE PREPRINT 65AM 3A2] 07 p1039 A66-18285
- Externally pressurized nonrotating porous wall air lubricated journal bearing properties, taking into account surface roughness effects [ASLE PREPRINT 65AM 3A5] 07 p1039 A66-18286
- Lift in spherical ball bearings with air lubrication calculated, taking into account inertial term in general equations of aerodynamics, gap variability and air compressibility 08 p1232 A66-19693
- Modern gas bearings of self-acting and externally pressurized types in turbomachinery 09 p1384 A66-20297
- Pressure distribution of gas-lubricated spiral-groove thrust bearing or compressor [ASME PAPER 66-LUBS-1] 17 p2931 A66-33176
- GAS MASER**
- Light output from helium-neon gas maser photographed with and without intracavity modulation at locking frequency, using high speed rotating mirror 07 p1040 A66-17205
- Pulse excitation of volume of gas to coherently radiating state applied to beam maser spectrometer 12 p1879 A66-23731
- Hydrogen atom beam characteristics, discussing signal power, generating frequency, radiation signal damping and hydrogen atom relaxation time 14 p2310 A66-28289
- Very fine-beamed maser oscillation produced in atomic hydrogen by HF discharge observed by double focusing technique 24 p4225 A66-42993
- GAS-METAL INTERACTION**
- Hot plastic deformation effect on gas content, structure and mechanical properties of industrial molybdenum, niobium and titanium 01 p0086 A66-10451
- Heat resistance in air of four industrial austenitic-ferrite steels with low nickel content at 750-1050 degrees C, noting oxide scale formation 01 p0088 A66-10988
- Metallized propellant and gas-solid suspension flow through nozzle in high energy systems 06 p0803 A66-16912
- Interaction between hydrogen and various titanium alloys, noting correlation between sorption capacity of alloys and type of phase diagram 07 p1050 A66-18064
- GAS METER**
- Vertical distribution of atmospheric ozone measured by balloon-borne Sun-seeking guidance system and light-scattering gypsum screen 01 p0071 A66-11044
- Vertical distribution of atmospheric ozone measured by balloon-borne Sun-seeking guidance system and light-scattering gypsum screen 11 p1709 A66-23291

High accuracy variable area meter calibrations with multiple gases 16 p2704 A66-30672

**GAS MIXTURE**

**SA DETONABLE GAS MIXTURE**

Reference point in thermodynamic similarity for investigating binary gas mixtures 01 p0163 A66-10627

Electric conductivity of N-component gas mixture containing one partially ionized component 02 p0265 A66-11389

Equation solution for flame propagation in gas mixture with first-order exothermic chemical reaction 02 p0302 A66-11392

Two-and three-step laser cascades detected experimentally in helium-neon mixtures, analyzing two-step cascade starting with density matrix formulation 02 p0241 A66-11477

Helium-neon laser amplifier as function of mixture ratio, gas pressure, input signal level and electrical power input to amplifier tube 02 p0242 A66-12206

Electron-ion recombination in photoionized nitric oxide neon gas mixture, noting decay of electron density and correlation factors 03 p0394 A66-12327

Unsteady boundary layer flow of multicomponent gas mixtures, investigating combustion instability in liquid and hybrid rocket motors [AIAA PAPER 65-41] 03 p0444 A66-12796

Temperature overshoot in monatomic gas shock wave 03 p0357 A66-12957

Warren momentum integral method for predicting compressible free mixing of two dissimilar gases [AIAA PAPER 65-822] 03 p0357 A66-13083

Kinetic studies of hydroxyl radicals in shock waves, considering recombination via particular reaction in lean hydrogen-oxygen mixtures 04 p0596 A66-13646

High temperature analysis of mechanism and kinetics of tetrafluoroethylene decomposition and oxidation in excess argon behind shock waves, using UV absorption and mass spectrometry 04 p0571 A66-13650

Vibrational relaxation model of high temperature gas to determine dissipative coefficients in highly nonequilibrium gas mixtures with binary collisions 04 p0455 A66-14140

Performance of thermal diffusion columns studied for limits of validity of theory of isotopic mixtures in case of mixtures of gases 04 p0598 A66-14325

Interaction virial coefficient of binary gas mixtures by Guggenheim-McGlashan method 05 p0718 A66-15527

Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 06 p0970 A66-16345

Ignition of hydrogen-oxygen-argon mixtures containing small amounts of hydrocarbons and bromine substituted hydrocarbons in shock tubes 06 p0822 A66-16634

Experimental viscosity of dissociating system nitrogen tetroxide and nitrogen dioxide, obtaining force constants for Lennard-Jones potential having no effect on viscosity of gas mixture 06 p0823 A66-16635

Porous cermet of iron, bronze and stainless steel efficiently arrest flame of burning gas mixtures 06 p0897 A66-16694

Simulated flights evaluating verbal communication intelligibility in oxygen breathing mixtures at low atmospheric pressures compared with results obtained in room air at ground level 06 p0813 A66-16827

Physics of spark discharges igniting gaseous mixtures, noting increase in thermal power of discharge by gas preionization resulting from energy redistribution 06 p0919 A66-16877

Linearized wave equation of supersonic flow with single relaxation process, using model gas mixture 06 p0874 A66-17003

Separation of gases from isotopes in compression shock produced in expanding gas flow past obstruction, dependent on gas density and hydrokinetic properties of components 06 p0875 A66-17052

Thermal diffusion coefficient and composition of gas mixtures by measuring gas flow rate in capillary tube as function of viscosity 07 p1148 A66-17394

Velocity potential equation for linearized steady motion of gas mixture with multiple reactions 07 p1023 A66-18116

Heat conductivity of binary gas mixtures compared with theoretical and experimental results 07 p1155 A66-18159

Time dependence of electron density during afterglow of plasma in helium-hydrogen, neon-hydrogen and argon-hydrogen mixtures measured by microwave cavity 07 p1091 A66-18398

Methane concentration relation to relaxation frequency and vibrational specific heat of mixtures of oxygen and methane 08 p1178 A66-18938

Inviscid supersonic flow fields of reacting gas mixture around pointed bodies calculated, using characteristics method 08 p1164 A66-19128

Theoretical formulae for thermal diffusion of binary gas mixtures 08 p1320 A66-19569

Thermodynamic parameters of carbon dioxide and argon mixture behind straight shock wavefront 09 p1470 A66-20146

Separation of gas mixture in curved supersonic flow, noting parameters of concentration gradient profile variation 10 p1522 A66-21269

Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 11 p1785 A66-22340

Thermal conduction of hydrogen-helium gas mixtures and dependence on hydrogen concentration 11 p1786 A66-22500

Thermal properties of gaseous mixtures measured with experimental apparatus containing differential manometer 11 p1704 A66-22595

Shock wave structure in binary gas mixtures that are monatomic and chemically inert, using Mott-Smith method 11 p1691 A66-22914

Accuracy and applicability of approximate formulas describing heat conductivity of binary gas mixture 11 p1787 A66-23318

Kinetics of CN radicals association generated by shocking cyanogen-argon mixtures at high temperatures in reflected shock region of expansion wave 12 p1811 A66-23615

Book on thermodynamic properties of combustion gases 12 p1978 A66-24192

Interferogram interpretation to determine carbon dioxide concentration in air mixture 13 p2208 A66-25315

Vibrational relaxation times of deuterium in argon and krypton determined at high temperatures by shock heating gas mixtures in shock tube 13 p2136 A66-26662

Laminar air flow past porous plate through which fuel and oxidizer mixture is injected, deriving diffusion combustion processes that develop in laminar boundary layer 14 p2371 A66-28318

Thermodynamic characteristics of two volumes of binary gas mixture connected through capillary tube 14 p2415 A66-28324

Flame wavelength during vibrational combustion of gas mixtures in tubes 14 p2415 A66-28327

Viscosity coefficients of gas mixtures at atmospheric pressure and various temperatures 14 p2415 A66-28328

Nonlinear system of partial differential equations describing one-dimensional combustion process of gas mixture 15 p2616 A66-28961

Schlieren photographs of spark ignition in turbulent gas mixture flows and analysis of ignition delay and burning velocity 15 p2616 A66-29069

Electroconductivity of combustion products of propane-air mixture determined by double Langmuir probes 15 p2617 A66-29312

Oscillatory phenomenon in gaseous multicomponent diffusion, noting convection caused by density inversion 15 p2481 A66-29745

Approximation method for thermal diffusion factor of almost Lorentzian gas mixture with better convergence properties than Chapman-Enskog approximation 16 p2824 A66-30119

Effect of air mixture application on optimum ascent trajectories and ratio of payload to takeoff weight of carrier rocket

configurations 16 p2790 A66-30030

Environmental conditions in space stationing optimum pressure, gas concentration and temperatures 16 p2641 A66-30030

Thermal diffusion in isotopic gas mixtures 16 p2826 A66-30030

Thermal ignition of flowing gas mixture at nonreactive noncatalytic hot surfaces 16 p2830 A66-310

Thermal diffusion factor of binary mixtures, discussing some relatively unknown characteristics 17 p3033 A66-320

Thermal comfort zones for helium-oxygen and helium-nitrogen atmospheres at reduced pressures 17 p2865 A66-320

Chapman-Enskog kinetic gas theory calculation of diffusion coefficient of binary gas mixture 17 p3035 A66-320

Automatic ignition in methane-chlorine mixture, investigating photochemical and thermal chlorination of methane in phase 17 p2989 A66-320

Transonic nonequilibrium approximation for reacting gas mixture flow 17 p2913 A66-330

Direct and indirect oxidation fuel systems operating on hydrocarbon mixtures and using aqueous, molten solid electrolytes, noting technological and economical problems 18 p3053 A66-330

Computer programs for combustion rate of hydrogen-air mixture 18 p3063 A66-330

Overall structure of combustion process, jet flow of hydrocarbon-air mixture, stressing conditions for ramjet engine, noting flame propagation angles, computation, etc [AIAA PAPER 66-573] 18 p3264 A66-340

Shock formation in mixture of chemically reacting ideal gases due to piston action 18 p3100 A66-340

Correlation method of law of corresponding states for calculating thermodynamic properties of real gases and their mixtures 18 p3267 A66-350

Vibrational relaxation of carbon dioxide mixtures with noble gases 19 p3295 A66-350

One-dimensional problem of sound propagation in two-component reactive gas mixture 19 p3341 A66-350

Population inversion in adiabatic expansion of molecular gas mixture with vibrational levels 19 p3402 A66-350

Liquid-vapor phase equilibria of neon normal hydrogen system 20 p3676 A66-370

Low temperature liquid-vapor equilibria in neon-oxygen system at pressures up to 5000 psi from 63 to 152 degrees K 20 p3601 A66-370

P-V-T behavior of argon, nitrogen, argon-nitrogen gas mixtures 20 p3677 A66-370

Stability limits of quasi-cylindrical diverging detonations in propane-oxygen nitrogen mixtures 20 p3679 A66-370

Hydrogen/oxygen and hydrogen/air flame temperature experiments on porous flame burner 20 p3680 A66-370

Fluorine concentration in oxygen monitored by instrument with nickel thermoconductivity cell 20 p3511 A66-380

Methane flames formed in long, horizontal column of methane-air mixture caused by interdiffusion, using wind tunnel 20 p3681 A66-380

Ideal relativistic degenerate gas in white dwarf star interiors, discussing stability equations, thermodynamic relations, electron-ion gas mixtures, etc 21 p3775 A66-380

Thermal conductivity and accommodation coefficient measurements in gas mixtures of atomic and molecular oxygen 21 p3836 A66-380

Thermodynamic parameters of carbon dioxide and argon mixture behind straight shock wavefront 21 p3836 A66-380

Thermal conductivity of carbon dioxide critical region interpreted, considering as mixture of clusters and heat transfer to formation and breaking of clusters 21 p3837 A66-380

Stability problem of plane steady detonation wave in ideal gas 22 p3898 A66-400

Gas mixtures evaluation for MIG weld aluminum alloy noting nondestructive

- mechanical and stress corrosion testing 22 p3925 A66-40266
- Transverse separation of rare gas-metal vapor mixture components in positive nonisothermal plasma column in plain-symmetric glow discharge 22 p3958 A66-40934
- Pressure variation induced by ignition of air-hydrocarbon mixtures studied by stioscopic cinematography and simultaneous pressure measurement 23 p4148 A66-41176
- Compressibility factor chart for hydrocarbon-hydrogen and nitrogen-hydrogen gas mixtures, correlating pressure and temperature, using state equation 23 p4150 A66-41866
- Detonation wave formation in flowing hydrogen-oxygen and methane-oxygen mixtures, noting induction distances and turbulence levels 23 p4057 A66-41888
- Detonation initiation behind reflected shock waves in hydrogen-oxygen-argon mixtures, noting reaction wave propagation 23 p4057 A66-41889
- Detonability of hydrogen-oxygen mixtures in large vessels at low initial pressures, using strong and weak igniters 23 p4120 A66-41890
- Homogeneous gas phase and surface reactions based on mass transfer mechanism during quenching of oxygen-nitrogen mixtures from high temperatures 24 p4170 A66-42134
- Mixing of gases in hydrogen-oxygen fuel cell, noting membrane allowing only electrolyte to pass through electrodes 24 p4161 A66-42502
- Flame of homogeneous gas mixture in terms of similarity criteria applied to combustion process analysis 24 p4295 A66-42883
- Regenerative air conditioning systems of spacecraft cabins for long missions, analyzing principal parameters of gas mixtures for life requirements 24 p4169 A66-43142
- GAS PHASE**
- Effect of surface state of cadmium sulfide on fundamental absorption edge and fine structure obtained from gaseous phase in inert atmosphere 03 p0407 A66-12405
- Stain film of chemical species formed by gas phase reaction on silicon 05 p0736 A66-14978
- Stable aerosol formation from vapor pressure of hot lava of volcanic eruptions, causing evaporation and condensation from gas phase 10 p1607 A66-21288
- Phase behavior in helium-xenon system exhibiting gas-gas equilibria 13 p2018 A66-26444
- Correlations between Lennard-Jones potential parameters and critical and boiling point constants of 28 nonpolar and 17 polar gases 15 p2618 A66-29718
- Solid-vapor equilibrium in helium-methane system from triple point equilibrium temperature of methane down to low temperature within limits of flame ionization technique 20 p3676 A66-37086
- Ignition analysis of condensed phase fuel suddenly exposed to stationary hot oxidizing gas, noting strong pressure effect due to feedback mechanism 20 p3626 A66-37386
- Elementary gas phase reactions involving atoms and radicals by mass spectroscopic and diffusion cloud methods 21 p3702 A66-38472
- High temperature rate constants for H-atom transfers involving light atoms evaluated, using hard sphere collision theory 22 p3950 A66-39924
- Low pressure low temperature ignition of hypergolic propellants, particularly hydrazine-nitrogen tetroxide systems, in space environment simulator and conclusions on gas phase reactions 22 p3892 A66-40237
- Homogeneous gas phase and surface reactions based on mass transfer mechanism during quenching of oxygen-nitrogen mixtures from high temperatures 24 p4170 A66-42134
- GAS PRESSURE**
- Noble gas ion beams produced by duoplasmatron magnetically analyzed while varying gas pressure in source 01 p0114 A66-10850
- Pulse ionization manometer based on open 6Zh2P pentode with oxide cathode for measuring fluctuating inactive-gas pressure 04 p0520 A66-13893
- Roberts method determining accommodation coefficients of gases on bare wires leads to erroneous conclusions due to thermal inertia of experimental apparatus in vicinity of current paths 04 p0545 A66-14170
- Pressure dependence of Townsend second coefficient for sparking potential in gases at constant E/p 06 p0911 A66-16283
- Compensation magnetic probe and plasmascopie study of plasmoid motion in uniform axisymmetrical magnetic field 08 p1264 A66-19182
- Temperature and gas pressure in sunspots determined by measuring equivalent width and intensity of damped wings of spectral lines 09 p1457 A66-20465
- Ionization phenomena in argon due to laser radiation by measuring electron density and energy as time function after laser pulse initiation at different gas pressures and preionized conditions [AIAA PAPER 66-176] 10 p1565 A66-21690
- Laboratory instrumentation for testing and calibration of in situ probes for lower ionosphere, mesosphere and stratosphere 13 p2059 A66-26549
- Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 14 p2340 A66-27148
- Static pressure distributions in supersonic nozzle flows of dissociated hydrogen plus argon 14 p2219 A66-27442
- Fluorescence lifetime measuring technique employing pulsed or modulated RF discharges applied to emission of second positive and first negative systems of nitrogen 14 p2337 A66-27974
- Energy balance of stationary discharges in quartz containers filled with gas at various pressures, determining relation of heat and light loss of discharge to gas pressure and discharge power 15 p2551 A66-29215
- Shock transition in multihead spin structure of self-sustaining gaseous detonations in oxyacetylene mixtures, including interferometric and schlieren photographic density, temperature and pressure measurements 15 p2618 A66-29607
- Pulse ionization manometer based on open 6Zh2P pentode with oxide cathode for measuring fluctuating inactive-gas pressure 15 p2503 A66-29706
- Pressure rise in inner region of hydrogen arc discharge in axial magnetic field 16 p2764 A66-31352
- Manometer for measuring gas pressure from current required to heat platinum wire to certain temperature 16 p2708 A66-31359
- Detection of arrival of He driver gas in test section of shock tunnel 17 p2903 A66-32474
- Gas pressure dependence of attachment and recombination coefficients for thermalized electrons in air and oxygen 18 p3143 A66-34035
- Natural vibration frequencies of rocket nozzles, accounting for anisotropic elastic behavior, internal gas dynamic pressure, boundary conditions, etc 18 p3258 A66-34601
- Low-inductance hydrogen gas discharge switch tube based on gas pressure-electrode spacing control of ionizing collisions 19 p3280 A66-35812
- Tungsten and tungsten composite fabrication by gas-pressure-bonding process 19 p3368 A66-36123
- Residual gases total and partial pressures measured, using pressure gauges incorporating hot or cold cathodes, noting omegatron 19 p3361 A66-36616
- Gas pressure effect on excitation of 4.38-ev level in Pb during hollow cathode discharge in magnetic field 20 p3579 A66-37780
- Continuous in vivo recording of partial pressure of arterial carbon dioxide and oxygen by mass spectrography 21 p3701 A66-39494
- Hydrogen, nitrogen, oxygen and helium gas pumping by ionization pressure gauges in space simulators 22 p3891 A66-40233
- Pressure- and gain-dependent frequency shift measurements in stabilized 6328 angstrom He-Ne laser 24 p4224 A66-42803
- Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 24 p4244 A66-42968
- Ionization gauge for transient gas pressure measurement 24 p4215 A66-43210
- GAS PROPELLANT**
- Wall friction, heat transfer and real-gas propellant effects in two-stage light gas guns 11 p1685 A66-22837
- Reverse-flow film cooling of small rocket engine chamber 12 p1937 A66-24718
- Particle size distribution, aging effects, terminal velocity measurements and production techniques of slush hydrogen investigated as potential upgraded spacecraft fuel 20 p3676 A66-37075
- GAS-SOLID INTERFACE**
- Quantum theoretic probability of trapping inert gas atom on solid surface with linear lattice 01 p0108 A66-10634
- Multiphase flow system with regard to chemical and nuclear processes, rocketry and air pollution control noting adiabatic potential, laminar and electrodynamic flow 03 p0354 A66-12312
- Turbulent boundary layer interaction with graphite heat shield noting boundary layer velocity, temperature and chemical composition profiles [AIAA PAPER 65-824] 03 p0446 A66-13232
- Gas phase nonideality and mean column pressure effects on sample retention in gas-solid partition chromatographic systems with real carrier gases 04 p0472 A66-13396
- Satellite drag coefficient reevaluated in consideration of recent data on gas-surface interaction and atmospheric composition 05 p0760 A66-14941
- Gas mean and solid mean velocity profiles of small particles suspended in turbulent air, noting effect of solid motion on laminar structure and shear stress at wall [ASME PAPER 65-WA/FE-24] 05 p0665 A66-15713
- Momentum and energy accommodation coefficients for moving gas interaction with solid surface, with attention to molecular mass and velocity flux distribution 07 p1083 A66-18135
- Nonequilibrium ionization of suspension of solid particles expanding supersonically in nozzle, particularly lowering of ionization due to injection in flow of high work function 15 p2615 A66-28762
- Thermal energy exchange between gases and solid surfaces, using realistic interaction potentials of Morse type, Maxwellian velocity distribution 16 p2825 A66-30387
- Momentum and energy accommodation for hypervelocity gas particles on crystal surface, using Lennard Jones potential and approximating lattice by system of independent forced harmonic oscillators 16 p2752 A66-30388
- Interaction between gas particles and solid surface examined, noting idealization of Morse potential and use of analog computer 16 p2655 A66-30390
- Energy accommodation coefficient variation with energy of gas molecules impinging on clean surfaces or adsorbed monolayers 16 p2645 A66-30391
- Hydrogen, He, Ne and Xe high energy molecular beam scattering from gold film surfaces during evaporative deposition 16 p2752 A66-30392
- Energy transfer measurements in gas-solid surface interactions initiated by electron beam-excited photoemission 16 p2701 A66-30397
- Electrostatic theory of physical adsorption applied to gas-solid chromatography, discussing chromatographic inseparability of argon and oxygen at room temperature, prediction of elution order of many gases, etc 16 p2646 A66-30646
- Heat shield and rocket nozzle chemical reactions based on equilibrium thermodynamics of high temperature materials at gas-solid interface 18 p3260 A66-33825
- Solid propellant ignition, discussing deflagration wave propagation along gas-solid grain surface, flux equilibrium equation, etc [AIAA PAPER 66-668] 18 p3165 A66-34441
- Mass transfer across gas-solid interface

associated with semiconductor solids 18 p3087 A66-34737

Mass transfer into aerodynamic body flow fields, examining model shear flow in Rayleigh problem for blowing current across gas-solid interface 23 p4058 A66-41900

Thermal accommodation coefficients of He on tungsten and hydrogen on hydrogen-covered tungsten at temperatures of 325, 403 and 473 degrees K 23 p4033 A66-42078

Arc image stagnation-flow reactor for measuring gas-solid reaction rates between 2000 and 3000 degrees K 24 p4216 A66-43214

### GAS SPECTROSCOPY

Absorption coefficient for lines with combined Doppler and Lorentz broadening calculated, using Runge-Kutta method, continued fraction expansion and Hermite-Gauss quadrature 03 p0393 A66-13267

Photochemical studies of oxygen-ozone and carbon dioxide equilibria with bromine UV lamp 04 p0473 A66-13397

Forced Mandelstam-Brillouin scattering in gases, determining hypersonic velocity for three gases 09 p1408 A66-20770

Gas spectroscopy of laser-induced stimulated Brillouin effect in high pressure oxygen 11 p1715 A66-23432

Temperature measurement in shock heated gases via spectrum line reversal method, noting connection between electronic excitation and effective vibrational temperature 13 p2208 A66-25159

High-temperature gas radiance in simulated planetary atmosphere at various entry velocities [AIAA PAPER 66-183] 13 p1990 A66-25169

Empirical curve of growth on S/I/ line of 1-0 hydrogen quadrupole band obtained, laboratory and planetary hydrogen quadrupole spectra corrected for saturation 13 p2184 A66-25621

Organic gas magnetically tuned laser spectroscopy, discussing resolution, absorption spectra and vibrational deactivation 13 p2100 A66-26197

Vibrational-rotational line strengths and widths in carbon dioxide, using carbon dioxide-neon laser 14 p2306 A66-27030

Forced Mandelstam-Brillouin scattering in gases, determining hypersonic velocity for three gases 14 p2341 A66-27305

Energy dependence of elastic resonance scattering of low energy electrons from He, Ne, Ar and nitrogen gases at angles ranging from 8 to 110 degrees 14 p2337 A66-27797

Shock tube techniques used in measurement of temperature and absolute line intensities for neutral atoms of iron, lead and tin 18 p3109 A66-33695

Book on microwave spectroscopy of gases 18 p3065 A66-35237

Single continuous correlation for total band absorbance of radiating gases 20 p3678 A66-37121

Spectroscopic electron beam diagnostic technique, examining negligible effect elevated vibrational temperatures have on measured rotational temperatures of molecular nitrogen [AIAA PAPER 66-747] 22 p3919 A66-40633

Spectrum of three-times ionized nitrogen analyzed in wavelength region 300-8000 angstroms, using theta pinch discharge, connecting singlets and triplets 24 p4240 A66-43104

### GAS STREAM

Evaluating temperature measuring methods for hot gas stream in thermal-to electric-energy converters 01 p0066 A66-10204

Localized calorimetric enthalpy measurements in high-energy-content gas stream using evaporating liquid film to cool gas sample 01 p0165 A66-10908

Group of transforms derived for functional in which Euler equation coincides with Crocco equation describing plane vortex gas streams 04 p0512 A66-14437

Gas stream behind shock wave in contracting channel, discussing flow parameters during discharge from supersonic and divergent nozzle 05 p0607 A66-15321

Stability of three-layer cylindrical shell in gas stream, analyzing oscillation mode and critical flutter dependence on filler resistance to transverse shear 08 p1314 A66-19581

Nonuniform thermal flux for fuel elements and core of nuclear heat exchangers, determining heat transfer coefficient between adjacent fluid streams by mass transfer 12 p1973 A66-23527

Mixing zone of two wakes, studying cooling effect of gas stream directed tangentially or at small angle to container 16 p2689 A66-31607

Critical lengths in subsonic and supersonic gas-particle flow in vertical constant area tube, considering effect of governing variables and inlet conditions of system [ASME PAPER 66-FE-19] 17 p2915 A66-33272

Radiative and convective heat transfer between two parallel streams of absorbing and emitting radiating gases 21 p3835 A66-38715

### GAS TRANSPORT

Laminar boundary layer of nitrogen flow over helium cooled sphere with porous wall 01 p0162 A66-10463

Aircraft control power requirements provided by lift fan propulsion system for V/STOL flight, noting gas power transfer [SAE PAPER 650831] 01 p0130 A66-10830

Approximation formulas for certain collision integrals of gas transport 03 p0395 A66-12836

Monte Carlo method solution of heat transfer in rarefied gas between infinite flat plates 05 p0787 A66-14987

Book on determining radiative contributions to energy and momentum transport in gas under almost any density and temperature conditions 06 p0913 A66-17157

Monte Carlo method to reveal properties of hydrogen transport near critical level of escape of Earth upper atmosphere 07 p1028 A66-17362

Radiant flux to base region of axisymmetric real gas system with nonisothermal temperature distribution 07 p1151 A66-17588

Second and third virial coefficient for exponential repulsive potential by accurate numerical integration and by asymptotic formula 07 p1083 A66-17934

Nonisothermal gaseous transport of hot injected plasma in semiconductor 07 p1103 A66-18213

Hydrogen feeding through single-layer metallic porous electrode of fuel cell on open circuit 08 p1171 A66-19649

Arc plasma generator for anode research, noting design operation techniques and results [AIAA PAPER 66-162] 10 p1485 A66-21687

Multidimensional radiation transport equations for nonscattering quasi-equilibrium gray gas obtained by spherical harmonic approximation [AIAA PAPER 65-81] 10 p1621 A66-21774

Instability criterion in air, argon and carbon dioxide at various pressures and layer depths, detecting convection and determining Rayleigh number for application in transport properties of gases 12 p1980 A66-24942

Conditions under which gas bubbles arise in organs and physiological fluids of living organism during pressure drop 13 p2011 A66-26577

Mathematical representation for transport phenomena in living organism 13 p2011 A66-26578

Book on heat transfer covering new instrumentation and analytical techniques for definitive solution to classical and complex problems 16 p2824 A66-30301

Measuring and calculating methods for dilute gas transport properties independent of fluid dynamic environment in which they operate 16 p2825 A66-30306

Approximation formulas for certain collision integrals of gas transport 19 p3404 A66-36778

Thermal conductivity of gases measured, using thermal diffusion columns 23 p4149 A66-41502

Mixing of gases in hydrogen-oxygen fuel cell, noting membrane allowing only electrolyte to pass through electrodes 24 p4161 A66-42502

### GAS TURBINE

#### SA AFTERBURNER

#### SA AIRCRAFT ENGINE

## SA TURBINE ENGINE

Nickel-chromium base alloys considering aircraft and industrial gas turbine application 02 p0244 A66-1174

Refractory metals for gas turbine an ramjet aircraft engines, noting niobium an tantalum alloys 02 p0245 A66-1174

Operating performance of deep groove ball bearing used for gas turbine at high d values 03 p0372 A66-1246

Centripetal gas turbine interblade channel without diffuser regions in rotor eliminate pressure gradient buildup in flow core 03 p0315 A66-1264

Casting technique based on directional solidification for nickel and cobalt alloy used in gas turbine blades [AIAA PAPER 65-742] 03 p0382 A66-1304

Energy balances for combustion chamber of gas turbines by electronic computer 03 p0416 A66-1320

Book on matched parameters of gas turbine engines for aircraft including rpm and peripheral speed, calculating parameters for axial-flow compressors, centrifugal compressors, turbojet, turboprop, etc 04 p0573 A66-1400

Regenerative heat exchangers, covering heat transfer and pressure loss characteristics of glass ceramic materials [ASME PAPER 65-HT-35] 05 p0784 A66-1474

Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations 05 p0662 A66-1494

Aerodynamic analysis of cryogenic radial inflow turbines, noting optimum velocity distribution [ASME PAPER 65-WA/PID-6] 05 p0608 A66-1560

Cooling effect of secondary fluid injection on heat transfer between shrouded rotating disk and radially inward main flow stream [ASME PAPER 65-WA/HT-20] 05 p0789 A66-1566

Alloy steel fracture resistance, describing creep strain effect on gas turbine engine alloys [ASME PAPER 65-WA/MET-13] 05 p0703 A66-1561

Traveling wave vibration in stationary and rotating cylindrical shells in gas turbine engines [ASME PAPER 65-WA/GTP-3] 05 p0780 A66-1573

Supersonic cascade tunnel to evaluate compressor blade performance [ASME PAPER 65-WA/GTP-4] 05 p0661 A66-1573

Pulse jet engine where hot gas discharge rather than developing thrust is used to obtain shaft power [ASME PAPER 65-WA/GTP-6] 05 p0745 A66-1572

Air cooled gas turbine rotor and stator airfoils, presenting problem definition analysis techniques, material application and cascade and engine testing [ASME PAPER 65-WA/GTP-10] 05 p0691 A66-1573

Vibration in aircraft jet engine rotating compressor disks of small and large blades [ASME PAPER 65-WA/GTP-11] 05 p0780 A66-1573

Density and Reynolds number effects on turbine meter performance in gas flow measurement [ASME PAPER 64-WA/FM-1] 06 p0879 A66-1621

Production and recent developments in gas turbines and propulsive engines in West Germany 06 p0942 A66-1678

High temperature alloys for gas turbine examining advances in creep strength, low cycle fatigue and wrought and cast turbine blading alloys [SAE PAPER 650708] 06 p0898 A66-1707

Capability of investment casting process for production of integrally cast turbine wheels and nozzles for high temperature gas turbine application [SAE PAPER 650706] 07 p1037 A66-1724

Temperature indicating paints applied to high-temperature and high-velocity gas streams in gas turbine design [SAE PAPER 650705] 07 p1110 A66-1786

Gas temperature effect on therm

- condition of vanes during acceleration of gas turbine engine 08 p1281 A66-18866
- Carbon seals for gas turbine evaluated in statistically designed test 08 p1232 A66-19381
- Method 08 p1232 A66-19381
- Dimensional stability and structural integrity of labyrinth seals, considering various mechanical design criteria in application to aircraft gas turbines [SAE PAPER 660048] 09 p1383 A66-20150
- Precision casting based on directional solidification resulting in longitudinal columnar grains with preferred orientation, eliminating transverse grain boundaries in gas turbine elements 09 p1388 A66-20153
- [SAE PAPER 660055] 09 p1388 A66-20153
- Aircraft turbine engine oil drain practices, discussing engine design and materials and minimum and maximum drain time [SAE PAPER 660073] 09 p1434 A66-20158
- Polytropic technique for gas turbine performance, prediction and evaluation, noting use of sophistication factor [SAE PAPER 660161] 09 p1434 A66-20161
- Auxiliary turbine power generator using gas from solid propellant 09 p1333 A66-20331
- BMW model 6012 gas turbine for helicopter application weighs 50 kg but develops 100 hp 10 p1591 A66-21402
- Cooling effect of secondary fluid injection on heat transfer between shrouded rotating disk and radially inward main flow stream [ASME PAPER 65-WA/HT-20] 11 p1785 A66-22194
- Fatigue life of aircraft gas turbine compressor disks subjected to cyclic loading 11 p1710 A66-22691
- Heat resistant nickel-based alloys for gas turbine blades and disks 11 p1716 A66-22752
- Text on fundamentals of aircraft gas turbine engine design, including component design and calculation 11 p1762 A66-23310
- Constant oil monitoring system using electric conductivity tester for extending oil life in gas turbine engines [SAE PAPER 650814] 12 p1935 A66-23844
- Alloy steel fracture resistance, describing creep strain effect on gas turbine engine alloys [ASME PAPER 65-WA/MET-13] 12 p1896 A66-24535
- Superalloy coatings for gas turbine components assessed, criticizing lack of objective comparative data, noting pack-cementation and spray diffusion processes 13 p2108 A66-25652
- Soviet book on automation and control of air breathing gas turbine and ramjet engines 13 p2173 A66-26463
- Intermittent propellant flow gas turbine for spacecraft power supply [AIAA PAPER 64-754] 13 p2008 A66-26655
- Nonconventional application of electric power-generating closed-cycle gas turbines [ASME PAPER 66-GT/CLC-8] 14 p2224 A66-26981
- Graphical matching solution for gas turbine power plant closed cycle systems [ASME PAPER 66-GT/CLC-14] 14 p2224 A66-26984
- Blade noise generation in gas turbine engines [ASME PAPER 66-GT/N-43] 14 p2372 A66-26988
- New cycle concepts in development of gas turbine and turbomachinery [ASME PAPER 66-GT-85] 14 p2372 A66-26991
- Shaft-power turbine design, including rotor vibration problems, computer high speed testing, application as auxiliary power supply in turbojets, etc [ASME PAPER 66-GT-87] 14 p2225 A66-26992
- Inlet guide vane system for control of small single-shaft gas turbines [ASME PAPER 66-GT-89] 14 p2372 A66-26993
- Small gas turbines, market, technical problems, etc [ASME PAPER 66-GT-90] 14 p2372 A66-26994
- U.S. Army program for small gas turbine, noting turbine specific horsepower, component, payload-range curve, etc [ASME PAPER 66-GT-91] 14 p2372 A66-26995
- Overrunning clutches in gas turbines, design, performance characteristics and application to A-4D Skyhawk aircraft, UH-2 helicopter and Curtiss-Wright X-19 VTOL drive systems [ASME PAPER 66-GT-92] 14 p2300 A66-26996
- Second thermodynamic law analysis of availability balance for conventional gas turbine and free-piston gasifier [ASME PAPER 66-GT-96] 14 p2372 A66-26999
- Long-life base load service at 1600 F turbine inlet temperature, noting fuel-air and temperature controls [ASME PAPER 66-GT-98] 14 p2372 A66-27000
- Cold work and precipitation hardening effect on tensile and thermal characteristics of gas turbine alloys [ASME PAPER 66-GT-102] 14 p2312 A66-27002
- CERCOR glass-ceramic axial flow rotary regenerator as inexpensive component for gas turbine regeneration [ASME PAPER 66-GT/107] 14 p2301 A66-27004
- Liquid phase compression in closed cycle gas turbine by using particular working fluids for application to nuclear power stations [ASME PAPER 66-GT-111] 14 p2411 A66-27005
- Effect of vacuum arc remelting of airmelt electrodes on structure and elevated temperature properties of nickel base gas turbine superalloy [ASME PAPER 66-GT-113] 14 p2313 A66-27007
- Circumventing turbine inlet temperature limitation of gas turbines by direct fluid-to-fluid energy exchanger, using isentropic compression waves to avoid shock losses [ASME PAPER 66-GT-117] 14 p2373 A66-27009
- Bypass engine development from conventional gas turbine to ducted-fan and aft-fan engine, noting principle of afterburning 14 p2373 A66-27014
- Negative effect of air countercurrents and thermal stresses on performance of cooling systems of gas turbine rotor disks with lateral air flow 15 p2570 A66-28776
- Gas turbine fuel controls, analysis and design 15 p2570 A66-28851
- Analog computer simulation of gas turbine engines for control study, discussing steady state performance and transient response data, surge region, maximum acceleration, etc 15 p2570 A66-28852
- Electronic simulation for evaluation of control concepts and system behavior of regenerative gas turbines 15 p2571 A66-28853
- Literary acceleration limiting fuel control for gas turbine engines during speed transients 15 p2571 A66-28854
- Gas turbine engine analog simulation for acceleration sensing fuel control studies, comparing results with actual engine performance 15 p2571 A66-28855
- Effect of recuperators on governing of single shaft gas turbine engines and methods used to provide satisfactory governing and overall characteristics 15 p2428 A66-28856
- Fuel flow reset and other methods of governing performance of gas turbines 15 p2571 A66-28857
- Digital approach to gas turbine engine control based on use of pulsewidth modulated information obtained with aid of simple circuits 15 p2571 A66-28858
- Microelectronic fuel control for gas turbine engines, discussing mechanical flow and microelectronic packages and component fabrication and assembly 15 p2571 A66-28859
- Lightweight universal fuel control for commercial aircraft, discussing engine requirements, design 15 p2571 A66-28860
- Small gas turbine engine controls, discussing design, development and cost factors 15 p2571 A66-28861
- Fluid devices for sensing, amplifying, controlling and logical functions in gas turbine control systems 15 p2572 A66-28862
- Factors affecting useful life of subsonic gas turbine engine components including metallurgical variances, stress-cycle relationships, surface coating, etc [SAE PAPER 660312] 15 p2573 A66-29837
- Oxide-base cermets prepared by infiltration with silver and silver alloys, noting dispersion strengthening, bend creep, impact loading, etc, for gas-turbine application 16 p2730 A66-30250
- Ceramic materials selection for principal high temperature components of gas turbines 16 p2790 A66-30256
- Supersonic cascade tunnel used to evaluate compressor blade performance [ASME PAPER 65-WA/GTP-4] 16 p2673 A66-30340
- Traveling wave vibration in stationary and rotating cylindrical shells in gas turbine engines [ASME PAPER 65-WA-GTP-3] 16 p2813 A66-30342
- Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations [ASME PAPER 65-WA/GTP-2] 16 p2684 A66-30344
- Split-inner-race ball bearings design for use as thrust bearings on aircraft gas turbines [ASME PAPER 66-LUBS-10] 17 p2931 A66-33183
- Gas turbine theory operating principle analyzed by Teodorescu-Coanda networks, including definition of depressive blade and fluid flow analysis 17 p2992 A66-33488
- Increasing mass flow through gas turbine without additional work from compressor and consequently increasing thermal efficiency, noting combustion problem [WSCI 66-17] 18 p3164 A66-34424
- Calibration of turbine flow meter on air against pitot tube traverse, considering random scatter 19 p3362 A66-36750
- Discharge of cooling air from blades into flow-through part of gas turbine, examining mixing of gas behind blade array with air from blade edges and effect of injected air on turbine efficiency 20 p3627 A66-36913
- Natural convective heat transfer to gas turbine rotor blade and thermal resistance of cooling system using centrifugal pump 20 p3627 A66-36926
- Aircraft turbine engine oil drain practices, discussing engine design and materials and minimum and maximum drain time [SAE PAPER 660073] 20 p3628 A66-37255
- Aircraft gas turbine starting with automatically controlled electronic unit, noting system design, operation and performance 20 p3540 A66-38299
- Optimization of efficiency of gas turbine cycles with heat recovery by finite difference method using digital computer 21 p3807 A66-38805
- Compressed-gas dispersion effect on gas turbine engine operation, deriving spraying law, jet stream, penetration depth, etc 21 p3808 A66-38934
- Gas turbine compressor rotor and power shaft fabrication using electron beam welding 22 p3924 A66-40258
- Cooled blades in gas turbines allowing use of higher gas temperatures and necessitating calculation of heat transfer and skin friction coefficients 22 p3999 A66-40492
- Three-term governor for gas turbine engine system, examining effect of internally generated pressure noise on performance of different possible hydraulic systems 22 p3972 A66-40513
- Casting technique based on directional solidification for nickel and cobalt alloys used in gas turbine blades [AIAA PAPER 65-742] 23 p4079 A66-40973
- Gas turbine blades fabricated from various alloys tested in stationary turbine burning diesel fuel 23 p4121 A66-41401
- Materials and cooling of aircraft gas turbine engines, noting nickel and tantalum alloys, turbine-inlet temperatures, coatings, etc 23 p4122 A66-41662
- ## GAS VALVE
- Combustion chamber of propulsive duct including duct potential, feedback, reed-type valve, aerodynamic valve, Venturi design, fuel control, etc 07 p1110 A66-18162
- Low temperature system for thermal conductivity measurements using Ge and Pt resistance thermometers and He exchange gas switch 24 p4215 A66-43207
- ## GAS VISCOSITY
- Shock wave structure for gas with discrete velocity distribution, examining compression and reflection from plane surface, Broadwell model and increase in specific mass 03 p0354 A66-12538
- Terminal rise velocity of small distorted gas bubbles in liquid of small

viscosity 06 p0874 A66-17000  
 Temperature and density dependence of viscosity of parahydrogen determined by Welber torsional crystal method 09 p1392 A66-20082  
 Morse potential functions for nonpolar gases determined from experimental viscosity and second virial coefficient 12 p1917 A66-23934  
 Binary-collision expansion for viscosity of two-dimensional gas of hard disks, showing dynamical origin of divergence appearing in first correction of Boltzmann equation 13 p2136 A66-26276  
 Viscosity of equilibrium dissociating nitrogen tetroxide calculated from compressibility and critical parameters 14 p2371 A66-27827  
 Viscosity coefficients of gas mixtures at atmospheric pressure and various temperatures 14 p2415 A66-28328  
 Reevaluation of data and equations used in calculation of air viscosity coefficient and application to wind tunnel experiments 16 p2685 A66-30911  
 Collision integrals calculated for interactions Li-H, Li-Li, H-H and H-H plus in LiH system 16 p2766 A66-31612

**GAS WELDING**  
**SA TUNGSTEN INERT GAS /TIG/ WELDING**  
 Short-circuiting gas metal-arc welding of high nickel alloys for manufacture of liquid rocket engine components with aerospace quality 05 p0686 A66-14691  
 Electrode tip geometry effect on characteristics of gas tungsten arc welding operating in cathode spot mode 05 p0686 A66-14693  
 Spray transfer gas metal-arc welding of titanium plate, using flux backing technique 13 p2087 A66-26016  
 Porosity at weld fusion zone-base material interface in gas tungsten-arc and electron beam welds of tantalum 13 p2110 A66-26018  
 Gas mixtures evaluation for MIG welding aluminum alloy noting nondestructive, mechanical and stress corrosion testing 22 p3925 A66-40266

**GASEOUS DIFFUSION**  
 Diffusivities of oxygen in polycrystalline niobium at 600 and 815 degrees C 02 p0243 A66-11721  
 Probes in atmospheric pressure argon plasma where ion diffusion is function of temperature 03 p0406 A66-13280  
 Gaseous impurity distribution /oxygen/ between scale and diffusion layer after heat treatment of various titanium alloys 05 p0699 A66-14700  
 Diffusion in supersonic duct flow composed of boundary layers, with application to hypersonic inlet with internal compression [AIAA PAPER 64-245] 05 p0806 A66-15071  
 Determining isothermal diffusion coefficients of gases under isobaric conditions 06 p0908 A66-16154  
 Porous gas-diffusion electrodes analyzed by using four different models, comparing resulting current density-polarization characteristics 07 p0990 A66-17239  
 Pressure dependency in oxidation of platinum above 800 degrees C explained by boundary layer diffusion mechanism 07 p1000 A66-17476  
 Electron conservation equation and effects of laminar or turbulent flow on breakdown in gases 08 p1206 A66-18933  
 Geometrically ordered gas-diffusion electrodes for fuel cells consisting of platinum steel with funnel-shaped cavities 09 p1333 A66-20424  
 Gaseous heat engine cycle with gas compression from molecular effusion through capillary material 11 p1639 A66-22244  
 Thermomolecular heat pump with cooling from gas diffusion through capillary material driven by external pressure difference 11 p1639 A66-22245  
 Gaseous diffusion in polymeric foam and experimental results, using closed cell polyurethane foam 13 p2112 A66-25304  
 Functional mechanism of gas diffusion electrode 13 p1998 A66-25668  
 Performance of porous gas diffusion electrode 13 p1999 A66-25669  
 Theory of gas porous electrode with model 13 p1999 A66-25670

Design of gaseous diffusion electrode 13 p1999 A66-25671  
 Stability of cylindrical sheet of fluid during motion through motionless gas ambient 14 p2273 A66-26778  
 Mass spectrometry of composition and density of neutral atmosphere, noting diffuse separation of gases 14 p2285 A66-27621  
 Argon diffusion from biotite of mica schist due to intrusion of dyke analyzed on basis of thermal metamorphism and isotope migration 14 p2384 A66-27848  
 Mobility of various ions in nitrogen and argon and mobility and diffusion of ions in hydrogen 14 p2345 A66-28138  
 Diffusion combustion in laminar boundary layer between two plane-parallel co-current streams 14 p2416 A66-28485  
 Oscillatory phenomenon in gaseous multicomponent diffusion, noting convection caused by density inversion 15 p2481 A66-29745  
 Determining isothermal diffusion coefficients of gases under isobaric conditions 15 p2543 A66-29884  
 Separation of gaseous, liquid and solid reaction products generated by hot salt corrosion of titanium, noting gas diffusion effect on cracking 19 p3379 A66-35659  
 Gaseous diffusion cells to remove carbon dioxide from spacecraft life support system, discussing construction material in terms of permeability coefficients substrate porosity 19 p3293 A66-36236  
 Molecular diffusion coefficient calculated in 130-200 km region from time variation of radiance distribution from glow clouds produced by grenade detonation 21 p3734 A66-39339  
 Gold doping effects on recovery time of phosphorus, boron and arsenic impurity gaseous-diffused junction diodes and estimated gold recombination center densities 22 p3873 A66-39749  
 Gaseous dispersion in laminar flow through circular tube with mass transfer to retentive layer 22 p3900 A66-40411

**GASEOUS FISSION REACTOR**  
 In-pile pumping system tested on thermionic converter SIRENE 56 for gaseous fission products 05 p0619 A66-15565  
 Plasma core nuclear rocket utilizing MHD driven vortex [AIAA PAPER 65-583] 14 p2329 A66-27409  
 MHD species separation of U 235 from hydrogen in gaseous nuclear rocket using time varying traveling wave electromagnetic field [AIAA PAPER 66-499] 16 p2745 A66-30606

**GASEOUS IONIZATION**  
**SA PENNING DISCHARGE**  
 Electron collision cross sections of atoms and molecules of argon, helium, nitrogen and dissociation products of carbon dioxide by dual beam radiosonde methods to study low temperature plasma behind shock front 02 p0288 A66-11780  
 Inverted ion magnetron principle of gas ionization based on velocity of rotation of electron sheet on anode 05 p0723 A66-15162  
 Ionization of inert-gas atoms and of hydrogen and nitrogen molecules by alkali metal ions of energies greater than 1 to 30 kev 06 p0915 A66-16151  
 Pressure dependence of Townsend second coefficient for sparking potential in gases at constant E/p 06 p0911 A66-16283  
 Ionization rate behind shock waves in argon, allowing for excitation and ionization by atom-atom collisions 07 p1020 A66-17938  
 Hydrogen and oxygen ionization at three-phase boundary in alkaline solutions on smooth metals 08 p1171 A66-19650  
 Line intensities of first negative bands of nitrogen molecular ion measured as function of bombarding electron energy and gas pressure 09 p1404 A66-20377  
 Plasma generation by fission fragment ionization of noble gases, discussing theory, ionization tube and data analysis 10 p1564 A66-21545  
 Plasma production by optical irradiation of gases and by solids, considering interaction of laser radiation with surfaces and irradiation of particles of solid material in vacuum [AIAA PAPER 66-174] 11 p1742 A66-22212

Growth rate of ionization by electron impact in presence of laser beam, elastic and inelastic scattering cross sections, free absorption, excitation and ionization coefficients, breakdown times and thresholds 13 p2134 A66-26276  
 Ionic drift velocity peak function for the interconverting nitrogen ion species drift in gas in electric field 15 p2550 A66-28328  
 Plasma ionization associated with thermal electron or nonthermal distribution of electron velocities for various gas densities 15 p2554 A66-29884  
 Ionization of inert-gas atoms and hydrogen and nitrogen molecules by alkali metal ions of energies greater than 1 to 30 kev 15 p2548 A66-29884  
 Effective ionization and charge exchange areas of certain gases undergoing collision ionization by accelerated ions 17 p2961 A66-32961  
 Ionization of low temperature supersonic plasma jets, noting kinetics of elementary processes, gas dynamic parameters and effects of combustion and alkali metal admixtures 18 p3143 A66-34443  
 Ionization processes in hot products of combustion processes /flame gases/ as well as plasma media, noting flame properties, mass spectroscopy, electron concentration, etc 18 p3260 A66-34443  
 Transmission of luminous flux due to ionization of gases by high power laser measuring energy absorption in ionization zone 19 p3403 A66-36236  
 Initial phase of shock produced ionization in argon, krypton and xenon to elucidate atom-atom ionization reaction to determine cross section 23 p4098 A66-42698

**GASTROINTESTINAL SYSTEM**  
**SA DIGESTIVE SYSTEM**  
**SA INTESTINE**  
 Gastric secretion after simultaneous action of radiation and hypoxia 06 p0810 A66-16154  
 Short-term starvation effect on gastric mucosa of weanling vs post-weanling rats 16 p2638 A66-30606

**GAUGE**  
**SA FUEL GAUGE**  
**SA ION GAUGE**  
**SA IONIZATION GAUGE**  
**SA PRESSURE GAUGE**  
**SA SPUTTERING GAUGE**  
**SA STRAIN GAUGE**  
**SA THERMOCOUPLE GAUGE**  
**SA VACUUM GAUGE**  
 Gauge transformations of third kind operator gauge transformations of first and second kinds, relating electron and photon propagators to quantum electrodynamics vertex function 23 p4098 A66-42698

**GAUGE INVARIANCE**  
 Covariant gravitational field equations in de Sitter space and quantum mechanical equations of motion associated with particles of given spin, employing gauge principle 21 p3769 A66-38669

**GAUSS FUNCTION**  
 Self-consistent field calculations of benzene molecule using Gaussian expansion functions, considering 42 electrons and finding interspersions of sigma and pi levels 04 p0473 A66-12673  
 Set theory applied to zero-memory nonlinear stochastic problems to determine Gauss function properties 05 p0707 A66-16154  
 Molecular orbitals of diborane using the LCAO method, considering all electrons in molecule, calculating all integrals, with basis functions being Gaussian 06 p0940 A66-16154  
 Relationship between geometric optics autocorrelation approach to lunar planetary radar echoes for Gauss autocorrelation function 09 p1341 A66-17938  
 Radar range measurement accuracy shown to depend on receiver filter 13 p2023 A66-25669

**GAUSS-MARKOV THEOREM**  
 Optimal adaptive estimation of sample stochastic process described by initially unknown parameter vector 06 p0865 A66-16154

**GAUSSIAN DISTRIBUTION**  
 Fatigue analysis calculations of systems with non-Gaussian output, using crest and extremal statistics of strain 01 p0147 A66-10147  
 Homogeneous turbulent flow merging with

- turbulent or laminar flow of equal velocity 01 p0058 A66-10475
- Gaussian probability distribution of bilinear single-degree of freedom system response to impulse excitation [ASME PAPER 65-APMW-29] 04 p0593 A66-14229
- Quasi-stellar radio source 3C 279 observed with on-off technique, noting antenna recorded temperatures to resemble Gaussian distribution 05 p0763 A66-15291
- Anisotropy axes dispersion relation to plane galvanomagnetic effect in thin permalloy films to obtain Gaussian directional distribution 07 p1092 A66-17222
- Localized diffusion of phosphorus in silicon used to produce deep p-n junctions with Gaussian P distribution 08 p1268 A66-18678
- Optimum quantization step for given distribution law of quantized signal, using minimum error distortion criteria 11 p1674 A66-22204
- Equation governing properties encountered in Gaussian beam propagation represented graphically on impedance chart, showing relation between Gaussian mode and geometrical optics 11 p1656 A66-23089
- Computer calculation of depletion layer properties of simultaneously-diffused, double-diffused and triple-diffused transistors 12 p1832 A66-23964
- Emitter capacity in double diffused transistors by integrating Gaussian expression for base impurity concentration 12 p1837 A66-24309
- K emission band of graphite examined, using grazing incidence spectrometer and Gaussian window function 12 p1931 A66-24802
- Statistical distribution of first occurrence and recurrence of crossing of given level in continuous random process determined, using approximate forms and exponential distribution 13 p2116 A66-25141
- Potential energy surfaces on triatomic hydrogen molecule ion computed with generalized Gaussian orbitals 13 p2130 A66-25371
- Density of Gaussian distributions and Wiener-Hopf integral equation 15 p2526 A66-28606
- Integral expression for log likelihood ratio of two Gaussian processes in signal detection 16 p2738 A66-31714
- Anisotropy axes dispersion relation to plane galvanomagnetic effect in thin permalloy films to obtain Gaussian directional distribution 17 p2976 A66-31993
- Asymmetrical property of binary pseudorandom noise generators, noting Gaussian probability density function in output of low pass filter 17 p2894 A66-33110
- Gaussian probability distribution of bilinear single-degree of freedom system response to impulse excitation [ASME PAPER 65-APMW-29] 18 p3249 A66-33587
- Precipitation model explaining formation of rain drops from clouds less than several kilometers thick, assuming Gaussian frequency distribution of vertical currents 18 p3130 A66-35015
- Stimulated emission of radiation in semiconductors, calculating dependence on temperature and impurity concentration, using Kane model with Gaussian band tail for density of states and optical model 21 p3795 A66-38547
- Addition of uniform and Gaussian distributions, exact and approximate solutions 22 p3939 A66-40171
- Dispersive network with attenuation equalizing network, weighting filter for control of output side lobe level with Gaussian shaped frequency response and matching system 23 p4034 A66-41016
- GAUSSIAN NOISE**
- Programming method for determining modulation parameters required to change siren sine wave output to random Gaussian noise 01 p0053 A66-10147
- Optimum detection of diffusion process in white Gaussian noise, using continuous observation 02 p0190 A66-11405
- Wiener kernels of nonlinear system based on cross-correlation techniques 02 p0207 A66-11789
- Statistical description of noise waves including moments, probability distribution and density, spectral density, correlation and covariance and characteristic function 04 p0485 A66-14109
- Numerical characteristics of signal-noise mixture at output of autocorrelation device for sinusoidal signal and Gaussian noise 04 p0501 A66-14407
- Computer determination of signaling alphabet required to ensure reliable digital communication in presence of additive Gaussian noise and interchannel interference 05 p0630 A66-14588
- Probability of error for quadratic digital detectors contaminated by Gaussian noise 05 p0649 A66-15184
- Optimum reception of M-ary Gaussian signals in Gaussian noise in terms of waveform with minimum error probability 05 p0634 A66-15185
- Clutter rejection in radar systems using mismatched filter when Gaussian noise is present, giving results for decaying RF signal and rectangular RF pulse 06 p0828 A66-16137
- Signal optimization for digital communication system over channel characterized by rational transfer function and Gaussian noise having memory 06 p0829 A66-16192
- Maximum likelihood detection of band limited binary signals perturbed by Gaussian noise and intersymbol interference 06 p0829 A66-16193
- Atmospheric noise effect on performance of noncoherent frequency shift keying /NCSFK/ under fading conditions compared with that obtained when noise is Gaussian 06 p0830 A66-16335
- State of continuous nonlinear dynamical system driven by white Gaussian noise from discrete nonlinear observations corrupted by white Gaussian noise [AIAA PAPER 66-38] 06 p0862 A66-16412
- Optimum rate allocation for encoding sets of analog messages when allocation total is fixed by channel capacity 06 p0833 A66-16667
- Degradation of matched filter receiver operating in non-Gaussian noise, considering performance in presence of ideal impulse noise 06 p0856 A66-16864
- Information matrices for estimating range parameters of moving targets obtained by combining a priori information with reflected radar signals with additive white Gaussian noise 08 p1180 A66-18711
- Statistics of product of Gaussian noise process and pseudorandom binary code 09 p1342 A66-19919
- Correlation function of response of multichannel electronic multiplier to Gaussian input noise 11 p1676 A66-22711
- Radio receiver design for precisely given signal and nonsteady Gaussian noise 11 p1658 A66-23221
- One-dimensional probability density of phase derivative of mixture of radio signal and Gaussian noise 11 p1658 A66-23222
- Statistical properties of receiver output under interference conditions, obtaining first order output, probability densities, second harmonic and intermodulation interference terms 11 p1658 A66-23483
- Detection and false alarm probabilities for number of sinusoidal pulses in Gaussian noise subjected to amplitude limiting of arbitrary hardness 12 p1820 A66-24649
- Phase shift keying with transmitted reference, obtaining probability of error for m-phase receiver system in presence of additive Gaussian noise 13 p2019 A66-25147
- Phase coherent digital M-ary transmission with binary waves through Gaussian channel 13 p2022 A66-25554
- Shannon model for capacity of time-continuous and time-discrete Gaussian channel with inputs perturbed by independent noise random variable 13 p2024 A66-25938
- Frequency domain design of time-limited binary signals imbedded in colored Gaussian noise 13 p2052 A66-26078
- Dynamic programming recursive estimation of modal trajectory for nonlinear non-Gaussian noise and comparison with Bayesian estimation and case of Gaussian white noise 13 p2053 A66-26086
- Autocorrelation and hypergeometric function applied in evaluating response of nonlinearities to Gaussian noise 14 p2267 A66-27726
- Number of intersections of level by Gaussian stochastic process 15 p2525 A66-28605
- Controlled noise generation at high pulse rate with avalanche diodes, noting spectral voltage density and temperature coefficient 15 p2458 A66-28894
- Optimal demodulation of analog-type signal transmitted through randomly fading channel, assuming additive Gaussian noise and using vector space approach 15 p2474 A66-29379
- Polyphase coding modulation system with additive white Gaussian noise, finding channel capacity bounds on maximum rate and error exponent 15 p2452 A66-29659
- Analog communication over randomly time varying channels 16 p2654 A66-31331
- Theoretical probability densities of amplitude-comparison, and phase-comparison monopulse radars excited by Gaussian signals and Gaussian noises 17 p2872 A66-31962
- Joint maximum likelihood estimator for signal amplitude and noise power density in coherent PCM channel with white Gaussian noise 18 p3070 A66-34256
- Response of phase-locked loop near threshold to input consisting of modulated carrier and white Gaussian noise, noting role of SNR 18 p3070 A66-34259
- Singular detection of known signals in additive Gaussian noise for application to mathematical models 19 p3296 A66-35334
- Optimum estimate of nonlinear process in presence of non-Gaussian noise and disturbances, deriving algorithm for correcting approximation 19 p3323 A66-35340
- Dependent sampling effect on performance of nonparametric coincidence or median detector, considering constant signal detection in stationary additive noise 19 p3324 A66-35513
- Graph techniques used in connection with nonharmonic series representation of stationary Gaussian signals for analysis of nonlinear systems 19 p3392 A66-36706
- Digital computer synthesis of simulated ground clutter of radar signals produced by noise generator and characterized by power spectral density and probability density functions 20 p3514 A66-37222
- Distribution function for probability density of random process at output of multiplier acted upon by envelopes consisting of Gaussian noise and pulse signal 20 p3515 A66-37380
- Statistical properties of amplitude and phase of output signal of electron beam quadrupole amplifier with superposition of regular signal plus Gaussian noise at input 20 p3519 A66-37997
- Binaural unmasking of tones masked by broadband Gaussian noise including theoretical work on equalization and cancellation model 21 p3702 A66-38646
- Statistical communication theory, examining problem of selecting set of M equipowered finite duration waveforms to minimize error rate for coherent channel perturbed by white Gaussian noise 21 p3704 A66-39140
- Coding scheme using noiseless feedback link to improve communication over noisy forward link, assuming no bandwidth constraint 21 p3704 A66-39142
- Coding scheme using noiseless feedback link to improve communication over noisy forward link, assuming band-limited signals 21 p3704 A66-39143
- Message estimation of sample function from continuous Gaussian random process, establishing and evaluating optimal bounds for procedure 21 p3720 A66-39637
- Approximately minimax detection of vector signal on Gaussian background 22 p3939 A66-40188
- Colored noise under conditions where noise sources produce white Gaussian noise and physical system is modelled by linear finite-dimensional dynamical systems 22 p3884 A66-40397
- S-band waveguide for pulse compression applications, providing cheap means of compressing wideband swept frequency pulses 23 p4035 A66-41024

Neyman-Pearson detector performance in detecting constant signal in additive Gaussian noise 24 p4173 A66-42623

**GCR**  
**S GAS COOLED REACTOR /GCR/**  
**GEAR**

**SA NEUTRON COUNTER**  
 Primary cosmic rays of superhigh energy using extensive air shower data, noting Geiger-Muller counters, scintillation counters and muon detector 05 p0753 A66-15391  
 Vertical intensity and angular distributions of penetrating cosmic ray muons measured by scintillators, Geiger counters and neon flash tubes, underground in India 06 p0877 A66-17039  
 South latitude cosmic-ray plateau determined by measuring cosmic radiation-caused charged particle and neutron fluxes 08 p1284 A66-19415  
 Primary cosmic radiation and terrestrial radiation belt measurement by Cosmos XVII satellite, noting instrumentation, equipment operation and results 09 p1441 A66-20232  
 Particle localization in spark chamber and ion drift in Wilson cloud chamber, noting experimental result of simultaneous observation of identical particles 09 p1379 A66-20233  
 Transistor portable radioactivity detector utilizing self-quenching Geiger-Muller tube 11 p1703 A66-22268  
 Periodic modulations of energetic electron fluxes observed throughout distant radiation zone by Geiger counters aboard satellites suggest MHD wave activity 13 p2175 A66-26354  
 Counting characteristics of SI-5G counters in pre-Geiger region, measuring voltage dependence of dead time 15 p2502 A66-29114  
 Hodoscope recordings of extensive air showers with abnormally low content of penetrating particles 15 p2579 A66-29523  
 Cosmic ray anisotropy and gamma rays in Orion analyzed, using Geiger counter and Cerenkov telescope 15 p2579 A66-29525  
 Extensive air showers at various atmospheric depths analyzed, using hodoscope counters and ionization chambers, noting differential spectra of densities 15 p2580 A66-29528  
 Multiple muon events at sea level and association with air showers detected, using Geiger and scintillation counters 15 p2580 A66-29533  
 AFCL grazing incidence grating

monochromator used with thin window flow Geiger detector on Aerobee rocket for solar spectrum recordings between 30 and 130 angstroms 15 p2605 A66-30079  
 High energy electron acceleration detected in shock transition region of terrestrial magnetosphere, using Au-Si surface barrier solid state detector and IMP-I satellite mounted GM counter 18 p3177 A66-34753  
 Electromagnetic interactions and collisions of particles in cores of EAS studied, using GM counters, plastic scintillators and Wilson cloud chambers 18 p3207 A66-35107  
 Response to EAS electron-photon cascade of plastic scintillator, cloud chamber and Geiger counter tray compared 18 p3208 A66-35112  
 Meson properties analyzed underground by spark calorimeter operated by telescope of Geiger counters 18 p3220 A66-35194  
 Rocket instrumentation for galactic X-ray observation, noting scintillation counter, proportional counter and GM counter 20 p3636 A66-38237  
 Latitude and longitude variation of count rate and intensity-time dependence of proton flux in inner radiation belt measured by Anton 302 G-M counter in Ariel I satellite 20 p3638 A66-38306  
 Angular dependence of charged neutron-producing component of cosmic rays, using 15-channel counter telescope on rotating platform with neutral monitor 24 p4268 A66-42913  
 Distributions of extensive air showers with either fixed number of charged particles or muons, using Geiger counter and scintillation counter 24 p4268 A66-42914  
 Central region of muon shower investigated, using Geiger counter hodoscope detector 24 p4268 A66-42915

**GEL**  
 Adsorption at semiconductor and gel surfaces discussing chemisorption theory, ionizing radiation effect and structural parameters 04 p0563 A66-13768  
 Nonelectrolytes and hydroxy and fluorobenzoates behavior on elution through columns of tightly cross-linked dextran gels 11 p1645 A66-22990

**GEMINI 4 MISSION**  
 Radiation levels on Gemini IV flight including Van Allen belt and South Atlantic Anomaly 15 p2591 A66-29997

**GEMINI 5 MISSION**  
 Preflight planning and training stages for Gemini V, considering spacecraft test, mission simulators, planetarium, survival and parachute training, etc 17 p2868 A66-32686  
 Astronaut observation in Gemini and Mercury space flights that stars cannot be seen in daytime, noting first-magnitude stars and background illumination 22 p3982 A66-40523

**GEMINI 6 MISSION**  
 Gemini VI rendezvous procedure and results, showing success dependence on presentation to flight crew of sufficient information developed on board 17 p3016 A66-32687

**GEMINI PROJECT**  
**SA MERCURY PROJECT**  
 Reliability program for Gemini Launch Vehicle examining hardware changes, hydraulic redundancy, guidance, power distribution and addition of malfunction detection system 01 p0141 A66-10111  
 Gemini navigation problems considering launch vehicle standby guidance, post insertion orbit correction, catch-up maneuvers, rendezvous terminal guidance, orbit navigation and reentry guidance 02 p0254 A66-11315  
 USAF manned space navigation experiment on Gemini and implications on MOL 02 p0255 A66-11318  
 Gemini and Apollo Earth-orbital programs 02 p0185 A66-11615  
 DOD Gemini experiment D-12 astronaut maneuvering unit /AMU/ design, detailing propulsion, flight control, oxygen and power supply, abort-alarm and communications 02 p0294 A66-11643  
 Mission simulation techniques for training Gemini flight controllers 02 p0186 A66-11802  
 Gemini V failures and successes, evaluating spacecraft and rendezvous guidance and

navigation systems performances and prolonged exposure to space environment 02 p0296 A66-12000  
 USAF manned space navigation experiment on Gemini and implications for MOL 02 p0257 A66-12000  
 Gemini System Interference Monitor /SIM/ for simultaneous monitoring and removal of control of many widely separated test points from central location 05 p0645 A66-14550  
 Gemini guidance and control, discussing design, ground monitoring, launch and flight guidance, spacecraft instrumentation, maneuvering, etc 06 p0906 A66-15900  
 Gemini manned flight program date 07 p1140 A66-17200  
 Astronaut selection and crew preparation procedures for Gemini and Apollo programs 08 p1176 A66-18500  
 Gemini and Apollo space programs, present status, future plans and development trends 09 p1453 A66-20100  
 Gemini and Apollo Earth Orbital flights precursors to Apollo extension and other Earth Orbital missions 10 p1611 A66-21500  
 Logbook account of Gemini VI and V missions 11 p1777 A66-22200  
 Spectrometer for measuring electron flux and energy at Gemini orbital altitudes 12 p1876 A66-23600  
 Weather support problems in Gemini and Apollo programs [AIAA PAPER 66-334] 12 p1953 A66-24400  
 Markov process model of Gemini countdown and transition probability matrix 13 p2192 A66-25500  
 Gemini noncoherent pulse radar system using interferometer methods for angle information, noting failures of diode capacitor combination and methods of reliability improvement 13 p2035 A66-25500  
 Gemini Voice Recording System, MRS 25 for voice-time tape recording during manned space flights 13 p2081 A66-28000  
 Structural dynamics of Gemini program, discussing environmental prediction, component testing, docking system, stability, etc 14 p2393 A66-28000  
 Gemini rendezvous launch operation planning for simultaneous launch countdown 14 p2394 A66-28400  
 Gemini experiments program, examining crew integration, mission planning and prelaunch operations 15 p2606 A66-30000  
 Telemetry tracking acquisition aid system /TELTRAC/ applied to Gemini project, noting antenna, receiver, error analysis, etc 16 p2650 A66-30500  
 Proton energy spectrum of fluxes penetrating packs of passive radiating sensors on Gemini IV and V missions 17 p2865 A66-32700  
 Real time cardiorespiratory rate monitoring for data converter on Gemini space program 19 p3288 A66-35700  
 First half of Gemini program noting design, prelaunch operations, astronaut training, EVA, etc 19 p3469 A66-35800  
 Telemetry system design for astronaut maneuvering unit /AMU/ involving digital combination and filtering of serial PCM pulse train used to modulate FM transmitter 20 p3513 A66-37200  
 Preflight consideration of astronaut performance testing program for Gemini flight, noting manual operations and devices used 24 p4168 A66-42200

**GEMINI SPACECRAFT**  
 Gemini spacecraft rendezvous radar device noting angle measurements, astronaut display, command link and design problems 01 p0105 A66-10800  
 Pulse code modulation /PCM/ for telemetry and communication between Gemini spacecraft Agena D satellite and ground stations for data processing and display 01 p0031 A66-10900  
 Coordinated program for airborne and ground support equipment testing of Gemini spacecraft and launch vehicle by different manufacturers 02 p0294 A66-11600  
 Gemini spacecraft and launch vehicle interface design, development and configuration control 02 p0294 A66-11600  
 Gemini ablative heat shield, noting nonmetallic honeycomb reinforcement and insulative char 02 p0294 A66-11600  
 Gemini spacecraft reentry guidance scheme

with onboard computations of reference trajectory and guidance coefficients [AIAA PAPER 65-48] 03 p0390 A66-12758

Voice communication in space discussing Gemini subsystem, Apollo Command Module system and laser communication techniques 04 p0477 A66-13588

MOL program noting design requirements, operation, functions, etc 08 p1300 A66-18556

Solid state transmitters for Gemini spacecraft telemetry system, noting PCM system operation and design 08 p1181 A66-18728

High reliability system for sensing excessive and potentially dangerous turning rates of Gemini launch vehicle 08 p1225 A66-19525

Digital computers for aerospace guidance and control, including Gemini inertial guidance and B-70 aircraft navigation systems 08 p1187 A66-19597

Gemini rendezvous radar using interferometric angle measuring system, digital range data readout, analog range display and target vehicle command link 09 p1346 A66-20583

Gemini Systems Interference Monitor /SIM/ including signal conditioner having simultaneous monitoring and remote control from central location 11 p1687 A66-23480

Component failure examples of Gemini rendezvous radar, emphasizing need for closed loop reliability program 13 p2039 A66-25786

Thermal and fluid mechanics problems in Gemini spacecraft environment control system development 14 p2226 A66-27813

Materials for manned spacecraft with emphasis on Gemini spacecraft 14 p2406 A66-28003

Launch vehicle testing and hardware reliability in Gemini launch vehicle and Titan II 14 p2394 A66-28427

Monitoring device for detecting short-duration, vibration-induced electrical malfunctions, noting Gemini tests 16 p2677 A66-30454

Mathematical model study of three-mass retrieval technique using anchor mass in space for future Gemini extravehicular operations 16 p2812 A66-31538

Simulation testing pilot performance in orbiting Gemini spacecraft based on tracking rate errors and fuel consumption 17 p2872 A66-31963

Lifting reentry test phases and effect of pilot performance on miss distance in first manned Gemini flight, discussing spacecraft control 17 p3016 A66-32685

Errors in Gemini rendezvous radar interferometer due to antenna ellipticity and coupling of adjacent antennas 17 p2876 A66-33437

Capability, calibration and testing of linear variable differential transformers /LVDT/ for Gemini rendezvous radar 18 p3096 A66-34497

Gemini reentry guidance and control system consisting of inertial guidance and attitude control systems 19 p3470 A66-36679

Data management system synthesis for acquisition, processing and transmission of data aboard manned spacecraft 20 p3514 A66-37209

High speed technique for automatically testing spacecraft PCM telemetry systems 20 p3514 A66-37213

Gemini VII star sightings analyzed, using handheld space sextant in Gemini VI, discussing effect of bias, timing, angle measurement and trajectory errors 21 p3767 A66-38893

Rescue teams for manned testing in environmental chamber for Gemini spacecraft noting personnel, chamber and personal equipment, test operations and rescue function and drill 22 p3857 A66-40240

UV photography quantitative analysis of stellar spectra from Gemini X spacecraft 24 p4273 A66-42209

Gemini ablative heat shield, noting nonmetallic honeycomb reinforcement of insulative char 24 p4283 A66-42773

Stellar extinction measurements made in Gemini IX flight, determining existence and location of Link layer from airglow study 24 p4280 A66-43026

SA STATOR  
SA STEAM GENERATOR  
SA TURBOGENERATOR  
SA VAPOR GENERATOR  
SA VOLTAGE GENERATOR  
SA VORTEX GENERATOR  
SA WAKE GENERATOR

Progress in constant speed drive generating systems and control equipment for constant frequency aircraft electric systems [SAE PAPER 650827] 01 p0016 A66-10827

Operation modes of electron beam generators with resonant oscillating systems and bipolar regenerative amplifiers developed from them 09 p1353 A66-20438

Order-sequence generator for Iris remote control system and telemetry of satellites 14 p2253 A66-27549

Electric energy from helical and coaxial explosive generators noting design, performance, limitations and loss mechanisms 21 p3699 A66-39510

## GENETIC CODE

Amino acid genetic code in which long sequences in DNA spell out instructions transcribed into RNA and subsequently into proteins 11 p1644 A66-22714

Paleogenetic study of ferredoxin structure, reconstructing evolution from amino acid sequence 14 p2228 A66-27810

Physicochemical processes in memory, learning, consciousness and other mental processes in man 15 p2431 A66-28671

Molecular biology noting hemoglobin and enzyme cytochrome evolution, amino acid code, ribonucleic acid, etc 17 p2853 A66-32101

## GENETICS

SA CHROMOSOME  
SA CYTOCHROME  
SA MUTATION

Chemical protection from radiation exposure-induced genetic changes 15 p2438 A66-29484

Postirradiation restitutive capacity of yeast cell suspensions in wort-agar and water after exposure to 1300 rad/min ionizing radiation 15 p2438 A66-29485

Radiosensitivity differences in yeast cells in terms of differences in chromosome-replication and genetic-structure-restitution intensities 15 p2438 A66-29486

Genetic control of gibberellin production in fungus *Gibberella fujikuroi* 23 p4025 A66-41307

## GEOCENTRIC COORDINATE

Assumption of spatial system parallel to mean geocentric system in compensation of triangulation grid 03 p0424 A66-12459

Photographic determination of dependence of topocentric coordinates of Moon on geocentric coordinates 03 p0366 A66-13031

Geocentric pendular control for detection of direction of terrestrial field 05 p0713 A66-15414

Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 12 p1867 A66-23515

Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 12 p1867 A66-23517

Electronic trispheration, three-dimensional analog of triangulation, for long distance geodetic surveys 12 p1875 A66-24936

Influence of parallax of near cosmic bodies on equatorial coordinates 14 p2388 A66-28339

Liapunov method and dynamic programming of stability of motion of variable mass point in Oxyz coordinate reference system, allowing for Earth rotation effects 15 p2538 A66-29046

IAU system of geocentric astronomical constants for ellipsoid Earth 20 p3653 A66-37762

Observational method for determining topocentric and geocentric coordinates of satellite consisting in identification of plane of local meridian or prime vertical on photographic plate 20 p3654 A66-37838

Influence of errors on geocentric position of satellite calculated in accordance with INTEROBS program 20 p3654 A66-37844

Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 21 p3732 A66-38659

Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 21 p3732 A66-38661

## GEOCHEMISTRY

### SA GEOPHYSICS

Biologic-type alkanes of indigenous origin more than 2.7 billion years old present in Precambrian rocks of Sudan formation 03 p0325 A66-12366

Convection pattern changes in Earth mantle and continental drift as evidence of cold origin of Earth 03 p0361 A66-12379

Origin of atypical meteorites from Arizona meteorite crater 05 p0761 A66-15264

Alkali and titanite analyses of tektites before and after G-1 precision monitoring 08 p1291 A66-19076

Terrestrial origin of pseudometeoritic Igast objects 08 p1298 A66-19596

Remote measurement of trace amounts of vapors in lunar and planetary atmospheres as indicator of biologic and geologic surface conditions 10 p1608 A66-21532

Age of Bosumtwi crater area, Ghana, determined by mass spectrometry of rubidium, strontium and strontium isotopic composition, compared to Ivory Coast tektite age 10 p1608 A66-21741

Relative isotopic abundance of potassium 40 in terrestrial and meteoritic samples 11 p1770 A66-22572

Isolation and identification of biogenic steranes and pentacyclic triterpanes in Eocene shale 12 p1805 A66-23539

Nondispersive X-ray spectrometer for remote geochemical analysis of lunar or planetary surfaces 12 p1878 A66-23694

Hydrocarbons synthesized abiogenically and those found in terrestrial samples, using gas chromatography and mass spectrometry in connection with terrestrial life 12 p1806 A66-24965

Chemical composition and origin of moldavites, noting densities, refractive indices, oxide content, rubidium-strontium ratio, etc 13 p2187 A66-26234

Goldschmidt geochemical classification of elements into siderophile, chalcophile, lithophile and atophile groups and pertinence to meteorite research 15 p2598 A66-29632

Spherules from Atlantic Ocean sediments studied by electron microprobe, noting terrestrial alteration and contamination of surfaces 16 p2803 A66-31222

Sulfur compounds analysis in lipid extracts

from Orgueil meteorite support concept of low temperature environment on parent body and differ from petroleum 20 p3648 A66-37304  
Cl, Br and I contents in carbonaceous chondrites measured by activation analysis 21 p3814 A66-39260  
Stratigraphic distribution of carbohydrate residues in middle Devonian Onondaga beds of Pennsylvania and western New York and application to paleontology and paleoecology 22 p3912 A66-40133

GEODESY

SA CELESTIAL GEODESY  
SA TOPOGRAPHY

Geodetic instruments for measurement of angles and lines in large spaces 04 p0524 A66-14397  
Asymptotic behavior of gravitational field studied by Peeling theorem for case where curvature tensor of space-time has direction that can be demonstrated as geodesic trajectory 07 p1080 A66-17451  
Geodesy and gravity 09 p1371 A66-20268  
Numerical solution to first geodetic problem of ellipsoid of rotation, using iterative application of Runge-Kutta method to differential equations of geodetic line 11 p1698 A66-22767  
Soviet book on geodetic gravimetry including disturbing potential calculation methods based on Molodenskii integral equation 14 p2288 A66-28209  
Geophysical monograph on extension of gravity anomalies to unsurveyed areas 17 p2920 A66-33191  
External gravity field and geodetic boundary value problem 17 p2921 A66-33195  
Critical analysis of /Earth/ spheroidal equilibrium configuration 18 p3109 A66-34738

GEODETIC POSITION

Position of artificial Earth satellite determined, using geodetic coordinate system with origin at center of reference ellipsoid 04 p0516 A66-13959  
Determining coordinates of astrogeodetic grid points by Molodenskii integral formulas and accuracy estimation by astrogravimetric interpolation of deviations 08 p1217 A66-19345  
Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 12 p1867 A66-23515  
Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 12 p1867 A66-23517  
Relative geodetic location by measurement of differential Doppler shift of radio signal 12 p1819 A66-24611  
Compensated coordinates of artificial Earth satellites from synchronous observations at two given points on Earth surface 12 p1824 A66-24875  
Electronic trispheration, three-dimensional analog of triangulation, for long distance geodetic surveys 12 p1875 A66-24936  
Determining coordinates of astrogeodetic grid points by Molodenskii integral formulas and accuracy estimation by astrogravimetric interpolation of deviations 19 p3348 A66-36053  
Congruent relativistic gravitational fields, red shift and geodetic coordinate transformations 20 p3603 A66-38011  
Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 21 p3732 A66-38659  
Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 21 p3732 A66-38661

GEODETIC SATELLITE

Satellite geodesy noting gravitational and geometric use, current national program, orbit perturbations, etc 02 p0225 A66-12236  
Problems of spatial triangulation of Europe by means of satellites 03 p0446 A66-12458  
Cosmic triangulation systems assessing polar method for determining geodetic satellite coordinates and inherent error estimation and correction 03 p0361 A66-12502  
Tracking network of Smithsonian Observatory and geodetic results 03 p0336 A66-13026  
Geodetic determinations from photoelectric observations of occultation of stars by satellites 03 p0428 A66-13030

Position of satellite traveling along perpendicular bisector of line joining two fixed points determined by simultaneous observations with accuracy of one inch 03 p0366 A66-13196  
Kepler method in determining length of satellite radius vector independent of linear measurements from Earth, discussing accuracy in geodetic measurement 03 p0366 A66-13197  
Establishment and plotting of suitable coordinate systems for solution of geodetic problems via satellites 03 p0367 A66-13198  
Functional characteristics of Navy Doppler tracking system and satellites used for geodesy, noting data reduction procedures and system tests 04 p0514 A66-13610  
Accuracy in geodetic measurement, discussing contribution of satellite observations 09 p1374 A66-20629  
Hyperaltitude photography, applications and advantages 10 p1535 A66-21523  
Earth atlas based on high altitude photography, Nimbus and IR imagery and high altitude radar 10 p1532 A66-21527  
Absolute direction in space and control of stellar triangulation equations 12 p1875 A66-24874  
Tracking record of synchronous satellites over two-year period revealing effects of second and third order longitude components in Earth gravity - potential field 12 p1875 A66-24893  
Topocentric distance of geodetic satellite GEOS-A measured by laser telemetry from station 16 p2652 A66-30586  
Satellite properties for geodetic application, noting inclination angle, orbit calculation, eccentricity, etc 16 p2700 A66-31794  
Orbital plane precession due to ellipsoidal shape of Earth, discussing effect on meteorological and geodetic satellites 24 p4279 A66-42963

GEODETIC SURVEYING

Information theory applications to angle and line measuring devices with description of use in geodetic instruments 03 p0368 A66-12506  
Radiogeodetic plotting device for piloting aircraft on assigned track 03 p0389 A66-12507  
Establishment and plotting of suitable coordinate systems for solution of geodetic problems via satellites 03 p0367 A66-13198  
Conversion factor determination for gravity changes during Alaska earthquake, using LaCoste-Romberg geodetic meter 09 p1369 A66-19872  
Accuracy in geodetic measurement, discussing contribution of satellite observations 09 p1374 A66-20629  
Data systems requirement for geographic research, noting use of orbiting sensors to obtain information on terrain, vegetation, human and animal activities, etc 10 p1532 A66-21522  
Precise airborne geodetic survey system capable of measuring lines up to 900 nautical miles and determining nadir of aerial photographs to 24 ft 10 p1533 A66-22045  
Celestial mechanics covering two-body problem, planetary and asteroid theory, interplanetary trajectories, lunar probe, spherical harmonics, etc 17 p2997 A66-32019  
Limitations of method of least squares in terms of quality of estimates it provides in geodetic measurements 20 p3590 A66-37471  
Satellite application in geodetic surveys and navigation, noting measurement and tracking techniques 22 p3915 A66-40786  
Satellite radius vector as measure of length in geodesy, noting satellite perturbation factors 23 p4063 A66-41070

GEOELECTRICITY  
SA GEOPOTENTIAL  
Relation between solar activity and geoelectrical phenomena 05 p0761 A66-15229  
Geomagnetic storms employed in determining geoelectrical parameters via magnetotelluric sounding 12 p1868 A66-23668  
Spread in values of vertical magnetic field component during sudden commencements of magnetic storms attributed to local geoelectric conditions 12 p1871 A66-24295  
Earth electrical conductivity, determined from data concerning northern and vertical

components of cyclic geomagnetic variations suggests increases with depth 12 p1871 A66-24299  
Uniform electric field meters for measurement at Earth surface and on aircraft and satellites 12 p1915 A66-24642  
Radio wave propagation over Earth surface determining conductivity and dielectric constant taking into account ground effect 21 p3706 A66-39513

GEOGRAPHY

S ANTARCTICA  
S ARCTIC  
S EUROPE  
S NORTH AMERICA

GEOD

Mutual dependence of harmonic coefficients of gravitational potential derived from satellite observations as source of computed geoid height distortions at Earth surface 16 p2700 A66-31802  
Geoid undulation steady at density discontinuity surface whereas gradient shows instability 18 p3105 A66-34099  
Formulas for extraterrestrial potential anomalous gravity force gradient on Earth topographic surface, deflections of vertical etc 20 p3549 A66-37042

Probable interior structure of planets in solar system and Moon, based on data relative to terrestrial theory 05 p0768 A66-15761  
Fission method to study uranium distribution in natural minerals 09 p1460 A66-20968  
Nimbus I IR scanning radiometry for nocturnal imagery of clouds and other data IR spectral returns and relation to image gray scale 10 p1531 A66-21518  
Geological data on Mars, noting effect of wind 13 p2189 A66-26588  
Geoscience information acquisition by radar return studied by means of terrain target scattering coefficients /scatrometry/ 14 p2244 A66-28408  
Soil investigation and geological map preparation from aerial photographs 15 p2505 A66-30016  
Book on structural geology and tectonics for undergraduates 16 p2692 A66-30261  
Graphite and C-H-O gas phase equilibrium at high temperatures and pressures in implication of Earth ocean and atmospheric development 17 p3015 A66-33432  
Physiographic and geologic features revealed through analysis of pictures from Tiros satellites, useful for terrain information 18 p3104 A66-33742  
Terrestrial calderas, defined as basins of subsidence larger than volcanic crater, associated pyroclastic deposits and possible lunar application 19 p3458 A66-35458  
Geologic evaluation of simultaneous produced like-and cross-polarized radar imagery 19 p3351 A66-36332  
Correlation of like and cross polarized side-looking radar images with geologic features for terrain discrimination 24 p4173 A66-42623

GEOMAGNETIC ANOMALY

Progressive change in worldwide current systems and auroral zone electrojets on geomagnetic bays examined with magnetic data during IGY 01 p0063 A66-10859  
Ionospheric, auroral and geomagnetic observation at Syowa Base, Antarctica 02 p0222 A66-11682  
Sea level cosmic ray intensity and threshold rigidity around South Africa magnetic anomaly, noting Quenby and Wen measurements 07 p1129 A66-18020  
Ionospheric F-2 region equatorial anomaly may not be caused by geomagnetic field 08 p1217 A66-19211  
Annual variations of ionospheric absorption at medium and long wavelengths measured by A3 method at midlatitudes 08 p1220 A66-19777  
Anomalies in cosmic ray intensity increases

- during period of Forbush decrease 09 p1438 A66-20214
- Upper atmosphere physics including heating, circulation, ionization, composition, emissions, geomagnetic variations, polar auroras, etc 09 p1375 A66-20987
- Longitudinal asymmetry of trapped energetic electron intensities attributed to lowering of mirror points in South African anomaly 10 p1599 A66-21160
- Photometric monitorings of 5577 and 6300 angstrom lines during undisturbed geophysical conditions in South Atlantic 10 p1530 A66-21164
- Dependence of extent of noon bite-out on geographic and magnetic coordinates on worldwide basis, noting variation of distortion parameter for diurnal variation of F-2 layer 10 p1533 A66-22061
- Cross sections of geomagnetic field intensity and ionospheric characteristics obtained by airborne equipment crossings of geomagnetic dip equator 13 p2074 A66-26358
- Ionization enhancement from Van Allen electrons in South Atlantic magnetic anomaly, noting longitudinal variation of trapped electrons, electron-ion recombination, etc 13 p2176 A66-26362
- VLF anomalies on midlatitude paths during local nighttime not caused by solar flares, nuclear detonations or magnetic storms 13 p2074 A66-26365
- Changes in cosmic-ray rigidity spectrum during cosmic ray storms, showing correlation with magnitudes of geomagnetic disturbances 15 p2574 A66-28900
- Dependence of frequency distribution of auroral displays in zenith on latitude and local time in magnetically quiet and disturbed periods analyzed by all-sky camera network in Northern Hemisphere 15 p2488 A66-29227
- Precipitation flux of quasi-trapped energetic electrons near low altitude fringes of inner radiation belt as they drift into South Atlantic magnetic anomaly 18 p3170 A66-34520
- Riometer recordings at high geomagnetic latitude of intense and sporadic absorption events correlated with occurrence of auroral and geomagnetic disturbances 18 p3108 A66-34531
- Longitude dependence of distribution function of electrons for fixed value of McIlwain parameter, using kinetic equation 18 p3197 A66-34873
- Butare crater, showing existence of nonnegligible anomalies, noting hypothesis of oblique penetration 20 p3657 A66-38067
- Anomalous enhancement of F-2 ionization in high latitude around geomagnetic noon due to formation of irregularity or new layer around locality 20 p3658 A66-38234
- Acceleration of electrons in inner radiation belt by magnetic field variations over slope of geomagnetic anomaly in resonance with longitudinal drift frequencies of electrons 20 p3638 A66-38308
- Changes in 1 to 4 mev electron population during solar quiet periods and 55-mev protons near South Atlantic anomaly measured by various geophysical satellites 20 p3638 A66-38310
- Temporal stability of inner zone protons determined by Injun I satellite measurements in vicinity of South Atlantic magnetic anomaly 20 p3638 A66-38311
- Ionospheric ionization produced by precipitation of particles from Van Allen belts, examining influence of magnetic anomalies, longitudinal drift and local effects during magnetically quiet periods 20 p3641 A66-38325
- Phase anomaly detected by chemical test D during decreasing phase of last solar cycle 21 p3732 A66-38629
- Semiannual variation in geomagnetic disturbance amplitudes consisting of one-to-one correspondence between average daily amplitude index and solar declination 21 p3732 A66-38635
- Annual variations of ionospheric absorption at medium and long wavelengths measured by A3 method at midlatitudes 21 p3732 A66-38775
- Geomagnetic disturbances due to dynamo effect of ionospheric winds in lower layers of ionosphere 24 p4204 A66-43150
- Distribution of active periods of magnetic disturbances during day and variation as affected by contact of solar magnetic flux with magnetosphere 24 p4204 A66-43151
- GEOMAGNETIC CROTCHET**
- S IONOSPHERIC CURRENT**
- GEOMAGNETIC EFFECT**
- Magnetic activity effect on F-2 region drifts and variation with time at low latitude station 03 p0361 A66-12633
- Relationships between VLF phase fluctuations, radio signal fading and natural geomagnetic background observed in British Columbia 04 p0487 A66-14367
- Dense sporadic E cloud effects on high latitude HF backscatter observation 05 p0667 A66-14792
- Polar cap absorption riometer data compared for Thule, Greenland and College, Alaska for determining geomagnetic activity influence 05 p0670 A66-14951
- Difference in cosmic ray intensity due to variations in geomagnetic cut-off 06 p0948 A66-16581
- Solar modulation and geomagnetic effects on cosmic rays, noting daily variation and rigidity spectrum 07 p1122 A66-17990
- Plasma and magnetic field data from Explorer X, emphasizing correlation with multiple crossings of geomagnetic cavity boundary on dark hemisphere of Earth 07 p1029 A66-18087
- Equilibrium electron density distribution in F-2 region of equatorial ionosphere, noting effects of photoionization, loss, diffusion along geomagnetic field lines and electromagnetic drift 08 p1216 A66-19210
- Transition region magnetic field and polar magnetic disturbances, comparing Explorer XII data with ground measurements from Arctic observatories 08 p1218 A66-19399
- Long-term geomagnetic influence on medium frequency nighttime sky wave field strength 09 p1341 A66-19916
- Terrestrial radiation belt measurement with Cosmos satellite, noting launch and orbit data, instrumentation and results 09 p1441 A66-20231
- Procession of UK-3 satellite perturbed by geomagnetic torque 09 p1464 A66-20474
- High time-resolution measurement of knee position in magnetospheric ion density using whistlers 10 p1527 A66-21137
- Electron density and total electron content in force tubes near knee in magnetospheric ionization studied, using whistlers 10 p1527 A66-21138
- Geomagnetic activity corresponding to 11-year sunspot cycle shown to occur in double sunspot cycle /22 years/ 10 p1604 A66-21159
- Differences in MHD emission occurrence times, considering ionospheric penetration propagation toward equator and error sources 11 p1701 A66-23150
- HF noise signals and association with auroral disturbances analyzed, using data from IGY network of backscatter sounders 11 p1701 A66-23154
- Statistical-probability determination of lunar-solar daily and seasonal magnetic variations and geomagnetic effects 12 p1951 A66-24463
- Cylindrical coordinate system describing geomagnetic field analyzed, noting consequences in magnetic cartography when going from field to time gradients 12 p1875 A66-24970
- Spacecraft magnetic testing, discussing geomagnetic effects on orbiting satellites, magnetic dipole moment, etc 13 p2058 A66-25847
- Rotation in polarization ellipse of hydromagnetic oscillations type Pc 1 from observations at magnetically conjugate stations 13 p2073 A66-26347
- Solar wind parameters and geomagnetic activity determined from satellite plasma experiments and observations of magnetopause locations 13 p2075 A66-26368
- Sporadic E layer formation by wind motion in conjunction with geomagnetic and electric fields 14 p2281 A66-26848
- Auroral zone position changes as function of magnetic activity and time of day 15 p2486 A66-29091
- Total ionospheric electron content measurements at Delhi using Faraday fading of satellite beacon transmissions during solar minimum 15 p2495 A66-30067
- High resolution power spectrum of international magnetic character, showing two subsidiary peaks on both sides of 27-day period 16 p2695 A66-30719
- Direct phase technique for studying polarization phenomena associated with reflections of radio waves from meteor trails 16 p2655 A66-31543
- Worldwide geomagnetic disturbances generated by Starfish high altitude nuclear detonation, July 9, 1962 17 p2918 A66-32527
- Daily variations of cosmic ray distribution, examining effect of geomagnetic field, aperture, orientation and geographical position of counters 18 p3195 A66-34865
- Ground magnetogram-IMP I data comparison and geomagnetic field effects on interplanetary magnetic field sector structure 20 p3657 A66-38219
- Electron concentration data obtained by rocket probes in quiet ionosphere with solar and geomagnetic activity, as function of time of day, season and altitude 21 p3809 A66-38772
- Variation of geomagnetic activity with phase of Moon tested for statistical significance, noting fluctuations at lunar period 22 p3982 A66-40555
- Equatorial measurement of intensity of protons with energies greater than 400 kev and electrons with energies greater than 2 mev in outer radiation belt center in 1964 22 p3974 A66-40755
- Dependence of seasonal occurrence probability of F-zero layer on level of geomagnetic activity and ionospheric activity observed above 22 p3914 A66-40760
- Ashkhabad Guiding of whistlers due to exospheric anisotropy, electron density and geomagnetic field effects 22 p3915 A66-40803
- Diurnal behavior of topside and bottomside spread F at equatorial latitudes and association with geomagnetic activity 24 p4200 A66-42591
- Subsidiary peaks in power spectra of CI and Kp /magnetic indices/ attributed to amplitude modulation of 27-day components 24 p4201 A66-42607
- GEOMAGNETIC EQUATOR**
- Electrostatic probe, discussing Explorer XXII measurements of electron concentration and temperature at 1000 km altitude 05 p0746 A66-14782
- Flux of alpha component of primary cosmic radiation determined at top of atmosphere, using nuclear emulsion stack exposed near geomagnetic equator 05 p0756 A66-15529
- Intensities and ratios of intensities of Be, B and S nuclei determined near geomagnetic equator in India, using nuclear emulsion stack 10 p1600 A66-21844
- Photometric measurements of tracks of heavy primary particles found in emulsion stack near geomagnetic equator, noting ratio of C and N nuclei to O nuclei 11 p1762 A66-22654
- Effects of solar flare radiation on electron density of F-2 layer at maximum level in and near equatorial anomalous zone 12 p1944 A66-24834
- Primary proton and helium nuclei flux and East-West and North-South asymmetries measured near geomagnetic equator 18 p3193 A66-34854
- Synchrotron radiation measurements near magnetic equator, noting radio spectrum radiation due to injection of relativistic electrons into trapped orbits of geomagnetic field 20 p3644 A66-38347
- GEOMAGNETIC FIELD**
- SA MAGNETOSPHERE**
- Vertical continuation of two-dimensional geomagnetic and gravitational fields from given contour line on Earth surface by two methods 01 p0060 A66-10161
- Geomagnetic field fluctuations corresponding to solar wind intensity changes as related to change in phase of solar activity cycle 01 p0061 A66-10279
- Modifying spherical harmonic analysis of surface geomagnetic field to account for Earth oblateness by two methods 01 p0061 A66-10615
- Geomagnetic field represented as dipoles located by least squares gradient

method 01 p0063 A66-11052  
 Geomagnetic activity forecasting method based on investigation of solar chromospheric structure and filaments as indicative of magnetic conditions in layers 01 p0064 A66-11100  
 Ocean current effects on geomagnetic field and aurora borealis 02 p0221 A66-11344  
 Algebraic sign of voltage field components in orbital coordinate system, using dipolar approximation of Earth magnetic field 02 p0295 A66-11655  
 Motion equation for satellite with passive and semipassive attitude control using geomagnetic field, considering elliptical and circular orbits and involving differential equations 02 p0295 A66-11670  
 Compression of geomagnetic field effect on cosmic radiation at cut-off rigidities and asymptotic directions of radiation incidence 02 p0283 A66-12111  
 Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet 02 p0224 A66-12118  
 Structural design and equipment of three-component mobile field station Izmiran-4 that uses quartz sensitive elements for magnetic variation 02 p0232 A66-12123  
 Excitation of magnetic field in spherical conductor for case where vortex concentration is assumed to be constant for entire core 02 p0225 A66-12141  
 Earth magnetic field represented as dipole field to study secular variations of field 02 p0225 A66-12142  
 Propagation and diffraction of electromagnetic waves in inhomogeneous magnetoionic medium, noting exoionospheric propagation and Hamiltonian optics 02 p0192 A66-12208  
 Interplanetary medium observation from zodiacal light and radio wave scattering during radio source occultation and influence on galactic and solar cosmic rays 03 p0425 A66-12852  
 Corrected tables and maps of geomagnetic coordinates, covering methods of calculation and corrected data charts 04 p0513 A66-13377  
 Terrestrial magnetic field and secular variations 04 p0514 A66-13448  
 Quiet diurnal solar variations and relation to ionospheric parameters 04 p0516 A66-13852  
 Total vector modulus measurements from absolute field element observations and proton magnetometer 04 p0516 A66-13866  
 Electron density distribution in magnetosphere inferred from dispersion characteristics of hydromagnetic wave propagating between hemispheres along geomagnetic field as in atmospheric whistlers 05 p0747 A66-14787  
 Electric currents in ionosphere measured by sounding rockets equipped with nuclear free precession magnetometers and Langmuir probes launched near Peru 05 p0668 A66-14800  
 Quasi-stationary corpuscular streams from Sun suggesting role of active regions in formation 05 p0748 A66-14867  
 Lower ionospheric wind effect on geomagnetic field 05 p0668 A66-14935  
 Geomagnetic secular variation data analyzed at five observatories indicates high significance for amplitudes obtained for 50-year cycle by harmonic analysis 05 p0670 A66-14952  
 Shifts in output frequency of cesium vapor magnetometer due to temperature, light intensity and orientation, noting Zeeman component and geomagnetic field 05 p0678 A66-14968  
 Day-to-day variability of terrestrial magnetic daily variation, establishing morphology of different types 05 p0673 A66-15042  
 Oscillations of geomagnetic field recorded at two high-latitude conjugate points, noting frequency spectra and amplitude relationships 05 p0673 A66-15049  
 Earth magnetic field including mathematical descriptions, origin, daily magnetic variations, polar and auroral disturbances, magnetic storms, activity

indices and whistlers 05 p0675 A66-15742  
 Cosmic ray intensity and geomagnetic field changes induced by electric current systems excited in ionosphere, noting seasonal changes in diurnal variations 06 p0950 A66-16596  
 Structure and variation of radiation belts during magnetic storm, including configuration of forbidden region in connection with magnetic field 06 p0951 A66-17048  
 Magnetospheric boundaries formation, noting neutral points on day and night sides and possible penetration of solar flux particles 06 p0877 A66-17170  
 Westward drift of secular variations in inclination and alteration of terrestrial magnetic moment estimated from archeomagnetic data 07 p1027 A66-17307  
 Vertical cut-off rigidities of cosmic rays, using sixth degree simulation of geomagnetic field 07 p1128 A66-18019  
 Data analysis from Explorer XIV satellite, noting magnetic field measurements in tail of geomagnetic cavity 07 p1029 A66-18086  
 Correlation relations between cosmic ray neutron intensity, horizontal magnetic field strength, critical wave frequency and terrestrial currents 08 p1283 A66-18706  
 Spherical harmonic analysis of main part of Earth magnetic field from standpoint of probability theory 08 p1214 A66-19037  
 Statistical analysis of worldwide magnetic charts of epoch 1955.0 for main part of Earth magnetic field 08 p1214 A66-19038  
 Distribution of Z-component of geomagnetic field at high altitude calculated by integral and spherical analysis methods 08 p1214 A66-19039  
 Comparison of magnetic observations aboard Zaria and aeromagnetic surveying according to magnet plan 08 p1214 A66-19040  
 Geomagnetic and ionospheric observations of 1964 expedition of Zaria 08 p1214 A66-19041  
 Towed Z magnetometer with pendulum supported by Cardan suspension, comparing measurements with those obtained on Zaria 08 p1223 A66-19055  
 Dynamo origin of geomagnetic field, involving creation of toroidal and polar fields by nonuniform rotation 08 p1215 A66-19117  
 Interplanetary medium properties considered in scaling of observed effects of interaction of solar wind with Earth dipolar magnetic field 08 p1292 A66-19123  
 Appleton anomaly of F-2 layer examined, assuming ionization induced horizontal motion of neutral air 08 p1215 A66-19207  
 True height variations of F-2 layer for bay disturbances of geomagnetic field obtained from ionograms, assuming they are caused by horizontal electric field 08 p1216 A66-19213  
 Ionospheric disturbances following geomagnetic sudden commencements propagating from two isolated locations in high latitudes which are conjugate points 08 p1216 A66-19214  
 Correlated magnetic tail and radiation belt observations from Explorer 18 /Imp I/ satellite and APL satellite 1963 38C in April 1964 08 p1284 A66-19411  
 Tabulation of spherical harmonic coefficients of geomagnetic field data for trapped-particle evaluation 08 p1219 A66-19419  
 Spinning rocket attitude measured from geomagnetic field and solar cell data, using digital computer technique, noting instrumentation 08 p1225 A66-19492  
 Attitude control system, using magnetic interaction with geomagnetic field to check spin rate and spin axis orientation of spin-stabilized Explorer A 08 p1304 A66-19512  
 Digital simulation of magnetic hysteresis, using analytic approximation of magnetic curves by seventh degree polynomials 08 p1187 A66-19513  
 Hourly distribution and variation of perturbed geomagnetic field, using instantaneous synoptic charts in geomagnetic coordinates 08 p1220 A66-19783  
 Energy transfer mechanism in solar corpuscular flux interaction with terrestrial magnetosphere 08 p1285 A66-19786

Earth daily diurnal rotation rate variation assuming solar corpuscular flux composition of plasmoids possessing quasi-force-free magnetic fields 08 p1220 A66-19788  
 Design and operation of telemagnetograph for visual observation of geomagnetic field 08 p1228 A66-19798  
 Total geomagnetic field intensity measurements made over last ten years facilitate preliminary magnetic anomaly map of Gulf of Mexico 09 p1369 A66-19877  
 Toroidal fields in Earth fluid metallic core brought to surface, causing changes with time in geomagnetic field 09 p1369 A66-19877  
 Geomagnetic cut-off rigidity variation calculated relative to disturbed field model, represented by equatorial current 09 p1438 A66-20211  
 Latitude variation of second harmonic of diurnal variation of cosmic rays, considering curvature of particle trajectories in geomagnetic field 09 p1439 A66-20222  
 Magnetic fields in magnetosphere, using electrostatic and electromagnetism units, noting Earth field, high altitude and distant fields, etc 09 p1371 A66-20277  
 Ionospheric dynamo theory with consideration for magnetospheric current along geomagnetic force lines, noting S variation in solstices 09 p1372 A66-20370  
 Nocturnal electrical conductivity of equatorial ionosphere 09 p1373 A66-20387  
 Satellite emission of variable frequency signal guided by ionization irregularities existing along force line of geomagnetic field 09 p1374 A66-20388  
 Geomagnetic field measurements by Cosmos satellites at 49 degrees latitude including typical magnetograms of magnetic field intensity 10 p1526 A66-21051  
 Role of coupling phenomena in recombination processes of complex ionosphere composed of two types of positive ions examined via wind-shear theory 10 p1526 A66-21128  
 Morphological analysis of daily variability of geomagnetic field regular daily changes, noting current systems in polar and nonpolar regions 10 p1526 A66-21127  
 Effect of Moon phase and celestial latitude on lunar modulation of geomagnetic activity 10 p1529 A66-21157  
 Vlasov equation of particle orbits in planar magnetic fields, with application to shock wave at geomagnetopause 10 p1606 A66-21241  
 Ionospheric electrodynamics, discussing conductivity, wind and dynamo theory, drift effect on ionospheric formation and wind-electromagnetic field interaction 10 p1533 A66-21857  
 Correlation coefficients for daily ranges of horizontal component of quiet day diurnal magnetic variation 11 p1695 A66-22377  
 Interaction of solar corpuscular stream with geomagnetic field forming Earth's magnetosphere and particle penetration within magnetosphere in neutral point region 11 p1696 A66-22407  
 Noncyclic variation during magnetically quiet days, examining seasonal changes in geomagnetic field value at night during IGY 11 p1696 A66-22420  
 Geographic distribution of solar daily variations of magnetic field during quiet days determined by coordinate system 11 p1696 A66-22422  
 Analytical representation of secular variation of geomagnetic field between 1850 and 1950 11 p1696 A66-22422  
 Imp-I observation of magnetic wake of Moon or Earth 11 p1697 A66-22422  
 Secular variation of atmospheric radiocarbon concentration, noting dependence on geomagnetic field strength 11 p1698 A66-22568  
 Matrix techniques for finding geomagnetic field strength in solar ecliptic coordinate system 11 p1699 A66-23052  
 Geomagnetic field confinement by solar wind to form magnetosphere and magnetic tail 11 p1699 A66-23127  
 Imp-I observations of solar wind properties, including interaction with geomagnetic field and flow characteristics of positive ion component 11 p1775 A66-23132  
 Solar wind particle diffusion into geomagnetic tail and then down field lines to polar cap 11 p1700 A66-23142

Propagation of MHD emissions in Alfvén mode along high latitude geomagnetic field lines, auroral zone signal energy penetration and isotropic wave mode  
11 p1701 A66-23151

Monograph on methods and equipment used by Soviet satellites and space probes to study Earth radiation belts  
12 p1938 A66-23802

Reconnection of magnetic lines of force to form closed loops during transient phase of rotation of spheres and cylinders from rest  
12 p1868 A66-23857

Magnetic fields of terrestrial planets, considering Mariner II measurements of magnetic field of Venus and motions in Earth core  
12 p1948 A66-24032

Satellite data indicates correlations between cosmic ray variations and radiation intensity of radiation belts and related phenomena  
12 p1941 A66-24170

Forbush effect and solar cosmic ray manifestation of effect of compression of Earth magnetosphere  
12 p1941 A66-24174

Diurnal and semidiurnal variations in cosmic-ray hard component and magnetic activity  
12 p1942 A66-24176

Motion of magnetically charged neutrino in cosmic magnetic fields  
12 p1942 A66-24181

Effect of higher harmonics of geomagnetic field on cosmic ray trajectories, noting reception cones of Soviet stations  
12 p1943 A66-24268

Diurnal and seasonal altitude variations of E and F layers analyzed for geomagnetic activity from rocket measurement of electron concentration  
12 p1869 A66-24269

Structure of main geomagnetic field over Eurasia, noting difference in spectra over oceans and continents  
12 p1870 A66-24280

Relation between magnetic activity and ionospheric disturbances in F-2 layer studied on basis of 30-year data  
12 p1870 A66-24285

Ionization structure of polar auroras from spatial distribution of radar-reflecting zones, taking into account magnetic field variations  
12 p1871 A66-24293

Earth electrical conductivity, determined from data concerning northern and vertical components of cyclic geomagnetic variations, suggests increases with depth  
12 p1871 A66-24297

Plasma effect on dipole magnetic field and solar wind plasma-geomagnetic field interaction  
12 p1943 A66-24391

Electron distribution from 400 to 1200 km measured, using Ariel I satellite, noting latitudinal and longitudinal anomalies associated with geomagnetic field  
12 p1872 A66-24511

[ATAA PAPER 66-395]

Ionograms made at Australian ionosonde stations during magnetically quiet world day interval, obtaining information on F region ionization, noting existence of universal time control of ionization  
12 p1873 A66-24835

Contour maps of diurnal changes in magnetic elements provided by observatory tabulations of mean hourly values of mean monthly days  
12 p1873 A66-24836

Cylindrical coordinate system describing geomagnetic field analyzed, noting consequences in magnetic cartography when going from field to time  
12 p1875 A66-24970

Explorer XX satellite observations of plasma resonances at fixed frequencies in topside ionosphere, noting patterns, effect of geomagnetic field, electron concentration, etc  
13 p2074 A66-26352

Equatorial electrojet cross section profile, describing longitudinal variations, current density, magnetic field produced and electron drift velocity  
13 p2074 A66-26357

Cross sections of geomagnetic field intensity and ionospheric characteristics obtained by airborne equipment crossings of geomagnetic dip equator  
13 p2074 A66-26358

Magnetic toroidal resonances and vibrating field lines, using basic toroidal equation in determining validity of heuristic vibrating string model  
13 p2074 A66-26359

Lower hybrid resonance in VLF range in satellites, noting noise emission due to trapping of electromagnetic wave propagation in transverse magnetic field  
13 p2074 A66-26364

Auroral absorption of cosmic radio noise which is not identical at magnetic conjugate

point  
13 p2076 A66-26743

Doppler frequency changes in vertically incident and reflecting sounding wave associated with geomagnetic disturbances yields information on ionospheric electric field  
14 p2234 A66-26856

Orbit precession effect on gyroscopic stabilization of satellite in geomagnetic field  
14 p2391 A66-27473

Generalization of measurement of vertical and horizontal components of terrestrial magnetic field intensity with proton magnetometer  
14 p2295 A66-27624

Compression of geomagnetic field effect on cosmic radiation at cut-off rigidities and asymptotic directions of radiation incidence  
14 p2377 A66-28070

Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet  
14 p2286 A66-28077

Excitation of magnetic field in spherical conductor for case where vortex concentration is assumed to be constant for entire core  
14 p2287 A66-28097

Earth magnetic field represented as dipole field to study secular variations of field  
14 p2287 A66-28098

Pioneer I observations of geomagnetic field, discussing amplitude and polarization of oblique pulses, existence of collisionless oblique magnetic shock waves, soft electron acceleration, etc  
15 p2482 A66-28500

Metrological characteristics of three-component magnetometers with ferromagnetic probes installed in Elektron II space station  
15 p2497 A66-28501

Auroras, frequency, geographical distribution, types, evolutionary processes and auroral phenomena  
15 p2482 A66-28517

Elementary geomagnetic polar disturbances, lip-shaped auroral ionization patterns and existence of energetic electrons on night side of magnetosphere  
15 p2485 A66-28909

Solar wind magnetic field as medium for plasma-magnetosphere interaction  
15 p2575 A66-29078

Electrical conductivity of Earth interior from data concerning annual geomagnetic variations for all years of solar cycle  
15 p2487 A66-29101

Solar corpuscular stream magnetic field effect on change in orientation of geomagnetic field related to change in stream geoeffectiveness  
15 p2575 A66-29102

Correlation of time variations of proton and electron intensity of outer radiation belt and dependence on geomagnetic environment  
15 p2575 A66-29103

Overhead ionospheric current function corresponding to Sq field, examining assumption of rotation of quiet day horizontal component  
15 p2488 A66-29231

High incidence and erraticism of sporadic E occurrence in temperate zones where horizontal component of geomagnetic field is greatest, attributed to horizontal wind shear  
15 p2490 A66-29949

Electron component of plasma sheet of terrestrial magnetic trail, noting energy distribution and densities  
16 p2792 A66-30142

Radiation belt origin, examining acceleration of solar plasma electrons to energies of 30 to 100 kev by nonlinear waves called solitons  
16 p2792 A66-30156

MHD model of interface between solar wind and geomagnetic field on Earth tail, showing existence of unstable waves  
16 p2695 A66-30717

Mathematical model for geomagnetic field for 1965 given by internal and external spherical harmonic coefficients  
16 p2695 A66-30718

Rocket attitude determined by simultaneous measurement of geomagnetic field and electromagnetic field generated by radio wave transmitted by rocket-mounted dipole  
16 p2810 A66-30958

Solar corona and interplanetary plasma noting solar wind effect on comet tails and shock wave caused by interaction of geomagnetic field and plasma  
17 p3000 A66-32272

Type I comet trail relation to interaction of solar wind with geomagnetic field, noting tail ray formation mechanism, interplanetary

plasma measurements, etc  
17 p3012 A66-33396

Dynamics of geomagnetic tail, noting transformation of magnetic energy into kinetic energy due to pinch instability and auroral activity  
18 p3106 A66-34162

Reconnection mechanism for geomagnetic and interplanetary field lines, estimating field-cutting efficiency at magnetopause  
18 p3231 A66-34348

Magnetopause boundaries and geomagnetic field at magnetopause and interaction region by IMP I  
18 p3106 A66-34352

Magnetosphere shape and distortion of magnetic field within magnetosphere  
18 p3106 A66-34353

Effect of 49-, 64- and 100-term expansion of geomagnetic field on reduction of omnidirectional proton counting rate data  
18 p3108 A66-34532

Geomagnetic field intensity in India over past 4,000 years determined from ancient remanent magnetization in bricks, pots and potsherds  
18 p3108 A66-34716

Satellite and space probe measurements indicate continual confinement of geomagnetic field by solar wind forming magnetosphere and Earth magnetic tail  
18 p3235 A66-34742

Generically related cosmic ray spectrum explaining variations in abundance ratios of helium isotopes and light to medium elements in terms of solar and geomagnetic modulation  
18 p3178 A66-34758

Smooth curves of cosmic ray neutron component intensity variations compared with H component of geomagnetic field during IGY and IGC  
18 p3196 A66-34868

Threshold rigidities for vertical incident cosmic ray particles derived, using trajectory computations by higher-order simulation of geomagnetic field  
18 p3198 A66-34881

Effect of geomagnetic cavity field on cosmic ray threshold rigidity, using model of cavity field, finding cavity shape produces amplitude in diurnal variation of cosmic ray intensity  
18 p3198 A66-34882

Effects of deformed magnetic field on trajectories and asymptotic directions of arrival of medium energy cosmic rays at various stations, using spherical harmonics  
18 p3198 A66-34883

Cosmic ray threshold rigidities examined, discussing penumbral and threshold perturbation effects produced by superimposing external magnetic fields on dipole model  
18 p3096 A66-35227

Multipole parameters for series of spherical analysis of geomagnetic field from 1829 to 1958  
19 p3344 A66-35258

Secular variations of geomagnetic field before our era studied by method using archeological objects  
19 p3345 A66-35273

Device for visible recording of H component of geomagnetic field  
19 p3352 A66-35275

Data on geophysical phenomena at magnetically conjugate points on Earth including cosmic noise absorption, conjugacy of visual auroras, magnetic variations, VLF phenomena, etc  
19 p3453 A66-35981

Geomagnetic cut-off rigidities determined for cosmic ray particles arriving at top of atmosphere over Hyderabad as function of zenith and azimuthal angles  
19 p3454 A66-36642

Planetary magnetic fields noting Earth magnetic field  
20 p3648 A66-37295

Tropospheric and ionospheric refraction, aspect sensitivity and height of radio aurora, backscatter radar aurora observation and geomagnetic field anomalies  
20 p3520 A66-38199

Polar geomagnetic and solar terrestrial disturbances related to PCA and solar flare  
20 p3636 A66-38228

Magnetosphere tail, annual magnetospheric configurative variation and seasonal variation in polar cap magnetic intensity  
20 p3657 A66-38229

Geomagnetic field model based on definition of core field, crustal field, ionospheric currents and plasma pressures, examining trapped particle behavior  
20 p3555 A66-38302

Definitions and properties of magnetic

coordinates B, L, K, R, lambda and A, discussing role of these parameters in study of geomagnetically trapped particles 20 p3555 A66-38304

Charged particles and plasma in geomagnetic field, noting diffusion of trapped particles and acceleration by Fermi mechanism and wave acceleration 20 p3640 A66-38319

Magnetospheric boundary phenomena, noting dependence of charged particle observations on character of associated magnetic fields 20 p3641 A66-38329

Adiabatic theory of distorted motion of charged particles in geomagnetic field, showing dependence on equatorial pitch angle 20 p3642 A66-38332

Magnetosphere tail sheet pinch model, discussing motion of particles for cases of surface crossing 20 p3642 A66-38336

Fluid mechanics model representation of solar wind and geomagnetic field interaction, noting flow parameters in shock layer and application of MHD equations 20 p3642 A66-38337

Synchrotron radiation measurements near magnetic equator, noting radio spectrum radiation due to injection of relativistic electrons into trapped orbits of geomagnetic field 20 p3644 A66-38347

Principal geomagnetic field approximation by centered dipole field and eccentric dipole field 21 p3732 A66-38663

Hourly distribution and variation of perturbed geomagnetic field, using instantaneous synoptic charts in geomagnetic coordinates 21 p3732 A66-38779

Energy transfer mechanism in solar corpuscular flux interaction with terrestrial magnetosphere 21 p3809 A66-38782

Earth daily diurnal rotation rate variation, assuming solar corpuscular flux composition of plasmoids possessing quasi-force-free magnetic fields 21 p3733 A66-38783

Design and operation of telemagnetograph for visual observation of geomagnetic field 21 p3736 A66-38795

Stabilization and control system of Tiros-wheel satellite, using current-carrying coil interaction with geomagnetic field 21 p3821 A66-38878

Magnetic field-aligned ionization detected during minimum sunspot activity, using radio telescopes of radio interferometer 22 p3908 A66-39964

Vacuum conditions in space based on data obtained by Earth-orbiting satellites, noting shock front and magnetopause caused by interaction of solar wind with geomagnetic field 22 p3979 A66-40205

Field boundary of two line currents immersed in streaming plasma treated by conformal transformation 22 p3956 A66-40386

Magnetic field of ring current on Earth surface according to observations during IGY 22 p3914 A66-40768

Diurnal variation in principal direction of E and H vectors of Petropavlovsk-Kamchatka K index of geomagnetic field in horizon and planetary relation 22 p3914 A66-40769

Steady pearl type oscillations in terrestrial electromagnetic field, noting role of diurnal and seasonal variations 22 p3915 A66-40784

Optimum filter for separation of principal geomagnetic field and magnetic field associated with Earth thin magnetoactive crust layer 22 p3915 A66-40785

Dense particle population of Van Allen belts formed by interaction of high energy corpuscular radiation with interplanetary magnetic field and geomagnetic field 23 p4123 A66-41186

Cusp configuration of neutral point on boundary of geomagnetic cavity in solar wind 23 p4123 A66-41508

Comparison of various geomagnetic variations associated with corpuscular precipitation at South Pole, noting day-night effect 23 p4064 A66-41688

Equinoxes, having highest solar corpuscular radiation hitting probability, as observation periods for geomagnetic activity, aurora, etc 24 p4274 A66-42433

Lunar modulation of geomagnetic activity from 1884 to 1959 analyzed using magnetic character figure, noting relation to solar activity 24 p4201 A66-42598

Angular dependence of charged neutron

producing component of cosmic rays, using 15-channel counter telescope on rotating platform with neutral monitor 24 p4268 A66-42913

Magnetospheric phenomena related to geomagnetic tail noting F region, polar auroras and solar Lyman alpha radiation scattering in night sky 24 p4203 A66-43029

Adiabatic theory and lowest order invariants applied to Van Allen radiation indicate that without collisions particles would remain in geomagnetic field 24 p4240 A66-43110

## GEOMAGNETIC HOLLOW

Intensity estimation for lunar X-rays excited by high energy terrestrial electrons from solar stream induced geomagnetic cavity 09 p1442 A66-20388

Solar plasma flow around geomagnetic cavity studied by numerical blunt body analog, proposing MGD boundary pressure as condition for self-consistent solution [AIAA PAPER 65-121] 10 p1533 A66-21775

Magnetohydrostatic cavity formed around system of line currents in infinitely conducting atmosphere 14 p2279 A66-28394

## GEOMAGNETIC LATITUDE

Tables and maps of geomagnetic coordinates corrected by higher order spherical harmonic terms 01 p0062 A66-10888

Catalog of observations on auroral phenomena in Western Europe below geomagnetic latitude of 55 degrees for years 1601 to 1700 01 p0139 A66-11104

Excessive cosmic radiation absorption in lower nocturnal ionosphere at middle geomagnetic latitudes during Forbush effects 04 p0514 A66-13443

Neutron albedo flux at 45 degree geomagnetic latitude 07 p1121 A66-17982

Time variation of primary cosmic ray rigidity spectrum over solar cycle derived by measuring latitude effect of nucleonic components 07 p1127 A66-18016

Scintillation counter satellite data on low energy electron flux and particle trapping in dark magnetosphere 08 p1218 A66-19394

Intensity variation of nucleonic component of atmospheric cosmic radiation, geomagnetic threshold rigidity and calculation of cosmic ray equator 08 p1284 A66-19398

Geomagnetic diurnal-variation in north polar region with corrected geomagnetic latitude 09 p1373 A66-20385

Latitudinal dependence of geomagnetic disturbance magnitude along noon and midnight meridians for different seasons, noting effect on auroral zone 09 p1373 A66-20386

Gradual variation observed in time of occurrence of spread-F peak with geomagnetic latitude 11 p1702 A66-23370

Onset patterns of PCA analysis using corrected geomagnetic coordinates, with results analyzed through solar cosmic radiation, Earth magnetosphere structure and D region 12 p1944 A66-24470

Corrected geomagnetic coordinates of Hakura compared to study of geomagnetic threshold rigidity for cosmic ray particles 15 p2484 A66-28908

Latitude distribution curves of two quasi-circular zones of maximum magnetic activity along 12 consecutive meridians of local geomagnetic time 15 p2487 A66-29100

Anderson hypothesis on semiannual variation in upper atmosphere density and relation to geomagnetic latitude effects, analyzing Samos II 17 p2920 A66-33087

Balloon flight data obtained at 50 and 65 degrees N geomagnetic latitude on spectra of primary cosmic ray hydrogen and helium nuclei, using Cerenkov scintillator technique 18 p3190 A66-34831

Balloon-borne Cerenkov scintillation counter measurements of energy spectra of primary cosmic radiation heavy nuclei at various geomagnetic latitudes 18 p3191 A66-34840

Rocket-borne neutron detector measurements of neutron albedo and intensities at various geomagnetic latitudes 18 p3199 A66-34887

Latitude dependence of neutron multiplicity detected by shipborne neutron monitor, examining threshold rigidity

dependence on intensity of events 20 p3632 A66-38077

Statistical analysis of diurnal variation of southern boundary of aurora, HF backscatter records and geomagnetic latitude of dayside aurora 20 p3553 A66-38119

Very steep latitudinal electron density gradients in topside F layer at high altitudes 20 p3554 A66-38119

Latitudinal variation of Pc-1 micropulsation propagation, examining attenuation by ionospheric F region duct that acts as waveguide for hydromagnetic waves 20 p3554 A66-38200

Solar cosmic ray alpha particle relation to PCA and lowest latitude of enhancement 20 p3635 A66-38222

Non-Stoermer cut-off variation with geomagnetic latitude of PCA during quiet Sun period 20 p3635 A66-38222

Enhanced activity in ionospheric E region at Cape Hallett and Campbell Island for information on diurnal variation and sunspot cycle changes of overhead and auroral activity 22 p3916 A66-40800

## GEOMAGNETIC PULSATION

Pc-type pulsation variations with geomagnetic activity and latitude from records of Wingst, Gottingen and Furstenfeldbruck observatories 01 p0060 A66-10189

Analog-digital transformations in detection of microvariations in geomagnetic field 01 p0061 A66-10655

Geomagnetic pulsation pc-5 in and near auroral zones based on data collected during IGY period, noting local time dependence 01 p0062 A66-10688

Short period fluctuations in intensity of auroral luminescence and relation to geomagnetic fluctuations 01 p0065 A66-11166

Geomagnetic micropulsation periods relation to dimensions of magnetosphere considering inverse dependence on level of magnetic activity 02 p0224 A66-12111

Pulsations of aurora luminescence and irregular quasi-periodic oscillations of geomagnetic field 02 p0224 A66-12122

Microvariations of Earth electromagnetic field with results recorded on tape in digital pulse code form 02 p0224 A66-12122

Short-period geomagnetic micropulsations and observing apparatus 03 p0360 A66-12344

Spectral density functions of hydromagnetic emissions at high latitude 03 p0367 A66-13268

Micropulsations of Earth magnetic field and relation to various types of auroras 04 p0515 A66-13844

Small amplitude LF waves in ionosphere covering momentum and energy dissipation zero temperature plasma and waves in nonuniform plane-stratified medium 04 p0516 A66-13968

Pearl micropulsations in auroral zone at Flin Flon, Manitoba 05 p0667 A66-14799

Whistler and VLF emissions recorded in northern Italy, noting daily occurrence and positive correlation with geomagnetic activity 05 p0671 A66-14988

ELF emission from electron and proton beams injected into magnetospheric plasma 05 p0748 A66-15044

Time-agreement of sudden commencement indicated by geomagnetic micropulsation results from Byrd Station and Great Whale river 06 p0875 A66-16278

Fine structure of magnetic storm discussing prestorm, initial stage and climatology of fluctuations of Pc I and Pc II 07 p1027 A66-17300

Natural electromagnetic field of Earth microvariational peculiarities 07 p1027 A66-17300

Geomagnetic micropulsation properties and nature with periods ranging from 10 seconds to several minutes 08 p1214 A66-19033

Excitation features and amplitude-period relation of magnetic Pc1 oscillations magnetically conjugate regions 08 p1214 A66-19033

Spatial properties of rapid geomagnetic fluctuations, noting correlation and epoch differences between distant stations azimuthal distributions and Parkinson plane effects 08 p1219 A66-19411

Sinusoidal hydromagnetic pulsations noting morphological properties, planetary

- distribution and inverse dependence of amplitude, frequency and duration on solar activities 08 p1220 A66-19784
- Geomagnetic micropulsations, noting diurnal patterns of phase difference, propagation medium dispersive characteristics, signal velocities, etc 10 p1529 A66-21151
- Diurnal properties of horizontal geomagnetic micropulsation field in New Zealand, noting variation of period, field rotation and direction of oscillating vector 10 p1529 A66-21152
- Fast variation of geomagnetic field in polar region 11 p1698 A66-22896
- Characteristic periods of pearl-type variations in geomagnetic field 11 p1698 A66-22897
- VHF hiss zone morphology and correlation with particle precipitation events, from Alouette I satellite observations 11 p1700 A66-23136
- High-altitude nuclear explosion-induced geomagnetic micropulsations in analysis of sudden commencement data and Alfvén velocity-altitude profile 11 p1700 A66-23143
- Schumann-ELF natural background samples recorded in three components at separated points resolved by analog and digital methods into constituent modes for comparison 12 p1815 A66-24115
- Time variation of preferential-polarization vector of pearl-type oscillations during course of observations at Lovozero station, U.S.S.R. 12 p1871 A66-24294
- Cyclotron instabilities in hydromagnetic waves in magnetosphere as possible origin of geomagnetic micropulsations, stressing ion resonance mode of waves relevant to hm whistlers 12 p1874 A66-24842
- Magnetic toroidal resonances and vibrating field lines, using basic toroidal equation in determining validity of heuristic vibrating string model 13 p2074 A66-26359
- Counting system for use with rubidium magnetometer for ground observations of geomagnetic micropulsations with sensitivity of 1/100 gamma 13 p2085 A66-26752
- Simultaneous appearance of in-phase ULF geomagnetic pulses at two conjugate points 13 p2076 A66-26759
- Analog-digital transformations in detection of microvariations in geomagnetic field 14 p2286 A66-28035
- Geomagnetic micropulsation periods relation to dimensions of magnetosphere, considering inverse dependence on level of magnetic activity 14 p2287 A66-28078
- Pulsations of aurora luminescence and irregular quasi-periodic oscillations of geomagnetic field 14 p2287 A66-28079
- Microvariations of Earth electromagnetic field with results recorded on tape in digital pulse code form 14 p2287 A66-28082
- Power spectra computation for testing geomagnetic micropulsation period dependency on latitude 14 p2287 A66-28171
- Dynamic spectrum of geomagnetic pulsations at low latitude studied by magnetic tape recording 15 p2484 A66-28904
- Space-time variations in frequency and amplitude of Pc1 oscillations observed during April 1964 15 p2488 A66-29112
- Natural telluric currents in Arctic Ocean and relation to geomagnetic variation observed on drifting station 15 p2488 A66-29113
- Scintillation height measurement, noting irregularity distribution during various ionospheric conditions 16 p2691 A66-30230
- Micropulsations generated by low-energy proton via cyclotron instability in outer radiation belt, noting pitch angle scattering 16 p2794 A66-30700
- Semiannual wave in recurrence tendency of geomagnetic activity, noting correlation with sunspot cycle 16 p2696 A66-30722
- 4-second summertime micropulsation band at College, Alaska 17 p2918 A66-32526
- Geomagnetic micropulsations observed, using five-station array of three-component induction variometers 17 p2923 A66-33360
- Abundance of individual effects /pt, bp, bps/ of geomagnetic pulsations and variations at Goettingen and Fuerstenfeldbruck stations 18 p3105 A66-34096
- Equatorial transmission of geomagnetic micropulsations through ionosphere and lower exosphere below 2000 km altitude 18 p3107 A66-34526
- Three-dimensional polarizations of high-latitude micropulsations derived for conjugate point observatories from hydromagnetic wave-ionospheric current model 18 p3107 A66-34527
- Fast variations of electromagnetic field measured by satellites electron I and II used as indication of state of radiation belts and magnetosphere of Earth 19 p3344 A66-35257
- Latitudinal variation of Pc-1 micropulsation propagation, examining attenuation by ionospheric F region duct that acts as waveguide for hydromagnetic waves 20 p3554 A66-38203
- Sudden impulses and pc5 variations resulting from magnetospheric deformations and solar wind pressure changes 20 p3657 A66-38223
- Sinusoidal hydromagnetic pulsations noting morphological properties, planetary distribution and inverse dependence of amplitude, frequency and duration on solar activities 21 p3733 A66-38780
- Fast variation of geomagnetic field in polar region 21 p3733 A66-38964
- Characteristic periods of pearl-type variations in geomagnetic field 21 p3733 A66-38965
- Transmission and coupling resonance of hydromagnetic disturbances in nonuniform model magnetosphere calculated by approximate dipole coordinates valid near equatorial plane 21 p3734 A66-39217
- Generalization of differential equation of dynamo theory of geomagnetic variations to include unsteady dynamo effect in ionosphere 22 p3914 A66-40759
- GEOMAGNETIC STORM**
- SA IONOSPHERIC STORM**
- SA SUDDEN IONOSPHERIC DISTURBANCE /SID/**
- Solar flare characteristics interrelation with magnitude of resultant blast wave, examining sudden commencement of geomagnetic storms 01 p0063 A66-10891
- Monographs on auroras, geomagnetic disturbances and ionosphere at high latitudes 01 p0064 A66-11160
- Magnetic storm accompanied by Forbush decreases taking into account atmospheric temperature, noting cyclonic storm origin 02 p0282 A66-11338
- Chromospheric and coronal propagation of disturbing agents generating changes in intensity of solar radio emission 02 p0287 A66-11489
- Transfer and acceleration of particles in Earth magnetosphere effect on origin of radiation belt 02 p0283 A66-12110
- Energy characteristics of ionospheric disturbances and nature of geomagnetic and ionospheric disturbances 02 p0284 A66-12117
- Location of latitude over which aurora current passes as function of geomagnetic storm intensity 02 p0225 A66-12139
- Ionospheric and polar-geomagnetic disturbance and PCA event on February 11, 1958 caused by solar flare 03 p0360 A66-12345
- 27-day recurrence tendencies of solar plasma velocity and magnetic index from Mariner II 03 p0417 A66-12346
- Sudden commencements of magnetic storms and sudden impulses in study of vector changes and equivalent current systems 03 p0360 A66-12347
- Inverted SC in low latitude regions and classification as magnetic sudden impulse 03 p0360 A66-12348
- Solar flares, solar wind, particle emission from activity regions, flare-associated particles and nuclear reactions in flare regions 03 p0418 A66-12665
- Shock waves in solar wind and magnetic storms, deriving equations governing shock, ambient and driver gas velocities 03 p0418 A66-12672
- Recurrent geomagnetic storms and structure of solar wind consisting of fast M-region stream embedded in slower ambient wind 03 p0418 A66-12673
- Tabulated data on principal magnetic storms from April through October 1965 and selected geomagnetic and solar data for June 1965 03 p0424 A66-12680
- Effects connected with auroras and magnetic storms in lower ionosphere considering radio wave attenuation, cosmic ray absorption, etc 03 p0365 A66-12854
- Auroras and magnetic storm models including those of Chapman and Ferraro, Alfvén, and Axford and Hines, noting magnetization of solar plasma 03 p0365 A66-12856
- Geomagnetic disturbances and related visual auroras noting pulsations, excitation processes, etc 03 p0365 A66-12857
- Auroral zone X-ray bursts and polar magnetic substorms 03 p0422 A66-12873
- Geomagnetic relationship of daily variation of cosmic ray neutron intensity corrected for barometric pressure variation at various ground stations 03 p0423 A66-13360
- Current system of solar disturbed diurnal variations of magnetic field at high latitudes in terms of dynamo theory, taking into account forward and Hall conductivities 04 p0516 A66-13854
- Recurrent magnetic perturbations after flocculus passage through central solar meridian, examining activity decrease between solar maxima 04 p0516 A66-13865
- Diurnal variation of cosmic radiation of intermediate energies measured at Earth attributed to particle removal due to scattering by magnetic irregularities 04 p0575 A66-14181
- Dipole latitude of auroral activity during periods of zero and very weak magnetic disturbance 04 p0517 A66-14375
- Critical frequency of F-2 layer at Huanqiao and variation with magnetic activity at different epochs of solar activity 04 p0517 A66-14378

- IGY geomagnetic observations, notably magnetic storms in Soviet Union and Antarctic 05 p0674 A66-15224
- Relation between solar activity and geoelectrical phenomena 05 p0761 A66-15229
- Electromagnetic disturbances effects on particles trapped in radiation belts 05 p0749 A66-15251
- Changes in solar cosmic ray and geomagnetic field intensities during magnetic storms accompanied by decrease in galactic cosmic ray intensity, using moving averages method 05 p0753 A66-15395
- Magnetic storm accompanied by cosmic ray intensity increase analyzed, considering Forbush effect and determining all peaks 05 p0755 A66-15403
- Solar and galactic cosmic ray characteristics, origin and flux-time variations, examining relation between solar flares and geomagnetic storms 05 p0756 A66-15751
- Rocket and satellite data contribution to new physical description of aurora in which Earth magnetosphere acts like gigantic cathode ray tube 06 p0875 A66-16015
- Anomalies in cosmic radiation during December 1957 accompanying geomagnetic storms connected with solar flares 06 p0949 A66-16588
- Secular variation of cosmic radiation intensity 06 p0950 A66-16590
- Structure and variation of radiation belts during magnetic storm, including configuration of forbidden region in connection with magnetic field 06 p0951 A66-17048
- Magnetospheric perturbations to probe interplanetary plasma, noting sudden and gradual commencement of geomagnetic storms 07 p1121 A66-17984
- Solar corpuscular stream effect on magnetic storms and Forbush effect 07 p1121 A66-17985
- Periodical and quasi-periodical cosmic ray variation according to data of worldwide network of stations, using crossed telescope 07 p1127 A66-18013
- Aurora production via magnetic field induction during geomagnetic storms by ring current growth in Van Allen belt region 07 p1029 A66-18088
- Dynamical properties of solar wind and solar corona atmosphere with extended temperature bound strongly by

gravity 07 p1132 A66-18263  
 Ionospheric magnetic perturbations at high latitudes of northern hemisphere during years of maximum solar activity 08 p1213 A66-19028  
 Twenty-seven-day variations of geomagnetic disturbance in aurora zone with respect to zero days of cosmic ray intensity 08 p1283 A66-19045  
 Aurora relations with ionospheric currents responsible for magnetic disturbance, noting sign of bay 08 p1215 A66-19054  
 Geomagnetic sudden-commencement storms effect on electron concentration in F-2 layer above Europe 08 p1215 A66-19082  
 Radio auroral echoes and correlation to geomagnetic disturbance 08 p1215 A66-19205  
 Polar electrojet causing magnetic substorms in high latitudes flows westward along closed oval curve and is connected with auroral activity and outer radiation belt 08 p1216 A66-19216  
 Occurrence frequency of midlatitude geomagnetic transition bays and relation to spatial movement of overhead electrojet current systems 08 p1218 A66-19395  
 Ring current growth tendency prior to sudden magnetospheric compression 08 p1219 A66-19406  
 Correlated magnetic tail and radiation belt observations from Explorer 18 /Imp I/ satellite and APL satellite 1963 38C in April 1964 08 p1284 A66-19411  
 Anomalies in cosmic ray intensity increase during period of Forbush decrease 09 p1438 A66-20214  
 Magnetic storms effect on cosmic rays during periods of maximum and minimum solar activity 09 p1438 A66-20215  
 Diurnal variation of aurora zone geophysical disturbances, examining VLF phenomena including noise, aurora and ionospheric absorption 09 p1372 A66-20375  
 Magnetospheric electric fields, noting implications of magnetic storm theories 10 p1528 A66-21149  
 Annual variation of auroral absorption attributed to frictional interaction between streaming plasma and geomagnetic field 10 p1530 A66-21161  
 Enhancement of amplitude of sudden commencement of magnetic storms in horizontal component of geomagnetic field 11 p1696 A66-22380  
 Chromospheric flares effect on hard component of cosmic rays as function of solar coordinates during quiet and magnetically disturbed days 11 p1762 A66-22412  
 Anomalous ionization of lower ionosphere at medium latitudes during worldwide geomagnetic storm result in increased radio wave absorption in ionosphere 11 p1696 A66-22416  
 Correlation between unipolar magnetic regions and recurrent geomagnetic storms 11 p1773 A66-22784  
 Objections to idea of solar ejection of neutral hydrogen and responsibility for geomagnetic storm 11 p1776 A66-23496  
 Geomagnetic storms employed in determining geoelectrical parameters via magnetotelluric sounding 12 p1868 A66-23668  
 Solar wind and geomagnetic storm effects on galactic cosmic ray 11-year variations and energy spectrum, from neutron monitor data 12 p1940 A66-24160  
 Cosmic ray variations and solar corpuscular stream in interplanetary space during March 1958 magnetic storm 12 p1940 A66-24164  
 Forbush, geomagnetic interaction, cosmic ray variation and solar corpuscular flux effects during magnetic storms in period of maximum solar activity 12 p1940 A66-24165  
 Variations in cosmic ray neutron component intensity and solar corpuscular flux with H-component of geomagnetic field during magnetic storm 12 p1941 A66-24166  
 Abrupt increase in cosmic ray intensity coinciding with presence of Forbush effects, noting dependence on geographic latitude and cut-off rigidity, obtaining energy spectra 12 p1941 A66-24168  
 Magnetic storms during IGY, assuming effect on cosmic ray intensity is associated with influence on galactic cosmic rays of magnetic fields of solar and corpuscular fluxes 12 p1941 A66-24169

Relation between Forbush decreases and magnetic storms, examining spatial distribution of predecrease moments relative to sudden commencements 12 p1941 A66-24171  
 Satellite observation of radiation belt and absorption of cosmic noise in polar aurora during magnetic storms of February 1964 12 p1943 A66-24267  
 Statistical distribution of monthly median noon critical frequency of F-2 layer from ionospheric stations at mid-latitudes, auroral regions and at polar cap 12 p1870 A66-24286  
 Ionospheric effect of sudden magnetic storm eruption, noting propagation of disturbance above terrestrial surface 12 p1870 A66-24288  
 Spread in values of vertical magnetic field component during sudden commencements of magnetic storms attributed to local geoelectric conditions 12 p1871 A66-24295  
 Corpuscular intrusions into Earth magnetosphere involving entire auroral zone and occurring only on night 12 p1871 A66-24296  
 Data analysis of pre-SC field intensity increases and receivable time of WWV signal at Hiraiso, Japan, and Canadian stations for 50 geomagnetic storms 12 p1872 A66-24471

 Horizontal geomagnetic fluctuations during nighttime magnetic storms studied at equatorial stations 13 p2075 A66-26738  
 Cyclotron radius, magnetospheric boundary and Debye length scaling parameters for magnetospheric cavity arising from solar wind-induced geomagnetic storm and visibility of quasi-Van Allen belts 14 p2269 A66-27124  
 Transfer and acceleration of particles in Earth magnetosphere effect on origin of radiation belt 14 p2377 A66-28069  
 Energy characteristics of ionospheric disturbances and nature of geomagnetic and ionospheric disturbances 14 p2377 A66-28076  
 Location of latitude over which aurora current passes as function of geomagnetic storm intensity 14 p2287 A66-28095  
 Solar wind parameter variation, magnetosphere flux interaction and dependence of geomagnetic storm on magnetospheric conditions and geomagnetic field increase 15 p2575 A66-29079  
 Auroral occurrence rate at zenith as function of latitude for magnetically quiet and magnetically disturbed periods 15 p2486 A66-29092  
 High resolution density data from radar observations of low altitude, polar orbiting satellites reveal longitudinal and geomagnetic variation, noting regression analysis 15 p2497 A66-30085  
 Polar magnetic substorms associated with westward traveling surge 16 p2693 A66-30334  
 Poleward motion of auroral bands in midnight sector during early phase of auroral substorm and cause of planetary scale auroral displays 16 p2693 A66-30335  
 Patches and irregular bands and eastward motions in morning sector of auroras 16 p2693 A66-30336  
 Measurements of geomagnetic field at various distances using IMP-I satellite, noting magnetically neutral sheet in tail and observation of five magnetic storms 16 p2695 A66-30715  
 Tabular data on magnetic storms and on geomagnetic and solar data furnished by Swiss Federal Observatory 16 p2801 A66-30726  
 Solar corpuscular stream density distribution and trail curvature, noting space angle of ejection and flight trajectory 17 p2992 A66-32336  
 Initial disturbances in F-2 layer at middle latitudes during magnetic storms which begin with sudden commencement and relation to magnetic field changes 17 p2922 A66-33353  
 Mariner II space probe measurements of solar wind including velocity, temperature, time dependence of proton velocity, temperature and density 18 p3167 A66-34331  
 Magnetosphere topology changes due to solar wind interactions, geomagnetic storms

and interactions with interplanetary magnetic field outside magnetosphere 18 p3106 A66-343  
 Increases of ionizing radiation in stratosphere correlated with recurrent magnetic storms, ionospheric perturbation in auroral zone, etc, possibly due electrons from outer radiation belt 18 p3197 A66-348  
 Radial displacement of particles excited by solar-wind-induced current at boundary and ring current within magnetosphere 19 p3451 A66-352  
 Cosmic radio wave absorption dependence on frequency and number of electron-ion collisions during atmospheric magnetic storms 19 p3344 A66-352  
 Sudden commencements of magnetic storms on basis of observations made at H Observatory, with classification into several types and distribution in geomagnetic time established 20 p3551 A66-375  
 Temporal variations of outer radiation zone electron intensities at 1000 km as affected by geomagnetic storms observed by Alouette I satellite 20 p3631 A66-376  
 Cosmic ray meson component distribution with time plots of particle flux reveal characteristic disturbances accompanying sudden commencements of geomagnetic storms associated with Forbush decreases 20 p3632 A66-380  
 Solar terrestrial physics - Symposium Japan, December 1965 20 p3634 A66-382  
 SID-AND terrestrial disturbance-causing enhanced solar particle emissions associated with intense solar flares and plasma streams 20 p3634 A66-382  
 Optical emission energy of solar flare at plasma cloud acceleration producing geomagnetic storm 20 p3635 A66-382  
 Polar cap absorption and upper atmospheric solar-terrestrial disturbances due to solar flare and type IV outburst 20 p3636 A66-382  
 Statistical analysis of storm-time variations and daily disturbance variation in geomagnetic storms 20 p3658 A66-382  
 Statistical correlation analysis of isolated geomagnetic bay occurrence and relation to solar cycle variation 20 p3658 A66-382  
 Successive hourly variations of equivalent current systems of magnetic bay disturbance patterns and F layer minimum frequency increases 20 p3658 A66-382  
 Geomagnetic storms occurrence, three types of calm periods and intermittent periods of atmospheric disturbances 20 p3658 A66-382  
 Distribution of energetic protons in Earth radiation belt between 1962 and 1964, noting secular temporal changes, effects of magnetic storm and aspects of energy spectrum 20 p3638 A66-383  
 High energy trapped electrons in outer zone for 27-day, diurnal and storm time variations 20 p3639 A66-383  
 Nonadiabatic and adiabatic acceleration and diffusion of particles trapped in Earth magnetic field, examining particle drift trapping boundary, auroral substorms and bounce resonances 20 p3658 A66-383  
 Diffusion coefficients in outer radiation belt, examining energy dependence of electric and magnetic disturbances contributing to transport of particles 20 p3641 A66-383  
 Auroral absorption analysis during geomagnetic storm, noting satellite measurement of energetic particles 20 p3642 A66-383  
 Thermospheric energetics characterized as series of superposed and interconnected atmospheric heat engines and refrigerators 22 p3913 A66-4053  
 Simultaneous long term ionospheric variation in midday averages of critical frequency E and F-2 at Washington, D.C. before and after increased geomagnetic activity 22 p3914 A66-4056  
 Growth and decay of ring current in polar electrojet, using magnetic storm examples 22 p3974 A66-4056  
 Dependence of diurnal cosmic ray variations on angle which is proportional to shortest distance from Earth to axis of corpuscular stream 22 p3974 A66-4075  
 Magnetic field of ring current on Earth

- surface according to observations during IGY 22 p3914 A66-40768
- Geomagnetic activity and Earth heliolatitude effect on diurnal variation of cosmic radiation, based on IGY neutron component observations 22 p3974 A66-40775
- Measures of electron production and loss and scale height of F-1 layer during summer solar minimum 22 p3916 A66-40808
- Acceleration of plasma cloud from Sun producing geomagnetic storm, noting magnetic cloud squeezed out from sunspot region 24 p4262 A66-42459
- Nonsymmetric inflation of dipole magnetic field by ionized gas, noting nonsymmetric gas dissipation 24 p4199 A66-42587
- Asymmetric ring current belt consisting of symmetric ring current and superimposed partial ring current system as explanation for low latitude disturbance daily variation 24 p4199 A66-42588
- Inner magnetosphere inflation during geomagnetic storm observed by Explorer XXVI, noting relation of various phases to charged particles 24 p4200 A66-42589
- Power spectrum analysis of mean daily values of magnetic data for 27 observatories 24 p4201 A66-42597
- Auroral zone microbursts associated with geomagnetic storms, negative magnetic bays and electron precipitation observed by balloon and rocket 24 p4201 A66-42600
- Temporal variations of electron energy flux in outer radiation zone measured during geomagnetic activity with instrumentation on board Explorer XII satellite 24 p4263 A66-42601
- Quiet and disturbed conditions of magnetosphere, noting dynamo theory and various geomagnetic storms 24 p4202 A66-42831

Combination of geometrical and physical optics with modern system design such as computers, cameras for aerial use, space tracking, etc 09 p1403 A66-20911

Jupiter photoelectric spectral scan in U.S. reproduced as geometric reflectivity vs wavelength, using Aerobee rocket 10 p1603 A66-21091

Superposition and geometrical optical techniques for approximations of radar cross section of nonconducting bodies 10 p1498 A66-21591

Electromagnetic wave scattering from 3 degree metal wedge and thick plate over wide range of bistatic angles, comparing results with Keller geometrical theory of diffraction 10 p1503 A66-21641

Effect of electric field on LF oscillation of nonhomogeneous plasma contained by magnetic field, using geometrical optical approximation 11 p1744 A66-22441

Geometrical theory of diffraction applied to calculation of radiation pattern and impedance of monopole antenna 11 p1663 A66-22541

Rotation rule added to construction rule

for rays determining geometrical optics field, noting that polarization trihedral is not rotational about ray 11 p1735 A66-22554

Equation governing properties encountered in Gaussian beam propagation represented graphically on impedance chart, showing relation between Gaussian mode and geometrical optics 11 p1656 A66-23089

Weakly focusing transparent media properties and guided transmission of coherent light beams with relatively small loss 11 p1657 A66-23091

Radio wave propagation in artificial ionized cloud in upper atmosphere determined, using geometrical optics 12 p1817 A66-24274

Laser pumping by intense noble gas discharge in zeta-pinch geometry 13 p2092 A66-25995

Field intensity of ultrashort radio waves in superrefraction 14 p2242 A66-28154

Transmission loss in whistler mode of propagation of VLF radio waves for path portion underneath ionosphere, using geometrical optics 16 p2652 A66-30709

Geometric diffraction theory, and radar cross section estimation from rectangular flat plate scattering measurements 18 p3065 A66-33537

Geometric optics - Seminar, El Paso, March 1966 19 p3399 A66-35823

Self-focusing and self-trapping of intense light beams in nonlinear medium examined, using approximations of geometrical optics and accounting for diffraction effects 20 p3602 A66-37372

Geometric diffraction theory for scalar wave incident on plane screen, emphasizing normally and nonnormally incident plane waves and spherical waves 21 p3769 A66-38601

Design considerations for advanced digital beam steering computer through use of geometric optics 21 p3707 A66-38674

Two-dimensional reflector with large angular field theoretically and experimentally studied, using geometrical optics 21 p3710 A66-38745

Cylindrical and spherical waves propagation in weakly inhomogeneous plasma treated by geometrical optics, noting caustic surfaces 22 p3951 A66-39648

Far-field light emission mode pattern of GaAs diode injection lasers, dielectric gradient in inversion layer and refractive index in junction 22 p3930 A66-39743

HF and VHF guided propagation in ionospheric whispering gallery treated by geometrical optics, emphasizing long-range paths between two terminals in ionosphere 22 p3863 A66-39933

Laser beams and resonators, discussing beam propagation in free space, geometrical optics application and resonator modes in view of aperture diffraction effects 24 p4225 A66-42806

**GEOMETRODYNAMICS**

Conditions for presence of constant center of pressure in geometrically-complex body immersed in fluid of variable density in stable equilibrium 07 p1031 A66-17408

Particle theory in which additive particle labels are defined in geometric terms of classical gauge theories of Yang-Mills type 12 p1916 A66-23823

Relation between moving matter and geometrical properties of space-time 14 p2333 A66-27217

Gravitational field evaluated as physical field and as strictly geometrical field 14 p2333 A66-27219

Classical analytical mechanics applied to mechanics of continua, noting relation between kinetic-stress functions and Ostrogradskii-Hamilton principle and stress tensor and finite deformation tensor 15 p2539 A66-29148

Rotating masses effect on inertial frames, analyzing stress energy tensor and Schwarzschild geometry 22 p3979 A66-40113

**GEOMETRY**

SA ANALYTIC GEOMETRY

SA DESCRIPTIVE GEOMETRY

SA DIFFERENTIAL GEOMETRY

SA FLOW GEOMETRY

SA HYPERGEOMETRIC FUNCTION

SA NONEUCLIDEAN GEOMETRY

SA NOZZLE GEOMETRY

SA PROJECTIVE-DIFFERENTIAL GEOMETRY

SA SURFACE GEOMETRY

SA TANK GEOMETRY

SA TOPOLOGY

SA VARIABLE GEOMETRY STRUCTURE

Book on space, time and relativity for nonmathematicians noting geometry, kinematics, dynamics and Einstein theory 08 p1255 A66-18893

Computer algorithm for geometric programming methods 19 p3309 A66-35874

Logical element geometry effect on fluid flow in turbulent reattachment device 20 p3501 A66-37645

Monograph on solving shell stability dynamic problems by geometric approximation 20 p3671 A66-37983

Vector equations of steady inviscid thermally nonconducting gas flows from geometric theory of triply orthogonal spatial curves 21 p3729 A66-39446

Geometric analysis of recordings by IR scanners, emphasizing significance of stereo imagery 24 p4210 A66-42289

**GEOPHYSICAL OBSERVATORY**

SA OGO

Corrected tables and maps of geomagnetic coordinates, covering methods of calculation and corrected data charts 04 p0513 A66-13377

Atmospheric whistler activity, discussing anomaly of low geographic latitude detection and various propagation modes at Rabat, Morocco from 1956 to 1958 05 p0673 A66-15048

Planetary distribution and interpretation of abrupt increases in cosmic ray intensity observed during periods of maximum solar activity but not related to visible solar phenomena 05 p0755 A66-15404

Improvement of Moscow State University installation for detailed investigation of extensive air showers and high energy muons 09 p1379 A66-20237

Weak latitudinal waves observed by Orlov method at three midlatitude stations from 1924 to 1930 10 p1530 A66-21260

Research activities at Chacaltaya Cosmic Physics Laboratory in Bolivia 15 p2476 A66-29514

National report on space research in Sweden 15 p2601 A66-29933

Power spectrum analysis of mean daily values of magnetic data for 27 observatories 24 p4201 A66-42597

**GEOPHYSICAL SATELLITE**

Evaluation of satellite radar altimetry for geophysical and oceanographic measurement 01 p0137 A66-10801

Auroral absorption height obtained from statistical satellite data on average precipitation rate of electrons in auroral zone as function of energy 03 p0364 A66-12663

Soviet report on ionospheric structure variations, drift magnitude, velocity and direction 05 p0674 A66-15226

Space research activities in U.S. /1964 and early 1965/, condensed comprehensive report to COSPAR 09 p1458 A66-20690

Upper atmosphere temperature and pressure measured with manometers mounted on rockets, using method of successive approximations 09 p1375 A66-20988

Soviet monograph on atmospheric exploration using rockets and satellites, covering meteorological and geophysical instrumentation, measurement parameters, etc 13 p2083 A66-26502

Geophysical rocket determination of aerosol scattering coefficient variation from brightness values at 70-450 km heights 15 p2495 A66-30057

**GEOPHYSICS**

SA GEOCHEMISTRY

SA INTERNATIONAL GEOPHYSICAL YEAR /IGY/

SA PETROGRAPHY

Continental Drift Symposium, London, March 1964 03 p0360 A66-12377

International Satellite Bibliography including orbital theory, lunar-satellite motion, artificial asteroids, geomagnetic field, geodesy, navigation, etc 03 p0424 A66-12457

Ionosphere and high latitude particles - COSPAR Symposium, Alpbach, Tirol, Austria, March 1964 03 p0361 A66-12639

International Geophysical Calendar for 1966 prepared by International Ursigram and World Days Service with advice of IQSY reporters 08 p1219 A66-19410

Concept of melting within Earth, effect on thermal model of Earth and differentiation of radioactive materials within Earth 09 p1370 A66-19878

Handbook of geophysics and space environments, 1965 09 p1370 A66-20267

Aerospace research in Poland using satellite observations for geodesy, geophysics and atmospheric dynamics 09 p1459 A66-20721

Statistical analysis of geophysical data 14 p2283 A66-26932

Encyclopedia of physics, Volume 49, Part I - Geophysics III 15 p2482 A66-28516

Book on advances in geophysics including astrogeology, atmospheric ozone, fluctuations of ground-water levels, etc 16 p2700 A66-31742

Celestial mechanics covering two-body problem, planetary and asteroid theory, interplanetary trajectories, lunar probe, spherical harmonics, etc 17 p2997 A66-32019

Review of experimental capabilities for reaching pressure and temperature conditions prevailing in Earth mantle and core, including bibliography 17 p2918 A66-32661

Data on geophysical phenomena at magnetically conjugate points on Earth including cosmic noise absorption, conjugacy of visual auroras, magnetic variations, VLF phenomena, etc 19 p3453 A66-35981

Temporary series representing evolution vs time of natural fluctuating phenomena /geophysical, climatic, biologic/ and relation to sunspot cycle 21 p3733 A66-39133

Depth estimation for buried anomalous mass from vertical gravity observation 23 p4063 A66-41203

Electromagnetic analog computer for solving Dirichlet and Neumann equations for half-space and associated geophysical problems 24 p4202 A66-42763

**GEOPOTENTIAL**

Vorticity equation describing properties of large-scale atmospheric motions 04 p0542 A66-14304

Numerical attempts to estimate determination accuracy of finite difference method for geopotential field 06 p0905 A66-16551

Artificial satellite theory extended to include long-periodic variations due to solid tesseral harmonics of geopotential 08 p1295 A66-19351

Spatial statistical correlation functions for normalized field of geopotential calculated for Europe and Asia 09 p1398 A66-19892

Separation formulas of potential fields of constant currents into lower half-space with application to geomagnetic field 09 p1373 A66-20481

Numerical attempts to estimate determination accuracy of finite difference method for geopotential field 14 p2327 A66-28223

Tesseral harmonics of coordinates using Baker-Nunn data and geopotential and dynamical procedures, noting iterative cycle for correction determination 15 p2491 A66-29999

Even zonal harmonic coefficients of Earth gravitational potential evaluated by analyzing precessions of satellite orbital planes 16 p2694 A66-30618

Pizzetti theory formulas for space normal gravity field of Earth extended to space surrounding Earth 17 p2921 A66-33194

Gravity anomalies of unsurveyed areas of Earth surface and influence on satellite orbit perturbations 17 p2921 A66-33196

Objective analysis of wind and temperature distribution in vertical cross section through atmosphere derived from radiosonde and rawinsonde data 17 p2949 A66-33336

Separation formulas of potential fields of constant currents into lower half-space with application to geomagnetic field 19 p3346 A66-35499

Satellite motion under influence of longitude-dependent terms of geopotential in reference frame rotating with satellite mean motion, noting tesseral harmonics effect and dynamical and librational

- resonances 19 p3470 A66-36388  
 Energy integral study of geopotential harmonic variation effects on satellite motion near critical inclination 20 p3653 A66-37763  
 Coefficients associated with near-resonance conditions with geopotential harmonics of order 12 in data obtained by tracking satellite 1965 89A 22 p3903 A66-39685  
 Geopotential variations related to five-day mean in Central Mediterranean and derivation of regression equations for forecasting 22 p3943 A66-40389  
 Numerical analysis of meteorological fields investigated statistically 22 p3943 A66-40390

## GEOPOTENTIAL HEIGHT

- Mutual dependence of harmonic coefficients of gravitational potential derived from satellite observations as source of computed geoid height distortions at Earth surface 16 p2700 A66-31804  
 Vertical wind gradient variation and energy variation at height ranging from 80 to 140 km and relation to gravity waves and upper atmosphere turbulence 23 p4066 A66-41849

## GEOSTROPHIC WIND

- Quasi-Lagrangian study of inviscid barotropic fluid for analysis of certain ageostrophic jet flows 02 p0222 A66-11825  
 Geostrophic coefficient of friction dependence on stratification from wind profile measurements at lower atmospheric layer 06 p0906 A66-16555  
 Kinetic energy variations in different parts of baric centers during atmospheric motion 08 p1217 A66-19301  
 Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 08 p1285 A66-19452  
 Estimated 10-mb geostrophic winds compared with winds measured by rocketsondes 11 p1731 A66-23385  
 Geostrophic coefficient of friction dependence on stratification from wind profile measurements at lower atmospheric layer 14 p2328 A66-28227  
 Numerical analysis of wind velocity profile measurements and theoretical calculation of profile by numerical methods, based on geostrophic friction coefficient 16 p2741 A66-30771  
 Computation of theoretical maximum probabilities of geostrophic wind components using network sampling theory 17 p2949 A66-33347  
 Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 18 p3169 A66-34481  
 Kinetic energy variations in different parts of baric centers during atmospheric motion 19 p3348 A66-36038  
 Baroclinic instability of quasi-geostrophic perturbation to zonal wind in two-layer inviscid model, examining short wavelength cut-off in terms of potential vorticity 20 p3550 A66-37468  
 Eigenvalue problem associated with dynamic instability of geostrophic wind 23 p4066 A66-42042

## GEOTROPISM

- Gravitational influence on living organisms studied by klinostate principle 06 p0811 A66-16061  
 Gravity effect on basipetal transport of auxin studied by growing plants both erect and on horizontal clinostats 06 p0812 A66-16564  
 Gravitational force perception thresholds of plants in weightless conditions measured in terms of growth and development 19 p3284 A66-35569

## GERDIEN CONDENSER

- Probe techniques in polar ionosphere covering cylindrical Langmuir, RF and mobility probes, Gerdien condensers, error sources, techniques, etc 03 p0362 A66-12641  
 Gerdien type chamber for measurements of ion mobility spectrum in terrestrial mesosphere and Mars atmosphere 18 p3114 A66-34712  
 Gerdien-condenser rocketborne probe used to measure ion densities in D region of atmosphere 22 p3905 A66-39947

## GERMANIUM

- Compensating temperature effects in systems using LDG type logarithmic germanium diode 01 p0035 A66-10205  
 Germanium fiber single crystal growth, properties and application 01 p0116 A66-10207  
 Radiation damage to germanium, silicon, indium and gallium antimonides and arsenides 01 p0119 A66-10373  
 Effect of poor surface finishes on existence of electromechanical effect in germanium 01 p0124 A66-10773  
 Light effect on surface conductivity of gold-alloyed germanium with clean surface 01 p0125 A66-10776  
 Electric current oscillations in germanium semiconductors having carriers in nonthermal equilibrium state 01 p0128 A66-11197  
 Oxygen impurity atom interaction with radiation-induced defects in germanium over wide temperature range, producing optically active oxygen defect complexes 02 p0272 A66-11486  
 Germanium Esaki diode characteristics with aging, noting change in excess current after forward bias application 02 p0198 A66-11522  
 Radiative recombination of degenerate and compensated germanium indicating that emission line at low temperatures shifts to higher energies with increasing excitation 02 p0273 A66-11715  
 Spectral distribution of carrier lifetime obtained from photomagnetoelectric effect and photoconductivity 02 p0273 A66-11719  
 Spectral responses of photoconductivity in plastically deformed germanium at liquid nitrogen temperature 02 p0274 A66-11720  
 Determination methods for various types of dislocation in germanium lattice and influence on physical properties of germanium 02 p0276 A66-12066  
 Temperature dependence of surface conductivity and Hall effect in germanium alloyed with gold 02 p0276 A66-12078  
 Anisotropic absorption of electromagnetic waves by hot carriers in germanium 02 p0277 A66-12082  
 Photo-emf of germanium in presence of surface recombination rate gradient 02 p0277 A66-12089  
 Impurity concentration dependence of difference between heat capacities at constant pressure and at constant volume in Ge 02 p0277 A66-12093  
 Germanium conductance measurement when immersed in aqueous electrolyte using DC and LF AC methods as polarization function 03 p0407 A66-12403  
 Uniaxial stress effect on minority carrier concentration, mobility and lifetime in germanium p-n junction 03 p0409 A66-12726  
 Piezoresistance of doped n-type germanium, determining nature of carrier scattering mechanism in degenerate materials and modification of conduction-band edge resulting from impurity states 03 p0412 A66-13148  
 Parametric amplification in millimeter-wave range, detailing parametric amplifier with germanium epitaxial diodes for use in radiometers 03 p0346 A66-13322  
 Chemical etching method useful for electron microscope observation of damage regions of high-energy neutron irradiated n-type germanium 04 p0562 A66-13738  
 Electrical, IR property measurements and annealing experiments on electron-irradiated oxygen doped germanium 04 p0562 A66-13747  
 Thermometric characteristics of gallium arsenide and germanium diodes 04 p0495 A66-13894  
 Electric field effect on long wave edge of extrinsic photoconductivity in zinc and mercury doped germanium 04 p0565 A66-14266  
 Ion-pairing process in nickel and lithium doped germanium 04 p0565 A66-14270  
 Temperature dependence of hole-capture cross section in germanium 04 p0565 A66-14271  
 Transmission of hole-type germanium in strong electric fields, noting spectral dependences of radiation modulation and hole absorption cross section 04 p0568 A66-14352

- Current oscillations in germanium and silicon connected to compensated semiconductor, noting surface impurities 04 p0569 A66-14355  
 Temperature dependent component in low temperature thermoelectric power of doped n-germanium observed in liquid helium region, noting negative magnetoresistance 04 p0570 A66-14369  
 Roentgen characteristic temperature of germanium and silicon calculated from elastic oscillation spectra 05 p0730 A66-14644  
 Germanium films deposited on heated crystal calcium fluoride substrates in vacuum system 05 p0732 A66-14666  
 Semiconductor thin film p-n junction thermocouples consisting of germanium crystal deposit in vacuum 05 p0736 A66-14974  
 Surface recombination on interface between germanium/electrolyte boundary 05 p0738 A66-15466  
 Electrically active impurities effect on germanium thermal resistivity at low temperatures measured on n-type single crystals 05 p0742 A66-15877  
 Compensation dependence of impurity conduction in n-type germanium containing antimony atoms 05 p0743 A66-15877  
 Strain dependence of impurity conductivity measured in compensated p-type germanium using uniaxial compression 06 p0922 A66-16177  
 Helicons in n-type silicon and germanium calculating collective modes of electrons in external magnetic field from frequency and wavelength-dependent conductivity tensor 06 p0923 A66-16279  
 Microwave switching and pulse modulation by impact ionization, using DC electric field to break down n-type germanium 06 p0851 A66-16455  
 Low level garnet limiter with operating range greater than one octave, using conductivity change due to impact ionization in n-type germanium, noting volt-ampere characteristic 06 p0851 A66-16455  
 Exponential band-edge tails observed experimentally in degenerate n-type germanium tunnel diode 06 p0925 A66-16665  
 Microwave induced generation of DC voltage across thin n-type germanium rod in waveguide 06 p0925 A66-16677  
 HF response of copper doped p-type germanium IR detectors 06 p0882 A66-16768  
 X-ray diffraction method for measuring thermal expansion coefficient of germanium, silicon, indium antimonide and gallium arsenide 06 p0930 A66-17047  
 Radiation damage in silicon and germanium semiconductors 06 p0932 A66-17111  
 Radiation damage in nondegenerate germanium at low temperatures, using hot carrier technique for measuring resistivity and Hall coefficient on antimonide doped samples 06 p0932 A66-17111  
 Metastable defect annealing in germanium by bombardment with short pulse of high energy electrons from Van de Graaf generator 06 p0932 A66-17111  
 Effectiveness of measurements of X-ray diffraction intensities as probe of lattice defects introduced in perfect germanium crystals by energetic particle irradiation 06 p0933 A66-17127  
 Gamma irradiated germanium at zero degrees C, studying annealing of recombination center, obtaining life time from transient decay of photoconductivity 06 p0934 A66-17127  
 Positions of defect energy levels in n-type germanium irradiated with fast neutrons analyzed by optical methods, measuring spectral distribution of photoconductivity and quenching curve 06 p0934 A66-17127  
 Point defect mobility and annealing in irradiated germanium and silicon by electron or gamma ray irradiation 06 p0937 A66-17140  
 Ripening of defects induced by fast neutrons in germanium in course of low temperature annealing 06 p0937 A66-17144  
 Characteristics and properties of defects induced in silicon and germanium by 10-to 60-mev electrons and 20-to 130-mev protons 06 p0939 A66-17156  
 Indirect and direct radiative recombination transitions in germanium and use in analysis of lifetime 07 p1094 A66-17314  
 Radiative recombination in germanium

- doped with As, Sb or In, using optical or electrical injection at 10 to 20 degrees K 07 p1095 A66-17322
- Electron capture and hole capture by impurity atoms due to radiative transitions in silicon and germanium 07 p1095 A66-17323
- Recombination radiation of n-type germanium with various dislocation densities, emphasizing mechanism of radiative transitions 07 p1096 A66-17324
- Ion damage and successive annealing of germanium observed by electron microscope 07 p1097 A66-17528
- Band structure of germanium in vicinity of Brillouin zone center 07 p1097 A66-17533
- Vacuum fusion and IR absorption determination of bulk oxygen content of germanium crystals 07 p1098 A66-17743
- Silicon-germanium thermoelectric power-generating devices 07 p0994 A66-18318
- Induced electric conductivity in germanium bombarded by potassium ion in different crystallographic directions 07 p1104 A66-18363
- Faraday effect on hot electrons in germanium and silicon 07 p1105 A66-18370
- X-ray characteristic temperature of germanium-silicon solid solution of equiatomic composition 07 p1106 A66-18379
- Carrier formation due to passage of current through elastically deformed Ge, detecting nonlinearity of volt-ampere characteristics 07 p1106 A66-18381
- Hole diffusion constant dependence on electric field in n-type germanium 07 p1106 A66-18395
- Stress-volume results between 20 and 140 kbar for germanium shock loaded in one-dimensional strain 07 p1108 A66-18419
- 600-mev proton irradiation effects on density and mobility of majority carriers in n-type germanium 08 p1267 A66-18647
- Kinetics of reactions in iodide method of growing epitaxial germanium 08 p1268 A66-18797
- Oscillations in impurity photoconductivity and absorption spectra of p-germanium samples 08 p1269 A66-18973
- Corrections to effective mass theory of shallow impurity states in germanium, using perturbation theory and wave functions 08 p1269 A66-19007
- High-field surface conductance of n-type germanium observed to be negative and magnitude to increase with field in high-field region 08 p1271 A66-19222
- Grid dispersion mobility dependence on temperature in p-type Ge, noting discrepancy of theoretical and experimental results 08 p1273 A66-19257
- Electric current passage through multivalley n-germanium semiconductor plates, noting nonuniform electron distribution 08 p1273 A66-19275
- Hall effect measured by splitting alternating voltage produced in Hall circuit into two components, one with phase coinciding with Hall emf and other with phase departing by 90 degrees 08 p1273 A66-19289
- Optical absorption in germanium in region of forward transition with spectral transmission curve having structure in form of two minima 08 p1274 A66-19316
- Recombination of hot current carriers via recombination center on germanium surface 08 p1276 A66-19611
- Magnetoresistance measurements of germanium in strong magnetic field 08 p1277 A66-19616
- Ionization energy in silicon carbide and germanium irradiated by electrons 08 p1278 A66-19628
- Potential distribution at germanium-electrolyte interface in iodide ion solutions 08 p1278 A66-19824
- Stationary germanium potentials in oxidizing media and light illumination 09 p1410 A66-19895
- Electrolytic deposition of copper and gold on germanium surface 09 p1338 A66-19896
- Microscopic theory of electroacoustic effect for n-type Ge and Si semiconductors of many energy minima, noting electron scattering 09 p1412 A66-19986
- Discharge in germanium thin films at liquid helium temperatures, noting electrostatic ionization of impurities and shock-ionization region 09 p1412 A66-19990
- Fluctuation of electric field distributions within germanium sample when one contact of sample is used to inject holes 09 p1412 A66-19994
- Hysteresis nature of current-voltage characteristics observed in p-n junctions obtained by bombarding germanium crystals with fast electrons 09 p1413 A66-20001
- Anisotropy of balanced photoelectromagnetic emf in p-type germanium sample in which normal to illuminated surface coincides with crystallographic axis 09 p1413 A66-20002
- Balanced anisotropic photoelectromagnetic effect in germanium 09 p1413 A66-20003
- Rapid cooling induced stress leads to separation between tin and germanium, creating pure germanium surface at plane of separation 09 p1427 A66-20366
- Galvanomagnetic and field effect measurements on Ge double crystals 09 p1427 A66-20419
- Characteristics of cadmium sulfide photocells and p-n junction photocells, using germanium or silicon 09 p1355 A66-20573
- Logarithmic temperature dependence of electrical resistivity found in metallic impurity conduction in n-type germanium 09 p1430 A66-20849
- N-type germanium electric conductivity dependence on applied electric and magnetic field 09 p1430 A66-20857
- Photovoltaic response of variously doped germanium-silicon diodes, confirming band diagram for germanium-silicon heterodiodes dominated by lattice mismatch interface states 09 p1360 A66-20978
- Diffusion length dependence on energy of exciting photons for p-silicon and n-and p-germanium, using bevel-grind technique 10 p1578 A66-21666
- Polarization of helicons in n-type silicon and germanium 10 p1580 A66-21733
- Energy band structure of germanium and silicon throughout Brillouin zone by k-p Hamiltonian 10 p1581 A66-21738
- Diagonalization 10 p1581 A66-21738
- Stored charge storage in surface states of germanium and silicon 10 p1581 A66-21877
- Field effect and surface states at interface between germanium and electrolytes 10 p1586 A66-22145
- Electron excitation in germanium by alkali metal ions, noting effect on electrical conductivity 10 p1587 A66-22154
- Electroconductivity of n-type Ge in strong SHF electrical fields 10 p1587 A66-22155
- Disappearance of impurity levels in germanium containing arsenic in presence of large injection level 10 p1588 A66-22161
- Effect of poor surface finishes on existence of electromechanical effect in germanium 11 p1749 A66-22284
- Light effect on surface conductivity of gold-alloyed germanium with clean surface 11 p1749 A66-22288
- Spin resonance of donor electron in Ge and anisotropic line width in relation to dislocation stress 11 p1750 A66-22463
- VHF power modulation receivers using germanium injection modulators produce no additional noise at frequencies around 25 cps 11 p1670 A66-23228
- Gallium arsenide whiskers on germanium structure, using electron diffraction photography and electron microscopy 11 p1757 A66-23280
- Sandwich method in closed system for growing semiconductor germanium epitaxial films 11 p1757 A66-23282
- Resonance properties of germanium analyzed by passing DC and AC through samples of various specific resistance with tungsten needle contacts 11 p1759 A66-23419
- Splitting in indirect absorption edge spectrum dependent on direction and magnitude of applied stress and light polarization with respect to stress axis 12 p1927 A66-23721
- Doping techniques for epitaxial growth of silicon and germanium layers 12 p1832 A66-23933
- Cascade theory of electron recombination into ionized donors in germanium analyzed, noting several models 12 p1928 A66-23940
- Accelerated life tests of germanium transistors, with failure percentage plotted against time 12 p1834 A66-24086
- Absorption spectrum of germanium at various temperatures and wavelengths and of heavily doped germanium at room temperature, obtaining agreement for both cases with theory of structural absorption of holes 12 p1929 A66-24452
- Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and test temperatures 12 p1929 A66-24454
- Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 12 p1930 A66-24460
- Germanium specimens with various dislocation densities quenched from high temperatures to introduce vacancies, contamination by copper atom diffusion, finding activation energy 12 p1930 A66-24801
- High field magnetoresistance and random inhomogeneities in arsenic-or antimony-doped n-type germanium 12 p1931 A66-24805
- Length changes in electron irradiated high purity germanium at liquid helium and nitrogen temperatures, noting large initial expansion 13 p2157 A66-25047
- Microstructure of epitaxial germanium films deposited on calcium fluoride substrates, noting parameters of deposition 13 p2158 A66-25063
- Field emission of germanium alloyed with silver and irradiated with IR 13 p2160 A66-25108
- Transport equation for germanium-gallium arsenide-iodine system and epitaxial vapor growth preparation of GaAs-Ge heterojunction by closed tube process 13 p2161 A66-25185
- Uniaxial stress effect on Ge inclined p-n junctions 13 p2161 A66-25191
- Hall reversal at negative resistance in forward biased p-Ge point contact diode 13 p2029 A66-25192
- Diffused-base alloyed-emitter p-n-p type planar germanium microwave transistor 13 p2038 A66-25558
- Effect of magnetic field on field effect at germanium surface, determining rate of surface recombination 13 p2166 A66-25697
- Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 13 p2166 A66-25917
- Roentgen characteristic temperature of germanium and silicon calculated from elastic oscillation spectra 13 p2167 A66-25922
- Silver salts effect on etching of germanium single crystals, noting photomicrographs of structural changes 13 p2169 A66-26584
- Low-temperature internal friction peaks in germanium and oxygen-doped and pure silicon crystals 13 p2170 A66-26586
- Morphology and structure of gallium arsenide crystals containing germanium core grown by iodine transport process in closed tube 13 p2170 A66-26587
- Amplitude probability density of random stationary signal potential and variation of free carriers in germanium semiconductor at near-ambient temperature 13 p2170 A66-26758
- Microwave Faraday effect in n-type germanium, discussing Faraday rotation, ellipticity, magnetoabsorption, complex conductivity tensor elements and measurement of microwave polarization anisotropy 14 p2349 A66-26826
- Crystallization sequences in alkali aluminogermanate glass 14 p2318 A66-26947
- Microwave rotator using hot carrier property of n-type germanium 14 p2248 A66-27056
- Surface photoconductivity dependence on thermal and spectral state and time lag of germanium 14 p2357 A66-27073
- Hot electron recombination at repulse impurity centers in germanium containing copper 14 p2357 A66-27074
- Spontaneous LF current oscillations in germanium with copper, with compensated energy levels under illumination, low temperatures and electric fields, noting formation of electric domains 14 p2357 A66-27076
- Recombination radiation of strongly arsenic-doped germanium, noting narrowing of forbidden band 14 p2358 A66-27080
- Thermoconductivity of germanium alloyed

with arsenic and gallium depends on impurity type starting from certain impurity concentration 14 p2359 A66-27178

Influence of p and n doping on electrification of dust of Ge monocrystals grown from zone-melted material 14 p2364 A66-27717

Alloying real germanium surface with gold impurity and increase of fast surface states and rate of surface recombination 14 p2365 A66-27752

Photoelectric yield and energy distribution for clean-cleaved cesium-covered /111/ surfaces of silicon and germanium 14 p2365 A66-27755

Minority carrier drift mobility in p-type germanium single crystal under uniaxial lattice compression 14 p2365 A66-27758

Field-effect-modulated optical absorption spectrum for various values of Ge surface potential 14 p2366 A66-27765

Transmission of hole-type germanium in strong electric fields, noting spectral dependences of radiation modulation and hole absorption cross section 14 p2368 A66-28250

Current oscillations in germanium and silicon connected to compensated semiconductor, noting impurities 14 p2368 A66-28252

Electrical properties of germanium-gallium arsenide heterojunctions of p-n and n-n structure 14 p2369 A66-28260

Parametric amplification in millimeter-wave range, detailing parametric amplifier with germanium epitaxial diodes for use in radiometers 14 p2260 A66-28296

Degree of perfection of Ge and GaAs single crystals and epitaxial films effect on integral intensity jump at K absorption edge seen in Bragg diffraction 15 p2557 A66-28561

Transient and steady state photoconductivity in plastically bent germanium, noting logarithmic decay of photocurrent and logarithmic lux-ampere characteristics 15 p2558 A66-28608

Dielectric field cathode model of field and photofield emission from high resistivity Si and Ge at low temperatures 15 p2558 A66-28609

Effect of impurity atoms or neutron irradiation on X-ray diffraction intensities of silicon and germanium crystals 15 p2559 A66-28625

High field properties of gold doped germanium at liquid nitrogen temperature 15 p2560 A66-28633

Acceptor nature of dislocations in p-type germanium 15 p2560 A66-28636

Damaged depth in germanium thin films induced by bombardment with low energy argon ions measured, using differences in sputtering yield for given energy 15 p2561 A66-28705

Seebeck coefficient of germanium films vacuum-deposited on Vycor substrate 15 p2562 A66-28723

Electric characteristics of epitaxial Ge films vacuum deposited on seminsulating GaAs substrates with thicknesses near one million angstroms 15 p2566 A66-29386

Lifetime measurement for minority carriers injected into germanium by electron bombardment 15 p2567 A66-29409

Thermometric characteristics of gallium arsenide and germanium diodes 15 p2467 A66-29708

Fabricating perfect dendritic germanium crystals with required resistivity and dislocation density 15 p2569 A66-29787

Field emission of germanium alloyed with silver and irradiated with IR 16 p2771 A66-30287

Evaluation of energy resolution of Li-drifted Ge detectors and preamplifiers using FETs in nuclear spectrometry 16 p2660 A66-30625

Absorption coefficient change due to electric field measured for indirect absorption edges of silicon and germanium, determining energies of phonons taking part in indirect optical absorption 16 p2775 A66-30728

Magnetic field effect on direct band-to-band tunnel current in doped germanium, noting decreases in reverse current and current-voltage characteristics 16 p2776 A66-30735

Effect of thermal population of /000/ and /100/ conduction bands on elastic constants of heavily doped n-type germanium 16 p2778 A66-31070

Generation recombination noise in Ge single crystals under fast neutron irradiation, using reversible technique to vary noise parameters 16 p2778 A66-31072

Local pressure effect on forward and reverse current in germanium p-n junction 16 p2779 A66-31081

Germanium single crystal whisker formation by iodide method of selective epitaxial growth 16 p2781 A66-31405

Magnetic field influence on AC surface field effect in germanium resulting from change in sample conductance and not from change in surface barrier height 16 p2784 A66-31450

Photoconductivity spectra and kinetics of p-and n-type germanium crystals bombarded by fast electrons at 5.2 and 100 degrees K 16 p2788 A66-31776

Electric field dependence of piezoresistance in germanium, noting correlation with intervalley scattering in energy balance 16 p2788 A66-31778

Temperature dependence of mean ionization energy changes in germanium and silicon samples exposed to X-rays caused by changes in forbidden bandwidth 16 p2788 A66-31782

Instability of Sb and Au-doped n-type germanium during carrier injection, examining current-voltage and frequency characteristics and illumination effects 17 p2974 A66-31858

Secondary breakdown relaxation oscillations and I-V characteristics of point-contact n-type Ge diode 17 p2879 A66-31866

Epitaxial growth techniques for silicon and germanium, discussing hydrogen reduction methods, doping and impurity control, etc 17 p2976 A66-32259

Longitudinal Hall effect in n-type germanium measured on basis of anisotropic scattering theory, taking into account tensor character 17 p2976 A66-32260

Oxygen defect complexes in neutron irradiated germanium 17 p2980 A66-32847

Structure and batch fabrication of beam lead planar Ge Esaki diode 17 p2895 A66-33119

Recombination of hot current carriers via recombination center on germanium surface 17 p2983 A66-33125

Magnetoresistance measurements of germanium in strong magnetic field 17 p2983 A66-33130

Ionization energy in silicon carbide and germanium irradiated by electrons 17 p2984 A66-33142

Negative photoconductivity in germanium at temperature and doping levels important with impurity conduction 17 p2985 A66-33293

Damaged germanium surface epitaxial layer influence on resistivity and mobility of thin semiconductor sheets 17 p2986 A66-33294

External electron emission measurement from polished n-germanium and n-silicon surfaces 17 p2986 A66-33310

Current instability of plasma injected into germanium, noting effect of strong electric field in presence of temperature gradient 17 p2987 A66-33313

Negative photoconductivity in germanium, noting breakdown and negative conductivity in In region, volt-ampere characteristics, etc 17 p2987 A66-33315

Recrystallization of Ge and Si thin films and structural changes due to electron bombardment and thermal annealing 17 p2988 A66-33456

Thermodynamic and optical properties of Ge, Si, diamond and GaAs, obtained by inelastic neutron scattering technique, used to measure vibrational spectrum 18 p3154 A66-33922

Magnetopiezo-optical reflection in germanium observed by piezoreflection technique for direct transition 18 p3156 A66-34467

Electron energy loss spectra of Ge and Si in amorphous, polycrystalline and monocrystalline form 18 p3159 A66-34710

Impurity conduction for arsenic diffused into p-type germanium and boron into n-type silicon 19 p3433 A66-35342

Controlled doping of germanium layers during evaporation, noting behavior differences for p-and n-type impurities and concentration dependence 19 p3434 A66-35344

Hydrogen reduction techniques and layer quality measurement methods for epitaxial growth of silicon and germanium crystals 19 p3437 A66-35477

Twin boundary effect on measurements of phonon momentum propagating through Ge bicrystal p-layers at liquid nitrogen temperatures 19 p3438 A66-35481

Field effect and surface states at interface between germanium and electrolytes 19 p3440 A66-35755

Electron excitation in germanium by alkali metal ions, noting effect on electrical conductivity 19 p3440 A66-35761

Electroconductivity of n-type Ge in strong SHF electrical fields 19 p3440 A66-35761

Disappearance of impurity levels in germanium containing arsenic in presence of large injection level 19 p3441 A66-35777

Drift rate and precipitation of lithium ions in germanium as affected by resistivity acceptors, carrier lifetime and copper diffusion 19 p3442 A66-35911

Lithium-drifted germanium detector resolution and efficiency as function of temperature for gamma rays 19 p3359 A66-35911

Splitting of ground state of neutral mercury two-hole acceptor in unstressed silicon or germanium evidenced by intensity decrease of photoabsorption peaks 19 p3444 A66-36174

Dipole scattering of electrons in germanium and silicon whose conduction band structure is described by many-valley model, using distribution function and computing relaxation-time ratio 19 p3446 A66-36339

Absorption of polarized electromagnetic waves at zero degrees K in n-type germanium under high uniaxial stress 19 p3446 A66-36339

Photomagnetic anomaly in germanium in induction coil subject to variations in magnetic moment 20 p3618 A66-37581

Absorption spectrum of germanium at various temperatures and wavelengths and of heavily doped germanium at room temperature, obtaining agreement for both cases with theory of structural absorption of holes 20 p3619 A66-37681

Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and temperatures 20 p3619 A66-37681

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 20 p3620 A66-37691

Subshell photoelectron emission in germanium at angle of 90 degrees to converting X radiation determined for two radiation sources using photographic techniques and track counting method 20 p3621 A66-38091

Surface recombination on interface between germanium/electrolyte boundary 20 p3622 A66-38131

Germanium damage due to low energy He, Ne, Ar and Kr ion bombardment 20 p3623 A66-38339

Normal incidence reflectivity and transmissivity coefficient measurements in Ge thin epitaxial films 20 p3623 A66-38339

Model estimate of oxygen concentration captured from residual gases by epitaxial germanium and silicon films prepared by vacuum deposition 21 p3795 A66-38521

Thermostability of germanium power transistors, noting collector leakage current 21 p3709 A66-38671

Interband microwave scattering of holes by cyclotron resonance in Ge 21 p3797 A66-38751

Cyclotron resonance observation of electron scattering by Ga and In atoms in Ge 21 p3797 A66-38751

Spiral instabilities in semiconducting germanium plasma in radial electric and axial magnetic fields 21 p3797 A66-38751

Relation between electrical properties and structural features of gold-and antimony-doped germanium single crystals, noting abrupt decrease in

- mobility 21 p3799 A66-38928  
N-type Ge hot carrier Hall mobility, magnetoresistance, Maxwellian energy distribution, electron-electron and intervalley electron-phonon collisions 21 p3801 A66-38997  
Preferential formation of peaks of single-crystal silicon and germanium samples exposed to short-duration electron beam 21 p3801 A66-39117  
Heteroepitaxial deposition of films of germanium in single-crystal form on sapphire by vapor growth techniques 21 p3802 A66-39163  
Cyclotron resonance study of electron scattering by thermal acceptors in quenched Ge 21 p3805 A66-39567  
Energy and wave functions of singly charged donor impurity centers in silicon and germanium 22 p3959 A66-39772  
Predicted plasma mode in microwave frequency range for magnetoplasma excitations in germanium, applying theory to n-type and p-type lead telluride 22 p3960 A66-39805  
Photovoltaic response of p-n Ge-Si and Ge-GaAs heterojunctions dominated by carrier generation in narrow or wide gap material 22 p3960 A66-39813  
Change in temperature conditions during growth of epitaxial germanium films from molecular beam in vacuum 22 p3961 A66-39928  
Butler iron meteorite composition, noting unusually high cobalt and germanium content and low cooling rate 22 p3978 A66-40013  
Butler iron meteorite composition, noting very high concentration of germanium, gallium and nickel exhibiting Widmanstätten pattern 22 p3978 A66-40014  
Optical spectrum of normal excitons in deformed and nondeformed n-type Ge single crystal layers for four orientations 22 p3964 A66-40306  
Current-carrier scattering anisotropy dependence on antimony impurity concentration in n-Ge established, using measurements on Hall effect and conductivity 22 p3965 A66-40321  
Method of characterization for germanium microwave transistors and circuit design principles for low noise performance 22 p3881 A66-40746  
Surface photoconductivity dependence on thermal and spectral state and time lag of germanium 22 p3966 A66-40831  
Hot electron recombination at repulse impurity centers in germanium containing copper 22 p3966 A66-40832  
Spontaneous LF current oscillations in germanium with copper, with compensated energy levels under illumination, low temperatures and electric fields, noting formation of electric domains 22 p3966 A66-40833  
Recombination radiation of strongly arsenic-doped germanium, noting narrowing of forbidden band 22 p3967 A66-40836  
Parallel and transverse magnetic field effects on electric field induced optical absorption at photon energies below direct gap in Ge 23 p4109 A66-41036  
Resonance absorption of gamma-quanta by tin in germanium 23 p4110 A66-41133  
Surface charge mobility measurement method applied to Si and Ge and time variation of surface conductivity 23 p4110 A66-41183  
Degree of perfection of Ge and GaAs single crystals and epitaxial films effect on integral intensity jump at K absorption edge seen in Bragg diffraction 23 p4112 A66-41282  
Resistance meters for heavily doped silicon and germanium 23 p4068 A66-41571  
X-ray K-absorption spectra of titanium, vanadium and germanium in germanides 23 p4082 A66-41826  
Silicon-germanium lead-telluride segmenting for improved thermoelectric efficiency, noting sequential fabrication process difficulties 24 p4248 A66-42115  
W-diffusion bonding in preparing segmented silicon-germanium-lead telluride thermoelements, noting properties 24 p4248 A66-42116  
Radiative recombination within space-charge region in germanium exposed to increasing surface field 24 p4251 A66-42308  
Generation-recombination noise and lifetime measured using photoconductive decay in n-and p-type Ge samples doped with shallow impurities 24 p4253 A66-42357  
Surface photovoltage theory for small signals in Si and Ge, considering photocarrier trapping on surface and conductivity in space charge region 24 p4253 A66-42358  
Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si 24 p4255 A66-42496  
Matrix elements of Coulomb potential between Schechter functions and overlap integrals necessary in determining two-center acceptor states in p-type Ge and Si 24 p4255 A66-42497  
Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si, noting numerical results 24 p4255 A66-42498  
Multiple cyclotron resonance absorption lines in degenerate valence bands of Ge semiconductor studied with far IR laser submillimeter spectrometer 24 p4257 A66-42545
- GERMANIUM ALLOY**  
Surface conductivity of germanium gold alloyed at liquid nitrogen temperature, considering field effect 01 p0127 A66-11059  
Thermal and magnetic properties of GeTe and PbTe semiconductors containing transition elements in solution 01 p0127 A66-11079  
Nonlinear electrical effects and recombination of hot electrons in compensated germanium, studying steady and transient I-V characteristics 02 p0273 A66-11717  
Uniaxial stress effect on germanium-silicon alloyed heterojunction 03 p0410 A66-12729  
Piezomagnetoresistance on compressive stress for antimony-alloyed germanium, observing magnetic field induction 04 p0569 A66-14358  
Thermoconductivity of alloyed solid silicon-germanium solutions 05 p0731 A66-14652  
Secondary breakdown in germanium alloy and diffused-alloy transistors 09 p1358 A66-20817  
N-type germanium alloyed with gold shows negative photoconductivity in strong electric fields 10 p1589 A66-22173  
Germanium alloy transistor for high current and low saturation voltage requirements, noting high efficiency, physical properties, application, etc 13 p2037 A66-25543  
Thermoconductivity of alloyed solid silicon-germanium solutions 13 p2167 A66-25927  
Temperature variation and carrier concentration effects on density-of-states effective mass, polar and dipolar thermoconductivity, electron and phonon scattering and electron-phonon interaction in doped Si-Ge alloys 14 p2365 A66-27759  
Piezomagnetoresistance on compressive stress for antimony-alloyed germanium, observing magnetic field induction 14 p2368 A66-28256  
Stable microwave oscillations in single crystal Ge alloy p-n junction diodes 15 p2567 A66-29402  
Tunnel diode capacitance relation to displacement interpreted in terms of impurity drift in nonuniform field of p-n junction in highly doped germanium diodes 19 p3433 A66-35302  
N-type germanium alloyed with gold shows negative photoconductivity in strong electric fields 19 p3441 A66-35787  
Metallography, roentgenography and differential thermal analysis of composition temperature ranges of chromium-germanium phases 23 p4082 A66-41825
- GERMANIUM COMPOUND**  
Order in equiatomic germanium silicon solid solution, using diffusion scattering of X-rays calculated by least squares method 01 p0124 A66-10768  
Microwave rotation spectrum for GeS in frequency ranges from 10.7 to 11.4 and 32.1 to 34.1 gc at temperatures between 450 and 650 degrees C 04 p0567 A66-14336  
Mercury and zinc ions in germanium, discussing hole capture cross section in comparison to standard white noise source 05 p0731 A66-14660  
Structure of sulfide films deposited on silicon and germanium single crystals 07 p1092 A66-17223  
Electrical conductivity variation of low and high resistance germanium due to X-ray radiation absorption 07 p1100 A66-17932  
Energy spectrum of current carriers in germanium telluride, investigating electrical properties of polycrystalline and single crystal samples 07 p1105 A66-18376  
Optical modulation of current in germanium-silicon n-n heterojunctions, noting consistency of I-V, C-V and photocurrent spectra characteristics with depletion region model of material 08 p1273 A66-19253  
Hall effect in germanium telluride samples with various current carrier concentrations at temperatures up to 500 degrees C 09 p1413 A66-20000  
Superconductivity in Ag doped GeTe and monoxides of Ti and Nb 09 p1423 A66-20070  
Order in equiatomic germanium silicon solid solution, using diffusion scattering of X-rays calculated by least squares method 11 p1748 A66-22279  
K absorption spectra of germanium and selenium in germanium selenide based on band theory of solids by assuming electrons transfer, using X-ray spectroscopy 11 p1758 A66-23368  
Length changes and conductivity variations in electron irradiated n-and p-type germanium, noting methods of measurement, effects of isochronic annealing at liquid helium and nitrogen temperatures 12 p1926 A66-23717  
Bulk germanium arsenide operating simultaneously as microwave amplifier, mixer and oscillator under continuous wave conditions 12 p1835 A66-24144  
Epitaxial vapor growth of germanium from germanium iodide with hydrogen and argon atmosphere, examining various growth parameters 13 p2161 A66-25193  
Mercury and zinc ions in germanium, discussing hole capture cross section in comparison to standard white noise source 13 p2167 A66-25935  
Hydrazine hydrate interaction with halogenides of tetravalent germanium in aqueous organic solvents 14 p2231 A66-27137  
Cadmium and indium thiogermanates, properties and synthesis 14 p2361 A66-27339  
Thermal expansion coefficient of doped germanium, noting correlation between impurity used and coefficient variation 14 p2368 A66-28244  
Current voltage characteristic of three layer germanium semiconductors, noting quadratic dependence of current on voltage 16 p2785 A66-31668  
Vapor growth of Ge on Ge, GaAs and Si substrates, noting preparation methods, characteristics, etc 16 p2786 A66-31686  
Current-carrier scattering in germanium telluride 16 p2788 A66-31780  
Structure of sulfide films deposited on silicon and germanium single crystals 17 p2976 A66-31994  
Gamma irradiation effects on minority carrier lifetime in germanium, noting temperature effect 17 p2987 A66-33321  
Thermodynamic properties and electromotive force of germanium telluride used in electrochemical schemes 19 p3434 A66-35360  
Indentation damage and subsequent annealing effect on etch-polished Ge surfaces at room temperature examined with optical microscope, using interference contrast techniques 19 p3434 A66-35401  
Systems producing germanide phases noting phase diagrams of germanides of s-elements, ds-elements, fds-elements and sp-elements 20 p3616 A66-37415  
Properties of ferrous ion in iron germanium oxide studied in terms of Mossbauer effect and susceptibility measurements 20 p3621 A66-37823  
Thermoelectric properties of solid solution of germanium telluride in copper antimony telluride 23 p4114 A66-41572  
Equiatomic rare earth germanide magnetic structural characteristics 24 p4252 A66-42353

Impurity photoconductivity spectra of p-type germanium at low temperatures, noting parameters of relative depth of equidistant minima oscillations 24 p4256 A66-42515

## GERMANIUM OXIDE

Germanium dioxide surface adsorption characteristics with respect to water vapor 10 p1583 A66-21983

Structure and properties of intermediate components of iron-oxide-germanium-oxide system analyzed, using heat treatment 13 p2162 A66-25355

## GERMANIUM RECTIFIER

Electric properties of germanium and silicon filamentary diodes in which base volume diode structure contains disintegrated region 03 p0346 A66-13319

Electric properties of germanium and silicon filamentary diodes in which base volume diode structure contains disintegrated region 14 p2260 A66-28293

Bonded backward diode fabrication and performance as microwave mixer and low-level detector 17 p2891 A66-32913

Germanium mixer diodes encapsulated in miniature double-ended construction, examining fabrication, performance and applications 17 p2892 A66-32921

Tunnel effect current in esaki diodes calculated for operation at low temperatures, examining WKB wave functions for steady state 18 p3086 A66-34390

## GERMANY

## SA WEST GERMANY

Max Planck Institute activities in space and atmospheric artificial ion cloud production and radiation measurement 01 p0170 A66-10362

Development of air transport in East Germany after World War II including route charts of Lufthansa 01 p0170 A66-11071

German participation in aerospace technology noting space transporter design and development 02 p0177 A66-11667

Production and recent developments in gas turbines and propulsive engines in West Germany 06 p0942 A66-16795

West Germany and international cooperation in aerospace engine development, noting VTOL aircraft and supersonic and hypersonic spacecraft 06 p0943 A66-16797

European Miniature Electronic Components and Assemblies Data 1965-1966, Part I, Germany and Italy 06 p0858 A66-17158

German and Austrian astronomical observatories reports on personnel, equipment, projects and publications 13 p2189 A66-26736

Space research in Federal Republic of Germany during 1965 15 p2599 A66-29901

German Democratic Republic space program noting equipment for satellite observation, geodesy, aeronomy, etc 15 p2600 A66-29911

Interrelation between lunar phase and occurrence of precipitation larger than 10.0 mm per day in northern Germany 16 p2742 A66-31113

## GERMINATION

Seed germination and seedling growth dependence on oxygen, noting microaerobic capabilities among vascular plants, water effect, etc 18 p3059 A66-34204

## GERONTOLOGY

## S AGING

## GETOL AIRCRAFT

Ground effect takeoff and landing /GETOL/ aircraft, noting problems in controlling it and configurations of annular jet 16 p2635 A66-31396

## GETTER

Molybdenum and titanium cathodes applied in getter ion pump, noting improvement of initial and average performance 13 p2078 A66-25649

## GIANT STAR

Solar system formation theory that planets were formed from gigantic gaseous suns as result of tidal action and loss of mass by suns 01 p0135 A66-10298

Magnetoturbulent kinetic energy instrumental in removal of general relativistic instability of supermassive stars 01 p0138 A66-10882

Evolution of 15 solar masses star from main sequence through helium core burning, comparing with evolution of less massive

stars 11 p1773 A66-22782

Interstellar molecular hydrogen abundance and possible source from giant stars 13 p2182 A66-25579

Lithium/calcium ratio of five F giant and six G giant stars 13 p2183 A66-25611

Dynamic stability of supermassive stars with nuclear-energy generation, noting rotation and limiting mass for hydrogen burning 14 p2385 A66-28117

Arguments inferring that all population II red giant stars become planetary nebulae 20 p3656 A66-38050

## GIBBS EQUATION

Thermodynamic functions determined for nonequilibrium system using Gibbs local equilibrium ensembles to incorporate temperature inhomogeneity 03 p0445 A66-13191

Shift of gas mass from high pressure to low pressure sides of divided vessel, with communication by bursting diaphragm and by-pass valve 05 p0664 A66-15638

Asymptotic inequalities to determine phase volume within given boundaries with aid of Gibbs canonical distribution 21 p3756 A66-38738

## GIBBS PHENOMENON

## SA FOURIER SERIES

Sufficient conditions for transformation sequence exhibiting Gibbs phenomenon when using triangular methods of Fourier series summability 02 p0250 A66-12106

Equilibrium phases of elastic materials occurring at uniform temperature and pressure and at zero deviatoric stress, examining rapid quenching and shearing effects 21 p3829 A66-38940

Gibbs-DiMarzio theory of glass transition used to derive Simba-Boyer parameter, which is function only of fractional unoccupied volume 22 p3938 A66-40911

## GIMBAL

Free and forced vibration effect on drift of gyroscope supported in gimbal 23 p4071 A66-41981

## GIMBALLED CONTROL

Terminal prediction guidance for rocket vehicles in terms of strapped-down and gimbaled platform 01 p0101 A66-10042

Tests of airborne, gimbal and stabilized mounts of LaCoste-Romberg and Askania-Graf gravity meters conducted in 1962 04 p0524 A66-14452

Gimballed jet engine development, noting application to V/STOL aircraft and design of plenum chamber burning engine 10 p1591 A66-21366

ESG strapdown inertial navigation system based on double integration of acceleration and analysis of electronic gimbaling-induced errors 13 p2124 A66-25653

Inertial guidance systems using three-gimbal, four-gimbal and ball-type platforms, operative control of aircraft, ships and ballistic missiles 13 p2125 A66-26140

Motion of gyroscope in gimbal suspension 17 p2958 A66-32589

Mechanization of vectorial equations by means of four-gimbal platform and speed sensor for automatic setting of hybrid inertial systems 20 p3597 A66-37395

Friction and imbalance moments relative to gimbal axes and effects on gyrovertical motion under starting conditions 21 p3739 A66-39325

Inertial measurement unit and pulse torquing of Apollo spacecraft, noting components and operation [GIMBALDOGRAPH 105] 24 p4215 A66-43126

GIMBALESS INERTIAL REFERENCE SYSTEM

No-gimbal system mechanizations evaluated by flight test and compared for advantages, noting system error 21 p3764 A66-38851

## GLAND

## S ADRENAL GLAND

## S ENDOCRINE SYSTEM

## S PAROTID

## S PITUITARY GLAND

## S THYMUS

## S THYROID

## GLARE

Visual effects produced by factors of so-called glare from stationary and moving

targets 16 p2641 A66-31388

## GLASS

## SA E GLASS

## SA SILICA GLASS

Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 01 p0091 A66-10771

Physical properties of uncommon noncrystalline amorphous silica, alumina, magnesium fluoride and gold-silicon alloy examined for identification as glasses [ACS PAPER 20-G-64F] 02 p0248 A66-11295

Polarization of light from glass laser doped with two percent positive trivalent neodymium measured with time resolution of less than microsecond 03 p0378 A66-13006

Sensitized photolytic decomposition of ethanol and diethyl ether glasses analyzed at low temperature, using electron paramagnetic resonance /EPR/ spectroscopy 06 p0820 A66-16124

Temperature and oxygen effect on aromatic solute sensitized photo-decomposition of ethanol and ether glasses 06 p0821 A66-16125

Glass properties, formation and application to aerospace systems 07 p1054 A66-18301

Glass as component of metal-based materials in powder metallurgy noting properties, interaction of molten glass with metals, etc 10 p1548 A66-21510

Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 11 p1720 A66-22282

Glass transition temperature of polymethyl methacrylate as affected by low concentrations of monomer and diethyl phthalate plasticizers 11 p1720 A66-22977

High temperature crystallization processes and physicochemical properties of lithium/aluminosilicate glass 12 p1900 A66-24855

Chemical durability of lithium silicate glass as result of crystallization 12 p1901 A66-24864

Fluorescence behavior of gadolinium and terbium, noting nonradiative energy transfer in borate glass 13 p2158 A66-25055

Thermal optical behavior of glasses and other potential laser materials and thermal distortion in air, water, benzene, ethanol and toluene 13 p2092 A66-25996

Crystallization sequences in alkali aluminogermanate glass 14 p2318 A66-26947

CERCOR glass-ceramic axial flow rotary regenerator as inexpensive component for gas turbine regeneration [ASME PAPER 66-GT/107] 14 p2301 A66-27004

Rubidium-strontium isotopic study of five types of glass from Bosumtwi crater in Ghana and Ivory Coast 14 p2284 A66-27602

Damage thresholds for various glasses exposed to laser pulses, emphasizing internal damage 15 p2524 A66-28732

Low threshold neodymium glass laser oscillator with high repetition 17 p2937 A66-33325

Critical magnetic field and transition temperature measurements of superconducting indium in porous glass, using LF mutual inductance technique 21 p3796 A66-38549

Optical spectra of ultrashort optical pulses generated by mode-locked glass-doped neodymium lasers, considering saturable absorber cell placed parallel to Fabry-Perot reflector 21 p3747 A66-39115

Gibbs-DiMarzio theory of glass transition used to derive Simba-Boyer parameter, which is function only of fractional unoccupied volume 22 p3938 A66-40911

Glass lasers, comparing glass with crystals as hosts for laser ions, considering neodymium laser properties 24 p4224 A66-42800

GLASS COATING

Transient resistance and time delay of protective glass coatings on film resistance thermometer 06 p0882 A66-16845

Particle size and heat treatment effects on stability and reflectance of thermal control glass pigment coatings under UV radiation [ATAA PAPER 65-136] 15 p2616 A66-29288

Increasing sturdiness of glass-to-metal seals in cesium vapors 15 p2429 A66-29707

- Space charge polarization in glass films, discussing parameters of shift of capacitance-voltage characteristics, diffusion coefficient in metal-glass-silicon dioxide-silicon double-layer capacitor 16 p2779 A66-31089
- GLASS FIBER**
- Glass, quartz, mineral and ceramic fibers woven into fabric provide thermal insulation, reinforced plastic, filtration, friction materials and electrical insulation 01 p0091 A66-10356
- Interference effects at thin transparent cylindrical glass fibers exposed to coherent light from He-Ne laser 01 p0081 A66-10368
- Physical properties of 181 glass cloth laminates of diallyl orthophthalate and isophthalate in high temperature range 02 p0248 A66-11689
- Engineering exploitation of glass fiber reinforced plastics for aircraft structures [AIAA PAPER 65-762] 03 p0386 A66-12590
- Use of monofilament composites of S-glass fibers and epoxy-resin in primary aircraft structure [AIAA PAPER 65-761] 05 p0772 A66-14729
- Fiber composite materials - ASM Seminar, Metals Park, Ohio, October 1964 05 p0700 A66-14807
- Origin and properties of fiber composite materials 05 p0705 A66-14808
- Manufacturing glass-fiber-reinforced plastic container for high pressure helium gas in European launcher rockets 06 p0889 A66-17076
- Optimum reinforced composite strength of glass-reinforced plastics depends on filament geometry factors such as filament content, orientation and dimensions [AIAA PAPER 66-142] 06 p0901 A66-17081
- Symmetrical negative resistance in valence-exchange reaction in semiconductor pnp-type glass junctions 09 p1430 A66-20847
- Glass-resin interaction of filament-wound composites, determining material properties and application to high performance pressure vessels 11 p1783 A66-23121
- Glass fiber reinforcement for plastics, determining tensile strength of fibers, glass structure, elasticity modulus improvement via annealing, etc 11 p1720 A66-23126
- Elastomechanical properties of glass fibers and resins in order to determine optimum materials for reinforced glass fiber structures [ONERA TP 322] 11 p1721 A66-23200
- Thermal properties, tensile strength and uses of combination of glass fiber and epoxy resin material, Fiberglass S /994/, in space vehicles 12 p1899 A66-23966
- Rest period effect on fatigue testing of polyester fiberglass and polymethylmethacrylate plastics under static and intermittent tensile loads 12 p1899 A66-24039
- Tensile testing of fiberglass plastic anisotropic specimens with axis at angle to reinforcing fiber direction 12 p1899 A66-24040
- Strain gauge load measuring transducer operating in bending mode and based on elastic properties of epoxide glass fabric laminate 12 p1884 A66-24985
- Magnetization of synthetic filamentary superconductors, discussing sample preparation, critical field and transition temperature effect on flux jumping and magnetic hysteresis loop 13 p2157 A66-25037
- Rotationally-symmetric intake nozzles manufactured by low cost technique for wind tunnels from glass fibers and plastics, using wooden pattern 13 p2085 A66-25080
- Role of discontinuous fibers /whiskers/ in forming composites and how reinforcing parameters and processing vary from those used in continuous fibers systems, noting differences between boron and fiberglass whisker characteristics 13 p2113 A66-25310
- High temperature structural properties of polybenzimidazole, polyimide and phenolic laminates under different loading conditions 13 p2113 A66-25311
- Stress concentration in glass-fiber reinforced plastic with spatial irregularities 13 p2115 A66-26406
- Resin fiberglass sandwich materials for reinforcement of plastic laminated space structures 14 p2402 A66-27876
- Stressed state of cylindrical shell made of coiled glass fibers 16 p2822 A66-31625
- Axisymmetric deformation of cylindrical shell consisting of many layers of glass fabric connected by polymer mass 16 p2823 A66-31626
- Models for producing glass-fiber-reinforced plastic structural components 17 p2929 A66-31968
- Change in tensile strength during winding of prestressed oriented glass fiber filaments 17 p2942 A66-32047
- Prestressing effect on strength of glass fiber reinforced metal shells 17 p2939 A66-32048
- Glass reinforced plastics for helicopter primary structures 18 p3124 A66-33690
- Burst hoop test and new ISAS ring test methods for rapid evaluation of hoop strength of filament-wound fiberglass reinforced plastic cylindrical specimens 19 p3472 A66-35356
- Creep testing of glass fiber reinforced thin plastic plates and beams under torsion and bending 19 p3473 A66-35756
- Composite structures of glass-fiber reinforced resin and other materials for launch shell structures [AIAA PAPER 65-286] 20 p3672 A66-38165
- Equations for analysis of prestressed cylindrical shells made of fiberglass reinforced plastics with hollow fibers, longitudinally and transversely wound 22 p3990 A66-40143
- Penetration resistance of fiberglass-reinforced plastics against small-caliber projectiles noting relations between energy loss, stopping power and plate thickness 22 p3938 A66-40433
- Use of monofilament composites of S-glass fibers and epoxy-resin in primary aircraft structure [AIAA PAPER 65-761] 23 p4083 A66-40979
- High temperature structural properties of glass fabric-reinforced polybenzimidazole, polyimide and phenolic laminates for aerospace application 23 p4083 A66-41389
- Temperature and heat resistant properties of fiberglass-reinforced plastic nose cone in supersonic flight 23 p4132 A66-41421
- Prestressing effect on fiber alignment and strength of glass fiber laminates 24 p4289 A66-42338
- GLAUCOMA**
- Diagnostic standards for primary glaucoma in pilots, noting use of instrument tonometry and problems connected with sudden incapacitation 06 p0814 A66-16832
- GLIDE LANDING**
- Parachute and cushion landing system for specific payload geometry for touchdown with gliding descent, considering minimum weight design 19 p3278 A66-35626
- GLIDE PATH**
- Optimum gliding regime using Krotov generalized theory and linear partial differential equations 11 p1732 A66-22354
- Oscillatory trajectories in atmospheric entry of lifting vehicles at subcircular speeds and constant angles of attack with initial conditions deviating from equilibrium glide 17 p3016 A66-33065
- Glide range with variable lift drag ratio expressed in power series of speed 20 p3492 A66-37428
- GLIDE SLOPE**
- Adaptive coupler providing extended automatic glide slope beam following by compensating for beam convergence 01 p0101 A66-10036
- Visual segment vs glide slope geometry 12 p1810 A66-24959
- GLIDER**
- SA HYPERSONIC GLIDER**
- SA PARAGLIDER**
- SA SPACE GLIDER**
- Drag reduction for gliders, noting role of planform and warping of wing 05 p0607 A66-15198
- Drag decrease in glider aircraft noting wing profile, flow laminarization /boundary layer control/, landing flaps, tail, etc 05 p0607 A66-15200
- Glider performance including sink speeds, climb speed, absolute thermal strength, etc 07 p0989 A66-18057
- Longitudinal stability and controllability characteristics of glider, considering effect of elastic warp of wing 09 p1331 A66-20757
- Statistical research on g-loadings and atmospheric turbulence in field of structural strength limits for sporting gliders 12 p1801 A66-23855
- Instrumentation of Polish gliders including altimeters, rate-of-climb, turn and air speed indicators, magnetic compasses, artificial horizon, etc 12 p1882 A66-24386
- Safety-factor problem in glider design, discussing limiting load concept in form of extreme load in exceptional cases of operation 21 p3696 A66-38620
- Short-periodic motion of tailless glider analyzed to determine degree of overcompensation of flap required for good stability 23 p4016 A66-41784
- GLOBAL TRACKING NETWORK**
- /GLOTRAC/**
- Global maximum for particle idealization of rocket propelled vehicle moving in calculus of variations, noting Lagrange equation 04 p0538 A66-13462
- GLOBULIN**
- SA GAMMA GLOBULIN**
- Antibody globulin coupled to diazotized aminoaryl derivative of carboxymethyl-cellulose to form immunoadsorbent for extracting antigens 12 p1805 A66-23568
- GLOSSARY**
- European Miniature Electronic Components and Assemblies Data 1965-1966, Part I, Germany and Italy 06 p0858 A66-17158
- European Miniature Electronic Components and Assemblies Data 1965-1966, Part II, France, Netherlands, Scandinavia and Switzerland 06 p0859 A66-17159
- Space technology jargon, noting language used, origin and formation of words, acronyms, etc 16 p2831 A66-31151
- Glossary of gravimetric and celestial geodesy 23 p4063 A66-41525
- GLOTRAC**
- S GLOBAL TRACKING NETWORK**
- /GLOTRAC/**
- GLOW DISCHARGE**
- SA ELECTRIC DISCHARGE**
- Hot glow probe determination of plasma space potential noting disturbance due to contact potential drift and probe construction, accuracy and applicability 01 p0113 A66-10639
- Effect produced by nonhomogeneous HF field on distributed plasma parameters 01 p0115 A66-11050
- Brush cathode used in abnormal glow region, determining features of produced plasma 02 p0196 A66-11429
- Plasma velocity field determined from glow discharge in crossed fields propagating along rectangular channel, two walls being dielectrics and other two electrodes 02 p0268 A66-11786
- Formulas relating detector current to average UHF power obtained for positive plasma column and dark Faraday region of glow discharge 02 p0269 A66-11844
- Photochemical studies of oxygen-ozone and carbon dioxide equilibria with bromine UV lamp 04 p0473 A66-13397
- Electron mobility in potassium and cesium DC glow discharges at low electron temperature 05 p0728 A66-15809
- Thin film deposition by electron-beam and glow-discharge activation of various gaseous ambients 06 p0848 A66-16302
- Radio noise emission from Venus surface explained in terms of glow discharge 06 p0957 A66-17174
- Contact-making process in cadmium sulfide crystals, examining influence on plasma electron efficiency in glow discharge effect 08 p1272 A66-19243
- Stable plasma belt trapped in permanent dipolar magnetic field, measuring floating potential, electric and magnetic drifts, etc 08 p1265 A66-19408
- Silicon dioxide glass films by decomposing tetraethoxysilane in AC-induced glow discharge in which water is chemically incorporated into oxide films 09 p1432 A66-20979
- Time- and space-resolved measurements on self-excited moving striations and on low pressure glow discharge to externally excited pulses 10 p1564 A66-21565
- Model for interpretation of positive column two-dimensional striations of diffuse mode

gas discharge in uniform magnetic field 10 p1564 A66-21569

Plasma behavior in crossed stationary electric and magnetic fields, examining field dependence of ion velocity and ion and electron temperature 10 p1566 A66-21704

Glow-discharge shock tube examination of chemiluminescent, surface-catalytic and gas-phase reaction rates, noting temperature dependence of NO-O and CO-O chemiluminescent reactions 13 p2016 A66-25368

Wind tunnel apparatus for flow visualizations at Mach 14 by glow discharge method 13 p2059 A66-26376

Discharge afterglow in low pressure tube studied by photomultiplier 13 p2150 A66-26473

Magnetic effect on emission spectrum of negative glow plasma in hollow-cathode discharge, noting pressure effect 14 p2340 A66-27024

Inverse brush cathode design that functions like brush cathode in producing negative glow plasma 15 p2550 A66-28728

CW IR laser oscillation in atomic Cl in HCl and HI gas discharges, noting use of two power supplies and energy level diagram 15 p2513 A66-28880

Catalytic efficiency of noncatalysts interferes with accuracy of measurement, noting necessity of oxygen treatment of noncatalytic surfaces 15 p2502 A66-29310

Acoustic wave generation and amplification in weakly ionized plasma, explaining sound emission in glow discharge and modulation in plasma afterglow 15 p2556 A66-29808

Dielectric properties and thermostability of glow-discharge thin organic polymer films for electronic application 16 p2783 A66-31429

Microwave switching tube for rapid pulse transmission on microwave communication channel, utilizing glow discharge 16 p2666 A66-31445

Detection of centimeter waves in glow discharge plasma feasible as result of processes generated in cathode irradiated by UHF field 16 p2765 A66-31560

Sinusoidally varying HF electric field effect on glow discharge plasma, showing capability of confinement 17 p2971 A66-32785

Book on glow discharge and plasma physics including collisional processes, ionization, vacuum systems, application in electronics, etc 18 p3150 A66-34946

Glowing high-voltage discharge produced with hollow anode in discharge gap of various configurations 18 p3152 A66-35079

Hydrogen ions detected near anode of glow discharge at various pressures, using mass spectrometer 19 p3410 A66-36455

Positive plasma column produced by hydrogen glow discharge studied by mass spectrometer for various pressures and currents 20 p3608 A66-37459

Electron energy distribution function obtained by Druyvesteyn analysis in low-current positive column neon discharge compared with theoretical distribution function 20 p3608 A66-37463

Unstable combustion products of glow discharge, discussing effect of propagation rate of hydrogen-oxygen flame 21 p3834 A66-38473

Transverse separation of rare gas-metal vapor mixture components in positive nonisothermal plasma column in plain-symmetric glow discharge 22 p3958 A66-40934

Inorganic thin film surface finish for boron filaments, noting improved adhesion to organic resins and high temperature oxidation resistance 23 p4082 A66-41895

High sensitivity method of visualization of supersonic flow of rarefied gas, using glow from cathode parts of glow discharge 24 p4196 A66-42876

**GLUCOSE**

Nonelectrolytes and hydroxy and fluorobenzoates behavior on elution through columns of tightly cross-linked dextran gels 11 p1645 A66-22990

Acceleration stress-induced changes in fat metabolism, level of circulating glucose and corticosterone level in rats 15 p2431 A66-28868

Serum glucose and free fatty acids in man during prolonged exercise 17 p2859 A66-32366

Difference spectra of glucose cultures of *Chlorella vulgaris* beyernick indicate increased pigmentation in white light and monochromatic light over dark controls 20 p3507 A66-37791

**GLYCINE**

Ferroelectric properties of trissarcosine calcium chloride including dielectric measurement, Curie temperature region, etc 08 p1270 A66-19009

Indolylacryl glycine excretion in man 16 p2638 A66-30634

Stimulated Brillouin scattering in ferroelectric triglycine sulphate crystals and Rochelle salt exhibiting second-order phase transition, measuring scattering threshold as temperature function 20 p3620 A66-37770

**GLYCOGEN**

Age effect on liver glycogenesis in rats exposed to acceleration stress 17 p2860 A66-32555

Myocardial glycogenolysis in rat ventricle and relation to severity of exercise 20 p3505 A66-37058

**GLYCOL**

Oscillographic polarography to determine relation between adsorption characteristics and molecular weight of polyethylene glycol 14 p2295 A66-27655

**GNOTOBIOTICS**

Spacecraft sterilization problem using gnotobiotic techniques and isolators, noting peracetic acid role and hot wire techniques for insertions 13 p2014 A66-25289

**GOLD**

Growth of single crystal gold films in ultrahigh vacuum on clean vacuum-cleaved salt surfaces 01 p0117 A66-10242

Low temperature alpha radiation and subsequent isothermal recovery effects on electron structure of gold, relating resulting failures to Frenkel defects 07 p1048 A66-17303

Current-voltage relationship of Au on GaAs Schottky barrier, examining introduction of single temperature independent parameter 07 p1106 A66-18399

Gold diffusion into silicon and formation of segregations in surface layers and crystal disturbances 08 p1268 A66-18861

Time-temperature total hemispherical emittance study of gold-plated 304 stainless steel in temperature range of 1000-1800 degrees F 12 p1895 A66-24376

Transmission factor of rectilinearly polarized light as affected by plasma oscillations in granular films of gold 13 p2163 A66-25440

Jet plating of gold to make ohmic contacts on silicon 14 p2361 A66-27277

Photoemission of electrons from Si and Au valence bands into thermally grown silicon dioxide conduction band 14 p2365 A66-27757

Electron energy distribution for emission from aluminum-aluminum oxide-gold thin films 14 p2257 A66-27943

Precipitation effects in phosphorus-diffused silicon after gold diffusion, using transmission X-ray diffraction microscopy 15 p2561 A66-28700

Effect of electrical charge on surface of glass substrate on nucleation density and initial growth structure of thin films of gold prepared by evaporation under ultrahigh vacuum 15 p2466 A66-29683

Hydrogen, He, Ne and Xe high energy molecular beam scattering from gold film surfaces during evaporative deposition 16 p2752 A66-30392

Effect of annealing on thin gold films sandwiched between two evaporated layers of zinc sulfide, presenting resistance curves 16 p2779 A66-31083

Temperature effect on color of thin layers of gold of various thicknesses connected with anomalous absorption phenomenon in gold layers 16 p2780 A66-31212

Epitaxial growth configurations of single-crystal potassium bromide on sodium chloride, using gold decoration method, showing effect of crystal orientation on growth rate 16 p2780 A66-31213

Vapor deposited gold thin films to obtain adhesion and durability between film and substrate essential as lubricants in high vacuum 17 p2929 A66-31979

Gold distribution and precipitation in phosphorus-diffused silicon

wafers 17 p2980 A66-3264

Gold and silver doping effect on Hall effect, electroconductivity thermal emf and conductivity of CdSb 17 p2984 A66-3314

Low effective resistivity of gold film plated onto tin determined by low temperature microwave absorption measurement and explained by free-electron model and superconductivity proximity effect 19 p3443 A66-3601

Dislocation dipoles produced by ion bombardment of thin gold films, noting that during annealing dipoles can condense form only one dipole 19 p3447 A66-3671

Vectorial photoelectric effect and quantum efficiency measurement in thin gold film for two light polarizations, using Lallemand electronic camera 20 p3614 A66-3721

Optical constants of silver and gold various energy regions, measuring relative refractivities of polarized light, analyzing collective motions of conduction electrons 20 p3615 A66-3721

Transmission electron microscopic analysis of initial epitaxial growth stage evaporated Au films on NaCl cleavage surfaces 21 p3798 A66-3871

Gold doping effects on recovery time of phosphorus, boron and arsenic impurity gaseous-diffused junction diodes and estimated gold recombination center densities 22 p3873 A66-3971

Spatial distribution of hot electron coherently scattering in thin Au film 23 p4115 A66-4201

**GOLD ALLOY**

Properties of dispersion-hardened gold-copper and platinum alloys made chemically and vapor plating metal or particles of metal oxides 03 p0381 A66-1251

Properties of silicon diodes with gold all bases, examining anomalies in V-characteristics 04 p0499 A66-1401

Selective properties of gold-compensated silicon diodes, noting behavior in presence of bias currents and current voltage characteristics 04 p0499 A66-1401

Amplification and generation properties of gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 04 p0499 A66-1401

Conditions for formation of barium and gold compound for semiconductor 04 p0570 A66-1431

High temperature oxidation of liquid yttrium and liquid lanthanides and their alloys with gold, obtaining parabolic diffusion-controlled rate constants 08 p1235 A66-1861

N-type germanium alloyed with gold showing negative photoconductivity in strong electric fields 10 p1589 A66-2221

Electrical resistivities of gold-erbium alloys measured at low temperatures 12 p1933 A66-2411

Alloying real germanium surface with gold impurity and increase of fast surface state and rate of surface recombination 14 p2365 A66-2771

Charging effect of Ag-Au alloys and other properties determined by perturbation theory 14 p2365 A66-2771

Conditions for formation of barium and gold compound for semiconductor 14 p2369 A66-2811

AuSn-Pb section of Au-Pb-Sn phase diagram, examining solderability of gold coatings of electronic components 16 p2722 A66-3031

Properties of silicon diodes with gold all bases, examining anomalies in V-characteristics 17 p2885 A66-3211

Selective properties of gold-compensated silicon diodes, noting behavior in presence of bias currents and current voltage characteristics 17 p2885 A66-3211

Amplification and generation properties of gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 17 p2885 A66-3211

N-type germanium alloyed with gold showing negative photoconductivity in strong electric fields 19 p3441 A66-3511

Thermoelectric power and electrical resistivity of copper-gold alloy doped with 3d transition metals as function of temperature and atomic number impurity 23 p4114 A66-4111

**LD PLATE**  
Resistance decrease in vacuum-evaporated  
old films from 150 to 250 degrees C when  
environment is cycled from inert to  
oxidizing 21 p3802 A66-39161

**NDOLA**  
Fiberglass balloon gondola used to eliminate  
environmental problems in photomultipliers  
and spark chambers carried by high altitude  
balloons 10 p1618 A66-21866

**ONIOMETER**  
Electronic solid state goniometer for  
producing navigation information for  
transmission from VHF omnirange /VOR/  
ground station 05 p0645 A66-14582

**OURSAT PROBLEM**  
Goursat problem for hyperbolic systems of  
two first-order equations solved by integral  
relation method 13 p2119 A66-25855  
Plate fixed on two opposite sides and  
simply supported on other two sides treated  
by method based on generalized Goursat  
theorem to lattice 20 p3674 A66-38295

**RADIANT**  
SA POTENTIAL GRADIENT  
SA PRESSURE GRADIENT  
SA TEMPERATURE GRADIENT  
Steepest descent, covering iterative  
methods for driving support mapping  
gradient to zero in convex  
programming 04 p0540 A66-13997

**RAIN**  
SA PROPELLANT GRAIN  
Variation of LN 29546 test for  
determination of susceptibility of aluminum  
alloy sheet to coarse grain  
formation 14 p2313 A66-27013  
Kh16N15M2B steel properties and effects  
of grain size and Nb/C  
ratio 15 p2519 A66-28536  
Heat conductivity coefficients of granular  
materials calculated by cylindrical and  
spherical models with porosity of 0.215 and  
0.476 respectively 20 p3678 A66-37421  
Thermal conductivity of finely divided and  
granular materials through solid phase and  
interstitial gas or by radiation between  
granules 21 p3835 A66-38768

**RAIN BOUNDARY**  
Lattice and grain boundary self-diffusion  
coefficients of radioactive nickel 63 into  
high purity nickel measured over  
temperature range 650-475 degrees  
C 04 p0535 A66-13746  
Exact measurement of local temperature,  
determining grain boundary temperature  
gradient, describing  
probe 06 p0882 A66-16938  
Precision casting based on directional  
solidification resulting in longitudinal  
columnar grains with preferred orientation,  
eliminating transverse grain boundaries in  
gas turbine elements  
[SAE PAPER 660055] 09 p1388 A66-20153  
Anomalous diffusion of boron parallel and  
perpendicular to dislocation arrays in grain  
boundary contained in  
silicon 10 p1574 A66-21356  
Electrical properties of dislocations in  
artificially produced  
polycrystals 10 p1582 A66-21902  
Annealing twins and twin-boundary  
intersections in niobium, noting invalidity of  
cause-and-effect relationship between twins  
and crack formation in bcc  
structures 11 p1717 A66-22998  
Initial yielding characteristics of vacuum-  
melted iron as function of thermal history  
after slow cooling or quenching, noting  
interstitial segregation into grain  
boundaries 11 p1719 A66-23398  
Grain boundary role in high temperature  
fracture behavior of magnesia, noting  
temperature and orientation dependence of  
shear strength 12 p1897 A66-24920  
Surface pit formation in aluminum,  
discussing effects of vacuum, quenching  
high temperature and repeated  
cycling 12 p1897 A66-24921  
Diffusion creep rate of thin foil of pure  
polycrystalline material 12 p1971 A66-24925  
Heat affected zone cracking in nickel-base  
superalloys attributed to grain-boundary  
liquitation 14 p2314 A66-27343  
Ductility enhancement of tungsten by  
rhenium addition due to modification of  
grain boundary precipitate

morphology 16 p2722 A66-30222  
Rhenium effect on interface energies of  
Cr, Mo and W, noting liquid surface tension,  
solid surface energy and grain-boundary  
grooving 18 p3121 A66-33726  
Grain boundary grooving in Cr, Mo and W,  
noting formation mechanism, effect of  
carbon on activation energy for surface  
diffusion, etc 18 p3121 A66-33727  
Electrical measurements of stannic oxide  
in ceramic form, noting forming and firing  
of samples, dielectric dispersion, grain  
boundary capacitances,  
etc 18 p3155 A66-34197  
Grain boundary precipitation and  
intermediate phase in polycrystalline oxide  
systems after annealing 19 p3387 A66-35414  
Improved thermal shock resistance of  
zirconia upon addition of 15 mole percent  
titanium attributed to metal in grain  
boundary 19 p3381 A66-35979  
Grain boundary migration in pure  
aluminum and lead under reversed torsional  
and bending stresses at elevated  
temperatures 19 p3386 A66-36365  
Relation between surface grain structure  
and galvanomagnetic properties of  
polycrystalline mercury telluride thin films  
with high current-carrier  
mobility 20 p3624 A66-38434  
High temperature tensile deformation of  
polycrystalline magnesia prepared by single-  
crystal recrystallization and hot  
pressing 21 p3753 A66-38592  
Deformation of aluminum single crystals  
during constant load tensile  
test 22 p3935 A66-40201  
Grain boundary cavity growth in Al-Cu  
alloy during compressive creep  
testing 22 p3935 A66-40291  
Oxygen inhibition of grain boundary  
movement and stabilization of optical  
transmission in cuprous iodide thin  
film 23 p4110 A66-41152  
Grain boundary self-diffusion coefficient  
variation with applied stress and production  
of lattice vacancies applied to cavity growth  
in high temperature fatigue of  
Mg 23 p4081 A66-41714  
Creep rate of polycrystalline thorium  
dioxide for high temperatures and  
pressures, examining intergranular voids  
formed by growth and coalescence of pores  
along grain boundaries 23 p4082 A66-41772  
Anodizing techniques used in diffusion  
studies of TiC system 24 p4228 A66-42616

**GRAPH**  
SA CHART  
SA FLOW GRAPH  
SA NOMOGRAPH  
SA OSCILLOGRAPH  
SA SPECTROGRAPH  
Graphs for problems of computing system  
design automation, specifically finding  
algorithm for graph scheme  
construction 02 p0250 A66-12102  
Graphical method for motions of nonlinear  
systems with several degrees of freedom  
based on expansion of graphic construction  
of phase-plane  
trajectories 03 p0436 A66-12693  
Kinetic equations of complex reactions  
derived, using conical graphs, reducing  
reversible reaction problems to problems of  
irreversible kinetics 06 p0822 A66-18544  
Synthesis of automation elements and  
finite automata in graphical  
form 07 p1012 A66-17383  
Properties, symmetries, code matrices and  
Euler paths for linear graphs used as  
models for physical systems, considering  
planar triply connected  
graphs 07 p1057 A66-17747  
Plotting oriented graph of two-stage  
electronic circuit with cathode  
coupling 08 p1200 A66-18923  
Evolutionary graphs to solve systems of  
linear equations 08 p1246 A66-19635  
Graphical analysis of recurring and  
periodic waveforms to determine  
fundamental frequency and major harmonic  
components 10 p1549 A66-21232  
Parameters of dielectric walls of various  
structures with optimal radio-engineering  
characteristics treated by graphical  
method 10 p1511 A66-21676  
Linear graphs theory as part of topology  
solving problems in circuitry, psychology,

linear programming, matrices, network  
theory, etc 11 p1875 A66-22627  
Indium antimonide diodes of various base  
thickness for high injection levels, results in  
graphical form applied to magnetic diode  
production 11 p1666 A66-22740  
Graphical analysis of tunnel diode  
monostable circuits described by high order  
nonlinear differential  
equations 11 p1677 A66-22766  
Algebraic and graphical methods for  
evaluating system stability and parameter  
sensitivity 12 p1854 A66-24382  
Carpet plotting technique for increased  
interpolation accuracy 13 p2031 A66-25363  
Graphical determination of phase  
trajectories and oscillation limits of  
nonlinear sampled system 13 p2056 A66-26755  
Graphical matching solution for gas turbine  
power plant closed cycle systems  
[ASME PAPER 66-GT/CLC-14] 14 p2224 A66-26984  
Graph analysis by connectivity  
considerations, based on generating and  
characteristic functions, noting application  
to sampled data systems, discrete Markov  
processes, computer programs,  
etc 15 p2453 A66-29771  
Graphic analysis of behavior of stepwise  
extremal control system adapted to process  
showing inertia after static  
characteristic 16 p2668 A66-30585  
Synchro system transfer functions  
comprising synchro and resolver cascades of  
nonidentical units, giving graphs for system  
transformation ratio and phase  
shift 16 p2672 A66-31440  
Generalized star-mesh transformation in  
network theory obtained using fact that  
Kirchoff rules, Maxwell rules, Mason rules  
and Coates formulas can be obtained from  
each other 17 p2899 A66-32053  
Graph-theoretic concepts for relating Reed  
segs and their duals to two classes of  
subgraphs 17 p2900 A66-32054  
Evolutionary graphs to solve systems of  
linear equations 18 p3127 A66-34173  
Graph and derivation of performance  
characteristics of phase-shift-keyed  
communication systems where receiver  
phase reference is noisy 18 p3069 A66-34250  
Graph techniques used in connection with  
nonharmonic series representation of  
stationary Gaussian signals for analysis of  
nonlinear systems 19 p3392 A66-36706  
Computer algorithm for recognition and  
extraction of planar graph from incidence  
matrix 20 p3523 A66-38279  
Realization of directed graph having  
prescribed terminal connection matrix  
without self-loops and minimum number of  
arcs 20 p3539 A66-38284  
Mayor-Mises method for solution of  
kinematic and kinetostatic problems of  
three-dimensional mechanisms  
[ASME PAPER 66-MD-2] 21 p3741 A66-38475  
Graphic solution for factoring higher-order  
polynomials of response function resulting  
from analysis of linear filter  
networks 21 p3756 A66-38672  
Thermal growth and deposition of silica  
films by silicon tetrafluoride  
hydrolysis 22 p3962 A66-40048  
Graphical determination of atmospheric  
pressure from rocketsonde temperature  
measurements 22 p3943 A66-40056  
Indium antimonide diodes of various base  
thickness for high injection levels results in  
graphical form applied to magnetic diode  
production 23 p4045 A66-41478  
Graph theory and enumeration of basic  
kinematic chains and  
mechanisms 23 p4097 A66-41978  
Pictorial representation of pulse-height  
energy spectra with two independent  
variables originating from experimental  
analyzer 24 p4172 A66-42490

**GRAPHIC ARTS**  
Computer graphics in  
communication 13 p2085 A66-25364  
Complex component design using man-  
computer system with graphic input/output  
devices, discussing application for digital  
computer circuit card design  
[SAE PAPER 660459] 18 p3116 A66-33897  
Adhesive backed birefringent tape for  
separation of thin film and printed circuit  
master drawings with near perfect

registration for microelectronic production  
masking purposes 24 p4180 A66-42312

## GRAPHITE

## SA PYROLYTIC GRAPHITE

Graphite content effect on antifriction  
properties of graphitized nickel-based  
copper and iron alloys 01 p0087 A66-10745

Temperature control of graphite nuclear  
furnace, using 02 p0228 A66-11517

Fracture strength of two rocket-nozzle-  
grade graphites under ten biaxial stress  
states at room 03 p0435 A66-12637

temperature 03 p0435 A66-12637

Turbulent boundary layer interaction with  
graphite heat shield noting boundary layer  
velocity, temperature and chemical  
composition profiles [AIAA PAPER 65-824] 03 p0446 A66-13232

Graphite and carbon steel case hardening  
by chromium 05 p0702 A66-15111

Growth and destruction of ice mantles on  
interstellar graphite grains by sputtering,  
thermal evaporation and cloud  
collisions 05 p0765 A66-15845

Mineral content and structure of graphite  
and sulfide inclusions in iron meteorites  
measured by reflected light and  
microprobe 06 p0952 A66-15940

Interaction characteristics of nuclear-active  
cosmic ray particles with carbon nuclei at  
mountain altitudes 07 p1114 A66-17549

Graphite properties relationship to  
microstructure and control by fabrication  
techniques and material  
selection 07 p1053 A66-18295

Graphite protection against high-  
temperature oxidation by making composites  
with high-resistant metal  
powders 07 p1055 A66-18505

Mie scattering calculation to support  
theory that interstellar extinction is caused  
by graphite particles 08 p1288 A66-18786

Resistance-grown pyrolytic graphite in  
crystallographic, thermal and electrical  
measurements 08 p1244 A66-19223

Aluminum nitride coatings on graphite  
deposited by introduction of plasma-  
generating gas into electric arc between  
tungsten cathode and aluminum filament  
anode 09 p1392 A66-20149

Ceramic and graphite fibers and whiskers,  
Air Force sponsored  
monograph 09 p1392 A66-20475

Plasma and carbide coatings for protecting  
graphite surfaces at high temperatures  
obtained by sputtering or deposition and  
thermal treatment to induce  
diffusion 10 p1548 A66-21508

Sliding contact wear under very dry high  
altitude or space conditions due to lack of  
contact film prevented by using chemical  
compounds like graphite or lithium  
carbonate 12 p1888 A66-24664

K emission band of graphite examined,  
using grazing incidence spectrometer and  
Gaussian window function 12 p1931 A66-24802

Graphite composites suitability for use on  
hypersonic entry vehicle  
components 14 p2319 A66-28014

Carbide-graphite skeleton materials  
prepared by sintering compressed graphite  
powder during thermochemical treatment  
with carbide-forming  
elements 15 p2524 A66-28751

Graphite lubricant physical and chemical  
combinations with other materials for  
improved high temperature friction and  
wear, discussing nuclear irradiation for  
graphite lattice  
modification 17 p2929 A66-31933

Graphite and C-H-O gas phase equilibrium  
at high temperatures and pressures in  
implication of Earth ocean and atmosphere  
development 17 p3015 A66-33432

Mie computations made possible by precise  
data experimentally determined for  
wavelength dependence of refractive index  
of graphite 18 p3233 A66-34576

Carbon/graphite material /carbitex/,  
physical, thermal, mechanical and chemical  
properties 18 p3125 A66-34618

Graphite content effect on antifriction  
properties of graphitized nickel-based  
copper and iron alloys 18 p3117 A66-34981

High energy nuclear interactions in  
graphite 18 p3140 A66-35159

Wavelength dependence of polarization by

small graphite flakes with anisotropic  
dielectric constant 20 p3649 A66-37324

Shock propagation and attenuation in  
porous graphite and aluminum foams, noting  
effects of particle shape and size on  
materials response to shock  
loading 20 p3588 A66-38407

Reactions between silica and graphite  
studied in vacuum from 1445 to 1765  
degrees C by continuously measuring  
amount of carbon monoxide  
formed 21 p3753 A66-38593

Stability and surface tension of colloidal  
graphite dispersions in absence and  
presence of  
nonelectrolytes 21 p3754 A66-39150

Aluminum nitride coatings on graphite  
deposited by introduction of plasma-  
generating gas into electric arc between  
tungsten cathode and aluminum filament  
anode 21 p3754 A66-39419

Melting point and microhardness of carbon-  
saturated TiC-VC solid solutions, noting  
temperature of eutectic of TiC-VC with  
graphite 22 p3934 A66-39866

Plasma and carbide coatings for protecting  
graphite surfaces at high temperatures  
obtained by sputtering or deposition and  
thermal treatment to induce  
diffusion 23 p4083 A66-41528

High temperature testing and evaluation of  
graphite helical-screw expanders and  
compressors for use with inert gas Brayton  
cycle 23 p4075 A66-41755

Megaton and decamegaton dynamic  
pressure production by blast-type  
compression of thick walled pipe with core  
subjected to internal implosion, for case of  
graphite core /Part II/ 23 p4091 A66-41860

Iridium coating for graphite oxidation  
protection at temperatures over 2000  
degrees C 23 p4083 A66-41891

Ceylon and artificial graphite behavior  
under very high pressure, examining  
problem of metallic phase of  
carbon 24 p4229 A66-42751

## GRATING

## SA DIFFRACTION GRATING

## SA INTERFERENCE GRATING

Techniques for rocket solar UV and for  
UV spectroscopy 13 p2081 A66-26013

Hydraulic loss decrease in complex  
pipeline owing to wire  
grating 23 p4024 A66-41798

## GRAVIMETER

## SA DENSITOMETER

Tests of airborne, gimbal and stabilized  
mounts of LaCoste-Romberg and Askania-  
Graf gravity meters conducted in  
1962 04 p0524 A66-14452

Gravimeter monitoring S dilational mode of  
Earth, consisting of fused quartz operating  
in high vacuum incorporated into  
electrostatic null-seeking  
servo 04 p0524 A66-14453

Gravitational irregularities in Santa Barbara  
channel, California 09 p1369 A66-19873

Combined effect of horizontal and vertical  
accelerations on gravimeter readings  
mounted on gyroplatform or in Cardan  
suspension 14 p2297 A66-28111

Gravimeter error in recording of Earth  
tides, examining leveling and calibration  
problems 14 p2298 A66-28400

Combined effect of horizontal and vertical  
accelerations on gravimeter readings  
mounted on gyroplatform or in Cardan  
suspension 24 p4212 A66-42699

## GRAVIMETRY

## SA THERMOGRAVIMETRY

Graphic calculation of gravimetric effect of  
three-dimensional masses of arbitrary  
form 07 p1028 A66-17423

Determining coordinates of astrogeodetic  
grid points by Molodenskii integral formulas  
and accuracy estimation by astrogravimetric  
interpolation of  
deviations 08 p1217 A66-19345

Digital cross multiplication used in cross  
coupling and off-leveling errors in gravity  
measurements at sea 09 p1369 A66-19874

Cross coupling effects in first order  
theories of ship motion used in  
measurement of gravity at  
sea 09 p1369 A66-19875

Soviet book on geodetic gravimetry  
including disturbing potential calculation  
methods based on Molodenskii integral

equation 14 p2288 A66-2828

Global harmonic and statistical analysis  
gravimetry 17 p2920 A66-33

Earth gravity vector calculation at group  
level and various elevations in  
space 17 p2921 A66-33

Bjerhammar gravimetric boundary value  
problem with gravity reduction defined by  
integral equation 19 p3345 A66-35

Determining coordinates of astrogeodetic  
grid points by Molodenskii integral formulas  
and accuracy estimation by astrogravimetric  
interpolation of  
deviations 19 p3348 A66-36

Depth estimation for buried anomalies  
mass from vertical gravity  
observation 23 p4063 A66-41

Glossary of gravimetric and celestial  
geodesy 23 p4063 A66-41

Discrimination capability of second and  
third derivatives of gravitational potential  
used in gravimetric  
investigation 24 p4202 A66-42

## GRAVITATION THEORY

Gravitation viewed as source of universal  
energy produced by condensation of  
from rarefied nebula to dense  
mass 01 p0135 A66-10

Uniqueness of gravitation theory developed  
by method of classical Lorentz covariance  
field theory 01 p0107 A66-11

Semigenerally covariant motion equations  
of particles moving in external gravitational  
field 03 p0392 A66-12

Evolution of system of gravitation  
interacting point particles noting quasi-  
equilibrium states and particle evaporation  
and radiation 03 p0427 A66-12

Relativistic theories of gravitation  
International Conference, London, July 1965  
Volume 1 05 p0756 A66-14

Gravitational waves and radiation, relativistic  
waves and null elements in  
space-time 05 p0757 A66-14

Relativistic theories of gravitation  
International Conference, London, July 1965  
Volume 2 05 p0757 A66-14

New theory of gravitation by Hoyle and  
Narlikar, noting transformation of equations  
to Einstein equations 05 p0757 A66-14

Equation of motion in relativistic  
gravitation theory 05 p0715 A66-14

Quantum theory of gravitation with respect  
to classical theories and Einsteinian  
theory 05 p0757 A66-14

Conservation laws in general relativity and  
definitions of gravitational momentum and  
energy 05 p0715 A66-14

Bianchi identity role in obtaining motion  
equations without infinite self-action terms  
in general relativity 05 p0715 A66-14

Lorentz-invariant theories of gravitation  
analyzed, using astronomical tests and  
comparing results predicted by theories  
with general relativity 05 p0716 A66-15

formulas 05 p0716 A66-15

Cosmic space expansion in accordance with  
theory of universal gravitational radiation  
pressure 06 p0953 A66-16

Extension of Ward relations to gravity,  
close analogy to electrodynamics, using  
Gupta formulation of Einstein  
theory 08 p1255 A66-19

General theory of relativity, application to  
isolated system relative to slow moving  
too-dense structure and empirical proofs  
theory 10 p1556 A66-22

Charged particle motion determined by  
gravitational-electromagnetic field properties  
with motion equations following from  
integrability condition of field  
equations 11 p1735 A66-22

Nonconservation of baryon and  
cosmological theory, discussing creation of  
matter in discrete manner around isolated  
pockets with strong gravitational  
fields 11 p1774 A66-23

Gravitation theory and new principle of  
equivalence of inertial and gravitational  
energies 12 p1913 A66-23

Energy-momentum density of gravitation  
field according to Ozsvath-Schueckel  
rigorous solution to Einstein field  
equations 12 p1915 A66-24

General relativistic dynamics for  
determining place of Mach principle in  
relativity theory, obtaining expression for  
energy-momentum density of gravitation

- field 12 p1916 A66-25019
- Einstein gravitational theory in terms of orthogonal reference points, describing energy and momentum distribution by generally covariant tensors 13 p2128 A66-25946
- Gravitational theory developed by generalizing Newtonian and special relativistic concepts 13 p2129 A66-26332

- Gravitational theory for dynamical basis of quasi-stationary spiral structure of stars 14 p2381 A66-27500
- Lorentz-covariant theory of gravitation constructed with linear field equations 15 p2542 A66-29332
- Simplified method for derivation of universal gravitation law from Kepler law of planetary orbits 16 p2747 A66-30870
- Theory of relativity, discussing Einstein theory of gravitation, evolution of stars, equations of motion, etc 16 p2748 A66-31267
- General theory of relativity, emphasizing works discussed at London and Tbilisi conferences on gravitation theory 17 p2960 A66-33504
- Gravitational theory based on solar observations, noting connection between gravitational eigenvalues, planetary orbit spacing and connection with cylindrical wave functions 18 p3104 A66-33757
- Empirical decision-making techniques, determining nature of quasi-stellar source or galaxy 18 p3234 A66-34616
- Mass-energy relationship in gravitation, correlating Newton and Einstein concepts via acceptance of positive and negative masses and energies 18 p3136 A66-34633
- Maximum temperature of any substance in equilibrium with thermal radiation, considering properties of hot matter at very high densities, including gravitational interaction of photons 19 p3463 A66-36069
- Covariant gravitational field equations in de Sitter space and quantum mechanical equations of motion associated with particles of given spin, employing gauge principle 21 p3769 A66-38645
- Rylov concept of relative gravitational field applied to calculation of energy of Synge plane gravitational waves with respect to separate reference points 21 p3772 A66-39294
- General relativity theory, examining Schwarzschild surface which allows matter and light to pass through in one direction only 21 p3774 A66-39532
- Einsteinian gravitation equations stated in terms of three-dimensional tensor analysis as applied in conformal space 23 p4091 A66-41834
- Singularities of cosmological solutions of gravitational equations for space filled with matter 24 p4274 A66-42521
- New gravitation theory, noting role of Einstein equations following conformal transformation 24 p4237 A66-42540
- Einstein gravitation theory relation to general and special relativity, space time, unified four-dimensional continuum metric and chronogeometric theories 24 p4238 A66-43015
- GRAVITATIONAL COLLAPSE**
- Kinematics of collapse and discussion of observable properties of baryons and collapsing stars 05 p0757 A66-14524
- Gravitational collapse of uniform nonrotating pressure-free spheroid 08 p1255 A66-18777
- Equation of state of matter at supernuclear density 08 p1258 A66-18783
- Retarded observer time as coordinate in relativistic spherical hydrodynamic equations prevents Schwarzschild surface formation 11 p1772 A66-22779
- Newtonian and relativistic analysis of orbits of electromagnetically neutral test particles in magnetic universe 12 p1914 A66-24567
- Relativistic astrophysics covering evolution of moderate to supermassive stars, radiation and gravitational field and stellar collapse 14 p2385 A66-27948
- Strong radio sources as accounted for by repulsive effect of relativistic origin 16 p2796 A66-30149
- Einstein field equations for perfect fluid, coupled to frozen-in magnetic field, in high-density limit of gravitational collapse 17 p2997 A66-31973
- Virial theorem study of magnetic field effect on gravitational instability of primeval gas cloud, noting possibility of collapse upon change in magnetic flux 17 p3005 A66-33002
- Elliptic Kruskal-Schwarzschild space, discussing identification of points which limit Kruskal space into Minkowski space 19 p3389 A66-35942
- Gravitational contraction of stars of one solar mass examined, using Henyey method for calculating stellar evolutionary tracks 19 p3467 A66-36791
- Stellar evolution for high temperature, predominantly neutrino processes, noting breakdown of homology relation between density and temperature 19 p3467 A66-36795
- Relativity theory application to space probes, discussing experimental verification, relevance to cosmological problems and utilization to particles with large energy and momentum 20 p3650 A66-37389
- Irreversible gravitational collapse as consequence of Postulate X and application to quasars 21 p3813 A66-39208
- Star collapse observation by detection of high energy neutrino fluxes produced by catastrophic star contraction 22 p3975 A66-40953
- Star formation and gravitational instability in nonrotating medium permeated by strong magnetic field 23 p4125 A66-41012
- Thermal instabilities role in star formation, discussing intercloud medium, magnetic pressure and gravitational collapse 23 p4125 A66-41062
- GRAVITATIONAL CONSTANT**
- Theory of aircraft measurement of gravity using gyroplatform, ideal gimbal suspension and three orthogonal string sensors, deriving formula for unperturbed gravity value, discussing perturbation measurement errors 03 p0366 A66-12991
- Kepler method in determining length of satellite radius vector independent of linear measurements from Earth, discussing accuracy in geodetic measurement 03 p0366 A66-13197
- Modification of hot big-bang theory to account for helium abundance in universe and cosmic radiation temperature, noting possible variation of Newtonian gravitational constant 13 p2189 A66-26599
- Theory of aircraft measurement of gravity using gyroplatform, ideal gimbal suspension and three orthogonal string sensors, deriving formula for unperturbed gravity value, discussing perturbation measurement errors 15 p2483 A66-28666
- Sundman variable for regularization of three-body problem motion 17 p3004 A66-32952
- GRAVITATIONAL EFFECT**
- SA LUNAR GRAVITATIONAL EFFECT
- SA SOLAR GRAVITATIONAL EFFECT
- SA WEIGHTLESSNESS
- Gravitational effects of photons or neutrinos radiated from point mass as accurately treated by Newtonian approximation 02 p0263 A66-11867
- Gravity effect on hemodynamic factors and sodium and water excretion in two dogs subjected to change from supine to erect position and water immersion 03 p0324 A66-12352
- Turbulent jet axis under crossflow of different density assuming static pressure, excess heat content and projection of mean jet velocity 04 p0509 A66-13856
- MHD equations for inhomogeneous rotation of medium about Z-axis in presence of gravitational force 04 p0516 A66-13857
- Non-Newtonian media, parallel flow, discussing effects of two- and three-dimensional perturbations on flow stability 04 p0510 A66-13872
- Deflection of light rays by gravitational lenses 05 p0757 A66-14526
- Gravitational effects not consistent with relativity theory, showing statistical correlation between solar activity and variations in Earth rotational velocity 05 p0757 A66-14533
- Gravitational influence on living organisms studied by klinostate principle 06 p0811 A66-16061
- Simulation and environment effect on astronaut performance in space to understand work-task effort 06 p0817 A66-16239
- Gravity effect on basipetal transport of auxin studied by growing plants both erect and on horizontal clinostats 06 p0812 A66-16564
- Scale model testing of lunar surface vehicles in simulated low gravity field [SAE PAPER 660148] 07 p1017 A66-17251
- Neurologic adaptations and audiogenic responses in mice exposed to chronic 2X gravity field, noting development of more efficient circulatory system, growth pattern alterations, etc 07 p0998 A66-17660
- Experiments with anesthetized dogs subjected to g accelerations, observing behavior of arterial oxygen saturation and pulmonary ventilation during short periods 08 p1175 A66-19083
- Experiments with rats under anesthesia subjected to acceleration, noting electroencephalograms 08 p1175 A66-19085
- Stability of motion of spherically symmetric mass of compressible gas with constant space density in absence of gravitational field 08 p1298 A66-19483
- Temperature distribution in fluid spherical layer enveloping gravitating sphere 08 p1320 A66-19485
- Finite strength spherical shock wave propagation due to explosion into inhomogeneous nongravitating and self-gravitating systems 08 p1211 A66-19810
- Superfluid critical velocity in He 2 isothermal gravitational flow in narrow channels 09 p1366 A66-20018
- Superconducting persistent magnets, cryogenic pumping and other low temperature techniques for measuring gravitational forces on charged particles 09 p1379 A66-20083
- Mechanical interpretation of problem of passage of light through curved light conductor 09 p1387 A66-20790
- Marginal convection in self-gravitating sphere of uniform incompressible fluid with uniform heat sources distribution 11 p1785 A66-22437
- Saturn ring stability examined, using model stabilized by gravitational dilution and random particle motions 11 p1769 A66-22530
- Dispersion equation for cylindrical plasma with finite electrical conductivity under influence of applied magnetic field and own gravitational field 12 p1920 A66-24191
- Quantum mechanics and gravitational effect on origin of cosmic particles, discussing Schrodinger wave equation, electric potential and alpha decay 12 p1944 A66-24465
- Force field detection and control of objects in space, using gravitational, electrostatic or magnetostatic fields 12 p1820 A66-24677
- Clear air turbulence structure, noting measurement results obtained by Canberra aircraft and TOPCAT project, energy yield of gravitational shearing waves, etc 13 p2122 A66-26127
- Effect of faulty compensation for accelerating force of Earth gravity on accuracy in determination by inertial

navigation system of coordinate of object in flight 14 p2328 A66-27361

Gravitational perturbations of circular satellite orbit [AIAA PAPER 65-550] 14 p2381 A66-27418

Non-Newtonian media, parallel flow, discussing effects of two- and three-dimensional perturbations on flow stability 14 p2275 A66-27572

Cosmological theory testing with gravitational lens effect 14 p2383 A66-27710

Possible origin of lunar maria, suggesting they may be scars of mechanical damage wrought on lunar hemisphere by disruptive tides of Earth 14 p2384 A66-27900

Cavity depth for waterdrop impacts against water, discussing apparatus, equation for cavity depth, effect of gravitational potential energy, liquid surface behavior, etc 15 p2477 A66-28716

Semianalytical solution of motion of satellite in lunar orbit, considering perturbations due to lunar and Earth gravity and solar attraction 15 p2604 A66-30016

Gravity effect on nucleate boiling heat transfer 16 p2825 A66-30486

Gravitational perturbation effect on MHD stability of helical magnetic field in spiral arm 16 p2800 A66-30652

Light propagation through Schwarzschild singular sphere, solving problem of visual image of emitting surface of gravitating sphere as seen by observer 16 p2748 A66-31171

Gravitationally induced uniform rotation of body having stationary point and supporting rotating masses 16 p2748 A66-31521

Gravitational environment, effect of change on frogs measured using gravitoceptors in vestibular apparatus 17 p2865 A66-32183

Exact analytic solution for propagation of spherical explosion waves in self-gravitating gas sphere 17 p3004 A66-32839

Gravitational stability of laminar liquid layer flowing down inclined plane and heated from below 17 p2914 A66-33172

Vertical-track free-fall rocket sled system, discussing design principles, operation and performance characteristics 18 p3093 A66-33796

Gravitational shielding and absorption, examining tidal effects induced in solid sphere by another sphere, analogy to electromagnetic fields, etc 18 p3135 A66-34450

Light deflection by solar activity 19 p3455 A66-35249

Weightlessness effects on man with data from Voskhod flights 19 p3284 A66-35568

Gravitational force perception thresholds of plants in weightless conditions measured in terms of growth and development 19 p3284 A66-35569

Dynamic effects on satellite motion of mechanical deformations in stabilizing system, deriving equations for rotational motion about center of inertia 19 p3472 A66-36831

Ordinary nonlinear differential equation arising in theory of both axisymmetric and two-dimensional viscous jets falling under gravity 20 p3591 A66-37593

Gravity turn trajectories through atmosphere including drag effects 20 p3657 A66-38181

Mechanical interpretation of problem of passage of light through curved light conductor 22 p3931 A66-39849

Structural integrity studies of gravitational and inertial loading effects on British solid propellant grains 23 p4115 A66-41112

Finite resistivity instabilities of sheet pinch examined, using numerical analysis in terms of normal modes 23 p4106 A66-41709

Satellite gravitational stabilization system in orbital coordinate system, considering atmospheric resistance and damping natural oscillations 23 p4134 A66-41979

Hydrogen abundance in universe using gravitational effect on physical constants 24 p4279 A66-43019

Interplanetary trajectories, considering gravity effect, free flight trajectory and forces acting on space vehicle 24 p4280 A66-43132

## GRAVITATIONAL FIELD

Vertical continuation of two-dimensional geomagnetic and gravitational fields from

given contour line on Earth surface by two methods 01 p0060 A66-10161

Probability models for Earth crustal structure applying potential field separation technique, noting role of gravitational field and Wiener filtration theory 01 p0061 A66-10479

Pulse energy tensor and internal macroscopic interactions in gravitational field and in material media 01 p0106 A66-10656

Digital computer calculation of characteristics of Earth gravitational field 01 p0062 A66-10693

Einstein gravitational equation applied to galaxies and quasars, using spherical model with spherically symmetric distribution of matter 01 p0138 A66-11033

Laws of motion for monopolar particle in given gravitational field 01 p0107 A66-11076

Second derivatives of gravity calculated from interdependencies between coefficients of formulas, using least squares method, weight coefficients being variable 01 p0063 A66-11098

Satellite geodesy noting gravitational and geometric use, current national program, orbit perturbations, etc 02 p0225 A66-12236

Charge separation into film about symmetrically gravitating body at high temperatures and small Debye radius 03 p0396 A66-12290

Local gravity anomalies for circular cylinder with vertical axis, discussing solution to direct and inverse problems of quantitative interpretation of fields 04 p0516 A66-13960

Gravitational field interactions with Dirac fields and electromagnetic fields studied in framework of special relativity to find possible C-, P- and T-violating effects 05 p0717 A66-15349

Transfer of point over ellipse between two coplanar circular orbits in Newtonian gravitational field determined by method of variations 05 p0765 A66-15423

Gravitational field and crust of Earth related to Earth shape 05 p0675 A66-15748

Gravitational source dynamics, discussing multipole structure, mass, linear momentum, dipole moment and spin in axially symmetric field 06 p0908 A66-16131

Motion of charged finite mass in gravitational field 06 p0908 A66-16162

Gravitational compass in analysis of gravitational field in general relativity 06 p0909 A66-16329

Nonradiative and stationary electromagnetic and gravitational fields 06 p0909 A66-16330

Conversion of gravity reduction problem into internal boundary value problem which is solved by finite difference methods 06 p0876 A66-16416

Friction corrections introduced in results obtained by differential pendulum method in measuring acceleration of gravity at sea, noting motion equations 06 p0879 A66-16418

Behavior of fluids under weightlessness and in weak gravitational fields, formulating small linear oscillations of ideal fluid under surface tension 06 p0873 A66-16708

Shape and gravitational field of Earth calculated by using N homogeneous incompressible fluid shells to represent distribution of terrestrial mass 07 p1028 A66-17422

Asymptotic behavior of gravitational field studied by Peeling theorem for case where curvature tensor of space-time has direction that can be demonstrated as geodesic trajectory 07 p1080 A66-17451

Motion equation for system of n bodies assuming half retarded and half advanced mass-distribution 07 p1137 A66-18053

Motion equations in external gravitational field for relativistic two-point model of free elementary particle neglecting particles own field 08 p1282 A66-18606

Einstein equations for vortical and nonvortical gravitational fields applied with relativistic approximation to Newtonian gravitational field 08 p1256 A66-19272

Motion stability of gyroscope in universal suspension with spring restraints and damper in gravitational field extended to include Newtonian central force

field 08 p1226 A66-19561

Conversion factor determination for gravity changes during Alaska earthquake, using LaCoste-Romberg geodetic meter 09 p1369 A66-19821

Gravitational irregularities in Santa Barbara channel, California 09 p1369 A66-19821

Geodesy and gravity 09 p1371 A66-20201

Coordinate systems describing portions of Friedman world and adjacent empty region do not satisfy Liechnerovitch continuity conditions 09 p1403 A66-20581

Non-Einsteinian gravitation, noting the expression for invariant density of free Lagrange gravitational field holds only for slowly varying weak fields 09 p1403 A66-20711

Consistency of subtraction technique for calculating gravitational mass in nonquasirectangular coordinates from surface integrals provided by von Freud superpotentials 10 p1555 A66-21111

Gravity gradient sensor application manned orbital spacecraft, noting instrumentation for various functions 10 p1535 A66-21511

Effect of incompressibility of substance on gravitational instability, deriving dispersive equation and comparing results with problem of incompressible fluids 11 p1735 A66-22411

Human and animal study of physiologic and neurophysiological responses at different intensity levels and short periods of gravitational field 11 p1641 A66-22411

Cosmological effects in anisotropic inhomogeneous cosmological models including Riemannian geometry, light propagation, gravitational field, etc 11 p1772 A66-22711

Behavior of system of infinite compressible fluids under gravity and magnetic field action, with MGD equations showing instabilities at plasma boundaries 11 p1748 A66-23411

Probability models for Earth crustal structure, applying potential field separation technique, noting role of gravitational field and Wiener filtration theory 12 p1868 A66-23811

Pulse energy tensor and internal macroscopic interactions in gravitational field and in material media 12 p1914 A66-24011

Model sequence calculations of early solar evolution extended for case of varying cosmology 12 p1949 A66-24111

Necessary condition for motion stability of particle moving in gravitational field of axisymmetric planet 12 p1949 A66-24211

Mossbauer effect, frequency measurement and red shift in relativistic gravitational field 12 p1914 A66-24411

Freely falling point mass problem solution for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 12 p1915 A66-24811

Gravitational field effect on electromagnetic field, using rotating hollow sphere in electric and magnetic field with electric charge at center 12 p1916 A66-24911

Nonrotating star with spherical symmetry emitting electromagnetic radiation analyzed using gravitational field analogy 13 p2072 A66-25411

Periodic solutions for sputnik motion in gravitational field of two other bodies of finite mass 13 p2186 A66-25811

Coordinate transformation of Schwarzschild metric for gravitational field of oblate Earth and equatorial satellite orbits into symmetric metric 13 p2187 A66-26111

First order /Jeans/ stability analysis of infinite uniform medium pervaded by magnetic field 13 p2187 A66-26111

Evolution of matter and formation of gravitational field of metagalaxy in relation to emission and aging of gravitations interaction with nucleons 14 p2332 A66-27211

Gravitational field as form of matter noting Mach inertia principle 14 p2333 A66-27211

Gravitational field evaluated as physical field and as strictly geometrical field 14 p2333 A66-27211

Relation between gravitation and cosmological infinity 14 p2333 A66-27211

Non-Einsteinian gravitation, noting the

expression for invariant density of free  
Lagrange gravitational field holds only for  
slowly varying weak  
Fields 14 p2334 A66-27304  
Soviet book on geodetic gravimetry  
including disturbing potential calculation  
methods based on Molodenskii integral  
equation 14 p2288 A66-28209  
Molodenskii first approximation equations  
used in determination of characteristics of  
terrestrial gravitational field, noting  
techniques to average  
corrections 14 p2288 A66-28213  
Digital computer calculation of  
characteristics of Earth gravitational  
field 15 p2483 A66-28554  
Psychological and physiological reaction to  
Coriolis effect under artificial gravitational  
field simulated in rotating space  
station 15 p2443 A66-28682  
Stokes problem solution for intensity of  
regularized gravity field around Earth and  
at surface in form of rapidly converging  
series 15 p2527 A66-28965  
Covariant treatment of solutions of  
Einstein field equations representing pure  
gravitational radiation propagating in fluid  
and electromagnetic  
media 15 p2542 A66-29621  
Lorentz invariant space-time gravitational  
field theory, Maxwellian gravitokinetic field  
of potential and kinetic components and  
precession of orbit of Mercury analyzed by  
Einstein restricted theory of  
relativity 16 p2802 A66-31011  
Geophysical monograph on extension of  
gravity anomalies to unsurveyed  
areas 17 p2920 A66-33191  
Earth gravity vector calculation at ground  
level and various elevations in  
space 17 p2921 A66-33193  
Pizzetti theory formulas for space normal  
gravity field of Earth extended to space  
surrounding Earth 17 p2921 A66-33194  
External gravity field and geodetic  
boundary value problem 17 p2921 A66-33195  
Gravity anomalies of unsurveyed areas of  
Earth surface and influence on satellite  
orbit perturbations 17 p2921 A66-33196  
Maximum payload delivery with restricted-  
power propulsion system, noting trajectory  
optimization course-correction-time  
distribution, etc 18 p3242 A66-33849  
Potential energy in gravitational field,  
considering relativistic concept of negative  
mass, two-body motion and gravity effects  
on atomic nucleus 18 p3136 A66-34722  
Torque on rigid body in circular orbit in  
gravitational central field derived, using  
body-centered coordinate system aligned  
with gravity gradient  
vector 18 p3237 A66-35030  
Bjerhammar gravimetric boundary value  
problem with gravity reduction defined by  
integral equation 19 p3345 A66-35393  
Guidance equations including first-order  
effects of Earth oblate gravitational field,  
solving motion equations and evaluating  
downrange and crossrange miss distance and  
time-of-flight errors 19 p3397 A66-35599  
Controller synthesis for three-axis reaction-  
wheel control of space vehicle in negligible  
gravitational field, using optimization theory  
and Pontryagin maximum  
principle 19 p3468 A66-35883  
Control-engineering and flight-mechanics  
problem of rendezvous guidance, considering  
target body without guidance and second  
body in gravitational field without  
atmosphere 20 p3595 A66-36874  
Formulas for extraterrestrial potential,  
anomalous gravity force gradient on Earth  
topographic surface, deflections of vertical,  
etc 20 p3549 A66-37043  
Laminar, turbulent and transition heat-  
transfer domain analysis of cryogenic fluids  
in variable reduced-gravity environment,  
with applications to space cryogen  
storage 20 p3677 A66-37103  
Congruent relativistic gravitational fields,  
red shift and geodetic coordinate  
transformations 20 p3603 A66-38011  
Coordinate systems describing portions of  
Friedman world and adjacent empty regions  
do not satisfy Liechnerovitch continuity  
conditions 20 p3603 A66-38129  
Data on unknown portions of Earth  
gravitational field from observations of two

consecutive satellite orbits and mean orbital  
elements 22 p3976 A66-39693  
Optimum trajectories between material  
points moving along same orbit in  
gravitational field of spherically symmetric  
central body, obtaining numerical solutions  
for circular initial orbit 22 p3980 A66-40462  
Freely falling point mass problem solutions  
for Einsteinian free space equations that  
also satisfy Newtonian equations in suitable  
coordinate system 23 p4090 A66-41096  
Earth shape, moment of inertia and  
gravitational field determined from two  
nonlinear integral equations for potential of  
rotating incompressible  
fluid 23 p4063 A66-41202  
Non-Markovian evolution equation for  
velocities distribution in homogeneous  
gravitational system 23 p4100 A66-41249  
Augmented special relativity theory to  
account for Einstein effects, with extension  
to general scalar field theory and notes on  
corpuscular light and galactic-centered  
reference frame 23 p4090 A66-41273  
Resistive ballooning mode relation to  
universal instability in gravitational field  
and role in toroidal plasma with rotational  
transform 23 p4102 A66-41483  
Analog computation of minimum fuel  
trajectories with soft landings in uniform  
gravitational field, using Pontryagin  
maximum principle to reduce two-point BVP  
with optimal controllers 23 p4133 A66-41618  
Wave motions of liquid extended to case  
where derivative functions describing free  
surface are present in boundary conditions  
of problem 23 p4057 A66-41833  
Tesseral harmonics of Earth gravitational  
field camera tracking of five  
satellites 23 p4066 A66-41847  
Rotation of rigid bodies in Newtonian  
central gravitational field, with applications  
to navigation and satellite  
motion 23 p4096 A66-41941  
Shape and motion of cavities in steady  
planar supercavitating flows, noting  
transverse gravity field effect on Helmholtz  
flow past forebody experiencing drag  
alone 23 p4062 A66-42059  
Suggestion that quasar red shifts result  
from inflow of matter at relativistic velocity  
in gravitational field of highly condensed  
white dwarf 24 p4274 A66-42419

# GRAVITATIONAL POTENTIAL

Solving potentialities of third vertical  
derivative method for gravity  
potential 01 p0061 A66-10690  
Terrestrial gravitational potential  
determined by observation of satellite  
motion, assuming trajectory is determined  
solely by force field 03 p0428 A66-13027  
Gravitational potential gradient for body  
consisting of positive or negative masses  
with known density extremum value and  
known or unknown  
volumes 04 p0514 A66-13449  
Negative correlation coefficient between  
Izsak satellite geoid and Lee and MacDonald  
heat flow distribution, suggesting correlation  
between geoidal undulations and heat flow  
highs and lows 04 p0518 A66-14454  
Even harmonics in Earth gravitational  
potential function estimated from motions  
of orbital planes of seven  
satellites 05 p0671 A66-14956  
Reducing values of potential magnetic or  
gravitational field observed on Earth surface  
with weak profile to values on single  
horizontal plane in lower  
half-space 06 p0876 A66-16417  
Odd zonal harmonics in Earth gravitational  
potential determined by analyzing changes  
in eccentricities of satellites, with orbital  
inclinations spaced  
uniformly 09 p1374 A66-20883  
Celestial body size, composition and impact  
induced changes in Earth rotation from  
mantle data 10 p1531 A66-21286  
Second degree sectorial harmonic of Earth  
gravitational potential based on 338-day  
variation in revolution period of  
Syncom 11 p1697 A66-22436  
Even zonal harmonics in terrestrial  
gravitational potential, noting agreement  
between coefficients obtained from satellite  
measurements 11 p1702 A66-23493  
Gravitational and satellite data  
determination of spherical-function series

coefficients for expansion of Earth  
gravitational potential 12 p1867 A66-23516  
Hamiltonian mechanics applied to planetary  
and artificial satellite motion  
problems 12 p1950 A66-24402  
Tracking record of synchronous satellites  
over two-year period revealing effects of  
second and third order longitude  
components in Earth gravity potential  
field 12 p1875 A66-24893  
Gravitational potential effects on physical  
properties of mass far from other mass or  
energy, noting Planck equation, Planck  
constant, etc 14 p2335 A66-27940  
Solving potentialities of third vertical  
derivative method for gravity  
potential 14 p2286 A66-28034  
Effect of slope and curvature of Earth  
surface on disturbing potential, using  
Molodenskii integral equation, obtaining  
deflection of vertical, disturbing potential  
and Stokes constant 14 p2288 A66-28210  
Numerical integration principle in  
calculation of disturbing potential verified,  
using conical Earth model 14 p2288 A66-28211  
Corrections to individual terms of Stokes  
approximation for disturbing potential given  
in series expansion of spherical functions,  
using Earth model 14 p2288 A66-28212  
Accuracy of measuring method of vertical  
gradient of gravity force from gravity  
anomalies, using Numerov formula and Earth  
models 14 p2288 A66-28214  
Motion of charged nongravitating test  
particle in Einstein gravitational  
theory 15 p2542 A66-29655  
Atomic maser clocks rotation with Earth,  
deriving formula for relative drift at widely  
separated localities arising from local  
gravitational potentials 16 p2745 A66-30187  
Mutual dependence of harmonic  
coefficients of gravitational potential  
derived from satellite observations as source  
of computed geoid height distortions at  
Earth surface 16 p2700 A66-31804  
Perturbation of near circular orbits by  
Earth gravitational  
potential 17 p3005 A66-32997  
Zonal harmonics in external potential of  
Earth determined from secular motion of  
satellite orbits 17 p2921 A66-33227  
Tesseral perturbations of repeating ground  
track synchronous satellite orbits in  
gravitational potential 18 p3233 A66-34595  
Red shift observed in quasi-stellar radio  
sources due to high gravitational  
potential 19 p3459 A66-35587  
Gravity on planets explored by reference  
system expressing gradient magnitudes, data  
on equipotential and application to system  
with continuous rotation in  
space 19 p3346 A66-35627  
Formulas for extraterrestrial potential,  
anomalous gravity force gradient on Earth  
topographic surface, deflections of vertical,  
etc 20 p3549 A66-37043  
Gravitational and satellite data  
determination of spherical-function series  
coefficients for expansion of Earth  
gravitational potential 21 p3732 A66-38660  
Discrimination capability of second and  
third derivatives of gravitational potential  
used in gravimetric  
investigation 24 p4202 A66-42762  
Earth gravitational potential derived from  
satellite motion 24 p4202 A66-42833

# GRAVITATIONAL RADIATION

Motion of finite mass particles in external  
gravitational field determined by comparison  
of relativity and Minkowsky theories,  
considering gravitational  
radiation 04 p0545 A66-14172  
Gravitational interaction and gravitational  
waves discussing Schwarzschild metric, weak  
interaction, spinor field and free neutrino  
wave 04 p0546 A66-14315  
Gravitational waves and radiation, relating  
waves and null elements in  
space-time 05 p0757 A66-14525  
Gravitational emission from double star  
systems 06 p0955 A66-16779  
General relativity for study of emission of  
gravitational waves from isolated  
axisymmetric sources vibrating smoothly for  
finite period 08 p1254 A66-18621  
Gravitational radiation and possible  
experimental detection 14 p2335 A66-27947  
Radiation coordinates for gravitational

radiation in general 16 p2746 A66-30528  
 relativity 19 p3456 A66-35376  
 Gravitational emission from double star systems 19 p3456 A66-35376  
 Perturbations of spatially isotropic expanding universe in terms of small curvature variations 21 p3817 A66-39559

## GRAVITY

SA ARTIFICIAL GRAVITY  
 SA HIGH GRAVITY ENVIRONMENT  
 SA LUNAR GRAVITATION  
 SA PLANETARY GRAVITATION  
 SA SUBGRAVITY  
 Theory of aircraft measurement of gravity using gyroplatform, ideal gimbal suspension and three orthogonal string sensors, deriving formula for unperturbed gravity value, discussing perturbation measurement errors 03 p0366 A66-12991  
 Gravity anomalies and convection currents, examining sphere and cylinder sinking beneath surface of viscous fluid 06 p0877 A66-16785  
 Viscous fluid model estimates of crustal thickness and free-air anomaly compared with measured free-air anomalies and seismic depths of Puerto Rico trench and mid-Atlantic rise 06 p0877 A66-16786  
 Psychophysical orientation mechanisms of man under weightlessness simulation, gravity conditions encountered on Earth, in orbital flight and during free floating in space 06 p0814 A66-17177  
 Temperature distribution in fluid spherical layer enveloping gravitating sphere 08 p1320 A66-19485  
 Planetary perturbation effect on solar surface 13 p2180 A66-25427  
 Gravitational theory developed by generalizing Newtonian and special relativistic concepts 13 p2129 A66-26332  
 Quantum gravitation theory, discussing difficulties of covariance of general relativity and nonlinearity of Einstein equation 14 p2332 A66-27215  
 Theory of aircraft measurement of gravity using gyroplatform, ideal gimbal suspension and three orthogonal string sensors, deriving formula for unperturbed gravity value, discussing perturbation measurement errors 15 p2483 A66-28666  
 Human otolith and cupula system behavior under anomalous gravity conditions 15 p2434 A66-29446  
 Nonisothermal axisymmetrical turbulent jet curved by gravity and inertial forces 19 p3342 A66-36465

## GRAVITY CENTER

Simulation method for confirming computations of space vehicle motions continuing after firing around gravity center of vehicle 02 p0215 A66-11673  
 Classification of all nonplanar motions in problem of two fixed gravitation centers of arbitrary masses corresponding to real potential 02 p0292 A66-12234  
 Properties of linearized system of equations of perturbed motion and application to motion of center of mass of space vehicle 06 p0957 A66-17169  
 Initial conditions determination in aircraft takeoff from mobile platform required for solution of differential equations of motions of gravity center 11 p1734 A66-23345  
 Parameter perturbations of magnet and accelerating systems of electron synchrotron determined from position of center of gravity of beam 13 p2147 A66-25747  
 Book on artificial satellite motion relative to center of mass and effects on measurements, observation and system performance 14 p2379 A66-27200  
 Compensation for error resulting from inclination of frame of gyrocompass with elastic recovery moment, based on shifting of gravity center along major axis 14 p2294 A66-27363  
 Orbit design problems and spacecraft motion about center of mass 15 p2596 A66-29159  
 Stability of vehicle passing from water to air as function of neutral point, maneuver point and center of gravity 23 p4015 A66-40987

GRAVITY GRADIENT SATELLITE  
 SA DODGE SATELLITE  
 Attitude stabilization of radio telescope satellite by passive gravity gradient

control 01 p0142 A66-10685  
 Gravity gradient stabilization systems for orientation of spacecraft and for damping of associated librations 01 p0143 A66-10798  
 Nonlinear resonance effect on attitude librations of undamped rigid gravity gradient stabilized satellite in circular Earth orbit 01 p0143 A66-10811  
 Material elasticity effects on planar librational motion of rigid satellite under action of gravity 01 p0144 A66-10812  
 Expected frequency with which gravitationally-oriented Earth-pointing satellite will undergo angular deflection due to micrometeorite impact 03 p0430 A66-12737  
 Communications satellite technology problems discussing synchronization of orbit, attitude stabilization, lifetime and power supply 04 p0475 A66-13499  
 Minimization of solar radiation pressure effects for gravity-gradient stabilized satellites, primarily attitude errors of pressure torques [ASME PAPER 65-WA/AUT-2] 05 p0770 A66-15703  
 Gravity gradient sensor application to manned orbital spacecraft, noting instrumentation for various functions 10 p1535 A66-21533  
 Requirements for gravity gradient stabilization of medium and synchronous altitude communication satellite systems using zero gain antennas, noting stabilization accuracy, stationkeeping effects, etc [AIAA PAPER 66-303] 12 p1955 A66-24770  
 Gravitational stabilization systems achieving passive satellite orientation, using gravitational field 15 p2606 A66-29158  
 Dynamical attitude equations for rotational motion of set of  $n$  rigid bodies interconnected by dissipative elastic joints and subjected to arbitrary forces and torques 17 p3001 A66-32345  
 Earth gravity vector calculation at ground level and various elevations in space 17 p2921 A66-33193  
 Gravity gradient torques and stabilization conditions in calculation method for satellites 17 p3017 A66-33240  
 Damping technique effect on performance of gravity-gradient satellite stabilization, noting means of creating restoring torques 18 p3243 A66-33861  
 Gravity gradient stabilization of near-Earth satellite with extensible boom and libration damping with combined lossy spring and magnetic hysteresis rods 18 p3244 A66-33862  
 Passive stabilization of space vehicles with asymmetric mass distribution, using coupled system with optimum damping 20 p3659 A66-36869  
 Dynamical formalism for arbitrary number of interconnected rigid bodies analyzed with reference to passive attitude stabilization of satellites 20 p3659 A66-36886  
 Gravity torque effects on spinning satellite 21 p3818 A66-38714  
 Gravity gradient satellite stabilization and performance analyzed, using computer simulation of motion equations, including eddy current dampers, solar effect, orbital eccentricity, etc 21 p3819 A66-38857  
 Stabilization system of gravity gradient test satellite and effect on damping time and steady state accuracy, noting attitude data and solar effect 21 p3819 A66-38858  
 Gravity gradient stabilization system and sensor subsystem for attitude determination and flight test data on gravity gradient components of applications technology satellite /ATS/ 21 p3820 A66-38859  
 DODGE satellite will be capable of two- and three-axis gravity-gradient stabilization at near synchronous altitude, using moment-of-inertia distributions and libration damping 21 p3820 A66-38860  
 Attitude errors of inertially coupled gravity gradient satellite with solar radiation pressure as dominant disturbance, noting slot problems in stabilized package accommodating damper 21 p3820 A66-38861  
 Control of magnetic hysteresis mechanism, increasing damping torque for use in gravity-oriented satellite stabilization 21 p3820 A66-38862

Radio astronomy satellite with extendible antennas achieves gravity gradient stabilization while receiving electromagnetic radiation, analyzing dynamic behavior and effect of passive damper 21 p3820 A66-38860  
 Inertia product terms effect on satellite gravitational torques 24 p4283 A66-42789

GRAVITY WAVE  
 Acoustic, gravitational and gyroscopic oscillation spectra of baroclinic atmosphere over rotating spherical Earth with emphasis on energy composition 01 p0062 A66-10855  
 MHD absorption of internal gravitational waves in ionospheric F layer in terms of traveling disturbances 02 p0283 A66-12111  
 Reflection and ducting of atmospheric acoustic-gravity waves whose temperature and horizontal wind velocity vary arbitrarily with height 06 p0876 A66-16279  
 Long-period acoustic-gravity waves launched into F region by Alaska earthquake of March 28, 1964 08 p1219 A66-19418  
 Mesoscale disturbance observed in vicinity of cold vortex center, emphasizing gravity waves 09 p1400 A66-20855  
 Clear air turbulence, considering energy source by transfer from large to small flow in gravity wave spectra, noting shear roll and motion equations 10 p1552 A66-21282  
 Internal gravity wave propagation in thermally stratified atmosphere 11 p1697 A66-22569  
 Internal gravity waves in stratified liquid for two-dimensional case, noting relation between oscillation frequency and wavelength 13 p2062 A66-25177  
 Interaction mechanism between internal gravity waves and radiative photochemical processes, noting solar radiation absorption, heat of atomic oxygen recombination, etc 13 p2073 A66-26128  
 Justification for multiple isothermal layer approximation to real atmospheric acoustic gravity wave propagation 14 p2234 A66-26851  
 Dissimilar and analogous characteristics of electromagnetic and gravitational waves 14 p2333 A66-27222  
 MHD absorption of internal gravitational waves in ionospheric F layer in terms of traveling disturbances 14 p2286 A66-28077  
 Response of atmosphere to impulsive point disturbances 14 p2386 A66-28122  
 Cellular circulation in ionospheric region 14 p2289 A66-28833  
 Head-on collision between two pressure jumps in two-layer atmospheric Einstein spaces with gravitational wave 15 p2537 A66-28679  
 Local energy of weak gravitational wave 15 p2537 A66-28679  
 Wind shear, gravity waves and Richardson number in relation to clear air turbulence /CAT/ 15 p2425 A66-28911  
 Electron concentration inhomogeneities during traveling gravity wave propagation through F layer 15 p2485 A66-29087  
 Long finite amplitude wave motions and interactions in inviscid fluid flows 15 p2478 A66-29241  
 Atmospheric motions from sodium cloud firings in 80 to 200 km height region, noting internal gravity waves, atmospheric tide and drift 15 p2489 A66-29669  
 Quasi-geostrophic wave motions of inertial gravity wave type and Rossby wave type in equatorial area 19 p3348 A66-36055  
 Gravitational waves in presence of electromagnetic field, deriving Einstein-Maxwell equations 20 p3550 A66-37300  
 Internal atmospheric gravity waves in isothermal medium, solving hydrodynamic equations, determining wave propagation in realistic atmosphere for range of wave parameters, wind amplitude, reflectance, etc 20 p3554 A66-38200  
 Vertical wind gradient variation and energy variation at height ranging from 80 to 14 km and relation to gravity waves and upper atmosphere turbulence 23 p4066 A66-4184  
 Traveling disturbance in ionosphere due to nuclear detonation detected as acoustic gravity wave modes, noting range-time diagrams 24 p4200 A66-42599

GRAY GAS  
 SA NONGRAY ATMOSPHERE  
 Radiative heat transfer in flat layer of

- absorbing, reradiating and nonscattering  
ray medium with optical properties  
dependent of  
temperature 04 p0598 A66-14425
- Unattainability of detailed balancing in  
thermodynamic equilibrium of gray  
atmosphere 11 p1772 A66-22776
- Radiative heat-flux potential for nongray  
as derived, noting origins of vector  
differential equation for gray  
gas 12 p1977 A66-23596
- Error in plane-layer approximation of  
boundary layer emission associated with  
gray gas flow past plane  
19 p3341 A66-35752
- SEASE
- Grease lubricants for aerospace application,  
determining physical properties and testing  
them at 400 degrees F and under high  
vacuum  
[ASME PAPER 66AM 3C2] 16 p2711 A66-30409
- Wear and grease lubrication effects in  
mated aircraft spline specimens subjected  
to oscillatory motion 16 p2713 A66-30572
- REAT BRITAIN
- Royal Aircraft Establishment facilities in  
England for aircraft structure testing under  
supersonic conditions, simulating aircraft  
takeoff, flight and  
landing 04 p0508 A66-14021
- United Kingdom space projects, detailing  
Skylark, Blue Streak, Black Knight and  
Black Arrow rockets 09 p1464 A66-20684
- Space research activities in United  
Kingdom during 1964 and early  
1965 09 p1459 A66-20725
- British Air Registration Board approach to  
safety of advanced complex aircraft and  
assessment of aircraft  
reliability 13 p2088 A66-26690
- British space research for 1965-66 including  
rocket development, satellite tracking, solar  
radiation, ionospheric  
sounding, etc 15 p2599 A66-29898
- Sonic bang experience in United Kingdom  
from supersonic flights and explosive  
charges, noting intensity, waveform, damage,  
etc 17 p2868 A66-33029
- Great Britain, future in space, discussing  
propulsion, nuclear power, satellite orbit,  
guidance, stabilization and attitude  
control 18 p3268 A66-33945
- Chondrite meteorite that fell in Barwell,  
England, December 24, 1965, may have  
weighed 200 pounds before fragmentation,  
breakup occurred at extremely low  
altitude 18 p3228 A66-34053
- British influence on world aviation, past,  
present and future 23 p4151 A66-41258
- Aeronautical research in U.K. by  
government establishments, industry and  
universities 23 p4017 A66-42072
- REEN FUNCTION
- RF magnetic field effect, applied parallel  
to external DC field, on Heisenberg  
ferromagnet with dipolar coupling, using  
Green function 01 p0122 A66-10579
- Nonmagnetic impurity effect on critical  
temperature of superconductor with two  
energy bands overlapping near Fermi energy  
level 01 p0123 A66-10719
- Derivation of asymptotic form of Green  
function, using hydrodynamic approximation  
method 04 p0510 A66-13875
- Green functions for coupled problem of  
thermoelasticity obtained from solutions of  
thermal stresses theory 04 p0591 A66-14206
- Analogies of statistical electromagnetic  
wave theory to quantum field theory, noting  
probability density function of waves and  
Green function 05 p0632 A66-14843
- Stress distribution in semiinfinite elastic  
media with different properties bonded  
along plane and containing concentric ring-  
shaped cavities, using Green function  
[ASME PAPER 65-WA/APM-2] 05 p0776 A66-15426
- Fundamental solutions of static and  
dynamic linear inextensional theories of thin  
elastic plates  
[ASME PAPER 65-WA/APM-23] 05 p0778 A66-15445
- Exact solution for Green function of open  
spherical shell subjected to harmonically  
oscillating concentrated load and any  
consistent boundary conditions  
[ASME PAPER 65-WA/APM-24] 05 p0778 A66-15446
- Effective excitation of radial cylindrical  
surface waves using Green function for  
excitation of impedance cylinder resting on  
impedance plane 06 p0823 A66-15882
- Surface wave diffraction by wedge as  
determined by Chu and Kouyoumjian  
compared with results using simpler Green  
function 06 p0827 A66-16043
- Scattering of TM surface wave by metallic  
strip above dielectric-clad ground plane,  
developing expression for Green function  
and formula for reflection  
coefficient 06 p0845 A66-16091
- Dyadic Green function for anisotropic and  
compressible media based on reformulation  
of governing equations for electromagnetic  
phenomena in compressible anisotropic  
plasma 06 p0832 A66-16455
- Displacements and temperatures  
accompanying deformation in unbounded  
thermoelastic semispace with concentrated  
force and heat source 06 p0966 A66-16505
- Behavior of Green function for Helmholtz  
equation external to bounded convex region,  
obtaining integral  
representation 06 p0903 A66-16705
- Indirect method of estimating Green  
kernels, eigenvalues and eigenfunctions of  
operators related to elliptic  
problems 07 p1059 A66-18031
- Plasmon dispersion relation and damping  
constant derived from Green function  
formulation of random approximation for  
inverse dielectric function of electron  
gas 07 p1090 A66-18211
- Green function/Gorkov variational  
procedure calculation of transition  
temperatures of superposed superconducting  
films dominated by inhomogeneous electron-  
electron interactions 07 p1108 A66-18436
- Series solution for deflection of  
rectangular plate subjected to concentrated  
load at arbitrary location, using Green  
function 08 p1310 A66-19161
- Interband Faraday effect in semiconductors  
in strong crossed electric and magnetic  
fields 08 p1277 A66-19619
- Optimum processes in systems with  
distributed parameters described by partial  
differential equations 08 p1202 A66-19710
- Green function method in theory of  
dispersion and absorption of electromagnetic  
radiation in semiconductors, considering  
resonance line shapes  
theory 09 p1411 A66-19961
- Green function-eigenvalue relationship on  
closed smooth boundary of open dimensional  
region 09 p1394 A66-20265
- Series solution for average wave field in  
medium with random inhomogeneities by  
using Green function for wave  
equation 09 p1343 A66-20335
- Bounds for two-dimensional discrete  
harmonic Green function used in boundary  
problems 09 p1395 A66-20621
- Temperature and environment effect on  
absorption spectra of two-level system,  
using stochastic model and Green  
function 09 p1348 A66-20959
- Free energy functional of superconducting  
alloys based on Green function  
decomposition 10 p1573 A66-21241
- Stress distribution in semiinfinite elastic  
media with different properties bonded  
along plane and containing concentric ring-  
shaped cavities, using Green function  
[ASME PAPER 65-WA/APM-2] 10 p1615 A66-21479
- Decay theory of closely coupled unstable  
states based on Green function formulation  
for transition amplitude 11 p1741 A66-23189
- Ground state energy of charged Bose gas  
obtained from pair Hamiltonian and Green  
functions 11 p1741 A66-23392
- Green function random phase decoupling  
scheme investigation of magnetic impurities  
effect on thermal properties of cubic spin-  
1/2 Heisenberg  
ferromagnet 11 p1758 A66-23394
- Fundamental solutions of static and  
dynamic linear inextensional theories of thin  
elastic plates  
[ASME PAPER 65-WA/APM-23] 12 p1960 A66-23971
- Second-order elliptical operator for m-  
dimensional Euclidean space with open  
region bounded by closed  
surface 13 p2120 A66-26010
- Green function of high degree of self-  
adjoint expansion of elliptic operator  
generated by differential expression is  
smooth inside domain and on smooth part of  
boundary 14 p2321 A66-27161
- Derivation of asymptotic form of Green  
function, using hydrodynamic approximation  
method 14 p2275 A66-27578
- Light dispersion and absorption by  
impurity centers in solids calculated via  
two-particle Green function method,  
assuming weak electron-phonon  
interaction 15 p2559 A66-28632
- Huygen principle for electromagnetic field  
in moving, isotropic, homogeneous and  
linear medium, using Maxwell-Minkowski  
equations and Green function for field  
equation 15 p2537 A66-28783
- Green-Hadamard functions of Tricomi  
singular problems for generalized wave  
equation, expressing equation integrals as  
hypergeometric Humbert and Horn  
series 15 p2530 A66-29855
- Convergence of discrete analogs of  
Dirichlet problems for Poisson equation in  
two dimensions, describing finite difference  
method for producing  
algorithms 16 p2731 A66-30235
- Analytic construction of skew derivative  
Green matrix for system of second order  
elliptic PDEs in many  
variables 16 p2734 A66-30749
- Generalized matrix inverse and differential  
operator with generalized Green function as  
kernel 16 p2738 A66-31719
- Electromagnetic wave interaction with  
uniform isotropic plasma in cylindrical  
interface considered for various types of  
excitations, using Green  
functions 17 p2962 A66-31821
- Green functions for heat source and  
concentrated force acting in unbounded  
thermoelastic space, applying perturbation  
method and Laplace  
transforms 17 p3018 A66-31836
- Integral equations of current derived for  
TM and TE waves in excited inhomogeneous  
impedance band in  
half-plane 17 p2885 A66-32246
- Arc operation under nonsteady electrical  
inputs, noting initial conditions, energy  
equation solution, temperature profiles,  
application of Green function for moving  
boundary problem, etc  
[AIAA PAPER 66-480] 17 p2970 A66-32769
- Interband Faraday effect in semiconductors  
in strong crossed electric and magnetic  
fields 17 p2983 A66-33133
- Exact solution for Green function of open  
spherical shell subjected to harmonically  
oscillating concentrated load and any  
consistent boundary conditions  
[ASME PAPER 65-WA/APM-24] 18 p3248 A66-33576
- Differential inequality theorem for  
boundary value problem involving second-  
order differential  
equation 18 p3126 A66-33975
- Torsion of prismatic rods of triangular or  
trapezoidal cross section, using Green  
function to obtain exact  
solution 18 p3256 A66-34395
- Green function applied to obtain  
alternative representations of source excite  
vector and scalar electromagnetic  
fields 18 p3071 A66-34564
- Electron-phonon interaction current  
density, thermodynamic Green function and  
other electromagnetic properties of  
superconductors, using Froehlich-Hamilton  
model 19 p3438 A66-35481
- Green formula and moment functions,  
predicting rate of radiative energy loss from  
boundaries of absorbing-emitting slab or  
sphere 19 p3479 A66-36597
- Nonmagnetic impurity effect on critical  
temperature of superconductor with two  
energy bands overlapping near Fermi energy  
level 20 p3619 A66-37657
- Garding inequality and Green  
transformation applied to elliptic operators  
in eigenvalue problems 21 p3755 A66-38465
- Longitudinal sound waves attenuation in  
superconductor with spatially dependent  
energy gap by Green function method  
applied to ultrasonic attenuation in type II  
superconductor 21 p3795 A66-38548

Kinetic equations in hydrodynamic approximation for weakly reacting and excited Bose systems, finding asymptotic expressions for Green function 23 p4055 A66-41412

Volterra equation and Green function to solve MHD problem of unsteady flow of viscous incompressible conducting fluid with time dependency 23 p4106 A66-41837

Hilbert parametric method of solving linear BVPs for second-order elliptic PDEs, using Green functions 24 p4232 A66-42740

**GREEN THEOREM**

Free-boundary nonlinear problem of smooth curve drawn in single circle so that doubly connected region formed by curve and circle satisfies specific existence conditions 02 p0250 A66-12105

Boundary condition constraint method for generalizing R-matrix theory, permitting use of shell model as basis for nuclear-reaction calculations 09 p1405 A66-20822

Uniqueness and solution estimates to boundary value problems, noting solvability correlation with existence of Green function 16 p2733 A66-30739

Poynting effect theoretically analyzed, postulating tensor expression for final Green measure in general coordinates for cylindrical coordinates 22 p3988 A66-39672

Mean viscous dissipation and bulk temperature variation in incompressible fully developed duct heat transfer, using Green theorem 22 p3998 A66-40033

**GREENHOUSE EFFECT**

Microwave radar observations of Venus, discussing surface thermometric temperatures, greenhouse effect, etc 09 p1451 A66-20113

Hopf analytical solution for values of ratio of gray absorption coefficients for insulating and escaping radiation /greenhouse parameter/ assumed constant at all depths, presenting temperature distribution graphs 10 p1605 A66-21204

Radiant energy transfer below cloud cover in Venus atmosphere, noting greenhouse effect caused by atmosphere containing components capable of IR absorption 22 p3980 A66-40469

**GREENWICH MEAN TIME**

**S UNIVERSAL TIME**

**GRENADE**

Rocket grenade measurement of temperature, pressure, density and wind velocity in upper atmosphere 10 p1533 A66-21832

**GRID**

**SA GRATING**

**SA LATTICE**

**SA MATRIX**

Reflection coefficients of plane wave field in grid-earth system, using averaged boundary conditions 04 p0482 A66-13907

Diffraction field determined for E-polarized plane wave incident normal to evenly spaced nonsymmetrical metallic grid 06 p0838 A66-15895

Operational geographic correlation /gridding/ of Nimbus meteorological data [AIAA PAPER 66-438] 18 p3128 A66-33645

Reflection coefficients of plane wave field in grid-Earth system, using averaged boundary conditions 20 p3518 A66-37865

Multielement antenna scanning grid-phasing method having random function distribution at aperture 20 p3533 A66-37994

Contraction to improve isotropy of grid-generated turbulence 22 p3899 A66-40381

Grid turbulence for large Reynolds numbers, noting consistency of power spectra values with Kolmogoroff scaling, decay law and Reynolds number effect on turbulence 24 p4194 A66-42408

Radiation response of low power nixistors, noting cause of grid current and relation between grid structure and induced current 24 p4258 A66-42961

**GRIFFITH FRACTURE THEORY**

Approximate stress intensity factor for embedded elliptical crack in plate subjected to uniaxial tension perpendicular to crack surface 01 p0152 A66-10377

Stress distribution in vicinity of infinite row of collinear Griffith cracks in elastic body calculated for internal pressure distribution 02 p0298 A66-11577

Griffith flaw theory in analyzing failures in

epoxy castings [ASME PAPER 65-WA/RP-6] 05 p0779 A66-15631

Griffith theory of brittle fracture and dependence on stress and load 10 p1614 A66-21339

Breaking stresses in two connected elastic half-spaces determined with aid of Griffith-Sneddon criterion 12 p1968 A66-24349

Inhomogeneous elastic half-spaces examined for circular crack in plane of contact and perpendicular tensile forces, using Griffith fracture theory 13 p2203 A66-26421

Critical load of infinite plane under tension weakened by crack evaluated by Griffith fracture theory 13 p2203 A66-26422

Brittle materials failure theory for cases where presence of plane deformation or plane stressed state is assumed, using Griffith theory 16 p2822 A66-31510

Fracture initiation and growth in linearly viscoelastic materials using energy formulation, establishing extension of Griffith initiation criterion 17 p2939 A66-32304

Elastic-plastic antiplane problems for bonded dissimilar media containing cracks and cavities on interface and subjected to longitudinal shear loads 19 p3475 A66-36430

Griffith type crack propagation due to localized thermal stress at holes, cavities, penny-shaped cracks and inclusions disturbing uniform heat flow 23 p4146 A66-41993

**GRIFFON AIRCRAFT**

**S NORD 1500 AIRCRAFT**

**GRINDING**

Grinding technique for accurate and proportional subdivision of chondritic meteoritic specimen and separation of metallic and silicate components for chemical analysis 08 p1179 A66-19095

Spherical aberration correction by grinding concave mirror to generate aspheric contour 15 p2498 A66-28826

**GROOVE**

Effective emittance of machined surfaces determined through groove models numerically analyzed 14 p2334 A66-27429

Thermal emittance and reflectance of diffuse-bottomed, specular-walled groove in solar radiant-flux environment [AIAA PAPER 66-459] 16 p2811 A66-31491

Grain boundary grooving in Cr, Mo and W, noting formation mechanism, effect of carbon on activation energy for surface diffusion, etc 18 p3121 A66-33727

**GROUND**

**S EARTH**

**GROUND-AIR-GROUND COMMUNICATION**

Space communications antennas, discussing ground to space systems, satellite relay methods, etc 05 p0651 A66-15839

VHF aircraft-satellite relay /VASR/ as means of improving long-range communications, with flight test results 06 p0825 A66-15988

Listening and two-way communication tests to study satellite as active relay for communications between aircraft in-flight and ground terminal, using Syncom III 08 p1185 A66-19538

Antenna requirements for satellite communications system ground stations, discussing antenna and mount designs 13 p2038 A66-25575

Monopulse radar air-to-surface slant range measurement 17 p2872 A66-31958

Ground radar systems for missile defense providing faster data processing, sensor location optimization, computer control, etc 24 p4175 A66-42953

**GROUND CONTROL**

Ground-based Minuteman pulse code modulation telemetry system, discussing routine and novel applications [ISA PREPRINT 1.12-4-65] 05 p0635 A66-15507

Ground-based steerable paraboloid spherical reflector and multiplate type antennas, noting cost per unit area for unit wind speed of 30 mph and frequency of 1400 mc, performance, restrictions, etc [AIAA PAPER 66-324] 12 p1844 A66-24794

CNES network of stations for FR-1 and D-1A, discussing checks of proper functioning, orbital corrections, telemetry, ground

control, etc 18 p3094 A66-3392

Preliminary design, mission specification and outgoing data specifications for advanced control center for vehicles orbital flight 20 p3651 A66-373

Air traffic control problems posed advent of supersonic transport may be eased by pictorial navigation display 20 p3598 A66-381

**GROUND EFFECT**

**SA DOWNWASH**

**SA LIFT**

**SA WAKE**

Ground effect on pressure distribution a lift coefficient of jet-flap wing tested wind tunnel 07 p0981 A66-186

Ground proximity effect on maximum lift drag ratio for wing with uniform spanwise circulation, considering vortex model 11 p1636 A66-233

Measurement accuracy of antenna to range evaluated for gain, elliptical polarization angle, boresight axis and ground reflected energy 12 p1836 A66-243

Ground reflection shock, compression and expansion waves caused by supersonic aircraft examined, noting correlations between wave intensity, incidence and pressure jump 13 p2062 A66-253

Vortex flow of ideal incompressible fluid past plate or slender wing near so wall 13 p2067 A66-262

**GROUND EFFECT MACHINE**

**SA AIR CUSHION VEHICLE**

**SA FLYING PLATFORM**

**SA GETOL AIRCRAFT**

**SA WESTLAND SR-N5 GROUND EFFECT MACHINE**

Theoretical and experimental analysis of structural, functional and design characteristics of air cushion vehicles at zero speed, examining lift coefficient viscosity effect, static tests, etc 01 p0011 A66-104

Economic indices of passenger-carrying air cushion vehicles and fundamental characteristics with reference to hydrodynamic vessels 02 p0177 A66-114

Hovercraft noise due to propeller, engine and transmission, examining reduction techniques, comparing with aircraft as surface transport 04 p0457 A66-133

SR-N5 hovercraft accidents analyzed prevention of future overturnings or plough-ins 05 p0609 A66-144

Flexible skirts and performance of ground effect machine 06 p0805 A66-163

Air cushion vehicle transport potential discussing attitudes and regulatory policies interurban, offshore, transoceanic, off-road agricultural, search and rescue operations 06 p0805 A66-163

Performance capabilities, cost characteristics and development costs of high-velocity GEM ocean carriers designed to compete with air transport 06 p0807 A66-163

Fluid digital amplifiers of axisymmetric focused jet design, based on focused-stalling effect known in ground effect vehicle aerodynamics 09 p1332 A66-203

Navigational problems arising from use of hovercraft 09 p1401 A66-204

Bertin-type air cushion vehicles, examining power supply and refinements required for over-water application 10 p1483 A66-216

New lift and propulsion techniques for development of V/STOL aircraft, helicopter and ground effect machines 11 p1636 A66-226

Comparison of air cushion vehicles supported by peripheral jets or by cushion contained in bell-shaped structure stressing simplicity of latter 12 p1862 A66-238

Hovercraft wavemaking resistance, discussing theory and experimental model 12 p1802 A66-242

Calculation of pressure beneath hovercraft indicating cushion pressure could be up to 10 percent higher than previous values 12 p1971 A66-244

Idealized ground effect wing, with close to ground, assumed to be semicircular lifting line in transverse plane, considering minimum induced drag 12 p1800 A66-250

Peripheral jet ground effect machine /GEM/ stability in pitch and

oll 13 p1995 A66-25591  
Terraplane, air-cushion vehicle for varied terrain, design, performance characteristics, etc 13 p1997 A66-26735  
Static and dynamic stability and operation of air cushion vehicles, emphasizing advantages of flexible skirts 16 p2633 A66-30312  
Ground effect takeoff and landing GETOL/ aircraft, noting problems in controlling it and configurations of annular jet 16 p2635 A66-31396  
Dynamics of noise and loading actions on helicopters, V/STOL aircraft and ground effect machines 18 p3050 A66-33679  
Noise generation due to mass introduction, applied force and stress in helicopters, V/STOL aircraft and ground effect machine 18 p3051 A66-33687  
External noise associated with hovercraft propeller 18 p3051 A66-33689  
Design study of two-seat road-going air cushion vehicle 18 p3052 A66-33973  
Fluid dynamic field determined for ground effect machines 18 p3098 A66-34060  
Hovering performance of plenum chamber type of ground effect machine over land and water, showing single nondimensional parameter controlling phenomena of overwater operation 19 p3279 A66-36487  
Transmission systems selection for high-speed lightweight applications, including air-cushion vehicles and Bell X-22A V/STOL aircraft ASME PAPER 66-MD-71] 21 p3743 A66-38499  
Propulsion systems for air cushion craft SKIP-I in marine environment AIAA PAPER 66-731A] 21 p3808 A66-39100  
Base surface and dimensional characteristics of peripheral gap minimize total force absorbed by ground effect machine with given weight, speed and altitude 21 p3696 A66-39601  
Helicopter trainee performance following synthetic flight training, noting flyable aircraft attached to ground effects machine 22 p3857 A66-40250  
Static and dynamic stability and operation of air cushion vehicles, emphasizing advantages of flexible skirts 22 p3848 A66-40393  
Performance of two-dimensional curtain jets of air cushion vehicles based on incompressible flow theory, noting stability criteria 22 p3844 A66-40499  
Hovercraft difficulty in accelerating through hump, noting wave resistance increase for pressure differential between two compartments of cushion with transverse stability skirt 22 p3901 A66-40678  
Peripheral jet theory in design of air cushion vehicles 23 p4013 A66-42004  
**GROUND HANDLING**  
Airline safety maintenance, noting British system of classification of parts into chapter numbers, ground equipment used and testing methods 12 p1857 A66-24038  
Outlook for air cargo handling indicates reduction of cost and increased efficiency by use of intermodel containers 15 p2620 A66-29799  
**GROUND HANDLING FACILITY**  
Terminal facilities, support equipment and operational characteristics of V/STOL aircraft 09 p1330 A66-20696  
Houston mission control center for flights from Gemini to Apollo program 14 p2272 A66-28441  
**GROUND SPEED**  
SA AIR SPEED  
SA VELOCITY  
Evaluation of AD560 Doppler by Qantas, discussing ground-speed run-down problem, radome design, along-track error and low-altitude accuracy over land and sea 07 p1078 A66-17811  
**GROUND STATE**  
Permittivity of dielectric formed from ground state instability of semimetal, considering Coulomb attraction between electrons and holes 01 p0125 A66-10774  
Symmetry of ground states of P, As and Sb donors in silicon determined optically 03 p0411 A66-13144  
Guillemin-Zener energy of ionized hydrogen molecule 04 p0546 A66-13455  
Internal and vibrational partition functions

of carbon dioxide and rotational line intensities arising from transitions from ground and first excited states 06 p0907 A66-15945  
Bracketing theorem applied in partitioning technique for solving Schroedinger equation to determine upper and lower bounds to energy eigenvalues, ground and excited states 06 p0911 A66-16166  
Potential correction effect on ground states of P and ionic-S impurities in silicon discussed in terms of cavity model 06 p0930 A66-17051  
Perturbation expansions for ground state function of helium atom, using Hartree or Hartree-Fock model Hamiltonian, based on Weiss-Martin variation-perturbation calculation 07 p1083 A66-18422  
Permittivity of dielectric formed from ground state instability of semimetal, considering Coulomb attraction between electrons and holes 11 p1749 A66-22286  
Zero-field splitting in ground state of ruby, considering effect of spin-spin interaction, using L gamma representation 11 p1750 A66-22491  
Ground state of hydrogen molecule treated by perturbation theory through second order, noting energy and wave function 11 p1738 A66-22882  
Excitation mechanism and rate of nitrogen ions in shock-heated atomic-molecular nitrogen mixtures, noting vibrational relaxation 11 p1739 A66-22885  
Product of oscillator strength, stark width and ground state density measured in T tube plasmas, using neutral helium resonance line 11 p1747 A66-23391  
Ground state energy of charged Bose gas obtained from pair Hamiltonian and Green functions 11 p1741 A66-23392  
Depopulation of ground state chromium ions in ruby under optical pumping explained via rate equations 13 p2089 A66-25188  
Optical pumping in ground states and metastable atomic states 14 p2305 A66-26963  
Superconductivity model with exact solution, determining energy levels, ground state energy, excitation spectrum, density variations, etc 14 p2360 A66-27190  
Single-configuration open-shell calculations for ground state of boron isoelectronic sequence, using doublet-spin-state wave function 16 p2750 A66-30122  
Momentum eigenfunction for ground state of hydrogen molecule ion 18 p3106 A66-34506  
Molecular orbital studies of ground and low lying excited states of HeH molecular ion 18 p3139 A66-34509  
Electronic energy for ground state of one-electron diatomic molecule near united atom 18 p3140 A66-34512  
Transitions induced by electron impact between all ground-state terms of atomic systems with computed cross sections satisfying unitarity 19 p3463 A66-35990  
Approximation method using sum rules for energy shift in atomic system due to interaction of electrons with vacuum electromagnetic field applied to hydrogen, helium and lithium atom ground states and hydrogen molecule 19 p3402 A66-35995  
Splitting of ground state of neutral mercury two-hole acceptor in unstressed silicon or germanium evidenced by intensity decrease of photoabsorption peaks 19 p3444 A66-36174  
Excitation of ground state hydrogen atoms by fast protons, evaluating total Born cross section in limit of infinitely massive protons 19 p3403 A66-36333  
Ground-state spin memory in excited state of ruby under broadband optical pumping, observing change in relative populations of Zeeman components 20 p3578 A66-37596  
Second-order WKB corrections to Rydberg-Klein-Rees potential curve for hydrogen 22 p3949 A66-39911  
Fractional metastable-state population measurements of Cr ions in ruby crystal under Q-switching operation 23 p4077 A66-41288  
Excitation of hydrogen molecule from ground state to B and C electronic states by electron impact, using one-center wave functions of Huzinaga together with Born

approximation 23 p4098 A66-41360  
Superconductivity model with exact solution, determining energy levels, ground state energy, excitation spectrum, density variations, etc 24 p4259 A66-43088  
**GROUND STATION**  
**SA TRACKING STATION**  
Advanced integrated landing system /AALS/ consisting of azimuth and elevation ground station, ground display site and airborne unit, emphasizing scanning-beam technique 01 p0101 A66-10034  
Satellite communication, noting satellite and ground terminal design performance criteria 01 p0030 A66-10804  
Pulse code modulation /PCM/ for telemetry and communication between Gemini spacecraft Agena D satellite and ground stations for data processing and display 01 p0031 A66-10938  
85-ft paraboloid antenna with new type of Cassegrainian feed system for satellite communication ground station at Nova Scotia 02 p0189 A66-11362  
Loran C system and technique of ground stations for giving ships fixes 02 p0257 A66-12037  
Worldwide navigation system using existing ground and airborne equipment and limited number of navigation satellites 02 p0259 A66-12054  
Modifying ground station deployment, transmitted frequencies and bandwidths for Dectra 2 Navigation system in North Atlantic area 02 p0260 A66-12057  
Discrepancies in data concerning aurora type sporadic ionization in E region obtained by various high latitude stations 02 p0225 A66-12136  
CNES and ESRO station network duties including satellite signal transmission recording, follow vehicle trajectory, telecommand onboard operations, etc 03 p0333 A66-12477  
Diane, European interferometric tracking station noting antenna system, calibration operations, angular measurement, etc 03 p0333 A66-12478  
Station network designed for CNES using Doppler frequency tracking, coherent systems of demodulation, polarization, etc 03 p0351 A66-12479  
Electronic solid state goniometer for producing navigation information for transmission from VHF omnirange /VOR/ ground station 05 p0645 A66-14582  
Satellite telecommunication principles and equipment 06 p0835 A66-16935  
Worldwide implementation of DME system feasible by removing unnecessary refinements from ground station design 07 p1068 A66-17696  
Design and electrical properties of 25-meter Cassegrainian antenna installed at Raisting ground station for radio communications via satellites 08 p1190 A66-18681  
Medium-capacity satellite receiving system for multiplex FM telemetry transmission 08 p1183 A66-18947  
Automated ground station, with computer controlled telemetry system, for Saturn launch vehicle checkout 09 p1347 A66-20675  
Ground station characteristics and requirements in fields of tracking, telemetry and remote control 10 p1520 A66-21706  
Diane ground station interferometry antenna, examining choice of polarization and use of slots for precise measurements 10 p1511 A66-21708  
Self-compensation of phase angle of Diane station coaxial cable of discontinuous disk structure throughout wide temperature range 10 p1511 A66-21709  
Diane tracking station electronic equipment accomplishes variable and selective amplification of signals and coherent demodulation of phase information 10 p1520 A66-21710  
Ground station installations for observation in ionosphere of noncoherent diffusion of plasma by electrons 10 p1532 A66-21711  
Variations in cosmic ray intensity recorded at world network of stations during consecutive magnetic storms, noting changes in corpuscular fluxes, interplanetary medium, etc 12 p1941 A66-24167  
Solar-diurnal cosmic-ray variations

analyzed, showing that averaging observational data over worldwide network of stations leads to large errors 12 p1943 A66-24183

Effect of higher harmonics of geomagnetic field on cosmic ray trajectories, noting reception cones of Soviet stations 12 p1943 A66-24268

Effects of technical parameters of station on results of observations of sporadic E layer, noting that frequencies depend weakly on receiver and transmitter 12 p1869 A66-24272

Satellite communications central control support system consisting of Earth stations and satellite relays accommodating different RF power, orbits and antenna orientations [AIAA PAPER 66-287] 12 p1859 A66-24758

Satellite ground terminal design considerations using adaptive digital communications techniques, noting analog to digital conversion [AIAA PAPER 66-290] 12 p1822 A66-24760

Minimum cost ground receiving station for synchronous satellite system [AIAA PAPER 66-311] 12 p1859 A66-24777

Antenna requirements for satellite communications system ground stations, discussing antenna and mount designs 13 p2038 A66-25575

Discrepancies in data concerning aurora type sporadic ionization in E region obtained by various high latitude stations 14 p2287 A66-28092

Transportable satellite communications ground station design [AIAA PAPER 66-289] 15 p2477 A66-29865

Australian space program noting rocket soundings, Beacon satellites, station development, etc 15 p2600 A66-29909

Varactor diode parametric amplifiers compared for various applications in satellite communication ground stations including FM reception, tracking and radio noise reception 17 p2890 A66-32908

Low-cost ground station design for satellite communications, with emphasis on Cassegrain reflector antenna and drive system 18 p3093 A66-33868

Multiple-element steerable Earth-station antenna for communicating with communications satellite 18 p3080 A66-34264

TACAN and DME navigation systems, discussing ground stations, airborne equipment and guidance systems 18 p3133 A66-34465

Ground stations used in telemetry, tracking and remote control of French satellites 18 p3071 A66-34466

System consisting of communications satellites distributed in nonsynchronous orbits and set of ground stations, formulating link scheduling problem as optimum control 19 p3303 A66-35884

Coverage of satellite passes from ground station for combined satellite-ground base studies of upper atmosphere 20 p3515 A66-37298

Selection and development of guidance station at Gove, Australia, noting access routes, logistics problems, etc 21 p3721 A66-38643

Requirements, functions and equipment of down-range guidance station for ELDO program in Australia 21 p3721 A66-38644

High resolution IR scanning system and vidicon automatic picture transmission of Nimbus II and ground station printout instrumentation 21 p3821 A66-39497

Unmanned space vehicle on board measurements and data transmission to ground station, examining temperature and propellant measuring techniques 21 p3741 A66-39631

Comsat Operations Center for support of International Telecommunications Satellites 22 p3867 A66-40710

Military air-transportable satellite communications terminal design, noting parabolic antenna and amplifier 22 p3896 A66-40712

Antenna systems for deep space communication emphasizing ground station, balancing of ground antenna aperture with spacecraft performance, arrays, etc 24 p4171 A66-42244

Soviet ground station for observation of energy spectrum, composition and

anisotropy in arrival directions of primary cosmic ray particles 24 p4269 A66-42917

Electromagnetic structure of radioelectric whistlers, considering wavefront curvature in D layer, noting signal reception at two distant ground stations 24 p4176 A66-43001

Interplanetary space and celestial observations from ground stations, satellites and space rockets 24 p4280 A66-43133

### GROUND SUPPORT EQUIPMENT

Real time ground computer for Athena system and input/output data requirements in multiprocessing jobs 12 p1827 A66-23836

Advanced avionics systems for improved surveillance and communications for Army ground-support aircraft 13 p2023 A66-25644

Ground support equipment for Pershing weapon system 20 p3542 A66-37239

U.S. Lunar Orbiter program 20 p3663 A66-38063

Aircraft and spacecraft digital systems including computers for production engineering, ground telemetry and communication with aerospace vehicle and onboard equipment for tracking, guidance and simulation of inflight conditions 21 p3709 A66-39629

### GROUND SUPPORT SYSTEM

#### SA SATELLITE GROUND SUPPORT NETWORK

Electronic packaging in Pershing weapon system ground support equipment 02 p0197 A66-11460

Producibility of electronic hardware for Pershing weapon system ground support program 02 p0198 A66-11463

Ground support equipment and launch installations for Apollo launch operation and testing 02 p0215 A66-11614

Coordinated program for airborne and ground support equipment testing of Gemini spacecraft and launch vehicle by two different manufacturers 02 p0294 A66-11635

Operational and maintenance ground equipment, electronics and systems test concepts of Minuteman II ICBM weapons systems 02 p0216 A66-12239

Spacecraft and ground equipment design of lunar orbiter telecommunications system 04 p0477 A66-13580

Human factors in control/indicator panel design of ground support equipment [ASME PAPER 65-WA/HUF-16] 05 p0628 A66-15696

XB-70 fluid power ground support system, describing functions of hydraulic ground power unit, fluid servicing trailer and filtration cart 06 p0869 A66-16791

Universal long range radio navigational system, discussing purpose and function of ground-based system 07 p1065 A66-17671

Design and program for Apollo Lunar Excursion Module, noting propulsion, guidance, control, ground support, etc 08 p1300 A66-18554

Ground support equipment /GSE/ concept, onboard checkout system for large space boosters [AIAA PAPER 64-298] 10 p1612 A66-21935

Hydraulic and pneumatic power equipment for ground support of space vehicles and support in space environment [AIAA PAPER 65-524] 12 p1804 A66-24717

Lincoln Experimental Terminal /LET/ system, ground antenna, RF and signal processing equipment for communications via several satellites [AIAA PAPER 66-272] 12 p1821 A66-24745

Ground system design, data processing, digital command and digital-human interface in flight operations problems for unmanned spacecraft on planetary exploration mission 13 p2190 A66-25257

Satellite tracking telemetry system used by Diane network of ground stations 14 p2233 A66-26803

Ground-based test setup using p-n-p-n controlled switches, logic circuitry and sensitive relays to analyze telemetered pulse signals from four lines of airborne electronic system 14 p2255 A66-27807

Palletized cargo systems, transit time reduction and ground support system data handling and documentation 17 p2846 A66-32844

Checkout criteria and requirements for manned spacecraft, specifically Apollo [AIAA PAPER 65-284] 18 p3093 A66-33791

Interface between aerospace systems with man, spacecraft and supporting ground stations 20 p3662 A66-371

Payload integration in space experimentation, discussing commonality of flight and load matrices, experimental spacecraft-ground system interfaces, computer methods, etc 20 p3662 A66-371

Packaging, shielding and other containment techniques in formulation of grounding plan as basis of good EAGE design 20 p3542 A66-371

Minuteman weapon system maintainability discussing fault detection and isolation ground system, standardization, tools and system requirements analysis 24 p4281 A66-42917

### GROUND TEST

Measuring Meteor 1 rocket flight parameters from ground using phototeodolites and astronomical optical-acoustic methods 01 p0031 A66-116

Full scale ground inflation tests evaluate structural and RF backscatter characteristics of Echo II prototype sphere as function of their internal pressures 01 p0055 A66-117

SNAP-10A instrumentation and control subsystems and ground test program 12 p1911 A66-234

Ground testing of large nuclear rocket discussing decontamination requirements maintain safety level with longer runtimes and higher reactor levels 19 p3398 A66-366

### GROUND TRACK

Computation capability onboard manned spacecraft of out-of-plane maneuver, achieving specified ground track 02 p0256 A66-116

Apollo Manned Space Flight Network /MSFN/ tracking and communications systems for tracking lunar spacecraft 15 p2450 A66-287

Tesseral perturbations of repeating ground track synchronous satellite orbits gravitational potential 18 p3233 A66-344

Satellite space coordinates from photographs made simultaneously from two points on Earth surface 22 p3917 A66-396

### GROUND WAVE

Electromagnetic groundwave propagation along Earth surface, noting transmission a reflection when meeting abrupt electrical discontinuity 04 p0475 A66-134

Field separation of ground transmitter in ordinary and extraordinary modes when traversing lower boundary of anisotropic ionosphere, noting effect of incidence angle magnetic azimuth, etc, on energy dissipation of VLF ground wave 14 p2238 A66-276

Extension of work on ground wave propagation along two-section mixed path to three-section paths, using microwave frequency, water and aluminum plates 15 p2452 A66-294

Sonic boom shape distortion due to reflection and scattering by ground surface with finite acoustic impedance 17 p2905 A66-311

Short distance expansion method used to calculate ground radio wave propagation over mixed path on spherical Earth 19 p3305 A66-366

### GROUP BEHAVIOR

Solution for group properties of equation for monoenergetic charged-particle beam extended to beam in presence of stationary background and multivelocity and multicomponent beams 04 p0556 A66-14

Faster group performance with large shared display indicates facilitating effect on group interaction process 12 p1808 A66-234

Model for social system for extended duration spaceship crews subject to isolation, confinement and/or stress 13 p2013 A66-256

### GROUP THEORY

General theory for construction of constitutive equations describing pure mechanical properties of continuous media with tensor and group theoretic concepts 01 p0106 A66-10

Simple semigroup treatment of problems involving powers of nonnegative matrices 02 p0249 A66-11

Probabilistic model for analyzing change

through time in binary dyadic relation on finite set of points 04 p0540 A66-14001

Group properties of PDE system for one-dimensional gas flows with plane waves, using external Cartan 07 p1019 A66-17859

Group classification of solutions to Hopf equation according to type of viscosity coefficient 08 p1209 A66-19476

Group properties of short wave equations in gas dynamics 10 p1522 A66-21315

Fantapple relativity theory using elementary projective geometry and based on group theory, obtaining cosmology leading to double time scale and origin of universe from point 15 p2599 A66-29658

P super n electron configuration for systems where spin-free Hamiltonian is applicable 16 p2754 A66-30861

Integral equivalence of two given systems of square integral matrices, reducing problem to determination of principal ideal ring 16 p2738 A66-31563

Nonnegative matrix analysis, discussing summation and multiplication 19 p3391 A66-36337

Group theory of invariance of finite linear state-variable transformations generating new linear dynamic system and application to electric network 20 p3539 A66-38147

Continuous group and infinitesimal transformation in linear dynamic system application, considering linear network 20 p3539 A66-38148

Conditional stability and boundedness of conditionally invariant sets derived from vector Liapunov function 21 p3755 A66-38538

Covariant gravitational field equations in de Sitter space and quantum mechanical equations of motion associated with particles of given spin, employing gauge principle 21 p3769 A66-38645

Existence of similar solutions for given differential transonic equations for free stream Mach number of unity 23 p4014 A66-42049

Decompositions induced in completely o-simple rectangular semigroup by matrix congruence 24 p4232 A66-42900

**GROUP VELOCITY**

Group velocity measurements in delay systems of quantum paramagnetic amplifiers 09 p1380 A66-20361

Correctors for variations in group propagation time of AM wave transmitted by radio carrier wave, noting circuit analysis for matched and unmatched all-pass IF filters 14 p2252 A66-27353

Group velocity and power flow relations for surface waves in plane-stratified anisotropic media 18 p3066 A66-33539

Group velocity and power flow of surface waves on uniaxial plasma slab 18 p3066 A66-33540

Group velocity measurements in delay systems of quantum paramagnetic amplifiers 19 p3353 A66-35319

Group velocity of wave packet propagating radially across plasma immersed in static axial magnetic field, examining ringing phenomena due to pulsed transmission 23 p4101 A66-41261

**GROWTH**

**SA CRYSTAL GROWTH**

**SA GERMINATION**

Growth rate of microorganisms when rate changes with time, using continuous culture technique 02 p0183 A66-12016

Photolumination effect on growth rate of *Chlorella vulgaris*, discussing action spectrum and mechanism of light requirement for heterotrophic growth 20 p3507 A66-37792

**GRUMAN MILITARY AIRCRAFT**

**S A-6 AIRCRAFT**

**S F-111 AIRCRAFT**

**GRUNEISEN CONSTANT**

Thermal expansion of complex semiconductors from 20 to 340 degrees K, calculating Gruneisen constant for diamond, silicon, germanium, tin, etc 01 p0124 A66-10769

Pressure dependent critical temperature and magnetic field of superconducting transitions in metals 09 p1429 A66-20597

Thermal expansion of complex semiconductors from 20 to 340 degrees K, calculating Gruneisen constant for diamond,

silicon, germanium, tin, etc 11 p1749 A66-22280

Lindemann, Grueneisen and melting laws in theory of normal properties of high pressure solids 18 p3135 A66-34237

Pressure dependent critical temperature and magnetic field of superconducting transitions in metals 20 p3622 A66-38131

Functional interdependence of four distinctly different parameters represented by gamma in study of thermodynamical relations for shock waves 24 p4193 A66-42270

**GUIDANCE**

**S AIRCRAFT GUIDANCE**

**S HOMING**

**S INERTIAL GUIDANCE**

**S MAP-MATCHING GUIDANCE**

**S MIDCOURSE GUIDANCE**

**S NAVIGATION AND GUIDANCE**

**S REENTRY GUIDANCE**

**S SATELLITE GUIDANCE**

**S SPACECRAFT GUIDANCE**

**S TERMINAL GUIDANCE**

**GUIDANCE AND CONTROL**

Ion guidance and control - AIAA Conference, Minneapolis, August 1965 01 p0097 A66-10001

Navigation, guidance and control systems to meet basic trajectory and crew safety requirements of LEM 01 p0102 A66-10043

Synthesis of optimal linear control system coupled with vehicle configuration design technique for guidance parameters and temperature accumulation along optimum entry trajectories 01 p0105 A66-10787

Computer logical gates for characteristics of large systems as local guidance control and regulation systems of plants 03 p0348 A66-12603

Linear expression for constraints to obtain general solution to impulsive guidance laws 03 p0390 A66-12801

LEM mission and pilot role in spacecraft control including guidance and control systems, retromaneuvering, landing-site inspection, etc 05 p0713 A66-15166

Gemini guidance and control, discussing design, ground monitoring, launch and flight guidance, spacecraft instrumentation, maneuvering, etc 06 p0906 A66-15924

Fuel optimum guidance law to achieve required velocity 06 p0906 A66-15928

Direct and analytical solution of polynomial-type guidance functions for optimal space flight [AIAA PAPER 66-94] 06 p0907 A66-17093

Fluid logic elements and amplifiers for data processing, signal amplification and guidance and control 08 p1199 A66-18698

Dimensionless differential corrections and proper coordinate system for generalized preflight guidance analysis 08 p1249 A66-18819

Multimission standardized guidance and control system and evaluation of cost effectiveness 08 p1253 A66-19540

Digital computers for aerospace guidance and control, including Gemini inertial guidance and B-70 aircraft navigation systems 08 p1187 A66-19597

Protection standards for population around missile launching sites, noting missile malfunctions, particularly breakdowns of guidance and control systems 09 p1457 A66-20554

CECLES/ELDO space vehicle booster program, noting design of three-stage rocket, including control and guidance system, telemetry, etc 09 p1464 A66-20655

Optimal trajectory and guidance role of conjugate points in determining maximum duration of optimal control for linear and nonlinear processes 10 p1516 A66-21076

Theoretical and engineering aspects of applying predicting systems to automatic guidance and control 11 p1673 A66-22201

Guidance by parabolic extrapolation of short-range missile toward pre-established target controlling it aerodynamically, noting finder, computer and navigational errors 11 p1734 A66-23500

Guidance and control of Mars orbiter-lander mission 13 p2123 A66-25254

Guidance control technique for soft automatic lunar landing 16 p2743 A66-30887

Optimal control theory in design of aerodynamic shapes, flight paths, guidance and control logic, data processing logic,

etc 17 p2950 A66-32682

Guidance and control systems of Mariner planetary spacecraft, noting requirements, flight performance, systems configuration, etc 18 p3242 A66-33852

Single-axis Sun-tracking system for satellite orientation, noting operation modes and system performance 18 p3243 A66-33855

Advanced control and guidance research at NASA 18 p3131 A66-33866

Digital guidance and control computer used in Apollo Guidance and Navigation System 18 p3073 A66-33874

Simulator results on guidance and control during supercircular atmospheric entry maneuvers 18 p3244 A66-33878

Short time prediction display applicable to stabilization problems, discussing extrapolation and accelerated time scale methods 18 p3061 A66-33884

Temperature rate measurement for design of control and guidance system in reentry vehicles, using Temperature Rate Flight Control System /TRFCS/ 19 p3396 A66-35511

Guidance equations including first-order effects of Earth oblate gravitational field, solving motion equations and evaluating downrange and crossrange miss distance and time-of-flight errors 19 p3397 A66-35599

Gemini reentry guidance and control system consisting of inertial guidance and attitude control systems 19 p3470 A66-36679

Control-engineering and flight-mechanics problem of rendezvous guidance, considering target body without guidance and second body in gravitational field without atmosphere 20 p3595 A66-36874

Reliability requirements for spacecraft guidance and control systems, emphasizing redundancy in existing systems 20 p3596 A66-37177

Redundant electrical systems for Titan II and Gemini Titan II launch vehicles 20 p3499 A66-37193

Digital simulation of guidance and control of exoatmospheric interceptor missiles for study of parameter variations effect on overall mission effectiveness 20 p3596 A66-37230

Guidance scheme for control of multistage rocket vehicle through ascent phase of complex space mission [AIAA PAPER 64-640] 20 p3597 A66-38156

Steering philosophy for rocket booster, using position and/or velocity profiles until desired injection speed is attained [AIAA PAPER 64-639] 20 p3597 A66-38157

Requirements, functions and equipment of down-range guidance station for ELDO program in Australia 21 p3721 A66-38644

Guidance and control - AIAA/JACC Conference, Seattle, August 1966 21 p3761 A66-38838

Computational errors and requirements evaluated for free and restrained strapdown sensor mechanization, based on analytic models 21 p3763 A66-38841

Stationkeeping problems and guidance technique for control of stationkeeping maneuver between orbiting vehicles 21 p3765 A66-38865

Modulation of L/D and bank angle to achieved heading, range and trajectory stabilization, using closed form equations 21 p3765 A66-38868

Airborne guidance computations using prescribed-h method, representing two-body motion in inertial space, presenting equations for target hitting, circular orbit, etc 21 p3765 A66-38869

Mathematical model of linear guidance law to dynamical system, noting reduction of two-point boundary value class error 21 p3765 A66-38870

Inertial and electromagnetic guidance and navigation systems for vehicular and global application 22 p3944 A66-40124

**GUIDANCE SENSOR**

**SA IMAGE DISSECTOR TUBE**

Satellite guidance system using star-field locating sensor with gyration masses controlled by centrifugal and gravitational force interaction 02 p0256 A66-11984

Automatic star trackers for long range aircraft navigation, discussing instrumentation methods and use of pulse code modulation for sensor design 02 p0257 A66-12029

- Schuler tuned inertial system as flight sensor and control of VTOL aircraft translational velocity during hover phase and landing 07 p1070 A66-17724
- Inertial reference unit to provide attitude and thrust maneuver measurements for Lunar Orbiter spacecraft 08 p1253 A66-19529
- Electro-optical celestial guidance system with miniaturized computer and scanning sensor 12 p1909 A66-24104
- Electro-optical automatic celestial guidance system for spacecraft and satellites 13 p2124 A66-25643
- Bore-sighted scanning star tracker for precise attitude sensing and control of sounding rocket 14 p2329 A66-28452
- Sensors for Earth satellite orientation to solve general problem of space vehicle orientation 18 p3245 A66-33888
- Star tracking tests to achieve accurate stellar sensor positioning prior to missile launching, considering calibration of critical hardware 18 p3132 A66-34045
- Preflight and in-flight testing of stellar sensor subsystem for guidance of ballistic missiles 18 p3111 A66-34046
- Control signal generator and output characteristics of angular position and velocity sensors used in single-axis Sun-oriented system of Vostok spacecraft 19 p3394 A66-35280
- V-gyro pair as dual-rate sensor, examining gimbal equations for gyros 21 p3736 A66-38712
- Strapdown inertial sensor configuration based on time modulated torquing approach in gyro and accelerometer 21 p3764 A66-38849
- Strapped-down inertial sensor loops design criterion for desired total system performance, noting loop dynamic error 21 p3764 A66-38850
- Automatic feedback table leveling system, noting tilt to simulate aerodynamic drag 21 p3722 A66-38887
- Book on spacecraft navigation systems covering sensors operation and construction, with emphasis on astronomical, inertial and complex navigation systems 21 p3768 A66-39289
- Apollo mission evolution, with particular reference to lunar descent, landing, takeoff and rendezvous performed by LEM 21 p3822 A66-39517
- Analytic axes alignment for strapdown inertial system, describing computational procedures for ground-based and in-flight correction of attitude parameters 23 p4088 A66-41115
- Microwave radiometry feasibility as technique for navigation data-sensing in Army aircraft 23 p4089 A66-41317
- GUIDANCE SYSTEM**
- SA MIDCOURSE GUIDANCE**
- SA RENDEZVOUS GUIDANCE SYSTEM**
- Thermal compression bond failures in internal electric interconnects on circuit boards of advanced Minuteman guidance system 01 p0049 A66-11152
- Gemini spacecraft reentry guidance scheme with onboard computations of reference trajectory and guidance coefficients [AIAA PAPER 65-48] 03 p0390 A66-12758
- Intercepting moving completed powered-flight of ICBM missile 04 p0581 A66-13458
- Automatic testing and evaluation system for launch-vehicle digital computer and data adapter of Saturn IB/Saturn V guidance system 04 p0507 A66-13612
- Future missile guidance capability would permit usage against broad spectrum of tactical targets by use of multimode sensor array 04 p0585 A66-13923
- Longitudinal photoelements examined for guidance and homing 04 p0524 A66-14398
- Guidance system for British Navy anti-aircraft missile Seaslug using Cartesian control beam-riding, noting simulation testing 07 p1079 A66-18327
- Processing signal information from digital rate gyros and accelerometers in analytic, gimballess inertial platform 08 p1253 A66-19530
- Iterative guidance law for Saturn launch vehicle for lunar landing, examining trajectory optimization 08 p1253 A66-19539
- Computer-controlled vidicon terminal guidance system 08 p1253 A66-19541
- Optimum antenna requirements for radio-slope guidance system and vertical control in blind landing 08 p1254 A66-19833
- Future programs for ELDO including launchers, guidance systems, bases, etc 09 p1464 A66-20656
- Manual guidance system for atmospheric entry of lifting reentry vehicles 10 p1554 A66-21930
- Automatic pilot consisting of guidance system for flight trajectory control and stabilization system for angular acceleration control 12 p1909 A66-23815
- Missile guidance systems based on p-matrix guidance methods [AIAA PAPER 64-667] 12 p1910 A66-24711
- Onboard guidance scheme as backup to Earth-based orbit determination techniques and for approach navigation and orbit correction in planetary capture maneuver 13 p2123 A66-25253
- Design and fabrication of computer subsystems for Apollo guidance and navigation systems 13 p2027 A66-25781
- Titan III guidance and navigation system modification for lunar mission application 14 p2329 A66-28451
- R and D clean room complex design for guidance and control systems, noting contamination control, maintenance procedures, cost factors, etc 17 p2903 A66-32209
- Nuclear radiation anticollision instrumentation for guidance systems of helicopters and other vehicles, both air and surface 17 p2926 A66-33097
- Analytic solutions for predicting motion of high-thrust rockets applied in guidance and real-time targeting [AIAA PAPER 66-452] 18 p3226 A66-33648
- Man-machine system in control and guidance of Saturn V launch vehicle, emphasizing participation during atmospheric phase of flight profile 18 p3242 A66-33847
- Satellite orbiting via radio command guidance, discussing results with communications and weather satellites, guidance system used, control methods, etc 18 p3131 A66-33848
- Solar alignment system for Skylark rocket attitude control, describing system composition, operation and results 18 p3243 A66-33856
- Guidance and navigational system hardware for Apollo Command Module and LEM 18 p3132 A66-33877
- Terminal guidance system instrumentation for Surveyor project lunar soft-landing spacecraft 18 p3132 A66-33881
- TACAN and DME navigation systems, discussing ground stations, airborne equipment and guidance systems 18 p3133 A66-34465
- Closed loop control system for space vehicle guidance, formulating efficient steering algorithm 19 p3471 A66-36685
- Error analysis of area correlation guidance system using parametric analysis of spatial frequency domain-equivalent power spectral density 20 p3597 A66-37237
- Manual steering, hybrid guidance system, in-flight computations and trajectory for automatic descent and landing system for LEM 21 p3768 A66-38899
- Monograph on theory of gyroscopic instruments and devices 23 p4066 A66-41052
- GUIDE VANE**
- Parametric analysis of supersonic compressors, determining relative efficiencies of various leading and trailing guide vane configurations 10 p1479 A66-21365
- Inlet guide vane system for control of small single-shaft gas turbines [ASME PAPER 66-GT-89] 14 p2372 A66-26993
- Nozzle guide vanes of ZHS-6K alloy in thermal stress induction of surface layer crystal structure changes 16 p2727 A66-31531
- GUIDED MISSILE**
- Graphical-analytical method using successive approximations determines guided missile trajectory 11 p1734 A66-23344
- Annual report, 1964-65 / Aeronautical Research Laboratories, Australian Defence Scientific Service/ on aerodynamics, guided weapons and systems and flight research 13 p2056 A66-25120
- Textbook on automatic guidance missiles and space vehicles 17 p2951 A66-33033
- Text on radio remote control a telemetry and missile application, including modulation and multiplex techniques 17 p2876 A66-33033
- Stellar inertial guidance system composed of integral inertial platform-stellar sensor combination, airborne digital computer and power supply for Polaris missile 18 p3132 A66-34045
- Preflight and in-flight testing of stellar sensor subsystem for guidance of ballistic missiles 18 p3111 A66-34046
- Electronic equipment for guided weapon design and quality evaluation 18 p3079 A66-34046
- Book on ballistics of long-range guided missiles and practical methods 20 p3664 A66-38033
- Propellant sloshing in tanks of guided missile, giving mathematical description of numerical and experimental results Coralie stage 21 p3818 A66-38033
- Dither and sinusoidal incidence variation effect on control wing hinge moments of transonic-supersonic rolling maneuver guided missile [AIAA PAPER 66-755] 22 p3846 A66-40033
- GULF STREAM**
- Aerial observation of sea surface measuring wind direction, speed, wind direction and period of Gulf Stream along coast 10 p1532 A66-21033
- GULLIVER PROGRAM**
- Future of environmental biology, discussing space research on living organisms extraterrestrial environment 04 p0470 A66-14033
- Extraterrestrial life in solar system discussing equipment for Mars exploration noting Gulliver program, Multivator automatic biochemical testing apparatus and TV microscope 12 p1805 A66-23033
- GUMBEL THEORY**
- SA EXTREMUM VALUE**
- Gumbel theory of extreme values a statistical technique in reliability problems with emphasis on double exponential distribution 12 p1833 A66-24033
- GUN**
- SA CROSSED FIELD GUN**
- SA ELECTRON GUN**
- SA GAS GUN**
- SA HYPERVELOCITY GUN**
- SA PLASMA GUN**
- Production process for gun-drilling of holes in beryllium, noting filtration technique and clamping fixture [ASTME PAPER MR66-185] 14 p2300 A66-26033
- GUN LAUNCHING DEVICE**
- Gun-launched meteorological sounding system, describing launcher, vehicle, sensor systems and sensitivity [AIAA PAPER 66-382] 12 p1954 A66-24033
- Upper atmospheric wind measurement by gun launched projectiles, computing wind component contour parameters [AIAA PAPER 66-403] 12 p1908 A66-24033
- Large bore gun launched rockets, design and performance 14 p2270 A66-27033
- UHF telemetry system to withstand shock of gun launched vertical sounding probes 16 p2650 A66-30033
- Electronic equipment to withstand cannon firing and extreme underwater depths 19 p3357 A66-35033
- High altitude research project using inch gun for measurement of upper atmospheric wind shear patterns 19 p3340 A66-36033
- Ionospheric winds measurement by luminous trimethyl aluminum trails produced by gun-launched projectiles 24 p4200 A66-42033
- GUNN EFFECT**
- Domain characteristics and crystal properties in materials and configurations Gunn effect devices 01 p0041 A66-10033
- Coherence of Gunn oscillations enhanced by transverse magnetic field for certain applied voltages 03 p0332 A66-12033
- FM by mechanical tuning of cavity setting in gallium arsenide crystals for application to communication system 03 p0332 A66-12033
- Semiconducting materials noting bo

- model, band theory model, uses and Gunn effect 05 p0737 A66-15065
- Coherent current oscillations observed in dark conductive In-doped CdS at 77 and 300 degrees K 06 p0925 A66-16659
- Gunn effect n-type GaAs diode phase locked to stable frequency by injecting CW signal into circuit along with video pulse 06 p0925 A66-16671
- Current instabilities in gallium arsenide, noting oscillation frequency and volt-ampere characteristics 06 p0925 A66-16688
- Gunn effect oscillators including domain formation, microwave source potentialities, power transfer, efficiency, etc 08 p1193 A66-19120
- Behavior of high field instabilities in n-type gallium arsenide, examining device prospects related to phenomenological model for Gunn effect 08 p1270 A66-19122
- Current-voltage characteristics of CW X- and GaAs microwave Gunn generator 11 p1713 A66-23029
- Small-signal impedance of transferred-electron diodes, stable against domain formation 13 p2030 A66-25212
- Noise performance of Gunn microwave generator and noise-power measurements made on Gunn oscillator in X and J band 13 p2030 A66-25221
- Consistency of Gunn effect with excitation of conduction band electrons from high mobility minimum to low mobility valleys 13 p2164 A66-25517
- Gunn effect in gallium arsenide, noting negative differential electron mobility at high electric fields in conduction band 13 p2165 A66-25546
- Gunn effect involving current oscillations higher than 1000 mc in GaAs crystal under applied electric field 14 p2355 A66-26920
- Microwave oscillations in 4 to 31 gc/s frequency range from single Gunn diode 14 p2254 A66-27590
- Intervalley scattering in III-V semiconductors, noting relation to Gunn effect, scattering in GaAs by longitudinal optic phonons, in InP by longitudinal acoustic phonons 16 p2776 A66-30733
- Single trapping center effect on growth of small amplitude space charge waves and propagation velocity, deriving dispersion relations 16 p2781 A66-31216
- Dipole phenomena in n-type GaAs caused by field perturbations, showing conditions for high and low field nucleation 17 p2983 A66-33106
- Current wave form observation in GaAs, using transmission line concept and pulse splitting technique 17 p2983 A66-33109
- Volt-ampere characteristics, electrical resistivity, and pressure effect on Gunn phenomena in n-type GaAs in high electric fields 17 p2985 A66-33292
- Optical modulation in bulk gallium arsenide, using Gunn effect 18 p3152 A66-33606
- Nonuniform motion of high field domains in Gunn effect including steady and nonsteady state properties of formation stage 18 p3077 A66-34076
- Resonant circuit behavior of Gunn diode, considering device as self-pumped parametric oscillator 18 p3078 A66-34086
- Reproducible ohmic contact preparation for high resistivity n-type GaAs in fabrication of Gunn oscillators 19 p3313 A66-35351
- Stable domain propagation for case when electrons have field-independent diffusion coefficient and follow arbitrary static velocity field characteristic exhibiting negative resistivity 19 p3446 A66-36371
- Growth and propagation of electrostatic waves in medium with arbitrary mobility law, solving motion equations, emphasizing case pertinent to Gunn effect 19 p3447 A66-36399
- Microwaves from gallium arsenide excited by impressed voltage 20 p3612 A66-37251
- Upper oscillation frequency limit for Gunn oscillator imposed by finite energy-relaxation time of heated carriers 20 p3527 A66-37449
- Fourier analysis determination of optimum efficiency of cavity-controlled Gunn-effect oscillator when bias voltage is almost two times voltage 20 p3527 A66-37450
- Domain velocity, stability and impedance in Gunn effect, presenting framework for analyzing space-charge waves in two-valley semiconductor 20 p3618 A66-37599
- Gunn oscillations in indium arsenide, measuring electrical properties of diodes, noting current voltage characteristics as function of applied stress 20 p3620 A66-37773
- Carrier motion equation in Gunn diode in terms of average drift velocity and diffusion coefficient 20 p3534 A66-38402
- IR and microwave radiations associated with current controlled instability /negative resistance/ in GaAs, noting Gunn threshold and V-I characteristics 21 p3802 A66-39162
- High power Gunn-effect oscillators constructed from thin epitaxial layers of GaAs, noting relation of drive voltage to frequency, efficiency and power output 22 p3959 A66-39725
- Curve analysis of current instabilities including Gunn effect in n-type gallium arsenide 22 p3961 A66-40045
- Resistivity measurement of large number of samples of bulk-grown n-type GaAs as function of temperature near 300 degrees K 22 p3877 A66-40179
- Semiconductor electronics, Gunn effect in optical communications, electro-optics, optoelectronics and light coupling in microminiaturization 22 p3878 A66-40623
- Continuous current oscillation in GaAs caused by acoustoelectric effect 23 p4112 A66-41296
- Decaying free carrier concentration increase in GaAs when subjected to increased level of drive during first cycle 24 p4253 A66-42370
- Surface pinned layer-like field inhomogeneities in cadmium sulfide, investigating visibility of field layer by corresponding shift of absorption edge, using Franz-Keldysh effect 24 p4254 A66-42427
- GUNNERY TRAINING**
- Instructional System model for meeting USAF maintenance technical training requirements for complying with weapon system requirements 23 p4030 A66-41578
- GUST**
- SA STORM
- SA TURBULENCE
- SA WIND
- Approximate formula for probability density of time lapse between wind gusts 08 p1247 A66-18803
- Gust design procedures based on power spectral techniques, considering atmospheric turbulence with aircraft as rigid body with single degree of freedom [ICAS PAPER 66-11] 23 p4017 A66-42073
- GUST ALLEVIATOR**
- Gust alleviation systems for transport aircraft using linkage, noninteracting and split control 18 p3052 A66-34493
- Pilot protection from aircraft vibration caused by atmospheric turbulence 20 p3508 A66-36997
- GUST LOAD**
- Wind tunnel technique for measuring frequency response of flexible airplane to vertical sinusoidal gusts [AIAA PAPER 65-787] 03 p0438 A66-13071
- Vibration exposure with varying peak and rms acceleration and frequency in low altitude high-speed flight 03 p0329 A66-13355
- French Air Regulation 2054 applicable to sailplanes, considering effect on design speed and gust loads 07 p0989 A66-17822
- Spectral density of vertical wind gusts in clouds calculated, including turbulent energy dissipation rates in cloud strata 09 p1398 A66-19884
- Low altitude turbulence model for aircraft gust load estimation related to meteorological parameters, terrain conditions and height [AIAA PAPER 65-14] 09 p1400 A66-20741
- Load factor estimation for flights in turbulent conditions by replacing exact transfer function with equivalent statistical model 10 p1482 A66-21385
- Statistical research on g-loadings and atmospheric turbulence in field of structural strength limits for sporting gliders 12 p1801 A66-23855
- Relationship between atmospheric gust criteria and performance of supersonic inlet and propulsion [AIAA PAPER 66-367] 12 p1801 A66-24495
- YS-11 transport aircraft fatigue testing, noting wing fatigue damage and equipment used 13 p2197 A66-26099
- Defining fatigue load environment for business aircraft [SAE PAPER 660215] 13 p2199 A66-26392
- Aircraft design for gust loads encounter based on power spectral results 14 p2405 A66-27995
- Wing penetration into zone of sharply localized gust, deriving equations for forces and moments acting on wing 16 p2630 A66-31292
- Low altitude high-speed flight from standpoint of structural loads, particularly those resulting from gust encounters 19 p3278 A66-35505
- FAA safety research on aircraft reliability, discussing power spectral gust design, structural strength, turbine performance and lightning strike effects 20 p3540 A66-36992
- GUTENBERG MODEL**
- Spheroidal-type seismogram study of wave generation, propagation, dispersion and attenuation in realistic spherical Earth models, especially Gutenberg-Bullen A-prime model 20 p3550 A66-37433
- GYRATION**
- S ROTATION**
- GYRATOR**
- Gyrator circuit with only three transistors designed by providing active feedback path so that circuit behaves like two-way feedback system 02 p0201 A66-11908
- Network containing only two gyrators and two capacitors sufficient to synthesize given positive real driving-point function 02 p0209 A66-11913
- Gyrator realization, discussing impedance/frequency characteristics of transistor circuit used 18 p3078 A66-34079
- Direct-coupled gyrator suitable for integrated circuits and time variation 20 p3527 A66-37447
- High-quality transistorized gyrator for integration 20 p3528 A66-37455
- GYRO**
- S GYROSCOPE**
- GYRO HORIZON**
- Error of two-rotor gyrohorizon compass caused by hydraulic damper during stop or steady motion 24 p4210 A66-42447
- GYRO-STABILIZED**
- Comparison of differentiating and integrating correction circuits for stability of forced gyrostabilizers for high value of amplification coefficient 02 p0226 A66-11313
- Permanent axes of rotation for gyrostabilizer under influence of forces depending only on position of gyrostabilizer 07 p1035 A66-18191
- Stabilization of gyrostabilizer using motion equations as given by Volterra 07 p1035 A66-18193
- Operation and structural components of inertial navigation system, noting accelerometers, gyroscopic platform stabilizers, error effect, etc 13 p2123 A66-25138
- Optimum stability of body with fixed point, using stabilizing gyros 13 p2127 A66-25627
- Motion of constant relative kinetic motion gyrostabilizer through force field 15 p2502 A66-29337
- Gyro-stabilized heliostat for airborne astronomy noting design principles, achieved stability, servoloop and mechanical system 16 p2705 A66-30824
- Gyro-stabilized airborne solar eclipse spectrograph, noting wavelength range, dispersion accuracy, guidance mechanism, etc 16 p2705 A66-30825
- Russian monograph on gyroscopic stabilizer theory and error assessment 17 p2925 A66-32567
- Stability of particular solution to gyrostabilizer motion in Newtonian central force field 20 p3604 A66-38424
- GYROCOMPASS**
- Response of inertial platform in orbital gyrocompass mode studied for satellite vehicle [AIAA PAPER 64-238] 03 p0369 A66-12736
- Single rotor correctable gyrocompass in form of astatic gyroscope 07 p1032 A66-17622
- Serviceability and accuracy of Sperry C-12

compass system on Boeing 707-320C aircraft from June to October 07 p1065 A66-17673

Grid navigation method, employing Mercator chart, is suitable for high latitudes and supersonic aircraft 07 p1066 A66-17683

Position-attitude-true-heading-steering navigation system noting accuracy, reliability, maintenance, operational requirements and functional features 07 p1070 A66-17720

Compass performance improvement, discussing Sperry C-12 compass system accuracy, operational features, etc 07 p1033 A66-17721

Flight trials of Bendix/Elliott Polar Path compass, discussing accuracy, stability, performance and weakness 07 p1033 A66-17758

Interplanetary trajectory adaptive gyrocompass system, discussing orbital angular velocity, angular acceleration, error sensitivity coefficients, error sources, etc 13 p2124 A66-25256

Compensation for error resulting from inclination of frame of gyrocompass with elastic recovery moment, based on shifting of gravity center along major axis 14 p2294 A66-27363

Stability of gyrocompass investigated by linear mechanics methods 17 p2958 A66-32606

Third-order orbital gyrocompass horizontal and vertical damping techniques to eliminate gyro and bias errors in horizon sensor 18 p3110 A66-33828

Linear filtering technique for estimation of azimuth alignment of inertial guidance system in presence of disturbances with no measurement noise 19 p3398 A66-36689

Mechanization of vectorial equations by means of four-gimbal platform and speed sensor for automatic setting of hybrid inertial systems 20 p3597 A66-37395

Effect of vibration of base on indications of gyrocompass extended to include LF sinusoidal displacements of base corresponding to rocking motion, noting free play effect, gyro drift and vertical moment 21 p3738 A66-38989

Inertial navigation for civil airline operations, noting azimuth alignment made by automatic gyrocompassing [ICAS PAPER 66-6] 22 p3946 A66-40677

Error of two-rotor gyrohorizon compass caused by hydraulic damper during stop or steady motion 24 p4210 A66-42447

IMU/inertial measurement unit/gyrocompass as attitude reference in space 24 p4214 A66-42955

## GYROELECTRICITY

Gyroelectric and gyromagnetic rectangular waveguides compared for cases of electrostatic and magnetostatic fields transverse to EM wave propagation direction 19 p3317 A66-35719

## GYROINTERACTION

Plasma and electron gyroresonance effects on admittance of RF plasma probe surrounded by ion sheath 09 p1381 A66-20373

Wave propagation during gyroresonance interaction, noting nonlongitudinal characteristics of waves generated in magnetosphere between beams of charged particles 13 p2072 A66-25462

## GYROMAGNETISM

Lossless multiconductor transmission line model extended for description of gyromagnetic coupling effects 06 p0846 A66-16094

Flight trials of Bendix/Elliott Polar Path compass, discussing accuracy, stability, performance and weakness 07 p1033 A66-17758

Optical pumping of rubidium atoms, treating oriented atoms as magnetized macroscopic gyroscope 18 p3120 A66-35029

Gyroelectric and gyromagnetic rectangular waveguides compared for cases of electrostatic and magnetostatic fields transverse to EM wave propagation direction 19 p3317 A66-35719

Behavior of transverse wave numbers/separation constant/ for electromagnetic wave propagation in anisotropic homogeneous cold plasma of arbitrary cross section 20 p3608 A66-37454

## GYROSCOPE

## SA ATTITUDE GYRO

## SA ELECTRICALLY SUSPENDED GYROSCOPE /ESG/

## SA ELECTROSTATIC GYROSCOPE

## SA FLUID ROTOR GYROSCOPE

## SA ROTOR GYROSCOPE

Accelerometers and gyroscopes tested underground, discussing ground motion attenuation with depth investigated in Deep-Hole program 01 p0051 A66-10038

Inertial-grade gyroscope theory and application, noting two-degree and single degree of freedom gyros, reference frames and gyrocompasses 01 p0067 A66-10488

Navigation gyro design with respect to cost factors noting electrically suspended, gas bearing and other types 01 p0104 A66-10676

North-seeking rate gyroscope design with variable gain amplifier control of housing 01 p0070 A66-10877

Satellite guidance system using star-field locating sensor with gyrating masses controlled by centrifugal and gravitational force interaction 02 p0256 A66-11984

Rate gyros with various vibrating shafts and frequencies 03 p0368 A66-12499

Theory of aircraft measurement of gravity using gyroplatform, ideal gimbal suspension and three orthogonal string sensors, deriving formula for unperturbed gravity value, discussing perturbation measurement errors 03 p0366 A66-12991

Inertial navigation and accelerometers deriving law of gyroscopics, noting design of gyroscopes like ball and gas bearings, gimbal suspension, electrostatic, laser, etc 04 p0543 A66-13362

Geocentric pendular control for detection of direction of terrestrial field 05 p0713 A66-15414

Book on motion theory of several coupled rigid bodies about fixed point, particularly gyroscope and gyrostat in Cardan suspension 06 p0910 A66-17067

Gyroscopes, accelerometers and error sources in inertial navigation systems 08 p1249 A66-19056

Pulsed-torqued gyroscopes with nonlinear characteristics and quantized sampled-data signals, determining theoretical performance 08 p1224 A66-19489

Accelerated coincidence of gyro servocontrol system at discrete moments of time with values of target coordinates 08 p1254 A66-19678

Aerodynamic drag moment of gyromotor operating in air, comparing calculated and experimental data 09 p1379 A66-20306

Motion of suspension axis of integrating gyro with dry friction, mounted on oscillating base 09 p1379 A66-20307

Book on dynamic and static balancing of rotating machine parts and devices, particularly gyroscopes, noting effect on bearings, vibration causes, etc 09 p1383 A66-20915

Spin axis orientation of spherical free gyroscope determined by using phosphorescent coating on rotor 10 p1536 A66-21861

Operational characteristics of LC tuned solid state static inverter used as power supply in autopilot gyros of Titan rockets, noting power oscillator circuit 12 p1804 A66-24661

Inertial gyroscope and accelerometer design and components 13 p2076 A66-25127

Orion Inertial Navigation System, detailing accelerometers, gyroscopes, computers, components, maintenance, operation, etc 13 p2125 A66-26575

Motion of gyroscope with variable moments of inertia on movable base, deriving motion equations 14 p2291 A66-27165

Nonlinear gyroscopic system equations solved by analog computer and verified through method of harmonic linearization 14 p2294 A66-27362

Gyroscopic device design for determining integral direction of aerodynamic moment vector, noting system and block diagrams 14 p2294 A66-27365

Theory of aircraft measurement of gravity using gyroplatform, ideal gimbal suspension and three orthogonal string sensors, deriving formula for unperturbed gravity value, discussing perturbation measurement errors 15 p2483 A66-28666

Free gyroscope motion as affected by dry

friction and free and forced oscillation 15 p2541 A66-29101

Development of theory of gyrocompass, gyrohorizons and gyroverticals 15 p2502 A66-29101

Orbital rendezvous, stressing necessity measuring absolute angular velocity of line of sight connecting two vehicles, noting details on gyroscopes, coupling, optimization, etc 16 p2743 A66-30303

Sensor threshold definitions applied to gyros, comparing old and new AIA specifications, noting threshold definition, relation to flight control system malfunctions 16 p2708 A66-31401

Motion of gyroscope in gimbal suspension 17 p2958 A66-32606

Natural oscillation frequency of gyro mounted in torsional suspension, taking into account moments of inertia of sensitive element 17 p2926 A66-32606

Inertial navigation system theory that uses increased numbers of newtonometers for measuring devices/ in place of gyroscopic sensitive elements 17 p2926 A66-32606

Forced oscillations of gyroscopic tachometer with dry friction analyzed Zhelezov theorems 17 p2928 A66-33401

Gyrochamber radial rigidity effect amplitudes of forced oscillations gyroscope with dynamically unbalanced rotor 17 p2928 A66-33401

Slew plane technique for locating two gyro input axes without removing platform from test vehicle and with limited optical access 18 p3133 A66-34001

Optimum control theory applied shipboard inertial navigation systems with position and azimuth errors because gyroscope drift-rate fluctuations 20 p3595 A66-36689

Accelerated coincidence of gyro servocontrol system at discrete moments of time with values of target coordinates 20 p3597 A66-37395

V-gyro pair as dual-rate sensor, examining gimbal equations for gyros 21 p3736 A66-38989

Strapdown inertial sensor configuration based on time modulated torquing approach in gyro and accelerometer readout 21 p3764 A66-38989

Elimination of rate gyro angular acceleration error and scale factor sensitivity to wheel speed by integration output signal 21 p3767 A66-38989

Navigation gyroscopes design principles examining effects of friction in suspension system and other gyroscopic drift causes 22 p3917 A66-40677

Monograph on theory of gyroscopic instruments and devices 23 p4066 A66-41001

Magnetic field rapidly reversed in short superconducting coil by subjecting coil to increasing external reverse field 24 p4216 A66-42955

## GYROSCOPE FLOTATION

Floated inertial platform, gimballess attitude device utilizing floated sphere to isolate inertial components from acceleration and vibration environments 01 p0099 A66-10038

Float-cocking phenomenon in single-axis floated gyroscopes caused by impressing angular velocity on sensible radial compliance 01 p0068 A66-10038

Statistical characteristics of angular drift velocity of gyrostabilizer employing floated gyroscopes 01 p0068 A66-10038

Statistical characteristics of angular drift velocity of gyrostabilizer employing floated gyroscopes 11 p1705 A66-22401

Stable equilibrium position of axis of rotation of cylinder in rotating chamber filled with one or two liquids 17 p2928 A66-32606

Floating vibratory gyroscope having enhanced sensitivity to angular velocity 21 p3739 A66-39001

Analysis of perfect frictionless suspension of rotating body with two degrees of freedom mounted on rotating shaft of spin axis deflection [AIAA PAPER 65-435] 23 p4066 A66-41001

Gyroscopic dynamics for obliquity in gimbal axes noting free motion, nutation and drift rate 23 p4071 A66-41001

# GYROSCOPIC COUPLING

Elimination of coupling error between gyroscope and platform, considering rate-integrating gyros with inertial platform 09 p1382 A66-20563  
Circuit theory reciprocity theorem for dynamic linear systems with gyroscopic coupling for steady state response 12 p1912 A66-23611  
Combined effect of horizontal and vertical accelerations on gravimeter readings mounted on gyroplatform or in Cardan suspension 14 p2297 A66-28111  
Combined effect of horizontal and vertical accelerations on gravimeter readings mounted on gyroplatform or in Cardan suspension 24 p4212 A66-42699

# GYROSCOPIC DRIFT

Statistical characteristics of angular drift velocity of gyrostabilizer employing floating gyroscopes 01 p0068 A66-10710  
Preflight checking of aircraft gyroscopes and accelerometers noting built-in spin detection, torque generator and gimbal check 01 p0070 A66-10956  
Corrections for apparent drift rate of free ideal directional gyroscope due to Earth rotation 02 p0290 A66-11986  
Drift of free gyro with variable kinetic moment under constant overloads, noting gyro departure from initial position relative to inner and outer gimbal axes when gravity center shifts along axis 09 p1379 A66-20305  
Statistical characteristics of angular drift velocity of gyrostabilizer employing floating gyroscopes 11 p1705 A66-22625  
Effect of small periodic moment applied to axis of inner gimbal on gyro drift when gyro is mounted on base fluctuating about two mutually perpendicular axes 13 p2082 A66-26458  
Gyro drifts in Cardan suspension with mobile base, determining angle of rotation 17 p2926 A66-32798  
Inertial navigation system performance and self-test capability, noting errors from gyro drift 17 p2954 A66-33217  
Inertial sensor performance degradation in strapped-down environment, noting gyro drift error and accelerometer bias 21 p3763 A66-38839  
Spacecraft attitude reference system using passive temperature control device and four gyros in skewed position 21 p3764 A66-38853  
Inertial platform test station for shipboard maintenance and calibration of platform used in A6A and E2A aircraft, examining accelerometer bias and gyro drift tests 21 p3723 A66-38889  
Astatic gyroscope in rotating Cardan suspension and drifts due to angular oscillations of base 21 p3737 A66-38969  
Effect of random fluctuations of voltage and frequency of gyrorotor feed current on change in rotor angular velocity, noting gyro drift 21 p3738 A66-38970  
Effect of vibration of base on indications of gyrocompass extended to include LF sinusoidal displacements of base corresponding to rocking motion, noting free play effect, gyro drift and vertical moment 21 p3738 A66-38989  
First-order Markovian gyro drift numerically evaluated and square root plotted vs interval and gyro correlation time 23 p4068 A66-41318  
Free and forced vibration effect on drift of gyroscope supported in gimbals 23 p4071 A66-41981

# GYROSCOPIC PENDULUM

Nonperturbability of direction of axis of gyropendulum toward center of attraction with respect to motion of bearing point 07 p1031 A66-17407  
Oscillatory motion of pendulum-gyroscope system near given position of relative stability 07 p1035 A66-18192

# GYROSCOPIC STABILITY

Motion stability of gyroscopic and physical pendulums on unstable base 01 p0067 A66-10459  
Inertial system using gyros and accelerometers, determining autonomously plant curvilinear coordinates and plant space orientation parameter 02 p0260 A66-12168  
Three-phase supply stable in amplitude and frequency as wheel power supply for inertial quality gyroscope 03 p0340 A66-12494

Control problems associated with stable platforms using single-axis integrating gyroscopes including axes design, drift due to vibration and compensation 03 p0390 A66-12533  
High stability control circuit operating tuning fork in constant amplitude self-excitation circuit, using mechanical oscillator excited by fundamental wave of amplified feedback voltage 03 p0371 A66-13243  
Stability of 3-axis stabilizing platform as function of distribution of gyro units 04 p0518 A66-13568  
Stability of two-rotor gyrocompass with properties differing from those of Geckeler-Anschutz compass 04 p0518 A66-13569  
Two-gyro platforms are less stable than single-gyro platforms 06 p0879 A66-16344  
Elastic properties of bearing elements of gyrotachometer and effect on frequency of oscillations 07 p1031 A66-17409  
Harmful oscillation elimination from high rpm gyroscopic centrifuge by introducing one elastic bearing into dynamic system 08 p1307 A66-18877  
Motion stability of gyroscope in universal suspension with spring restraints and damper in gravitational field extended to include Newtonian central force field 08 p1226 A66-19582  
Equations of motion of gyrostabilizer having fixed point and gyrostabilizer rotating about fixed point in Newtonian force field 08 p1227 A66-19761  
Necessary conditions for existence of univalent integrals in equations of motion of heavy gyrostabilizer fixed at one point 08 p1227 A66-19762  
Two-gyro platforms are less stable than single-gyro platforms 11 p1704 A66-22341  
Satellite providing optimum communications to military users, noting gyroscopic stabilization of antennas, major characteristics, etc [ATAA PAPER 66-267] 12 p1955 A66-24740  
Orbit precession effect on gyroscopic stabilization of satellite in geomagnetic field 14 p2391 A66-27473  
Motion equations and simulation of spin-stabilized interplanetary spacecraft closed-loop pitch control system, using low-thrust gas jet torquers with rate gyro sensors 14 p2392 A66-27881  
Spin angular velocity stability of gyroscope with incompressible fluid-filled cavity as function of three degrees of freedom 14 p2277 A66-28051  
Routh theorem describing motion stability of holonomic systems applied to nonholonomic systems, specifically Bobylov spherical gyroscope 14 p2297 A66-28062  
Gyroscope motion on randomly shifting support described by linear inhomogeneous differential equation 14 p2297 A66-28064  
Gyroscopic stabilization of relative equilibrium of satellite 15 p2605 A66-28489  
Dissipative gyroscopic force effects on mechanical system, noting necessary and sufficient conditions for stability and controllability 15 p2537 A66-28949  
Oscillations, gyroscopes, theory of mechanisms, fluid and gas mechanics - All-Union Conference, Moscow, January-February 1964 15 p2540 A66-29160  
Gyroscopic system motion under random forces effect 15 p2541 A66-29172  
Stability of gyroscopes, gyrostabilizers and gyroscopic systems treated by methods of Liapunov and Chetaev 15 p2542 A66-29173  
Relativistic precession measurement using satellite as precise orbiting gyroscope [ATAA PAPER 65-36] 17 p3001 A66-32450  
Gyroscopic rotor vibrations excited by effect of lubrication layer in sliding bearings and stabilized with intervening elastodamping supports, taking into account moment of inertia of rotor 17 p3027 A66-32605  
Stability of gyrocompass investigated by linear mechanics methods 17 p2958 A66-32606  
Rotational motion analysis, considering two distinct laws governing behavior of spinning body and obtaining total motion by superposition of vectorial movements due to laws 18 p3134 A66-33588  
Twin-gyro system for satellite stabilization, eliminating disruptive cross-coupling effects

and changing gyro speed without distributing satellite attitude 19 p3468 A66-35628  
Control moment gyroscope for angular momentum transfer with minimum power consumption, noting design and application for free body motion stabilization 19 p3360 A66-35962  
Motion of arbitrary gyrostabilizer in central Newtonian force field, applying Liapunov stability conditions for regular precession 19 p3362 A66-36841  
Semipassive two-gyroscope damper for countering high angular rates of Earth-pointing satellites 20 p3659 A66-36868  
Gyro and accelerometer errors in ternary torqued inertial components mounted on surface to surface missile, noting angular vibration environment 21 p3764 A66-38848  
Motion stability of version of Cardan suspension gyro 21 p3738 A66-38988  
Friction and imbalance moments relative to gimbal axes and effects on gyrovertical motion under starting conditions 21 p3739 A66-39325  
Gyro in Cardan suspension, discussing stability criteria for rotations about largest or smallest moment of inertia 22 p3947 A66-39695  
Conservative systems motion stability, generalizing precession and nutation of gyroscope with respect to noncyclic coordinate 22 p3948 A66-40681  
Inertial measurement unit and pulse torquing of Apollo spacecraft, noting components and operation [AGARDOGRAPH 105] 24 p4215 A66-43126  
**GYROTROPIC MEDIUM**  
Gyrotropic properties in simple and canted two-sublattice antiferromagnetics in small static magnetic field 01 p0122 A66-10569  
Nanosecond electromagnetic pulse dispersion in longitudinally magnetized plasma confined in coaxial transmission line 06 p0826 A66-16026  
Oblique incidence on plane boundary between two general gyrotropic plasma media, evaluating reflection and transmission coefficients 06 p0913 A66-16132  
Coupled wave equation for homogeneous gyrotropic compressible warm plasma derived, using partial differential equations 14 p2340 A66-27037  
Wave equation for inhomogeneous isotropic hot plasma 14 p2340 A66-27044  
Magnetoionic couplings and electromagnetic wave propagation in horizontally stratified layer of gyrotropic medium 14 p2283 A66-27125  
Passage of normal plane electromagnetic wave through bi-gyrotropic plate, examining transmission and reflection components 22 p3862 A66-39828

# H

# H-ALPHA LINE

Ratio of average transmission coefficients of L-beta and H-alpha and reabsorption in hydrogen pulsed discharge 01 p0111 A66-10390  
Spicules of solar chromospheric disk identified in H-alpha line 02 p0292 A66-12190  
Fabry-Perot fine etalon in astronomical use such as H-alpha emission line profile measurement 05 p0681 A66-15213  
H-alpha double limb observed in spectroheliograms is instrumental and not solar phenomenon 09 p1455 A66-20404  
Hydrogen-alpha solar limb patrol providing photographic record of observable prominences 11 p1776 A66-23427  
Photometric measurements of solar flares and prominences for central intensities in hydrogen alpha 16 p2804 A66-31397  
Flare observations in H-alpha line, line and continuous spectra of flares, and optical characteristics of proton flares 17 p2993 A66-32364  
Grid computations of model atmospheres for A-type stars, considering effects of Balmer-line blanketing 18 p3227 A66-33762  
Diffusion emission of solar prominences in hydrogen alpha Balmer line, noting luminescence due to resonance scattering of solar emission 23 p4126 A66-41073

## H-BETA LINE

Electron concentration in AC carbon arc determined from H-beta linewidth 11 p1748 A66-23416  
 Reproduction of experimental and calculation of theoretical H-beta emission profile of solar flare, considering macroscopic motions inside flare 16 p2795 A66-31391

## H-WAVE

Electromagnetic H-wave propagation of given frequency along plasma sheet surrounded by vacuum 01 p0030 A66-10697  
 Elliptical waveguide for H-11 modes transmittance, expressed as power transmission along waveguide and square of electric field maximum value 02 p0196 A66-11417  
 Propagation in anisotropic radially stratified circular waveguides 08 p1198 A66-19749  
 Coefficient of reflection of H-11 mode shock wave emitted from aperture of circular waveguide with infinite flange 09 p1344 A66-20347  
 Reflection factors and wave amplitudes of diffraction spectra for incidence of H-p, 0 waves onto inductive obstacles in rectangular waveguides 09 p1358 A66-20808  
 Eigenvalues and dispersion equations for magnetic and electric symmetric waves in circular multislot waveguides 09 p1358 A66-20809  
 Charged particle radial distribution determination as function of amplitude of HF magnetic field, using diffusion in discharge induced by HF traveling H-wave 10 p1570 A66-21998  
 Electromagnetic H-wave propagation of given frequency along plasma sheet surrounded by vacuum 11 p1658 A66-23299  
 Ferrite controlled polarization of slot radiator by rectangular waveguide excited by H10 wave 14 p2252 A66-27252  
 H-plane bifurcation of parallel plate waveguide filled with anisotropic plasma 15 p2457 A66-28597  
 Reflection of aperiodically damped H-01 and E-01 waves of tapered waveguide used in Vernier autotracking 15 p2467 A66-29764  
 Slot filters for H waves in circular waveguide 17 p2879 A66-31863  
 Charged particle radial distribution determination as function of amplitude of HF magnetic field, using diffusion in discharge induced by HF traveling H-wave 18 p3151 A66-34975  
 H-type surface wave propagation in rectangular waveguide having wall consisting of transversely magnetized ferrite plate 19 p3313 A66-35456

## HAFNIUM

Hall effect on hafnium paramagnetic susceptibility at room and cryogenic temperature 05 p0699 A66-14687  
 Extension of electron gas model to transition metals /titanium, zirconium, hafnium/, considering atom interaction up to fourth neighbor 10 p1548 A66-21664  
 Depressing effect of hafnium and zirconium on work function of tungsten, tantalum, niobium and rhenium 14 p2314 A66-27369  
 Oxidation of powdered titanium, zirconium, hafnium, vanadium, niobium and tantalum 16 p2724 A66-31355

## HAFNIUM ALLOY

Decrease in work function of W-Hf system caused by formation of alloy with better emission properties than those of hafnium 02 p0270 A66-11425  
 High temperature oxidation-resistant hafnium tantalum alloys, noting phase composition 14 p2315 A66-27501

## HAFNIUM CARBIDE

X-ray measurements of thermal expansion of arc-cast carbides of titanium, zirconium and hafnium 03 p0381 A66-12636

## HALF-PLANE

Energy propagation lines in diffraction of vertically polarized electromagnetic wave by conducting half-plane shield 14 p2241 A66-27939  
 Diffraction by conducting half-plane in plasma 17 p2876 A66-33427

## HALF-SPACE

Five-year measurements of circumglobal radiation and of short wave radiation from

lateral half-spaces 02 p0220 A66-11258  
 Poisson pseudokernel and pseudodifferential operators on manifold with boundary 05 p0708 A66-15093  
 Reducing values of potential magnetic or gravitational field observed on Earth surface with weak profile to values on single horizontal plane in lower half-space 06 p0876 A66-16417  
 Shock wave propagation in lower half-space filled with compressible fluid 07 p1026 A66-18256  
 Dynamic problems of transversely isotropic half-space and elastic layer, solving contact and boundary value problems 08 p1315 A66-19708  
 Nonseparated flow of finite conductivity fluid past half-body with flow branching 13 p2067 A66-26534  
 Unique absolutely continuous extensions of strict solutions to first-order nonlinear partial differential equations, satisfying these equations at almost all points of half-space 15 p2527 A66-29060  
 Viscoelastic half-space problems with noncommutative operators including solution for equilibrium equation 22 p3989 A66-39821  
 Axisymmetric problems of heat conductivity theory for layer with one constant boundary and one circular boundary solved by paired integral equations method 22 p4000 A66-40571

## HALIDE

SA ALKALI HALIDE  
 SA BROMIDE  
 SA CHLORIDE  
 SA FLUORIDE  
 SA IODIDE  
 SA METAL HALIDE  
 SA OXYHALIDE  
 CW IR laser oscillation in HBr and HI gas discharge 06 p0892 A66-16756  
 Corrosion mechanism for eutectic or near-eutectic Mg-Zn alloys in halide solution 13 p2110 A66-26026  
 Emission spectroscopy of halides of carbon, silicon and boron in plasma reactor 16 p2763 A66-31190  
 Halides used as burning rate depressants on combustion stability of polyurethane/ammonium perchlorate base propellants, examining acoustic instability 23 p4119 A66-41435

## HALL ACCELERATOR

Faraday type MHD accelerator with series connected electrodes investigated by employing external jumpers 03 p0399 A66-12808  
 Variation of electron temperature and number density, ion current density and plasma potential through low density Hall current ion accelerator as function of magnetic field strength [AIAA PAPER 66-76] 08 p1262 A66-18994  
 Varying instability frequency in simulated arc jet-Hall accelerator [AIAA PAPER 66-156] 10 p1559 A66-21422  
 Langmuir probe velocity and acceleration measurements for coaxial Hall accelerators [AIAA PAPER 66-196] 10 p1562 A66-21441  
 Performance capabilities of Hall current accelerators determined from parameters influencing anode power loss [AIAA PAPER 66-201] 10 p1563 A66-21443  
 Effect of mass entrainment from vacuum tank and electrode erosion on plasma velocity determined from mass flow and thrust of Hall accelerator [AIAA PAPER 65-297] 18 p3147 A66-34585  
 High performance annular Hall-current accelerator using radial magnetic field and axial electric field with cesium as propellant [AIAA PAPER 65-300] 19 p3450 A66-35614

## HALL EFFECT

Van der Pauw method for measuring resistivity, Hall mobility and thickness of thin metallic film under vacuum, considering copper films 01 p0119 A66-10393  
 Temperature dependence of electric conductivity and Hall effect of single crystal cadmium tin arsenide 01 p0126 A66-11026  
 Plasma flow described by dimensionless similarity parameter characterized by relative independence of ion and electron components 01 p0116 A66-11191  
 N-type conductive cadmium selenide single crystals investigated for heat treatment and Hall effects in selenium

vapor 01 p0127 A66-111  
 Hall currents effect during acceleration plasma intrinsic magnetic field 02 p0264 A66-113  
 Electrical resistivity, Hall effect a magnetoresistance of bismuth antimony single crystal solid solutions 02 p0272 A66-117  
 Electrical conductivity, Hall effect a thermoelectric power as function temperature in CdSb single crystals strongly doped with silver 02 p0275 A66-118  
 Temperature dependence of surface conductivity and Hall effect in germanium alloyed with gold 02 p0276 A66-120  
 Motion of vortex lines in superconductors noting dissipation and viscosity, Hall effect and effective mass 03 p0411 A66-131  
 AC technique for Hall effect measurements in low mobility semiconductor 03 p0371 A66-132  
 Hall effect in thin polycrystalline evaporated bismuth films obtained sublimation under very hard vacuum 04 p0567 A66-143  
 Hall effect of bismuth evaporated film discussing structural dependence of sign a magnitude, effects of pathlength, impurity, gas adsorption and experimental techniques 05 p0729 A66-145  
 Hall effect on hafnium paramagnetic susceptibility at room and cryogenic temperature 05 p0699 A66-146  
 Radiation damage of p-type silicon investigated by Hall effect, noting dislocation density and annealing behavior 05 p0735 A66-148  
 Optimum electrode arrangement in MIM channel, taking into account Hall effect 05 p0722 A66-145  
 Boundary layer solutions for Rayleigh problem in MGD with Hall effect, using Karman-Pohlhausen technique 05 p0728 A66-157  
 Electron drift velocity and mobility in indium antimonide obtained from pulse measurements of conductivity and Hall effect at various temperatures 06 p0922 A66-161  
 Hall effect and conductivity measurements of carrier removal rate in oriented specimens of n-type Si under electron irradiation at energies from 0.3 to 1.0 mev 06 p0930 A66-170  
 Current oscillations accompanied by mobility regions in high resistance gallium arsenide subjected to electric field, measurement of Hall effect shows these regions are of high resistance 06 p0930 A66-170  
 Radiation damage in nondegenerate germanium at low temperatures, using Hall carrier technique for measuring resistivity and Hall coefficient on antimonide dopants 06 p0932 A66-171  
 Hall effect and resistivity measurements on high resistance n-silicon related formation conditions at low temperature level placed at 160 mev from conductivity band 06 p0935 A66-171  
 Longitudinal and transverse voltages superconductors, noting Hall effect, resistivity and functional relation to applied magnetic field 06 p0940 A66-171  
 Electron energy levels in CdS single crystals from Hall effect, conductivity and space-charge-limited current measurements 07 p1098 A66-177  
 Hall constant of semiconductors noting dependence on specimen size, film area, current electrode parameters 07 p1100 A66-179  
 Hall current and Hall drift velocity single crystal indium antimonide under electric and magnetic field 07 p1103 A66-182  
 Open circuit voltage, inner resistance, Hall voltage and tensorial conductivity of Faraday generator, using conformal mapping for single pair of electrodes 07 p0993 A66-183  
 Hall effect in two-dimensional flow conducting gas interacting with external inhomogeneous magnetic field along insulating plane 08 p1205 A66-185  
 Galvanomagnetic effects in semiconductor including Hall effect and magnetoresistivity noting influence of carrier scattering lattice vibrations and

- impurities 08 p1267 A66-18607
- Power characteristics of linear 08 p1267 A66-18607
- Axisymmetric flow of ideal incompressible 08 p1267 A66-18607
- conducting gas with Hall effect in two- 08 p1267 A66-18607
- component magnetic field 08 p1168 A66-18863
- Electron spin effect on quantum 08 p1267 A66-18607
- oscillations of magnetoresistance and Hall 08 p1267 A66-18607
- effect in n-InSb single 08 p1267 A66-18607
- crystal 08 p1269 A66-18971
- Lorentz force maximization in continuous- 08 p1269 A66-18971
- flow Hall current plasma accelerators, using 08 p1269 A66-18971
- other axial electric field and radial 08 p1269 A66-18971
- magnetic field or radial electric field and 08 p1269 A66-18971
- lanted magnetic field 08 p1263 A66-19154
- Hall effect measured by splitting 08 p1263 A66-19154
- alternating voltage produced in Hall circuit 08 p1263 A66-19154
- into two components, one with phase 08 p1263 A66-19154
- inciding with Hall emf and other with 08 p1263 A66-19154
- phase departing by 90 08 p1263 A66-19154
- degrees 08 p1273 A66-19289
- Hall effect B-H loop recorder for thin 08 p1273 A66-19289
- magnetic films 08 p1224 A66-19297
- P-type cadmium tin arsenide crystals, 08 p1224 A66-19297
- plotting temperature dependences of 08 p1224 A66-19297
- specific electroconductivity, Hall coefficient 08 p1224 A66-19297
- and thermal electromotive 08 p1224 A66-19297
- force 08 p1277 A66-19622
- Computation and measurement of Hall 08 p1277 A66-19622
- potentials and flow field perturbations in 08 p1277 A66-19622
- GD flow of axisymmetric free 08 p1277 A66-19622
- jet 08 p1266 A66-19815
- Hall effect, thermal emf and electrical 08 p1266 A66-19815

Electron-hole conductivity effect on temperature variations of Hall coefficient and Nernst-Ettingshausen effect in semiconductor 17 p2986 A66-33309

Negative temperature coefficient of electrical resistance, anomalous Hall constant and magnetoresistance constant for thin films of Be and Pb 18 p3157 A66-34627

Galvanomagnetic effect in ferromagnetic metals, developing theory of planar Hall effect in terms of spin-orbit interaction of electrons 18 p3158 A66-34682

Optimum MHD generators using anisotropic plasma, discussing conducting-gas MHD flow, Hall effect, ion slip effect, etc 18 p3152 A66-35075

Quantum oscillations in magnetoresistance, Hall coefficient and thermoelectric power in strong transverse and longitudinal magnetic fields for n-InAs polycrystals at liquid helium temperature 19 p3438 A66-35479

Hall effect influence on steady hypersonic flow of inviscid compressible gas past wedge 19 p3275 A66-35736

Hall effect in alloyed crystals of n-type indium antimonide 19 p3441 A66-35779

Resonant frequency of helicon waves in indium, deriving high field Hall coefficient 19 p3445 A66-36331

Electrical resistance and Hall effect measurements in layer structures, confirming existence of interaction with optical relaxation vibration modes 19 p3446 A66-36343

Conductivity, temperature dependence, thermal emf Hall constant, thermal conductivity and resistivity of aluminides of transition metals 20 p3584 A66-37417

Dependence of Hall effect and conductivity of irradiated samples on reciprocal temperature in nuclear transmutations produced in InSb by bombardment with slow neutrons 20 p3617 A66-37485

Quantum oscillation of transverse and longitudinal magnetothermal emf in n-type indium antimonide compared with oscillations of transverse and longitudinal magnetoresistance and Hall coefficient 20 p3618 A66-37557

Phenomenological theory of longitudinal Hall effect in cubic crystals, assuming anisotropic dispersion law and tensorial relaxation time 20 p3618 A66-37560

Nonequilibrium ionization phenomena interaction with nonuniform flow of plasma, reviewing nonequilibrium characteristics for uniform flow with electric and magnetic fields 20 p3610 A66-37982

Two-dimensional problem of current distribution on surface of permeable electrodes adjacent to flow of conducting medium under Hall effect 20 p3611 A66-38110

Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 20 p3624 A66-38427

Electron scattering mechanism in compensated gallium arsenide determined from Hall effect, Nernst-Ettingshausen effect and reluctance 21 p3798 A66-38914

Quantum oscillations of Hall effect and longitudinal and transverse reluctance in n-indium antimonide, noting spin splitting and temperature and electron concentration effect on oscillation maximum 21 p3799 A66-38924

Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 21 p3800 A66-38960

N-type Ge hot carrier Hall mobility, magnetoresistance, Maxwellian energy distribution, electron-electron and intervalley electron-phonon collisions 21 p3801 A66-38997

Galvanomagnetic effects in p-type aluminum antimonide, discussing field dependence of Hall effect and magnetoresistance 21 p3801 A66-38999

Stationary nonviscous plane flow of conducting plasma in narrow channel subject to transverse magnetic field and Hall effect, using sectionized electrodes, noting boundary layer near anode 21 p3793 A66-39407

Resistivity and Hall coefficient of Sb doped Ge at He temperatures measured as function of magnetic field and temperature

to determine high field effects on impurity conduction 21 p3805 A66-39579

Hall effect in poly-n-vinylcarbazole-iodine charge-transfer complex, noting sign discrepancy of majority carrier 22 p3963 A66-40109

Rayleigh-Taylor instability of plasma is unaffected by inclusion of Hall current and electron-inertia terms in generalized Ohm law 22 p3956 A66-40420

Spatial distributions of carrier concentration and internal field in cadmium selenide for various voltages, measuring conductivity and Hall coefficient 23 p4112 A66-41292

Axial pressure asymmetry produced by Hall effect in linear pinch discharge 23 p4104 A66-41512

Steady fully developed MHD channel flow of viscous electrically conducting fluid studied by Galerkin method under applied magnetic and electric fields 23 p4107 A66-41886

Hall effect in MHD generator using partially ionized gas 23 p4108 A66-42031

Electron paramagnetic resonance and Hall effect measurements to determine properties of dominant paramagnetic defect in electron irradiated p-type silicon 24 p4250 A66-42230

Electrical properties of barium plumbate noting conductivity, Hall field, thermoelectromotive force, magnetization, etc 24 p4253 A66-42382

Temperature dependence of Hall coefficient and resistivity of n-type epitaxial gallium arsenide in 4.2 to 300 degree K temperature range 24 p4254 A66-42423

Hall coefficient, electrical conductivity and thermoelectric power of GaSb-Ga<sub>2</sub>Te<sub>3</sub> solid solutions as functions of composition and temperature 24 p4254 A66-42425

Plane laminar jet of incompressible conducting fluid propagating homogeneous magnetic field at magnetic Reynolds number 24 p4196 A66-42872

Hall effect influence on characteristics of MHD generator with two pairs of electrodes with symmetrical or crosswise connections 24 p4162 A66-42873

Pressure deformation of band structure of HgTe-CdTe alloys determined from measurements of Hall effect and resistivity 24 p4258 A66-43009

## HALL GENERATOR

Conducting gas flow in Hall MHD generator reduced to quasi-one-dimensional problem 09 p1331 A66-20145

One-dimensional model for constant-area rectangular and coaxial Hall-current generator geometries, estimating MHD characteristics for nonequilibrium plasma 12 p1802 A66-23609

Hall generator constructed by vapor deposition of thin films of indium arsenide from 4 to 500 degrees K 12 p1838 A66-24407

Electrical characteristics of linear, segmented electrode, Hall and Faraday MHD generators operating in equilibrium and nonequilibrium ionization modes, obtaining data on loss mechanisms 13 p2001 A66-26256

Electrical power dependence of ideally sectioned Faraday MHD generator on nonequilibrium plasma flow Mach number 16 p2637 A66-31606

Conducting gas flow in Hall MHD generator reduced to quasi-one-dimensional problem 21 p3698 A66-39416

Stability of one-dimensional magnetoacoustic waves traveling in axial direction in Hall type MHD generator analyzed by steady state flow equations 23 p4024 A66-41884

## HALOGEN

SA BROMINE

SA CHLORINE

SA FLUORINE

SA IODINE

Cl, Br and I contents in carbonaceous chondrites measured by activation analysis 21 p3814 A66-39260

## HALOGEN COMPOUND

SA HALIDE

Fluorocarbon oxidation and photolysis of mixtures of trifluoriodomethane, oxygen, nitric oxide and hydroiodic acid 08 p1178 A66-19069

Electrical conductivities of boron

trifluoride in chlorine and bromine trifluorides studied as function of temperature and concentration 19 p3295 A66-3637

**HAMBURGER HFB 320 AIRCRAFT**

British Lockheed undercarriage and hydraulic system for German HFB 320 Harb aircraft 04 p0458 A66-1391

Design and market research aspects of Hamburger HFB 320 jet executive aircraft 10 p1482 A66-2121

Sandwich panel composed of plastic turbular cells in parts of Hansa aircraft 13 p1994 A66-2561

**HAMILTON-JACOBI EQUATION**

Optimum stabilization of tumbling satellite using Hamilton-Jacobi method 04 p0585 A66-1391

Book on mathematics underlying celestial mechanics, including central force problem, n-body problem, Hamilton-Jacobi and perturbation theories 11 p1776 A66-2391

Hamiltonian mechanics applied to planetary and artificial satellite motion problems 12 p1950 A66-2461

Newtonian and relativistic analysis of orbits of electromagnetically neutral particles in magnetic universe 12 p1914 A66-2461

Reducing optimal control variation problems to limit problem associated with Hamilton-Jacobi equation 13 p2047 A66-2561

Stabilization of unstable two-point boundary value problems, noting first method for avoiding computer storage problems during integration of related differential equations 15 p2528 A66-2961

Synthesis of specific optimum control for optimum stabilization problem of tumbling satellite via Hamilton-Jacobi theory, comparing results with optimum solution 18 p3246 A66-3461

Asymptotic property derived for particular solutions of Hamilton-Jacobi equation for conservative systems with two degrees of freedom 19 p3401 A66-3636

Time-mass dependent events during motion of material particle, using Hamilton-Jacobi equation of relativistic mechanics 21 p3772 A66-3941

**HAMILTONIAN**

Resonances below inelastic threshold for electron hydrogen scattering using Feshbach projection-operator technique, converting eigenvalue problem for projected Hamiltonian 04 p0547 A66-1391

Bracketing theorem applied in partitioning technique for solving Schrodinger equation to determine upper and lower bounds to energy eigenvalues, ground state excited states 06 p0911 A66-1616

Signal propagation on infinite lossless transmission line in quantum field theory finding total Hamiltonian of system 07 p1046 A66-1836

Perturbation expansions for ground state function of helium atom, using Hartree-Fock Hartree-Fock model Hamiltonian, based on Weiss-Martin variation-perturbation calculation 07 p1083 A66-1836

Stability of bodies with holonomic constrained moving parts, using method of Liapunov to demonstrate dependence on motion stability on potential function generalized coordinates [AIAA PAPER 66-101] 07 p1082 A66-1836

Spectrum and eigenstates of Barden Cooper-Schrieffer /BCS/ reduced Hamiltonian in theory of superconductivity 08 p1276 A66-1916

Energy integral for holonomic system of points of variable mass, transformed Lagrangian form via Hamiltonian function 08 p1256 A66-1916

Nonlinear optical effects of third order crystals, specifically in Hamiltonian system containing electrons, nuclei, radiation field 09 p1387 A66-2061

Energy band structure of germanium on silicon throughout Brillouin zone by Hamiltonian diagonalization 10 p1581 A66-2161

Optimal cooperative state rendezvous Pontryagin maximum principle for independently controlled systems having common goal 11 p1765 A66-2261

Equations obtained from Hamiltonian coupling, first Stokes line, first anti-Stokes

line and coherent field for Raman laser 11 p1711 A66-22490  
Ground state energy of charged Bose gas obtained from pair Hamiltonian and Green functions 11 p1741 A66-23392  
Text on dynamics of vibrations covering oscillations with variable and constant amplitude, damping, differential equations of motion, nonlinear oscillations, wave propagation in elastic solids, etc 13 p2207 A66-26573  
Maser material iron doped rutile, examining theoretical and experimental disagreement in spin Hamiltonian describing paramagnetic behavior 15 p2514 A66-29027  
Extension of dynamics to arbitrary systems of differential equations, proposing universal canonical structure generalizing Hamiltonian structure 15 p2539 A66-29145  
Two-dimensional flow in fluids related to system of vortex coordinates, using Hamiltonian operator for characterization of motion studies 16 p2683 A66-30213  
Spin-free derivation of Pauling rules for evaluating matrix elements for spin-free Hamiltonian over anti-symmetric Slater bond functions 16 p2754 A66-30860  
Hamiltonian describing EPR spectrum of trivalent chromium ion in ordered lithium-aluminum spinel and rhombic distortion causing deviation of axes in octahedron electric field 16 p2787 A66-31763  
Adiabatic invariants and third integrals of motion in periodic potentials in periodically time-dependent Hamiltonian systems of  $n$  degrees of freedom 17 p2945 A66-32292  
Normal ordering method of solving boson equations leading to closed solutions of Schrodinger and density operator equations in certain cases only 17 p2945 A66-32293  
Perturbation-like theory for case when available starting wave function is not eigenfunction of unperturbed Hamiltonian 18 p3135 A66-34511  
Newton law for simple inviscid fluid using Hamilton principle, emphasizing physical interpretation of Lin constraint 18 p3102 A66-34922  
Hamilton principle applied to force equation for nonrelativistic and relativistic flow of compressible inviscid fluid with polarization and magnetization in connection with electromagnetic momentum 18 p3102 A66-34923  
Electron-phonon interaction current density, thermodynamic Green function and other electromagnetic properties of superconductors, using Froehlich-Hamilton model 19 p3438 A66-35481  
Generalized method of averaging and von Zelpel method as applied to perturbed Hamiltonian system of appropriate form [AIAA PAPER 65-687] 19 p3462 A66-35893  
Low temperature vibronic transitions between electronic states involving destruction of photon and creation of phonon via electric dipole term of Hamiltonian 19 p3446 A66-36394  
Coupling between plasmons and polar phonons in degenerate semiconductor gallium antimonide analyzed, starting from electron-phonon Hamiltonian 19 p3447 A66-36400  
Min-H Strategy in deriving two iterative methods for rapid convergence to optimum solutions for nonlinear variational two-point boundary value problems 19 p3466 A66-36677  
Generalization of Sternheimer potential to include wave functions involving spin in nonfactorable way, exhibiting approximate Hamiltonian 19 p3405 A66-36803  
First-order density matrix corresponding to nondegenerate eigenstate be  $N$ -representable for time-reversal invariant Hamiltonian and quantum-mechanical system of  $N$  identical fermions 20 p3606 A66-38290  
Stability of bodies with holonomically constrained moving parts, using method of Liapunov to demonstrate dependence of motion stability on potential function of generalized coordinates [AIAA PAPER 66-101] 21 p3827 A66-38695  
Effective mass in nuclear deformational Hamiltonian calculated by asymptotic approximation method which is two orders of magnitude better than liquid drop model 22 p3951 A66-40422  
Feynman integral for classical waves

evaluated, using Hamiltonian approach to summation 23 p4086 A66-41867  
Magnetic breakdown on usual effective Hamiltonian theory for Bloch electrons in magnetic field, using simple two-dimensional rectangular model 24 p4249 A66-42223  
**HAMMERHEAD CONFIGURATION**  
Transonic buffeting effects on hammerhead shaped payloads analyzed, using power spectral techniques and wind tunnel tests 20 p3672 A66-38170  
**HANDBOOK**  
**SA MANUAL**  
SAE handbook, 1966, supplies definitions, testing methods, measurement methods and data for engineering materials, machine elements and vehicle components 10 p1540 A66-21700  
Encyclopedia of physics, Volume 49, Part I - Geophysics III 15 p2482 A66-28516  
Handbook of microwave ferrite materials 16 p2787 A66-31752  
Reliability handbook covering system effectiveness, fatigue life patterns, reliability testing, malfunction and failure analysis, etc 21 p3744 A66-39215  
**HANDLEY PAGE HP-137 AIRCRAFT**  
VC10 test flight of autoflare and automatic landing instrumentation 23 p4015 A66-41165  
**HANDLING**  
**S AIR CARGO HANDLING**  
**S DATA HANDLING SYSTEM**  
**S GROUND HANDLING**  
**S LOW SPEED HANDLING**  
**HANDLING EQUIPMENT**  
**S STORAGE**  
**S TRANSPORTATION**  
**HANDLING QUALITY**  
General Electric self-adaptive control effect on airframe handling quality characteristics in F-4A 01 p0098 A66-10006  
Lateral-directional handling qualities of large transport, examining factors involved in pilot maneuvers 01 p0101 A66-10037  
Flight program and performance of X-15 research aircraft noting aerodynamic heating, cockpit, controls and handling qualities 01 p0011 A66-10340  
Airborne V/STOL simulators used for handling qualities research at National Aeronautical Establishment, Ottawa, Canada [AIAA PAPER 65-705] 01 p0054 A66-10943  
Variable stability system /VSS/ incorporated into X-22A aircraft to obtain flight data on VTOL aircraft [AIAA PAPER 65-706] 01 p0013 A66-10944  
Handling stability and control research in development of STOL utility transport aircraft [AIAA PAPER 65-713] 01 p0013 A66-10950  
Stability and control characteristics of STOL aircraft in low speed landing approach portion of flight regime [AIAA PAPER 65-715] 01 p0013 A66-10952  
Handling qualities research for C-5A, noting inconsistencies in magnitudes of parameters and parameters to be specified [AIAA PAPER 65-740] 03 p0317 A66-12548  
Flying qualities requirements related to control system complexity noting longitudinal, lateral and directional requirements [AIAA PAPER 65-794] 03 p0320 A66-12597  
Three independent systems of matrix equations for solving transfer function of multiparameter linear system handling by human operator 03 p0328 A66-12699  
Flight evaluation of various longitudinal handling qualities involving parameters and region of pilot acceptance [AIAA PAPER 65-780] 03 p0322 A66-13067  
Size effect on VTOL aircraft hover and low speed handling qualities for helicopter and jet VTOL 06 p0806 A66-16813  
**XC-142A Flight Test Program**, program statistics, aircraft instrumentation and flying qualities in hover and transition flight regimes 06 p0807 A66-16820  
Design recommendations to offset greater momenta and sensitivity to gust winds of jointless helicopter rotor 10 p1483 A66-21388  
Handling stability and control research in development of STOL utility transport aircraft [AIAA PAPER 65-713] 12 p1801 A66-24094  
Flying qualities of six late-model personal-owner aircraft in visual and instrument

flight [SAE PAPER 660219] 13 p1996 A66-26396  
Simulated lunar landing maneuver of Apollo spacecraft, determining pilot control problems and handling qualities 16 p2743 A66-30886  
Lateral-directional handling qualities of large transport, examining factors involved in pilot maneuvers 16 p2634 A66-31318  
Stability and control characteristics of STOL aircraft in low speed landing approach portion of flight regime [AIAA PAPER 65-715] 16 p2635 A66-31591  
XV-5A V/STOL aircraft flight testing, noting handling qualities and sequential diversion capability 17 p2844 A66-32731  
Lift engine technology, noting effect on operational transport aircraft design, VTOL capabilities, low speed control, etc 17 p2844 A66-32732  
Flight control design parameters and performance effects on VTOL aircraft handling qualities, noting manufacture and flight test results 17 p2845 A66-32733  
Helicopter handling qualities during hover noting pilot performance, position control tasks with and without gusts, effects of stability derivatives, etc 17 p2845 A66-32734  
Flight control for low altitude high-speed mission, discussing applicable requirements, analysis and design techniques 19 p3396 A66-35506  
Flight control system design for high performance aircraft, particularly longitudinal transient response handling qualities 19 p3278 A66-35509  
Handling in hovering mode of Dornier VTOL transport aircraft with and without autostabilizer, obtaining moments about roll, pitch and yaw axis 20 p3493 A66-36879  
General Electric self-adaptive control effect on airframe handling quality characteristics in F-4A aircraft 23 p4088 A66-40982  
**HANDS**  
**S HIGH ALTITUDE NUCLEAR DETECTION STUDIES /HANDS/**  
**HANKEL FUNCTION**  
Nonuniformly spaced antenna array synthesis using lambda function via Chebyshev-Gauss quadrature and Hankel transform 12 p1841 A66-24629  
Solution of set of  $n$  dual integral equations with Hankel kernel 14 p2321 A66-27377  
Error estimates for approximation formulas for Bessel functions and Hankel functions obtained, using Luke trapezoidal rule 16 p2736 A66-31021  
**HARDENING**  
**SA AGE HARDENING**  
**SA COLD HARDENING**  
**SA DISPERSION HARDENING**  
**SA PRECIPITATION HARDENING**  
**SA STRAIN HARDENING**  
**SA WORK HARDENING**  
Graphite and carbon steel case hardening by chromium 05 p0702 A66-15111  
Physical factors determining hardening of nimonic type alloy with high niobium content, discussing formation of intermetallic phase 05 p0704 A66-15820  
Hot and cold hardening of aluminum-copper-magnesium alloys for application to missiles and aircraft skins analyzed, using electron microscope, noting metastable phases 12 p1893 A66-23747  
Strain rate and temperature changes in solution hardened niobium alloy, emphasizing behavioral difference between pure niobium and alloy, noting flow stress 12 p1894 A66-23941  
Hardening temperature effect on saturation magnetization and distribution of cations over sublattices in magnesium-base ferrites 13 p2160 A66-25100  
Aging of aluminum alloy after quenching and strain hardening, noting Vickers hardness tests, tensile tests, precipitation phases, shearing effect, etc [PST PAPER 423] 14 p2315 A66-27468  
Fracture mechanics, discussing crystal structure defects, particular dislocation, hardening, lattice vacancies, interstitials, etc 14 p2316 A66-27770  
Hardening and softening of nickel-alumina alloys 15 p2519 A66-28533  
Various factors affecting hardening of KhN35VT1u /EI787/ alloy 15 p2519 A66-28535

Laser beam effect on hardening of steel 16 p2721 A66-31802  
 Hardening during deformation in stoichiometric nickel manganite alloy noting temperature effect, surface characteristics and electric resistance 19 p3381 A66-35930  
 Mechanical and physical effects of metastable phases arising during hardening of titanium alloys containing transition elements 20 p3585 A66-37699  
 Manufacturing of semifinished pressed products of AD31 Al-Mg-Si alloy, examining coarse-grained structure occurring after hardening and machining 22 p3928 A66-40886

**HARDNESS****SA BRITTLENESS**

Maximum error in high-temperature hardness determination for tungsten and molybdenum with known measurement errors 02 p0233 A66-12275  
 Component hardness differences of SAE 52100 steel effect on bearing fatigue, using five-ball fatigue tester and rolling element bearings 03 p0372 A66-12349  
 Rockwell hardness test discussing standardization by cycle control and equipment modification 03 p0439 A66-13158  
 Regularities in hardness variations in niobium binary alloy 05 p0704 A66-15821  
 Relation between hardness and ultimate strength of tungsten and molybdenum over wide temperature range 06 p0897 A66-16698  
 Microhardness changes in polycrystalline aluminum irradiated by alpha, beta and neutron particles 07 p1092 A66-17305  
 Binary, ternary and quaternary niobium alloy mechanical properties such as resistance to heat, plastic deformation, relation between hardness and rupture strength, etc 08 p1239 A66-18905  
 Residual stress-strain state of WC-Co alloys by changing sample size during process 09 p1389 A66-20806  
 Templugs, temperature-sensitive metal inserts that function on basis that certain alloys undergo permanent hardness changes upon heating 12 p1880 A66-24070  
 Hardness and lattice parameter increase effect on oxidation temperature of internally oxidized Ag-Mg and Ag-Al alloys 18 p3122 A66-33750  
 Deformation and strength properties of refractory solids at temperatures up to 2000 degrees C, using indentation hardness measurements for stress-strain measurements in strength 18 p3254 A66-33967  
 Plastic deformation effect on physical and mechanical properties of hard cylindrical samples of tungsten-cobalt alloy 21 p3752 A66-39405  
 Regularities in hardness variations in niobium binary alloy 23 p4081 A66-41386  
 Anisotropy in mechanical properties of lamellar solids due to abrasiveness, examining wear and surface damage produced by laminar solid on metal during slipping and hardness 24 p4229 A66-42701

**HARDWARE**

Test facility for combined sonic and mechanical excitation of flight-and surface-vehicle hardware, using electropneumatic transducers 16 p2676 A66-30444

**HARMONIC ANALYSIS**

Modifying spherical harmonic analysis of surface geomagnetic field to account for Earth oblateness by two methods 01 p0061 A66-10615  
 Harmonic analysis on analog computer by method giving very high Q modeling filters 01 p0034 A66-11024  
 Analysis and harmonic synthesis of periodic signals of any form by successive steps 05 p0657 A66-14728  
 Distribution function of zeros in harmonic signals relation to frequency characteristic of latter undergoing maximum amplitude limitation 07 p1001 A66-17348  
 Harmonic analysis of periodic sequence of pulses, using Fourier analysis 07 p1001 A66-17349  
 Lunar topographical asphericity, lunar coordinates, absolute and relative, harmonic analytical interpolation, formations, stratigraphy and optical librations 07 p1139 A66-18265  
 Polymeric material deformation under harmonically varying load action, noting

steady state regime temperature distribution effects 08 p1243 A66-18879

Intermediate text on dynamic analysis and automatic control 08 p1200 A66-19464

Green function-eigenvalue relationship on closed smooth boundary of open dimensional region 09 p1394 A66-20265

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 09 p1357 A66-20775

Graphical analysis of recurring and periodic waveforms to determine fundamental frequency and major harmonic components 10 p1549 A66-21232

Real roots of eigenvalue problem in cylindrical harmonics 10 p1550 A66-21306

Nonlinear transfer characteristics derived from measured harmonic levels in output when input is sinusoidal wave 11 p1661 A66-22393

Second degree sectorial harmonic of Earth gravitational potential based on 338-day variation in revolution period of Syncom 11 p1697 A66-22436

Cauchy problem for two-dimensional Laplace equation in infinite strip 11 p1722 A66-22646

Statistical properties of receiver output under interference conditions, obtaining first order output, probability densities, second harmonic and intermodulation interference terms 11 p1658 A66-23483

Secular motion of Earth pole from 1900 to 1958 measured via harmonic analysis, noting rate and distance 12 p1868 A66-23669

Self-equilibrating bending of complete circular cylindrical shells described by first harmonic terms of Fourier series for displacement components 12 p1962 A66-24004

Nonlinear gyroscopic system equations solved by analog computer and verified through method of harmonic linearization 14 p2294 A66-27362

Harmonic analysis of current gains and internal slope of nonuniform base transistors 14 p2254 A66-27601

Harmonic analysis of accuracy of reproduction in digital form of operators selecting period of time quantization, duration of analog-to-digital conversion, etc 16 p2669 A66-30758

Harmonic approximation of infinite crystal dynamics problem, noting collisional case and action of external force on atoms 16 p2820 A66-31169

Diurnal oscillation in zonal and meridional winds determined, using harmonic analysis on data obtained from meteorological rocket soundings 16 p2699 A66-31641

Global harmonic and statistical analysis of gravimetry 17 p2920 A66-33192

Trial and error method for constructing closed loop harmonic response locus of control system with one nonlinear element 18 p3089 A66-34010

Critical analysis of /Earth/ spherical equilibrium configuration 18 p3109 A66-34738

Sputnik III data application to plotting of total magnetic field intensity chart above U.S.S.R., using spherical harmonic analysis 19 p3345 A66-35290

Dynamical effects of liquid nucleus of Earth in diurnal terrestrial tides 20 p3553 A66-38068

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 22 p3873 A66-39834

Statistical and instrumental fluctuations effect on distribution of first-harmonic amplitude and phase in harmonic analysis of cosmic radiation variation 22 p3975 A66-40776

Stability of periodic solution of nonlinear systems with coefficients dependent on amplitude and frequency 24 p4188 A66-42478

**HARMONIC EXCITATION**

Overall structural vibration behavior based on determination of structural parameters from harmonic vibration tests 03 p0440 A66-13227

Parametric excitation of nonlinear system with hardening springs, showing existence of higher order subharmonics [ASME PAPER 65-WA/APM-7]

05 p0717 A66-15429

Spatial structure for second harmonic generated in anisotropic medium by finite-

aperture light beam 08 p1233 A66-18896

Parametric excitation of nonlinear system with hardening springs, showing existence of higher order subharmonics [ASME PAPER 65-WA/APM-7]

10 p1616 A66-21446

Plasma oscillation resonance phenomena of ionospheric antenna excitation near lower hybrid resonant

frequency 14 p2340 A66-27121

Alouette I satellite data on extraordinary wave resonance trace propagation along ionospheric magnetic field-aligned waveguide 16 p2697 A66-31010

Alouette I topside sounder ionograms electron cyclotron harmonic resonance at frequency variation 16 p2697 A66-31010

Second-harmonic enhancement in nonlinear crystal by loss modulator coupling of pulsed ruby laser modes 17 p2933 A66-31919

True natural frequencies and modes determined from harmonic vibration test using not exactly appropriate excitation 17 p3024 A66-32310

Periodic solutions of nonlinear mechanical oscillator under harmonic excitation and plot of resonance curves 18 p3259 A66-34986

Steady state oscillations in semiinfinite gas excited by harmonically oscillating wave using single-collision time kinetic model 20 p3605 A66-37610

Single point excitation techniques for resonance testing of structural inert stiffness and damping matrices 21 p3824 A66-38510

**HARMONIC FUNCTION**

**SA AIRYS STRESS FUNCTION**

**SA BIHARMONIC EQUATION**

Extension of Broman theorem stating that if function that is harmonic in unit circle belongs to special class its complete radial variation is bounded 03 p0387 A66-12610

Growth index and support function for plurisubharmonic functions in convex tubular radial regions 03 p0388 A66-12610

Existence and uniqueness of optimal algorithms proven for application transformation of potential fields 06 p0875 A66-16110

Fellerian character invariant by passage product of kernels, noting separately excessive and separately superharmonic functions 06 p0904 A66-17010

Boundary properties of Cauchy integrals and harmonically conjugate functions of regions having rectifiable boundary 07 p1059 A66-18010

Separation of harmonic components of function E/t/ by double differentiation with subsequent integration 08 p1185 A66-19010

Limiting rate of decrease of harmonic function in three variables 08 p1246 A66-19010

Bounds for two-dimensional discrete harmonic Green function used in boundary problems 09 p1395 A66-20610

Design of variable structure automatic control system frequency characteristics using harmonic linearization 11 p1677 A66-22310

Series expansion of harmonic function of closed unit circle with center at pole 14 p2321 A66-27210

Existence and uniqueness of optimal algorithms proven for application transformation of potential fields 15 p2483 A66-28610

Approximate continuation of harmonic and parabolic functions as solutions of Laplace and heat equations 16 p2732 A66-30310

Axiomatic theory of Dirichlet problem applicable to nonlinear PDEs and to systems of PDEs 16 p2738 A66-31110

Integral representation providing one-to-one correspondence between functions of complex variables and complex-valued harmonic functions of  $n$  plus 1 real variables 18 p3126 A66-33410

Separation of harmonic components of function E/t/ by double differentiation with subsequent integration 18 p3128 A66-34410

Existence of angular boundary values of harmonic function in sphere 21 p3757 A66-38810

Waveform analysis of electronic repetitive differential analyzer solutions of nonlinear and linear systems and describing functions

evaluation using  
 vector meter 21 p3739 A66-39275  
 Nonlinear automatic system with logical  
 device analyzed in presence of external  
 action, obtaining harmonic linearization  
 coefficients 21 p3719 A66-39284  
 Properties of functions of metamaterials  
 and metacoloric equations, using Liouville-  
 Picard theories together with Harnack  
 theory for solutions 21 p3837 A66-39611  
 Harmonic linearization, estimating quality  
 of oscillatory transients in nonsearching  
 self-adjusting systems described by high  
 order differential  
 equations 24 p4188 A66-42480  
**HARMONIC GENERATION**  
 Loaded linewidth measured for given value  
 of circuit coupling, determining unloaded  
 linewidth, noting ferromagnetic parametric  
 amplification and harmonic  
 generation 01 p0039 A66-10528  
 Reflection of second harmonic waves  
 created in nonlinear interaction of waves at  
 plasma boundary for case of oblique  
 incidence and weak spatial  
 dispersion 01 p0030 A66-10698  
 Second harmonic light generation, stressing  
 saturation effects occurring at high laser  
 power levels, solving nonlinear coupled  
 Maxwell equations 02 p0239 A66-11443  
 Second harmonic power up to 8 gc from  
 YIG-tuned transistor 03 p0339 A66-12440  
 Spurious signals in wideband S-to X-band  
 varactor tripler suggesting they were caused  
 by pumped-up LF resonances in input  
 circuit 03 p0339 A66-12451  
 Possible materials for second harmonic  
 generation and laser action discussing  
 centrosymmetric and piezoelectric crystals  
 and single crystal plate with alternate layers  
 of noncentrosymmetric  
 composition 03 p0378 A66-12940  
 Third harmonic current in plasma due to  
 velocity-dependent collision frequency of  
 electron 03 p0401 A66-12954  
 Harmonic generation in double beam  
 system in presence of magnetic  
 field 03 p0404 A66-12981  
 Harmonics in cylindrical electron beams

 frequency in spectrum of two-electron beam  
 collision 04 p0550 A66-13473  
 Light scattering theory and generation of  
 second harmonic in plasma in external  
 magnetic field 04 p0555 A66-13433  
 Third harmonic component of current  
 density in plasma in presence of electric  
 and magnetic fields, analyzing generation  
 and propagation of third harmonic of  
 electromagnetic wave in  
 magnetoplasma 05 p0724 A66-15188  
 Nonlinear harmonic generation by plasma  
 cylinder 06 p0916 A66-16377  
 Continuous optical second-harmonic  
 generation using ND/YAG laser and crystal  
 of single-domain lithium  
 niobate 06 p0889 A66-16378  
 Harmonic microwave generation by field-  
 emission cathode in superconducting  
 cavity 06 p0854 A66-16757  
 First-order approximation for second-  
 harmonic distortion in sinusoidal voltage  
 generator connected through resistor to  
 base-emitter circuit of  
 transistor 06 p0858 A66-16984  
 Bailey and Martyn theories concerning  
 ionospheric cross-modulation extended to  
 cover simple cases of heterodyne and  
 harmonic generation by electromagnetic  
 fields in plasma 06 p0920 A66-17031  
 Frequency dependence of hot carrier AC  
 conductivity of covalent semiconductors,  
 considering scattering due to acoustic and  
 optical phonons 07 p1098 A66-17740  
 Optical nonlinearities of plasma, including  
 second-harmonic generation and stimulated  
 Raman effects 07 p1091 A66-18433  
 Piecewise linear circuit model for charge-  
 storage or step recovery diode using  
 conventional capacitance and  
 resistance 09 p1350 A66-19920  
 Step-recovery diode multiplier circuit for  
 high-order harmonic  
 generation 09 p1359 A66-20919  
 Optical second harmonic generation in

focus of lowest transverse mode of  
 continuous wave Gaussian gas laser  
 beam 10 p1541 A66-21175  
 Gamma-level ring-core magnetometer  
 sensitivity parameters, noting frequency,  
 dynamic differential permeability, number of  
 pickup turns, etc 10 p1508 A66-21415  
 Second harmonic generation by laser  
 beams of finite spectral width, using  
 quantum transitions and kinetic equations,  
 noting shape of pumping line at  
 fundamental frequency 10 p1544 A66-22026  
 Harmonic wave generation by EM plane  
 wave normally incident on collisionless  
 plasma with linear density  
 profile 11 p1652 A66-22548  
 Reflection of second harmonic waves  
 created in nonlinear interaction of waves at  
 plasma boundary for case of oblique  
 incidence and weak spatial  
 dispersion 11 p1658 A66-23300  
 Continuous wave measurement of optical  
 nonlinearity of ammonium dihydrogen  
 phosphate, using helium-neon  
 laser 12 p1912 A66-23716  
 Perturbation theory determination of third  
 harmonic current density generated in  
 plasma by AC field for velocity-dependent  
 plasma 12 p1924 A66-24593  
 Boltzmann transfer equation for electrons  
 and generation of nonlinear second harmonic  
 of current density in inhomogeneous  
 plasma 12 p1924 A66-24806  
 Harmonic generation in short magnetized  
 plasma column from helical oscillation near  
 critical magnetic field for helical  
 instability 12 p1925 A66-24815  
 Consistent theory of nonlinear optical  
 effects in bounded light beams by extending  
 parabolic equations to nonlinear  
 problems 12 p1891 A66-24888  
 Second harmonic generated by transmitting  
 laser radiation through tellurium  
 monocrystal, while filtering out fundamental  
 frequency 13 p2090 A66-25437  
 HF and LF alternating electric fields  
 effect on weakly ionized argon, temperature  
 modulation and production of  
 harmonics 13 p2141 A66-25447  
 Second optical harmonic generation  
 equations for steady state laser derived  
 from density matrix 13 p2092 A66-25682  
 Varactor diode as frequency multiplication  
 element, discussing design parameters and  
 noise characteristics 13 p2039 A66-25699  
 Physics of quantum electronics -  
 Conference, San Juan, Puerto Rico, June  
 1965 13 p2093 A66-26141  
 Second harmonic generation of light  
 analyzed, stressing saturation effects  
 occurring at high laser power, solving  
 nonlinear Maxwell  
 equations 13 p2096 A66-26144  
 Nonlinear susceptibility describing second  
 harmonic generation of light measured in  
 semiconductors with zinc-blende symmetry,  
 using quantum mechanics and laser  
 wavelength 13 p2168 A66-26149  
 Second harmonic generation by Q-switched  
 laser pulse from silicon and germanium  
 surfaces 13 p2096 A66-26150  
 Light coupling with phonons, magnons and  
 plasmons, deriving wave equations and  
 coupling constants, observing Raman effect  
 in spin systems and in plasmas, noting  
 second harmonic  
 generation 13 p2132 A66-26154  
 Vector synchronism and second-harmonic  
 light generation in focused  
 beams 14 p2307 A66-27191  
 Electromagnetic waves in isotropic plasma  
 layer and in plasma layer in magnetic field,  
 determining second harmonics of wave and  
 obtaining nonlinear dispersion  
 equation 14 p2348 A66-28470  
 Electron density in laser-induced spark in  
 air determined, measuring simultaneously  
 fundamental laser wavelength and second  
 harmonic 15 p2512 A66-28685  
 Power dissipation in input and output  
 matching networks of varactor doubler for  
 calculating true input and output powers  
 from semiconductor bulk material, noting  
 charge storage  
 occurrence 15 p2466 A66-29674  
 Gallium arsenide varactor diode design for  
 parametric amplifiers and multipliers, noting  
 efficient harmonic generation at higher

microwave frequency 15 p2466 A66-29677  
 Second harmonic generation /SHG/ by  
 focused laser beams in nonlinear  
 crystals 15 p2519 A66-29816  
 Optical harmonic generation in IR in zinc  
 blende, hexagonal and trigonal crystals,  
 using unfocused carbon dioxide laser in CW  
 and Q-switched operation 16 p2716 A66-30182  
 Second harmonic generation by laser  
 beams of finite spectral width, using  
 quantum transitions and kinetic equations,  
 noting shape of pumping line at  
 fundamental frequency 16 p2718 A66-30845  
 Statistical effects during generation of  
 second harmonic in optically transparent  
 crystals, noting coefficient of correlation  
 between harmonic and fundamental radiation  
 power of solid state laser 16 p2747 A66-31167  
 Plasma plate and cylinder oscillation  
 compatibility with radiation from positive  
 argon column at four discrete frequency  
 bands and low pressure 17 p2962 A66-31815  
 Circuit with single externally driven  
 switch, operated at fundamental frequency  
 gives efficient conversion of DC to AC at  
 that frequency or any specified harmonic of  
 it 17 p2848 A66-31818  
 Harmonic generation in microwave  
 emission from InSb, attributing resonance  
 type radiation to stimulated cyclotron  
 radiation and plasma wave  
 excitation 17 p2978 A66-32410  
 Wave coupling and generation of  
 gyromagnetic half-frequency harmonics in  
 double electron-beam  
 system 18 p3142 A66-33911  
 Enhancement of optical second-harmonic  
 generation by reflection phase matching in  
 ZnS and GaAs 19 p3375 A66-36074  
 Frequency doubling in resonance laser,  
 obtaining second harmonic field for laser  
 radiation by giant pulses 20 p3576 A66-37144  
 Second-harmonic electron cyclotron  
 resonance in hydrogen plasma from HF ion  
 source with inductive coupling situated in  
 transverse magnetic field 20 p3607 A66-37407  
 Second harmonic frequency generation  
 obtained in process of optical mixing of  
 collinear neodymium laser beams in  
 potassium dihydrogen  
 phosphate 20 p3578 A66-37550  
 High-speed rotor operation in bearing  
 clearances, discussing induction of nonlinear  
 vibration, harmonic generation and computer  
 simulation results  
 [ASME PAPER 66-MD-1] 21 p3741 A66-38474  
 Second-harmonic generation by focused  
 laser beams based on experiments using He-  
 Ne gas laser, noting SHG should be strongly  
 peaked when focus is at either of crystal  
 surfaces 21 p3746 A66-38554  
 Higher harmonics generation of ion  
 cyclotron frequency in longitudinally  
 magnetized plasmas, noting experimental  
 setup and pressure  
 effects 21 p3777 A66-38766  
 Velocity dependent collision frequency  
 effect on harmonic generation in ionized gas  
 through which electromagnetic wave  
 passes 21 p3792 A66-39180  
 Second harmonic generation in laser  
 crystals by Gaussian beams of finite  
 aperture 22 p3929 A66-39657  
 Consistent theory of nonlinear optical  
 effects in bounded light beams by extending  
 parabolic equations to nonlinear  
 problems 23 p4076 A66-41095  
 Nonlinear interaction of electromagnetic  
 waves in magnetoplasma for field-parallel  
 wave propagation 23 p4041 A66-41642  
 Miller phenomenological rule for computing  
 nonlinear susceptibility, determining  
 magnitude by geometrical  
 factor 24 p4223 A66-42568  
 Stability criteria derived for horizon  
 sensors which track point on horizon where  
 second harmonic of signal generated by scan  
 motion of field of view is  
 zero 24 p4175 A66-42821  
 Vector synchronism and second-harmonic  
 light generation in focused  
 beams 24 p4226 A66-43089  
 Harmonic generation and detection in  
 submillimeter wavelength region,  
 emphasizing crystal point contact  
 diode 24 p4176 A66-43191  
**HARMONIC GENERATOR**  
 Difference frequency between harmonics

of millimeter wave oscillators at submillimeter wavelength, using crossed waveguide harmonic generator as harmonic mixer 07 p1008 A66-17514

Nonlinear phenomena in HF plasma discharge, establishing qualitative relation between gas pressure, consumed microwave power and harmonic generation 12 p1919 A66-23711

Output signal of harmonic generator with noise sources in circuit, using perturbation analysis and assuming noise effect on signal in transducer is 12 p1835 A66-24137

Submillimeter spectroscopy using Froome plasma metal junction harmonic generator 15 p2501 A66-29007

Equivalent circuit evaluation of theoretical potential and limitations of millimeter wave semiconductor diode detectors, mixers and frequency multipliers 15 p2461 A66-29015

Current-voltage characteristic for tunnel-diode millimeter wave harmonic generator in 24 to 72 gc region 15 p2462 A66-29024

Submillimeter wave mixing of output of carcinotron and output of klystron in crossed-waveguide harmonic generator 15 p2463 A66-29025

Varactor diode harmonic generators for S-band with VHF input and microwave output 17 p2892 A66-32916

Signal analysis of abrupt and graded junction varactor harmonic generators with idlers, showing how load and source resistances may be optimized 17 p2893 A66-32922

Wide tuning range solid state microwave source consisting of transistor oscillator and varactor diode harmonic generator chain 17 p2893 A66-32926

Frequency comparison by beat-frequency comparators, harmonic generators and permanent phase observation devices 17 p2927 A66-33245

Signal analysis of abrupt and graded junction varactor harmonic generators with idlers, showing how load and source resistances may be optimized 20 p3531 A66-37831

J-band multiplier design noting extension of frequency coverage, components, noise performance, frequency stability, tuning range, etc 21 p3711 A66-38837

## HARMONIC MOTION

Forced solutions for Van der Pol-Duffing equation in first harmonic approximation 13 p2129 A66-26337

Energy integral study of geopotential harmonic variation effects on satellite motion near critical inclination 20 p3653 A66-37763

## HARMONIC OSCILLATION

Forced torsional motion of semiinfinite isotropic elastic cylinder with vibrations excited by harmonically oscillating rigid disk, using integral equation 04 p0589 A66-13829

Amplification and generation properties in gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 04 p0499 A66-14061

Nonlinear spring-mass system with many degrees of freedom subjected to periodic exciting forces, deducing steady state forced vibrations equal to forcing function [ASME PAPER 65-APMW-30] 04 p0593 A66-14230

Exact solution for Green function of open spherical shell subjected to harmonically oscillating concentrated load and any consistent boundary conditions [ASME PAPER 65-WA/APM-24] 05 p0778 A66-15446

Dynamic reciprocal theorem for sinusoidal oscillation of elastic medium treated as extension of static reciprocal theorem of Betti and Rayleigh, using continuum mechanics [ASME PAPER 65-WA/MD-21] 05 p0779 A66-15524

Three-dimensional motion of rigid system turning about fixed axis and simultaneously oscillating along same axis 07 p1079 A66-17302

Multimode antennas, discussing mode and mode generation, radiation sum and difference pattern control, discontinuity reflections, monopulse antennas, etc 08 p1191 A66-18945

Formal variance of measurement error in frequency and phase of harmonic signal in narrow-band noise background 08 p1201 A66-19688

Weak harmonic signal effect on synchronized oscillator analyzed, based on van der Pol equation 11 p1667 A66-22790

Formula for numerical values of propagation rates of flexural harmonic waves of various lengths 11 p1784 A66-23315

One-boson Lee model of solvable field theory with nontrivial charge and mass renormalization as example of Lehmann-Symanzik-Zimmermann formalism 12 p1917 A66-24098

Aerodynamic forces on system of N thin slightly twisted profiles in subsonic unsteady flow for small angle of attack, examining acoustic resonance for arbitrary small harmonic oscillations 12 p1798 A66-24436

IR maser action on vibrational transitions of thermally pumped polyatomic molecules 13 p2101 A66-26203

Mathematical and numerical determinations of aerodynamic forces on harmonically oscillating cylindrical shell under subsonic and supersonic speeds and comparison with slender body theory results 14 p2218 A66-27405

Aerodynamic forces acting on harmonically oscillating thin profile in stalled plane parallel flow of ideal incompressible fluid 14 p2220 A66-27695

Accelerator with nonlinear spiral focusing, approximating size of stability region, adiabatic damping, transverse phase stability and perturbations effect 14 p2347 A66-28309

Thermoelasticity equations describing harmonic vibrations of medium solved via singular integral equation 14 p2408 A66-28390

Oscillating solutions of ordinary nonlinear nonautonomous differential equations, noting qualitative methods 15 p2527 A66-29168

Singular integral equations for thermoelasticity equations describing harmonic oscillations of medium, applied in boundary value problems 15 p2611 A66-29419

RF size effect on ineffective electrons in magnetic field parallel to surface of cadmium plates studied by observing harmonic oscillations of impedance 16 p2772 A66-30289

Nonstationary aerodynamic load for harmonically oscillating body in fluid flow with constant mean velocity measured, determining errors as functions of system parameters 16 p2630 A66-31302

Amplification and generation properties in gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 17 p2885 A66-32227

Exact solution for Green function of open spherical shell subjected to harmonically oscillating concentrated load and any consistent boundary conditions [ASME PAPER 65-WA/APM-24/] 18 p3248 A66-33576

Nonlinear spring-mass system with many degrees of freedom subjected to periodic exciting forces, deducing steady state forced vibrations equal to forcing function [ASME PAPER 66-APMW-30] 18 p3249 A66-33591

Formal variance of measurement error in frequency and phase of harmonic signal in narrow-band noise background 18 p3091 A66-34674

Weak harmonic signal effect on synchronized oscillator analyzed, based on van der Pol equation 20 p3525 A66-37130

Steady state oscillations in semiinfinite gas excited by harmonically oscillating wall, using single-collision time kinetic model 20 p3605 A66-37635

Nearly-periodic oscillations in nonlinear systems having periodic coefficients and subject to external periodic force 23 p4141 A66-41947

Reverse flow and deformation optimization theories applied to subsonic aeroelasticity of lifting surface in harmonic oscillation, using numerical integration and computer programs 24 p4157 A66-42343

## HARMONIC OSCILLATOR

Amplitude and phase of anharmonic oscillator, using relativistic Schroedinger

equation in magnetic field 05 p0695 A66-1490

Random model for classical electrodynamics presents properties of quantum electrodynamics as extension of work on harmonic oscillator under magnetic field 06 p0867 A66-1706

Forcing function acting upon rigid body rotating about fixed point replaced by motion of axis of rotation and another forcing function 08 p1310 A66-1918

Black body radiation law deduced from stochastic electrodynamics 14 p2414 A66-2817

RF harmonic oscillator design, using characteristic equations for natural oscillation frequency expressions, analyzing changing load effects, changing passive parameters, etc 14 p2282 A66-2838

Momentum and energy accommodation for hypervelocity gas particles on crystal surface, using Lennard Jones potential and approximating lattice by system of independent forced harmonic oscillators 16 p2752 A66-3038

Approximate analysis of nonlinear systems similar to harmonic oscillators, using Chaplygin theory of differential inequalities 16 p2705 A66-3079

Flowgraph techniques for closed systems discussing properties, approximation methodology equation, frequency response constraints, oscillatory and stochastic processes, etc 17 p2898 A66-3198

## HARMONIC RADIATION

Harmonic structure and band splitting in type II solar radio bursts 03 p0429 A66-1317

Plasma waves propagating transverse to uniform external magnetic field discussing electron motion, wavelength magnitude frequencies and application of results 03 p0406 A66-1337

L-band waffle-iron filter fabrication and modifications for high power characteristics 06 p0847 A66-1617

Field polarization of short-period variations/beats/ of Earth electromagnetic field investigated, using correlation analysis 08 p1214 A66-1903

Harmonic suppression ratios in RF amplifiers calculated, using circuit parameters and applying Fourier transformations 10 p1508 A66-2129

Intense radiation emission at gyrofrequency harmonics from magnetoplasmas, discussing resonances dispersion relations, electron trajectory perturbations, etc 13 p2155 A66-2669

Mode selective coaxial directional coupler for measurement of unwanted harmonic effect 13 p2044 A66-2678

Electric current density in semiconductor noting harmonic mixing of microwaves in warm electrons in germanium 15 p2564 A66-2887

## HARMONICS

SA SPHERICAL HARMONICS

SA TESSERAL HARMONICS

SA ZONAL HARMONICS

Drift velocity of aerosol particle in field sound wave distorted by second harmonic 13 p2127 A66-2508

Drift velocity of aerosol particle in field sound wave distorted by second harmonic 21 p3769 A66-3858

## HARTMANN FLOW

Hartmann problem solved for isothermal motion of heavy neutral viscous gas containing small impurities of light ions and electrons in crossed electric and magnetic fields 02 p0269 A66-1217

Hydraulic resistance coefficient dependence on Reynolds and Hartmann numbers in turbulent flow of conducting fluid through tube in magnetic field 11 p1743 A66-2237

Hartmann problem solved for isothermal motion of heavy neutral viscous gas containing small impurities of light ions and electrons in crossed electric and magnetic fields 14 p2345 A66-2808

Nonequilibrium ionization phenomena interaction with nonuniform flow of plasma reviewing nonequilibrium characteristics of uniform flow with electric and magnetic fields 20 p3610 A66-3798

Wall conductance effect on stability of Hartmann flow in curved channel, solving

eigenvalue problem via Galerkin method 21 p3777 A66-38762  
 Temperature profiles and Nusselt numbers for heat transfer to MHD laminar Hartmann flow in thermal entrance region of flat duct 22 p4000 A66-40920  
**HARTREE-FOCK CALCULATION**  
 Perturbation expansions for ground state function of helium atom, using Hartree or Hartree-Fock model Hamiltonian, based on Weiss-Martin variation-perturbation calculation 07 p1083 A66-18422  
 Magnetization using Hartree-Fock approximation in terms of boson distribution or uniformly interacting spins 07 p1084 A66-18441  
 Hartree-Fock approximation method for calculating efficiencies of multiple-photon processes 11 p1737 A66-22495  
 Improving uncoupled Hartree-Fock expectation values for atomic and molecular properties 11 p1738 A66-22877  
 Collective oscillations of atoms in Hartree-Fock approximation 16 p2751 A66-30191  
 Quantum theoretical ferromagnetic behavior of chemical bonds in transition metals and Hartree-Fock calculation of atomic orbitals 19 p3439 A66-35713  
 Photoionization cross sections calculated for carbon, nitrogen and oxygen ions, using Hartree-Fock approximation for final transition stages 19 p3405 A66-36805  
 Hartree-Fock parameters for intermediate coupling compared with those obtained from observed energy levels for C I sequence 23 p4130 A66-41814  
 Crystal potential and correlation for energy bands in valence semiconductors evaluated on basis of orthogonalized plane wave calculations starting with Hartree-Fock equation 24 p4249 A66-42227  
**HASP**  
**HIGH ALTITUDE SOUNDING PROJECTILE /HASP/**  
**HASTELLOY**  
 Hot cracking in Hastelloy X fusion weld as affected by microsegregation produced during solidification 10 p1547 A66-21768  
 Creep design reliability criteria for creep-rupture and critical creep-strain modes of structural element failure, both singularly and combined or 20 p3571 A66-37941  
**HAWKER P 1127 AIRCRAFT**  
 Kestrel P-1127 V/STOL strike/reconnaissance aircraft evaluation trials with reference to background, aircraft description, organization, pilot training and major tasks 07 p0985 A66-17268  
 Kestrel P-1127/ Tripartite V/STOL Operational Trials, describing aircraft performance, test unit organization, results, etc 18 p3052 A66-34945  
 Unit for centralizing AC-carrier measurements onboard VTOL Hawker Siddeley P 1127 aircraft 21 p3741 A66-39475  
**HAYSTACK PROJECT**  
 Circularly polarized tracking feed in haystack antenna 13 p2035 A66-25504  
 Deflection of structural members in haystack antenna calculated, using framed structure analysis /FRAN/ program, obtaining improved grid analogy 15 p2614 A66-29616  
**HAZARD**  
 AIRCRAFT HAZARD  
 FLIGHT HAZARD  
 METEOROID HAZARD  
 NOISE HAZARD  
 OPERATIONAL HAZARD  
 RADIATION HAZARD  
 SAFETY  
 SAFETY HAZARD  
 TOXICITY AND SAFETY HAZARD  
 Relationships of hazard rate distributions to reliability growth and confidence computations 01 p0077 A66-10109  
 Hazards associated with ignition of various condensed phase hydrogen-oxygen systems 20 p3625 A66-37083  
**HAZE**  
 FOG  
 VISIBILITY  
 Spectral brightness of haze and effect on interpretation of aerial photographs 15 p2504 A66-30006

**HD-1 GROUND EFFECT MACHINE**  
 S HOVERCRAFT HD.1 GROUND EFFECT MACHINE  
**HEAD FLOW**  
 Shape of head wave in linearized supersonic flow past finite span wing, considering waves with convex and concave leading edge 16 p2632 A66-31792  
**HEAD MOVEMENT**  
 Brief Vestibular Disorientation Test /BVDT/ assesses subject reaction produced by head movements in rotating chair 11 p1647 A66-22574  
 Gaze direction lead during slow patterns of head movement 17 p2865 A66-32179  
 Slow waveform of eye position change relative to head oscillating sinusoidally about vertical axis 24 p4163 A66-42449  
**HEALTH**  
 SA HYGIENE  
 SA SANITATION  
 Health hazards in handling and processing beryllium and its compounds, noting effect on lungs and reviewing AEC recommendations 08 p1177 A66-18854  
**HEARING**  
 SA BINAURAL HEARING  
 SA SOUND LOCALIZATION  
 Human engineering of acoustic fatigue for optimum data processing performance [ASME PAPER 66-MD-25] 21 p3700 A66-38481  
 Increased ambient pressure effect on hearing function in divers 22 p3853 A66-39787  
 Sound pressure in external auditory meatus and near center of cat head in absence of animal as function of frequency 22 p3854 A66-40166  
**HEARING LOSS**  
 SA DEAFNESS  
 Monolithic silicon class B hearing aid push-pull amplifier with low idling current and low current drain 01 p0047 A66-11140  
 High noise levels effect on hearing damage of technical personnel of military airfield 04 p0472 A66-14386  
 Noise and vibration causing acoustic fatigue leading to deafness of aircrew 06 p0811 A66-16065  
 Relative contribution of stapedial reflex to remote and contralateral remote masking 09 p1337 A66-20953  
 Noise exposure duration indicator, recording cumulative time exceeding one of five preset sound pressure levels of noise, noting amplifier, rectifier, etc 10 p1536 A66-21742  
 Hearing acuity requirements of aircraft personnel, examining discrimination from background noise and acoustic trauma causative factors 10 p1493 A66-22130  
 Speech audiometry in observing hearing loss with aid of live voice 13 p2015 A66-26700  
 Damage-risk criteria for exposure to sound, including graphs of maximum steady-sound pressures and durations of exposures that can be tolerable 14 p2230 A66-27657  
 Hearing impairment from overexposure to impulsive noise, noting relationship between temporary threshold shift and peak level and duration of impulsive noise 17 p2862 A66-31948  
**HEART**  
 S CARDIOGRAPHY  
 S CARDIOVASCULAR SYSTEM  
**HEART DISEASE**  
 Plane crash as result of pilots coronary disease, discussing prevention and rehabilitation 04 p0469 A66-14387  
 Clinical and medicolegal considerations on fatal case of myocardial infarct involving military pilot in flight 14 p2229 A66-26813  
 Coronary diseases and flight safety 19 p3295 A66-36445  
**HEART FUNCTION**  
 SA MUSCULAR FUNCTION  
 Small Coriolis accelerations effect on functional state of human heart 15 p2437 A66-29474  
 Myocardial glycogenolysis in rat ventricle and relation to severity of exercise 20 p3505 A66-37058  
**HEART RATE**  
 SA PULSE RATE /BIOL/  
 Psychophysiological effects of low friction on man, particularly rotation on visual

reaction time, heart rate and spatial orientation 06 p0868 A66-16240  
 Cardiac arrhythmias occurring during positive and negative acceleration 09 p1335 A66-20532  
 Effects of water immersion, recumbency and activity without negative breathing pressures, measuring heart rate and blood pressure with and without tilting 11 p1642 A66-22573  
 Electrocardiogram interpretation by computer, using pattern recognition approach which permits differentiation between normal and abnormal rhythms 12 p1810 A66-24231  
 Physiological stress and fatigue in aerial missions for forest fire control, noting in-flight and postflight exercise heart rate 12 p1810 A66-25009  
 Physiological reactions of Russian astronauts under prolonged weightlessness, noting motor activity, heart and pulse beat, breathing rates, arterial pressure, etc 15 p2436 A66-29467  
 Daily physiological rhythm changes associated with light intensity and color, noting body temperature oscillations vs light intensity, heart rate changes, etc 15 p2441 A66-29959  
 Sympathetic nervous system integrity following water immersion evaluated by measuring plasma-free fatty acid responses to passive tilting 16 p2639 A66-30649  
 Blood pressure and heart rate during hypothalamic self-simulation in dogs, discussing experimental methods and results, physiological response, etc 16 p2640 A66-31154  
 Impedance plethysmographic system for monitoring right ventricular output to obtain cardiac output 17 p2924 A66-32149  
 Parasympathetic control of heart rate in monkeys under acceleration stress, noting ECG changes and effect of atropine sulfate on change of rate 17 p2857 A66-32176  
 Effect of sudden intense noise and near vacuum decompression on cardiac rate of anesthetized and unanesthetized dogs 19 p3286 A66-36380  
 Tilt table response and blood volume changes associated with 30 days of bed rest, evaluating time required to recover from cardiovascular deconditioning 22 p3853 A66-39785  
 Radio telemetry for acquisition of Circadian rhythm data on ambulatory animal, including deep body temperature, heart rate, locomotor activity and oviposition 22 p3856 A66-39792  
 Flack Test for cardiorespiratory integrity, noting heart rate 24 p4164 A66-42454  
 Tilt table orthostatic tolerance test, noting heart rate change and mechanical systole shortening 24 p4164 A66-42455  
**HEAT**  
 S CALORIMETER  
 S COMBUSTION HEAT  
 S DRY HEAT  
 S ENTHALPY  
 S ENTROPY  
 S FORMATION HEAT  
 S NERNST HEAT THEOREM  
 S NUCLEAR HEAT  
 S SOLAR HEAT  
 S SOLUTION HEAT  
 S SPECIFIC HEAT  
 S THERMAL FATIGUE  
 S THERMAL NOISE  
 S VAPORIZATION HEAT  
**HEAT ACCLIMATIZATION**  
 SA THERMAL COMFORT  
 Effects, singly and in combination, of heat, exercise and hypohydration upon voluntary dehydration in four acclimated physically-fit young men 06 p0812 A66-16533  
 Thermal responses of man during rest and exercise in helium oxygen environment for various temperatures 24 p4163 A66-42317  
**HEAT BALANCE**  
 Energy balances for combustion chambers of gas turbines by electronic computer 03 p0416 A66-13202  
 Experimental apparatus and procedure for thorough testing of satellite heat balance 05 p0659 A66-14682  
 Metabolic rates in pressurized pressure suit, affecting heat balance of subjects

metabolic heat with heat removed by environmental control 07 p0997 A66-17657  
Thermal balance and electric resistance of vacuum-heated wire for thermoconductivity measurements 09 p1390 A66-20830  
Thermal events in diurnal breathing cycle and vapor loss reduction in volatile liquid storage [AICE PREPRINT 11C] 10 p1521 A66-21181  
Limiting conditions of temperature, gas flow rate and heat removal for combustion of methane in atomic oxygen, calculating heat balance of process 16 p2827 A66-30792  
Thermal balance and heat exchange between four men exposed to helium-oxygen atmosphere at 380 mm Hg total pressure 16 p2639 A66-31122  
Calorimetric study of effects of hydrazine on heat balance, source of metabolic energy and rate of protein catabolism of rats 17 p2856 A66-32158

## HEAT BUDGET

## S ATMOSPHERIC HEAT BUDGET

## HEAT CAPACITY

Heat potential theories applied to boundary value problem for heat conduction equation 01 p0160 A66-10167  
Sudden heat capacity change near electron-phonon system transition point from superconducting to normal state 02 p0277 A66-12080  
Anomalous heat conductivity in ferrites at Neel temperature due to corresponding anomalous heat capacity 02 p0277 A66-12088  
Impurity concentration dependence of difference between heat capacities at constant pressure and at constant volume in Ge 02 p0277 A66-12093  
Heat capacity related to quantizing of energy levels of electron excitation of superconductor in intermediate state 02 p0277 A66-12278  
Aluminum carbide thermodynamic properties over large temperature interval calculated from low-temperature heat capacity and high-temperature relative enthalpy 04 p0536 A66-13832  
Heat capacity related to quantization of energy levels of electron excitation of superconductor in intermediate state 05 p0738 A66-15457  
Heat capacity and thermal conductivity related to elastic-mechanical macroscopic physical properties, using invariance properties of tensors 06 p0971 A66-16616  
Heat capacity expression due to chemical reaction, relating composition variations and binary diffusion coefficient with Lewis number, presenting integral equation for system enthalpy 08 p1318 A66-19164  
Strong coupling cell theory of liquid helium, noting heat capacity 09 p1391 A66-20011  
Heat capacity measurements of liquid He 3 to improve precision in determination of effective mass ratio 09 p1392 A66-20014  
Heat capacity of adsorbed He 3 films at temperatures from 0.1 to 4 degrees K, with adsorption surfaces made of monolayers of argon preadsorbed on copper 09 p1392 A66-20020  
True heat capacity of solid heat-resistant dielectric or conducting materials at high temperatures 09 p1470 A66-20141  
Change in heat capacity at Curie point for ferrites 14 p2369 A66-28331  
Heat capacity of high purity beryllium measured at temperatures below 30 degrees K 16 p2775 A66-30727  
Text on thermodynamics of refractory compounds covering thermodynamic properties of borides, carbides, nitrides and oxides of 31 elements 16 p2728 A66-31748  
Thermodynamics including first and second laws, differential and state variables, heat capacity and specific heat 18 p3260 A66-34119  
Experimental assembly for measuring true heat capacity of heat resistant insulating materials during natural cooling at temperatures from 1200 to 2400 degrees K 20 p3556 A66-36989  
Simultaneous measurement of heat conductivity, heat capacity and thermal diffusivity of solid and liquid metals at high temperature 20 p3678 A66-37120  
Magnetization curves for two specimens of semiconducting strontium titanate of given electron density, noting magnetic hysteresis

and heat capacity 21 p3796 A66-38553  
**HEAT DISSIPATION**  
Heat dissipation values for spacecraft silver oxide-zinc primary and nickel oxide-cadmium secondary batteries determined with calorimeter 03 p0323 A66-12772  
Construction problems of continuous-duty DC excited ion lasers 04 p0530 A66-13956  
Thermistor for measuring rate of liquid-phase exothermal and endothermal reactions in terms of heat loss, considering condensation polymerization of terephthalyl chloride with ethylene glycol in dioxane solution 05 p0787 A66-14959  
Dissipative effects in converging cylindrical symmetric shock wave, considering ion and electron heat conductivity, ion viscosity and energy exchange 07 p1025 A66-18180  
Design and application of dry, dielectric and water-cooled dummy loads 12 p1829 A66-23537  
Heat dissipated inside compartments by internal structural members on high speed aircraft 14 p2414 A66-28188  
Thermal models for microwave dissipation within p-i-n diode for forward and reverse biased states 15 p2458 A66-28890  
Cooling of diodes, transistors and thyristors at intermediate power levels, determining heat dissipation by radiation, conduction and convection 16 p2664 A66-31346  
Design and test flying of transistorized sonde used with Suomi-Kuhn radiometer for measurement of heat loss by long wave radiation from atmosphere 19 p3353 A66-35316  
Physical limits of miniaturization, noting element size, packing density, heat dissipation, etc, in connection with integrated circuits 19 p3323 A66-36825  
Cryogenic system used to remove heat from space simulator solar radiation source 20 p3541 A66-37071  
Forced-cooled electronic chassis development history 20 p3527 A66-37347  
Water-circulation-cooled space suit, discussing heat dissipation mechanism, body temperature maintenance, metabolic rates, astronaut comfort, etc 20 p3509 A66-38164  
Thermal loss measurement at tube end during reflection of shock waves, using platinum thermometers and high speed photography 21 p3727 A66-39096  
Dissipation of sheet of heated air in turbulent air flow in pipe 21 p3836 A66-39445

## HEAT EFFECT

## SA ABLATION

## SA PELTIER EFFECT

## SA THERMAL DEGRADATION

Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability 14 p2400 A66-27684  
Heat magnetization in simple model applied to thulium intermetallic compounds 16 p2745 A66-30177  
Hypersonic flow, discussing heat effect on flow parameters, shock and motion equations, drag increase, etc 22 p3897 A66-39699  
Heating environment for space vehicle, examining wind and incident radiation effects on heat transfer to liquid hydrogen, insulation surface thermal properties and optimization of insulation system 22 p3986 A66-39777

## HEAT ENGINE

## SA AFTERBURNER

## SA CARNOT ENGINE

## SA ELECTROTHERMAL ENGINE

## SA GAS GENERATOR ENGINE

## SA INTERNAL COMBUSTION ENGINE

## SA POWER PLANT

## SA TURBINE

Brayton cycle nuclear space power systems and heat transfer components 01 p0016 A66-10913  
Gaseous heat engine cycle with gas compression from molecular effusion through capillary material 11 p1639 A66-22244

## HEAT EQUATION

Partial-region method for solving nonsteady heat conduction problems in which region considered is divided into several subregions 01 p0163 A66-10739  
Reduction of quasi-linear partial

differential equations to single linear heat equation 02 p0251 A66-12157  
Cauchy problem of heat conduction equation and inversion of Weierstrass transform on certain symmetrical Riemann spaces 03 p0444 A66-12771  
Contact effectiveness of space radiator for specific case of rectangular fin of constant thickness heated uniformly along one edge and perfectly insulated along opposite edge 03 p0444 A66-12771  
Hydrothermodynamic equations for calculating velocity, temperature and pressure fields and water content for model of stationary axisymmetric cumulus cloud 04 p0540 A66-13416  
Method for steady state heat conduction bodies of revolution 04 p0596 A66-13416  
Heat equation of temperature field for monotonic heating or cooling of thin plate 04 p0596 A66-13416  
Numerical integration of heat propagating equation, calculating temperature field for fluid flow with variable physical parameters 04 p0596 A66-13416  
Charged fluid in presence of electromagnetic induction and thermodynamic exchange, noting Cauchy problem, thermodynamic and heat equations 05 p0787 A66-15160  
Derivation of wave-type heat equation satisfying second law of thermodynamics and modified Onsager symmetry relations 06 p0971 A66-16616  
Unsteady heat conduction in finite homogeneous region of arbitrary geometry and initial conditions with inhomogeneous boundary conditions 07 p1150 A66-17516  
Uniqueness theorem for Cauchy problem for heat equation, using Poisson representation 07 p1153 A66-17516  
Poisson representation and Cauchy problem for heat equation, with improved results over previous paper 07 p1153 A66-17516  
Networks method applied to approximate solution of heat conduction equation for spatial boundary conditions with aid of theory of hypermatrices 07 p1153 A66-17516  
Approximate reentry velocity and heating equations applied to any atmosphere satisfying hydrostatic equilibrium, noting motion equations for flight path 08 p1303 A66-18887  
Analog computers used in modeling of heat conduction and diffusion processes for Fourier differential equation 08 p1319 A66-19422  
Heat conduction equation for convective flow applied to gunpowder combustion under harmonic pressure variation 08 p1280 A66-19422  
Free boundary problem for heat equation with heat input at melting interface 09 p1470 A66-20202  
Steady thermal regimes in multilayered medium with perfect and imperfect contact and varying heat conductivity 09 p1471 A66-20202  
Mathematical model of flame propagation in laminar and turbulent flow 10 p1619 A66-21077  
Approximate solution of initial boundary value problems involving heat conduction in inhomogeneous and anisotropic media 10 p1620 A66-21322  
Heat conduction equation for axisymmetric pulse heating of cylindrical sample with constant surface conditions 10 p1622 A66-21887  
Closed-form solution for constant velocity solidification of spheres initially at fusion temperature 10 p1622 A66-21887  
Numerical solution of heat conduction in gas dynamics equations by sifting over separate regions 11 p1785 A66-22333  
Alternating direction schemes for heat equation in general cross sections with 1 space dimensions and nonlinear equations 11 p1722 A66-22996  
Linear heat conduction in metals with temperature-dependent physical properties and constant illumination 11 p1787 A66-23262  
Revised equation for thermokinetic phenomena under Fourier relationship considering certain finite time is required for development, noting role of fluid density 12 p1973 A66-23552  
Conservation principle as applied to heat

equation, assuming equation is one-dimensional 12 p1974 A66-23530

Variational principle application to heat conduction in solids, noting temperature dependence, physical meaning of Lagrangian heat flow between parallel plates, etc 12 p1975 A66-23542

Heat conduction problem simulation, using moving interfaces, solving Stefan and Verigin problems 12 p1978 A66-24371

Plane stationary problem of heat conduction for mixed boundary conditions solved, using Fredholm integral equation with symmetrical kernel 12 p1979 A66-24372

Heat transfer equations for rocketborne stratospheric temperature sensor in form of spherical bead thermistor and experimental analysis of physical, thermodynamic and electrical characteristics of rocketsonde [AIAA PAPER 66-385] 12 p1882 A66-24508

Generalized heat equation solution expansion in terms of radial heat polynomials, Appel transforms and Laguerre polynomials 13 p2118 A66-25793

Solution of quasi-static problem in thermoelasticity for cylinder with time dependent boundary conditions obtained as series of Bessel functions and error functions 14 p2397 A66-27385

Uniqueness theorems of Cauchy problem for parabolic equations of heat conduction 14 p2322 A66-27630

Motion equations for beam with lateral surface thermally insulated, including effects of shear deformation and rotatory inertia and thermoelastic coupling in heat conduction equation 14 p2399 A66-27661

Approximate continuation of harmonic and parabolic functions as solutions of Laplace and heat equations 16 p2732 A66-30242

Propagation theory of chaotic movements in connection with propagation of heat 16 p2693 A66-30581

Asymptotic behavior of solutions to equations for laminar boundary layer far from wall 16 p2684 A66-30582

Solution of heat-conduction equation over functional spaces possessing fractional derivatives with respect to time, applied as solution to first boundary value problem 16 p2827 A66-30779

Temperature distribution and efficiency of thick plate and annular fins used on heat exchangers, space radiators and nuclear fuel elements analyzed through heat conduction equation 16 p2827 A66-30815

Radiant energy transport within cryogenic condensates extended to case of explicitly varying condensate depths and wider substrate temperature range 16 p2830 A66-31712

Floating random walk and use in Monte Carlo solutions to partial differential equation of heat conduction 16 p2739 A66-31720

Stationary heat conduction problems with internal heat sources treated by Kontorovich variational method 17 p3034 A66-32565

Partial differential equation describing transient conduction in multidimensional inhomogeneous media solved by method based on use of known boundary conditions 18 p3262 A66-34380

Additional conditions for boundary value problem with directional derivative in heat conduction 18 p3127 A66-34544

Temperature at wedge under action of heat source of variable dimensions and intensity 18 p3266 A66-35052

Plane steady state problem solved in thermoconductivity theory in case of boundary conditions of third kind for regions of special shape 18 p3267 A66-35055

Heat equation solution in form of series in time derivatives of boundary functions arranged in ascending order 18 p3267 A66-35057

Third boundary problem solution for two-dimensional equation of thermal conductivity in arbitrary region by locally one-dimensional method 19 p3478 A66-35934

Accuracy analysis of variable-direction diagrams for numerical solutions to heat conductivity equations 19 p3478 A66-35937

Thermal conductivity equation solved for four combinations of concentration of radioactive elements in lunar crust, using result for crust thickness

estimate 20 p3648 A66-37151

Properties of functions of metaharmonic and metacaloric equations, using Liouville-Picard theories together with Harnack theory for solutions 21 p3837 A66-39611

Poisson representation of solutions to Cauchy problem for heat equation, showing applicability of Nicolescu method of imaginary reflection 21 p3837 A66-39612

Heat equation solution by use of Crandall optimum finite difference method with boundary discontinuity 22 p3997 A66-40029

Integral equation for heat flux in inverse heat conduction for infinite flat plate as in solid rocket igniters 22 p3998 A66-40031

Thermal transient characteristics of prolate spheroidal solid, using diffusion equation for heat conduction 22 p3998 A66-40034

Heat transfer equation solution for ablating solid, assuming exponential temperature profile with numerical solution on digital computer by Runge-Kutta method 22 p3998 A66-40035

Transient heat conduction problems solved by high capacity computers 22 p3999 A66-40379

Simultaneous one-dimensional heat conduction equations solved by means of matrix similarity transformations in direct computational procedure 22 p3940 A66-40488

Reduction of PDE system of heat transfer, using Hermitian approximating polynomials to obtain solution to initial system 23 p4041 A66-40971

Numerical solution via digital computer of nonlinear transient heat conduction with phase changes 23 p4149 A66-41697

# HEAT EXCHANGER

## SA REGENERATOR

## SA TUBE HEAT EXCHANGER

Heat transfer unit, operational method and data relating heat exchanger performance to deposit forming tendencies of jet fuel for supersonic aircraft [SAE PAPER 650803] 01 p0128 A66-10845

Book on fluid flow and heat transfer for designing, selecting, testing and installing various heat exchangers 02 p0305 A66-12240

Convective heat exchanger using air and subjected to resonant pulsating flow [ASME PAPER 65-HT-30] 04 p0595 A66-13392

Heat loss in space, discussing temperature regulation during space walk via heat exchangers in air ventilated space suit 04 p0470 A66-14070

Effectiveness of split cross-flow heat exchangers, emphasizing uniform exit temperature distribution for unmixed fluids [ASME PAPER 65-HT-24] 05 p0783 A66-14745

Regenerative heat exchangers, covering heat transfer and pressure loss characteristics of glass ceramic matrix materials [ASME PAPER 65-HT-35] 05 p0784 A66-14750

Exact solution for wall and fluid temperature distributions for counterflow heat exchanger with effect of longitudinal heat conduction [ASME PAPER 65-HT-63] 05 p0786 A66-14764

Equilibrium conditions for whole complex cryogenic cycle analyzed by means of Claude-Heyland cycle 05 p0786 A66-14900

Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 05 p0689 A66-15611

Single fluid heat exchanger, using Lagrange method and thin walled stainless steel tube for theoretical and experimental dynamic response analysis [ASME PAPER 65-WA/HT-9] 05 p0791 A66-15653

Aerodynamically induced vibration in coolers, describing inclined splitter plates for noise and structural vibration elimination 07 p0991 A66-17492

Heat transfer coefficients in liquid metal concurrent flow double pipe heat exchangers 07 p1150 A66-17582

Heat exchange through absorbing media, determining combined modes of radiation and conduction via exchange factor approximation 07 p1152 A66-17590

Polytropic technique for gas turbine performance, prediction and evaluation, noting use of sophistication factor

[SAE PAPER 660161] 09 p1434 A66-20161

Stagnation temperature control of high-pressure supersonic wind tunnel, using regenerative heat exchangers with porous packing 09 p1471 A66-20802

Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 10 p1539 A66-21502

Single fluid heat exchanger, using Lagrange method and thin walled stainless steel tube for theoretical and experimental dynamic response analysis [ASME PAPER 65-WA/HT-9] 11 p1785 A66-22193

Formula determining tubing length in heat exchanger required for steady state heat-transfer coefficient, noting role of Prandtl number 12 p1973 A66-23525

Nonuniform thermal flux for fuel elements and core of nuclear heat exchangers, determining heat transfer coefficient between adjacent fluid streams by mass transfer 12 p1973 A66-23527

Dimensioning heat transfer in compact plate fin heat exchangers under nonuniform temperature variation and heat conductance 12 p1978 A66-24034

Single blow transient testing of compact heat exchanger surfaces [ASME PAPER 66-GT-93] 14 p2411 A66-26997

CERCOR glass-ceramic axial flow rotary regenerator as inexpensive component for gas turbine regeneration [ASME PAPER 66-GT/107] 14 p2301 A66-27004

Incompressible fluid static thrust augmentation devices for aircraft propulsion for cases of presence and absence of heat and work exchange [ASME PAPER 66-GT-116] 14 p2373 A66-27008

Forced convection heat transfer in symmetrical ducts when fluid is liquid metal, examining new prediction methods for engineering analysis and design 16 p2824 A66-30304

Temperature distribution and efficiency of thick plate and annular fins used on heat exchangers, space radiators and nuclear fuel elements analyzed through heat conduction equation 16 p2827 A66-30815

Design and laboratory tests of vapor-phase heat exchanger coupled to power generating bismuth telluride thermopile for waste heat dissipation 16 p2637 A66-31101

Water conditioned suit performance characteristics noting cooling rate, inlet and outlet temperatures, etc 16 p2643 A66-31131

Nonstationary heat-transfer coefficient dependence on thermal stress variation in heat exchanging surface 17 p3034 A66-32559

Aerodynamic noise in wind tunnel heat exchanger 18 p3094 A66-34020

Unidirectional regenerator problem analytically solved, presenting local effectiveness graphs 18 p3261 A66-34361

Vapor-fin heat rejection system employing boiling-condensing cycle, noting performance characteristics 18 p3055 A66-34381

Heat transfer effectiveness-number of transfer unit relations determined, using differential equations to obtain temperature profile of each channel in exchanger 18 p3262 A66-34382

Feasibility analysis of very high temperature uranium-bearing liquid alloy heat exchanger for hydrogen gas, considering several ternary component liquid alloy systems [AIAA PAPER 66-622] 19 p3476 A66-35358

Feasibility of using water condensates recovered from heat exchangers of pressure suits as emergency drinking water source 19 p3294 A66-36379

Indirectly heated PTC resistor for measurements of low pressures and high air velocities, noting basic circuit and application to heat exchangers 19 p3362 A66-36824

Heat exchangers for liquid hydrogen conversion to ambient temperature hydrogen gas, using water heat source 20 p3677 A66-37102

Equilibrium control and burning rate control of solid propellant in heat

exchanger 20 p3629 A66-38155  
 Ranque tube application for gas cooling, discussing performance characteristics of vortex tube with and without heat exchanger 21 p3334 A66-38625  
 Recirculation of liquid through cell and external heat exchanger to solve problem of repeated flashing in europium chelate lasers 21 p3747 A66-39108

## HEAT FLOW

## SA SOLAR HEAT FLOW

Natural convection at thermal leading edge on vertical wall matched with known solution immediately above this region 02 p0304 A66-12199  
 Biot variational method applied to transient heating of porous half-space from which gas escapes [AIAA PAPER 65-118] 03 p0444 A66-12766  
 Negative correlation coefficient between Izsak satellite geoid and Lee and MacDonald heat flow distribution, suggesting correlation between geoidal undulations and heat flow highs and lows 04 p0518 A66-14454  
 Electrical analog model with distributed capacitance and resistance generates charge flow equivalent to two-dimensional transient heat conduction [ASME PAPER 65-HT-66] 05 p0786 A66-14766  
 Macrokinetics of homogeneous-heterogeneous processes in moving media and estimates of initial material concentration in core and boundary layer regions of reaction vessel flow 06 p0971 A66-16543  
 Digital and numerical method solution of transient heat flow problems 07 p1150 A66-17577  
 Thermal stresses due to axisymmetric heat flow past spherical cavity inside long circular cylinder solved by stress functions and thermoelastic displacement potentials 08 p1313 A66-19547  
 Damping of small amplitude vibrations of fine wire as probe of onset and development of critical flow phenomena in He 2 at moderate Reynolds numbers 09 p1365 A66-20016  
 Time dependent stability of one-dimensional laminar flames with distributed heat losses 10 p1621 A66-21809  
 Generalized theorem of minimum entropy production in terms of fluctuation theory and variational principle, noting application to heat flow in rarefied gases 12 p1974 A66-23541  
 Classical and quantum mechanical turbulence in Helium 2 heat flow, noting transition from laminar turbulent flow of normal and superfluid component, Reynolds number dependence on mutual friction coupling, etc 13 p2128 A66-26275  
 Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes 13 p2206 A66-26459  
 Thermoconductivity and electrical resistivity measurements with derived Lorentz functions for various compounds, using longitudinal heat flow 16 p2771 A66-30252  
 Radiometric temperature measurement of Mars surface microclimate, examining heat flow balance, taking into account solar and planetary radiation effects [AIAA PAPER 66-436] 16 p2799 A66-30522  
 Evolution of two different homogeneous media separated by straight wall with arbitrary transmission and reflection properties, noting heat flow, vibration, diffusion coupled vibration, etc 17 p3036 A66-32842  
 Numerical methods applied to class of flowing fluid thermal problems in space radiators for life support and auxiliary power systems [AIAA PAPER 66-431] 18 p3097 A66-33644  
 Coolant passage wall temperature measurement in nuclear rocket nozzle during chemical stimulation testing by radiometry without affecting hot gas or coolant flow or disrupting heat flow 19 p3356 A66-35632  
 Numerical integration of boundary layer equations for dissociating gas flows, determining heat flow near stagnation point 19 p3341 A66-35739  
 Two-dimensional problems in which heat

flow is predominantly in one direction solved by approximate methods, noting constant profile of temperature 19 p3478 A66-35854  
 Thermal analysis and weight optimization of low-heat-leak storage tanks, particularly aspects important to designers of propellant tanks for long-term lunar storage 20 p3676 A66-37078  
 Role of radiative transfer in mechanism of heat flow in lunar surface, noting magnitude of contribution to transfer 20 p3648 A66-37260  
 One-dimensional heat flow equation for liquid nitrogen end-cooled ruby laser rod 20 p3581 A66-38386  
 Griffith type crack propagation due to localized thermal stress at holes, cavities, penny-shaped cracks and inclusions disturbing uniform heat flow 23 p4146 A66-41993

## HEAT FLUX

Release of persistent current energy by local heat injection and propagation through Nb-Zr wires 01 p0116 A66-10238  
 Heat flux measurements and electrode temperature estimation in pulse electromagnetic plasma accelerator 02 p0265 A66-11398  
 Heat flux from lunar emission incident on surface in circular orbit as function of orbital parameters [AIAA PAPER 64-336] 03 p0425 A66-12756  
 Direct measurements of turbulent thermal flux using airborne pulse type system 04 p0513 A66-13418  
 Measuring thermal fluxes in solid bodies by high temperature gas jets, noting Kastelin-Bronsky method 04 p0596 A66-13653  
 Radiant heat fluxes on surface of heating body with varying temperature 04 p0597 A66-13822  
 Spectral dynamics of laminar convection, discussing transformation of Benard convection problem into spectral domain 04 p0599 A66-14472  
 Nucleate boiling instability of alkali metals noting effects of surface material, chemical treatment, heat flux and cavity geometry [ASME PAPER 65-HT-22] 05 p0783 A66-14743  
 Nonlinear inverse heat conduction problem solved by finite difference method, using least squares and future temperatures [ASME PAPER 65-HT-40] 05 p0784 A66-14753  
 Commercial grade sodium boiling from horizontal disk at various pressures and temperatures attaining high heat fluxes, noting surface finish effects [ASME PAPER 65-HT-51] 05 p0785 A66-14758  
 Pool boiling potassium, discussing heat flux behavior, experimental setup and results for burnout heat flux 07 p1152 A66-17593  
 Discrete bubble regime to merging bubble regime transition in nucleate boiling of methanol and water 07 p1152 A66-17594  
 Thermal conditions in boiling liquids including container wall damage-flux density relationship, stable and unstable boiling in bubble evaporation region and film vaporization 07 p1154 A66-18066  
 Exchange of energy between ionosphere and protonosphere, noting nonlocal heating by photoelectrons, thermal conductivity and heat input by downward flux 08 p1215 A66-19204  
 Distribution of specific thermal flux on body surface heated by plasma jet 09 p1407 A66-20139  
 Measuring thermal flux produced in reflection of shock waves from plane heat-conducting wall 09 p1469 A66-20140  
 First-order perturbation analysis of free convection of liquid metal from isothermal vertical finite plate extended to uniform heat flux 10 p1619 A66-21054  
 Nonuniform thermal flux for fuel elements and core of nuclear heat exchangers, determining heat transfer coefficient between adjacent fluid streams by mass transfer 12 p1973 A66-23527  
 Rarefied gas flow problems solved by hydrodynamic equations and representations of stress tensor and heat flux reproducing Navier-Stokes continuum limit and free molecule limit, noting velocity distribution interpolation 13 p2061 A66-25163  
 Pressure distribution and heat flux on surface of nose cone 14 p2217 A66-27337

Thermokinetic transcendental equation for heat flux through three juxtaposed walls and handling of singularity difficulties [PST PAPER NT-148] 14 p2414 A66-27839  
 Solution for free nonstationary convection in bounded region of Landau-Lifshitz mechanics of continuous media 14 p2414 A66-28282  
 Heat pipe exhibiting very high effective thermal conductivity, showing temperature distribution, boiling heat transfer coefficients, vapor temperature and pressure drop 16 p2827 A66-30910  
 Nucleate boiling instability of alkali metal noting effects of surface material, chemical treatment, heat flux and cavity geometry [ASME PAPER 65-HT-22] 16 p2828 A66-30988  
 Commercial grade sodium boiling from horizontal disk at various pressures and temperatures attaining high heat fluxes, noting surface finish effects [ASME PAPER 65-HT-51] 16 p2828 A66-30988  
 Surface heating rates for metals, semiconductors and insulators subject to high irradiance produced by carbon-arc image furnace 16 p2829 A66-31088  
 Direct measuring radiation calorimeter developed for determining radiant heat flux of solid propellant gas flame in rocket combustion chambers [AIAA PAPER 65-358] 18 p3159 A66-33819  
 Fluid dynamics equations of state, motion continuity and energy stress-strain relationship and shearing stress deformations 18 p3098 A66-34121  
 Conservation equations for two-dimensional axisymmetric simultaneous turbulent mixing and supersonic combustion of hydrogen-oxygen-nitrogen-water streams solved by finite difference methods [AIAA PAPER 66-617] 18 p3099 A66-34211  
 Critical heat flux for boiling water, sodium and rubidium, correlating burnout data for liquid metals only and as relation to metallic and nonmetallic fluids 18 p3262 A66-34374  
 Solid propellant ignition, discussing deflagration wave propagation along gas-solid grain surface, flux equilibrium equation, etc [AIAA PAPER 66-668] 18 p3165 A66-34440  
 Electrostatic field influence on nucleate boiling of Freon 113, noting improvement of peak heat flux 19 p3477 A66-35400  
 Stratification with bottom heating analysis using approximate integral approach 19 p3477 A66-35633  
 Compressive load effects on heat flux through multilayer insulation 20 p3675 A66-37068  
 Surface temperature of seminfinitesimal solid exposed to one-dimensional heat flux calculated with method allowing accuracy at long time intervals 20 p3678 A66-37388  
 Heat-flux density transmitted by relatively broad low-velocity argon plasma jet to vertical cold plate 20 p3608 A66-37466  
 Laminar forced convection heat transfer to gas from circular tube, achieving boundary condition of uniform heat flux 20 p3679 A66-37500  
 Ablation analysis in cylindrical coordinate for axisymmetrical configuration of wall materials with temperature-dependent properties and nonlinear heat flux conditions at boundaries [AIAA PAPER 66-542] 20 p3680 A66-38039  
 Hydrogen/oxygen and hydrogen/air flame temperature experiments on porous flame burner 20 p3680 A66-38044  
 Stability analysis of one-dimensional steady laminar flame propagation with conductive heat loss 20 p3680 A66-38044  
 Turbulence energy balance equation used in air mass transformation problem 20 p3594 A66-38366  
 Atmospheric stratification effect on radiative thermal flux, including diagram for flux estimate from temperature gradient 20 p3594 A66-38377  
 Heat transfer between turbulent flow of air and isothermal wall plate and constant thermal flux at surface 21 p3835 A66-38990  
 Thermal loss measurement at tube end during reflection of shock waves, using platinum thermometers and high speed photography 21 p3727 A66-39093  
 Distribution of specific thermal flux of

- body surface heated by plasma  
 et 21 p3793 A66-39411
- Measuring thermal flux produced in  
 reflection of shock waves from plane heat-  
 conducting wall 21 p3836 A66-39412
- Hypergolic ignition of composite solid  
 propellants, examining oxidizer  
 concentration, heat flux and exothermic  
 reactions 22 p3969 A66-39871
- Integral equation for heat flux in inverse  
 heat conduction for infinite flat plate as in  
 solid rocket igniters 22 p3998 A66-40031
- Nonlinear boundary value problem for  
 temperature distribution in convex solid  
 with radiation boundary  
 condition 22 p3999 A66-40565
- Heat flux dependence and directional  
 effect of thermal contact resistance for  
 interface between dissimilar  
 metals 22 p4006 A66-40921
- Welding, thermal flux control and  
 contamination prevention of Saturn rockets,  
 particularly fusion  
 welding 23 p4073 A66-41534
- Reentry heat flux condition transformation  
 into specified convective coefficients and  
 temperatures, accounting for variation of  
 flux with wall 24 p4261 A66-42795
- Upward heat flux with vanishing counter  
 potential temperature gradient in lower  
 atmosphere and in laboratory  
 experiments 24 p4202 A66-42983
- HEAT GENERATION**
- Heat transfer of internal heat generating  
 fluid in turbulent regime, using electrical  
 dissipation and measuring wall to bulk  
 temperature differences  
 [ASME PAPER 65-WA/HT-15] 05 p0790 A66-15649
- Behavior of current carrying  
 superconducting coil with heat generation in  
 windings, noting voltage-current  
 characteristics 10 p1509 A66-21562
- Plasma oscillation theory of nonlinear  
 acceleration effect and thermal conversion  
 of electron beams upon passage through  
 plasma 17 p2974 A66-33284
- Heat transfer of internal heat generating  
 fluid in turbulent regime, using electrical  
 dissipation and measuring wall to bulk  
 temperature differences  
 [ASME PAPER 65-WA/HT-15] 22 p3997 A66-40028
- Approximate solution of variation problems  
 in heat explosion theory, noting difficulty  
 resulting from heat liberation dependence on  
 temperature 24 p4295 A66-42884
- HEAT PUMP**
- Seebeck and Thomson coefficients and  
 variable resistivity effects on thermoelectric  
 heat pump performance 09 p1333 A66-20971
- Thermomolecular heat pump with cooling  
 from gas diffusion through capillary material  
 driven by external pressure  
 difference 11 p1639 A66-22245
- HEAT REGULATION**
- Personal thermal conditioning system  
 emphasizing heat exchange between body  
 and environment to provide comfort with  
 water-cooled protective  
 clothing 02 p0188 A66-12012
- Thermal management of Lockheed L-2000  
 supersonic transport heat sources and sinks,  
 considering flight profile, aircraft  
 configuration and heat transfer modes  
 [ASME PAPER 65-AV-40] 09 p1329 A66-20298
- Heat regulation, acclimatization and human  
 tolerance upon exposure to moderate, hot  
 and cold temperatures 10 p1489 A66-22119
- HEAT REJECTION DEVICE**
- SA RADIATOR**
- Heat rejection from space radiator of  
 power system used as energy source when  
 integrated with life support  
 system 02 p0186 A66-11642
- Potassium condensing tests of horizontal  
 multitube convective and radiative  
 condensers operating at vapor temperatures  
 from 1250 to 1500 degrees  
 05 p0786 A66-14932
- Heat pipes as heat removal systems in  
 space thermionic power supplies, discussing  
 laminar, turbulent flow and heat transfer  
 efficiency 05 p0789 A66-15542
- Heat pipe performance, emphasizing heat  
 carrying and waste heat dissipation  
 functions, construction and materials  
 testing 05 p0616 A66-15543
- Heat pipe characteristics covering  
 performance analysis and experimental  
 results such as heat transfer rate, life tests,  
 working liquid selection,  
 etc 05 p0616 A66-15544
- Refractory material cermet fabrication,  
 discussing techniques of preparation, fuel-  
 metal compatibility and fuel  
 canning 05 p0713 A66-15585
- Heat rejection per unit weight of radiator  
 with evolve type reflectors compared with  
 radiators with rectangular fins, considering  
 mutual irradiations of neighboring radiator  
 parts  
 [ASME PAPER 65-WA/HT-17] 05 p0790 A66-15647
- Vapor-fin heat rejection system employing  
 boiling-condensing cycle, noting performance  
 characteristics 18 p3055 A66-34381
- HEAT RESISTANCE**
- Strength and heat resistance of alloys,  
 particularly low alloy  
 steels 01 p0084 A66-10286
- Heat transfer between metallic surfaces in  
 contact  
 [AIAA PAPER 65-661] 01 p0086 A66-10599
- Heat resistance in air of four industrial  
 austenitic-ferrite steels with low nickel  
 content at 750-1050 degrees C, noting oxide  
 scale formation 01 p0088 A66-10988
- Packaging techniques interrelated with  
 design specification and manufacturing  
 capabilities noting integrated circuit system,  
 circuit reliability and thermal  
 resistance 02 p0200 A66-11891
- Thermomechanical treatment and  
 temperature on diffusion mobility and heat  
 resistance of titanium  
 alloys 03 p0384 A66-13170
- Temperature effect of plastic deformation  
 on aging kinetics of heat resistant austenitic  
 steels 03 p0385 A66-13171
- Stable dislocation structures obtained by  
 high and low temperature and  
 precrystallization thermomechanical  
 treatment 03 p0385 A66-13172
- Improvement of heat resistance of nickel  
 by high temperature thermomechanical  
 treatment 03 p0385 A66-13173
- Boron addition induced nickel heat  
 resistance measured by internal friction as  
 function of elastic  
 oscillations 05 p0699 A66-14690
- Electrically active impurities effect on  
 germanium thermal resistivity at low  
 temperatures measured on n-type single  
 crystals 05 p0742 A66-15875
- Heat resistant chromium carbide coating  
 with silicate binder applied to  
 steel 06 p0896 A66-18609
- Thermal fatigue of constrained bars made  
 of linearly hardened material evaluated,  
 using mathematical  
 analysis 06 p0967 A66-16969
- Heat resistance and tensile strength of  
 aluminum filament wire compared to  
 ordinary wire 07 p1049 A66-17869
- Sample deformation measuring device for  
 short duration heat resistance  
 tests 07 p1148 A66-18390
- Steady cooling regime of pseudoliquefied  
 layer, determining cooling time and heat  
 transfer coefficients of solid particles and  
 liquid media 08 p1317 A66-18865
- Binary, ternary and quaternary niobium  
 alloy mechanical properties such as  
 resistance to heat, plastic deformation,  
 relation between hardness and rupture  
 strength, etc 08 p1239 A66-18905
- Supersonic aircraft finishes resisting  
 corrosion and high temperatures, including  
 epoxy-amine cured primers, acrylic paints,  
 silicone, synthetic enamels,  
 etc 10 p1547 A66-21136
- Endurance and creep of chromium steels  
 with extended thermal  
 treatment 11 p1716 A66-22746
- Heat resistant nickel-based alloys for gas  
 turbine blades and disks 11 p1716 A66-22752
- Destruction of heat resistant alloys by  
 repeated heating and cooling, deriving  
 formulas which are applied to thermocyclic  
 loads under conditions of stressed  
 state 14 p2310 A66-26790
- Heat resistance, bending and tensile creep  
 of multicomponent Ti  
 alloys 15 p2519 A66-28534
- Trace element effect on lifetime of iron-  
 chromium-aluminum heat-resisting  
 alloy 16 p2723 A66-30311
- Mechanical strength, toughness, elastic  
 modulus, relaxation stability and specific  
 conductivity of copper-titanium  
 alloys 16 p2727 A66-31568
- Structural changes effect on creep  
 resistance of heat resistant  
 alloys 16 p2728 A66-31801
- Effect of temperature, pressure and initial  
 wall treatment on thermal resistance at  
 stainless steel-liquid metal  
 interface 17 p3036 A66-32845
- Heat resistance in air of dispersion  
 hardened nickel alloys containing certain  
 oxides prepared by powder metallurgy  
 methods 18 p3123 A66-33785
- Natural convective heat transfer to gas  
 turbine rotor blade and thermal resistance  
 of cooling system using centrifugal  
 pump 20 p3627 A66-36926
- Experimental assembly for measuring true  
 heat capacity of heat resistant insulating  
 materials during natural cooling at  
 temperatures from 1200 to 2400 degrees  
 K 20 p3556 A66-36989
- Heat sink construction for semiconductor  
 devices 20 p3526 A66-37345
- Nitrogen addition effect on heat resistance  
 of chromium-manganese-austenitic  
 alloys 20 p3584 A66-37695
- Heat resistance of coarse- and fine-grained  
 D20 aluminum alloy 22 p3936 A66-40878
- Alloying principles for refractory metals  
 based on softening mechanism, examining  
 increased heat resistance of rhenium  
 softened by  
 recrystallization 23 p4082 A66-41822
- Thermal conductivity change in single  
 crystal InSb irradiated with electrons,  
 noting additive thermal resistivity  
 increases 24 p4249 A66-42228
- Electron microprobe for studying  
 thermoelectric materials and heat-resistant  
 steel for gas-turbine  
 blading 24 p4211 A66-42507
- Heat resistance of refractory alloys  
 containing nickel, cobalt, tungsten, niobium,  
 etc, and cermets, noting application in  
 rocket engines 24 p4228 A66-43049
- Flat-pack case for thermal resistance of  
 integrated circuit to space  
 environment 24 p4186 A66-43059
- HEAT SHIELD**
- SA RADIATION SHIELDING**
- SA SPACECRAFT SHIELDING**
- SA THERMAL PROTECTION**
- Maximum temperature profile in phenolic  
 resin-siliceous fiber heat shields on ICBM  
 and Mercury spacecraft  
 [AIAA PAPER 65-638] 01 p0162 A66-10596
- Cermet ablatives for thermal shields in  
 fabrication of nozzles and nose cones  
 [SAE PAPER 650767] 01 p0078 A66-10838
- Gemini ablative heat shield, noting  
 nonmetallic honeycomb reinforcement of  
 insulative char 02 p0294 A66-11639
- Turbulent boundary layer interaction with  
 graphite heat shield noting boundary layer  
 velocity, temperature and chemical  
 composition profiles  
 [AIAA PAPER 65-824] 03 p0446 A66-13232

07 p1151 A66-17587
- Ozone decomposition effect upon heat transfer determined, using differential energy and material balance equations  
07 p1152 A66-17595
- Nucleation and boiling liquids phenomena, using Clapeyron equation in expressing saturation curve  
07 p1154 A66-18029
- Heat transfer and stability of laminar hypersonic separated flow around annular cavity conical model  
07 p0981 A66-18117
- Heat and mass transfer in ion exchange membrane fuel cells  
07 p0995 A66-18326
- Boiling heat transfer in liquid metals including boiling instability, superheats, two-phase flow, forced convection, heat flux, etc  
08 p1316 A66-18684
- Papers on interactions of space vehicles with ionized atmosphere  
08 p1302 A66-18742
- Heat transfer and mass flux expressions for recombination interactions at solid-gas interface due to transport of atomic and ionized particles to spacecraft in ionosphere  
08 p1161 A66-18747
- Stagnation point velocity and pressure distribution over heat-sink shielded reentry vehicle to test boundary layer heat transfer theories  
08 p1161 A66-18811
- Pressure distribution and heat transfer for laminar boundary layer flow over highly swept blunt delta wings in hypersonic free stream  
[AIAA PAPER 66-130] 08 p1162 A66-18953
- Shock tunnel heat transfer measurement and hypersonic viscous flow over pointed cones, particularly viscous-layer regime at low Reynolds numbers  
[AIAA PAPER 66-34] 08 p1163 A66-18957
- Heat transfer processes during ignition of solid propellant rockets, considering radiative and convective components  
[AIAA PAPER 66-66] 08 p1279 A66-18992
- Stagnation point viscous shock layer equations for three-component gas model in chemical nonequilibrium and binary gas model in vibrational and chemical nonequilibrium, noting heat transfer rates  
08 p1164 A66-19125
- Compressible turbulent boundary layer as momentum integral and moment-of-momentum integral equations for arbitrary pressure gradient, noting surface heat-transfer effects  
08 p1207 A66-19126
- Heat transfer in 20-inch hypersonic wind tunnel to two-dimensional inlet ramp at various angles of attack  
08 p1318 A66-19147
- Light pulse absorption in gas and measurement of temperatures attained noting hydrodynamic, breakdown and radiative transfer mechanisms and wave velocities  
08 p1319 A66-19276
- Coolant injection in turbulent boundary layer for protection of surfaces from effects of high temperature and high energy gas flows  
08 p1320 A66-19429
- Time variation in boiling heat transfer caused by bubble generation  
08 p1320 A66-19557
- Momentum, heat and mass transfer in turbulent boundary layer flow of power law fluids over smooth flat plate  
08 p1210 A66-19679
- Hypersonic shock tunnel study, examining effects of roughness, bluntness and angle of attack on boundary layer transition  
08 p1166 A66-19813
- Modified Cochran method giving valid expansions for singular perturbation problems in heat transfer  
09 p1469 A66-20084
- Soviet and foreign papers on physics of boiling including heat transfer, heat release, bubbling processes, kinetics and sonic aspects of boiling and bibliography  
09 p1469 A66-20100
- Measuring thermal flux produced in reflection of shock waves from plane heat-conducting wall  
09 p1469 A66-20140
- Engineering method for measuring rapidly changing temperatures of gas flow with steady or variable heat transfer  
09 p1470 A66-20142
- Critical heat flux under forced motion of underheated alcoholic aqueous solutions  
09 p1470 A66-20148
- Heat transfer through turbulent incompressible boundary layer in presence of moderate pressure gradient  
09 p1366 A66-20174
- Forced convection problem for steady fully-developed laminar flow in straight channel when fluid properties are functions of temperature  
09 p1366 A66-20175
- Heat transfer in laminar flow between parallel porous walls with discontinuous change in wall temperature  
09 p1470 A66-20176
- Heat Transfer Bibliography  
09 p1470 A66-20180
- Boundary layer theory applied to solution of problems of combined heat and mass transfer, using approximate single-parameter integral method  
09 p1367 A66-20703
- Differential equations describing boundary conditions at front of change of aggregation state, computing temperature field  
09 p1471 A66-20825
- Laplace transform and analog computation applied to simulation of heat transfer between wall separated fluids, determining transfer functions and frequency responses  
09 p1472 A66-20908
- Numerical solution of laminar boundary layer momentum, energy and diffusion differential equations for heat and mass transfer on moving continuous flat surface with injection or suction  
10 p1619 A66-21053
- Relativistic transformation laws of thermodynamic variables, including temperature and heat transfer  
10 p1619 A66-21198
- Separation of gas mixture in curved supersonic flow, noting parameters of concentration gradient profile variation  
10 p1522 A66-21269
- Pressure drop and heat transfer to Newtonian fluids in cooled pipes for laminar flow, establishing empirical correlation  
10 p1620 A66-21272
- Heat transfer and distribution of velocity, temperature and concentration in laminar supersonic boundary layers with blowing of light gas with desired pressure and heat distribution  
10 p1620 A66-21394
- Heat transfer measurement to side wall of shock tube behind incident shock wave in argon and xenon

Temperature stresses and heat transfer at thin plate edges reinforced with thin rods under nonstationary thermal conditions 13 p2202 A66-26416  
Variation of mean thermal conductivity of nickel-cadmium cell determined as function of overcharge current and environmental temperature [AIAA PAPER 64-751] 13 p2007 A66-26652  
Fluid mechanics - Midwestern Mechanics Conference, Case Institute of Technology, Cleveland, April 1963 13 p2068 A66-26701  
Approximate methods of computing heat transfer through laminar boundary layer, considering boundary layer along flat plate and second order effects 13 p1993 A66-26712  
Electrical analogy for turbulent liquid metal heat transfer in noncircular duct entrance region, solving Fourier equation, determining fluid boundary conditions, temperature distribution, etc 13 p2210 A66-26717  
Steady state motion of Couette plasma flow in electric field, assuming transfer of collective motion is effected by ions and heat transfer by electrons 14 p2339 A66-26774  
Critical heat flow for propagated heat exchange crises during boiling of liquid 14 p2410 A66-26787  
Heat transfer bibliography of 32 Japanese works including heat transfer application, phase change, separated flow, radiation, transpiration and mass transfer 14 p2410 A66-26937  
Heat transfer bibliography of Russian works including conductive, convective and radiant heat transfer, phase and chemical conversions, mass transfer, etc 14 p2410 A66-26938  
Heat transfer rate in thermal inlet of circular tube, describing experimental apparatus and observational results 14 p2411 A66-27313  
Heat transfer equation to find temperature distribution in two-dimensional and circular jets 14 p2274 A66-27378  
Laminar separated hypersonic flow over spiked bodies in gun tunnel for analyzing parameters influencing heat transfer rates in reattachment region 14 p2218 A66-27403  
Nonequilibrium laminar boundary layer of binary dissociating gas determined by solving nonlinear partial differential equations governing system [AIAA PAPER 65-129] 14 p2274 A66-27406  
Enthalpy of gas stream, calorimeter surface treatment and heat transfer measurement errors in arc-heated tests 14 p2411 A66-27425  
Heat transfer problems associated with thermal analysis, discussing influence of rate of heat transport on heat transfer process 14 p2412 A66-27494  
Hydraulic resistance and heat transfer in laminar-turbulent transition region in tube with heating and cooling of water 14 p2414 A66-27830  
Heat transfer considerations in aircraft-engine design noting fuel, oil and icing problems 14 p2375 A66-28300  
Stimulated interphase heat transfer in nonuniform gas flow with suspended particles and periodic motion variations 14 p2415 A66-28322  
Heat and mass transfer treated by thermodynamics of irreversible processes 14 p2416 A66-28486  
Heat and mass transfer in radial flow between two fixed or co-rotating parallel disks, obtaining series expansion of Navier-

Stokes equation 15 p2615 A66-2860  
Flow pattern and heat transfer distribution in regions of adverse pressure gradient at separated flow over two-dimensional model in Mach 10 airflow 15 p2424 A66-2920  
Displacement and heat transfer effects in laminar and turbulent boundary layers downstream in slowly expanding hypersonic nozzle, determining inviscid core flow 15 p2424 A66-2920  
Catalytic efficiency of noncatalyst interferes with accuracy of measurement noting necessity of oxygen treatment on noncatalytic surfaces 15 p2502 A66-2990  
Heating process in laser welding of metal sheets, taking into account energy distribution, heat transfer and fluid densities 15 p2511 A66-2990  
Book on heat transfer covering instrumentation and analytical techniques for definitive solution to classical and complex problems 16 p2824 A66-3000  
Free stream turbulence effects on heat transfer rates evaluated by boundary layer approximation 16 p2824 A66-3000  
Mass transfer, friction and heat transfer analyzed and calculated for turbulent boundary layers in compressible flow 16 p2824 A66-3000  
Hydraulic resistance, heat and mass transfer in vortical flow, noting possible optimal conditions of operation 16 p2825 A66-3000  
Effect of orifice dimensions and heat transfer to surface with orifice on pressure measured in low density gases 16 p2628 A66-3000  
Gravity effect on nucleate boiling heat transfer 16 p2825 A66-3000  
Thermal contact resistance between smooth rigid isothermal planes separated by elastically deformed smooth spheres [AIAA PAPER 66-461] 16 p2814 A66-3000  
Monte Carlo solutions to two molecular flow problems, heat transfer between parallel walls and shock wave profile computer programmed in Boltzmann equation analysis 16 p2686 A66-3000  
Heat transfer rate to simulated skin discussing power input determination from temperature rise [ASME PAPER 65-HT-33] 16 p2643 A66-3000  
Simultaneous radiation, conduction and convection heat transfer for steady state conditions in one-dimensional spectral selective, emitting and scattering porous bed [ASME PAPER 65-WA/HT-23] 16 p2828 A66-3000  
Intensification of heat transfer in bundle of tubes with transverse ribs in longitudinal flow 16 p2828 A66-3100  
Local heat transfer rates and pressure distributions over windward half of yawed circular cylinder at Mach 8 16 p2630 A66-3100  
Wire-to-surface heat transfer and error in hot-wire anemometer measurements 16 p2708 A66-3100  
Diffusive corrosion processes caused by circular tubes by reactive fluid simulated rotating disk electrodes 16 p2728 A66-3100  
ONERA research on use of magnetic suspension systems in hypersonic wind tunnels and measurement of base pressure and heat transfer rates 16 p2683 A66-3100  
Ribbon ablative thermocouples for 3000 to 5000 degree F range 17 p2924 A66-3200  
Pressure distribution, skin friction and heat transfer for sharp and blunt-nosed slender bodies in hypersonic air flow 17 p2837 A66-3200  
Base, recompression and laminar near wall regions of cones in hypersonic air flow 17 p2838 A66-3200  
Dimensional analysis of temperature distribution within spherical particle during nonisothermal evaporation 17 p3033 A66-3200  
Wall heat transfer behind plane detonation wave moving past flat plate into stationary hydrogen-oxygen mixture 17 p3033 A66-3200  
Hypersonic wind-tunnel test program giving data on turbulent boundary layer with mass addition including Mach number effect on heat transfer and skin friction reduction and massive flow blowing 17 p2839 A66-3200

- Secondary flow for supersonic boundary layers with or without swept edges, noting effect of compressibility and heat transfer on reverse flow 17 p2840 A66-32485
- Heat transfer problems solved, using Pohlhausen solution for phase-space trajectory, noting effect of boundary conditions and application of analog computer 17 p3034 A66-32497
- Heat transfer and stress wave evolution prior to ablation and thermal equilibrium in exposure of solid and liquid materials to laser sources 17 p2979 A66-32638
- Temperature and pressure distribution for fluid flow through porous matrix, noting chemical reaction, heat transfer, boundary layer flow, etc 17 p2910 A66-32752
- [AIAA PAPER 66-423] 17 p2910 A66-32752
- Series solution to parabolic PDE for heat transfer from smooth wall to turbulent boundary layer 17 p3037 A66-33041
- Heat transfer bibliography including listing of works on boundary layer flow, phase change, channel flow, MHD conduction, etc 17 p3037 A66-33043
- Heat transfer bibliography of Russian works, including listing of works on thermodynamics, heat conduction, radiant and convective heat transfer processes, phase change, mass transfer, drying processes, etc 17 p3037 A66-33044
- Flow structure and heat transfer for rearward facing step in supersonic flow, discussing critical Reynolds number, flow through lip shock, etc 17 p2913 A66-33068
- Fluid mechanics and heat transfer - Conference, Santa Clara, June 1966 17 p3038 A66-33467
- Gas-phase heat-transfer augmentation by steady and alternating electric field in pipeflow 17 p3039 A66-33473
- Stagnation-point heat-transfer measurements in partially dissociated supersonic air arc tunnel 17 p3040 A66-33484
- Turbulent boundary layers in compressible and incompressible flow, examining pressure gradients, temperature distribution and heat transfer effects 18 p3097 A66-33595
- Heat transfer caused by combustion of triethylaluminum on flat plate in Mach 3 flow, noting significance of lag at stagnation pressure 18 p3260 A66-33817
- Heat transfer - AICE and ASME Conference, Los Angeles, August 1965 18 p3261 A66-34375
- Heat transfer effectiveness-number of transfer unit relations determined, using differential equations to obtain temperature profile of each channel in exchanger 18 p3262 A66-34382
- Temperature profile and design parameters in adiabatic fuel cell with stationary electrolyte where cooling takes place by convection and conduction 18 p3263 A66-34386
- Heat transfer rates and two-color temperature measurements for propane-oxygen flame seeded with aluminum powder [WSCI 66-2] 18 p3264 A66-34422
- First-order correction to Houtt theory for measuring ion density in D region, respectively those involving heat transfer and compressibility 18 p3107 A66-34523
- Temperature distribution and propagation of periodic temperature fluctuations in damped semiinfinite rod 18 p3267 A66-35061
- Soviet bibliography on heat and mass transfer 18 p3267 A66-35062
- Stagnation point heat transfer in dissociating or ionizing real gases for case of discontinuous Prandtl numbers 19 p3478 A66-35749
- Couette flow and heat transfer through hard-sphere rarefied gas enclosed between parallel walls analyzed by Monte Carlo method 19 p3478 A66-35803
- Linearizer for constant temperature hot-wire anemometer, detailing linearization circuit 19 p3357 A66-35806
- Heat release mechanism of developed nucleate boiling process 19 p3478 A66-35940
- Molecular-kinetic resistance effect on heat exchange in Nusselt-type vapor condensation on vertical plate and in vapor-bubble growth in superheated liquid 19 p3479 A66-36310
- Pulse transmitter for measuring heat transfer in ionized gas 19 p3362 A66-36772
- Heat transfer, thermal conductivity and thermal diffusivity of loose fibrous materials under vacuum 20 p3587 A66-36978
- Heat transfer in turbulent carbon dioxide pipeflow at supercritical region 20 p3674 A66-36983
- Thin Insulating Teflon film bonding to internal surface of space cryopanels for increased heat transfer and faster cooling 20 p3677 A66-37100
- Laminar, turbulent and transition heat-transfer domain analysis of cryogenic fluids in variable reduced-gravity environment, with applications to space cryogen storage 20 p3677 A66-37103
- Heat transfer literature published in 1965 on conduction, channel flow, boundary layer flow, separated flow, transfer mechanism, etc 20 p3678 A66-37117
- Analytical expressions for maximum slope of fluid temperature transient response, based on Hansen mathematical model, and for reduced time slope 20 p3678 A66-37119
- Blasius series for heat and mass transfer in two-dimensional boundary layers, discussing velocity and concentration profiles 20 p3678 A66-37122
- Sealed nickel-cadmium batteries for space power systems, noting 100 amp-hr cell with adhydrode and systems considerations relating to heat transfer and charge control 20 p3497 A66-37161
- Non-Newtonian viscoelastic fluids with similarity transformations for power law fluids, noting momentum, energy and heat transfer 20 p3545 A66-37510
- Differential equations describing air movement, heat exchange and exchange of moisture 20 p3593 A66-37855
- Thermodynamics of combustion and concepts of aerothermochemistry using Newton-Raphson iteration process, noting transfer phenomena of matter, heat and momentum 20 p3680 A66-38090
- Equivalent circuit for pyroelectric materials used in obtaining noise equivalent power for detection of electromagnetic radiation and heat transfer measurement 20 p3562 A66-38405
- Soviet and foreign papers on physics of boiling covering heat transfer, heat release, bubbling processes, kinetics and sonic aspects of boiling, including bibliography 21 p3834 A66-38509
- Boundary layers with coupled heat and mass transfer for large enthalpy per unit mass of injected material, based on linearity of perturbation equations 21 p3834 A66-38704
- Assembly and packaging of microelectronic systems by integrated circuits, considering spatial configuration, maintainability, interconnection, thermal transfer and environmental resistance 21 p3710 A66-38830
- HF pressure fluctuations in heat transfer of diisopropyl hexane seen as caused by shock waves produced by collapsing bubbles 21 p3835 A66-38906
- Heat transfer between turbulent flow of air and isothermal wall plate and constant thermal flux at surface 21 p3835 A66-38907
- Nonisentropic nonequilibrium lithium plasma flow through nozzle with allowance for friction and heat transfer 21 p3694 A66-39088
- Heat transfer in wake of reflected shock wave in reacting gases, using calorimetry and shock tube technique 21 p3727 A66-39095
- Thermal conductivity and accommodation coefficient measurements in gas mixture of atomic and molecular oxygen 21 p3836 A66-39174
- Nondestructive testing for material evaluation, noting color radiography, ultrasonic imaging, transmission, attenuation, heat transfer and residual stress measurement 21 p3830 A66-39192
- Measuring thermal flux produced in reflection of shock waves from plane heat-conducting wall 21 p3836 A66-39412
- Engineering method for measuring rapidly changing temperatures of gas flow with steady or variable heat transfer 21 p3836 A66-39413
- Heat transfer in conducting, absorbing, emitting, scattering and heat generating medium 21 p3836 A66-39438
- Heat transfer in laminar flow of Bingham material through circular pipe, taking into account dissipation effect 21 p3836 A66-39441
- Thermal conductivity of carbon dioxide in critical region interpreted, considering gas as mixture of clusters and heat transfer due to formation and breaking of clusters 21 p3837 A66-39454
- Boundary layer equation solution along vertical hot plate for constant plate temperature, noting use of Blasius technique 21 p3837 A66-39590
- Photography of small freely moving particles undergoing heat and mass transfer, using beam splitter to align two cameras on drop 22 p3917 A66-39675
- Book on flow and thermal boundary layers including laminar and turbulent flow velocity profiles, Prandtl equation, heat transfer problems, etc 22 p3897 A66-39702
- Heating environment for space vehicle, examining wind and incident radiation effects on heat transfer to liquid hydrogen, insulation surface thermal properties and optimization of insulation system 22 p3986 A66-39777
- Gas flow equations for multilayer insulation systems for both continuum and free molecular flow regimes of interest in cryogenic space vehicle design [AICE PREPRINT 22A] 22 p3897 A66-39888
- Heat transfer and flow in turbulent separated airflow over downward step in plate surface with suction and injection [ASME PAPER 65-WA/HT-2] 22 p3898 A66-40025
- Heat losses from turbulent gas flowing through poorly insulated pipe where heat lost from outer surface is by free convection and radiation, solving heat equation [ASME PAPER 65-WA/HT-16] 22 p3997 A66-40027
- Mean viscous dissipation and bulk temperature variation in incompressible fully developed duct heat transfer, using Green theorem 22 p3998 A66-40033
- Heat transfer from gray fin-tube radiators with numerical results for diffuse surfaces, noting fin and tube emissivities 22 p3998 A66-40037
- Semi-diurnal oscillation in surface pressure as result of strong resonance amplification of small oscillations due to surface heating and gravitational tidal force of Sun 22 p3942 A66-40052
- Marangoni flow, motion of liquid surfaces under influence of surface tension gradients, explaining high fluxes obtained in boiling heat transfer 22 p3999 A66-40303
- Interaction between hypersonic wake flow and aerodynamic deployable decelerator, predicting pressure and heat transfer of decelerator 22 p3846 A66-40605
- Probe design for mass flux, stagnation point heat transfer and total enthalpy measurements of high temperature hypersonic gas flows [AIAA PAPER 66-750] 22 p3919 A66-40635
- Shock impingement on blunt body in hypersonic flow, noting alteration of flow and local heat transfer rate near impingement point [AIAA PAPER 66-756] 22 p3846 A66-40641
- Short duration technique providing simulation of thermodynamic properties and composition of exhaust products of liquid and solid propellant rocket engines [AIAA PAPER 66-760] 22 p3894 A66-40643
- Nonaxisymmetric temperature fields for orthotropic hollow cylinder and sphere solved using Bessel functions, noting heat transfer between external and internal surfaces 22 p4000 A66-40693
- Matrix functions and use in problems of heat and mass transfer 22 p4000 A66-40820
- Heat transfer in nonisothermal plate with laminar boundary layer 22 p4000 A66-40822
- Mechanism of nucleate boiling from superheated surface studied fluid-dynamically and thermodynamically 22 p4000 A66-40918
- Temperature profiles and Nusselt numbers for heat transfer to MHD laminar Hartmann flow in thermal entrance region of flat duct 22 p4000 A66-40920
- Approximate solution of PDE for heat transfer in uniform-property universal turbulent boundary layer 22 p4001 A66-40923

Heat transfer through turbulent boundary layer, using velocity and temperature profiles as phenomenological relations 23 p4147 A66-41120

Heat transfer in entrance section in rectangular duct for incompressible fluid in laminar pulsating flow with periodic pressure gradient 23 p4148 A66-41216

Spontaneous ignition of inflammable fluids by hot surfaces, discussing static hot plate and wind tunnel rigs 23 p4083 A66-41278

Apollo launch escape tower electroexplosive bolts produced heat transfer to surrounding structural members, obtaining sound intensity maps 23 p4119 A66-41310

Monograph on kinetic theory of plasmas, deriving state equation, Maxwell equation for plasma-magnetic field interaction and boundary layer heat transfer expressions 23 p4102 A66-41400

Dirac delta function representation of spark ignition, considering heat transfer from reaction zone to fresh gas and flame propagation 23 p4148 A66-41413

Initial broadening of diffusion flame sheet caused by nonvanishing equilibrium constant determined, using method of inner and outer expansions 23 p4148 A66-41500

Out-of-pile thermionic power system using inert gas for heat transfer from reactor to converter, noting creep-rupture problem of materials 23 p4023 A66-41767

Thermal transport in channel-gas flow, discussing integral equation and power series solution 23 p4150 A66-41869

Heat transfer to blunt bodies with catalytic and noncatalytic surfaces in nonequilibrium dissociated hypersonic flow [AIAA PAPER 66-3] 23 p4150 A66-41878

Approximate integral method for determining thermal boundary layer and heat transfer on flat plate with insulated surface 23 p4150 A66-41920

Heat transfer in incompressible viscous fluid between two nearly parallel walls with harmonically varying distance, determining velocity field and temperature distribution 23 p4150 A66-42029

Network for compensating electrical output of thin film resistance thermometers for deviations due to large heat-transfer rates 24 p4207 A66-42176

Pyroelectric heat-transfer sensor performance compared with thin skin thermocouple heat sensors, noting discrepancy in measurement results in severe environment 24 p4207 A66-42177

Semiconductor surface thermocouples, determining heat-transfer rates associated with wind tunnel testing 24 p4208 A66-42178

Characteristics of plasma generator with transpiration-cooled porous electrode, noting related heat transfer studies 24 p4161 A66-42263

Benard convection between free bounding surfaces for ranges of Rayleigh and Prandtl numbers achieving steady state with motion of single large cell, evaluating eigenfunction amplitudes 24 p4293 A66-42409

Flat plate laminar boundary layer in supersonic wind tunnel, measuring pressure distribution and profiles and heat transfer rates, noting dissociation fraction effects 24 p4194 A66-42411

Heat transfer from enclosed rotating disk, analyzing effects of radial outflow and inflow on temperature profile and Nusselt numbers on rotor and stator 24 p4294 A66-42705

Ordered state theory and application to technological and theoretical heat transfer problems 24 p4294 A66-42735

Thermal emission in subsonic and supersonic nozzles based on energy equation solution and laws of heat transfer 24 p4295 A66-42878

**HEAT-TRANSFER COEFFICIENT**

Variation of local heat-transfer coefficients produced by impinging jets reexamined in light of velocity and turbulence distributions effects 02 p0304 A66-12197

Surface cooling effect on accuracy of black body coefficient determination for highly heated materials 03 p0444 A66-12518

Free convection heat transfer in partially enclosed channel flow, noting effect of vertical fin geometry and temperature

[ASME PAPER 64-WA/HT-33] 04 p0595 A66-13386

Thermal energy transfer in base portion of stagnant region obtained from plane and axisymmetric flow 04 p0454 A66-13570

Heat transfer and flow friction characteristics of matrices of high porosity with radiation heat source [ASME PAPER 65-HT-6] 05 p0782 A66-14734

Heat transfer coefficient by impingement of two-dimensional air jets [ASME PAPER 65-HT-20] 05 p0605 A66-14742

Heat transfer to two-phase film-boiling nitrogen, discussing straight and swirl flow experimental apparatus [ASME PAPER 65-HT-37] 05 p0773 A66-14751

Transient quenching method of determining critical heat flux and transfer coefficients in film and nucleate boiling liquid metals, specifically magnesium [ASME PAPER 65-HT-49] 05 p0785 A66-14757

Relation between flow in separated region and heat transfer for shallow rectangular cavity in subsonic turbulent airflow 05 p0607 A66-15463

Heat transfer and equilibrium temperature on flat plate in region of strong interaction in hypersonic flow 05 p0607 A66-15465

Heat transfer and wall friction for low velocity flow of gases in downstream region of smooth electrically heated tubes, considering transition region [ASME PAPER 65-WA/HT-18] 05 p0790 A66-15646

Heat transfer and velocity characteristics of thermal and hydrodynamic laminar flow in ducts of arbitrary cross section, considering boundary conditions at wall [ASME PAPER 65-WA/HT-13] 05 p0790 A66-15650

Flow separation effect on heat transfer characteristics of turbulent pipe flow [ASME PAPER 65-WA/HT-12] 05 p0790 A66-15651

Helium II film free-convection heat transfer, discussing mathematical analysis for vertical flat plate and horizontal circular cylinder [ASME PAPER 65-WA/HT-10] 05 p0791 A66-15652

Laminar heat transfer and pressure distribution in open cavity supersonic flow, noting heat-transfer coefficient [ASME PAPER 65-WA/HT-37] 05 p0608 A66-15670

Local heat transfer coefficients in nozzle under conditions of cold-wall low density high speed laminar flow 05 p0609 A66-15774

Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 06 p0970 A66-16345

System of adjustable parameters for measuring fast varying temperatures in bounded space, using thermocouple with compensating circuit 06 p0879 A66-16420

Friction-drag and heat-transfer coefficients of plate in turbulent gas flow, estimating effect of turbulent Prandtl number 06 p0872 A66-16469

Heat transfer rate to stagnation point of catalytic surface placed in slow flow of dissociated oxygen from glow discharge tube and atom-molecule diffusion coefficient 06 p0822 A66-16632

Heat transfer coefficients for helium and hydrogen gas flowing through electrically heated Inconel tube 07 p1148 A66-17300

Empirical formula for convection coefficient of bounded space of parallelepiped shape permits determination over wide range of parameters 07 p1148 A66-17393

Local heat transfer to immersed cylinder in transonic cross flow for gaseous stream 07 p1150 A66-17581

Heat transfer coefficients in liquid metal concurrent flow double pipe heat exchangers 07 p1150 A66-17582

Convective heat transfer coefficients at rocket nozzle throat handling nonaluminized propellant gas 07 p1151 A66-17583

Liquid metal condensation, noting two-phase turbulent condensation mechanism and determining heat transfer coefficients 07 p1152 A66-17592

Steady state thermal conductance coefficient at interface formed by nominally flat rough contacting surface placed in vacuum environment 07 p1153 A66-17893

[AIAA PAPER 66-42] 07 p1153 A66-17893

Surface pressure, heat transfer coefficient, wave structure and shock disturbances of inviscid supersonic flow field along corner of intersecting wedges [AIAA PAPER 66-128] 07 p0984 A66-18462

Steady cooling regime of pseudoliquefied layer, determining cooling time and heat transfer coefficients of solid particles and liquid media 08 p1317 A66-18865

Stationary heat transfer through wall with longitudinal rectangular ribs and variable coefficient of thermal conductivity 08 p1319 A66-19426

Effectiveness and heat transfer coefficients with transpiration of distilled water and air examined across porous plate 08 p1320 A66-19558

Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 09 p1367 A66-20702

Slender profile of infinitely thin supersonic wing that provides minimum mean heat transfer coefficient at given lift-drag ratio 09 p1328 A66-20750

Local and average heat-transfer coefficients for encased rotating disk cooled by radial flow 09 p1471 A66-20820

Heat transfer and flow friction characteristics of matrices of high porosity with radiation heat source [ASME PAPER 65-HT-6] 11 p1785 A66-22188

Heat transfer coefficient by impingement of two-dimensional air jets [ASME PAPER 65-HT-20] 11 p1629 A66-22196

Flow separation effect on heat transfer characteristics of turbulent pipe flow [ASME PAPER 65-WA/HT-12] 11 p1785 A66-22199

Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 11 p1785 A66-22341

Saturated film-boiling heat transfer coefficient measurements of ethanol, pentane and Freon 113 at atmospheric pressure [ASME PAPER 65-AV-37] 11 p1786 A66-22468

Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 11 p1688 A66-22593

Heat transfer in turbulent flow of incompressible fluid in plane curved channel 11 p1694 A66-23318

Single observation method for determining coefficient of heat transfer as function of temperature in stationary regime 11 p1787 A66-23318

Heat-transfer coefficient for annular dispersed flows in absence of vaporization explaining high values obtained by flux profile effect 12 p1973 A66-23522

Formula determining tubing length in heat exchanger required for steady state heat transfer coefficient, noting role of Prandtl number 12 p1973 A66-23522

Nonuniform thermal flux for fuel element and core of nuclear heat exchangers determining heat transfer coefficient between adjacent fluid streams by mass transfer 12 p1973 A66-23522

Thin body temperature during periodic variations of heat transfer coefficient in ambient medium 12 p1978 A66-24372

Surface temperature of solid bodies measured by crayons, thermography, hardness, etc, particularly heat transfer tubes, current-carrying bodies, etc 12 p1882 A66-24400

Saturated and surface film boiling from horizontal isothermal plate in longitudinal flow field analysis, based on two-phase boundary layer theory, correlating heat transfer and skin friction characteristics 12 p1980 A66-24900

Heat-transfer coefficients calculated for forced convection from heated flat plate at zero incidence to stream of viscous fluid noting role of Reynolds number 12 p1981 A66-24940

- Engineering method for calculating distribution of convective heat transfer for continuous boundary layer gas flow past body 13 p2208 A66-25316
- Heat transfer through contact zone of two solids which are joined 13 p2209 A66-25445
- Distribution, as function of azimuth, of static pressure and mass and heat transfer coefficients for case of interaction between detached shock wave on cylinder nose in supersonic flow and turbulent boundary layer along wall 13 p1991 A66-25464
- Forced turbulent convective incompressible flow along rough plates, measuring velocity and temperature profiles 14 p2410 A66-26934
- Measurement of heat exchange coefficient for heated cylindrical copper wire immersed in sand particles or glass beads at various low pressures 14 p2415 A66-28319
- Heat transfer coefficients between layers of thin film structure on niobium and aluminum substrates at liquid helium temperature 15 p2616 A66-28763
- Convective heat transfer to particles in shock-heated gas 15 p2617 A66-29300
- Heat transfer in liquids situated in gap between coaxial cylinders in presence of natural convection, determining effective thermal conductivity coefficient for water and ethanol 16 p2825 A66-30325
- Heat pipe exhibiting very high effective thermal conductivity, showing temperature distribution, boiling heat transfer coefficients, vapor temperature and pressure drop 16 p2827 A66-30914
- Heat transfer and wall friction for low velocity flow of gases in downstream region of smooth electrically heated tubes, considering transition region ASME PAPER 65-WA/HT-18 16 p2828 A66-30991
- Reynolds analogy computation of heat transfer coefficient of turbulent electroconducting liquids in transverse magnetic field 16 p2765 A66-31401
- Mass evaporation rate and heat transfer coefficients for water drops supported by own superheated vapor over flat plate 16 p2830 A66-31680
- Nonstationary heat-transfer coefficient dependence on thermal stress variation in heat exchanging surface 17 p3034 A66-32559
- Velocity and temperature profiles, hydrodynamic elements, heat transfer and friction coefficients of turbulent incompressible flow through circular and flat tube 17 p2909 A66-32583
- Turbulent flow near boundary and equations for mass- or heat-transfer coefficient in terms of turbulent diffusion coefficient and thermal diffusivity 17 p3037 A66-33042
- Heat transfer resulting from normal impingement of turbulent high temperature jet on infinitely large flat plate 17 p3039 A66-33470
- Local and mean heat transfer coefficients determined in tubes with high heat flux densities 18 p3261 A66-34360
- Mass evaporation rate and heat transfer coefficients for water drops supported by own superheated vapor over flat plate 18 p3262 A66-34378
- Condensation tests in smooth and porous coated tubes in multi-g centripetal acceleration fields for increasing heat transfer coefficient of condensing nitrogen 18 p3262 A66-34379
- Properties of small tube Teflon heat exchangers noting corrosion resistance, smooth slippery surface, etc, and heat transfer coefficient 18 p3262 A66-34383
- Forced convection heat transfer coefficient of single pin fixed on plate, deriving expression for case corresponding to infinite circular cylinder 18 p3266 A66-34647
- Method for determining temperature dependence of heat conductivity of dielectric and semiconductor materials 18 p3159 A66-35054
- Heat transfer between fluidized bed and submerged cylinder 18 p3267 A66-35056
- Nonequilibrium thermoconductivity coefficient for heat transfer in dissociating gas system at low pressure 19 p3477 A66-35366
- Sound field parameter dependence of coefficient of heat transfer from horizontal cylinder at near zero Grashof numbers 19 p3478 A66-35751
- Heat transfer coefficients over range of Reynolds numbers for solid-vapor mixture of parahydrogen discharge below triple point pressure 20 p3679 A66-37511
- Resistance and heat transfer coefficient relation theoretically determined for flow of electrically conducting liquid in magnetic field 20 p3679 A66-37614
- Heat transfer between copper sphere and air flow at normal and reduced pressure for various Reynolds numbers 21 p3835 A66-38904
- Heat transfer dependence on pressure and thermal loads in bubble boiling of mercury and Hg-Mg alloys 22 p3999 A66-40295
- Cooled blades in gas turbines allowing use of higher gas temperatures and necessitating calculation of heat transfer and skin friction coefficients 22 p3999 A66-40492
- Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air 23 p4010 A66-41733
- Approximation of self-similar plane and axisymmetric problems for high temperature laminar boundary layer, based on equations for boundary layer of finite thickness for high temperature gas 23 p4149 A66-41783
- Measuring devices and techniques for heat-transfer rate, pressure and force in hotshot tunnels 24 p4206 A66-42168
- Diffusion thermo effect on temperature field in combined heat and mass transfer processes, noting experiments with stagnation flow, turbulent boundary layer, etc 24 p4293 A66-42282
- Upward heat flux with vanishing counter potential temperature gradient in lower atmosphere and in laboratory experiments 24 p4202 A66-42983
- Approximation method for calculating transient temperature field in solid for case where heat-transfer coefficient varies 24 p4296 A66-43224
- HEAT TREATMENT**

- Coil spring alloys for temperatures above 400 degrees F noting design stresses, heat treatments and relaxation 01 p0079 A66-10959
- N-type conductive cadmium selenide single crystals investigated for heat treatment and Hall effects in selenium vapor 01 p0127 A66-11194
- Heat treatment cycle effect on mechanical properties of corrosion resistant precipitation hardened steel AM 355 in terms of metallographic structure 02 p0242 A66-11304
- Brittle creep susceptibility of heat resistant chromium steels reduced by proper thermal treatment 03 p0384 A66-13162
- Fatigue strength of heat-treatable alloyed steels 03 p0384 A66-13168
- Vacancy concentration favorable for structural polygonization due to effect of cyclic heat treatment in lattice of steel 03 p0385 A66-13174
- Creep damage in metal, discussing future creep rupture life, exposure, mechanical properties and heat treatment for removing damage 04 p0537 A66-14466
- Postweld heat treatment on nickel alloy weld deposit noting metallography, microhardness and room temperature tests 05 p0698 A66-14515
- Gaseous impurity distribution /oxygen/ between scale and diffusion layer after heat treatment of various titanium alloys 05 p0699 A66-14700
- Healing of defects in steel accumulated during cyclic overloading 07 p1048 A66-17442
- Nature and properties of white band in welded steels, occurring also as result of heating, noting role of critical temperature range and gradient 07 p1037 A66-17443
- Maraging steel response to heat treatment including formability, machinability, stress-corrosion resistance and cold-working behavior of austenitic and martensitic phases 08 p1239 A66-18959
- Thermal stress of unbounded plate and cylinder heated under variation of medium temperature 08 p1313 A66-19442
- Critical heat flux under forced motion of underheated alcoholic aqueous solutions 09 p1470 A66-20148
- Quench aging, heat treatment which rationalizes role of vacancy-solute atom association and effect on precipitation hardening aluminum alloys 10 p1545 A66-21218
- Aus-bay quenching, heat treatment process which minimizes distortion and increases tensile strength 10 p1545 A66-21219
- Preparation and physical properties of polytriacetylene /TCNE/ copper chelate film, noting electric conductivity and heat treatment effect 10 p1574 A66-21348
- Lithium diffusion effects on electrical properties of tellurium doped n-type GaSb 10 p1578 A66-21582
- Phase composition effect on relaxation stability of chromium steel used for helical spring 11 p1716 A66-22750
- Double injection in long p-p-n diffused silicon junctions subjected to heat treatment, noting donor density energy level and electrical properties 11 p1756 A66-23027
- Changes in mechanical and electrical properties of thin Zn, Cd and Cu films during machining and thermal treatment 11 p1758 A66-23322
- Initial yielding characteristics of vacuum-melted iron as function of thermal history after slow cooling or quenching, noting interstitial segregation into grain boundaries 11 p1719 A66-23398
- Tensile, static notch, stress rupture, creep and salt stress corrosion tests at appropriate temperatures, evaluating effect of solution annealing temperatures of Ti-8Al-1Mo-IV 12 p1892 A66-23625
- Instantaneous strength, rigidity and strain characteristics of reinforced plastics surface-heated on one side 12 p1899 A66-24041
- Heat treatment and ionizing irradiations effect on charge distribution and number of surface states in silicon-silicon dioxide system 12 p1932 A66-24824
- Oxidation rate and heat treatment effect on density of states of silicon surface potential in silicon-silicon dioxide system 12 p1932 A66-24825
- Sequence of crystallization during heat treatment of ternary system of lithium aluminosilicate glasses 12 p1900 A66-24860
- Density, microhardness, elastic constants and surface strength relation to microstructure of lithium aluminosilicate glass crystallized under various conditions of heat treatment 12 p1901 A66-24863
- Heat treatment effect on structure, hardness, microhardness and corrosion resistance of VT1 titanium and OT4 titanium manganese-aluminum alloy sheets 12 p1897 A66-24900
- Phase difference due to elastic waves produced by cyclic heating of targets by impacting ions from pulsed beam 13 p2159 A66-25070
- High temperature plastic deformation and hardening effects on brittleness, strength and viscosity of austenitic steel and alloys 13 p2106 A66-25328
- Structure and properties of intermediate components of iron-oxide-germanium-oxide system analyzed, using heat treatment 13 p2162 A66-25355
- Melting practice, sheet thickness and thermal and mechanical treatments effect on critical stress intensity parameter and ductility of 18-nickel maraging steel 13 p2108 A66-25772
- Aging behavior of rods produced by extrusion of manganese-containing aluminum alloy subjected to solution heat treatment, noting microstructure and mechanical properties 13 p2111 A66-26585
- High-temperature nickel sheet alloys as affected by composition, production methods and heat treatment [ASME PAPER 66-GT-104] 14 p2312 A66-27003
- Scattering mechanical properties of ternary alloy creep resistant steel, emphasizing effect of heat treatment on microstructure [ASME PAPER 66-GT-112] 14 p2312 A66-27006
- Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2292 A66-27325
- Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2301 A66-27345

Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 15 p2557 A66-28563

Heat treatment effect on photoelectric properties of silicon with electron-induced structural defects 15 p2560 A66-28668

Molybdenum recrystallization as affected by La and Y additions under various types of heat treatment 15 p2520 A66-28670

Heat treatment effect on superconducting properties of cold-worked niobium, noting results of magnetization, critical current and resistivity measurements 15 p2564 A66-28760

Surface temperature determination procedure for laser heated metals based on heat conduction equations and ion emission from surface 15 p2514 A66-29035

Microstructure and cooling rate effect on tensile and impact properties of titanium alloy Ti-6Al-6V-2Sn 15 p2521 A66-29072

Effects of heat treatment and aging on phase composition, strength and plasticity of industrial titanium alloys 15 p2522 A66-29178

Phase transformations in titanium alloys annealed at high temperatures and subjected to aging processes 15 p2522 A66-29181

Linear expansion at various temperatures of titanium alloys and effect of alpha grain size and heat treatment on expansion coefficient 15 p2522 A66-29182

Weldable titanium alloys hardened by heat treatment and with structure immune to high temperatures 15 p2522 A66-29186

VT14-16 titanium alloys strength and plasticity with cold working and heat treatment 15 p2522 A66-29188

Hardenability /ratio between phase transformation and cooling rates at given point of sample cross section/ in several titanium alloys after annealing 15 p2522 A66-29190

Heat treatment of titanium alloy sheets clad with industrial trial-grade titanium for preventing surface oxidation and hydrogen absorption 15 p2522 A66-29191

Effect of annealing and aging on structure, hardness, strength and plasticity of VT15 alloy welds 15 p2523 A66-29192

Mechanical properties of Ti-Al-Mo-Zr-Sn alloy as affected by varying cooling rate in heat treatment 15 p2523 A66-29194

Welded joints in sheets of two-phase titanium alloys in study of heat treatment effects on structure and mechanical properties 15 p2523 A66-29195

Particle size and heat treatment effects on stability and reflectance of thermal control glass pigment coatings under UV radiation [AIAA PAPER 65-136] 15 p2616 A66-29288

Explosive technique for shaping low plasticity sheet metals by heating blanks with pyrotechnic agent in sand, with reference to Mo and Mg alloys 15 p2511 A66-29783

Hot drape forming of torus and semitoroidal bulkhead segments from aluminum alloys [SAE PAPER 660290] 15 p2511 A66-29831

Biological and engineering problems in spacecraft sterilization, noting heat treatment 15 p2445 A66-29996

Temperature dependence of magnetization and resistivity in SHF magnesium-aluminum ferrite 16 p2786 A66-31677

Silver oxide films by cathodic sputtering, discussing changes in sample preparation and material characteristics due to aging and heat treatment 17 p2976 A66-32262

Changes in massive amorphous boron filaments by heat treatments under reduced pressures and in presence of inert gases 17 p2943 A66-32852

Various heat treat temps of 2014 Al alloy and corresponding values of eddy current 17 p2940 A66-33099

Heat treatment effect on IR reflectivities of heavily doped n-type silicon 17 p2988 A66-33327

Thermal conversion mechanism in heat treatment of InSb indicates hydrogen dissolved plays role of donor while behavior of oxygen is not yet known 19 p3433 A66-35331

Maraging steel properties, discussing composition, strengthening mechanism, tensile and impact toughness, mechanical

and fatigue properties, 20 p3587 A66-38431

Thin film transmission electron microscopic analysis of stress corrosion of heat-treated aluminum 21 p3749 A66-38471

Quenching, annealing and high temperature treatment effect on transverse rupture strength of sintered tungsten carbide [ASME PAPER 66-MD-17] 21 p3750 A66-38478

Starting concentration, surface distribution of additive in alumina powder, trajectory distance and growth rate in Verneuil growth of ruby crystals 21 p3795 A66-38527

Recirculation of liquid through cell and external heat exchanger to solve problem of repeated flashing in europium chelate lasers 21 p3747 A66-39108

Heat treatment of silicon at high temperatures leads to donor centers affecting electric and photoelectric properties 21 p3802 A66-39157

100-200 ksi yield-strength notched steels for high-toughness weldments, discussing quenched and tempered steels, maraging steels, heat treatment effects, etc 21 p3751 A66-39193

Cyclotron resonance study of electron scattering by thermal acceptors in quenched Ge 21 p3805 A66-39567

Microstructural and superconductivity analyses of Nb-Ti-O compound as function of thermomechanical processing treatment, plotting critical current density against transverse magnetic field 22 p3960 A66-39780

Utilization tests of nonradiating Francia cellular structures placed on spiral insulator and heated to low and medium temperatures 22 p3852 A66-40247

Gas tungsten arc and electron beam welding for iron-base, nickel-base and cobalt-base alloys, noting use of weld filler metal to avoid cracking 22 p3924 A66-40263

Heat treatment effect on structure, mechanical properties and corrosion resistance of VTZ-1 alloy, noting influence of annealing 22 p3935 A66-40680

Effect of titanium, zirconium, vanadium and cerium additions on properties and macrostructure of aluminum alloy tested in cast and heat treated states 23 p4080 A66-41271

Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 23 p4112 A66-41284

Surface layer of heat-treated steel alloy after work hardening 23 p4081 A66-41405

Regenerative heat treatment for increasing creep life of high temperature alloys used in turbines 24 p4227 A66-42508

Notch and heat treatment effect on compressive buckling of WC/Co alloys 24 p4228 A66-43063

Contact effectiveness of space radiator specific case of rectangular fin of constant thickness heated uniformly along one edge and perfectly insulated along opposite edge 03 p0444 A66-1270

Heating by laser beam with application of lithium, noting use for high temperature plasma production 08 p1233 A66-1884

Heating unit of device for testing small samples of sintered materials for thermal fatigue 11 p1709 A66-2347

**HEAVY COSMIC RAY PRIMARY**

Intensity variation of heavy nuclei in primary cosmic radiation during times of solar disturbances 07 p1123 A66-1793

Chemical abundances and energy spectra of nuclei in galactic radiation measured interplanetary space byOGO-I satellite 18 p3190 A66-3484

Detection of low energy multiply charged primary cosmic ray nuclei in nuclear emulsions and relation of nuclei to solar cycle 18 p3190 A66-3484

Activated emulsion camera detection of low energy very-heavy multiply-charged scarce cosmic ray nuclei 18 p3190 A66-3484

Balloon-borne nuclear emulsion detection of solar cosmic ray heavy nuclei during solar burst 18 p3190 A66-3484

Nuclear emulsion stack investigation of composition and differential energy spectra of primary cosmic ray heavy nuclei fluxes 18 p3191 A66-3484

Balloon-borne nuclear emulsion detection of finite fluxes of low energy cosmic ray heavy nuclei and interstellar cosmic radiation propagation 18 p3191 A66-3484

Differential spectra of charge components of primary cosmic ray heavy nuclei at different solar modulation levels and effect of interstellar propagation 18 p3191 A66-3484

Balloon-borne Cerenkov scintillation counter measurements of energy spectra of primary cosmic radiation heavy nuclei at various geomagnetic latitudes 18 p3191 A66-3484

Tracks of nuclei of primary cosmic ray that ended within nuclear emulsions and possibility of separating isotopes 18 p3192 A66-3484

Relative abundance of carbon isotopes in primary cosmic radiation estimated by separation of isotopes method in nuclear emulsion 18 p3192 A66-3484

COSPAR research on heavy primary cosmic ions in nuclear emulsions exposed in polar satellite 18 p3192 A66-3484

Cerenkov counter measurements of primary cosmic ray heavy nuclei made by Elektron II satellite 18 p3199 A66-3488

Heavy cosmic ray primary energy spectrum from BASJE measurements 18 p3209 A66-3512

Search for long-lived particle fluxes with masses larger than about five nucleon masses created by cosmic radiation 18 p3214 A66-3515

High energy jets produced by heavy primary nuclei of cosmic origin and fragmentation products 18 p3215 A66-3516

Solar cosmic ray multiply charged nuclei and July 18, 1961 solar event, discussing relative abundances and heavy nuclei detection 22 p3973 A66-4054

**HEAVY ELEMENT**

Heavy metal derivative solid lubricants properties and application [ASLE PAPER 66AM 2B3] 16 p2711 A66-3040

Solar UV emission lines for 11 elements heavier than helium analyzed, obtaining relative abundances values and relation between electron temperature and temperature gradient in chromosphere corona transition region 23 p4130 A66-4180

**HEAVY ION**

Atomic scattering contribution to pulse height defect and energy dispersion of heavy ions in semiconductor detectors 10 p1558 A66-2186

COSPAR research on heavy primary cosmic ions in nuclear emulsions exposed in polar satellite 18 p3192 A66-3484

**HEAVY NUCLEUS**

Cosmic ray helium nuclei along with heavier nuclei, traverse interstellar and interplanetary matter propagation in space

and slope of energy spectrum 03 p0423 A66-12927  
 Flux of low energy heavy primary nuclei obtained by slicing emulsion method, using recoverable satellite during minimum solar activity period 15 p2592 A66-30077  
 Flux of primary cosmic ray heavy nuclei measured with sandwich of C.2 and G.5 emulsions at magnetic latitude 42 degrees N, noting solar modulation as shown by neutron monitor data 16 p2794 A66-30720  
 Fragmentation probabilities, charge spectrum and interaction mean free paths of relativistic heavy nuclei in primary cosmic radiation investigated in stack of nuclear emulsions 16 p2795 A66-31010  
 Chemical abundances and energy spectra of nuclei in galactic radiation measured in interplanetary space by OGO-I satellite 18 p3190 A66-34833  
 Detection of low energy multiply charged primary cosmic ray nuclei in nuclear emulsions and relation of nuclei to solar cycle 18 p3190 A66-34834  
 Activated emulsion camera detection of low energy very-heavy multiply-charged scarce cosmic ray nuclei 18 p3190 A66-34835  
 Balloon-borne nuclear emulsion detection of solar cosmic ray heavy nuclei during solar burst 18 p3190 A66-34836  
 Nuclear emulsion stack investigation of composition and differential energy spectra of primary cosmic ray heavy nuclei fluxes 18 p3191 A66-34837  
 Balloon-borne nuclear emulsion detection of finite fluxes of low energy cosmic ray heavy nuclei and interstellar cosmic radiation propagation 18 p3191 A66-34838  
 Differential spectra of charge components of primary cosmic ray heavy nuclei at different solar modulation levels and effects of interstellar propagation 18 p3191 A66-34839  
 Balloon-borne Cerenkov scintillation counter measurements of energy spectra of primary cosmic radiation heavy nuclei at various geomagnetic latitudes 18 p3191 A66-34840  
 Relative abundance of carbon isotopes in primary cosmic radiation estimated by separation of isotopes method in nuclear emulsion 18 p3192 A66-34843  
 Cerenkov counter measurements of primary cosmic ray heavy nuclei made by Elektron II satellite 18 p3199 A66-34886  
 Experimental search for heavy mass particles in air showers with total absorption spectrometer 18 p3214 A66-35149  
 High energy jets produced by heavy primary nuclei of cosmic origin and fragmentation products 18 p3215 A66-35160  
 Primary cosmic radiation composition, discussing abundance of protons, He nuclei and heavier nuclei 20 p3632 A66-38098  
 Flux and energy spectrum of low energy heavy nuclei of primary cosmic radiation measured by balloon-mounted nuclear emulsion stacks 24 p4264 A66-42608

 Variable speed constant frequency /VSCF/ generating system for helicopters 16 p2636 A66-30600  
 Helicopter simulation system for avionic evaluation 16 p2682 A66-31248  
 American Helicopter Society, Annual Forum, Washington, D.C., May 1966 17 p2843 A66-32723  
 Military vertical replenishment and utility helicopter operational requirements and load carrying capacity 17 p2845 A66-32740  
 Noise generation due to mass introduction, applied force and stress in helicopters, V/STOL aircraft and ground effect machine 18 p3051 A66-33687  
 Djinn, Alouette II and III, Super-Frelon and SA 330 helicopters 18 p3052 A66-34464  
 Canadian labor market for commercial helicopter pilots 18 p3268 A66-34624  
 Low speed wind tunnel design and testing including V/STOL aircraft, helicopters, reentry vehicles, etc 20 p3540 A66-37009  
 UH-1D helicopter reliability determination and maintenance through planned data acquisition, analysis and corrective action program 20 p3572 A66-37946  
 Helicopter trainee performance following synthetic flight training, noting flyable aircraft attached to ground effects machine 22 p3857 A66-40250  
**HELICOPTER CONTROL**  
 Spatial disorientation experiences of Army helicopter pilots, noting accident and incident statistics, methods of correction, etc 11 p1648 A66-22578  
 Automatic stabilization of helicopters by using autopilots 12 p1801 A66-24388  
 Helicopter pilot performance evaluation method based on ability to precisely control rotor rotational velocity 17 p2864 A66-32163  
 Low-altitude control of U.S. Army rotary wing aircraft 17 p2950 A66-32722  
 Helicopter handling qualities during hover noting pilot performance, position control tasks with and without gusts, effects of stability derivatives, etc 17 p2845 A66-32734  
 Nuclear radiation anticollision instrumentation for guidance systems of helicopters and other vehicles, both air and surface 17 p2926 A66-33097  
 Linear optimal control techniques for design of control system for short-range stationkeeping of large assault helicopter 19 p3280 A66-36688  
 Hover augmentation system /HAS/ design for analog computer helicopter simulation and flight control 21 p3696 A66-38901  
**HELICOPTER DESIGN**  
 Helicopter corrosion problems discussing causes, exposed surfaces, prevention and treatment 03 p0372 A66-12300  
 Design considerations in Lockheed rigid rotor application to compound helicopter, noting wind tunnel and flight test with XH-51A helicopter  
 [AIAA PAPER 65-757] 03 p0318 A66-12552  
 New lift and propulsion techniques in development of V/STOL aircraft, helicopters and ground effect

machines 11 p1636 A66-22695  
Lightning and static electricity discharges effects on helicopter design and performance, noting blade and rotor hub protection, fuel ignition, etc 11 p1636 A66-23259  
Microwave power transmission, noting theoretical loss, power transfer, helicopter operation, etc 13 p2024 A66-25783  
High performance rotary wing VTOL aircraft, noting results from High Performance Helicopter Program and Exploratory Development Compound Program [SAE PAPER 660314] 14 p2223 A66-27293  
Helicopter design and application to common carrier transportation, particularly between airport and city [SAE PAPER 660335] 15 p2428 A66-29846  
Helicopter airfoils, discussing design improvement by proper choice of camber and leading edge 17 p2840 A66-32725  
Systems integration in helicopters, discussing design history, equipment used, operational features, etc 17 p3040 A66-32729  
Integrated Helicopter Avionics System flight control, noting stability augmentation, long-term motion control, outer and inner loop function separation and fail-safe capability 17 p2951 A66-32730  
Loss of power effects on helicopter at high speeds, noting combination of blade analysis with motion equations, application of computer simulation, etc 17 p2845 A66-32735  
Hughes OH-6A helicopter fail-safe structural composition noting design, fatigue testing, application of redundant design features, etc 17 p2845 A66-32736  
Helicopter airframe fatigue testing noting fail-safe design, crack detection, loads applied, test facilities and techniques, etc 17 p3027 A66-32737  
Loading considerations in design of large helicopters for transport of externally suspended cargo 17 p2845 A66-32741  
SA 330 tactical helicopter technical development discussing design, test equipment and methods employed 17 p2846 A66-32743  
Twin engine UH-2 Seasprite helicopter, noting increased power availability, advantages and performance characteristics 20 p3495 A66-37046  
VTOL operational availability computer simulation model, studying initial and tradeoff design, maintenance, logistics, manpower and flight operational requirements 20 p3543 A66-37909

**HELICOPTER ENGINE**  
Propulsion systems for helicopters, stressing variable area turbine for turboshaft engines 04 p0573 A66-14134  
BMW model 6012 gas turbine for helicopter application weighs 50 kg but develops 100 hp 10 p1591 A66-21402  
Overrunning clutches in gas turbines, design, performance characteristics and application to A-4D Skyhawk aircraft, UH-2 helicopter and Curtiss-Wright X-19 VTOL drive systems [ASME PAPER 66-GT-92] 14 p2300 A66-26996

**HELICOPTER PERFORMANCE**  
Assault helicopter cost and system effectiveness in mission of delivering cargo from carrier to landing zone, evaluating avionics system [AIAA PAPER 64-785] 05 p0610 A66-15079  
CH-53A helicopter design, testing, reliability and flight characteristics 07 p0988 A66-17494  
Flight test determination of parasite drag area and required power of Kawasaki Bell KH-4 single-rotor helicopter 07 p0988 A66-17525  
Aircraft design parameter development, discussing supersonic air transport, helicopter and V/STOL design problems, metal fatigue, etc 08 p1167 A66-18707  
Digital simulation of scheduling logistic support by helicopter, using Backtrack techniques 12 p1858 A66-24683  
High performance rotary wing VTOL aircraft, noting results from High Performance Helicopter Program and Exploratory Development Compound Program [SAE PAPER 660314] 14 p2223 A66-27293  
Divergent vertical helicopter oscillations

due to pilot presence in collective control loop and physiological response of pilot to oscillations 17 p2843 A66-32719  
Advanced heavy lift helicopters performance with hot cycle propulsion 17 p2843 A66-32720  
USAF CH-3C helicopter V/STOL in flight refueling, discussing requirements, system characteristics and flight tests 17 p2844 A66-32724  
S-61F helicopter flight test program, noting design modifications for high speed performance 17 p2844 A66-32726  
Helicopter landing in zero-zero weather, describing experiment in England involving landing in dense fog 17 p2844 A66-32728  
Heavy equipment short-range transportation with crane-type helicopters, noting correlation between lift capacity and aircraft weight 17 p2845 A66-32739  
Dynamics of noise and loading actions on helicopters, V/STOL aircraft and ground effect machines 18 p3050 A66-33679  
Use of wing to unload helicopter rotor for cases with and without auxiliary propulsion, noting wing effect on performance, stability, maneuvers, etc 19 p3279 A66-36486  
SH-3A airframe fatigue test facility for automatic simulation of helicopter flight and landing loads 22 p3992 A66-40251  
Short haul air transportation in Europe, noting market development with helicopter techniques and development of more efficient rotor aircraft 23 p4151 A66-41303  
Steady and dynamic loads on tandem rotor, controls and airframe flight tested with Army helicopter, using automatic data processing [AIAA PAPER 66-735] 23 p4008 A66-41324

**HELICOPTER PROPELLER DRIVE**  
Ureka, vibration balancing device capable of reducing helicopter shaft eccentricity to zero 11 p1638 A66-23260

**HELICOPTER ROTOR**  
Stopped and slow rotor aircraft configuration for fundamental limitations on forward flight speed of compound helicopters [SAE PAPER 650806] 01 p0012 A66-10847  
Helicopter rotor blade and engine erosion by sand and seawater 06 p0804 A66-15997  
Design recommendations to offset greater momenta and sensitivity to gust winds of jointless helicopter rotor 10 p1483 A66-21388  
Young theory of rotor blade motion stability in powered flight 11 p1638 A66-23261  
Rigid rotor structural design and testing 13 p2196 A66-25763  
Blade vibration simulation in helicopter trainer by applying amplitude motion to trainer 14 p2271 A66-28030  
Static thrust experiments on single degree-of-freedom torsional vibration of helicopter rotor blades due to stall, and amplitude dependence on blade mean pitch angle and reduced vibrational frequency 16 p2634 A66-31321  
Unsteady aerodynamic characteristics of model helicopter rotor operating in vortex ring state, considering thrust and torque fluctuation 16 p2634 A66-31322  
Fail-safe concept application to rotorcraft noting fatigue requirements, accident prevention methods, etc 17 p2843 A66-32721  
Helicopter rotor blade applied as scanning radar antenna, noting performance during flight tests, feasibility, etc 17 p2875 A66-32727  
Flying qualities and aircraft control during tandem rotor helicopter external sling drag operations 17 p2846 A66-32742  
Aerodynamic interference between helicopter rotor blade and fuselage and wing in hovering and forward flight, describing method of converting two-dimensional analysis to three-dimensional case 18 p3047 A66-33681  
Measurement method for aerodynamic damping of helicopter rotors in forward flight 18 p3047 A66-33684  
Helicopter rotor performance limitations theoretically analyzed 18 p3051 A66-33685  
Use of wing to unload helicopter rotor for cases with and without auxiliary propulsion, noting wing effect on performance, stability, maneuvers, etc 19 p3279 A66-36486  
In-flight stress measurements on coaxial

counterrotating helicopter blades, using semiconductor strain gauge with HF telemetric data 20 p3668 A66-37504  
transmitters 20 p3668 A66-37504  
Radial flow effects on helicopter rotor blades, noting minimum drag variation 22 p3843 A66-40248  
Rotor downwash angle and tunnel geometry effect on maximum size rotor that can be tested in closed throat wind tunnel [AIAA PAPER 66-736] 22 p3893 A66-40626  
Reentry and recovery of space vehicles in reliable shock free landings, using modified helicopter rotor for hypersonic flow and thermal problems 24 p4284 A66-43073

**HELICOPTER WING**  
Use of wing to unload helicopter rotor for cases with and without auxiliary propulsion, noting wing effect on performance, stability, maneuvers, etc 19 p3279 A66-36486

**HELIOCENTRIC ORBIT**  
Spectroscopic observations of Sun-grazing Ikeya-Seki Comet /1965/ at minimum possible heliocentric distance 05 p0761 A66-15100  
Past and future comet orbits, examining value of auxiliary anomaly in Makover's method as function of heliocentric distance of perihelion 17 p3000 A66-32337  
Interplanetary manned spacecraft maneuvers including perihelion brake, off-perihelion acceleration and retromaneuvers and heliocentric planet-approach maneuvers [AIAA PAPER 65-695] 19 p3462 A66-35902

**HELIOGRAPHY**  
**SA SPECTROHELIOGRAPH**  
Time-marking during high speed cinematography of details on Sun with SKS-1M camera 05 p0681 A66-15216  
Polarization photography of solar corona, noting apparatus used for separation of K from F component 16 p2705 A66-30827  
Rocketborne filter heliograms in Mg II line at 2802.7 angstroms including tabulated data 17 p2997 A66-31925  
Photospheric bridges over sunspots studied by meniscus photoheliograph at Tashkent Astronomical Observatory 20 p3646 A66-37030

**HELIOS**  
**S SUN**  
**HELITRON**  
**S BACKWARD WAVE OSCILLATOR**  
**HELIUM**  
**SA LIQUID HELIUM**  
Continuous operation of gallium arsenide injection laser cooled by helium gas flow 01 p0084 A66-11190  
Helium 3-1-P state, discussing pressure dependence of lifetime between free escape and complete blockading 03 p0395 A66-13134  
Eigenvalues and eigenvectors calculated for several low-lying autoionizing levels in helium 04 p0546 A66-13365  
Doubly differential cross sections of electrons ejected from helium bombarded by protons 04 p0547 A66-13709  
Ionization cross section of ground state helium cation by electron impact in Born exchange approximation 04 p0549 A66-14312  
Radiogenic, spallogenic and primordial noble gases in stone meteorites, determining helium and neon content 05 p0756 A66-14506  
Electrons, hydrogen nuclei and helium nuclei observed in primary cosmic radiation by balloon in 1963, discussing integral intensity and differential energy spectrums 05 p0746 A66-14780  
Elastic differential scattering of helium ions discussing energy analysis, geometry and target particle motion effects, and interference phenomena 05 p0719 A66-15767  
CW laser action in carbon dioxide-helium mixtures 06 p0890 A66-16385  
Comments on radiative recombination of molecular helium ions into dissociative state 06 p0912 A66-16636  
Measurement of equilibrium fractions of helium ions present in helium beams scattered at zero degrees through carbon foils 06 p0912 A66-17038  
Manufacturing glass-fiber-reinforced plastic container for high pressure helium gas in European launcher rockets 06 p0889 A66-17076  
Light output from helium-neon gas maser photographed with and without intracavity modulation at locking frequency, using high speed rotating mirror 07 p1040 A66-17205

Heat transfer coefficients for helium and hydrogen gas flowing through electrically heated Inconel tube 07 p1148 A66-17300  
Excitation cross sections of helium lines in electron/atom collisions 07 p1044 A66-17874  
Enthalpies determined from experimental heat capacity and Joule-Thomson data to prepare pressure-enthalpy diagrams for helium-nitrogen system 08 p1320 A66-19683  
Motion and properties of quantized vortex rings in superfluid helium at low temperatures 09 p1415 A66-20009  
Detection by coincidence counting techniques of two-photon decay of metastable state of singly ionized helium 09 p1404 A66-20290  
Stellar evolution for star of 30 solar masses during helium ignition, depletion and exhaustion 09 p1455 A66-20406  
Quasi-statistical pressure broadening of diffuse helium lines 10 p1606 A66-21243  
Electron impact ionization cross section of  $H/2s/$  and  $H/2p/$  in Born A, Born B, Born-Cochran and classical approximations 11 p1738 A66-22498  
Thermal conduction of hydrogen-helium gas mixtures and dependence on hydrogen concentration 11 p1786 A66-22500  
Glass tube containing pressurized helium progressively imploded by coaxial explosive charge, considering application to hypervelocity guns 11 p1686 A66-22840  
Upper atmospheric helium ion chemical loss process, distribution of nitrogen ion and rate coefficient of helium ion-molecular nitrogen reaction 11 p1701 A66-23153  
Helium gas gun for studying penetration and shock reflection from hypervelocity impact 11 p1687 A66-23263  
Continuous operation of gallium arsenide injection laser cooled by helium gas flow 12 p1890 A66-24011  
Hydrogen and helium spectra of gaseous nebulae in theory and observation 13 p2183 A66-25610  
Output power of 6328 angstrom He-Ne gas laser as function of laser gain, cavity loss and output coupling 13 p2091 A66-25651  
Helium-neon gas laser used to determine electron density variation, spatial and temporal, in afterglow of Z-pinch in H at 100 mtorr 13 p2104 A66-26239  
Positron-helium scattering below positronium threshold, using adiabatic method previously tested in positron hydrogen scattering, presenting phase shifts and momentum transfer cross section computations 13 p2134 A66-26262  
Pressure effects of helium on fine structure components of first two members of cesium principal series, noting changes in shift curves 13 p2135 A66-26264  
Measurement of total cross section for excitation of metastable atoms of helium by electron bombardment 13 p2135 A66-26266  
Differential scattering of ionized helium on neon and argon and ionized argon on argon measured at various relative energies and scattering angles 13 p2135 A66-26269  
Microsecond pulsed discharges at short tube with wire electrodes containing helium gas at intermediate pressures 14 p2341 A66-27314  
Helium whistler detection by VLF receiver aboard Canadian satellite Alouette II, noting application to composition and electron density measurement of ionosphere 14 p2285 A66-27847  
Oscillator strengths for electric dipole transitions in neutral helium 14 p2338 A66-28127  
Rapid mass ejection from highly evolved stars as explanation for observation of high abundance of galactic helium gas 15 p2599 A66-29680  
Quantum mechanical potential energy curve of lowest normal state of diatomic helium computed in valence bond scheme, using 17-term wave function of Slater orbitals 16 p2749 A66-30112  
Isotopic composition of low-energy helium nuclei in primary cosmic radiation at solar minimum 16 p2792 A66-30138  
Telescopic measurements of primary energy spectra and abundances of He 3 and He 4 in galactic cosmic radiation 16 p2793 A66-30198  
Photoelectric yields of alkali halides

measured, using rare gas ion chamber to determine flux distribution of helium continuum and obtain absorption coefficients 16 p2754 A66-30855  
Pulmonary effects of two-week exposure of four men to helium-oxygen atmosphere at total pressure of 380 mm Hg 16 p2639 A66-31121  
Thermal balance and heat exchange between four men exposed to helium-oxygen atmosphere at 380 mm Hg total pressure 16 p2639 A66-31122  
Thermodynamic parameters of gas behind strong shock wave in helium 16 p2690 A66-31630  
High-power molecular laser based on vibrational-rotational energy level, noting carbon dioxide-neon-helium laser design 17 p2936 A66-33248  
Measuring amplification of coherent optical radiation in neon-helium filled tube 17 p2938 A66-33512  
Excitation of 35 sub 2 neon level by metastable helium atoms during He-Ne discharge 17 p2938 A66-33513  
Suitability of oxygen-helium atmosphere for manned space missions proven by 56-day human exposure at 258 mm Hg total pressure 18 p3057 A66-33768  
Major and minor constituents of oxygen-helium atmosphere to which humans were exposed for 56 days 18 p3057 A66-33769  
Human renal response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33770  
Human blood enzyme response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33771  
Exercise performance and cardiovascular response of man exposed for 56 days to oxygen-helium atmosphere 18 p3057 A66-33772  
Urinary excretion of steroids and catecholamines as measure of emotional stress of man in 56-day exposure to oxygen-helium environment 18 p3057 A66-33773  
Respiratory effects of 56-day human exposure to oxygen-helium atmosphere 18 p3058 A66-33774  
Enteric microbial flora changes in man exposed 56 days to oxygen-helium atmosphere 18 p3058 A66-33777  
Oral, cutaneous and aerosol bacteriological evaluation of astronaut exposed to oxygen-helium atmosphere at low pressure 18 p3058 A66-33778  
Clinical findings of effect on man during 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3058 A66-33779  
Individual efficiency curves for excitation of two metastable electron energy states of helium by electron impact 18 p3139 A66-34504  
Retarding potential measurement of kinetic energy of electrons released in Penning ionization by excited helium atoms in metastable electron states 18 p3139 A66-34505  
Balloon flight data obtained at 50 and 65 degrees N geomagnetic latitude on spectra of primary cosmic ray hydrogen and helium nuclei, using Cerenkov scintillator technique 18 p3190 A66-34831  
Solar modulation and time variation of differential energy spectrum and flux of primary helium nuclei in 30 to 90 mev/nucleon energy range 18 p3190 A66-34832  
He-3-He-4 isotopic composition of primary cosmic ray helium flux in terms of energy, rigidity and solar modulation 18 p3192 A66-34841  
Balloon-borne scintillation counter measurements of isotopic composition, energy/nucleon and rigidity spectra of primary cosmic helium nuclei 18 p3193 A66-34848  
Cerenkov counter using sulfur hexafluoride gas as radiator developed for study of isotopic composition of helium nuclei in primary cosmic radiation 18 p3193 A66-34853  
Phase shifts of elastic electron scattering from neutral helium, considering atomic distortion in adiabatic approximation 19 p3402 A66-35991  
Atomic hydrogen and helium emissions in upper atmosphere determined by diffraction

spectrophotometer measurement of twilight airglow and aurora 19 p3350 A66-36352  
Hydrogen and helium ions formation and destruction, charge transfer, diffusion, role during solar activity, using mass spectrometry, ground radar, etc 19 p3350 A66-36356  
Convection effect in helium charged insulation with partially foam-filled honeycomb core 20 p3675 A66-37066  
Closed cycle helium refrigerator noting thermodynamic cycle, equipment arrangement and cost estimate for space simulator and wind tunnel application closed 20 p3541 A66-37070  
Dimensional and experimental analyses of helium bubble motion in liquid nitrogen 20 p3545 A66-37104  
Nonreciprocal effects associated with excitation current observed in DC-excited He-Ne ring laser, noting coupling phenomena between right and left waves 20 p3577 A66-37408  
Detection of three radio lines arising from transitions between highly excited states of neutral helium 20 p3652 A66-37615  
Spectroscopic evidence on helium abundance of stars in galactic halo 21 p3817 A66-39565  
Flare stars as sources of cosmic X-rays, spectra contain 4686-angstrom line of doubly ionized helium indicating that atmospheres contain either ionizing radiation or electrons 22 p3972 A66-39707  
Prolonged exposures to acute anoxia cause reductions in viability of hydrated rye seeds, findings suggest helium may be harmful as atmospheric component in manned space capsules 22 p3855 A66-40480  
D-3 helium absorption line on solar disk connected to chromospheric flare origin 22 p3984 A66-40851  
Singlet and triplet populations in helium and electron temperature determination from optical excitation cross sections 23 p4100 A66-41161  
Line strengths variation in spectra of HD 124224 and HD 19832 analyzed, establishing anticorrelation of He I variations with variations in temperature 23 p4130 A66-41808  
Intrinsic rotation of Orion B stars with weak He lines, discussing color-magnitude diagram 23 p4130 A66-41815  
Thermal accommodation coefficients of He on tungsten and hydrogen on hydrogen-covered tungsten at temperatures of 325, 403 and 473 degrees K 23 p4033 A66-42078  
Measuring amplification of coherent optical radiation in neon-helium filled tube 24 p4219 A66-42125  
Excitation of 3S sub 2 neon level by metastable helium atoms during He-Ne discharge 24 p4219 A66-42126  
Thermal responses of man during rest and exercise in helium oxygen environment for various temperatures 24 p4163 A66-42317  
**HELIUM AFTERGLOW**  
Time-resolved spectroscopic measurement of absolute intensity, spectral profiles and self-absorption for He I lines in early helium afterglow 03 p0396 A66-12307  
Helium afterglow discussing stability of collisional-radiative recombination of ions with electrons and neutral particles 04 p0547 A66-13652  
Charge transfer between helium ions and molecules of nitrogen and oxygen in crossed-beam experiment within energy range 3 to 600 ev 05 p0671 A66-14954  
Helium afterglow in HF pulse-discharge plasma at 77 K from dissociative recombination of molecular helium ion with thermal electron 10 p1572 A66-22022  
Helium-neon laser afterglow and metastable helium atoms under long pulse excitation 14 p2307 A66-27335  
Helium afterglow in HF pulse-discharge plasma at 77 degrees K from dissociative recombination of molecular helium ion with thermal electron 16 p2760 A66-30841  
Electron and neutral atom densities in helium and argon afterglow plasma obtained by two helium-neon laser interferometers, noting temporal dependence of electron decay 23 p4101 A66-41364  
**HELIUM ATOM**  
Cosmic ray helium nuclei along with heavier nuclei, traverse interstellar and

- interplanetary matter propagation in space and slope of energy spectrum 03 p0423 A66-12927
- Terrestrial helium loss by speculated reaction between helium metastables and oxygen atoms 05 p0669 A66-14940
- Elastic differential scattering in low energy helium ion collisions, discussing quantal and secondary interference and two-state theory 05 p0719 A66-15768
- Solar cosmic ray particle composition, charge and energy spectra of nuclear components and isotopic composition of H and He 07 p1132 A66-18264
- Perturbation expansions for ground state function of helium atom, using Hartree or Hartree-Fock model Hamiltonian, based on Weiss-Martin variation-perturbation calculation 07 p1083 A66-18422
- First order wave function of helium due to one-and two-electron excitation determined by solving differential equations, noting contribution to second order energy 11 p1741 A66-23405
- Velocity distribution function of helium atom measured, using Doppler profile of helium line 16 p2701 A66-30377
- Electrons, hydrogen and helium nuclei of cosmic radiation as observed in 1964 at average residual pressure of 2.4 mb compared with 1.8 mb obtained in 1963 18 p3187 A66-34819
- Solar modulation of galactic protons and helium nuclei from 1963 to 1965 18 p3188 A66-34821
- Balloon-borne Cerenkov scintillation counter for measurements of primary proton and helium spectra and modulations 18 p3188 A66-34822
- Helium nuclei flux at top of atmosphere shows independence of solar activity 18 p3189 A66-34825
- Energy spectrum of primary helium nuclei at energies greater than 6 gev 18 p3189 A66-34826
- Differential rigidity spectrum of alpha particles for R less than 2.5 gv at solar minimum 18 p3189 A66-34827
- Optical pumping on He 4 atom in metastable level, examining modulation of light in absorption in longitudinal and transverse beams and obtaining magnetic resonance curves 22 p3930 A66-39808
- Helium atoms in 2P level contribute to formation of excited helium molecules in positive column of DC discharge, noting IR portion of pumping radiation is responsible for enhancement of molecular population 22 p3950 A66-39918
- Cell model of attractive interactions between helium atoms and effect on solid-superfluid transition in He 4 at absolute zero 23 p4090 A66-41368
- ### HELIUM COMPOUND
- Helium-neon laser amplifier as function of mixture ratio, gas pressure, input signal level and electrical power input to amplifier tube 02 p0242 A66-12206
- ### HELIUM FILM
- Heat capacity of adsorbed He 3 films at temperatures from 0.1 to 4 degrees K, with adsorption surfaces made of monolayers of argon preadsorbed on copper 09 p1392 A66-20020
- ### HELIUM PLASMA
- Electron and ion temperatures determination for helium plasma produced by theta-pinch with azimuthal magnetic field, using Doppler broadening and X-ray absorption 03 p0396 A66-12292
- Current discharge of helium neon laser on laser action 03 p0376 A66-12439
- Relationship between laws of electron temperature and charged particle concentration fall-off in helium plasma diffusion flow 03 p0398 A66-12520
- Spectral line intensities of hydrogen and helium plasma in P.I.G. discharge 04 p0553 A66-14283
- Reflected shock waves in helium and argon plasmas noting electron density, Saha equations and Newtonian technique 05 p0720 A66-14505
- High uncertainty in measurement of helium plasma temperature by two-line relative intensity method 05 p0722 A66-14913
- Helium-plasma decay in spherical balloon and volume removal by electron-ion recombination 06 p0914 A66-16146
- Heat transfer at low temperatures, discussing thermal conduction parameters of powdered alumina in helium 06 p0969 A66-16282
- Effect of ion drift from discharge on ionization state of helium-plasma model 08 p1265 A66-19374
- Breakdown of theta pinch in helium at high initial densities without preionization 09 p1408 A66-20422
- Microwave scattering theory applied to underdense cylindrical plasma measurements 09 p1409 A66-20851
- Spectroscopic analysis of helium plasma heated by reflected shock in T-tube, discussing luminous front and preceding shock 09 p1409 A66-20854
- Ion temperature measurement of streaming helium plasma by Langmuir double probe method, discussing effect of stream velocity 10 p1558 A66-21071
- Departures from local thermal equilibrium in helium plasma produced by magnetically-driven shock wave in T-tube 10 p1566 A66-21811
- Microinstability limitations of DCX-1 energetic plasma from gas dissociation and Lorentz force dissociation 10 p1568 A66-21826
- Electron temperature measurement by relative intensity of He I lines shown as inapplicable for high plasma densities 10 p1571 A66-22021
- Electric output and gas conductivity of cesium-seeded helium closed-loop MPD generator with auxiliary ionization 11 p1639 A66-22246
- Evolution of 5 solar masses star model from main sequence through core helium burning compared to 3 solar masses model, noting Hertzsprung-Russell diagram 11 p1772 A66-22780
- Evolution of 9 solar masses stellar model of population I initial composition from main sequence through core helium burning 11 p1773 A66-22781
- Nonlinear phenomena in HF plasma discharge, establishing qualitative relation between gas pressure, consumed microwave power and harmonic generation efficiency 12 p1919 A66-23711
- Hot-wire anemometer determination of electron and ion temperature, neutral particle temperature, concentration and velocity and potential of partially ionized helium plasma 12 p1882 A66-24223
- Electron temperature determination from intensity ratio of singlet and triplet lines of neutral helium used in plasma diagnostics, noting complications from metastable levels and coupling of singlet and triplet systems 12 p1924 A66-24592
- Collisional effects in region of electron cyclotron frequency on electromagnetic wave propagation in plasma 13 p2147 A66-25752
- Plasma wave propagation and decay processes studied from profiles of plasma density in cylindrical metal vessel and results compared to Stark effect and framing camera photographic results 13 p2149 A66-26240
- Helium-neon laser emission on 6401 angstrom line, noting intensity vs mirror shift and optical cavity instability 13 p2104 A66-26336
- Modification of hot big-bang theory to account for helium abundance in universe and cosmic radiation temperature, noting possible variation of Newtonian gravitational constant 13 p2189 A66-26599
- Excitation of azimuthal wave number equals 2 mode by helical instability for helium plasma 13 p2156 A66-26686
- Spectroscopic analysis of helium plasma shock waves, produced by annular discharge type conical coll shock tube 14 p2341 A66-27310
- Microwave measurement techniques for helium afterglow plasma 14 p2342 A66-27504
- Electron temperature in helium plasma determined from intensity ratios of spectral lines 14 p2344 A66-27643
- Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 15 p2557 A66-28564
- Helium-plasma decay in spherical balloon and volume removal by electron-ion recombination 15 p2556 A66-29873
- Modes of Kadomtsev plasma instability in helium positive column, noting diffusional loss 16 p2757 A66-30181
- Electron temperature measurement by relative intensity of He I lines shown as inapplicable for high plasma densities 16 p2760 A66-30841
- Emission line profiles of helium plasma formed by laser heating 17 p2933 A66-32228
- Helium plasma in confining magnetic field noting spectral efficiency in optical region electron temperature and density, electron ion recombination, etc 17 p2965 A66-32401
- Rate of diffusion disintegration of metastable helium atoms in decaying helium plasma at very low temperatures, with excitation by electrodeless method 18 p3142 A66-33941
- Effect of ion drift from discharge on ionization state of helium-plasma model 18 p3146 A66-34171
- Stark broadening of singly ionized argon lines in helium-argon plasma behind reflected shock wave in electromagnetic tube with backstrap 18 p3138 A66-34231
- Configuration interaction in helium continuum between first and second quantum thresholds 19 p3402 A66-35991
- Power balance measurements and particle loss rate of ohmically heated helium and hydrogen discharges in C stellarator 19 p3428 A66-36571
- Electric field intensity of helium and argon arc column as affected by pressure and current intensity 21 p3783 A66-39021
- Hot-wire anemometer determination of electron and ion temperature, neutral particle temperature, concentration and velocity and potential of partially ionized helium plasma 22 p3919 A66-40581
- Plasmoid-like RF helium plasma, noting molecular ion formation and destruction leading to evaluation of lower limit for molecular collisional-radiative recombination coefficient 22 p3957 A66-40901
- Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 23 p4112 A66-41281
- Saturation induced optical nonreciprocity in He-Ne ring laser plasma, eliminating frequency locking by using Faraday effect 24 p4221 A66-42552
- Low temperature system for thermal conductivity measurements using Ge and Pt resistance thermometers and He exchange gas switch 24 p4215 A66-43207
- ### HELIUM 2
- Thermal counterflow of He 2 in wide channels of rectangular cross section investigated in terms of damping of small-amplitude transverse vibration of fine wire 04 p0510 A66-13712
- Helium II film free-convection heat transfer, discussing mathematical analysis for vertical flat plate and horizontal circular cylinder [ASME PAPER 65-WA/HT-10] 05 p0791 A66-15652
- Vortices disintegration in rotating helium 2 in presence of oscillating disk when container stops rotating, noting role of helium angular velocity 12 p1865 A66-24880
- Ginzburg-Pitaevskii two-fluid formulation of superfluidity problem describing behavior of helium 2 in rotating annular cylinder, considering constant angular velocity and angular momentum 13 p2128 A66-26272
- Classical and quantum mechanical turbulence in Helium 2 heat flow, noting transition from laminar turbulent flow of normal and superfluid component, Reynolds number dependence on mutual friction coupling, etc 13 p2128 A66-26275
- Production of He I and He II spectral lines excited by helium ions from van de Graaff accelerator 20 p3604 A66-37628
- Vortices disintegration in rotating helium 2 in presence of oscillating disk when container stops rotating, noting role of helium angular velocity 23 p4053 A66-41087
- ### HELIUM 3
- Transition to superfluid state in He 3, measuring behavior of specific heat with three-stage adiabatic demagnetization apparatus 09 p1391 A66-20010

Acoustic impedance of liquid He 3 under vapor pressure 09 p1391 A66-20012  
 Acoustic impedance of liquid He 3 under pressure of up to 12.5 atm 09 p1391 A66-20013  
 Heat capacity measurements of liquid He 3 to improve precision in determination of effective mass ratio 09 p1392 A66-20014  
 Diffusion and regular model of motion of cosmic rays, noting dependence of applicability to cosmic ray fluxes on chemical composition 09 p1443 A66-20598  
 Pressure wave generation in fissioning gas, examining amplification of pressure pulse with helium 3 as driver 15 p2555 A66-29756  
 Abundance of isotopic helium 3 nuclei in primary cosmic radiation, using nuclear emulsion stack 18 p3189 A66-34828  
 Diffusion and regular model of motion of cosmic rays, noting dependence of applicability to cosmic ray fluxes on chemical composition 20 p3633 A66-38132  
**HELLMANN-FEYNMAN THEOREM**  
 New force theorem for determining molecular energy derivatives with respect to internuclear distance derived from Hellmann-Feynman expression 11 p1741 A66-23217  
 Electronic energy of interacting atoms at short range, noting Hellman-Feynman theorem for electron density in elliptic coordinates 17 p2961 A66-32550  
 Conditions under which optimal wave functions satisfy various time-dependent Hellmann-Feynman theorems 22 p3947 A66-39923  
**HELMET**  
 Crash and ballistic protective flight helmets, noting use of improved energy dissipating materials 17 p2863 A66-32146  
 Aircrew helmet design for protection against buffeting and against crash impacts 17 p2865 A66-32188  
**HELMHOLTZ EQUATION**  
**SA WAVE EQUATION**  
 Behavior of Green function for Helmholtz equation external to bounded convex region, obtaining integral representation 06 p0903 A66-16705  
 Separation of electromagnetic and plasma modes in two-fluid lossy compressible plasma, deriving field qualities from two Helmholtz equations 11 p1653 A66-22561  
 Wave diffraction problems in wedge-shaped regions solved, using Wiener-Hopf and Helmholtz equations and superposition principle 12 p1915 A66-24819  
**HELMHOLTZ-KELVIN TIME SCALE**  
 Rayleigh-Taylor nonconfined and Kelvin-Helmholtz confined interchange instabilities obtained from nonlinear computer models 17 p2967 A66-32434  
**HEMATOCRIT RATIO**  
 Hematocrit index and arterial-blood gas composition in white rats during artificial hypothermia 15 p2440 A66-29511  
**HEMATOLOGY**  
**SA BLOOD**  
 Hematological changes in seven healthy young males subjected to intense heating transients 01 p0017 A66-10611  
 Continuous exposure of rats to 100 percent oxygen at 450 mm Hg for 64 days shows no physiological effects 12 p1807 A66-25013  
 Liquid breathing effects on dogs in hyperbaric chamber 21 p3699 A66-38447  
 Respiratory activity and hematological factors of avian blood cells, discussing oxygen consumption, thermal effects, tissue and erythrocyte metabolism 23 p4024 A66-41043  
**HEMATOPOIETIC SYSTEM**  
 Pulsed microwave irradiation of dogs noting body weight, rectal temperature and hematologic response 03 p0326 A66-13351  
 Partial canine body exposure to ionization radiation noting anorexia, weight loss, vomiting and hypersialosis due to 1000 kVp X-ray exposure 03 p0326 A66-13352  
 Pathomorphological changes in hemopoietic organs of mice after irradiation with high energy protons 15 p2438 A66-29482  
**HEMATURIA**  
**S URINE**  
**HEMISPHERE**  
**S NORTHERN HEMISPHERE**  
**S SOUTHERN HEMISPHERE**

# HEMODYNAMIC RESPONSE

Gravity effect on hemodynamic factors and sodium and water excretion in two dogs subjected to change from supine to erect position and water immersion 03 p0324 A66-12352  
 Acute hemodynamic effects of G-suit inflation, noting elevation of central venous pressure, cardiac output falling due to depressor reflexes and role of ganglionic blockade 12 p1811 A66-25014  
 Combination of renal vasodilation and angiotensin infusion effect large changes in renal hemodynamics, excretion and reabsorption of sodium in anesthetized hypotensive dogs 20 p3507 A66-37607  
 Cardiopulmonary hemodynamics in dogs under transverse acceleration studied in terms of changes in heart and lungs 24 p4163 A66-42450

# HEMOGLOBIN

Affinity and stoichiometry of binding of 1-anilino-8-naphthalene sulfonate /ANS/ to apomoglobin and apohemoglobin 08 p1177 A66-18701  
 Immunochemical studies on interspecies molecular hybrids of hemoglobin 13 p2010 A66-25898

# HEMOLYSIS

Mechanism of in vivo rbc damage by oxygen, noting effect on canine erythrocytes 03 p0326 A66-13348

# HEPTANE

Polymer degradation dosimeter of polyisobutylene in heptane noting viscosity range effects, concentration change and molecular weight 21 p3739 A66-39383

# HERMETIC SEAL

Cycle life and energy yield of hermetically sealed secondary silver-zinc batteries for aerospace application [AIAA PAPER 64-749] 13 p2007 A66-26650  
 Seal performance optimization, noting alignment, lubrication, gasketing, balance, etc [ASLE PAPER 66AM 2C2] 16 p2711 A66-30407

Dynamic instability in undamped bellows face seals operating in cryogenic environment with torsional oscillation and diametrical rocking as primary motion [ASLE PAPER 66AM 2CE] 16 p2711 A66-30408

Shaft sealing systems on centrifugal compressors, noting labyrinth, restrictive ring shaft, liquid film and mechanical and special seals [ASME PAPER 66-MD-42] 21 p3742 A66-38490

Psychological effects of velocity and hermetic compartments on astronaut performance 24 p4166 A66-43146

# HERMITIAN POLYNOMIAL

Absorption coefficient for lines with combined Doppler and Lorentz broadening calculated, using Runge-Kutta method, continued fraction expansion and Hermite-Gauss quadrature 03 p0393 A66-13267  
 Real eigenvalues of complex matrices, using Hermitian matrix relations 10 p1551 A66-21926

Hermite interpolation combined with Ritz method for numerical approximation of solution of two-point boundary value problems 16 p2732 A66-30243  
 Maximization of second-degree polynomial on unit sphere 19 p3392 A66-36787  
 Reduction of PDE system of heat transfer, using Hermitian approximating polynomials to obtain solution to initial system 23 p4041 A66-40971

# HERTZSPRUNG-RUSSELL DIAGRAM

Distribution patterns of common stars in galactic plane according to spectral type, noting density gradients, main sequence, Hertzsprung-Russell diagram, etc 11 p1766 A66-22254  
 Evolution of 5 solar masses star model from main sequence through core helium burning compared to 3 solar masses model, noting Hertzsprung-Russell diagram 11 p1772 A66-22780

Analytic models of stellar evolution, describing homogeneous and inhomogeneous stages, energy conservation and transport radiative and convective transfer mechanisms, etc 19 p3467 A66-36789  
 Position of variable stars in Hertzsprung-Russell diagram - International Astronomical

Union Colloquium, Bamberg, West Germany, August 1965 20 p3652 A66-37609

Light variations of flare and T Tauri stars due to surface electromagnetic activity connected with turbulence in convective zone and rotation, using Hertzsprung-Russell diagram 20 p3652 A66-37610

Pulsation in cepheid instability strip in H-R diagram, giving equations for spherically symmetric motion 21 p3816 A66-39489

# HETERODYNE

## SA OPTICAL HETERODYNE

## SA SUPERHETERODYNE RECEIVER

Bailey and Martyn theories concerning ionospheric cross-modulation extended to cover simple cases of heterodyne and harmonic generation by electromagnetic fields in plasma 06 p0920 A66-17031

Heterodyne detection at millimeter wavelengths shown in distributed structure of bulk indium antimonide, noting conversion loss and noise properties 15 p2462 A66-29017

Engineering analysis of heterodyne modulation method of checking heterodyne receivers, considering input-signal circuits having minimum effects on heterodyne characteristics 23 p4043 A66-41060

Doppler frequency-measuring tracking system in which tracking filter or retuned heterodyne is used for definition of signal with unknown frequency 23 p4038 A66-41524

# HETEROGENEITY

Heterogeneity effect on multilayer composite cylindrical shell stability under axial compression 17 p3025 A66-32454

Limiting factors of detonation in heterogeneous systems, using one-dimensional model 18 p3265 A66-34552

# HETEROTROPIA

Difference spectra of glucose cultures of *Chlorella vulgaris* beyernick indicate increased pigmentation in white light and monochromatic light over dark controls 20 p3507 A66-37791

# HEXABORIDE

X-ray L band absorption spectra of rare earth atoms in hexaborides, collecting evidence on valence state 01 p0126 A66-10980  
 Lanthanum hexaboride evaporation from Knudsen cell studied by mass spectrography for composition, sublimation heat and ion current 17 p2981 A66-32849

# HEXAGONAL CELL

Crystalline structure on fatigue noting changes of body-centred metals and face-centred and hexagonal metals 02 p0245 A66-11948

Hexagonal crystal structure growth of CdTe thin film 19 p3438 A66-35480

# HEXAMETHYLENETETRAMINE

Crystal structure of hexamethylenetetramine hexahydrate determined using X-ray analysis, noting hydrogen bonding in crystalline state 03 p0330 A66-12338

# HEXANE

## SA CYCLOHEXANE

HF pressure fluctuations in heat transfer of diisopropyl hexane seen as caused by shock waves produced by collapsing bubbles 21 p3835 A66-38906

# HEXOGENE

Decomposition times of liquid nitromethane, liquid tetranitromethane and hexogen single crystals in shock waves 14 p2275 A66-27598

# HFB 320 AIRCRAFT

## S HAMBURGER HFB 320 AIRCRAFT

## HXX HELICOPTER

## S CH-53 HELICOPTER

# HIGH ALTITUDE

Diurnal solar variation in cosmic ray meson intensity recorded in southerly and northerly directions at high altitudes 04 p0574 A66-13840

Externally caused radio frequency interference /RFI/ in electronic subsystems of ballistic vehicles at orbital altitudes 13 p2027 A66-26744

# HIGH ALTITUDE BALLOON PROGRAM

High altitude balloons for scientific research noting zero-pressure balloon 05 p0611 A66-15271

Fiberglass balloon gondola used to eliminate environmental problems in photomultipliers and spark chambers carried by high altitude balloons 10 p1618 A66-21866

High altitude balloons used to carry scientific instruments 14 p2222 A66-26926  
 Simultaneous IR emission and auroral X-ray observations from high altitude balloon flights 14 p2376 A66-27399  
 High altitude balloon top collections of cosmic dust shows evidence of absence of crystal structure in particles 15 p2604 A66-30065

**HIGH ALTITUDE BREATHING**

Human evaluation and testing requirements for physiological protective efficiency of civil aviation oxygen equipment 17 p2863 A66-32151

**HIGH ALTITUDE ENVIRONMENT**

Atmospheric mixing time and lifetime of atomic and molecular oxygen at high altitude, noting agreement with barometric distribution law, concentration pattern, etc 15 p2486 A66-29088  
 Lifetime high altitude environment effect on man, noting Peruvian natives adaptation to constant hypoxia 22 p3854 A66-40112  
 Hypoxia of simulated high altitude exposure prolongs synaptic delay and conduction time in brain system of rats 22 p3855 A66-40403

**HIGH ALTITUDE FLYING**

Internal friction and vertical separation effects on airways and traffic control and high altitude deviation in barometric altimeters 08 p1249 A66-18693  
 Thin section bearings used to solve spatial needs and temperature problems of high altitude flying 08 p1229 A66-18827  
 Utilitarian space applications, discussing communications, weather, geodetic and navigation satellites and high speed aircraft 09 p1453 A66-20169  
 High altitude visual flight environment, discussing sky brightness, instrument and runway lighting, visual fields, eye protection, etc 10 p1494 A66-22131

**HIGH ALTITUDE NUCLEAR DETECTION**

STUDIES /HANDS/  
 High-altitude nuclear explosion detector design for Vela project 09 p1463 A66-19968

**HIGH ALTITUDE PRESSURE**

Physiological effects of pressure breathing and aveolar oxygen tension at high altitude 10 p1489 A66-22117  
 History, design configurations, construction and materials of pressure suits for human protection at high altitudes 10 p1492 A66-22118

**HIGH ALTITUDE SOUNDING PROJECTILE /HASP/**

Gun-launched meteorological sounding system, describing launcher, vehicle, sensor systems and sensitivity [AIAA PAPER 66-382] 12 p1954 A66-24506  
 Upper atmospheric wind measurement with gun launched projectiles, computing wind component contour parameters [AIAA PAPER 66-403] 12 p1908 A66-24515  
 High altitude research project using 16-inch gun for measurement of upper atmospheric wind shear patterns 19 p3340 A66-36644

**HIGH ALTITUDE TESTING**

Rocket measurements discussing electron and proton flux, energy spectra and angular distribution in high altitudes 05 p0676 A66-14776  
 Average steady-state omnidirectional trapped electron flux due to beta decay from orbiting leakage reactor neutrons 05 p0747 A66-14786  
 High altitude aircraft for calibration of solar cells and extrapolation of data to obtain outer space short circuit current 06 p0808 A66-16013  
 Cosmos V satellite measurement of July 9, 1962 high altitude nuclear detonation used to determine fission debris over Johnston Island 08 p1219 A66-19414  
 Radioactivity of Cosmos III satellite after U.S. thermonuclear explosion over Johnston Island 11 p1764 A66-23053  
 High-altitude nuclear explosion-induced geomagnetic micropulsations in analysis of sudden commencement data and Alfvén velocity-altitude profile 11 p1700 A66-23143  
 Gamma radiating debris cloud of high-altitude nuclear explosions scanned by gamma scintillation detector assembled into directional uranium shield 12 p1878 A66-23696

Parachute for meteorological rockets, noting design, testing, high altitude performance, etc 12 p1802 A66-24514  
 [AIAA PAPER 66-399]  
 Plasma due to high-altitude nuclear explosion and effect on radar propagation 14 p2237 A66-27510  
 Ionospheric effects over Delhi of Russian high altitude nuclear explosions in Central Asia and of U.S.A. explosions at Johnston Island, autumn 1962 17 p2918 A66-32695  
 Lift, drag and static pitching measurements on lifting bodies at simulated hypersonic cold-wall conditions [AIAA PAPER 66-467] 18 p3046 A66-33651  
 Latitude and longitude variation of count rate and intensity-time dependence of proton flux in inner radiation belt measured by Anton 302 G-M counter in Ariel I satellite 20 p3638 A66-38306  
 Trapped electrons from Russian high altitude nuclear detonation examined, noting energy spectrum and mirror point density distribution 20 p3643 A66-38342  
 High altitude nuclear detonations, discussing data on trapped radiation, values of empirical and theoretical spectra and artificial radiation belts 20 p3643 A66-38344  
 High altitude parachute systems test techniques for analysis of inflation, stability variations, porosity, effects at low dynamic pressure, etc 22 p3849 A66-40602  
 Sea level and high altitude ignition of fuel-rich gas generator/turbine manifold assembly 24 p4294 A66-42640

**HIGH ENERGY ELECTRON**

High energy protons in synchrocyclotron testing of polyethylene, aluminum, lead and titanium hydride 05 p0627 A66-15118  
 Radiation unit of length, calculating path-length for passage of high-energy electrons and photons through matter 06 p0912 A66-16575  
 Bethe approximation of ionization cross sections of excited states of atomic hydrogen by high energy electrons 06 p0912 A66-17037  
 Dependence of lifetime on injected level in high-energy electron-irradiated silicon with production of total displacements per primary recoil event 06 p0939 A66-17156  
 Optical emission induced in gallium arsenide samples by bombardment with high energy electron pulses 07 p1096 A66-17338  
 Fraction of energy transferred to photon-electron component during interactions of particles with graphite nuclei at energies exceeding 100 bev 07 p1114 A66-17545  
 Passage of high energy electrons and photons through condensed media such as photographic emulsion in cascade theory and method of moments 07 p1116 A66-17558  
 Bethe-Born approximation and partial ionization cross sections of singly and doubly charged helium and neon ions 14 p2336 A66-26830  
 Bethe-Born approximation and partial ionization cross sections of argon, krypton and xenon ions 14 p2336 A66-26831  
 Formation mechanism of ionospheric narrow sporadic E layers by high energy electron fluxes captured by geomagnetic field 15 p2488 A66-29110  
 Inverse Compton X-ray and gamma ray flux due to high energy electron interaction with cosmic blackbody radiation at 3.5 degrees K 17 p2992 A66-31914  
 High energy electron acceleration detected in shock transition region of terrestrial magnetosphere, using Au-Si surface barrier solid state detector and IMP-I satellite mounted GM counter 18 p3177 A66-34753  
 Synchrotron radiation from high-energy electrons spiraling in magnetic field, noting parameter effects and computation of numerical results 20 p3644 A66-38348  
 Isochronal and isothermal stage II recovery in high energy electron irradiated n-type InSb semiconductor, based on Hall coefficient and electroconductivity 21 p3800 A66-38994  
 Acceleration of high energy electrons by means of Parker-Wentzel version of Fermi mechanism due to geometry and distorted structure of interplanetary magnetic field near magnetopause in transition region 22 p3972 A66-40003

**HIGH ENERGY INTERACTION**

High energy nuclear interaction and particle structures covering meson, baryon composition and dimensional analysis 05 p0749 A66-15151  
 High energy interaction of nucleons with complex nuclei described by model cascade-type nucleon and pion multiplication within nucleus 05 p0755 A66-15152  
 Book on high energy particles dealing with concepts and techniques for study of properties of material through interaction with cosmic radiation 06 p0944 A66-16013  
 Nucleon-nucleus collisions at high energy, describing statistically independent successive interactions of incident particles with target nucleus 07 p1113 A66-17515  
 Energy spectra for nuclear-active particles and particle distribution in air show indicate that pionization plays minor role relative to high energy cosmic rays 07 p1114 A66-17516  
 Origin of high energy pions, muons and photons studied from available spectral data 07 p1115 A66-17517  
 Ultrahigh-energy primary cosmic ray particle interactions cause electron phot cascades and muon emission 07 p1117 A66-17518  
 Extensive air shower high energy gamma rays in upper third of atmosphere 07 p1118 A66-17519  
 Probability of high-energy cosmic ray muons undergoing electromagnetic interaction lead with energy transfer at various ranges 08 p1286 A66-19813  
 Four momentum transfer in high energy jet showers and resultant number multireballs 11 p1763 A66-22715  
 Cosmological-galactic creation, steady state expansion and high energy particle production associated with radio sources 11 p1774 A66-23003  
 Distorted wave one-meson-exchange /DWOME/ for high-energy elementary particle reaction analysis, leading to different expression for transition amplitude 13 p2131 A66-25418  
 High energy solar cosmic ray spectrum during solar flare of February 2, 1956 15 p2575 A66-29068  
 High energy interactions - International Conference on Cosmic Rays, Jaipur, India, December 1963 15 p2582 A66-29558  
 Meson emission asymmetry, inelastic particle collisions and multiplicity in ultrahigh energy interactions in nuclear emulsion 15 p2545 A66-29554  
 Collision cross sections of high energy nucleon-nucleon interactions in nuclear emulsion 15 p2583 A66-29554  
 Elementary particle theory, interactions at accelerator energies, bootstrap mechanism for generating bound states and resonance, and Regge pole concept applied to high energy scattering 15 p2545 A66-29554  
 U.S.S.R. accelerator experiments in high energy nuclear interaction cross section and inelasticity, primary and secondary cosmic ray particle energies, charged nuclear-active particle energy spectra, momenta measurements, etc 15 p2545 A66-29554  
 High energy primary cosmic radiation research at Bristol, England, including energy spectra for nuclear interactions nuclear emulsion stack measurements, alpha production, etc 15 p2583 A66-29554  
 High energy mountain-altitude nuclear interactions produced by pions and nucleons, pion/proton and neutral/charged interacting particle ratios studied, using multiplate cloud chamber with air Cerenkov counter and absorption spectrometer 15 p2584 A66-29554  
 Cosmic ray showers, discussing high energy interactions of nuclear active particles, intensity and energy spectra of gamma rays and muons, young air showers, ionization bursts, etc 15 p2584 A66-29555  
 Electron-photon cascades caused by nuclear active component in atmosphere and on gamma rays, atmospheric absorption spectrum of primary nucleons and generation of pions 15 p2584 A66-29556  
 Particle energy measurements in high energy jets with large stacks of nuclear emulsion 15 p2584 A66-29557  
 Extremely collimated nuclear interactions

## SUBJECT INDEX

in carbon induced by collisions of charged cosmic ray particles in energy region 20-100 gev 15 p2585 A66-29559

Secondary cosmic radiation and meson production at high energy, noting particle flux regularities and 15 p2586 A66-29564

Electron pair production by high energy muons, noting application of Monte Carlo method for appearance of low energy with high energy partner below target plate 15 p2546 A66-29583

Multiple penetrating particles underground, noting interaction of muons with matter at 148 meters water 15 p2546 A66-29584

Particle number fluctuation in electron-photon shower, influence on spectrum of bursts produced by high energy mu mesons under thick filters 15 p2589 A66-29585

Hydrogen, He, Ne and Xe high energy molecular beam scattering from gold film surfaces during evaporative deposition 16 p2752 A66-30392

High energy argon atom interactions with surfaces and variations in accommodation coefficient 16 p2702 A66-30399

Developments in study of high energy particles of 25 to 30 gev 16 p2795 A66-31268

Plasma beam action on tritiated titanium and high energy deuteron detection in mixed-field accelerator 17 p2972 A66-32953

Balloon observation of high energy primary electrons with counter system 18 p3187 A66-34816

Charge ratio of cosmic ray electrons, examining excitation of baryon resonances in high energy collisions with no exchange of isospin 18 p3193 A66-34850

High energy particle interaction research, noting that within eight years accelerators will be capable of beams of 28 plus 28 bev protons 18 p3204 A66-35091

Scintillation counter observation of EAS core structure and high energy interactions 18 p3207 A66-35106

High primary energy EAS composition, energy spectrum of nuclear active particles and high energy 18 p3210 A66-35128

Extremely high energy nuclear interactions observed by emulsion chamber, deriving inelasticity of nucleons and mesons and transverse momentum of 18 p3215 A66-35158

High energy nuclear interactions in graphite 18 p3140 A66-35159

Energy measurement errors effect on characteristics of elementary interactions 18 p3140 A66-35168

Energy spectra of electromagnetic cascades produced by cosmic rays observed at balloon altitudes, using composite detector 18 p3216 A66-35169

High energy interaction studied on Norikura Mountain and Mount Chacaltaya, using large area emulsion chamber 18 p3216 A66-35170

Multiplicity of high-energy interactions causing extensive air showers determined from maximum position 18 p3217 A66-35176

Two-fireball and CKP models of ultrahigh energy interactions 18 p3217 A66-35177

Energy estimation of high-energy interactions by quartile angle of emitted tracks, estimating fireball mass and elasticities 18 p3218 A66-35179

Nucleon interaction with complex nuclei at high energy in terms of multiple collision model 18 p3218 A66-35180

Angular distribution of secondary particles in multiple production at high energy, noting multiplicity and inelasticity dependence on primary energy 18 p3218 A66-35181

Tskhra-Tskaro installation for study of high-energy cosmic particle interaction with matter 18 p3218 A66-35182

Bremsstrahlung of electron impinging on fixed center of force and subsequent anomalous interaction, noting similar effect in strong interactions 18 p3218 A66-35183

High energy interaction calculation and experimental techniques 18 p3219 A66-35185

Interaction between ultrahigh energy cosmic rays and neutrinos in universe, noting distortion of energy spectrum 18 p3224 A66-35220

Phenomenological picture of production of secondary particles in nucleon interactions at energies of hundreds and thousands of bev 24 p4267 A66-42902

Elementary particles interaction with atomic nuclei with energies from tens to thousands of bev 24 p4267 A66-42903

High energy inelastic interactions, discussing necessity of statistical methods, secondary particle composition and angular distribution, etc 24 p4267 A66-42904

High energy particle interactions initiate large ionization bursts, noting pion production 24 p4267 A66-42907

Interaction of 1000 bev particles by ionization calorimeter technique suggests free path of nuclear active particles in atmosphere decreases as particle energy increases 24 p4267 A66-42908

Inelastic interactions at ultrahigh energies, discussing secondary particle jets production moving in same direction as colliding particles 24 p4268 A66-42912

Stability of solutions to inverse problems in cascade theory, analyzing case when equilibrium spectrum of particles is specified 24 p4269 A66-42922

### HIGH ENERGY OXIDIZER

### S PROPELLANT OXIDIZER

### HIGH ENERGY PROPELLANT

Design and development of high energy standard engine for ELDO-B carrier rocket 02 p0279 A66-11669

Machine computation of thermodynamic properties of hydrazine from 32 degrees F to 1.02 times critical density 03 p0414 A66-12760

Design criteria for launch-vehicle high-energy stage, emphasizing operational reliability, mission range and low development effort 06 p0959 A66-16494

Nonequilibrium dissociation losses in hydrogen-fluorine propellant system, indicating rate control of recombination steps 22 p3969 A66-39882

### HIGH EXPLOSIVE

Spherical and cylindrical implosive waves and system of generating detonation wave that converges to given focus 03 p0445 A66-13131

Nature and rate of linear surface regression of TNT, RDX, Tetryl and PETN, using hot-plane pyrolysis technique over surface temperatures to 500 degrees C 04 p0571 A66-13645

Metal powder behavior during dynamic and static pressing by energy release of high explosives 07 p1038 A66-18160

High-explosive driven shock tubes, as sources of short duration high-pressure supersonic pulses, applied in accelerating large objects 16 p2674 A66-30423

Small perturbation method applied to combustion stability of high explosives taking into account heat release in K phase 19 p3477 A66-35740

Electroexplosive devices in aerospace vehicles in two classes, propellants and high explosives, noting methods for controlling detonation desired 20 p3625 A66-37159

### HIGH FIELD MAGNET FACILITY

High critical magnetic field, high current superconductors, degradation and practical magnet systems 14 p2364 A66-27649

High field liquid-neon-cooled superconducting electromagnet for cryogenic solid state research 20 p3601 A66-37106

AC losses and magnetic field aberrations associated with use of high-field superconducting wire in adiabatic demagnetization apparatus 21 p3804 A66-39381

High density thermonuclear plasma confinement by multimegagauss magnetic fields 21 p3793 A66-39508

Superconductivity of Ta-Ti solid solution alloy wires subject to steady magnetic high field 22 p3960 A66-39782

Iterative design procedure for optimum placement of vapor deposited Nb-Sn ribbon superconductors in high field large bore modular magnets 24 p4186 A66-43175

### HIGH FREQUENCY

Effect produced by nonhomogeneous HF field on distributed plasma parameters 01 p0115 A66-11050

## HIGH GRAVITY ENVIRONMENT

Linear coefficient of amplification of carbon dioxide subjected to HF excitation field for laser emission 02 p0241 A66-12003

Ionization potential of thulium obtained from hfs of thulium I, using discharge tube and Fabry-Perot etalon 03 p0393 A66-12322

HF behavior of transistors, using Giacomello equivalent circuit 06 p0856 A66-16918

HF pulse rise in high-Q synchronous amplifier with one circuit per stage by approximation method 07 p1009 A66-18069

International coordination and standardization of HF quantity measurements, considering economic, psychologic and accuracy benefits 07 p1002 A66-18224

Instability of noncollision plasma in strong external field in terms of development of nonpotential oscillations 09 p1408 A66-20599

Selection of minimum noise temperature for HF amplifiers in SHF receivers 11 p1667 A66-22795

HF technique for surveillance and tracking of reentry capsule, in departure from planned reentry corridors 12 p1819 A66-24608

HF power transistor delivering 40 watts of RF power at 175 mc at 8 db gain and 75 percent efficiency, noting design and operation 13 p2035 A66-25511

Y-parameter graphs and data for HF circuits obtained from General Radio transfer function and immittance bridge 14 p2261 A66-28370

Spectral analysis of HF oscillations with phase-modulated fluctuations as functions of phase dispersion and spectral form of modulating fluctuations 17 p2898 A66-31854

Sinusoidally varying HF electric field effect on glow discharge plasma, showing capability of confinement 17 p2971 A66-32785

Electron temperature determination in argon plasma as function of distance measured to axis of inductive windings 17 p2974 A66-33255

Spectrum broadening of long-duration high-frequency pulses by FM 17 p2877 A66-33521

Faraday rotation from 24-hr satellite at high frequencies provides means of studying electron content of ionosphere and fluctuations 18 p3106 A66-34200

Thermometer for continuous temperature measurement of dielectrics and semiconductors in electromagnetic HF fields 19 p3358 A66-35836

Selection of minimum noise temperature for HF amplifiers in SHF receivers 20 p3525 A66-37132

Instability of noncollision plasma in strong external field in terms of development of nonpotential oscillations 20 p3611 A66-38133

HF long-distance radio signal transmission and high and low antenna sighting 20 p3521 A66-38358

Polarization characteristic variations of HF signal received over short-range ionospheric path, noting phase measurement of elliptically polarized wave components, using receiving dipoles 22 p3864 A66-40065

Scattering parameters for design of HF transistor circuits 22 p3877 A66-40334

HF conductivity of quasi-equilibrium isotropic fully ionized two-temperature plasma 23 p4102 A66-41367

HF transmitter multicoupler for connecting several transmitters to single antenna 23 p4046 A66-41548

Semiconductor conductivity in strong SHF electric fields, measuring dielectric constant and Fourier component 23 p4068 A66-41620

Potential oscillations in neutral completely ionized plasma-neutral charged-particle beam system in HF electric field and growth rate of plasma instability 23 p4106 A66-41707

HF transistor stability in common emitter configuration, examining performance of input admittance in circuit design and analysis 24 p4181 A66-42377

Transmissibility, isolator mass effects, vibration source and receiver characteristics for HF vibration isolation problem 24 p4291 A66-42860

### HIGH GRAVITY ENVIRONMENT

Feasibility of solid state negative feedback amplifiers based on use of RC networks meeting requirements of frequency stability, high tolerance and long shelf life 17 p2880 A66-31955

## HIGH LIFT DEVICE

Boundary layer control /BLC/ high lift system used as integral part in design of F-4 Mach 2 plus Navy interceptor [AIAA PAPER 65-714] 01 p0013 A66-10951  
Flight experiments to assess stalling behavior and handling problems arising in design, maintenance and operation of suction wing for high lift [AIAA PAPER 65-750] 03 p0319 A66-12586  
Boundary layer control high lift system for high speed aircraft, using ejector for momentum augmentation and air bleed from propulsion system [AIAA PAPER 64-589] 05 p0610 A66-15070  
Boundary layer control /BLC/ high lift system used as integral part in design of F-4 Mach 2 plus Navy interceptor [AIAA PAPER 65-714] 12 p1801 A66-24095

## HIGH PASS FILTER

Epitaxial metal-oxide-semiconductor transistor with tunable high-pass filter-type response characteristics with insertion gain in passband 06 p0857 A66-16959  
Logarithmic amplifier with pulse-length discrimination followed by high-pass filter for reducing adverse effects of distributed clutter in radar receivers 08 p1180 A66-18712  
Active filters and oscillators using simulated inductance 11 p1661 A66-22387  
Dielectric layers of alternating low and high dielectric constant used as filters in millimeter wave, IR and optical regions 12 p1831 A66-23906

## HIGH SPEED CAMERA

Camera timing marker blocks with dual spark and neon light sources for high speed camera 03 p0367 A66-12310  
High speed camera survey 03 p0367 A66-12311  
Cinematographic system in which capacitor-discharge pulses are substitutes for high speed shutter 03 p0368 A66-12465  
Laser technique to photograph hypervelocity projectiles in free-flight range 03 p0379 A66-13248  
Time-marking during high speed cinematography of details on Sun with SKS-1M camera 05 p0681 A66-15216  
High-speed stereoscopic photography development, noting application of frequency wobbling method to photography of explosions 10 p1534 A66-21330  
High speed photography equipment, light sources, shutters and special cameras 10 p1536 A66-21867  
Ultrahigh speed photographic instruments, discussing camera characteristics, shuttering, illumination, film transport and selection 10 p1537 A66-21868  
Kerr cell as shutters and laser modulators in high speed photography 10 p1537 A66-21869  
Horizontal plate Mach-Zehnder interferometer for hypervelocity range vacuum use, high speed photography problems and electron density measurement 10 p1537 A66-21871  
Five-stage transmission secondary-emission image intensifier tube as high speed shutter for moment and streak photography 12 p1883 A66-24937  
RKD-2 high speed raster camera with two rotating disks 14 p2295 A66-27653  
Crystal motion effect on time behavior of laser generation mode, using high speed photography and oscillograms 15 p2518 A66-29725  
High speed stroboscopic photography using Kerr cell modulated laser source 16 p2705 A66-30828  
Fast lens component for SFR high speed photographic recorder with asymmetric objectives 17 p2927 A66-33439  
Operation of electron image time dissector framing camera achieving time resolution by multiple reflection in crossed magnetic and electric fields in electron image storage device 19 p3353 A66-35313  
High-speed photographic techniques, recording impact and postimpact phenomena, used in prediction of flow resulting from hypervelocity impact of pellet with thin plate 20 p3560 A66-37740  
Gas flow in supersonic wind tunnel measured with high speed photography, noting experimental techniques and applications 22 p3886 A66-40199

Proximity focused biplanar image converter diode for high speed photography, discussing basic geometries with respect to quantitative data gathering capabilities 23 p4070 A66-41673  
Photographic equipment using image converter tube as electronic shutter with exposure times from 0.5 to 5000 microseconds 23 p4070 A66-41674  
Multipurpose ultrahigh speed camera system, noting use as monosecond Kerr cell, image converter and giant laser pulse generator 23 p4071 A66-41675  
High speed photograph analysis of compressed volumes of plasma formed in reaction of colliding supersonic flares of high power pulsed discharge 24 p4244 A66-42875  
Thermoanemometric and high speed motion-picture photographic experimental analysis of air vortex ring structure 24 p4196 A66-42879

## HIGH SPEED FLYING

Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 07 p1020 A66-17889  
STOL for high speed aircraft, discussing aerodynamic parameters, lift coefficient, increase methods, etc 09 p1327 A66-20245  
Text on high velocity aerodynamics, including subsonic, supersonic and hypersonic flows, rarefied gases, boundary layer theory and MHD 10 p1479 A66-21057  
Young theory of rotor blade motion stability in powered flight 11 p1638 A66-23261  
Decreased flying ability of pilots in simulated low altitude high speed flight from 0.4 to 0.9 Mach 12 p1809 A66-23928  
Heat dissipated inside compartments by internal structural members on high speed aircraft 14 p2414 A66-28188  
S-61F helicopter flight test program, noting design modifications for high speed performance 17 p2844 A66-32726  
Short takeoff and landing for high speed aircraft, discussing aerodynamic parameters of lift coefficient of flap system, lift-drag ratio and thrust 18 p3052 A66-33971  
Low altitude high-speed flight from standpoint of structural loads, particularly those resulting from gust encounters 19 p3278 A66-35505  
Flight control for low altitude high-speed mission, discussing applicable requirements, analysis and design techniques 19 p3396 A66-35506  
Aircrew response effects to prolonged low altitude high-speed flight vibration 19 p3287 A66-35507  
Cockpit displays associated with low altitude high-speed flight, emphasizing shift toward designing around man 19 p3287 A66-35508  
Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 21 p3723 A66-38686  
Single air flow acceleration and deviation for propulsion and lift of high speed aircraft, analyzing long-range flight paths [ICAS PAPER 66-41] 23 p4122 A66-42070

## HIGH STRENGTH ALLOY

Zinc effect on mechanical properties and microstructure of Al-Si-Cr-Mg alloy 03 p0382 A66-12724  
Plane strain fracture toughness of high strength aluminum alloys measuring techniques and relevant metallurgical factors [ASME PAPER 64-WA/MET-11] 06 p0895 A66-16209  
Saturn Launch Vehicle Program technical equipment and engineering techniques for solving structural, propulsion, launch and control problems 06 p0959 A66-16496  
Yield strength dependence on normal to cryogenic temperatures of high strength alloys [ASME PAPER 65-PROD-14] 11 p1715 A66-22475  
Sintered W and W plus additive billets used to test feasibility of producing fiber-bearing composites by elongation during extrusion 11 p1715 A66-22537  
Yield and flow stress reduction in high strength metals during ultrasonic vibration 16 p2821 A66-31462  
Microquenched age-formed titanium alloys

and titanium Bi-alloy composites, discussing production process using spherical particles produced by rotating electrode [SAE PAPER 660458] 17 p2940 A66-33164  
Air and aqueous environments effect on mode of fracture in titanium alloys during low cycle fatigue 18 p3122 A66-33749  
Aging behavior and mechanical properties of three wrought high-strength magnesium alloys 18 p3122 A66-33751  
Heat resistance in air of dispersion hardened nickel alloys containing certain oxides prepared by powder metallurgy methods 18 p3123 A66-33781  
Carbon content effect on brittle-to-ductile transition temperatures of molybdenum studied in search for high toughness, propulsion system material 19 p3382 A66-36106  
High strength weldable Al alloys with good cryogenic toughness, stress-corrosion cracking resistance and tensile strength 20 p3582 A66-37091  
Adhesively bonded joints withstand severe thermal shock and have excellent bonding with high strength structural alloys in cryogenic liquids 22 p3937 A66-39778  
Welding capacity of high-strength alloys of Al-Zn-Mg-Cu system, noting welding techniques, composition effect on mechanical properties and remedies for cracking in welds 22 p3928 A66-40882

**HIGH STRENGTH STEEL**  
Causes and development of delayed cracking in material/weld interfaces of high strength steels 03 p0375 A66-13124  
Design properties, application and fabricability of super 12-Cr steels 04 p0535 A66-13630  
Ausforming effect on rolling contact fatigue life of M-50 bearing steel [ASME PAPER 65-LUB-9] 04 p0536 A66-14243  
Argon-arc welding of 3-mm high-strength steel sheet and molten slag arcless electric welding of 100-mm high-strength steel plate 08 p1231 A66-1916  
Aus-bay quenching, heat treatment process which minimizes distortion and increases tensile strength 10 p1545 A66-21213  
Diffusion of electrolytic hydrogen through membranes of iron crystals as function of stress, temperature and dissolved hydrogen concentration 11 p1718 A66-23071  
Shot peening for resistance to stress corrosion cracking of high strength steel and aluminum alloys and to improve fatigue life of landing gears, wing spars, jet engine components and other structural parts 13 p2196 A66-25773  
Mechanical properties of structural steel subjected to thermomechanical strengthening treatment 13 p2109 A66-25881  
Hydrogen embrittlement or fatigue strength loss avoidance in overhauling and repairing of high strength aircraft steel component 13 p2087 A66-26221  
Low cycle fatigue crack propagative characteristics of high strength steel, noting technique for life estimation structure by numerical integration [ASME PAPER 66-MET-3] 14 p2312 A66-26929  
Stress-corrosion susceptibility of high strength steel at various levels of tensile yield strength and fracture toughness [ASME PAPER 66-MET-5] 14 p2300 A66-26928  
Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles of welding and heat treating 14 p2292 A66-27336  
Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles of welding and heat treating 14 p2301 A66-27336  
Fractures in high strength low-alloy steel, discussing formation of flat and slag regions, effect of rolling direction crack reinitiation, shearing forces, etc 21 p3751 A66-39139

**HIGH TEMPERATURE AIR**  
Equilibrium radiative transport properties of high temperature air coupled with aerodynamic flow field generated by planetary reentry vehicles 01 p0163 A66-10768  
Boundary layer relation between viscous laws of perfect gas and equilibrium dissociating air 04 p0456 A66-14356

## SUBJECT INDEX

Experimental data compared to theory for expansion of high temperature air in equilibrium and nonequilibrium flow through Mach number 10 contoured nozzle [AIAA PAPER 66-2] 06 p0803 A66-17089

High resolution equilibrium radiation spectra for shock layer of blunt bodies at reentry velocities and radiative recombination of N and O ions [AIAA PAPER 66-104] 07 p0984 A66-18458

Equilibrium air total radiation mechanism, vacuum UV radiation and relation to hypervelocity entry studied, using shock tube blunt model test flow [AIAA PAPER 66-103] 09 p1469 A66-20087

Book on thermodynamic functions and shock adiabats of air at high temperature and pressure 14 p2413 A66-27787

Absorption coefficients for nitrogen and oxygen ion in air at temperatures of 150,000 to 800,000 degrees K 15 p2617 A66-29345

Oxidizability in air of three titanium alloys at temperatures from 700 to 1100 degrees C 16 p2727 A66-31570

Inviscid hypersonic flow past circular cone at finite angle of attack with attached shock wave in presence of dissociation air behind shock wave 17 p2837 A66-32033

Black body radiation, pressure and temperature dependences of equilibrium composition, enthalpy, specific heat and electron density of air-carbon plasmas 18 p3144 A66-34040

Total continuum radiation from high temperature air and components for wavelength greater than 2000 angstroms, based on radiation measurements from constricted arc at atmospheric pressure 18 p3140 A66-34587

Impurities effect on electrical conductivity of air between 1000 and 10,000 degrees K 19 p3406 A66-35743

Sound propagation characteristics in isotropic gas, considering acoustic absorption and relaxation effects 19 p3341 A66-36288

Absorption coefficients for nitrogen and oxygen ions in air at temperatures of 150,000 to 800,000 degrees K 20 p3604 A66-37350

Vacuum UV radiation in equilibrium air measured by photoelectric gauge 21 p3835 A66-38732

Brightness temperature of shock waves dependence on wave amplitude in xenon and air at high temperature 22 p3898 A66-40190

### HIGH TEMPERATURE ALLOY

#### SA REFRACTORY ALLOY

Polythermal and isothermal cross sections of phase diagram of titanium-niobium-chromium system at high temperatures 01 p0086 A66-10453

Coil spring alloys for temperatures above 300 degrees F noting design stresses, heat treatments and relaxation 01 p0079 A66-10959

Diffused aluminum coating for high temperature application 03 p0380 A66-12371

Internal friction and elastic modulus of compressor and turbine blade materials 03 p0372 A66-12399

Nonconservative motion of jogged screw dislocations in high temperature deformation of Al-Mg alloys 03 p0382 A66-12937

High temperature oxidation resistance of zirconium boride/molybdenum disilicide alloys 04 p0535 A66-13435

Heat and fatigue-resistant metal alloys for construction of jet aircraft combustion chambers, including 18 NiCoMo alloy suitable for temperatures up to 650 degrees 05 p0704 A66-15806

Austenitic chromium-nickel-manganese steel, describing temperature effects on crystal structure and experimental techniques 05 p0704 A66-15819

Regularities in hardness variations in niobium binary alloy 05 p0704 A66-15821

Rupture life prediction for several high temperature alloys under linearly increasing stress in nuclear reactors [ASME PAPER 65-MET-1] 06 p0895 A66-16205

Processing, testing and application of refractory metals to various high temperature environments 06 p0895 A66-16500

High temperature alloys for gas turbine, examining advances in creep strength, low

cycle fatigue and wrought and cast turbine blading alloys [SAE PAPER 650708] 06 p0898 A66-17079

Oxidation kinetics of pure tungsten and tungsten alloys with various niobium content at high test temperatures 07 p1050 A66-18065

Precision casting based on directional solidification resulting in longitudinal columnar grains with preferred orientation, eliminating transverse grain boundaries in gas turbine elements [SAE PAPER 660055] 09 p1388 A66-20153

Construction and design of Apollo spacecraft, examining high temperature aluminum and titanium alloys and fabricating methods 10 p1545 A66-21217

Form rolling used to form L-shaped strips from L605 alloy for economical fabrication of supports for jet engine exhaust nozzles 10 p1545 A66-21220

Heat treatable alpha-beta titanium alloy, Ti-679, with excellent creep and yield strength in 600 to 900 degrees F range 10 p1545 A66-21221

Creep behavior in Ni-Fe alloys at high temperatures, using one composition inside ordered regions and another outside 11 p1717 A66-22993

Diffusivity, elastic modulus and stacking fault energy effect on high temperature creep behavior of alpha brasses 11 p1717 A66-22996

High temperature plastic deformation and hardening effects on brittleness, strength and viscosity of austenitic steel and alloys 13 p2106 A66-25328

Structural effect on DC magnetic behavior of high temperature alloys 14 p2311 A66-26884

High-temperature nickel sheet alloys as affected by composition, production methods and heat treatment [ASME PAPER 66-GT-104] 14 p2312 A66-27003

High temperature oxidation-resistant hafnium tantalum alloys, noting phase composition 14 p2315 A66-27501

Newer titanium alloys compared with present production alloys from closed die forgings in typical airframe and engine configuration 14 p2317 A66-28011

Structural changes and variations in hardness at high temperatures in titanium alloys, determining aging temperatures producing maximum hardness 15 p2522 A66-29183

Weldable titanium alloys hardened by heat treatment and with structure immune to high temperatures 15 p2522 A66-29186

High temperature oxidation of two ductile Cr-Ru alloys with composition near bcc alpha-phase solubility limit analyzed by four different techniques 16 p2721 A66-30220

Plasticity problem involving plane strain and plane stress simultaneously, groove formation in machining of high temperature alloys [ASME PAPER 65-PROD-10] 16 p2714 A66-30857

Estimation of creep in Ti-Al-V alloys by high temperature bending method 16 p2724 A66-31237

Cobalt and nickel eutectic alloys modification with selected elements for high temperature application, noting microstructure and tensile behavior 16 p2726 A66-31460

Strain hardening of high temperature titanium multiphase solid solution by deformation and subsequent rapid cooling 17 p2940 A66-33229

High temperature properties and recrystallization of heat-resistant alloy A-286 experimentally studied, noting faster occurrence of overaging with increased cold working 19 p3376 A66-35357

Reactive brazing alloys evaluated for columbium alloy foil brazing in order to avoid erosion and embrittlement of conventional brazing alloys 19 p3367 A66-36115

Protective coatings for titanium and tantalum refractory alloy brazing envelopes, offering ephemeral protection from oxidation at ultrahigh temperatures 19 p3384 A66-36143

Creep analysis of high temperature niobium alloys in very high

## HIGH TEMPERATURE FLUID

vacuum 19 p3385 A66-36155

High temperature refractory alloy fabrication for microwave antennas in hypersonic glide reentry vehicles 19 p3370 A66-36158

Particle size effects in age hardening of high temperature Ni-based alloys 20 p3586 A66-38094

High temperature oxidation resistance of zirconium boride/molybdenum disilicide alloys 20 p3586 A66-38137

Gas tungsten arc and electron beam welding for iron-base, nickel-base and cobalt-base alloys, noting use of weld filler metal to avoid cracking 22 p3924 A66-40263

Self-diffusion parameters of Nb in solid solutions with beta-Ti and beta-Zr at high temperatures 22 p3937 A66-40925

Alloy additions of Zr, Ta, Nb, Re, Mo and Hf tendency to interact with thorium oxide particles in tungsten base alloys during exposure to greater than 2000 degrees C 23 p4079 A66-41067

Structural materials for oxidizing environments at high temperature analyzed including nickel, cobalt and chromium alloys 23 p4080 A66-41125

Regularities in hardness variations in niobium binary alloy 23 p4081 A66-41386

Regenerative heat treatment for increasing creep life of high temperature alloys used in turbines 24 p4227 A66-42508

### HIGH TEMPERATURE ENVIRONMENT

#### SA THERMAL ENVIRONMENT

Temperature distribution in porous tube, examining transpiration cooling as thermal protection to surfaces exposed to high temperatures 03 p0445 A66-12806

Spark igniter that successfully operates at 50 to 120 psig chamber pressure and 2300 to 3000 degrees K without observable thermal shock or electrode erosion 08 p1281 A66-18838

Electric Ag-CdO contacts obtained by internal high temperature oxidation method 08 p1239 A66-18900

Acoustic and optical phonon drag of pure ionic n-type semiconductors having NaCl structure, calculating kinetic coefficients 08 p1273 A66-19252

Specific heat of iron, cobalt and nickel in high temperature range measured, using quasi-adiabatic operating calorimeter 08 p1240 A66-19255

Device for taking long time corrosion fatigue curves on small cross section specimens at high temperatures and pressures 09 p1388 A66-20433

High temperature thermocouples as in-core sensors provide NRX and KIWI reactor temperature control [AIAA PAPER 65-598] 10 p1555 A66-21944

Three-day battery capable of operation at temperature of 425 degrees C for use on lunar and planetary probes 13 p1999 A66-25691

High temperature strain gauge design 17 p2926 A66-32985

Tensile properties of protectively coated refractory metals for structural components in high temperature oxidizing environments 19 p3385 A66-36151

Stress rupture properties of tungsten wire at high temperatures, noting effect of primary recrystallization on microhardness, ductility and grain size 21 p3751 A66-39196

### HIGH TEMPERATURE FLUID

High temperature fluids, designated PR-143, suitable for hydraulic systems in range -50 to 700 degrees F [ASLE PREPRINT 65-LC-3] 02 p0238 A66-12258

Fire resistant hydraulic fluids for commercial and military application including siloxanes, silicones, esters and superrefined mineral oil [ASME PAPER 64-WA/LUB-14] 10 p1547 A66-21171

High temperature fluids, designated PR-143, suitable for hydraulic systems in range minus 50 to 700 degrees F [ASLE PREPRINT 65-LC-3] 12 p1889 A66-24988

High temperature flow characteristics in free piston shock tube measured by means of pulsed light of He-Ne gas laser 19 p3339 A66-35353

Criteria for hydraulic fluids for supersonic

aircraft noting fluid toxicity, fire hazards, compatibility with elastomeric materials, etc 24 p4229 A66-42380

## HIGH TEMPERATURE GAS

Vibrational relaxation model of high temperature gas to determine dissipative coefficients in highly nonequilibrium gas mixtures with binary collisions 04 p0455 A66-14140

Thermal conductivity of Ar, Ne and Kr from 1500 to 5000 degrees K [ASME PAPER 65-HT-3] 05 p0782 A66-14733

Computed high temperature rate constants for hydrogen atom transfers involving light elements, noting activation energies for exothermic reactions [CI PAPER WSCI-65-24] 05 p0629 A66-15148

High gas temperature measurement using colliding shock waves 10 p1622 A66-21883

Thermal conductivity of Ar, Ne and Kr from 1500 to 5000 degrees K [ASME PAPER 65-HT-3] 11 p1785 A66-22185

Homogeneous dissociation kinetics of gas examined by means of adiabatic compression apparatus attached to mass spectrometer 13 p2079 A66-25821

Shock tube study of high temperature gas flow around circular cylinders caused by electrical discharge 14 p2218 A66-27348

Thermal conductivity of hydrogen at temperatures up to 4700 degrees F determined indirectly from effective conductivity of porous tungsten specimens filled with pressurized hydrogen 18 p3125 A66-34387

Carbon dioxide dissociation rate measured from 3000 to 5000 degrees K, considering decrease in temperature and increase in density caused by endothermic dissociation 22 p3859 A66-39915

Methane/deuterium exchange reaction rate measured in shock tube, using vibrational excitation mechanism to explain data 22 p3860 A66-40903

Approximation of self-similar plane and axisymmetric problems for high temperature laminar boundary layer, based on equations for boundary layer of finite thickness for high temperature gas 23 p4149 A66-41783

Vacuum UV radiation measurement from high temperature nitrogen, detecting radiation from shock layer of ballistic model 24 p4208 A66-42182

Windowless total radiation gauge for shock tube measurements of high temperature gas radiance 24 p4208 A66-42183

Thermodynamic properties of high temperature gas deviating widely from ideal gas, considering acetylene combustion products 24 p4295 A66-43107

## HIGH TEMPERATURE LUBRICANT

Polyolefin fluids with wide viscosity range compared with petroleum oils and existing synthetic lubricants for extreme temperature application [ASLE PREPRINT 65-LC-1] 02 p0238 A66-12259

Properties of polyaromatic C-ethers for use as high temperature lubricants with outstanding gear load-carrying capability [ASLE PREPRINT 65-LC-2] 02 p0238 A66-12260

High temperature bearing lubricant requirements for jet engine lubrication systems [SAE PAPER 660072] 09 p1383 A66-20157

High temperature and vacuum effects on sliding friction and surface film formation between dry lubricated and nonlubricated pair combinations of metals, carbon and ceramics, noting SNAP reactor data [ASLE PREPRINT 65AM 6A1] 10 p1540 A66-22040

Polyolefin fluids with wide viscosity range compared with petroleum oils and existing synthetic lubricants for extreme temperature application [ASLE PREPRINT 65-LC-1] 12 p1888 A66-24986

Properties of polyaromatic C-ethers for use as high temperature lubricants with outstanding gear load-carrying capability [ASLE PREPRINT 65-LC-2] 12 p1889 A66-24987

Graphite lubricant physical and chemical combinations with other materials for improved high temperature friction and wear, discussing nuclear irradiation for

graphite lattice modification 17 p2929 A66-31933

## HIGH TEMPERATURE MATERIAL

Probabilistic method of reliability prediction of high temperature highly stressed structural parts in optimization of engineering design 01 p0145 A66-10081

Reliability and reproducibility of SIL-TEMP 84 fabric used as reinforced filler in ablative components and high temperature insulating material in rockets and missiles 01 p0089 A66-10089

Materials - ASTM International Conference, Philadelphia, February 01 p0085 A66-10291

Physical properties of 181 glass cloth laminates of diallyl orthophthalate and isophthalate in high temperature range 02 p0248 A66-11689

Erosion, oxidation, loss of strength and reduction of ductility resulting from long-time elevated temperature stressed exposure of nickel alloy used in jet engine design [AIAA PAPER 65-744] 03 p0381 A66-12583

Mutual effects of vaporization, combustion and coking processes during material decomposition in high temperature gas flow 03 p0445 A66-12828

Testing and application of hard facing methods used on turbine engine components to provide wear resistance at high temperature 03 p0373 A66-13085

High temperature behavior and properties of refractory materials such as molybdenum, tungsten, silicides, aluminides and carbides 04 p0534 A66-13372

Design properties, application and fabricability of super 12-Cr steels 04 p0535 A66-13638

Oxidation kinetics of tantalum-iron and tantalum-cobalt alloys and iron and cobalt at 500-900 degrees C 04 p0535 A66-13696

High temperature electromagnetic transducers applied as sensors for physical variables, including mechanical displacement and liquid metal flow and level 05 p0676 A66-14775

Kinetic studies of high temperature carbon-silica reactions in charred silica-reinforced phenolic resins [CI PAPER WSCI-65-25] 05 p0788 A66-15149

Carbon and graphite textiles use as ablative reinforcements for high temperature phenolic resin systems 06 p0899 A66-16285

Quantitative determination of Nb in large amounts of Zr and Ti in large amounts of Nb and Zr at high temperature, using oscillographic polarography 06 p0823 A66-16840

Capability of investment casting process in production of integrally cast turbine wheels and nozzles for high temperature gas turbine application [SAE PAPER 650706] 07 p1037 A66-17249

Three-angle method of measuring optical constants of metals at high temperatures, detailing instrumentation, precision and physical basis 07 p1081 A66-18038

BeO properties and relationship to microstructure and fabrication variable 07 p1051 A66-18297

Materials for extreme temperature and g loading during suborbital, manned and superorbital reentry 07 p1051 A66-18303

Thermodynamic stability and reaction kinetics of solids at high temperature 07 p1054 A66-18496

MAR-M 509, new cast cobalt-base superalloy for high temperature service, noting creep strength, aging, microstructure, oxidation resistance, etc 08 p1239 A66-18958

Thermal expansion of tungsten and tantalum in high temperature range 09 p1388 A66-20147

Metallurgical factors for materials in jet engines, considering ductility, strength loss, strain-cycling criteria, etc [SAE PAPER 660057] 09 p1388 A66-20155

Supersonic aircraft finishes resisting corrosion and high temperatures, including epoxy-amine cured primers, acrylic paints, silicone, synthetic enamels, etc 10 p1547 A66-21136

Plasma and carbide coatings for protecting graphite surfaces at high temperatures obtained by sputtering or deposition and

thermal treatment to induce diffusion 10 p1548 A66-21508

Refractory properties and resistance to thermal shock of sintered tantalum carbide impregnated with copper or silver at high temperature [ONERA TP 323] 11 p1718 A66-23201

High-temperature deformation of magnesium single crystals with /110/ tensile axis, favoring slip on systems with oblique vectors, related to observations on /001/ crystals 12 p1898 A66-23564

High temperature crystallization processes and physicochemical properties of lithium aluminosilicate glass 12 p1900 A66-24855

Grain boundary role in high temperature fracture behavior of magnesia, noting temperature and orientation dependence of shear strength 12 p1897 A66-24920

Materials for producing electric energy from heat by direct conversion 13 p1997 A66-25110

High remelt temperature brazing of Tai 10W honeycomb structures by brazing with pure titanium, using diffusion sink concept 13 p2109 A66-25770

Permanent compressive deformation of pyrolytic graphite rapidly heated to very high temperatures and loaded in compression direction 14 p2318 A66-27870

High temperature polyimide and polybenzimidazole honeycomb material, measuring shear and compressive strength and moduli 14 p2319 A66-28011

Temperature measurement above 1000 degrees K, using disappearing filament and line reversal optical pyrometers 15 p2502 A66-29080

Elastic and plastic deformation of polycrystalline metals exposed to ultrasonic load and high temperatures 15 p2523 A66-29600

Ceramic materials selection for principal high temperature components of gas turbines 16 p2790 A66-30200

Preferred orientation of pyrolytic carbon, noting relationships and equivalence of parameters 16 p2780 A66-31000

Behavior of ceramic insulating materials under nonisothermal conditions at high temperatures 16 p2731 A66-31600

Polytriphenylene synthesis at high temperatures using fused salts 17 p2869 A66-31800

High temperature insulating adhesives for vacuum applications tested, including outgassing rate, mass spectra of evolved gases, electrical and mechanical properties 17 p2942 A66-31900

High temperature, electrically insulating refractory tubes of boron carbonitride for protection of metal thermocouples 17 p2944 A66-33100

Heat shield and rocket nozzle chemical reactions based on equilibrium thermodynamics of high temperature materials at gas-solid interface 18 p3260 A66-33800

Tungsten heat conductivity between 1500 and 3000 degrees K and Lorentz number temperature dependence 19 p3350 A66-35500

Mutual effects of vaporization, combustion and coking processes during material decomposition in high temperature gas flow 19 p3479 A66-36700

Electrical and thermal conductivity at integral degree of blackness of tantalum at temperatures above 1000 degrees C 20 p3582 A66-36500

Simultaneous measurement of heat conductivity, heat capacity and thermal diffusivity of solid and liquid metals at high temperature 20 p3678 A66-37100

Honeycomb structure, examining assembly skin delamination at spars or terminus fitting, glasscloth radome and inspection techniques 20 p3671 A66-37400

Mechanical properties of metallic and ceramic fibers in metallic matrices and refractory fibers in ceramic matrices 21 p3751 A66-39300

Thermal expansion of tungsten and tantalum in high temperature range 21 p3753 A66-39300

Critical high temperature structural problems in missiles and manned lift reentry vehicles, considering meteoric impact and pressure vessel flaws

- growth 22 p3989 A66-40119
- Aircraft materials and structures for extreme ranges of velocity and temperature 22 p3990 A66-40120
- High temperature adhesive properties of epoxy, epoxy-phenolic, polybenzimidazole and polyimide 22 p3937 A66-40278
- Oxidation and mechanical performance of tungsten and composite tungsten systems at high temperatures and pressures, determining surface recession rate up to 750 degrees R AIAA PAPER 65-293] 22 p3935 A66-40343
- Applications for new class of materials termed oxide-dispersion strengthened materials offering stability at high temperatures and high thermal and electrical conductivity 22 p3935 A66-40526
- High temperature behavior of organic materials for aircraft, noting elastomers and elastomers ICAS PAPER 66-33] 22 p3938 A66-40660
- High temperature structural properties of glass fabric-reinforced polybenzimidazole, polyimide and phenolic laminates for aerospace application 23 p4083 A66-41389
- Plasma and carbide coatings for protecting graphite surfaces at high temperatures obtained by sputtering or deposition and thermal treatment to induce diffusion 23 p4083 A66-41528
- Protective coating problems of superrefractory alloys for use in space sleds at temperatures above 1000 degrees C 23 p4081 A66-41655
- Materials and cooling of aircraft gas turbine engines, noting nickel and tantalum alloys, turbine-inlet temperatures, coatings, etc 23 p4122 A66-41662
- Structural design problems of hypersonic air vehicles with air breathing propulsion, discussing relation to future hypersonic commercial air transport ICAS PAPER 66-31] 24 p4281 A66-42491
- Fuel cells with ceramic electrolyte operating at high temperatures, calculating voltage and efficiency 24 p4161 A66-42503
- Pure titanium tensile property, hardness and impact value at high temperatures, noting structural change from annealing 24 p4228 A66-42510
- HIGH TEMPERATURE PLASMA**
- High temperature air-carbon plasma noting black body radiation, atomic constants and thermodynamic equilibrium 04 p0599 A66-14460
- Heating by laser beam with application to lithium, noting use for high temperature plasma production 08 p1233 A66-18972
- Bremsstrahlung, recombination radiation and electromagnetic emission from high-temperature high density plasmas 10 p1566 A66-21705
- Hot plasma probed with atomic beam in presence of intense self-radiation flux and magnetic field impulse 10 p1571 A66-22011
- Kinetic equation with collision frequency operator used to represent high-temperature plasma instabilities induced by particle collisions 12 p1918 A66-23555
- Soviet high-temperature plasma physics and controlled nuclear fusion 13 p2145 A66-25736
- Laser radiation to determine electron density in dense high temperature plasma 14 p2374 A66-27507
- Magnetic mirror trapping of hot-electron plasma heated in quartz discharge tube 14 p2343 A66-27596
- Shock tube in studying high temperature plasma, noting other experimental devices 17 p2904 A66-33038
- Hot plasma probed with atomic beam in presence of intense self-radiation flux and magnetic field impulse 19 p3407 A66-36095
- Collisionless heating of plasma cylinder by RF field 21 p3781 A66-39008
- High temperature high density carbon plasma production in arc chamber of shock tube 22 p3955 A66-40092
- Ion oscillations in high temperature electron-ion plasma with HF perturbations 23 p4102 A66-41485
- High temperature physicochemical characteristics of thermoelectric plasma, examining operating principles of several versions of plasma generator 24 p4243 A66-42537
- Magnetic mirror trapping of hot-electron plasma heated in quartz discharge tube 24 p4243 A66-42730
- HIGH TEMPERATURE PLASMA DEVICE**
- Electron temperature measurement by relative intensity of He I lines shown as inapplicable for high plasma densities 10 p1571 A66-22021
- Electron temperature measurement by relative intensity of He I lines shown as inapplicable for high plasma densities 16 p2760 A66-30840
- HIGH TEMPERATURE RESEARCH**
- Thermal, micrographic and X-ray diffraction techniques used for constitution diagram of ternary system tungsten-molybdenum-osmium at various high temperatures 03 p0385 A66-13209
- High temperature measurement in combustion chambers of air breathing engines discussing optical, pneumatic, acoustic and calorimeter methods 04 p0518 A66-13537
- Variation of interdiffusion coefficient with composition for niobium-vanadium alloys determined for various diffusion temperatures 05 p0702 A66-15467
- Book on metal testing at high temperatures including tension, relaxation, compression, impact, nonsteady conditions, hardness, etc 06 p0966 A66-16561
- High temperature extensometer using linear variable differential transformer 07 p1030 A66-17230
- High temperature materials for hypersonic air-breathing engines, noting usefulness of coated refractory metals 09 p1435 A66-20670
- Cylindrical black body furnace with graphite resistance built in France, attaining 1600 degrees C, for calibration of radiation pyrometers 09 p1383 A66-20909
- Phase equilibria in Zr-Co-C and Nb-Fe-C ternary systems at high temperatures, using X-ray and microscopic analyses 10 p1546 A66-21509
- Creep testing apparatus for metals, with automatic recording of longitudinal and transverse deformations at high temperatures 11 p1780 A66-22600
- Thermal decomposition of difluorocarbene radical diluted in argon analyzed behind incident shock waves at high temperatures 12 p1811 A66-23623
- High temperature compacted-ceramic insulated, metal sheathed and hermetically sealed thermocouples for use in nuclear reactors and nonnuclear environment 12 p1879 A66-23698
- Ultrasonic measurement of elastic modulus of high temperature metal 13 p2194 A66-25092
- Vibrational relaxation times of deuterium in argon and krypton determined at high temperatures by shock heating gas mixtures in shock tube 13 p2136 A66-26662
- Moire data recording and processing techniques in thermal strain fields at high temperatures, comparing experimental data with elasticity theory 14 p2400 A66-27768
- Effect of high temperature thermomechanical condition on structure and phase composition of titanium alloys, noting deformation role in hardening 15 p2522 A66-29184
- Thermal diffusivity and specific heat of molybdenum at high temperatures measured, using variable heating in induction furnace 15 p2523 A66-29226
- High temperature compressive deformation equipment for ceramic materials noting loading, alignment and stress-strain measurement 16 p2682 A66-30950
- Slip in single crystal tungsten deformed in tension at temperatures from 2500 to 5000 degrees F 16 p2725 A66-31453
- Review of experimental capabilities for reaching pressure and temperature conditions prevailing in Earth mantle and core, including bibliography 17 p2918 A66-32661
- Deformation and strength properties of refractory solids at temperatures up to 2000 degrees C, using indentation hardness measurements for stress-strain measurements in strength properties 18 p3254 A66-33967
- Book on physics of shock waves and high temperature hydrodynamic phenomena 19 p3341 A66-36316
- Grain boundary migration in pure aluminum and lead under reversed torsional and bending stresses at elevated temperatures 19 p3386 A66-36365
- Applications of plasma jets with enclosed flames in space industry, noting design of burners 19 p3281 A66-36601
- Testing of adhesive bonding at high temperatures for use in reentry vehicles, using IR energy on specimen preloaded in shear [ASME PAPER 66-MD-38] 21 p3742 A66-38488
- Ultrasonic measurement of elastic modulus of high temperature metal 21 p3823 A66-38517
- Imaging techniques to obtain temperature and emissivity measurements and phase diagrams of high melting point ceramic oxides with aid of solar furnace 21 p3738 A66-39102
- Phase equilibria in Zr-Co-C and Nb-Fe-C ternary systems at high temperatures, using X-ray and microscopic analyses 23 p4081 A66-41529
- Grain boundary self-diffusion coefficient variation with applied stress and production of lattice vacancies applied to cavity growth in high temperature fatigue of Mg 23 p4081 A66-41714
- High temperature testing and evaluation of graphite helical-screw expanders and compressors for use with inert gas Brayton cycle 23 p4075 A66-41755
- HIGH VACUUM**
- Prebreakdown current in high vacuum noting field strength and field emission hypothesis 01 p0106 A66-10641
- Materials under high vacuum discussing degassing of metals, thin film deposition, food dehydration, vacuum melting and vacuum welding 04 p0534 A66-13373
- Thermionic emission properties of rhenium tape coated with lanthanum hexaboride, examining usefulness as low temperature emitter 06 p0883 A66-17029
- Diffusion, getter-ion and cryogenic high vacuum pumping methods, showing relationship of pressure vs gas load, operating efficiency and cost as function of system size 17 p2930 A66-32945
- Creep analysis of high temperature niobium alloys in very high vacuum 19 p3385 A66-36155
- Gauges and systems applicable to measurement of extremely high vacuums, considering ion gauges with modulators, suppressor gauges, extractor gauges and cold cathode type gauges 24 p4215 A66-43066
- HIGH WATER PROJECT**
- Two Project High Water experiments producing optical, ELF, RF, and radar data on ionospheric abort of large water quantities and expansion process 14 p2289 A66-28417
- HILBERT SPACE**
- Pseudo-inverse concept extended to Hilbert space unbounded operators with arbitrary range 01 p0092 A66-10179
- Steepest descent, covering iterative methods for driving support mapping gradient to zero in convex programming 04 p0540 A66-13997
- Generalized extensions of operators for mapping everywhere dense linear set onto generalized set of Hilbert space elements 05 p0708 A66-15329
- Algebra of singular integral operators, discussing action on Hilbert space and homomorphism 06 p0901 A66-16008
- Optimal control, discussing fundamental general necessary conditions for Mayer problem solution 06 p0864 A66-16623
- Perturbation method in theory of dynamic stability of systems with distributed parameters, discussing linear Hamiltonian equation in separable Hilbert space 07 p1056 A66-17606
- Linear and antilinear transformations for real and complex Hilbert space 07 p1058 A66-17963
- Convergence of Galerkin method in nonconservative stability problems of thin elastic plates and thin elastic rods 08 p1311 A66-19339

- Spectrum and eigenstates of Bardeen-Cooper-Schrieffer /BCS/ reduced Hamiltonian in theory of superconductivity 08 p1276 A66-19446
- Approximate solution for elasticity problems, noting mathematical determination of stress distribution in any homogeneous isotropic body 09 p1468 A66-20642
- Boundary condition constraint method for generalizing R-matrix theory, permitting use of shell model as basis for nuclear-reaction calculations 09 p1405 A66-20822
- Minimizing functionals on normed linear spaces, discussing steepest descent and rendezvous problems in control theory 13 p2116 A66-25343
- Minimum effort control problem in rotund reflexive Banach space and extension to Hilbert space under bounded linear transformation 14 p2266 A66-27631
- Existence theorem for nonlinear ODE system with continuous monotonic differential operators over Hilbert space and application to nonlinear network analysis 15 p2528 A66-29370
- Generalized extensions of operators for mapping everywhere dense linear set onto generalized set of Hilbert space elements 16 p2735 A66-30967
- Rall theorem on variational principle for linear elastodynamic BVPs on Hilbert space 23 p4138 A66-41538
- HILBERT TRANSFORM**
- Length of compact function estimated from noisy measurement of modulus of Fourier transform 06 p0867 A66-16977
- Fourier analysis of Riemann-Hilbert problem of diffraction of normally incident plane electromagnetic wave by plane metallic grid above dielectric sheet and semilinear plasma 24 p4175 A66-42978
- HILL CURVE**
- Markov chain hill-climbing scheme for probable fast-time learning absorbing model 19 p3333 A66-36663
- HILL EQUATION**
- Solution to two equations for wave propagation in periodic media expressed as solution to Hill equation 06 p0848 A66-16106
- Digital computer recomputation of stability transition curves in Hill-Meissner equation 09 p1395 A66-20623
- Eigenvalues and eigenvectors obtained by numerical solution of special Hill equation in lubrication theory [ASME PAPER 66-LUBS-13] 17 p2932 A66-33185
- HILL LUNAR THEORY**
- Book on celestial mechanics considering Laplace-Newcombe method, Hill planet and lunar methods, periodic orbits methods, etc., using differential equations 09 p1459 A66-20916
- HILL REACTION**
- Photoreduction of viologen dyes analyzed with chloroplasts, noting oxygen evolution and photophosphorylation efficiency, reduction potentials, etc 16 p2638 A66-30647
- Isolation of morphologically intact and photochemically functional chloroplasts from marine chrysomonad *Hymenomonas* sp 16 p2638 A66-30648
- HINGE**
- Design equations and curves for calculating critical spring rates of single-axis and two-axis flexure hinges 04 p0525 A66-13637
- HINGE MOMENT**
- Dither and sinusoidal incidence variations effect on control wing hinge moments of transonic-supersonic rolling maneuvering guided missile [AIAA PAPER 66-755] 22 p3846 A66-40639
- HISTOGRAM**
- Electric component of radiation field from same flashes recorded with histograms of product of field strength and distance, showing concentration around mean values 20 p3553 A66-38076
- HISTOLOGY**
- Continuous exposure of rats to 100 percent oxygen at 450 mm Hg for 64 days shows no physiological effects 12 p1807 A66-25013
- Response of tissue culture cells to low magnetic fields, noting no quantitative growth differences 12 p1807 A66-25015
- Structural and functional properties of heart and muscle type subunits of lactic dehydrogenases investigated, using

- comparative amino acid analysis 15 p2446 A66-28864
- HODOGRAPH METHOD**
- Compressible fluid flow, discussing simple wave supersonic flow mechanism for bodies with developable surfaces 06 p0802 A66-16352
- Flow function equations for transonic flow past closed profile contours 07 p0982 A66-18121
- Vehicle motion parameters in Newtonian central force field determined, using geometrical structures devised from properties of velocity hodograph 08 p1226 A66-19584
- Root hodograph method for determining amplitude and phase frequency characteristics of dynamic linear systems 08 p1202 A66-19692
- Navigational inertial system dynamic property analysis at high flight speeds, using hodographic characteristic equation for longitudinal and lateral aircraft motion error determination 09 p1401 A66-20913
- Exact solution derived for gas jet flow with three characteristic high subsonic velocities, using Falkovich extension of Chaplygin hodographic method 15 p2425 A66-29850
- Problems of various subsonic gas jets of finite width around dihedral obstacle solved with Chaplygin hodographic method 16 p2627 A66-30207
- Subsonic flow around circular cylinders using three alternate hodographic approximations to Chaplygin law 16 p2627 A66-30208
- Principle function tabulation for plane transonic flows study by hodographic method 16 p2686 A66-31034
- Tunnel diode circuit stability, equivalent circuit and conductivity hodograph 17 p2880 A66-31867
- Shock-induced boundary layer separation on supersonic intake, using hodograph technique for flow structure analysis 17 p2841 A66-32896
- Equivalent transfer function determined for quadrupole inserted between ideal modulator and demodulator from frequency characteristics 17 p2928 A66-33492
- Neon hodoscope study of energy and production heights of high energy EAS electron-photon cascades, comparing results to nuclear emulsion study findings 18 p3207 A66-35109
- EAS mu component fluctuations in density distribution and reception spectrum recorded, using hodograph detectors 18 p3208 A66-35116
- Chaplygin equation solution translating current function and velocity potential from physical into hodograph plane 19 p3342 A66-36474
- Book on transonic and hypersonic flow theory covering motion and shock equations, application of Newtonian theory, temperature effect, behavior of minimum drag bodies, etc 20 p3492 A66-37495
- HODOGRAPH THEORY**
- Lighthill integral transform methods in hodograph transformation theory of plane compressible transonic shock-free potential flows around airfoil sections in solution space of Chaplygin equation [ICAS PAPER 66-26] 23 p4007 A66-41008
- HOHMANN ORBITAL TRANSFER**
- Optimum transfer between Kepler ellipses, noting Hohmann orbital transfer method and geodesics and metric tensors in phase space 04 p0579 A66-14459
- Optimum orbital transfer from circular to nonintersecting elliptical orbit with use of two impulses of unequal specific impulses 14 p2387 A66-28181
- Minimum impulse orbital transfer between coplanar elliptical orbits with aligned axes, noting advantage of three- and two-impulse transfers 18 p3227 A66-33760
- Low thrust trajectory optimization, using Newton-Raphson method to solve nonlinear two-point boundary value problem [AIAA PAPER 65-698] 19 p3462 A66-35904
- Orbital transfer and rendezvous maneuvers between inclined circular orbits, particularly bielliptic transfer with plane change, Hohmann transfer with plane change and in-plane modified Hohmann transfer 20 p3657 A66-38158

## HOLE DISTRIBUTION

- Hole current and electron current affected by local pressure applied on emitter surface of planar-diffused n-p-n silicon transistor 04 p0558 A66-13420
- Mercury and zinc ions in germanium discussing hole capture cross section in comparison to standard white noise source 05 p0731 A66-14660
- Measurement of diffusion length of excess minority carriers in semiconductors in region where carriers are generated 06 p0924 A66-16506
- Hole diffusion constant dependence on electric field in n-type germanium 07 p1106 A66-18395
- Hole concentration effect on elastic constant of heavily doped p-type silicon 07 p1106 A66-18396
- Measurement of energy required to form one hole-electron pair in gallium phosphide by alpha particles 07 p1107 A66-18407
- Electric properties of single crystal p-type InSb, obtaining samples by zone melting, thermal processing, etc., noting hole concentration plotting 08 p1278 A66-19625
- Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 11 p1751 A66-22734
- Conductivity effective-mass of holes of gallium arsenide crystals with various hole concentrations determined from frequency dependence of spectral reflectivity in IR 12 p1928 A66-23994
- Two-dimensional problems in moment theory of elasticity for multiply coupled regions weakened by finite number of arbitrarily distributed circular holes 12 p1967 A66-24109
- Mercury and zinc ions in germanium discussing hole capture cross section in comparison to standard white noise source 13 p2167 A66-25933
- Transient and steady state photoconductivity in plastically bent germanium, noting logarithmic decay of photocurrent and logarithmic lux-ampere characteristics 15 p2558 A66-28860
- Spherical shell weakened by several circular holes translated into infinity systems of quasi-regular algebraic equation in canonical form 15 p2608 A66-28776
- Stress distribution around reinforced circular holes spaced equally on infinite sheets 16 p2815 A66-30808
- Stress-strain distribution near curvilinear holes in moment theory of elasticity in isotropic medium 16 p2819 A66-31111
- Electric properties of single crystal p-type InSb, obtaining samples by zone melting, thermal processing, etc., noting hole concentration plotting 17 p2984 A66-33134
- Concentration and lifetime of minority carriers in cadmium sulfide determined by method based on optically induced changes in concentration 19 p3437 A66-35437
- Thermoelasticity of semilinear state plane with circular coolant holes 21 p3826 A66-38535
- Optical determination of hole concentration dependence in p-type silicon semiconductor by measuring absorption coefficients 21 p3798 A66-38798
- Crystal dislocation distribution effect on low temperature electrical transport properties in plastically deformed 3B metals 21 p3753 A66-39340
- Infinite plate consisting of monocrystalline semiconductor of given thickness under effect of electric field results in changes in galvanomagnetic, piezoresistance and optical properties 22 p3965 A66-40000
- Capture effect on I-V characteristics of junction diodes and injection coefficients in forbidden transition zone 23 p4045 A66-41000
- Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 23 p4113 A66-41000
- Griffith type crack propagation due to localized thermal stress at holes, causing penny-shaped cracks and inclusions disturbing uniform heat flow 23 p4146 A66-41000
- HOLE MOBILITY**
- Acceptor level in iron doped Ga-As material toward valence band with increasing

temperature at approximately same rate band gap decreases 03 p0410 A66-13004

Transport effects in semimetals and narrow-gap semiconductors including nonlinear, thermomagnetic and superconductive effects and tunneling 04 p0559 A66-13451

Transverse Dember effect in anisotropy of electrical and photoelectrical characteristics of indium selenide 04 p0565 A66-14259

Temperature dependence of effective mass and influence of two-phonon processes on mobility in semiconductors with narrow forbidden bands 04 p0565 A66-14263

Hole-type superconductivity in semiconductors 04 p0565 A66-14265

Transmission of hole-type germanium in strong electric fields, noting spectral dependences of radiation modulation and hole absorption cross section 04 p0568 A66-14352

Galvanic and thermomagnetic coefficients of undoped polycrystalline p-type GaSb sample in weak magnetic field, emphasizing hole mobility 04 p0571 A66-14499

Charge-carrier concentration and mobility in thin silicon specimens 10 p1589 A66-22172

Free hole lifetimes greater than 50 microseconds in silver bromide above 200 degrees K and measurement of drift mobility 14 p2365 A66-27756

Transmission of hole-type germanium in strong electric fields, noting spectral dependences of radiation modulation and hole absorption cross section 14 p2368 A66-28250

Electrical properties of nickel ferrite in terms of Jonker model, noting magnitude of energy gap between Fe and Ni levels and mobilities of electrons and of positive holes 16 p2781 A66-31215

Electron-hole conductivity effect on temperature variations of Hall coefficient and Nernst-Ettingshausen effect in semiconductor 17 p2986 A66-33309

Charge-carrier concentration and mobility in thin silicon specimens 19 p3441 A66-35786

Interband microwave scattering of holes by cyclotron resonance in Ge 21 p3797 A66-38753

Varying excitation intensity effects on edge emissions from pure and doped CdS powder samples, noting electron-hole recombination mechanisms 21 p3802 A66-39202

Fast neutron effect on electrical properties of boron-doped n-type silicon samples with resistance, noting decrease in hole concentration and mobility 22 p3961 A66-39829

Mean energy required to create electron-hole pair in Si measured as function of temperature, using cryostat 23 p4111 A66-41264

Magnetic pinch formation in indium antimonide and possibility of population inversion in pinch, using strong current supported by electron-hole plasma 24 p4249 A66-42224

Conductivity modulation by heavy-to-light hole transitions in p-type germanium noting carrier lifetime and ringing of laser pulse 24 p4219 A66-42249

Charge carrier mobility by combining conductance with thermogravimetric measurements 24 p4250 A66-42295

Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si 24 p4255 A66-42496

Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si, noting numerical results 24 p4255 A66-42498

**HOLMIUM**

Laser characteristics of and coherent oscillations from trivalent Tm, Ho, Yb and Er ions in yttrium aluminum garnet 01 p0079 A66-10241

Coherent emission from trivalent holmium ions in rare earth substituted yttrium aluminum garnet, noting three energy transfer combinations in YAG 15 p2512 A66-28690

CW laser action in holmium-doped erbium trioxide with dominant pumping by energy transfer between ions 24 p4222 A66-42555

HOLOGRAPHY

Linear filtering concepts in imaging and optical data processing systems, including three-dimensional photography obtained by wave front reconstruction 02 p0240 A66-11453

Laser application problems in interferometry, radar and holography including mechanical stability, noise suppression, dirty laser beam restoration, etc 02 p0240 A66-11454

Mode-controlled giant pulse laser used to produce two-beam hologram in short exposure time of 30 nsec 02 p0233 A66-12215

Optical data processing techniques considering storage, manipulation, holography and pattern recognition using matched filters 03 p0378 A66-12997

Interferometry with holographically reconstructed comparison beam discussing principles, techniques and error sources 04 p0521 A66-13985

Fresnel diffraction laws for calculation of light amplitude distribution in image spot of point as function of aperture dimensions used on hologram, source, function, etc 04 p0532 A66-14173

Progress in wavefront reconstruction imaging, using laser and X-ray 05 p0677 A66-14833

Holographic information of photographic plate and diffusing object 05 p0678 A66-15105

Hologram imaging process in which Fresnel diffraction pattern of object is recorded by scanning at X-band 06 p0881 A66-16638

Effect obtained by rotating holograms, noting image inversion when rotating hologram 180 degrees about vertical axis in hologram plane 06 p0881 A66-16676

Reconstruction of phase objects by holographic imaging as three-dimensional lensless photography 07 p1032 A66-17461

Holographic study of time average of coherent wavefronts scattered from vibrating object 07 p1144 A66-18034

Interferometric hologram evaluation and real time vibration analysis of diffuse objects 07 p1144 A66-18040

Hologram-generated ghost image experiments to verify fragment displacement theory and diffuse light waveforms 10 p1534 A66-21249

Photography providing complete illusion of reality of object represented, noting holographic and interference techniques 10 p1534 A66-21331

Laser application in photography, noting interferometric and holographic techniques 10 p1535 A66-21333

Wave front reconstruction /holography/, hologram production, interferometry, schlieren photography and shadowgrams applied to fluid mechanics 10 p1536 A66-21750

Hologram photography, principles, techniques and application 11 p1705 A66-22669

Cardinal points and focal lengths of holographic system established by treating holographic imaging as projective transformation between object and image space 11 p1706 A66-22872

Television transmission of Fresnel type hologram for originally transparent object 11 p1707 A66-23092

Holography, X-ray crystallography and correspondence between optical image synthesis and heavy atom technique 11 p1707 A66-23194

Two-beam interferometry by wavefront reconstruction from hologram recorded with coherent background successively interfere in same latent image 11 p1708 A66-23204

Ghost imaging of solid objects by holograms formed in near field without using Fourier transforming lenses 11 p1708 A66-23205

Hologram television transmission using microwave wavelength, yielding aperture-limited resolution and aperture-size reduction method for low resolution 12 p1881 A66-24152

Phase reference beam of two-beam carrier frequency holography method used for polarization reference 12 p1883 A66-24561

Radar maps of Moon and planets using bistatic continuous wave mode of radar operation between orbiting spacecraft and ground station 12 p1825 A66-24891

Dual-and multiple-beam interferometry by wave front reconstruction from surfaces of standard engineering components, applicable to structural dilatation problems 12 p1884 A66-24967

Holographic interferometry, advantages and operation 13 p2076 A66-25048

Holograms and wavefront reconstruction techniques involving prismatic refraction of monochromatic and coherent laser light causing interference pattern on photographic emulsion 13 p2076 A66-25144

Lens aberration correction using Gabor wavefront reconstruction method to produce hologram of spherically aberrated wavefront emerging from lens 13 p2080 A66-25990

Photographic copies of holograms taken with laser light noting film, light source, directional effect, processing, etc 13 p2081 A66-26000

Phase hologram generation by means of thermoplastic xerography 13 p2081 A66-26001

Moving target hologram generation using modified Michelson interferometer 13 p2081 A66-26003

Reconstitution in space of curve recorded photographically by displacement of luminous point illuminated by coherent light 13 p2082 A66-26343

Hologram quality as affected by illumination of stationary objects through moving scatterer while maintaining stationary coherent background 13 p2084 A66-26588

Holography process and application 14 p2290 A66-26870

Holograms of object illuminated with spatially incoherent light from low pressure mercury lamp, using afocal lens in interferometer for wavefront splitting 15 p2497 A66-28694

Absence of phase-recording or twin-image separation in Gabor holography 15 p2498 A66-28759

Hologram construction for real three-dimensional scene without visual anomalies, noting technique and results 15 p2499 A66-28879

Image reconstruction with Fraunhofer holograms formed from opaque or transparent diffracting objects in aperture with coherent illumination 15 p2500 A66-28973

Photographic recording of spatially modulated coherent light 15 p2501 A66-28974

Image luminance of paraxial rays, image formation and ray tracing in holography, using Fresnel-Kirchhoff diffraction formula 15 p2501 A66-28975

Hologram reconstruction obtained by illuminating hologram plate with common two-cell flashlight 15 p2502 A66-29033

Holography of pure phase objects, considering incoherent viewing 16 p2700 A66-30206

Image distortion within cinematographic process as related to photography, noting quality estimation, visual perception criteria, etc 16 p2702 A66-30432

Bibliography of holograms 16 p2702 A66-30433

Schlieren photographs from holograms, apparatus and method 16 p2707 A66-31092

Hologram construction and sources of image degradation including random vibrations, film transfer characteristics, etc 16 p2707 A66-31243

Complex spatial filter produced by inserting Fourier hologram into Fraunhofer plane of coherent image-forming system 17 p2925 A66-32616

Readout technique for laser fog disdrometer 17 p2927 A66-33346

Color hologram for white light reconstruction constructed from three-dimensional diffusely reflecting objects 18 p3109 A66-33611

Polarization-induced crossed polarization figure in hologram 18 p3111 A66-33997

Coherent optical reconstruction from microwave holograms in two-step Gabor image-formation technique 18 p3111 A66-33999

Holography principles and development, considering wave front reconstruction, Lippmann photography, laser light, application to TV, etc 18 p3115 A66-35244

Shadowgrams, schlieren photographs and

interferograms produced from reconstructed wavefront 19 p3354 A66-35386

Photographic process role in holography, noting relationship of exposure and transmittance by highly nonlinear inverse power law 19 p3357 A66-35815

Holography principles, discussing basic equation, Fourier transform holograms and hologram interferometry 20 p3556 A66-36929

Analytical and geometric relationships between hologram scene and reconstructed images 20 p3556 A66-36934

Effect of emulsion thickness on optical characteristics of reconstructed images, noting sensitivity to incidence angle 20 p3558 A66-37287

Holography theory and construction methods including experiments with thick or three-dimensional recording media, considering applications to microscopy, X-ray holography and TV 20 p3560 A66-37620

Holography, discussing potential uses, frozen wave fields, holograms at X-ray wavelength and stress analysis 21 p3739 A66-39199

Finite grain size of photographic film effect on holography for cylindrical wavefronts 21 p3740 A66-39393

Laser bibliography July-December 1965, including references to holograms 21 p3749 A66-39541

Holographic processes, uses and limitations, discussing coherent imaging, holographic information storage and information display 22 p3918 A66-40292

Hologram recording system as interferometer 22 p3920 A66-40887

Spatial phase modulation of wavefronts used in spatial filtering and holography, examining means of preventing or reducing noise and distortion 22 p3920 A66-40888

Interference between deformed plane wave and reference wave in coherence, obtaining transfer function of objective, using holography 23 p4067 A66-41178

Image restoration via phase holograms, noting applications to deteriorated photographic negatives and positives 23 p4068 A66-41411

Wave front scattering and refraction by laser spark studied by holograms of air plasma formed by giant ruby laser pulse 24 p4219 A66-42131

Diffraction gratings by recording laser-generated interference pattern on high resolution film as two-beam hologram 24 p4210 A66-42259

White light reflection holography extended to recording of volume holograms in emulsions on sheet film 24 p4220 A66-42260

Pulsed laser holograph and problem of overcoming limited coherence 24 p4211 A66-42560

Achromatization of holograms using two-lens configuration 24 p4211 A66-42626

Noise limitations in obtaining three-dimensional images by holographic techniques, considering graininess of photographic emulsion 24 p4212 A66-42752

Reconstruction of hologram in nonmonochromatic light as constituting incoherent addition of images reconstructed from hologram area elements 24 p4215 A66-43053

Compressible and incompressible flows made visible by optical method sensitive to density variations, shadowgraph, schlieren system, Mach-Zehnder interferometer and holographic interferometry with lasers 24 p4192 A66-43196

**HOMING**

Homing by steepest descent method rather than proportional navigation 12 p1909 A66-24262

**HOMING DEVICE**

**S GUIDANCE SYSTEM**

**HOMODYNE**

Coherent interference rejection, discussing noise and modulator-leakage pickup rejection in laser communications experiments 07 p1001 A66-17217

**HOMOGENEOUS TURBULENCE**

Existence and uniqueness of solution for second boundary value Neumann problem in linear flow theory 02 p0296 A66-11242

Turbulence in hydrodynamics and plasma physics 05 p0727 A66-15260

Decaying second-order isothermal reaction

in limit of homogeneous turbulence in final period of decay 10 p1496 A66-21828

Inertia and pressure effects on energy potential of homogeneous and isotropic turbulence in weakly compressible medium 18 p3100 A66-34608

**HOMOLOGY**

Stellar evolution for high temperature, predominantly neutrino processes, noting breakdown of homology relation between density and temperature 19 p3467 A66-36795

**HONEYCOMB**

**SA MULTILAYER STRUCTURE**

Aluminum honeycomb sandwich structures under axial compressive loading in reliability safety margin analysis, using derived statistical strength data 01 p0145 A66-10086

Honeycomb design, structures, developments and advantages, discussing materials and sandwich construction [ASME PAPER 65-AV-17] 02 p0236 A66-11795

One-dimensional transient heat flow through honeycomb sandwich panels [AIAA PAPER 64-258] 05 p0775 A66-15080

Microwave scattering system for detection of voids in fiberglass-honeycomb ablative materials causing drop in receiver signal strength 09 p1385 A66-20966

Effect of conventional ammunition on aluminum honeycomb paneling, noting reduction of load-bearing and peel-strength properties 13 p2196 A66-25599

High remelt temperature brazing of Ta-10W honeycomb structures by brazing with pure titanium, using diffusion sink concept 13 p2109 A66-25774

High temperature polyimide and polybenzazole honeycomb material, measuring shear and compressive strengths and modul 14 p2319 A66-28012

Radiant-interchange configuration factors between various selected plane surfaces with common contact 16 p2826 A66-30530

Mechanical behavior of three-layer plates with honeycomb filler under longitudinal compression 16 p2817 A66-31049

Bending problem of three-layer plates with fillers 16 p2817 A66-31050

Design equations for three-layer plate with rigid filler 16 p2817 A66-31051

Shear flow generated in rotational flow, noting honeycomb structure satisfactory in rotational flow about thin airfoils 21 p3724 A66-38735

**HONEYCOMB CORE**

Displacement response prediction and fatigue life of honeycomb sandwich panels subjected to acoustic excitation 01 p0149 A66-10141

Synthetic spherulites in plastic foam and synthetic tube segments in honeycomb form as fillers in sandwich construction 10 p1614 A66-21390

Sandwich cores consisting of tubes arranged in honeycomb configuration with tube axes normal to sandwich surface 12 p1959 A66-23782

Manufacturing methods and equipment to sculpture aluminum honeycomb core, discussing tracer control, airfoil mill, traversing router, etc [SAE PAPER 660326] 14 p2301 A66-27294

Refractory metal honeycomb structure fabrication for heat shield panels, using D-36 columbium alloys 19 p3371 A66-36161

Honeycomb structure, examining assembly, skin delamination at spars or terminal fitting, glasscloth radome and inspection techniques 20 p3671 A66-37827

Linear elastic small deflection theory of natural frequencies of vibration of rectangular sandwich honeycomb plate with mass attachment 24 p4292 A66-43046

**HOOKE LAW**

Elastic-plastic material, calculating stress concentration and deformation for planes weakened by circular holes 06 p0964 A66-16476

Hooke law extension to include term expressing dependence of stress on spatial variation of strain, noting rotation of polarization plane in sound wave propagation in isotropic medium 14 p2334 A66-27478

Hooke law analysis of dynamic stability of closed circular cylindrical anisotropic shell compressed by longitudinal force 15 p2609 A66-29196

Variational solution of simultaneous stability equations boundary value problem for transverse displacements and stress state 16 p2819 A66-31137

Linearity, stress, strain, time and birefringence relations in plastic model materials, using Hooke law 20 p3668 A66-37498

Equations for plane deformation in multimodule elasticity theory, formulating generalized Hooke law for multimodule material 21 p3826 A66-38609

Plane stressed state of nonlinear plate with opening reinforced by thin elastic rod in case of small deviations from Hooke law 22 p3991 A66-40152

**HOPE SPACECRAFT**

**S HYDROGEN OXYGEN /HOPE/ SPACECRAFT**

**HORIZON**

**S GYRO HORIZON**

**S RADIO HORIZON**

**HORIZON SCANNER**

**SA INFRARED HORIZON SCANNER**

Transhorizon propagation using ORBIS, noting burst propagation and quasi-sinusoidal fading 15 p2451 A66-29230

Sunfollower assembly for maintaining horizon scanner in Sun vertical 21 p3740 A66-39387

**HORIZON SENSING**

**SA ATTITUDE CONTROL**

Self-contained orbital navigation system using Earth-horizon measurements in 14-16 mu carbon dioxide absorption band, using Kalman linear filter theory 01 p0100 A66-10024

Response of inertial platform in orbital gyrocompass mode studied for satellite vehicle [AIAA PAPER 64-238] 03 p0369 A66-12730

Propellant rocket exhaust plume effect on error calculation for radiation balance II tracker 18 p3240 A66-33791

TACITE rocket sounding of characteristic of IR contrast between Earth and space 20 p3663 A66-38033

Horizon sensor data processing with compensation for statistical properties of errors, noting application of optimum filtering theory 21 p3766 A66-38888

Kalman filter divergence control, noting analytical and empirical modification methods 21 p3766 A66-38888

Stability criteria derived for horizon sensors which track point on horizon where second harmonic of signal generated by scan motion of field of view is zero 24 p4175 A66-42811

Horizon sensing problems for application to spacecraft stabilization techniques, including sensors using Earth brightness, conic scanners and interference caused by cloud haze and other atmospheric phenomena 24 p4235 A66-42811

**HORIZONTAL ATTITUDE**

Combined effect of horizontal and vertical accelerations on gravimeter reading, mounted on gyroplatform or in Card suspension 14 p2297 A66-28111

Combined effect of horizontal and vertical accelerations on gravimeter reading, mounted on gyroplatform or in Card suspension 24 p4212 A66-42611

**HORIZONTAL TAIL**

Large transport aircraft design, examining effect of high horizontal stabilizer location on vertical fin [AIAA PAPER 65-331] 13 p1994 A66-25511

**HORMONE**

**SA ADRENOCORTICOTROPIN /ACTH/ SA INSULIN**

Gravity effect on basipetal transport auxin studied by growing plants both erect and on horizontal clinostats 06 p0812 A66-16411

Adrenocorticotrophin-releasing hormone appears in peripheral blood of rats under physiological stress, noting role of pituitary gland 14 p2228 A66-27211

Urinary excretion of steroids as catecholamines as measure of emotional stress of man in 56-day exposure to oxygen-helium environment 18 p3057 A66-33111

**HORMONE METABOLISM**

Degree of mental stress correlated with excretion of catecholamine, free adrenaline and noradrenaline in

- horn antenna 04 p0470 A66-14081
- Radiation patterns of transversely polarized horn reflector antenna, using image method 01 p0044 A66-10937
- Flux density of Cas A measured, using horn-reflector antenna, response compared with output of reference-noise source 05 p0762 A66-15278
- Circular horn radiators with annular seal connections to antenna for simultaneous transmission of dual waves decoupled by polarization 09 p1354 A66-20493
- Radio telescope techniques applied to astronomy, noting data processing and antenna receiving systems including masers, parametric amplifiers, etc 10 p1602 A66-21064
- Minor lobe suppression in rectangular horn antenna through utilization of high impedance choke flange 11 p1663 A66-22556
- Radiating mechanisms in reflector antenna system including aperture radiation, direct feed radiation and diffracted radiation 11 p1673 A66-23481
- Radiation characteristics of horn antennas analyzed, using edge diffraction theory, noting intensity at backlobe and far sidelobe 14 p2255 A66-27908
- Modification of horn antennas for low sidelobes, emphasizing reduction of backlobes of pyramidal horn antenna 15 p2457 A66-28595
- Horn radiators with high attenuation capabilities, noting design features, application to parabolic antennas, etc 17 p2894 A66-32989
- Rear feeds for paraboloidal reflectors 18 p3075 A66-33618
- Four-horn and five-horn monopulse antenna system properties including illumination apertures, gain factor, temperature, etc 18 p3080 A66-34265
- Feeding paraboloidal reflectors by stacked horns, using 45 degree polarization and double stacking of horns 18 p3081 A66-34270
- Diffraction pattern analysis of fields generated by hoghorn-fed Cassegrain antenna operating in Fresnel zone 18 p3083 A66-34289
- Four-and five-horn tracking feeds for large antennas, emphasizing sum channel gain in five-horn feed 18 p3083 A66-34292
- Radiation pattern synthesis for circular aperture horn antennas, assuming aperture distribution consisting of fields of cylindrical waveguide modes and by linear combination of radiation pattern functions 19 p3320 A66-36404
- Large reflector shape measured by method using horn antenna illumination and small auxiliary reflecting device 20 p3527 A66-37448
- Horn transitions from empty waveguides to dielectric surface waveguides using telegraphers equations, determining launching horn shape with minimum reflection coefficient 21 p3711 A66-38836
- OT CATHODE**
- Double sheath presence in front of hot cathode in low pressure DC discharge 02 p0265 A66-11433
- Cesium filled diodes measured at various cathode temperatures, noting effect of ions generated in interelectrode space on current 05 p0728 A66-15549
- Colloidal thruster with hot cathode charged colloidal particle source [AIAA PAPER 66-255] 10 p1593 A66-21460
- OT CYCLE PROPULSION SYSTEM**
- Hot cycle rotor/wing aircraft for high speed VTOL, embodying lightweight lift/propulsion system and high payload capability with economic benefits 06 p0805 A66-16810
- Advanced heavy lift helicopters performance with hot cycle propulsion 17 p2843 A66-32720
- OT ELECTRON**
- Nonlinear electrical effects and recombination of hot electrons in compensated germanium, studying steady and transient I-V characteristics 02 p0273 A66-11717
- Electron energy and momentum dissipation in n-type InSb at low temperatures, discussing collision effects on hot electron escape 02 p0276 A66-12079
- Longitudinal nonlinear traveling oscillations in hot electron plasma 03 p0401 A66-12956
- Impact ionization coefficient for electrons and holes in silicon determined from distribution function of hot carriers and shown to be weakly dependent on ionization cross section 04 p0565 A66-14262
- Plasma instability in oscillating discharge, with linear analysis of several types 05 p0723 A66-15161
- Direct measurement of energy relaxation time between hot electrons and lattice in n-type indium antimonide in hydrogen temperature range 06 p0929 A66-17036
- Radiation damage in nondegenerate germanium at low temperatures, using hot carrier technique for measuring resistivity and Hall coefficient on antimonide doped samples 06 p0932 A66-17114
- Hot electron recombination peculiarities, ignoring electron temperature concept, for moderate fields and lattice temperatures 07 p1104 A66-18220
- Mirror ratio is principal parameter controlling heating of plasma by electron beam in magnetic mirror system 07 p1090 A66-18260
- Faraday effect on hot electrons in germanium and silicon 07 p1105 A66-18370
- Instability initiating plasma transport across magnetic field in plasma discharge occurring after plasma decayed for some time, damping loss by addition of cold electrons to discharge 08 p1260 A66-18544
- Mobility of hot electrons in runaway regime of n-type InSb and GaAs at low temperatures 09 p1412 A66-19987
- Hot electron emission from semiconductor cathode in vacuum-tube diode during tapping of thermoelectronic and autoelectronic current 09 p1429 A66-20813
- Mirror ratio is principal parameter controlling heating of plasma by electron beam in magnetic mirror system 09 p1409 A66-20904
- Hot electron emission from thin metallic films of island structure 10 p1589 A66-22171
- Hot-electron transistors, discussing application of Schottky-emitter transistor to VHF operation 13 p2038 A66-25561
- Injection and extraction of hot electrons in n-n heterojunctions with rapid Maxwellization of electron gas, negative resistance and semiconductor characteristics 13 p2166 A66-25920
- Gunn effect involving current oscillations higher than 1000 mc in GaAs crystal under applied electric field 14 p2355 A66-26920
- Microwave rotator using hot carrier property of n-type germanium 14 p2248 A66-27056
- Hot electron recombination at repulse impurity centers in germanium containing copper 14 p2357 A66-27074
- Large annular steady state stable hot-electron plasma blanket formed by magnetically trapping electrons originating in intense arc gas discharge 14 p2347 A66-28304
- Hot electron redistribution in multivalley conductors in electric fields, based on variation under pressure of valley population levels, using silicon samples 15 p2559 A66-28622
- Electric current density in semiconductor, noting harmonic mixing of microwaves by warm electrons in germanium 15 p2564 A66-28875
- Acoustoelectric effects for various sound waves, using rate of energy exchange between two coupled systems in relative motion 15 p2564 A66-28970
- Hot carrier microwave detector based on thermoelectric effect of warm carriers in bulk semiconductor and assuming Maxwell-Boltzmann distribution for heated carriers 15 p2461 A66-29014
- Flute stabilization of hot electron plasma by cold plasma which contributes to dielectric coefficient 15 p2555 A66-29759
- Electron-cyclotron-heated plasma stability in mirror containment systems possessing shear, minimum-B properties or both 15 p2555 A66-29760
- Hot electrons in anisotropic semiconductor, considering case of scattering by acoustic phonons within one energy valley with nondegenerate bottom 17 p2977 A66-32318
- Magnetospheric suprathermal-electron scattering in oscillating electrostatic plasma and diffusion of subthermal electrons across magnetosphere, using ion-wave propagation theory for electroconductive plasmas 17 p2993 A66-32521
- Nonlinear ionic-acoustic wave propagation in collisionless hot electron plasma with at least one cold ion stream 17 p2973 A66-32976
- LF common-base current transfer ratio for hot electron transport in semiconductor-metal-semiconductor point-contact-transistor structures measured as function of metal film thickness and temperature 19 p3435 A66-35410
- Hot electron emission from thin metallic films of island structure 19 p3441 A66-35785
- Beam-plasma interaction used to generate fully ionized plasma and enhance component temperature for study of plasma heating and burnout 19 p3429 A66-36585
- Field and charge density distributions in semiconductor with hot electrons, showing domain movement type oscillations due to stationary wave propagation 20 p3617 A66-37555
- Hot electron recombination at repulse impurity centers in germanium containing copper 22 p3966 A66-40832
- Spatial distribution of hot electrons coherently scattering in thin Au film 23 p4115 A66-42063
- HOT FORMING**
- Construction of hot forming tool made of fused silica ceramic 08 p1229 A66-18691
- Thermal stability, adhesion prevention, stress and die wear reduction and air pollution of industrial lubricants 14 p2304 A66-28207
- Hot forming of titanium sheet structures and relation to cost [SAE PAPER 660327] 15 p2511 A66-29845
- HOT GAS**
- Transient cooling of spherical mass of high temperature gas by thermal radiation, neglecting ionization and dissociation effects [ASME PAPER 65-APMW-22] 04 p0598 A66-14223
- Prediction of solid propellant hot-gas ignition based on preignition transient convective heat transfer model [AIAA PAPER 66-67] 08 p1317 A66-18993
- Line-of-sight IR spectral temperature profile measurements in inhomogeneous hot gas 09 p1382 A66-20505
- Spectroradiometric pyrometry of shock heated gases by IR emission and absorption measurements 09 p1382 A66-20508
- Transient cooling of spherical mass of high temperature gas by thermal radiation, neglecting ionization and dissociation effects [ASME PAPER 65-APMW-22] 10 p1621 A66-21468
- Electrothermal propulsion system using heated gaseous nitrogen to provide Vela satellite with orbital velocity correction capability and weight savings [AIAA PAPER 66-213] 11 p1759 A66-22217
- Adiabatic dispersion into empty space of triaxial gaseous ellipsoid studied by Ovsliannikov exact solution of equations of gasdynamics 14 p2278 A66-28060
- Hot flame gases ionization by electron reactions at atmospheric pressure 18 p3137 A66-34116
- HOT GAS SYSTEM**
- Underwater thermal propulsion system powered by closed-cycle steam power plant fed by high-temperature variable gas flow from oxygen-hydrocarbon combustion apparatus [AIAA PAPER 65-481] 19 p3479 A66-36492
- HOT PRESSING**
- Fabrication and properties of translucent bodies of hot-pressed alumina, beryllia and magnesite with data on density, microstructure, thermoconductivity, etc 07 p1054 A66-18502
- Hot-pressed high-purity polycrystalline MgO 12 p1900 A66-24721
- Recrystallization in titanium alloy strips subjected to various levels of hot rolling 15 p2522 A66-29185
- Laboratory press for high temperatures and pressures analyses of hard material powders, noting carbon dies and measurements of densification vs time 16 p2673 A66-30254
- Continuous hot pressing apparatus design,

operation, production economy and results with oxidic materials and metals 16 p2709 A66-30255

Hot pressing technology applied to various metal alloys, noting physical, thermal and electrical properties 16 p2714 A66-30626

Rupture strength increase in tungsten and molybdenum chopped wires silicide coated by pack diffusion and incorporated in mullite matrix by vacuum hot pressing [ACS PAPER 7-C-65F] 16 p2723 A66-30949

Fine particle size pure tungsten and thoriated tungsten powder produced by hot pressing in graphite dies at temperatures from 1500 to 1800 degrees C 19 p3382 A66-36120

High temperature tensile deformation of polycrystalline magnesla prepared by single-crystal recrystallization and hot pressing 21 p3753 A66-38592

**HOT SPOT**

IR measurements on eclipsed Moon, discovering hot spots on lunar surface 19 p3457 A66-35448

**HOT WATER ROCKET**

Hot water rockets covering principle, design, advantages, testing techniques and performance capabilities 05 p0659 A66-14677

**HOT WIRE**

Roberts method determining accommodation coefficients of gases on bare wires leads to erroneous conclusions due to thermal inertia of experimental apparatus in vicinity of current paths 04 p0545 A66-14170

Measurement of heat exchange coefficient for heated cylindrical copper wire immersed in sand particles or glass beads at various low pressures 14 p2415 A66-28319

Forced convection caused by normal and longitudinal components of flow around hot wire, noting effect of wire length 20 p3544 A66-36928

**HOT-WIRE ANEMOMETER**

Hot wire Wheatstone bridge used in automatic control and method to obtain linear response in large speed fields 02 p0229 A66-11760

Parametric analogies used to obtain design characteristics of thermal and viscosity vacuum meters and hot-wire anemometers 07 p1031 A66-17412

Dynamic transient response of fluid surrounding hot wire studied by analysis of basic transport equations for momentum and energy 10 p1521 A66-21055

Thermistor hot-wire anemometer with feedback bridge circuit for measuring air flow rates to 20 m/sec from zero to 50 degrees C 11 p1709 A66-23320

Hot-wire anemometer measurement of turbulent velocity fluctuations in air flow and energy spectrum and correlation analyses 12 p1880 A66-23846

Time resolution error of measured correlation function, based on frequency response of hot-film and hot-wire anemometer 12 p1880 A66-23847

Hot-wire anemometer applications to turbulence measurements in conducting liquids and vacuum deposition of quartz film on coated hot-film probe 12 p1880 A66-23848

Hot-wire anemometer determination of electron and ion temperature, neutral particle temperature, concentration and velocity and potential of partially ionized helium plasma 12 p1882 A66-24223

Wake dimensions growth and turbulent energy decay in incompressible axisymmetric wakes surveyed, using hot-wire anemometer in low speed wind tunnel [ASME PAPER 65-FE-8] 12 p1799 A66-24556

Constant current hot-wire anemometer determination of experimental time-amplitude distribution function of velocity in turbulent boundary layer 13 p2072 A66-26753

Wire-to-surface heat transfer and error in hot-wire anemometer measurements 16 p2708 A66-31256

Three dimensional character of wake of circular cylinder at three Reynolds numbers utilizing hot wire anemometers 16 p2632 A66-31659

Linearizer for constant temperature hot-wire anemometer, detailing linearization circuit 19 p3357 A66-35806

Dynamic pressure and flow measurements on small integrated high speed systems,

using high speed pressure transducing equipment in integrated circuits and hot-wire anemometry 20 p3560 A66-37652

Hot-wire anemometer design with linear characteristics for measurement of velocity fluctuations of flow 20 p3560 A66-37760

Frequency distortions correction for pulsation amplifier of thermoanemometer 21 p3739 A66-39331

Experimental boundary layer study on hovering rotors using evaporative chemical films, pressure probes and hot wire anemometers 22 p3843 A66-40249

Hot-wire anemometer determination of electron and ion temperature, neutral particle temperature, concentration and velocity and potential of partially ionized helium plasma 22 p3919 A66-40585

Instantaneous shear stress at liquid flow boundary, measuring turbulence and velocity fluctuation in close proximity of pipe wall 24 p4194 A66-42415

Wake motion through moving blade row, demonstrating chopping phenomenon via hot-wire anemometer traces taken downstream of rotor 24 p4157 A66-42583

**HOT-WIRE MEASUREMENT**

Laminar to turbulent transition along aluminum plate in free convection measured, using hot-wire probes 04 p0596 A66-13515

Hot-wire measurements in plane turbulent jet of air 10 p1480 A66-21466

Wire recovery temperature in steady state wind tunnels determined without detailed knowledge of convective heat transfer rate to wire 12 p1860 A66-23612

Laminar free convection flow and velocity and temperature distributions in air above thin horizontal electrically heated wire 12 p1980 A66-24906

Hot wire-drawn beryllium recrystallization analyzed by hardness measurement and micrography, noting dependence on initial deformation 13 p2107 A66-25358

Hot-wire analysis of permanent sound fields during varied flow velocity around flat plate boundary layer, noting resonance effect of sound amplitude 13 p2063 A66-25901

Hot wire electron emissive probes for potential measurements in quiescent plasmas, noting plasma densities, emission levels, etc 13 p2154 A66-26554

Hot wire measurements in radial turbulent incompressible air jet 18 p3045 A66-33593

Heat conductivity coefficient of cesium vapor at temperatures from 1000 to 1600 degrees K and 1 to 5 torr measured by hot tungsten filament method 18 p3142 A66-34022

**HOT-WIRE TURBULENCE MEASURING APPARATUS**

Hot-wire turbulence spectral analyzer for measuring power spectrum of wind tunnel fluctuation flow 11 p1703 A66-22197

Atmospheric turbulence determined from velocity fluctuations in flight path direction measured by wing-tip mounted hot-wire anemometer 20 p3593 A66-37470

Microwave airflow simulator measurements of hot-film and hot-wire turbulence transisor 24 p4211 A66-42576

**HOTSHOT TUNNEL**

Six-component balance equipped with semiconductor strain gauges and inertia compensated for hotshot wind tunnels 24 p4206 A66-42167

Measuring devices and techniques for heat-transfer rate, pressure and force in hotshot tunnels 24 p4206 A66-42168

Displacement detector to provide direct measurement of shear forces in aerodynamics on small surface elements in hotshot wind tunnels 24 p4207 A66-42169

Electrostatic probe and VHF microwave reflectometry study of nitrogen flow around models in hotshot wind tunnels, determining plasma sheath physical characteristics 24 p4191 A66-42193

**HOVERCRAFT HD.1 GROUND EFFECT MACHINE**

Empirical estimation of hovercraft propeller noise level, correction curves for blade number and noise correlation 10 p1484 A66-21799

**HOVERING**

Hovering performance of plenum chamber type of ground effect machine over land and water, showing single nondimensional

parameter controlling phenomena of overwater operation 19 p3279 A66-36446

Hover augmentation system /HAS/ design for analog computer helicopter simulation and flight control 21 p3696 A66-38900

Attitude control system/engine control system for hover control of turbojet VTO aircraft 21 p3697 A66-38900

**HOVERING STABILITY**

Propulsion-control systems interface for V/STOL hover control in aircraft, using plus lift cruise propulsion concept [AIAA PAPER 65-799] 03 p0319 A66-12500

Altitude control for VTOL aircraft facilitates control of hovering flight, noting construction, operation principles and performance 10 p1484 A66-21370

Efficiency factors such as roll scanning methods and pitch control effectiveness in hover control system for VTOL aircraft 11 p1638 A66-23220

Helicopter handling qualities during hovering, noting pilot performance, position control tasks with and without gusts, effects of stability derivatives, etc 17 p2845 A66-32700

Handling in hovering mode of Dornier VTOL transport aircraft with and without autostabilizer, obtaining moments about roll, pitch and yaw axis 20 p3493 A66-36800

Experimental boundary layer study of hovering rotors using evaporative chemical films, pressure probes and hot wire anemometers 22 p3843 A66-40249

Propulsion control systems interface for V/STOL hover control in aircraft, using plus lift cruise propulsion concept [AIAA PAPER 65-799] 23 p4015 A66-40900

**HP-137 AIRCRAFT**

S HANDLEY PAGE HP-137 AIRCRAFT

**HS-125 AIRCRAFT**

S DE HAVILLAND DH-125 AIRCRAFT

**HSS-2 HELICOPTER**

S SH-3 HELICOPTER

**HUB**

Deformation and state of stress in contiguous cylindrical rotationally symmetrical hubs and shafts of various lengths 14 p2409 A66-28400

**HUECKEL TECHNIQUE**

Nitrogen analogs of sesquifulvalene, calculating dipole moments of nitro, anhydro bases and pyridones via modified Hueckel technique 11 p1651 A66-23400

Extended Hueckel method calculations of bonding in N, F oxidizers 23 p4030 A66-41200

Three-dimensional Hueckel molecular orbital calculations performed on series of molecules made from atoms of H, C, N, O, and Cl 23 p4031 A66-41200

**HUGONIOT EQUATION OF STATE SA PLASTICITY**

Shock compression of liquid argon at very high pressures and temperatures reflecting shock wave from tungsten wall for testing interatomic potential 11 p1694 A66-23200

Hugoniot equations of state derived from several unreacted explosives and propellants from optical measurements of shock wave and particle velocities 13 p2171 A66-25300

Two-dimensional radiation-coupled wedge flow analyzed, using integral relations method and Rankine-Hugoniot relations 18 p3100 A66-34500

**HUMAN BEHAVIOR**

Human pilot behavior compared with automatic pilots in terms of adaptability, response time and reliability 02 p0187 A66-11800

Effect of weightlessness on cardiovascular neuromuscular and autonomic nervous systems 06 p0810 A66-15500

Simulator design for inclusion of man/machine interactions and human behavioral and performance considerations in system design 08 p1203 A66-19800

Experimental psychological testing and results in choice and training of cosmonauts 15 p2434 A66-29400

Physiological and biochemical tests on man subjected to isolation and hypokinesia 15 p2434 A66-29400

Human behavioral effects during 56-day exposure to oxygen-helium atmosphere 258 mm Hg total pressure, present temperature, psychomotor and sleep performances 18 p3061 A66-33700

Human dreaming sleep and correlation

- changes in urine volume and osmolality 19 p3285 A66-36065
- Personality development, application of theory to problems of aerospace selection 19 p3294 A66-36378
- Book on human spatial orientation and effect on behavior 20 p3508 A66-37011
- Psychological effects of velocity and hermetic compartments on astronaut performance 24 p4166 A66-43146
- HUMAN BODY**
- Stress-strain relationships for tension, compression and shear of femoral bone loaded longitudinally and transversely [ASME PAPER 65-WA/HUF-7] 05 p0626 A66-15698
- Electrophoretic determination on acrylamide gel of lactic dehydrogenase isozyme patterns in serum obtained from human subjects exposed to brief intense thermal impulses 06 p0814 A66-16831
- Electromagnetic energy transport between coils or coils external to human body and coil implanted inside body is increased by using suitable ferrite core for receiving coil 06 p0820 A66-16852
- Bone calcium loss during two weeks of simulated weightlessness, using X-ray wedge technique 11 p1643 A66-22577
- Mathematical model of human body predicting inertial properties in any fixed body position, including location of mass center [AIAA PAPER 65-498] 12 p1810 A66-24719
- Electrocardiogram P wave changes relation to body position changes in space 14 p2227 A66-26810
- Human eye, capabilities as optical instrument, particularly spatial filtering effects, visual acuity, eye movement and light receptors 14 p2228 A66-27650
- Long-term lower body negative pressure in supine position effect on deterioration in cardiovascular function of man during prolonged bed rest 15 p2430 A66-28657
- Human response to predicted Apollo landing impacts in selected body orientations 15 p2430 A66-28663
- Human otolith and cupula system behavior under anomalous gravity conditions 15 p2434 A66-29446

- HUMAN PERFORMANCE**
- SA ASTRONAUT PERFORMANCE**
- SA OPERATOR PERFORMANCE**
- SA PILOT ERROR**
- Reliability estimation procedure combines task ratings with empirically based data in

derivation of regression equation 01 p0018 A66-10076

System engineering methodologies to show how prediction of human error leads to higher system performance

reliabilities 01 p0019 A66-10117

Similarity concept applied to study of work done by living creatures in various situations 01 p0017 A66-10302

Time sharing and vigilance study by Wiener reanalyzed from signal detection theory viewpoint 01 p0020 A66-10613

Decision interval effect on signal detectability in vigilance task involving clock 01 p0020 A66-10614

Effect of amphetamine on signal detectability in vigilance task 01 p0020 A66-10616

Human motor performance activities in simulated weightless environment 02 p0185 A66-11626

Physiological testing under simulated reduced gravity conditions with subject suspended and performing exercises on inclined treadmill 02 p0186 A66-11644

Low friction environment effects on maintenance operations in simulator noting torquing-force capability, hand-eye coordination, etc 02 p0186 A66-11645

Effects of physical location of visual stimuli on intentional response time /IRT/ 02 p0183 A66-12075

Light and noise level, stimulus intensity and background shade variation effect on reaction time 02 p0183 A66-12076

Upper thermal tolerance limits for unimpaired mental performance 03 p0325 A66-12359

Space environment simulation vacuum chamber design and operation in terms of manned testing 03 p0352 A66-12757

Human perceptual mechanism defined by psychological research and applied to aircraft cockpit display design 03 p0329 A66-12883

Mathematical model based on control and queueing theory for human controller for turn-round operations on airport apron 03 p0329 A66-12886

Monitoring human performance during manned orbital flight for assessment of central nervous system function, noting animal studies during simulated stresses of space flight 04 p0468 A66-14088

Threshold of feeling data by generating sensation of rotation and nystagmic reaction by rotating subject and abruptly halting rotation 06 p0811 A66-16066

Physiological and performance determinants in manned space systems - AAS and HFS Symposium, San Fernando Valley State College, Northridge, California, April 1965 06 p0816 A66-16234

Simulation study of human performance in manual control tasks in orbital rendezvous and lunar landing 06 p0818 A66-16245

Minimum field of view required for rapid accurate navigation star identification-acquisition established between 25 and 30 degrees 06 p0906 A66-16247

Spacecraft design influenced by man in capacity as designer and crew member 06 p0818 A66-16248

Simulated flights evaluating verbal communication intelligibility in oxygen breathing mixtures at low atmospheric pressures compared with results obtained in room air at ground level 06 p0813 A66-16827

Performance and physiological effects of adrenalin or insulin in human subjects 06 p0813 A66-16829

Human accommodative system, investigating absence of odd-error signal mechanism under restricted monocular viewing conditions 06 p0819 A66-16850

Airborne computer design free of navigational functions performed by humans, using Doppler equipment 07 p1067 A66-17692

Criteria for quality of aerial camera systems including allowances for ground scene properties, photographic grain and human observer, noting role of resolving power and transfer function 07 p1035 A66-18154

Effects of chronic hypohydration on responses to tests of bodily functions, defining set points and mechanisms involved in changes in work

performance 09 p1337 A66-20528

Perceiving undetectable rotation in semicircular canals by employing self-induced Coriolis stimulation, determining psychophysical functions for direction or rotation discrimination at different yaw velocities 09 p1337 A66-20531

Human efficiency measured in producing power by tramping, hand cranking and lateral pumping modes 11 p1648 A66-23082

Added pilot work load imposed by additional commands in compensatory display reduces tracking performance in control of simulated terrain-following aircraft 12 p1808 A66-23922

Experimental testing effectiveness of sensor lines showing linkages between displays and controls 12 p1808 A66-23924

Industrial alertness management in relation to production rate, quality control and operator safety 12 p1810 A66-24957

Acute hemodynamic effects of G-suit inflation, noting elevation of central venous pressure, cardiac output falling due to depressor reflexes and role of ganglionic blockade 12 p1811 A66-25014

Human subjects making comparisons of duration of two tones in forced choice situation for signal with same or different intensities 14 p2229 A66-27309

Critical Human Performance and Evaluation /CHPAE/ Program methods for evaluating and predicting human performance and potential error probabilities 14 p2231 A66-28422

Individual differences in performance of vigilance task 14 p2228 A66-28480

Reliability-maintenance relationship including accessibility, design, crew duty cycle, and equipment failure rates, number of restorations, etc, in long-duration manned missions 15 p2606 A66-28804

Application of escape probability concept to systems development for quality control, noting minimization of system failure 15 p2508 A66-28812

Weapon system design, noting variables for manning and skill requirements, parameters of operational readiness, etc 15 p2618 A66-28813

Physiological, psychological and biochemical effects on humans after 8-hr inhalation of low carbon monoxide concentration 15 p2435 A66-29448

Transmission and information processing rate of human visual system 15 p2435 A66-29450

Chest-to-back accelerations effect on human electroencephalograms and work capacity 15 p2437 A66-29475

Means of formulation by humans of sequence of actions, noting error distribution and clustering of responses 15 p2445 A66-29502

Work output characteristics and capabilities of undersea work crews during extended missions 16 p2642 A66-30507

German Air Force functional tests for early diagnosis of cardiovascular disease among aircrew, also discussing therapy 16 p2640 A66-31133

Visual monitoring of multichannel displays, noting number of channels used, operator performance characteristics, etc 16 p2644 A66-31269

Visual and tactile display for compensatory tracking, noting conditions for minimum error, mean square error, etc 16 p2644 A66-31271

Standard prolonged work test using treadmill for evaluation of fatigue and stress in man 17 p2863 A66-32150

Target recognition performance, examining relative effect of size and smear or blur of display 17 p2864 A66-32155

Abstract higher mental functioning of human operator during exposure to transverse acceleration stress 17 p2857 A66-32161

Stress in spacecraft crew members measured using parotid fluid, noting relationship between biochemical variables under stress and nonstress conditions 17 p2866 A66-32196

Fluctuations in human acoustic sensitivity after 24 hours in room under effect of Coriolis accelerations of various magnitudes 17 p2861 A66-32941

Exercise performance and cardiovascular response of man exposed for 56 days to oxygen-helium atmosphere 18 p3057 A66-3377

Low friction environment effects on maintenance operations in simulator noting torquing-force capability, hand-eye coordination, etc 18 p3061 A66-3382

Information feedback and psychophysical variables in two-alternative temporal forced choice auditory-signal-detection task 18 p3063 A66-3502

Limits of human performance and interaction of man and machine 19 p3292 A66-361

Total simulation system mass effects on certain human force outputs in tractionless environments 19 p3293 A66-3624

Mathematical evaluation of human visual performance, discussing functions in machine systems, application of TV for systems monitoring, etc 19 p3294 A66-3628

Experiments and model for adaptation of human controllers to sudden changes in plant dynamics in time-invariant situations 20 p3508 A66-3686

Noise effect on human performance 20 p3504 A66-3693

Air ionization effect on vigilance task performance, noting smaller decrement for environment containing negative ions 20 p3504 A66-3693

Human errors in flight safety and need for automation 20 p3508 A66-3693

Critical Human Performance and Evaluation /CHPAE/ Program 20 p3509 A66-3788

Human factor relation to system effectiveness and human performance relation to operational reliability and maintainability 20 p3509 A66-3788

Legibility analysis to investigate effects of scale factors, graduation marks, etc, on speed and accuracy of reading moving target instruments 21 p3701 A66-3942

Human performance analysis based on two criteria, zero and 100 percent legibility of moving targets consisting of black alphanumeric symbols, finding mean angular velocities 21 p3701 A66-3942

Competing visual tasks used in psychological stress testing of special mission personnel 21 p3701 A66-3942

Adaptation to prolonged exposures in revolving space station simulator 22 p3853 A66-3978

Telescope field of view requirements for human recognition of navigation stars 22 p3946 A66-4086

Target conspicuity for predicting level of search performance as function of spatial and temporal variables 22 p3859 A66-4086

Distortion, fill and noise effects on pattern discrimination 23 p4030 A66-4157

Maximum exercise tolerance in health aircrew members limited by cardiac output 24 p4163 A66-4245

### HUMAN REACTION

Human transfer function for pilot response for multiaxis and multiloop problems 02 p0185 A66-1163

Lower body negative pressure used to restore hydration after recumbency diuresis following bed rest 06 p0813 A66-1682

Effects of 9-alpha-fluorohydrocortisone on metabolic changes occurring during six days of bed rest, including water and sodium retention, hematocrit decrease, plasma increase, etc 06 p0813 A66-1682

Measurement of oculogravic illusion in subjects with or without labyrinthine defects, showing validity as specific response to stimulation of otolith organs 06 p0813 A66-1682

Effect of environmental stress on aircrew performance including failure, distraction, fear, discomfort, speed and load and combat conditions 10 p1494 A66-2213

Subgravity tower and axis results obtained on man and animals, discussing transition from acceleration to weightlessness and vice versa 11 p1641 A66-2248

Occipital evoked potential correlated with visual anomaly under stimulus of incoherent succession of randomly patterned optical images 12 p1806 A66-2438

Neuron network model of oculomotor system to understand human eye

- movement 13 p2008 A66-25336
- Psychological testing of military pilots, discussing apprehensiveness under adverse conditions such as bad weather or fatigue 14 p2229 A66-27493
- Environmental parameters affecting spacecrew comfort during weightlessness and optimization of comfort 14 p2231 A66-28412
- Human response to predicted Apollo landing impacts in selected body orientations 15 p2430 A66-28663
- Psychological and physiological reaction to Coriolis effect under artificial gravitational field simulated in rotating space station 15 p2443 A66-28682
- Nervous activity increase, EEG, EKG, gas exchange, respiration, urine, blood pressure, oxygen content and morphological state of humans after prolonged pressure chamber confinement 15 p2443 A66-29444
- Human reaction to simulated landing impact overload, including analysis of EKG, kinetocardiogram, blood pressure and respiration data 15 p2443 A66-29445
- Human physiological and hygienic problems when confined in closed system of circulating biological substances 15 p2443 A66-29457
- Prolonged hypokinesia effect on human resistance to transverse g-forces, detailing respiratory and circulatory systems, motor response and visual acuity 15 p2437 A66-29473
- Lowering of psychic tone, absentmindedness and vigilance decline during astronaut weightlessness on long space flights 15 p2442 A66-30003
- Anticipatory psychological stress determiners include perceived probability of occurrence, proximity and unpleasantness associated with occurrence of threatening event 16 p2640 A66-31130
- Human reaction to pure oxygen inhalation interrupting previous hypoxia 17 p2849 A66-31832
- Windshield scratches and effect on depth perception, visual acuity and fatigue 17 p2862 A66-31833
- Human reaction to sonic boom 17 p2868 A66-33027
- Sonic boom effect on people, noting ground overpressure measurement and data obtained from interviews, formal complaints, building damage, etc 17 p2868 A66-33028
- Sonic bang experience in United Kingdom from supersonic flights and explosive charges, noting intensity, waveform, damage, etc 17 p2868 A66-33029
- Laboratory physiological-psychological responses to impulsive acoustic stimuli and sonic booms from supersonic aircraft 17 p2868 A66-33030
- Change pattern in human cerebral blood flow during time immediately following initiation of carbon dioxide inhalation 18 p3056 A66-33691
- Environmental effects on man, Volume 1 - Symposium on environmental engineering and society, London, April 1966 18 p3062 A66-34201
- Laboratory measurement of psychological, pathological and physiological effects of LF vibration on man 18 p3062 A66-34202
- Consequences of heart-to-foot acceleration gradients on tolerance to positive acceleration determined on variable radius centrifuge 19 p3285 A66-36373
- Primary shift of phase of circadian periodicity effected by time displacement for physiological functions 19 p3285 A66-36374
- Manually imposed angular accelerations during weightlessness period of parabolic flight, obtaining electrooculographic recordings for analyzing nystagmic response 19 p3286 A66-36382
- Square root of time effect on human perception of stimulus pattern unvarying over time 20 p3505 A66-37108
- Induction and suppression of hypothalamic self-stimulation behavior by microinjection of endogenous substances at self-stimulation site 20 p3506 A66-37603
- Spectral analysis of human EEG generators in posterior cerebral regions 20 p3506 A66-37604
- Radiation dose measurements and predictions for space vehicle, noting human response 20 p3665 A66-38352
- Parotid fluid collection technic for determining in-flight biochemical responses for 17-OHCS levels 22 p3854 A66-39791
- Corticosteroid responses to limbic stimulation in man and localization of stimulus sites 22 p3855 A66-40487
- Fracture mechanism of traumatic lesion caused by seat-ejection or bail-out from F-104 G aircraft and worsened by ground impact 22 p3858 A66-40503
- Thresholds, b-wave latencies, stimulus intensity/b wave amplitude relationships and diffuse adaptation effects upon electroretinogram stimulation by light subtending 20 degree visual field 22 p3856 A66-40965
- EEG relation to average evoked potentials and human reaction time to visual stimuli for trials with and without feedback 23 p4029 A66-41550
- Thermal responses of man during rest and exercise in helium oxygen environment for various temperatures 24 p4163 A66-42317
- Reaction time to electrocutaneous stimulation confirmed as being faster to onset than to cessation of stimulation 24 p4163 A66-42318
- Laboratory measurement of psychological, pathological and physiological effects of LF vibration on man 24 p4167 A66-42575
- Physiological disturbances caused by action of prolonged accelerations on human organism, examining methods of increasing maximum g force tolerance levels 24 p4166 A66-43136
- Physiological and biomechanical reactions of humans exposed to action of g forces, examining effects of impact acceleration 24 p4166 A66-43137
- Sensory, motor and vegetative reactions of human organisms under conditions of weightlessness in orbiting spacecraft or aircraft 24 p4166 A66-43138
- HUMAN TOLERANCE**
- Personal thermal conditioning system emphasizing heat exchange between body and environment to provide comfort with water-cooled protective clothing 02 p0188 A66-12012
- Heat stress and minimal dehydration effect upon human tolerance to positive acceleration 03 p0326 A66-12353
- Human tolerance limits in water impact, identifying environmental and trauma characteristics 03 p0327 A66-12356
- Biological stresses of manned space flight in limiting flight duration, noting isolation effect 04 p0469 A66-13507
- Breathing mechanics during transverse acceleration, discussing experiments and measurements made on man 04 p0466 A66-14075
- Human stress reactions to three-day march, sleep deprivation, food and oxygen starvation, noting changes in central nervous system functions 04 p0467 A66-14080
- High noise levels effect on hearing damage of technical personnel of military airfield 04 p0472 A66-14386
- Human response to sinusoidal and random vibrations [ASME PAPER 65-WA/HUF-19] 05 p0625 A66-15693
- Psychophysiological effects of low friction on man, particularly rotation on visual reaction time, heart rate and spatial orientation 06 p0868 A66-16240
- Effects, singly and in combination, of heat, exercise and hypohydration upon voluntary dehydration in four acclimated physically-fit young men 06 p0812 A66-16533
- LF and infrasonic noise effects on mans cardiac rhythm, hearing, vision, motor control, spatial orientation, speech and subjective tolerance 07 p0999 A66-17656
- Hematological and metabolic effects of short intense thermal stress 09 p1334 A66-20523

Space diet effect on aerobic and anaerobic microflora of human feces 22 p3854 A66-39796

## HUMIDITY

## SA WATER VAPOR

Interpretation of inverse relationship between long-lasting radioactivity and relative humidity in near-ground layer of atmosphere 02 p0279 A66-11261  
Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 04 p0542 A66-14303  
Heat transfer and vaporization factors incorporated in diffusion equations for thermal and humidity fluxes over bodies of water 08 p1247 A66-19306  
Malkevich atmospheric transfer function calculation for Northern Hemisphere in order to correct satellite radiation measurements 09 p1435 A66-19887  
Variations in vertical temperature and humidity profiles used to determine underlying terrestrial surface temperature from outgoing radiation 09 p1398 A66-19888  
Low humidity and dehydration in jet fuselage, noting water metabolism and effect of various beverages 10 p1491 A66-21335  
Heat and humidity transfer effects and turbulent exchange influence on cloud formation 11 p1730 A66-22941  
Differential equations describing air movement, heat exchange and exchange of moisture 11 p1730 A66-22942  
Fields of outgoing radiation in 8-12 micron region, calculating surface temperature and effective water vapor content 11 p1698 A66-22943  
Time and height variations of temperature, wind speed and moisture content during dissipation of low level jet on May 14, 1962 before sunrise near Dallas 11 p1730 A66-23379  
Alpha radiation frost point hygrometer obtains stratosphere moisture profiles [AIAA PAPER 66-368] 12 p1872 A66-24496  
Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 14 p2327 A66-28217  
Low atmospheric temperature and humidity changes beneath subsidence inversion above Southern England 15 p2530 A66-28599  
Humidity attenuation in 8 to 13 micron IR window used in radiance measurement from orbiting satellite 15 p2531 A66-28848  
Vacuum spectrometer measurement of absorption band of atmospheric water vapor 15 p2542 A66-29346  
Radiation data measured by Tiros IV satellite for determination of global distribution of atmospheric water vapor 15 p2533 A66-30029  
Solar radiation absorption by atmospheric water vapor, deriving formulas that include scattering and absorption by aerosol as additional parameter 16 p2691 A66-30228  
Atmospheric moisture from balloon radiometer measurements of atmospheric profiles of long wave irradiance [AIAA PAPER 65-461] 16 p2706 A66-30910  
Numerical model of Earth atmosphere used to compute hydro-and thermodynamic evolution of global moist atmosphere, considering solar heating, evaporation, etc 16 p2697 A66-30943  
Radar image edges sharpness relationship to relative humidity near ground 17 p2948 A66-32270  
Spectral composition of direct solar radiation variation with height of Sun and relation between aerosol absorption band and humidity 17 p2994 A66-32857  
Heat transfer and vaporization factors incorporated in diffusion equations for thermal and humidity fluxes over bodies of water 19 p3393 A66-36042  
Vacuum spectrometer measurement of absorption band of atmospheric water vapor 20 p3602 A66-37351  
Heat and humidity transfer effects and turbulent exchange influence on cloud

formation 20 p3593 A66-37854  
Differential equations describing air movement, heat exchange and exchange of moisture 20 p3593 A66-37855  
Fields of outgoing radiation in 8-12 micron region, calculating surface temperature and effective water vapor content 20 p3553 A66-37856  
Temperature automatic control system in photographic laboratory compensating for humidity changes by using semiwet bulb controller 20 p3561 A66-38049  
Sound absorption in air at 1/3-octave frequency intervals as function of humidity and temperature at normal atmospheric pressure for studies in room acoustics 21 p3769 A66-38648  
Vertical motion of moisture fields and saturation deficit determination from nephelanalysis of Tiros cloud photographs for operational quantitative precipitation forecasting /QPF/ 22 p3943 A66-40054  
Short-range weather forecasting based on principles of fluid dynamics 23 p4087 A66-42017

## HUMIDITY MEASUREMENT

## SA HYGROMETER

Vertical temperature and humidity distributions of atmosphere determined from satellite measurements of carbon dioxide and water-vapor absorption bands 09 p1376 A66-20999  
Balloon-borne instrument for measuring downward flux of thermal radiation from atmospheric water vapor, using gold doped germanium detector 11 p1706 A66-22888  
Moisture contamination effects at altitude by package, balloon and associated train 15 p2492 A66-30032  
Morning humidity variation relation to dew content and visibility of atmosphere, noting role of water vapor 19 p3393 A66-35395  
Tiros IV atmospheric IR radiation measurements and application to weather analysis, using quasi-global synoptic maps of troposphere relative humidity 19 p3393 A66-35637  
Absorption and brightness temperature variations of atmosphere on basis of statistical characteristics of vertical temperature and humidity structures 23 p4087 A66-41802  
Temperature and humidity variations in weak convection over England, noting measurement techniques and results 24 p4235 A66-43076

## HUNGARY

Space research in Hungary in 1965 including satellite tracking, ionospheric sounding, solar activity, etc, noting international data transmission 15 p2600 A66-29907

## HUSTLER AIRCRAFT

## S B-58 AIRCRAFT

## HUYGEN PRINCIPLE

Huygens principle in geometrical optics to solve certain time problems in calculus of variations, particularly airplane minimum time [SAE PAPER 650784] 01 p0105 A66-10841  
Computer method calculation of minimum time track, using quasi-optical law of refraction 07 p1066 A66-17681  
Nonsteady radiation field of antenna systems for arbitrary signals via Huygen-Kirchhoff principle 11 p1670 A66-23225  
Misinterpretation of theories of light, noting no clear-cut and simple distinction or opposition between theories of Newton and Huygens 16 p2749 A66-31722  
Improved correlation function in Kirchhoff-Huygen method of solution of scattering of waves from statistically rough surfaces 18 p3068 A66-34015  
Huygen principle for elastic media, comparing Kupradze formulation with formulations of Knopoff and Bollet 24 p4237 A66-42495

## HU2K-1 HELICOPTER

## S UH-2 HELICOPTER

## HYBRID COMBUSTION

Unsteady boundary layer flow of multicomponent gas mixtures, investigating combustion instability in liquid and hybrid rocket motors [AIAA PAPER 65-41] 03 p0444 A66-12796  
Hypergolic ignition and restart in Plexiglas window hybrid rocket motor, including

oxidizer flow transient, flame propagation chamber pressurization rates, etc [AIAA PAPER 66-69] 07 p1111 A66-18441  
Hybrid rocket combustion regression rate and turbulent boundary layer mass transfer 14 p2412 A66-27441

## HYBRID COMPUTER

Hybrid computer simulation system for aeronautical and astronautical test work 02 p0215 A66-11841  
Analog, digital and hybrid computerized systems for investigating problems in aeronautics and astronautics 02 p0193 A66-11841  
Fast analog comparator for hybrid computation using wideband DC amplifier with regenerative feedback circuit providing digital output 03 p0337 A66-12515  
Heuristic approach to reinforcement learning control systems, describing operation and simulation on IBM 1710-GED hybrid computer 06 p0864 A66-16741  
Hybrid computer methodology and electronic data processing applied to quality evaluation of test operations 12 p1828 A66-23841  
Hybrid computer simulation of lunar excursion module and maneuvers with orbiting command service module 12 p1828 A66-23841  
Advances in biomedical computer applications - Conference, N.Y. Academy Sciences, June 1965 12 p1809 A66-24241  
Electrocardiogram interpretation by computer, using pattern recognition approach which permits differentiation between normal and abnormal rhythms 12 p1810 A66-24241  
Deterministic type waveform analysis techniques for noisy repetitive transfer functions, noting application to hybrid computer processing of exercise ECGs 12 p1810 A66-24241  
COBLOC programming system for a digital simulation of operation of large mode-controlled hybrid computers, noting inclusion of patchable logic simulation 13 p2028 A66-25841  
Flight simulation of SST transport using hybrid computer 13 p2028 A66-25841  
System measuring various respiratory parameters using hybrid computer for monitoring and instrumentation 16 p2643 A66-31141  
Hybrid analog/digital techniques for signal processing, noting performance advantage at relatively low cost and applications in linear transformation, function generation, correlation functions, etc 16 p2658 A66-31241  
High speed hybrid computer simulation of aerospace vehicle motion 18 p3094 A66-34041  
Control algorithms synthesis for analytic adaptive control systems with nonlinear plants investigated with hybrid computer 20 p3536 A66-36841  
Multichannel computer controlled Mobile Micrometeorological Observation System automatic data acquisition, processing and recording system for observational analysis of turbulence of atmospheric boundary layer 22 p3943 A66-40441  
Flight simulation laboratory layout and construction using hybrid computer system noting cost estimation 23 p4052 A66-41141  
Pontryagin maximum principle applied to solution of optimal control problems with hybrid computer, using digital parameter optimizer to solve two-point boundary value problem 23 p4042 A66-41641

## HYBRID PROPELLANT

Hybrid fuel regression rate, discussing oxidizer flow rate and burner pressure interdependence [AIAA PAPER 66-113] 06 p0941 A66-16441  
Data on combustion of pyrolyzing solids applicable to combustion chambers of hybrid propulsion devices, placing emphasis on coal 07 p1154 A66-18041  
Hybrid rocket engine performance noting stable fuel burning, burning rate, thrust modulation, ignition delay and use of tricomponent fuels 10 p1594 A66-21741  
Tagaform synthetic hypergolic fuel for hybrid rockets, discussing polymerization ignition delay, etc 11 p1760 A66-22241  
Plane shock wave compressions cylindrical and wedge-shaped specimens used to obtain shock Hugoniot of two

reacted, composite and double-base  
 unimized propellants 12 p1934 A66-23589  
 Swedish hypergolic propellant for rocket  
 motors consisting of fuming nitric acid as  
 oxidizer and condensation product of liquid  
 aromatic amines and aldehydes as solid  
 fuel 14 p2374 A66-27566  
 Regression rates of metalized hybrid fuel  
 systems applied to lithium hydride butyl  
 rubber-fluorine-oxygen system, oxidizer  
 flow, etc 15 p2569 A66-29289  
 Combustion of solid or hybrid propellants  
 with one or more solid phases, noting  
 properties, erosive and hybrid combustion,  
 etc 18 p3165 A66-35240  
 Laplace transform analysis of solid or  
 hybrid propellant ignition by exothermic  
 heterogeneous reactions in presence of  
 radiant energy flux 21 p3806 A66-38688  
 Regression rate for gas-solid hybrid motor  
 described by convective heat transfer  
 feedback mechanism through laminar  
 boundary layer  
 [ASME PREPRINT 34B] 22 p3970 A66-39876  
**HYBRID PROPULSION**  
 Hybrid propulsion application to advanced  
 missions covering fuel consumption,  
 combustion efficiency and throttling  
 performance  
 [AIAA PAPER 64-226] 03 p0415 A66-12748  
 Hybrid type two- or three-stage aerospace  
 vehicle design to place payload in orbit,  
 discussing recoverable stages, drives and air  
 breathing engines 16 p2635 A66-31682  
**HYBRID ROCKET**  
 Hybrid rocket motor HR 4, using fuming  
 nitric acid as oxidizer and mixture of  
 polyesters and acrylic plastics as other solid  
 propellant 12 p1935 A66-23867  
 Experimental analysis of regression rates  
 of hybrid rocket engines for both chemical  
 kinetics and gas dynamics  
 13 p2173 A66-26369  
 Internal ballistic considerations in hybrid  
 rocket design, noting throttling and regimes  
 of operation involving effects of surface- or  
 gas-phase reaction kinetics  
 [AIAA PAPER 66-628] 20 p3663 A66-38035  
 Hybrid rocket combustion mechanism,  
 burning rate, mass transfer coefficient,  
 throttling effects and grain design  
 [ASME PREPRINT 34C] 22 p3970 A66-39877  
 Combustion and performance  
 characteristics of lithium aluminum  
 hydride/hydrogen peroxide hybrid rocket  
 [ASME PREPRINT 34D] 22 p3969 A66-39878  
 HR-4 research engine development and  
 hybrid engine in terms of construction and  
 variable thrust, noting polymerized amino  
 acid compound fuel 23 p4121 A66-41170  
 Ablation velocity, rocket motor working  
 conditions and combustion instabilities for  
 hybrid rockets, using solid fuel and liquid  
 or gaseous oxidizer 24 p4261 A66-42695  
**HYDRATE**  
 OH production by sublimation and gas  
 hydrate occurrence in cometary  
 nuclei 17 p3009 A66-33373  
**HYDRATION**  
**WATER DEHYDRATION**  
 Lower body negative pressure used to  
 restore hydration after recumbency diuresis  
 following bed rest 06 p0813 A66-16823  
 Effects of 9-alpha-fluorohydrocortisone on  
 metabolic changes occurring during six days  
 of bed rest, including water and sodium  
 retention, hematocrit decrease, plasma  
 increase, etc 06 p0813 A66-16824  
**HYDRAULIC ACTUATOR**  
 Balanced power concept for weight savings  
 in aircraft actuation system consisting of  
 mechanically actuated flight control surface,  
 mechanical servo, flywheel and  
 motor 01 p0015 A66-10670  
 Pressure peaks in hydraulic actuator  
 inertia load aggravated in presence of valve  
 overlap, noting cavitation damage  
 [ASME PAPER 65-FE-4] 06 p0808 A66-16213  
 Self-oscillating hydraulic vibration  
 apparatus capable of generating high cyclic  
 actuating power for testing  
 purposes 07 p1147 A66-18389  
 Transient response of valve-controlled  
 actuator with inertial loading to step input  
 excitation, considering fluid  
 compressibility 11 p1640 A66-22622  
 Electrohydraulic digital actuator design and  
 conversion of discrete electric input signal

in binary code to linear  
 motion 14 p2227 A66-28366  
 Main parameters of two-stage hydraulic  
 amplifier-actuator system determined with  
 aid of pressure and flow-rate amplification  
 factors 23 p4017 A66-40970  
**HYDRAULIC ANALOGY**  
 Hydraulic analogy experiments at optimum  
 depths obtained analytically, noting surface  
 waves in liquid 02 p0217 A66-11555  
 Aerodynamic spacecraft deceleration  
 systems examined by hydraulic analogy,  
 noting Mach number effects on flow  
 disturbances 04 p0507 A66-13533  
 Hydraulic analogy to compressible gas flow,  
 discussing application to aerodynamic  
 motions, flow visualization, measuring  
 techniques and instrumentation  
 [ASME PAPER 66-FE-16] 17 p2915 A66-33269  
 Theoretical and physical limitations  
 restricting hydraulic analogy to compressible  
 gas flow  
 [ASME PAPER 66-FE-17] 17 p2915 A66-33270  
 Hydraulic analogy methods for simulation  
 of internal gas flows containing combination  
 zone 22 p3901 A66-40500  
**HYDRAULIC CONTROL**  
**SA ELECTROHYDRAULIC CONTROL**  
 Feasibility of pure-fluid missile control  
 system demonstrated by systems analyses,  
 preflight tests and flight  
 tests 01 p0140 A66-10020  
 Research and development progress toward  
 synthesis of pure fluid flight control  
 system 01 p0140 A66-10021  
 Two-axis fluid control system for artillery  
 type missile performs best with spinning  
 attitude system when wind and thrust  
 misalignment disturbances are  
 considered 01 p0140 A66-10022  
 Hydraulic gear motor and gear backlash  
 effects on stability of hydraulic control  
 system 01 p0014 A66-10282  
 Operating characteristics of torque motors  
 and application to actuating pneumatic and  
 hydraulic control  
 mechanisms 03 p0323 A66-12906  
 Four-way fluid state vortex hydraulic  
 servovalve discussing design principles,  
 performance and  
 application 04 p0460 A66-13785  
 Leakage detection system for monitoring  
 component test stand hydraulic  
 circuit 06 p0869 A66-16792  
 Altitude control for VTOL aircraft  
 facilitates control of hovering flight, noting  
 construction, operation principles and  
 performance 10 p1484 A66-21379  
 Hydraulic servocontrol system performance  
 improvement by eliminating turbulent flow  
 and regulating servomotor pressure  
 drop 13 p1997 A66-25130  
 Dynamic law for pressure variation in  
 throttle chamber of hydraulic control  
 booster, taking into account fluid  
 compressibility and change in discharge  
 coefficient 16 p2637 A66-31219  
 Large tracking antenna opposed torque  
 pump motor analysis 18 p3055 A66-34294  
 Electric or hydraulic drives for steerable  
 satellite trackers and heightfinder  
 radars 18 p3055 A66-34317  
 Variable fluid-transformer control of fluid  
 flow in increasing efficiency of hydraulic  
 control systems 19 p3281 A66-36671  
 Fluidics problems involved in design and  
 manufacturing individual elements and  
 power consumption  
 reduction 21 p3697 A66-38967  
 Control valve seat leakage as function of  
 fluid viscosity, density, pressure drop and  
 cube function of gap between two  
 surfaces 23 p4017 A66-41145  
**HYDRAULIC EQUIPMENT**  
 Closed loop hydraulic servo system  
 simulating flight stresses on motor case of  
 solid propellant rocket motor in static firing  
 test stand for calibrating  
 stand 03 p0353 A66-13218  
 XB-70 fluid power ground support system,  
 describing functions of hydraulic ground  
 power unit, fluid servicing trailer and  
 filtration cart 06 p0869 A66-16791  
 XB-70 landing gear inspection, describing  
 hydraulic jack used 06 p0869 A66-16793  
 Cavitation in fluid machinery - ASME  
 Symposium, Chicago, November  
 1965 07 p1024 A66-18166

Miniature hydraulic power  
 units 08 p1174 A66-19808  
 Hydraulic and pneumatic power equipment  
 for ground support of space vehicles and  
 support in space environment  
 [AIAA PAPER 65-524] 12 p1804 A66-24717  
 Extremal values of stress resulting from  
 fluctuating pressure in hydraulic  
 cylinder 13 p2196 A66-25757  
 Closed loop hydraulic high-speed universal  
 testing machine and simulation of high  
 strain rate conditions 13 p2197 A66-26108  
 Pressure in sealing groove and increase  
 time due to pumping action of moving wall  
 applied to force cylinder of translational  
 motion, considering liquid in groove  
 laminar 14 p2225 A66-27688  
 Oscillation amplitude of rotor with  
 hydraulic dampers on elastic  
 supports 14 p2374 A66-27689  
 Basic properties of pure fluid devices  
 including operating pressure, operating  
 power and response time 20 p3500 A66-37644  
 Flow velocity effect on thermometer  
 reading and consequences for measuring  
 thermodynamic efficiency of hydraulic  
 machines 21 p3737 A66-38935  
**HYDRAULIC FLUID**  
**SA OIL**  
 Fluids and elastomers for low temperature  
 heat transfer and hydraulic systems  
 [ASLE PREPRINT 65-LC-7] 02 p0249 A66-12256  
 Comparison of rheological properties and  
 fire resistance of hydraulic fluids for  
 aerospace vehicles  
 [ASLE PREPRINT 65-LC-6] 02 p0249 A66-12257  
 High temperature fluids, designated PR-  
 143, suitable for hydraulic systems in range  
 -50 to 700 degrees F  
 [ASLE PREPRINT 65-LC-3] 02 p0238 A66-12258  
 Canned motor pump for nitrogen tetroxide  
 or hazardous liquids, noting ball bearings,  
 chemical materials, balancing drum and  
 helium leak tested motor parts  
 [ASME PAPER 65-WA/FE-3] 05 p0691 A66-15715  
 Fire resistant hydraulic fluids for  
 commercial and military application  
 including siloxanes, silicones, esters and  
 superrefined mineral oil  
 [ASME PAPER 64-WA/LUB-14] 10 p1547 A66-21171  
 High temperature fluids, designated PR-  
 143, suitable for hydraulic systems in range  
 minus 50 to 700 degrees F  
 [ASLE PREPRINT 65-LC-3] 12 p1889 A66-24988  
 Comparison of rheological properties and  
 fire resistance of hydraulic fluids for  
 aerospace vehicles  
 [ASLE PREPRINT 65-LC-6] 12 p1901 A66-24991  
 Fluids and elastomers for low temperature  
 heat transfer and hydraulic systems  
 [ASLE PREPRINT 65-LC-7] 12 p1901 A66-24992  
 Contamination control methods used in  
 Royal Swedish Air Force, presenting special  
 particle counting and patch test methods in  
 hydraulic oils 17 p2870 A66-32204  
 Method and equipment effects on shear  
 stability measurements of hydraulic oils,  
 using mechanical and sonic  
 methods 17 p2943 A66-32830  
 Contamination, viscosity, shear stability,  
 breakdown and foaming of MIL-H-5606  
 hydraulic fluid and swelling effect on  
 synthetic rubber 18 p3125 A66-34652  
 Criteria for hydraulic fluids for supersonic  
 aircraft noting fluid toxicity, fire hazards,  
 compatibility with elastomeric materials,  
 etc 24 p4229 A66-42380  
 Synthetic fire-resistant hydraulic fluids  
 based on phosphate esters must be provided  
 with continuous removal of dissociation  
 products for constant regeneration and  
 protection of unaltered fluid from  
 accelerated  
 decomposition 24 p4229 A66-42509  
**HYDRAULIC PUMP**  
 Measurement of friction of materials  
 sliding in JP-4 fluid to predict performance  
 of hydraulic pump 06 p0884 A66-16136  
 Hydraulic performance and sensitivity of  
 various configurations of centrifugal pumps

- to tip clearance effects  
[ASME PAPER 64-WA/FE-17] 06 p0884 A66-16211
- SST aircraft fluid power systems and performance, discussing power requirements, materials, maintenance, configuration, surface temperature distribution, etc [ASME PAPER 66-MD-35] 21 p3697 A66-38487
- Backstreamed fluid analysis via gas chromatography, using polyphenyl ether as diffusion pump fluid 24 p4239 A66-43164
- HYDRAULIC SHOCK**  
Shallow water theory of formation and decay of hydraulic shock waves in nonsteady homentropic gas flow 23 p4055 A66-41541
- HYDRAULIC SYSTEM**  
**SA AIRCRAFT HYDRAULIC SYSTEM**  
High dosage nuclear radiation tests of hydraulic systems and components for space vehicle use 01 p0014 A66-10113  
Proportional pneumatic actuation system reliability using variable hydraulic damping, noting role of error and error rate signal 03 p0324 A66-13219  
Resonant characteristics of hydraulic systems, particularly water or oil-supply lines, using impedance approach [ASME PAPER 65-FE-6] 06 p0885 A66-16214  
XB-70 hydraulic system, describing characteristics, operation-mechanism of fluid power system, power generation, utilization and distribution 06 p0809 A66-16790  
Hytrol electronic/hydraulic antiskid braking system for automatic braking pressure modulation in BAC one-eleven 400 series aircraft 07 p0992 A66-18165  
Auxiliary turbine power generator using gas from solid propellant 09 p1333 A66-20331  
Flow properties of fluid through slots of micron dimension 09 p1384 A66-20752  
Pressure surges, surge accumulators and relief valves studied on Titan I launch vehicle simulator 13 p2056 A66-25131  
Hydraulic system supporting Apollo/Saturn V space vehicle tested to determine bending and flexuring in flight 14 p2226 A66-28031  
Nitrogen powered hydraulic attitude control system of Little Joe II solid propellant launch vehicle for flight testing escape mechanism used on Apollo 20 p3499 A66-37314  
Hydraulic support system for free-flight simulation with Saturn V-Apollo vehicle, discussing stability requirements, upper bounds of system design, conversion from nonlinear to linear model, etc 21 p3722 A66-38876  
NaK-77 suitability for 1000-F liquid-metal hydraulic flight control systems 22 p3852 A66-40498  
Three-term governor for gas turbine engine system, examining effect of internally generated pressure noise on performance of different possible hydraulic systems 22 p3972 A66-40513  
Selection of size of hydraulic servometer with rotary hydraulic motor controlled by electrohydraulic spool valve to reduce open-loop gain for given closed-loop stiffness 22 p3852 A66-40515  
Hydraulic loss decrease in complex pipeline owing to wire grating 23 p4024 A66-41798
- HYDRAULIC VALVE**  
Control mechanisms in nonlinear steady flow forces of hydraulic valves [ASME PAPER 65-WA/AUT-20] 05 p0624 A66-15616  
Series analysis of closed-loop system containing loaded hydraulic valve, with equations of motion and response of system to ramp input and Coulomb load 06 p0810 A66-16915  
Multiple quick-disconnect valve used in auxiliary power unit /APU/ of aircraft and serving several systems at once while preventing fluid leakage from one system to another 14 p2226 A66-28032
- HYDRAULICS**  
**SA FLUID MECHANICS**  
Hydraulic jump as plane turbulent wall jet under adverse pressure gradient and finite depth of flow 01 p0056 A66-10314  
Mechanical strength of plastic buckling of sheet metals under lateral hydraulic loads 15 p2510 A66-29778  
Fluid power, Reference
- issue 23 p4018 A66-41715
- HYDRAZINE**  
**SA DIMETHYL HYDRAZINE**  
**SA TETRAFLUOROHYDRAZINE**  
Machine computation of thermodynamic properties of hydrazine from 32 degrees F to 1.02 times critical density 03 p0414 A66-12760  
Electron paramagnetic resonance in biradicals of hydrazine series, discussing structural changes during transition from mono- to biradical state 04 p0572 A66-13877  
Toxicological effect of hydrazine and monomethylhydrazine in blood serum of rats 05 p0626 A66-14642  
Immiscibility and rapid interface reaction rate as cause of disruption in nitrogen tetroxide-hydrazine impinging jets [CI PAPER WSCI-65-20] 05 p0743 A66-15145  
Droplet combustion fronts in hydrazine-nitrogen tetroxide system determined from kinetics of vapor decomposition, noting two-flame front model 05 p0743 A66-15146  
Discrepancy between measured value of N-H bond dissociation energy in hydrazine and value suggested by other chemical evidence 07 p1000 A66-17463  
Electrolyte-soluble fuels such as methanol, ammonia and hydrazine, noting electrochemical oxidation properties, power output, stored energy content, etc 07 p0996 A66-18472  
Application perspectives for dissolved fuel cells, particularly methanol and hydrazine cells 11 p1639 A66-22242  
Hydrazine hydrate interaction with halogenides of tetravalent germanium in aqueous organic solvents 14 p2231 A66-27137  
Combustion of hydrazine droplets burning in hydrazine vapor investigated via suspended droplet technique [AIAA PAPER 65-355] 14 p2370 A66-27413  
Liquid hydrazine decomposition process to determine what chemical or physical changes may be occurring that cause breaks in burning rate/ pressure curves, measuring flame temperature and light emission 15 p2570 A66-29610  
Increase of arterial lactate and pyruvate in blood glucose of fasted anesthetized dog after hydrazine injection 17 p2856 A66-32157  
Calorimetric study of effects of hydrazine on heat balance, source of metabolic energy and rate of protein catabolism of rats 17 p2856 A66-32158  
Toxic effects of hydrazine derivatives tested in dogs, producing methemoglobin and pigmentation in blood 17 p2856 A66-32159  
Effect of 0.6 LD/50 intraperitoneal dose of hydrazine on coagulation mechanism in rats, comparing results with saline injected controls 17 p2857 A66-32167  
Hydrazine/nitrogen tetroxide propellant system, examining reaction mechanisms at rocket chamber conditions [AIAA PAPER 66-662] 18 p3160 A66-34223  
Vibrational spectrum of liquid, solid and gaseous tetradeuterated hydrazine and Raman study of hydrogen bonding in hydrazine 19 p3295 A66-36801  
Reaction rates of decomposition burning of small spheres of liquid hydrazine 20 p3626 A66-38043  
Molecular elimination of nitrogen from hydrazine from single molecule and not radical-radical combination 21 p3806 A66-38531  
PAH transport mechanism in dogs with hydrazine-depressed para-aminohippurate treated with acetate, 6,8-epidithioctanate and 6,8-epidithioctanoamide 22 p3854 A66-39795  
Ultimate energy achievable in propellants, evaluating oxidizing group as propellant with model fuel, hydrazine 23 p4116 A66-41219
- HYDRAZINE PERCHLORATE**  
T-burner tests for combustion stability evaluation of hydrazine diperchlorate [AIAA PAPER 66-599] 18 p3264 A66-34430  
Deflagration of hydrazine perchlorate in pure state and with fuel and catalyst additives 23 p4117 A66-41225  
Manometric measurement of pressure rise as measure of formation rate of volatile products of thermal decomposition of hydrazinium monoperchlorate and
- hydrazinium diperchlorate 23 p4117 A66-41225
- HYDRIDE**  
**SA ALUMINUM HYDRIDE**  
**SA ANHYDRIDE**  
**SA BORON HYDRIDE**  
**SA LITHIUM HYDRIDE**  
**SA NITROGEN HYDRIDE**  
**SA ZIRCONIUM HYDRIDE**  
Schlesinger reaction and chemical composition of mixed hydride reagents 11 p1649 A66-22242  
Comparative calculation used in computation of physicochemical properties of hydrides, including densities of beryllium hydride, entropy of cesium hydride, crystal lattice energy of rubidium deuteride, etc 13 p2018 A66-26262  
Temperature and structure effect on hydride precipitation kinetics in titanium using resistometric technique, noting nucleation problem 16 p2724 A66-31316
- HYDROCARBON**  
**SA CYCLIC HYDROCARBON**  
Ball bearing lubrication with vapor from volatile organic compounds for wide temperature range and long term operation [ASLE PREPRINT 65-LC-24] 02 p0237 A66-12237  
Physical properties of new class lubricants, methyl alkyl silicones, illustrating exceptional lubricating ability [ASLE PREPRINT 65-LC-4] 02 p0238 A66-12238  
Potential parameters used to calculate thermophysical characteristics of solid hydrocarbons at high temperatures 03 p0330 A66-12230  
Hydrocarbons synthesized abiotically, those found in terrestrial samples, using chromatography and mass spectrometry connection with terrestrial life 12 p1806 A66-24246  
Physical properties of new class lubricants, methyl alkyl silicones, illustrating exceptional lubricating ability [ASLE PREPRINT 65-LC-4] 12 p1889 A66-24249  
Thermal decomposition of tert-butyl hydroperoxide with oxygen and acetone addition studied by isotopic tracer 13 p2017 A66-26267  
Proton transfer between hydrogen methane, ethane, propane and butanes, using high-pressure mass spectrometry, employing ion source with beta rays as ionization medium 13 p2018 A66-26268  
Photoionization of leucocarbinoles, leucocyanides of malachite green, crystal violet and sunset orange dissolved straight chain alcohols and chlorinated hydrocarbons 14 p2232 A66-27138  
Thermal degradation of mesoporphy, obtaining various alkylpyrroles and hydrocarbons, noting role of controlled pyrolysis as adjunct to mass spectrometry 15 p2446 A66-28046  
Five halogenated hydrocarbons and effect on flame speed of methane 17 p3032 A66-31312  
Electron transfer from alkali metals aromatic hydrocarbons, examining rate of chain scission in case of poly(4-vinyl biphenyl) and poly(alpha-methyl naphthalene) 17 p2870 A66-32160  
Direct and indirect oxidation fuel systems operating on hydrocarbon-mixtures and using aqueous, molten solid electrolytes, noting technological economic problems 18 p3053 A66-33333  
Paraffinic hydrocarbons composition Orgeuil, Murray, Mokola and other meteorites identified by gas chromatography 19 p3459 A66-35359  
Potential parameters used to calculate thermophysical characteristics of solid hydrocarbons at high temperatures 19 p3295 A66-36801  
Morse potential function determined from viscosity and second virial coefficient, used to approximate pair interaction potential hydrocarbons 20 p3605 A66-37055  
Distance/time records, drag coefficient and Reynolds numbers of single free falling drops of pentane, heptane, benzene burning in cold atmosphere 20 p3626 A66-38043  
Pyrolytic graphite production by thermal decomposition of hydrocarbon gas on heated

surface, noting annealing, alloying and residual stresses  
[ASME PAPER 66-MD-54] 21 p3753 A66-38493

Rate constants for atomic and molecular hydrogen ion transfer from tri- and tetra-atomic carbon paraffins to propylene and cyclopropane molecular ions 22 p3861 A66-40905

Aromatic hydrocarbon synthesis by passing ethane through silica gel at high temperature 23 p4032 A66-41306

Compressibility factor chart for hydrocarbon-hydrogen and nitrogen-hydrogen gas mixtures, correlating pressure and temperature, using state equation 23 p4150 A66-41866

Column chromatography used to determine hydrocarbons present in Moonie crude oil from Queensland, Australia, that is two hundred million years old 24 p4170 A66-43024

**HYDROCARBON COMBUSTION**

Rarefied hydrogen flame interaction between hydrogen atoms and molecules of certain organic, aliphatic and cyclic compounds 01 p0101 A66-10414

Behavior of excess radical concentrations, H, OH and O as function of height above reaction zone in premixed acetylene-air flames 03 p0414 A66-12488

Chemical kinetics of nonequilibrium combustion of propane-air and ethane-air mixtures in one-dimensional flow, including ignition delay and reaction time [ASME PAPER WSCI-65-19] 05 p0788 A66-15143

Equilibrium combustion products of generalized hydrocarbons with oxygenated air, with charts on enthalpy, entropy, molecular weight, specific heat ratio, etc [ASME PAPER 65-WA/ENER-2] 05 p0789 A66-15627

Ignition of hydrogen-oxygen-argon mixtures containing small amounts of hydrocarbons and bromine substituted hydrocarbons in shock tubes 06 p0822 A66-16634

Catalytic dehydrogenation of hydrocarbons over chromia-alumina catalyst in absence of added hydrogen to determine heat sink capability 11 p1650 A66-23119

Calorimeter bomb combustion of hydrocarbons and fluoro-substituted hydrocarbons with nitrogen trifluoride and nitrogen trifluoride-oxygen mixtures and mass spectrometric analysis 15 p2570 A66-29609

Cometary and hydrocarbon flame spectra compared, discussing Swan, HCO and other band systems 17 p3013 A66-33404

Heat transfer caused by combustion of triethylaluminum on flat plate in Mach 3 flow, noting significance of lag at stagnation pressure 18 p3260 A66-33817

Plasma behavior in laminar and turbulent hydrocarbon-air flames, discussing flame ionization, electron concentration and recombination, detonation wave ionization data, ignition, etc 18 p3143 A66-34027

Overall structure of combustion process in jet flow of hydrocarbon-air mixtures stressing conditions for ramjet engines, noting flame propagation angles, flow computation, etc [AIAA PAPER 66-573] 18 p3264 A66-34444

Chemical-ionization in reaction zones of hydrocarbon-oxygen or hydrocarbon air flames, noting association with abnormal excitation of hydroxyl radical 20 p3626 A66-38046

**HYDROCARBON FUEL**

Lead oxides formed from tetraethyl lead (TEL) in combustion zone identified in analysis of antiknock properties 03 p0413 A66-12486

Flammability hazards of aircraft hydrocarbon fuels as function of temperature and pressure based on equilibrium conditions [AIAA PAPER 65-801] 03 p0414 A66-12565

Hypergolic ignition of light hydrocarbon fuels with fluorine-oxygen (flox) mixtures [ASME PAPER WSCI-65-23] 05 p0743 A66-15147

Introduction to fuel cells 07 p0995 A66-18467

Fuel cells oxidizing saturated and unsaturated hydrocarbons at high temperatures 07 p0996 A66-18475

Prediction of failure behavior in composite hydrocarbon fuel binder propellants

[AIAA PAPER 65-156] 10 p1590 A66-21946

Thermal stability of endothermic hydrocarbon heat-sink fuels, noting application flying in 10 Mach speed range 11 p1759 A66-23124

Shock tube ignition delay study of aircraft engine cooling by hydrocarbon fuels in endothermic heat sinks [AIAA PAPER 65-594] 12 p1934 A66-23588

Engineering problems in design of fuel cell systems including complicated duty cycles, response time, high power density and efficiency [AIAA PAPER 64-743] 13 p2007 A66-26645

Increasing solubility of hydrocarbons in cesium-salt fuel cell electrolyte by replacing some of carbonate anion by fluoride 14 p2226 A66-27898

Flox-light hydrocarbon combinations desirable as liquid rocket propellants due to high specific impulse, hypergolicity and cooling properties [AIAA PAPER 66-581] 18 p3159 A66-33809

**HYDROCHLORIC ACID**

Biological content of 17 known specimens of type I and type II meteorites, noting indigenous objects are mineralized with limonite and contain residues insoluble in hydrochloric and hydrofluoric acid 24 p4275 A66-42655

**HYDRODYNAMIC EQUATION**

Nonuniqueness and low stability of solutions to hydromechanical problems demonstrated by steady motion of viscous fluid 01 p0055 A66-10168

Nonlinear equations of atmospheric hydrodynamics solved, using numerical algorithm 01 p0096 A66-10751

Hydrodynamic equations for one-dimensional, adiabatic, frictionless, ideal-gas flow and general matrix form equations for coupled chemical reaction kinetics of C-H-O/N systems 02 p0303 A66-11533

Derivation of asymptotic form of Green function, using hydrodynamic approximation method 04 p0510 A66-13875

Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 04 p0510 A66-13879

Spectral dynamics of laminar convection, discussing transformation of Benard convection problem into spectral domain 04 p0599 A66-14472

Short-term weather forecasting equation solved exactly 06 p0904 A66-16233

Interaction between circular waves and density fluctuation in cold electron plasma filling waveguide leads to formation of overtones of HF and LF 06 p0918 A66-16869

Derivability of cosmological equations from first law of thermodynamics and hydrodynamics equations, without using general relativity 07 p1132 A66-17207

Short-range forecasting of baric and kinematic atmospheric fields from complete system of thermohydrodynamic equations 07 p1062 A66-17918

Wave reflection and refraction across density discontinuity in two-fluid fully ionized plasma studied by coupled linearized hydrodynamic equations and Maxwell equations 07 p1088 A66-17948

Simple waves in one-dimensional nonsteady nonmagnetic relaxation hydrodynamic flows of chemically reacting compressible gases 07 p1020 A66-17965

Dissipative effects in converging cylindrical symmetric shock wave, considering ion and electron heat conductivity, ion viscosity and energy exchange 07 p1025 A66-18180

Uniform motion of vortex system in inviscid fluid, examining effect of compressibility on motion of vortex singularities 08 p1204 A66-18528

Integral form of fluid dynamic conservation equations relative to arbitrarily moving volume 08 p1205 A66-18677

Approximation method of calculating axisymmetric oscillations of shells of revolution filled with liquid 08 p1308 A66-18891

Neutral disparate mass mixtures, replacing Boltzmann collision integrals by relaxation-type kinetic models with model equation terms ordered according to mass ratio, deriving two-fluid transport

equations 10 p1523 A66-21802

Hydrodynamic problem of nonviscous liquid flow past two spheres solved, using new method of solution 10 p1525 A66-21919

Hydrodynamic equations describing strongly rarefied collisionless plasma 10 p1572 A66-22035

Radiation effect on hydrodynamic shock wave parameter distribution for bodies entering dense atmospheric layers at supersonic velocities 11 p1635 A66-23051

Mechanical flow processes and variational methods based on fluctuation theory, noting relations on minimum entropy production, two-dimensional laminar flow of incompressible fluid, etc 12 p1975 A66-23543

Short-range forecasting of baric and kinematic atmospheric fields from complete system of thermohydrodynamic equations 12 p1905 A66-23879

Statistical derivation of linear viscoelastic equations, relating stresses to minor deformation 12 p1969 A66-24355

Exact solutions for triple wave type hydrodynamic equations for confined isothermal gas flow and polytropic gas efflux into vacuum 12 p1863 A66-24360

Velocity field excitation due to thin wing motion in vicinity of finite length pressure wave with variable gas parameters 12 p1797 A66-24431

Liquid film flow stability, considering two-dimensional perturbations, hydrodynamic friction with allowance for finite curvature radius of bounding surface 12 p1864 A66-24435

Factors connected with atmospheric dynamic processes, applying hydrodynamic equations to wind field and pressure field variations 12 p1909 A66-24786

Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 12 p1865 A66-24867

Rarefied gas flow problems solved by hydrodynamic equations and representations of stress tensor and heat flux reproducing Navier-Stokes continuum limit and free molecule limit, noting velocity distribution interpolation 13 p2061 A66-25163

Zhukovskii and Lagally theorems for arbitrary fluid motion derivable from momentum equations of continuous medium 13 p2067 A66-26533

Equations from hydrodynamic equations, determining steady state fields and currents in plasma caused by microwave field, using quasi-linear approximation 14 p2341 A66-27153

Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 14 p2275 A66-27569

Derivation of asymptotic form of Green function, using hydrodynamic approximation method 14 p2275 A66-27578

Nonlinear equations of atmospheric hydrodynamics solved, using numerical algorithm 14 p2285 A66-27850

MHD approximation of solar plasma fluxes observed by Mariner II as free rotating jets 15 p2574 A66-29077

Characteristic for partially invariant solutions of hydrodynamic equations, specifically adiabatic plane-parallel gas motion 15 p2478 A66-29177

Shock wave strengthening of metals studied by hydrodynamic conservation equations, noting microstructure changes 16 p2723 A66-30318

Statistical analysis of solar atmospheric motion, noting three dimensional geometry of subjacent turbulent convection 16 p2803 A66-31257

Laminar steady motion transition to turbulent flow in systems described by hydrodynamic equations, including small amplitude steady periodic motion analysis 16 p2689 A66-31512

Book on jet theory in ideal fluids, covering compressible flow, steady jet flow, infinite flow past polygonal obstacle, unsteady flow, etc 16 p2632 A66-31746

Stability of weakly ionized plasma in strong electric field against formation of longitudinal waves, examining hydrodynamic equations 17 p2970 A66-32715

Stationary boundary value problem of Navier-Stokes equation for incompressible viscous fluids 17 p2911 A66-32817

Hydrodynamic and thermodynamic equations for biennial variations of zonal atmospheric circulation in equatorial area 19 p3346 A66-35640

Apparent additive mass coefficient for three-dimensional hydrodynamic impact problem of floating sphere in incompressible fluid 20 p3548 A66-38117

Internal atmospheric gravity waves in isothermal medium, solving hydrodynamic equations, determining wave propagation in realistic atmosphere for range of wave parameters, wind amplitude, reflected energy, etc 20 p3554 A66-38202

False reflection of computational mode waves at boundary due to use of finite differences 21 p3759 A66-39207

Hydrodynamic equations derived for classical multicomponent ideal fluid, using expansions in small parameter  $\mu$  21 p3728 A66-39297

Hydrodynamic equations for liquid with intrinsic rotation applicable to suspensions and liquid/vapor systems 21 p3728 A66-39312

Stress velocities and numbers and use in hydrodynamic distorted and undistorted models 22 p3897 A66-39674

Shock wave propagation in plasma across magnetic field, solving problem via two-component hydrodynamic equation 22 p3953 A66-39765

Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 22 p3899 A66-40328

Planar and rotary sloshing motion of liquid, using analytic mechanical model that consists of mass point constraint to parabolic surface 22 p3993 A66-40361

Nonsymmetric oscillations in plasma in magnetic field arising from electron beam passage through plasma, deriving dispersion equation 22 p3958 A66-40939

Kinetic equations in hydrodynamic approximation for weakly reacting and excited Bose systems, finding asymptotic expressions for Green function 23 p4055 A66-41412

Higher order corrections to Chew-Goldberger-Low theory, with attention to Vlasov equation 23 p4103 A66-41487

Four-plasmon hydrodynamic equations describing weak turbulence spectrum in universal equilibrium region of plasma without magnetic field 24 p4243 A66-42532

Equations from hydrodynamic equations, determining steady state fields and currents in plasma caused by microwave field, using quasi-linear approximation 24 p4244 A66-42973

**HYDRODYNAMIC STABILITY**

Stability of rod clamped at one end and situated in parallel fluid flow, considering head resistance and lateral forces 01 p0007 A66-10736

Disruption of thin liquid film flowing over heating surface, investigating boiling, evaporation and thermocapillary effects 01 p0165 A66-10906

Physical mechanisms of instabilities altering two-phase flow pattern of liquid film 01 p0165 A66-10907

Forced convection vaporization of Freon 113 flowing in horizontal Pyrex tube examined, using motion pictures 01 p0165 A66-10910

Ordinary differential equations theory yielding hydrodynamics conditions of stability with respect to finite perturbations for plane stationary curvilinear flow of ideal fluid 02 p0219 A66-12104

Stability analysis of adiabatic flow of incompressible fluid without equation linearization and by constructing functional from hydrodynamic fields 02 p0220 A66-12170

Liquid-phase viscosity effect on disruption of hydrodynamic stability of bubble boiling in large liquid volume 04 p0599 A66-14441

Hydrodynamic instability of shear layers, using inviscid linearized stability theory of spatially growing disturbances 04 p0513 A66-14474

Stability of two-phase unidimensional flow, relating hydrodynamic response to that of servomechanism 05 p0723 A66-15098

Linearized equation and energy principle for plasma stability 05 p0726 A66-15254

Asymptotic methods for hydrodynamic stability of slightly nonuniform plasma 05 p0727 A66-15261

Hydromagnetic stabilization of periodic magnetic fields composed of mirrors and quadrupole fields 07 p1088 A66-17949

Phased oscillator stability solved, using hydrodynamic approximation 08 p1266 A66-19668

Hypersonic shock tunnel study, examining effects of roughness, bluntness and angle of attack on boundary layer transition 08 p1166 A66-19813

Stellar stability in region of pure hydrostatic equilibrium and local instabilities arising from superadiabatic temperature gradients or differential rotation 09 p1448 A66-20097

Stability of plane motion of fluid subject to continuous perturbations distributed over volume and boundary of flow 09 p1368 A66-20755

Oscillation stability criteria for simple surge tank obtained from second method of Liapunov 10 p1523 A66-21497

Approximate method for analyzing chemically reacting turbulent flow fields having initial homogeneities [AIAA PAPER 65-37] 10 p1523 A66-21770

Phased oscillator stability solved, using hydrodynamic approximation 10 p1568 A66-21835

Effect of incompressibility of substance on gravitational instability, deriving dispersion equation and comparing results with problem of incompressible fluids 11 p1735 A66-22410

Nonequilibrium thermodynamics, variational techniques and hydrodynamic stability - Symposium, University of Chicago, May 1965 12 p1974 A66-23540

Asymptotic approximations in hydrodynamic stability problems including Couette, spiral and parallel shear flows 12 p1860 A66-23548

Nonlinear hydrodynamic stability theory, considering application to thermal convection and curved flows 12 p1976 A66-23551

Lagrangian for particular collisional models in fluid dynamics, considering fluctuation theory relations and stability in presence of external field 12 p1918 A66-23552

Statistical aspects of plasma oscillation, examining plasma evolution in terms of Landau theory, particularly after instability onset 12 p1918 A66-23554

Kinetic equation with collision frequency operator used to represent high-temperature plasma instabilities induced by particle collisions 12 p1918 A66-23555

Transverse flow velocity effect on laminar flow shape stability 12 p1863 A66-24428

Stability of vertical water jet examined by imposing audiofrequency disturbances 13 p2060 A66-25133

Internal gravity waves in stratified liquid for two-dimensional case, noting relation between oscillation frequency and wavelength 13 p2062 A66-25177

Boussinesq approximation for hydrodynamic stability of natural thermal convection of fluid between two parallel vertical planes and calculation of critical Reynolds number 15 p2617 A66-29399

Large-dimensional inverse pinch discharge study of impulsive plasma acceleration, gas dynamics and stability of unrestrained current sheet [AIAA PAPER 66-482] 18 p3141 A66-33655

Navier-Stokes equations, differences for laminar jets and turbulent jets, submerged jets and transition layer stability 18 p3099 A66-34123

Frequency and wave-vector-dependent dielectric tensor of drifting plasma in magnetic field calculated, based on macroscopic diffusion equation 18 p3146 A66-34473

Boltzmann equation, interpreted in terms of certain correlation functions known as product densities, applied to fluctuation theorem and gases and liquids not in equilibrium 18 p3136 A66-34706

Vibration spectrum of lattice of rectilinear

vortices in charged and neutral superfluid systems studied in terms of Landau superfluid hydrodynamics 19 p3400 A66-358

Hydrodynamic stability of inhomogeneous plasma flows relative to potential electromagnetic oscillations 19 p3408 A66-362

Quasi-geostrophic instability of disturbance of small amplitude in baroclinic zonal flow caused by barotropic, baroclinic or critical layer instabilities 20 p3550 A66-374

Baroclinic instability of quasi-geostrophic perturbation to zonal wind in two-layer inviscid model, examining short wavelength cut-off in terms of potential vorticity 20 p3550 A66-374

Liquid instability of vibrating partially filled elastic tank, emphasizing resonance breathing mode and frequency response 20 p3672 A66-381

Stability of one-dimensional steady detonations for periodic disturbances of small transverse wavelength 21 p3727 A66-392

Monograph on dynamics of body within liquid-filled cavities associated with practical problems of rocket technology such as seismic stability of liquid propelled tank 21 p3831 A66-393

Difference approximations to PDEs of fluid dynamics used to determine necessary condition for stability, examining advective diffusive and inertial terms 21 p3730 A66-394

Plaint coatings applied to streamlines bodies to reduce hydrodynamic drag against stabilizing laminar boundary layer against transition to turbulence 23 p4059 A66-414

Hydrodynamic stability of incompressible fluid based on Navier-Stokes equation including numerical calculations of boundary layer disturbances and temperature dependent material constants 23 p4060 A66-421

Eigenvalue problem associated with dynamic instability of geostrophic wind 23 p4066 A66-421

Alry and Weber equations solutions and relationships in terms of exponential function in connection with hydrodynamic stability and Orr-Sommerfeld equation 24 p4193 A66-422

Laminar boundary layer characteristics of continuous moving surface, noting hydrodynamic critical Reynolds number, disturbance amplitude function and energy criterion stability 24 p4194 A66-422

**HYDRODYNAMIC TUNNEL**

Acceleration and dynamics of argon plasma in inductive hydrodynamic shock tube 01 p0113 A66-100

**HYDRODYNAMICS**

SA ELASTOHYDRODYNAMICS

SA ELECTROHYDRODYNAMICS

SA FLOW THEORY

SA FLUID MECHANICS

SA HYDRAULICS

SA KROOK EQUATION

SA MAGNETOHYDRODYNAMICS

Flexible-wall tubes flattened by fluid flow velocity reaches critical value, wave differential equations describing effect on stability loss 01 p0158 A66-111

Hydrodynamic behavior of mercury in laminar and turbulent flow in tube discussing effect of vacuum and protective gas 04 p0511 A66-141

Post-Newtonian hydrodynamics and stability of gaseous masses for radial and nonradial oscillations 05 p0715 A66-141

German book on theoretical fluid dynamics covering potential flow of ideal fluids and gases, viscous fluids, boundary layer theory, hydrodynamic stability and turbulence flow 05 p0662 A66-150

Motion of solid body with cavity filled with viscous incompressible fluid at small Reynolds number, reducing hydrodynamic problem to solution of stationary linear boundary value problems 06 p0873 A66-161

Relativistic hydrodynamics of relativistic gas discussing limiting cases depending on chemical reaction and annihilation rates at pair growth 08 p1206 A66-189

Hydrodynamic theory relating velocity decrement and curvature of gas flow from detonation to conditions at explosive interface

Charge exchange and ionization cross  
sections for hydrogen ions passing through  
ordinary and heavy  
hydrogen 01 p0107 A66-10194  
Stable elementary particle detection of mass  
greater than that of proton in hydrogen,  
deuterium and atmospheric air samples,  
using mass spectrometer 01 p0060 A66-10251  
Lifetime of radiative dissociation of  
excited molecular  
hydrogen 01 p0108 A66-10311  
Correlation of hydrogen emission and  
oxygen line in diffusive auroras and  
sporadic E layer 01 p0064 A66-11162  
Ring of ionized hydrogen in region 3.5 to  
4.5 kpc from galactic  
center 03 p0426 A66-12908  
Densification rates for tungsten powder  
compacts sintered in hydrogen/bromine  
atmospheres compared with those sintered  
in hydrogen alone at high  
temperatures 03 p0385 A66-13207  
Reaction of molecular hydrogen with  
oxygen in absence of molecular oxygen at  
various temperatures, using stirred reactor  
with mass spectrometer 04 p0473 A66-13649  
Electromagnetically driven ionizing shock  
waves propagating in hydrogen at speeds to  
relativistic conditions 04 p0511 A66-14010  
Palladium-hydrogen diffusion electrode  
noting current densities 04 p0460 A66-14034  
Vibrationally excited molecular hydrogen  
effect on mean  
polarizability 04 p0549 A66-14311  
Homeopolar semiconductors, discussing  
radiation recombination parameters on  
impurity centers with phonon  
participation 05 p0731 A66-14654  
Niobium resistivity dependence on  
hydrogen-impurity content at various  
temperature ranges 05 p0699 A66-14697  
Electrons, hydrogen nuclei and helium  
nuclei observed in primary cosmic radiation  
by balloon in 1963, discussing integral  
intensity and differential energy  
spectrums 05 p0746 A66-14780  
Electron density measurements in transient  
plasma using resolution repeater rapid-scan  
spectrograph 05 p0677 A66-14914  
Tensile tests and strain rates at various  
temperatures on palladium hydrogen alloys,  
noting plastic deformation and strain  
aging 05 p0701 A66-14966  
Slug flow and film boiling of hydrogen,  
deriving formula for forced convective film  
boiling heat flux  
[ASME PAPER 65-WA/HT-32]  
05 p0793 A66-15673  
Delayed fracture in high strength steel due  
to hydrogen penetration 06 p0895 A66-16490  
Heat transfer coefficients for helium and  
hydrogen gas flowing through electrically  
heated Inconel tube 07 p1148 A66-17300  
Monte Carlo method to reveal properties  
of hydrogen transport near critical level of  
escape of Earth upper  
atmosphere 07 p1028 A66-17362  
5-cm radio emission from excited hydrogen  
in Omega nebula studied with quantum  
parametric amplifier 07 p1134 A66-17624  
Interaction between hydrogen and various  
titanium alloys, noting correlation between  
sorption capacity of alloys and type of phase  
diagram 07 p1050 A66-18064  
Annular flow and two-dimensional forced  
convective boiling heat transfer to hydrogen  
in nucleate and film boiling  
regimes 08 p1316 A66-18832  
Hydrogen solubility in liquid niobium at  
high temperatures and partial  
pressures 08 p1241 A66-19377  
Flow visualization in turbomachinery, using  
hydrogen bubbles generated by electrolysis  
of working water 08 p1209 A66-19553  
Hydrogen feeding through single-layer  
metallic porous electrode of fuel cell on  
open circuit 08 p1171 A66-19649  
Upper ignition limit for reaction of  
fluorine with hydrogen 09 p1338 A66-20394  
Data on large-scale distribution of  
interstellar hydrogen important for studies  
of spiral arms and galactic  
disk 11 p1766 A66-22257  
Thermal conduction of hydrogen-helium gas  
mixtures and dependence on hydrogen  
concentration 11 p1786 A66-22500  
Cross sections of inelastic collisions of  
hydrogen and nitrogen molecular ions with  
hydrogen molecules 11 p1738 A66-22879  
Ground state of hydrogen molecule treated  
by perturbation theory through second  
order, noting energy and wave  
function 11 p1738 A66-22882  
Vibrational relaxation of hydrogen mixed  
with argon in shock tube studied by  
schlieren technique 11 p1739 A66-22886  
Diffusion of electrolytic hydrogen through  
membranes of iron crystals as function of  
stress, temperature and dissolved hydrogen  
concentration 11 p1718 A66-23071  
Low temperature chromatographic  
separation of hydrogen isotopes based on  
interaction with alumina surface electric  
fields 11 p1650 A66-23209  
Receiver of hydrogen line interferometer  
at California Institute of  
Technology 13 p2182 A66-25551  
Interstellar molecular hydrogen abundance  
and possible source from giant  
stars 13 p2182 A66-25579  
Hydrogen and helium spectra of gaseous  
nebulae in theory and  
observation 13 p2183 A66-25610  
Empirical curve of growth on S/I line of  
1-0 hydrogen quadrupole band obtained,  
laboratory and planetary hydrogen  
quadrupole spectra corrected for  
saturation 13 p2184 A66-25621  
Homeopolar semiconductors, discussing  
radiation recombination parameters on  
impurity centers with phonon  
participation 13 p2167 A66-25929  
Stable elementary particle detection of  
mass greater than that of proton in  
hydrogen, deuterium and atmospheric air  
samples, using mass  
spectrometer 13 p2131 A66-25968  
Capillary viscosity meter measurements of  
hydrogen-deuterium  
solutions 13 p2114 A66-25970  
Auroral hydrogen emission in night sky,  
noting variance with sunspot cycle and  
magnetic activity 13 p2073 A66-26029  
Ionization cross section for rare gases and  
hydrogen atoms calculated from  
perturbation theory, noting ruby laser

photon absorption 13 p2133 A66-26188  
 Stimulated emission spectroscopy of hydrogen, nitrogen, oxygen and deuterium diatomic gases in 0.8 to 8 micron region 13 p2102 A66-26205  
 Helium-neon gas laser used to determine electron density variation, spatial and temporal, in afterglow of Z-pinch in H at 100 mtorr 13 p2104 A66-26239  
 Analytical solution to rate equations for branching chain reactions of hydrogen-oxygen reaction under shock tube conditions, for application to ignition problems 13 p2018 A66-26442  
 Proton transfer between hydrogen and methane, ethane, propane and butanes, using high-pressure mass spectrometry, employing ion source with beta rays as ionizing medium 13 p2018 A66-26443  
 Numerical solution of steady state jump equations for normal ionizing shock waves in hydrogen, assuming upstream and downstream states at chemical equilibrium 13 p2154 A66-26661  
 Ring of ionized hydrogen in region 3.5 to 4.5 kpc from galactic center 14 p2380 A66-27256  
 Broadening of Fraunhofer hydrogen lines in solar spectrum, noting Stark effect 14 p2380 A66-27274  
 Porosity in titanium arc welds, noting sources of gas evolution and probable causative gases, particularly molecular hydrogen and oxygen 14 p2302 A66-27346  
 Static pressure distributions in supersonic nozzle flows of dissociated hydrogen plus argon 14 p2219 A66-27442  
 Formulae relating 21-cm emission intensity to density of interstellar hydrogen gas 14 p2383 A66-27799  
 Low temperature transport properties of hydrogen, deuterium and HD, noting quantal phase shift, intermolecular potentials, etc 14 p2414 A66-27973  
 Photochemical decomposition of carbon suboxide and spectroscopic observation of carbon atom reactions with nitrogen, hydrogen and deuterium at 4.2 degrees K 14 p2233 A66-27975  
 Neutron analysis techniques for determining hydrogen presence on lunar or planetary surfaces, based on measurement of gamma radiation 14 p2233 A66-28105  
 Drift and diffusion of slow positive ions in hydrogen, using redesigned apparatus 14 p2345 A66-28141  
 Hydrogen effect on strength, plastic deformation and microstructure of hardened titanium alloys 15 p2522 A66-29179  
 Oxygen and hydrogen effect on microstructure, tensile and impact strength and hardness of titanium alloys 15 p2522 A66-29180  
 Enthalpy and entropy of parahydrogen from PVT data and from limited amount of thermal data 16 p2790 A66-30907  
 Solubility of hydrogen in titanium 16 p2724 A66-31238  
 Cryosorption panels consisting of molecular sieve adsorbents bonded to refrigerated aluminum plates for pumping hydrogen at 20 degrees K 17 p2957 A66-31978  
 Presence and detectability of hydrogen in molecular form in galaxy 17 p3001 A66-32365  
 Water vapor effects on detonation reaction of H sub 2 - O sub 2 17 p3034 A66-32467  
 Embrittlement of tantalum by room temperature deformation in presence of hydrogen 17 p2941 A66-33441  
 Computer programs for combustion rates of hydrogen-air mixture 18 p3063 A66-33830  
 Elastic relaxation effect due to diffusion of interstitial hydrogen in tantalum and niobium 18 p3123 A66-34058  
 Semiconvective zone in very massive stars during hydrogen burning, noting factors leading to instability 18 p3229 A66-34142  
 Thermal conductivity of hydrogen at temperatures up to 4700 degrees F determined indirectly from effective conductivity of porous tungsten specimens filled with pressurized hydrogen 18 p3125 A66-34387  
 Balloon flight data obtained at 50 and 65 degrees N geomagnetic latitude on spectra of primary cosmic ray hydrogen and helium nuclei, using Cerenkov scintillator technique 18 p3190 A66-34831

Hydrogen embrittlement reduction in springs by careful processing 19 p3362 A66-35326  
 Feasibility analysis of very high temperature uranium-bearing liquid alloy heat exchanger for hydrogen gas, considering several ternary component liquid alloy systems [AIAA PAPER 66-622] 19 p3476 A66-35358  
 Hydrogen pumping by means of phenomenon of hydrogen absorption by solid layer of carbon dioxide condensed at temperature of 20.4-14 degrees K 19 p3400 A66-36099  
 Spectral receiver of Nancy radiotelescope of correlation type, for extragalactic observations on 21-cm neutral hydrogen band 19 p3319 A66-36259  
 Ionization of hydrogen and hydrogenic positive ions by electron impact 19 p3409 A66-36324  
 Dissociation of hydrogen molecules by electron impact, using first-order exchange approximation and separated atoms approximation 19 p3403 A66-36328  
 Cross sections for vibrational excitation of water by collision with water and molecular hydrogen calculated, using radial scattering equations 19 p3403 A66-36330  
 Diffusion parameters of impurities from polycrystalline Si in hydrogen flux, noting formula for boundary conditions 19 p3321 A66-36457  
 Hydrogen line profile in Paschen series of solar spectrum, taking into account Stark effect and line broadening 20 p3648 A66-37045  
 Particle size distribution, aging effects, terminal velocity measurements and production techniques of slush hydrogen investigated as potential upgraded spacecraft fuel 20 p3676 A66-37075  
 Three superconducting niobium stannide liquid level sensors tested in triple point slush or liquid hydrogen for capability of detecting liquid-vapor interface 20 p3557 A66-37076  
 Hazards associated with ignition of various condensed phase hydrogen-oxygen systems 20 p3625 A66-37083  
 Effect of variations in mission and vehicle constraints on hydrogen-oxygen fuel cell system optimization 20 p3497 A66-37160  
 Thermal escape of neutral hydrogen and distribution in Earth thermosphere, noting collision in transition 20 p3549 A66-37292  
 Digital computer analysis of kinetic equations for CO burning in presence of hydrogen 20 p3679 A66-37702  
 Phase diagram of titanium-oxygen-hydrogen system, plotting isotherms and isobars for equilibrium hydrogen pressure, noting oxygen effect 20 p3585 A66-37748  
 Molecular hydrogen structure, considering planetary and stellar atmospheres and interstellar space 21 p3815 A66-39487  
 Solid solutions of titanium, tungsten, chromium prepared by carbidization of mixtures in hydrogen medium and obtained as fine-grained carbide 22 p3934 A66-39865  
 Nonequilibrium dissociation losses in hydrogen-fluorine propellant system, indicating rate control of recombination steps [AICE PREPRINT 28A] 22 p3969 A66-39882  
 Second-order WKB corrections to Rydberg-Klein-Rees potential curve for hydrogen 22 p3949 A66-39911  
 Paschen series laser lines in atomic and molecular hydrogen 22 p3933 A66-40892  
 Homogeneous isotopic exchange reaction between hydrogen and deuterium in single-pulse shock tube with excess argon 22 p3860 A66-40902  
 Hydrogen excitation mechanism in surge prominences determined, using stationary equations for energy levels of hydrogen 23 p4126 A66-41076  
 Excitation of H-alpha lines in solar chromosphere from internal and external sources, noting theoretical and empiric results 23 p4127 A66-41080  
 Heat of formation of oxygen difluoride for reaction with hydrogen, using Parr fluorine combustion bomb containing metal ampoule employing burst 23 p4118 A66-41080

diaphragm 23 p4118 A66-41080  
 Charge exchange cross sections for argon incident on hydrogen and deuterium measured over energy range of 30 to 100 eV, taking into account ion-molecule reactions 23 p4098 A66-41080  
 Excitation of hydrogen molecule from ground state to B and C electronic states by electron impact, using one-center wave functions of Huzinaga together with Brueckner approximation 23 p4098 A66-41080  
 Height-luminosity distribution of auroral hydrogen beta emission measured with rocket mounted photometer 23 p4065 A66-41080  
 Optical hydrogen-line profiles in Orion nebula compared to radio profile obtained from antenna response and weight factors of brightness temperature 23 p4131 A66-41080  
 Compressibility factor chart for hydrocarbon-hydrogen and nitrogen-hydrogen gas mixtures, correlating pressure, temperature, using state equation 23 p4150 A66-41080  
 Detonability of hydrogen-oxygen mixture in large vessels at low initial pressure using strong and weak igniters 23 p4120 A66-41080  
 Thermal accommodation coefficients of hydrogen on tungsten and hydrogen on hydrogen covered tungsten at temperatures of 300, 403 and 473 degrees K 23 p4033 A66-42080  
 Ion energy balance equation for ionospheric including effects of O, He, and H ion thermoconductivity and cooling by atomic hydrogen and helium 24 p4198 A66-42080  
 Temperature of fluorine-hydrogen flame from 3, 0/ band of FH vibration-rotation experimentally determined to be in agreement with theoretical figure of 3000 degrees K for stoichiometric mixture 24 p4295 A66-42080  
 Hydrogen abundance in universe using gravitational effect on physical constants 24 p4279 A66-43080

**HYDROGEN ATOM**  
 Electron concentration, length and temperature of limb chromospheric flare using steady state equation of hydrogen atom 01 p0131 A66-10080  
 Rarefied hydrogen flame interaction between hydrogen atoms and molecules of certain organic, aliphatic and cyclic compounds 01 p0161 A66-10080  
 Electric resistivity of solid phase lutetium hydrogen system noting action of hydrogen atom 01 p0127 A66-11080  
 Positron scattering by atomic hydrogen at various incident energies 02 p0262 A66-11080  
 Atomic hydrogen reaction with HO-2 source of hydrogen molecules in lower thermosphere 02 p0221 A66-11080  
 Angular distribution of fast H and H<sup>+</sup> ion dissociation fragments on hydrogen gas noting transverse velocity distribution 03 p0394 A66-12080  
 Design, operation and performance capability of hydrogen maser 03 p0377 A66-12080  
 Stereospecificity in hydrogen transfer reaction characteristic of 6-keto steroids studied by mass spectrometry 03 p0330 A66-13080  
 Hydrogen atom beam characteristics: discussing signal power, generating frequency, radiation signal damping of hydrogen atom relaxation time 03 p0380 A66-13080  
 Mach-Zehnder interferometer for electromagnetically accelerated shock waves in hydrogen 04 p0554 A66-14080  
 Computed high temperature rate constants for hydrogen atom transfers involving hydrogen elements, noting activation energies of exothermic reactions [CI PAPER WSCI-65-24] 05 p0629 A66-15080  
 Variation of scattering cross section with beam intensity for ruby laser light in atomic hydrogen 05 p0698 A66-15080  
 Bethe approximation of ionization cross sections of excited states of atomic hydrogen by high energy electrons 06 p0912 A66-17080  
 Photoabsorption cross section of atomic hydrogen obtained by flowing molecular hydrogen through discharge tube 06 p0913 A66-17080

- Statistical theory of electronic energies, calculating binding energy at theoretical equilibrium separation of molecular hydrogen ion 13 p2130 A66-25370
- Potential energy surfaces on triatomic hydrogen molecule ion computed with generalized Gaussian orbitals 13 p2130 A66-25371
- Hydrogen ion intrusion into stainless steel surface measured with apparatus in which hydrogen and helium condensation pumps provide ultrahigh vacuum 13 p2108 A66-25754
- Franck-Condon factors for ionization of hydrogen and deuterium, noting vibrational eigenenergies of D sub 2 14 p2337 A66-27972
- Surface blistering of metals due to low energy hydrogen ion bombardment, determining solar absorptance change in gold-plated specimens 14 p2316 A66-28007
- Asymptotic form of wave function and threshold behavior of cross section for ionization of atomic hydrogen by electron impact 15 p2544 A66-29116
- Absorption coefficients for nitrogen and oxygen ion in air at temperatures of 150,000

to 800,000 degrees K 15 p2617 A66-29345  
 Intensities of optically thick lines emitted by hydrogen-like ions in steady state plasma for various electron temperatures and densities 16 p2758 A66-30276  
 Ion-molecular reactions of hydrogen with inert gases caused by low energy electrons in low temperature plasmas, considering energy level populations, reaction cross sections, etc 18 p3064 A66-34026  
 Momentum eigenfunction for ground state of hydrogen molecule ion 18 p3106 A66-34506  
 IR absorption spectrum of local H-ion oscillations in KCl crystals doped with Na, Rb, Cs, I, Br and F 19 p3440 A66-35772  
 Negative hydrogen ions as cause of continuous emission in solar flares 19 p3453 A66-36297  
 Hydrogen and helium ions formation and destruction, charge transfer, diffusion, role during solar activity, using mass spectrometry, ground radar, etc 19 p3350 A66-36356  
 Chemical composition of ionized components of outer ionosphere above main ionization maximum region measured by satellites 19 p3350 A66-36357  
 Hydrogen ions detected near anode of glow discharge at various pressures, using mass spectrometer 19 p3410 A66-36455  
 Absorption coefficients for nitrogen and oxygen ions in air at temperatures of 150,000 to 800,000 degrees K 20 p3604 A66-37350  
 Beam foil excitation technique application in measuring mean lives of 2p and 3p levels of hydrogen 21 p3774 A66-38543  
 Rate constants for atomic and molecular hydrogen ion transfer from tri- and tetra-atomic carbon paraffins to propylene and cyclopropane molecular ions 22 p3861 A66-40905

**HYDROGEN OXYGEN /HOPE/ SPACECRAFT**  
 Gaseous hydrogen and liquid oxygen combustion and heat transfer in small rocket chamber 14 p2375 A66-28104

**HYDROGEN PEROXIDE**  
 Convective heat transfer behavior of 90 percent hydrogen peroxide studied with reference to possible use as rocket propellant 01 p0164 A66-10903  
 Fuel cell systems, particularly hydrogen peroxide type, noting electrochemical oxidation, water production, thermal energy, electrolyte, etc 06 p0808 A66-16391  
 Kinetics of hydroxyl radical in aqueous solution, examining electron spin resonance spectrum as function of flow rate, temperature and mixture composition 08 p1178 A66-19066  
 Paramagnetic resonance spectra of free radicals in hydrogen peroxide and alcohols during intense UV irradiation 11 p1650 A66-23216  
 Early bird hydrogen peroxide control system maneuvers to place satellite into final stationary position [AIAA PAPER 66-262] 12 p1954 A66-24736  
 Semiquantitative spot test detection of peroxide in low concentrations of hydrogen peroxide 20 p3510 A66-37056  
 Combustion and performance characteristics of lithium aluminum hydride/hydrogen peroxide hybrid rocket [AICE PREPRINT 34D] 22 p3969 A66-39878

**HYDROGEN PLASMA**  
 Macroscopic conservation equations for ionized dilute hydrogen plasma derived directly from Bogoliubov-Born-Green-Kirkwood-Yvon equations 01 p0110 A66-10338  
 Ratio of average transmission coefficients of L-beta and H-alpha and reabsorption in hydrogen pulsed discharge 01 p0111 A66-10390  
 Stabilization of pinch discharge in hydrogen 02 p0267 A66-11726  
 Stark broadening of Balmer lines in hydrogen plasma produced by alternating axial magnetic field induced by coil surrounding discharge 03 p0400 A66-12934  
 Thermodynamic properties of hydrogen ionized plasma in equilibrium 03 p0403 A66-12966  
 Temperature of hydrogen plasma jet at atmospheric pressure by measuring electric field on profile of Stark broadened

line 03 p0403 A66-12973  
 Velocity and attenuation of Alfvén waves in hydrogenous plasma at LF and HF by experiment 03 p0406 A66-13177  
 Spectral line intensities of hydrogen and helium plasma in P.I.G. discharge 04 p0553 A66-14283  
 Measurements of plasma from hydrogen-loaded titanium washer mounted at DC magnetic mirror 07 p1088 A66-17954  
 Partition function of hydrogen plasma derived classically and by quantum mechanics, obtaining Saha equation containing effective lowering of ionization potential 07 p1090 A66-18155  
 Time dependence of electron density during afterglow of plasma in helium-hydrogen, neon-hydrogen and argon-hydrogen mixtures measured by microwave cavity 07 p1091 A66-18398  
 Supersonic hydrogen jet production in vacuum 08 p1207 A66-19196  
 Kinetic equations, considering free and bound charges in weakly ionized hydrogen plasma, noting self-consistent approximation for second distribution function 08 p1265 A66-19375  
 Nonpotential Alfvén drift waves and magnetic noise in magnetosonic stationary hydrogen plasma 10 p1569 A66-21964  
 Proton concentration of hydrogen plasma in alpha apparatus by probe with fast-atom beams 10 p1571 A66-22012  
 Energy distribution of hydrogen plasma from coaxial gun 10 p1571 A66-22013  
 Hydromagnetic waves in partially ionized cylindrical hydrogen plasma 11 p1745 A66-22453  
 Solar wind particle diffusion into geomagnetic tail and then down field lines to polar cap 11 p1700 A66-23142  
 Hydrogen plasma ionization density calculation by three methods 11 p1747 A66-23265  
 Objections to idea of solar ejection of neutral hydrogen and responsibility for geomagnetic storm 11 p1776 A66-23496  
 Continuous emission and absorption of plasmas by calculating radiation of hydrogen plasma, deriving temperature and pressure conditions under which plasma radiates as black body 12 p1919 A66-23750  
 Superhigh vacuum creation in OGRA-1 facility, using titanium sputtered liquid nitrogen-cooled copper surfaces 12 p1922 A66-24218  
 Hydrogen arcs, sulfur hexafluoride arcs, decaying nitrogen arcs and nitrogen arcs with forced convection 13 p2137 A66-25110  
 Spectral line intensities variation in ionization of hydrogen and impurities in TA 2000 device 13 p2138 A66-25125  
 Differences between thermodynamic equilibrium of hydrogen plasma, accounting for increased atomic energy levels 13 p2141 A66-25459  
 Ionization phase of impurity in pulsed hydrogen discharge and electron temperature measuring method 13 p2141 A66-25478  
 Electrostatic instabilities of hydrogen discharge in strong electric field and effects on ohmic heating and electric conductivity 13 p2144 A66-25721  
 Electron density and temperature in decaying hydrogen plasma determined, using monochromator 13 p2145 A66-25730  
 Electron density and temperature of hydrogen plasma determined from intensity of spectral line and continuum in region adjacent to line 13 p2145 A66-25733  
 Tenuous hydrogen plasma injection into axial magnetic cusp field at entrance of long solenoid 13 p2147 A66-25749  
 Delays effect on performance of coaxial plasma guns with about 20 kv applied, shown to produce fast burst of clean plasma containing pure hydrogen ion 13 p2000 A66-25750  
 Plasma wave propagation and decay processes studied from profiles of plasma density in cylindrical metal vessel and results compared to Stark effect and framing camera photographic results 13 p2149 A66-26240  
 Electric fields in hydrogen plasma leading to forbidden free-bound transitions, considering photodetachment of electrons

and radiative capture cross sections 13 p2135 A66-26240  
 Hydrogen plasmoid density, ionization at electron temperature measured by fast particle probing 13 p2153 A66-26240  
 State equation and equilibrium correlations for hydrogen type plasma 13 p2157 A66-26240  
 Pressure rise in inner region of hydrogen arc discharge in axial magnetic field 16 p2764 A66-31100  
 Energy spectrum of neutral hydrogen atoms from coaxial plasma gun 17 p2962 A66-31100  
 Free-free galactic X-ray emission from fully-ionized hydrogenic plasma 17 p2992 A66-31100  
 Kinetic equations, considering free and bound charges in weakly ionized hydrogen plasma, noting self-consistent approximation for second distribution function 18 p3146 A66-34026  
 Magnetic beach effect on RF power transfer to ion-cyclotron waves in hydrogen and deuterium plasmas 18 p3146 A66-34026  
 Excitation and ionization of hydrogen plasma under influence of two electron groups with different temperatures and densities, using coupled system of rate equations 19 p3407 A66-36100  
 Proton concentration of hydrogen plasma in alpha apparatus by probe with fast-atom beams 19 p3407 A66-36100  
 Energy distribution of hydrogen plasma from coaxial gun 19 p3407 A66-36100  
 Stable and unstable behavior of preheated hydrogen plasma in linear and cusped theta pinches 19 p3414 A66-36100  
 Livermore neutral-injection experiment studying stability of steady state 20-hydrogen plasma in various confinement magnetic fields 19 p3421 A66-36100  
 Hot plasma production in OGRA-II injection of fast hydrogen atoms in magnetic mirror trap with stabilized hexagonal field 19 p3421 A66-36100  
 Biconical cusp injection of dense hydrogen and deuterium plasmas by plasma gun 19 p3425 A66-36100  
 Joule heating of hydrogen plasma in toroidal Tokamak-3 device by annular electric current, noting stability and plasma interacting with diaphragm 19 p3427 A66-36100  
 Power balance measurements and partial loss rate of ohmically heated helium in hydrogen discharges in C stellarator 19 p3428 A66-36100  
 VGL-2 cryogenic magnetic trap, filling with hydrogen plasma 19 p3428 A66-36100  
 Second-harmonic electron cyclotron resonance in hydrogen plasma from HF source with inductive coupling situated transverse magnetic field 20 p3607 A66-37400  
 Positive plasma column produced by hydrogen glow discharge studied by mass spectrometer for various pressures and currents 20 p3608 A66-37400  
 Electrical breakdown in beams of hydrogen and nitrogen produced by expanding H or gas out of Laval nozzle cooled by liquid hydrogen or nitrogen in high vacuum 20 p3605 A66-38000  
 Increasing plasma density in OGRA 1 20 p3610 A66-38000  
 Plasma diagnostics method, measuring parameters of hydrogen plasma with beams of fast hydrogen atoms and ions 21 p3784 A66-39000  
 Plasmoid motion and purification in heli magnetic field and mass spectrograms of pure dense hydrogen 21 p3787 A66-39000  
 Nonpotential Alfvén drift waves and magnetic noise in magnetosonic stationary hydrogen plasma 21 p3794 A66-39000  
 Superhigh vacuum creation in OGRA facility, using titanium sputtered liquid nitrogen-cooled copper surfaces 22 p3957 A66-40905  
 Spectroscopic measurements of electron densities and temperatures in argon hydrogen plasma jet 23 p4068 A66-41200  
 Ruby laser light scattering measurements of electron and ion temperatures of hydrogen and deuterium plasmas produced in theta pinch devices 24 p4222 A66-42200  
 Ambiplasma sources of positronium, protonium and muonium radiation, etc

theorizing that quasars may be ambiplasmas containing admixtures of matter and antimatter 24 p4280 A66-43027

**HYDROGEN RECOMBINATION**  
Thermal sulfur equilibrium in burnt gas of hydrogen-oxygen flames 02 p0303 A66-11594  
Recombination effects in nozzle flows of hydrogen/fluorine rocket engines 08 p1279 A66-19152  
Altitude distribution of atmospheric molecular and atomic hydrogen, showing results of Lyman alpha absorption measurements 17 p2919 A66-32995

**HYDROGENATION**  
**HA DEHYDROGENATION**  
Dichloroborane synthesized in quantitative yields by thermal hydrogenation of boron trichloride 05 p0629 A66-14540  
Thermochemical deposition of refractory metals, alloys and compounds, discussing tungsten, rhenium and molybdenum impurity, grain orientation and application to thermionic devices 05 p0622 A66-15591  
Thorium dioxide strengthened nickel and nickel molybdenum alloys, discussing production via selective reduction, strength, creep rupture, stability and ductility characteristics 06 p0893 A66-15943  
Hydrogen effect on strength, plasticity and brittleness of metals with fcc lattice at various temperatures and hydrogen concentrations 12 p1894 A66-23763  
Purification of turbine oil by hydrogenation, using Al-Co-Mo catalyst 20 p3575 A66-38382

**HYDROGENOMONAS**  
Electrolysis-Hydrogenomonas bacterial bioregenerative life support system for manned space flight of long duration 06 p0815 A66-15929

**HYDROKINETICS**  
Separation of gases from isotopes in compression shock produced in expanding gas flow past obstruction, dependent on gas density and hydrokinetic properties of components 06 p0875 A66-17052

**HYDROLOGY**  
**SA METEOROLOGY**  
Hypersaturation photography, applications and advantages 10 p1535 A66-21523

**HYDROLYSIS**  
**SA HYDRATION**  
Chemical and physical properties of samarium dicarbide, prepared by heating samarium sesquioxide with graphite, using X-ray analysis, hydrolytic studies, etc, noting structure 14 p2362 A66-27465  
Thermal growth and deposition of silica films by silicon tetrafluoride hydrolysis 22 p3962 A66-40048  
Hydrolytic reactions of nitrogen fluorides, noting inertness of nitrogen trifluoride to pure water and reaction with aqueous base to give nitrite and fluoride 23 p4118 A66-41242

**HYDROMAGNETIC FLOW**  
**SA MAGNETOHYDRODYNAMIC FLOW**  
**HYDROMAGNETIC STABILITY**  
**SA MAGNETOHYDRODYNAMIC STABILITY**  
**HYDROMAGNETIC WAVE**  
**SA MAGNETOHYDRODYNAMIC WAVE**  
**HYDROMAGNETISM**  
**SA GEOMETRICAL HYDROMAGNETIC**  
**SA MAGNETOHYDRODYNAMICS**  
**SA MAGNETOHYDROSTATICS**  
**SA PLASMA**  
**HYDROMETEOROLOGY**  
Statistical characteristics of fluctuations in radio emission of atmosphere producing turbulent pulsations and displacements of hydrometeorological formations in scan field of radiotelescope, noting distribution function 04 p0517 A66-14046  
Statistical characteristics of fluctuations in radio emission of atmosphere producing turbulent pulsations and displacements of hydrometeorological formations in scan field of radiotelescope, noting distribution function 17 p2917 A66-32212

**HYDROSTATIC PRESSURE**  
Linear and nonlinear stability and critical strains of closed thin walled circular cylindrical shell under hydrostatic pressure 01 p0155 A66-10738  
Wave solutions to linearized quasi-hydrostatic equations for adiabatic nonviscous flow on equatorially oriented

beta plane 02 p0254 A66-11982  
Electrical resistivity and Hall coefficient of undoped n-type gallium arsenide with carrier concentrations measured at various temperatures as function of uniaxial compression and hydrostatic pressure 03 p0412 A66-13149  
Whirl instability and pneumatic hammer for rigid rotor in pressurized gas journal bearings [ASME PAPER 65-LUB-12] 04 p0527 A66-14245  
Plastic deformation in body under uniform pressure, establishing necessary condition for existence of uniform stressed state in inhomogeneous body 07 p1142 A66-17261  
Uniaxial and hydrostatic pressure effect on absorption edge spectrum and edge excitation spectrum for visible luminescence diamond 07 p1095 A66-17320  
Plastic properties of brittle materials analyzed by hydrostatic pressure, using double ring, calculating radial pressure on sample, between rings, etc 08 p1305 A66-18600  
Magnetic transitions in terbium and dysprosium as affected by hydrostatic pressure at various high pressures and low temperatures 08 p1274 A66-19361  
Origin of diamonds in Canyon Diablo and Novo Urei meteorites 09 p1447 A66-19882  
Elastic behavior of ring reinforced oval cylinder subjected to uniform hydrostatic pressure 10 p1617 A66-21787  
Modified Ellissen finite difference grid solution of primitive hydrostatic equations system for barotropic and baroclinic model of atmosphere 11 p1730 A66-22946  
Minimum-weight analysis of hydrostatically compressed ring-stiffened cone, showing that previous data derived for cylinders in same condition might be useful 12 p1970 A66-24702  
Magnetohydrostatic theory of sunspots combined with optical approach to obtain hydrostatic pressure difference 13 p2184 A66-25622  
Pressure effect on magnetic moment of solids, noting magnetic transition point, ferromagnetic anomalies, etc 15 p2565 A66-29067  
Hydrostatic pressure effect on energy gap, carrier concentration and electron and hole mobilities of indium antimonide 16 p2784 A66-31447  
Buoyancy and magnetohydrostatic stability of magnetic body immersed in magnetizable fluid 16 p2749 A66-31757  
Uniaxial compression and hydrostatic pressure effect on piezoresistance and piezo-Hall effects in n-and p-type AlSb 17 p2984 A66-33153  
Rotating speed effect on design of dynamic seals for rocket engine turbopumps, presenting aspects of design of hydrostatic seal [ASME PAPER 66-FE-18] 17 p2932 A66-33271  
Electron scattering in ABO-type semiconductors by long-wave transverse-optical ferroelectric lattice mode evidenced by hydrostatic pressure measurements 19 p3444 A66-36176  
Compressional wave velocity in limestones, marbles and single crystal of calcite under hydrostatic pressure to 20 kbar 19 p3351 A66-36387  
Modified Ellissen finite difference grid solution of primitive hydrostatic equations system for barotropic and baroclinic model of atmosphere 20 p3593 A66-37859  
Instability of rectangular solid in plane strain subjected axially to constant pressure and laterally to constant hydrostatic pressure 24 p4286 A66-42150  
Large deformation analysis of equilibrium of spherical momentumless shells under hydrostatic pressure 24 p4290 A66-42444

**HYDROSTATICS**  
**SA MAGNETOHYDROSTATICS**  
Hydrostatic problem of calculating potential on surface of nonconfocal ellipsoid from potential of simple layer on similar ellipsoid 01 p0056 A66-10309  
Electrohydrostatic boundary equations solving two-and three-dimensional axisymmetric situation and sessile drop problem 04 p0545 A66-13808  
Equilibrium shape of Moon, assuming

homogeneity computing mean rotation configuration and pertinent single parameter equilibrium shapes 07 p1133 A66-17304  
Extension, for heterogeneous sphere, of previous work which gave expressions for mean strain and rupture as functions of hydrostatic and nonhydrostatic components of free energy 08 p1212 A66-18638  
Approximate reentry velocity and heating equations applied to any atmosphere satisfying hydrostatic equilibrium, noting motion equations for flight path 08 p1303 A66-18836  
Curve fitting technique for integration of hydrostatic equilibrium equations of planetary constitution simplified by introduction of homology-invariant variables 16 p2799 A66-30619  
Silicon, quartz and germanium single crystal density determined via hydrostatic weighing method 16 p2777 A66-30933  
Analytic models of stellar evolution, describing homogeneous and inhomogeneous stages, energy conservation and transport radiative and convective transfer mechanisms, etc 19 p3467 A66-36789

**HYDROX ENGINE**  
Liquid hydrogen-oxygen cryogenic propulsion stages, examining structural material and configuration of propellant tank and thermal flow effects 18 p3246 A66-34007

**HYDROXYL**  
Kinetic studies of hydroxyl radicals in shock waves, considering recombination via particular reaction in lean hydrogen-oxygen mixtures 04 p0596 A66-13646  
Polarized OH emission near W3 region 04 p0579 A66-14175  
OH emission in direction of source W49, comparing earlier observations 04 p0579 A66-14176  
Emission and absorption lines with anomalous intensity distributions indicate hydroxyl molecule concentrations in Sagittarius A 07 p1133 A66-17462  
Kinetics of hydroxyl radical in aqueous solution, examining electron spin resonance spectrum as function of flow rate, temperature and mixture composition 08 p1178 A66-19066  
Galactic center dynamics revealed by hydroxyl radicals present in interstellar medium, noting detection of radio emissions caused by star-excited atoms and molecules 09 p1453 A66-20239  
RF spectrum of OH radiation in interstellar space, including emission intensity and linear polarization 11 p1774 A66-22963  
Nuclear magnetic resonance classification of alcohols and hydroxyl groups from FI-19 spectra of trifluoroacetates 15 p2447 A66-29238  
Optical pumping mechanism for anomalous excitation of OH microwave emissions from H II regions 16 p2807 A66-31756  
Control of abundance of neutral hydroxyl radical in unionized interstellar gas 17 p3003 A66-32658  
Polymer molecular structure, discussing concentration of primary and secondary hydroxyl groups, use of NMR to establish stereo and positional isomeric configuration, etc 17 p2871 A66-33003  
Hydroxyl radical concentration in rarefied CO flame by EPR method 18 p3265 A66-34551  
Stimulated emission processes interpreting OH microwave emission from points in sky, using anisotropic UV radiation which leads to molecule alignment and population inversion 20 p3650 A66-37343  
Direction, frequency and polarization of radio emission from galactic OH determined by hypothesis of stimulated emission 21 p3814 A66-39213  
Dimensions and positions of three sources of 18-cm OH emission determined, using 90-ft steerable paraboloids 21 p3814 A66-39269  
Stokes parameters measurement as function of frequency for anomalous polarized OH emission originating near thermal radio source W3 22 p3978 A66-40015  
Anomalous circular polarization of hydroxyl radical 18-cm radiation from cosmic sources 24 p4272 A66-43188

**HYGIENE**  
**SA HEALTH**

## SA SANITATION

- Space flight problems in maintaining personal hygiene 15 p2435 A66-29456  
Microbial profiles of 20 men under simulated space conditions indicates that certain men can go unwashed six weeks 17 p2856 A66-32160

## HYGROMETER

- Transistorized evaporation to measure vertical water vapor and heat fluxes in lower atmosphere 04 p0519 A66-13671  
Quantitative coulometric analyses of water yield for thermal dehydration of solids, using electrolytic hygrometer cell 07 p1036 A66-18490

## HYPERBOLIC EQUATION

- Mixed boundary value problem for second order hyperbolic equation with discontinuous coefficients having time derivatives 01 p0092 A66-10187  
Recurrence formula for Riemann function for certain operator in  $n$ -dimensional analog of hyperbolic differential equation 01 p0093 A66-10382  
Perturbation of boundary value problem for second order hyperbolic equation 01 p0095 A66-10927  
Nonlinear difference schemes for hyperbolic equation applied to solution of one- and multidimensional transport and quasi-linear equations 01 p0095 A66-11013  
Singular perturbation for mixed Cauchy problem relative to equation with second-order partial linear hyperbolic derivatives 05 p0708 A66-15094  
Cauchy problem for hyperbolic singular convolution-type integral equation 05 p0708 A66-15320  
Existence in large of periodic solutions of hyperbolic partial differential equations 06 p0903 A66-16899  
Asymptotic solutions of problems in wave propagation, examining electromagnetic field equations, hyperbolic equations, radiation from sources, etc 06 p0835 A66-16900  
Criterion of nonrigorous hyperbolicity for equation system with nondiagonal quasi-linear partial derivatives after putting system in diagonal quasi-linear form for relativistic MHD 06 p0921 A66-17058  
Solvability of general mixed boundary value problems for multidimensional hyperbolic integro-differential equation of arbitrary order with analytic coefficients 07 p1056 A66-17608  
Stability of solutions of Cauchy problem for linear hyperbolic differential equations 07 p1056 A66-17609  
Jump discontinuities in nonlinear hyperbolic systems of equations applied to formation of magnetoacoustic shocks from simple waves 07 p1089 A66-17967  
Solutions in large for nonlinear hyperbolic systems of equations by difference approximation 07 p1059 A66-18032  
Modification of Fourier law used to obtain hyperbolic wave equations of thermomagnetoelasticity for conductors and wave equations of thermopiezoelectricity 08 p1270 A66-19113  
Invariant imbedding in transport process and theorems of uniqueness and existence for derived hyperbolic equation 09 p1393 A66-19906  
Dependence of hyperbolic equations in apex of characteristic cone on initial functions 10 p1551 A66-21974  
Relations between coefficients of characteristic equation of automatic systems and parameters of root loci with hyperbolic branches 11 p1680 A66-23325  
Integral relations method to reduce by approximation PDEs to ODEs or to algebraic or transcendental equations 13 p2119 A66-25854  
Protter criterion for correctness of Cauchy problem for second-order degenerate hyperbolic equation 13 p2120 A66-26246  
Optimal control problems described by classical boundary problems for equations of parabolic and hyperbolic type 14 p2263 A66-26768  
Twice continuously differentiable function satisfying nonlinear hyperbolic equation for certain initial conditions obtained, using averaging method 14 p2321 A66-27163  
Decay of solutions of initial boundary value

- problem for hyperbolic equations in unbounded regions 14 p2322 A66-27629  
Finite difference method solution of parabolic and hyperbolic partial differential equations in one space variable 14 p2324 A66-28146  
Mixed problem for general two-dimensional second-order hyperbolic equation with discontinuous coefficients solved by reduction to system of Volterra integral equations 16 p2734 A66-30747  
Multidimensional hyperbolic equations of any order with discontinuous coefficients, noting conditions for analytic or continuous solution 16 p2734 A66-30782  
General numerical method of characteristics for three-dimensional unsteady magnetofluid dynamics of multi-component medium 16 p2690 A66-31653  
Singularities of solutions of nonlinear hyperbolic equations of order greater than unity 17 p2946 A66-32379  
Dependence of hyperbolic equations in apex of characteristic cone on initial functions 19 p3389 A66-36184  
Protter criterion for correctness of Cauchy problem for second-order degenerate hyperbolic equation 19 p3390 A66-36196  
Asymptotic solution of nonlinear hyperbolic equation in gas dynamics, with applications in explosion theory, astrophysics, etc 19 p3390 A66-36200  
Powers of integral operator generated by Cauchy problem for second-order hyperbolic equation solved by Riesz method of analytical continuation 21 p3756 A66-38739  
Riemann representation method in viscoelasticity extended to functional partial differential equations of hyperbolic type 21 p3829 A66-38941  
Differential inequality theorems applied to hyperbolic differential equation, discussing Riemann functions and sufficient conditions for characteristic and Cauchy problems for quasi-linear Blanchi equation 21 p3757 A66-39232  
Frequency variations of piezoelectric circuit parameters of junction transistor, noting expansion of hyperbolic function into Taylor series 22 p3873 A66-39815  
Cauchy and boundary value problems for second-order hyperbolic equations degenerating within and on boundary of region 22 p3939 A66-40189  
Multidimensional hyperbolic equations of any order with discontinuous coefficients, noting conditions for analytic or continuous solution 22 p3939 A66-40444  
Progressing wave formalism method of obtaining approximate solution of suitable problems of wave equation and other linear hyperbolic partial differential equations 23 p4036 A66-41055  
Weak and strict solution existence theorem for initial-boundary value problem for nonlinear hyperbolic equation in relativistic quantum mechanics 24 p4237 A66-42829
- HYPERBOLIC ORBIT**  
Axisymmetric cluster of hyperbolic trajectories of material particle near planet, for space navigation application 02 p0289 A66-11652  
Powered manned Mars flyby departing Earth near minimum velocity point, considering required maneuver within Mars influence for valid return legs 11 p1768 A66-22455  
Optimum energy transfer from hyperbolic orbit in Newtonian central force field in absence of transfer time limitations 11 p1774 A66-23035  
Onboard guidance scheme as backup to Earth-based orbit determination techniques and for approach navigation and orbit correction in planetary capture maneuver 13 p2123 A66-25253  
Hyperbolic comets and Oort hypothesis of cometary cloud, discussing probability distribution and existence of interstellar source 17 p3013 A66-33406  
Single-impulse transition in Newtonian central force field from hyperbolic to elliptical orbit in case of radial impulse 19 p3455 A66-35276  
Computer iteration scheme for calculating arbitrary hyperbolic transfer orbit in field of attracting center, based on Gauss equations 19 p3455 A66-35278

## HYPERBOLIC REENTRY

- Reentry flight corridor depth reduction result of inadequate flight data hyperbolic speeds, noting overshoot limit and inverted attitude [AIAA PAPER 65-19] 12 p1952 A66-24619  
Optimum entry vehicle design using aerobreaking for manned Earth entry hyperbolic speeds, examining blunted conic and tetrahedral configurations [AIAA PAPER 66-489] 18 p3239 A66-33619  
Aerothermodynamic characteristics of Apollo command module at hyperbolic Earth entry velocities [AIAA PAPER 65-491] 20 p3664 A66-38119
- HYPERBOLIC SPACE**  
Aberration, Thomas precession and for relativistic collision invariants Lobachevsky or hyperbolic space simplified relativistic kinematics 03 p0392 A66-12619
- HYPERBOLIC SYSTEM**  
Bergeron and first approximation method for solving problems of unsteady fluid flow in pipeline 04 p0511 A66-14119  
Flight testing of FAA-Lear Siegler receiver/converter airborne system with Loran-C hyperbolic navigation system 07 p1069 A66-17719  
Existence and uniqueness of piecewise continuous solution to two-dimensional linear first order hyperbolic system with discontinuous coefficients 07 p1060 A66-18119  
Omega location and satellite reporting for worldwide observation and navigation systems 08 p1252 A66-19519  
Convergence of difference approximation in rectangular grids for general first-order quasi-linear hyperbolic initial value problem in two independent variables 20 p3590 A66-37519  
DIVIC /digital variable increment computer/ for solving hyperbolic navigation problems, examining computational algorithms 22 p3945 A66-40319  
Optimal regulation of linear symmetric hyperbolic systems of partial differential equations with finite dimensional control 22 p3884 A66-40519  
General theory of mixed problems for two-dimensional hyperbolic system of any order with continuous and discontinuous coefficients 24 p4230 A66-42219
- HYPERCAPNIA**  
Effects of cold and abnormal atmosphere, discussing tolerance limits to hypercapnia, anoxia induced hypothermia and hypoxia 04 p0464 A66-14019
- HYPERFINE STRUCTURE**  
Electron paramagnetic resonance in biradicals of hydrazine series, discussing structural changes during transition from mono- to biradical state 04 p0572 A66-13819  
Donor concentration in semiconductor which hyperfine structure of spin absorption lines vanishes 04 p0564 A66-14219  
Polarization of nuclear spins in semiconductor in strong electric and magnetic fields, noting relaxation mechanisms, and hyperfine relaxation frequency 04 p0567 A66-14319  
Constants A and B of cesium superfluid structure calculated from magnetic sublevel intersections 05 p0741 A66-15819  
Temperature and donor concentration width of electron spin resonance line center of hyperfine spectrum for phosphorus- and arsenic-doped silicon 08 p1270 A66-19113  
Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 12 p1930 A66-24419  
7P terms of excited chromium configurations examined, using level crossing and double resonance spectroscopy noting core polarization 13 p2135 A66-26219  
Values for contribution of core polarization to hyperfine structure of excited states of chromium compared theoretically and experimentally, extracting core contribution to magnetic field 13 p2135 A66-26219  
Polarization of nuclear spins in semiconductor in strong electric and magnetic fields, noting relaxation mechanisms, and hyperfine relaxation frequency 14 p2367 A66-28219  
Energy from hydrogen molecule interaction with magnetic field and from hyperfine interaction expressed as products

- irreducible spherical  
sensors 15 p2548 A66-29806
- Fine and hyperfine structure of term in 3p level of lithium studied by level-crossing spectroscopy technique, determining fine structure separation  
value 19 p3443 A66-35989
- Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 20 p3620 A66-37693
- Hyperfine spectrum of xenon in 3.5 mm maser transition noting experimental setup, gain profiles for various input power levels and structural properties 21 p3746 A66-38763
- Anomalous circular polarization of hydroxyl radical 18-cm radiation from cosmic sources 24 p4272 A66-43188
- HYPERGEOMETRIC FUNCTION**
- Rational approximations to generalized hypergeometric functions and error function proven to converge to desired limit 01 p0093 A66-10384
- Atomic integral obtained with magnetic dipole-dipole operator in form of finite sum of integrals over hypergeometric functions 11 p1739 A66-22887
- Hypergeometric mean value, showing expression for mean of order t of series of positive values with positive weights as limiting case 11 p1722 A66-22953
- Analytic hyperfunction solution of elliptic equation 13 p2117 A66-25473
- Generalized heat equation solution expansion in terms of radial heat polynomials, Appel transforms and Laguerre polynomials 13 p2118 A66-25793
- Autocorrelation and hypergeometric function applied in evaluating response of nonlinearities to Gaussian noise 14 p2267 A66-27726
- Fourier series of Gegenbauer function, examining convergence characteristics 18 p3126 A66-33696
- Exact analytic solution, in confluent hypergeometric functions, to problem of stability of conical shell under uniformly distributed longitudinal compressive forces 18 p3252 A66-33709
- HYPERGOLIC PROPELLANT**
- Flow rate distribution and mixing ratio of two impinging jets in simulation of bipropellant liquid rocket system, using hypergolic propellants 02 p0278 A66-11590
- Hypergolic ignition of light hydrocarbon fuels with fluorine-oxygen /flox/ mixtures [AIAA PAPER WSCI-65-23] 05 p0743 A66-15147
- Hypergolic ignition and restart in Plexiglas window hybrid rocket motor, including oxidizer flow transient, flame propagation, chamber pressurization rates, etc [AIAA PAPER 66-69] 07 p1111 A66-18452
- Flame spreading velocity over surface of igniting solid rocket propellants as function of atmospheric pressure and chemistry and specimen surface condition [AIAA PAPER 66-68] 08 p1317 A66-18949
- Tagaform synthetic hypergolic fuel for hybrid rockets, discussing polymerization, ignition delay, etc 11 p1760 A66-22249
- Hybrid rocket motor HR 4, using fuming nitric acid as oxidizer and mixture of polyesters and acrylic plastics as other solid propellant 12 p1935 A66-23867
- Swedish hypergolic propellant for rocket motors consisting of fuming nitric acid as oxidizer and condensation product of liquid aromatic amines and aldehydes as solid fuel 14 p2374 A66-27566
- Flox-light hydrocarbon combinations desirable as liquid rocket propellants due to high specific impulse, hypergolicity and cooling properties [AIAA PAPER 66-581] 18 p3159 A66-33809
- Stability of various plastics toward hypergolic rocket fuel components aeroline and nitrogen tetroxide 18 p3125 A66-35242
- Hypergolic liquid propellant combinations, noting effect of feed pressure, injection tube diameter and fluid free path on ignition process in combustion chamber 20 p3626 A66-38140
- Hypergolic ignition of composite solid propellants, examining oxidizer concentration, heat flux and exothermic reactions 22 p3969 A66-39871
- Low pressure low temperature ignition of hypergolic propellants, particularly hydrazine-nitrogen tetroxide systems, in space environment simulator and conclusions on gas phase reactions 22 p3892 A66-40237
- HYPERON**
- K meson and hyperon production cross sections, discussing primary energy dependence and upper limit determination 07 p1113 A66-17539
- Dynamics and symmetries of nonleptonic hyperon decay based on assumptions of parity-violating and parity-conserving amplitudes and SU symmetry 20 p3606 A66-38292
- HYPEROXIA**
- Preference of mice for oxygen-poor atmosphere after removal from 60 and 90 percent oxygen atmospheres 15 p2439 A66-29489
- HYPERPLANE**
- Invariant hyperplanes for linear dynamical systems, discussing geometric properties and relation to controllability and observability 12 p1849 A66-24256
- HYPERSONIC AIRCRAFT**
- Turboramjet-powered hypersonic aircraft evaluated for cruise and boost mission for orbital launching [AIAA PAPER 65-759] 03 p0318 A66-12553
- Hypersonic aircraft and aerodynamic aspects for global transport operation noting shock waves, Mach number and gas dynamics 04 p0453 A66-13504
- Engines for supersonic and hypersonic aircraft to be used in next decade, noting suitability for cruise aircraft or boosters 09 p1435 A66-20668
- Propulsion problems for engine of 5000 mph aircraft noting ramjet, cooling, intake, nozzle, etc 09 p1435 A66-20669
- Response of hypersonic aircraft to abrupt control displacements, determining vehicle characteristics, design and operational parameters 09 p1330 A66-20739
- Boundary layer effect on lift and drag characteristics of hypersonic lifting bodies 10 p1480 A66-21409
- Stabilizing methods for hypersonic aircraft, noting effect of aircraft characteristic parameters on magnitude of balancing coefficients of lifting force 14 p2223 A66-27680
- Tank design, optimization program and testing for effect on storage penalties associated with liquid hydrogen for hypersonic aircraft 14 p2394 A66-28026
- Refractory ceramics for air breathing engine for Mach 7 aircraft, noting zirconia properties 16 p2790 A66-30257
- High performance aerodynamic vehicle design, noting configuration variables, optimum performance parameters, vehicle force characteristics, optimization of hypersonic aircraft performance, etc [AIAA PAPER 66-486] 16 p2635 A66-31476
- Turboramjet powered hypersonic aircraft evaluated for cruise and boost mission for orbital launching [AIAA PAPER 65-759] 23 p4015 A66-40974
- Hypersonic transport /HST/ evaluation noting problems in aerodynamics, economics, structures, propulsion systems, etc 24 p4159 A66-42236
- Aircraft flying up to 6000 miles at Mach numbers up to 8, noting problems in aerodynamics, propulsion, structural weight, cooling, etc 24 p4157 A66-42237
- Hypersonic transport technology, considering designs for Mach numbers up to 14, altitude up to 140,000 ft and 150 passengers 24 p4159 A66-42238
- Stability, control, navigation, guidance and air traffic control of hypersonic vehicles noting inertial technology, flight planning and optimal control 24 p4235 A66-42239
- HYPERSONIC BOUNDARY LAYER**
- Introductory book on hypersonic aerodynamics covering continuum flow of inviscid nonheat-conducting perfect gas and real gas, viscous and low density effects in hypersonic flow 02 p0176 A66-11875
- Laminar boundary layer transition on highly cooled 10 degree cone in hypersonic flow, using heat gauges to study turbulent burst propagation 03 p0315 A66-12788
- Controlled three-dimensional roughness effect on hypersonic laminar boundary layer transition
- [AIAA PAPER 66-26] 06 p0804 A66-17092
- NAE helium hypersonic wind tunnel for hypersonic flight simulation and boundary layer studies 07 p1018 A66-18050
- Asymmetric hypersonic blunt body problem of determining two-dimensional steady rotational flow field between profile and detached shock 07 p0982 A66-18132
- Species diffusion in frozen hypersonic boundary layer with Falkner-Skan velocity profiles, where surface is linear, given as Mellin transform, constructing series and asymptotic expansion of surface concentration 13 p2060 A66-25158
- Hypersonic viscous interaction on very slender body of revolution having thick boundary layer and surface mass transfer 13 p1992 A66-26447
- Analytical methods for studying turbulent boundary layers at high Mach numbers, comparing theory and experiments for flat plate flow, predicting boundary layer properties around hypersonic configurations 14 p2217 A66-27098
- Laminar boundary layer transition in hypersonic shock tunnel of cone, noting effect of high Mach numbers and tip surface roughness, using surface heat transfer gauges [AIAA PAPER 66-494] 17 p2841 A66-32772
- Hypersonic boundary layer separation and expansion at shoulder of blunt based body 21 p3693 A66-38683
- Bluntness and boundary layer displacement effects on air breathing engine hypersonic inlet flow fields [AIAA PAPER 65-617] 23 p4007 A66-41109
- HYPERSONIC COMBUSTION**
- Impact-induced combustion in hypersonic ramjet engines, determining hypersonic fuel-air mixing from hydrogen concentration at Laval nozzle outlet 10 p1591 A66-21359
- Model determination of effects of injecting and mixing fuel in inlet diffuser of two-shock inlet hypersonic ramjet or scramjet [AIAA PAPER 66-648] 24 p4261 A66-42641
- HYPERSONIC FLIGHT**
- Base flow and near wake problem at very low Reynolds numbers, using general solution of Stokes equation of motion for two-dimensional and axisymmetric flows 04 p0456 A66-14469
- Supersonic combustion ramjet engine /scramjet/ for hypersonic flight noting fuel injection, chemical kinetics, combustor cooling, mixing processes and measurements 05 p0745 A66-15272
- High temperature materials for hypersonic air-breathing engines, noting usefulness of coated refractory metals 09 p1435 A66-20670
- Scramjet performance at high hypersonic speeds noting integration with waverider vehicle, hydrogen fuel, drag forces effect, test program, etc 09 p1435 A66-20671
- Ablative materials for thermal protection and minimum mass transfer of aircraft flying at hypersonic speeds 10 p1620 A66-21404
- X-15 as tool for progress in hypersonic flight, examining problems of transmitting and reducing wealth of telemetry data 16 p2634 A66-31285
- HYPERSONIC FLOW**
- Hypersonic flow field about slender cone derived from heat-pressure-wake survey 01 p0007 A66-10618
- Density distribution before sphere in low density hypersonic gas flow measured with electron beam densitometer 01 p0059 A66-10635
- Introductory book on hypersonic aerodynamics covering continuum flow of inviscid nonheat-conducting perfect gas and real gas, viscous and low density effects in hypersonic flow 02 p0176 A66-11875
- Hypersonic flow separation over simple geometries and aerodynamic controls, noting pressure gradients and heating-rate distributions [AIAA PAPER 65-753] 03 p0314 A66-12587
- Rarefied hypersonic flow at high Mach numbers and stagnation temperatures encountered by ballistic missiles and satellites, noting air plasma with magnetic field [AIAA PAPER 65-754] 03 p0354 A66-12588
- Combustion and sublimation in aerothermochemical interaction between

dissociated air stream and graphite surface in hypersonic laminar viscous flow [AIAA PAPER 65-42] 03 p0444 A66-12797

Dissociation or ionization effects of air on inviscid hypersonic flow past circular cone with attached shock wave 03 p0316 A66-12928

Numerical solutions for inviscid nitrogen gas flows over circular cylinder where nonequilibrium prevails through nose region 03 p0317 A66-13211

Gun-shock tunnel for hypersonic aerodynamics experiments 03 p0353 A66-13213

Laboratory test methods for hypersonic flow simulation past reentry vehicle, ICBM and meteorite 04 p0506 A66-13502

Supersonic and hypersonic flow fields around plane and axisymmetric bodies and inlets obtained by nonlinear characteristics method 04 p0454 A66-13519

Wing-fuselage interaction effects on static and dynamic stability at low and moderate hypersonic Mach numbers by small-disturbance approximation to shock-expansion method [AIAA PAPER 65-719] 04 p0454 A66-13552

Hypersonic airflow at alpha angle of attack about flat wing with shock wave on upstream side attached 04 p0454 A66-13572

Extremal problems in aerodynamics, discussing mathematical and physical models for optimum aerodynamic shape 04 p0455 A66-13995

Shrello approximation used to derive formulas for moment characteristics of axisymmetric bodies rotating in hypersonic free molecular flow 04 p0456 A66-14155

Effect of interaction of dissipating and isentropic currents on flow at base region of bodies moving with hypersonic velocity 05 p0607 A66-15314

Heat transfer and equilibrium temperature on flat plate in region of strong interaction in hypersonic flow 05 p0607 A66-15465

Heat transfer to blunt bodies with, catalytic and noncatalytic surfaces in nonequilibrium dissociated hypersonic flow [AIAA PAPER 66-3] 05 p0609 A66-15850

Longitudinal and transversal contours minimizing drag of slender homothetic body in hypersonic flow with Newtonian pressure distribution and constant skin-friction coefficient 06 p0802 A66-16911

Flow field study of shock wave and boundary layer development at leading edge of sharp flat plate in rarefied hypersonic flow [AIAA PAPER 66-31] 06 p0803 A66-17082

Atmospheric argon effect on hypersonic stagnation point convective heat transfer, using arc-heated shock tube simulating flight velocities up to 34,000 fps [AIAA PAPER 66-29] 07 p1153 A66-17891

Hypersonic perfect gas flow around slightly blunted plate, discussing analogy between asymptotic shock behavior and explosion theory 07 p0981 A66-18109

Heat transfer and stability of laminar hypersonic separated flow around annular cavity conical model 07 p0981 A66-18117

Inner and outer expansions method applied to source flow model involving viscous effects in hypersonic axisymmetric free jets at large Reynolds numbers 07 p0982 A66-18122

Hypersonic gas flow near blunt body, examining entropy effects 07 p0983 A66-18140

Hypersonic gas flow past axisymmetric slender blunt body by Chernyi approximate method 07 p0983 A66-18142

Hypersonic collisionless source flow analysis of comet dust tail model, assuming composition consists of small dust particles acted upon by solar radiation pressure [AIAA PAPER 66-32] 08 p1289 A66-18948

Pressure distribution and heat transfer for laminar boundary layer flow over highly swept blunt delta wings in hypersonic free stream [AIAA PAPER 66-130] 08 p1162 A66-18953

Shock tunnel heat transfer measurement and hypersonic viscous flow over pointed cones, particularly viscous-layer regime at low Reynolds numbers [AIAA PAPER 66-34] 08 p1163 A66-18957

Inviscid supersonic nozzle flow of ideal dissociating gas, sudden freezing,

equilibrium-recombination mechanism and velocity distribution [AIAA PAPER 66-1] 08 p1163 A66-18983

Exact numerical solution of time-dependent compressible Navier-Stokes equations describing transient compressible viscous heat-conducting flow [AIAA PAPER 66-30] 08 p1207 A66-18986

Aerodynamic properties of simple bodies in hypersonic transition regime 08 p1164 A66-19132

Angle of attack, leading edge sweep and thicknesses effects on hypersonic flow field of slender delta wing 08 p1164 A66-19135

Shock wave shapes on cold flat plate in rarefied hypersonic flow tunnel measured by optical-flow techniques 08 p1165 A66-19165

Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas 08 p1165 A66-19484

Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas 08 p1165 A66-19571

Equations of inviscid flow of perfect gas over cusped concave bodies, noting dependency of shock wave slope on infinite Mach number 08 p1166 A66-19818

Conservation laws involving mass, momentum and energy applied to asymptotic properties of hypersonic flow 09 p1327 A66-20266

Hypersonic flow of air past circular cylinder with nonequilibrium oxygen dissociation, including dissociation of free stream 10 p1479 A66-21375

Newtonian pressure law and minimum resistance body in hypersonic aerodynamics 11 p1688 A66-22510

Drag minimization in slender bodies of revolution in hypersonic flow with Newtonian pressure distribution 11 p1631 A66-22512

Optimum slender body with variable skin friction coefficient, noting minimal drag design for hypersonic flow under Newtonian pressure distribution 11 p1631 A66-22513

Minimum pressure drag for nonslender hypersonic body calculated, using normalized coordinates 11 p1631 A66-22515

Shape of nonslender body of revolution for minimum total drag in viscous hypersonic flow at Newtonian pressure distribution and constant friction coefficient 11 p1631 A66-22516

Transversal contour of minimum pressure drag for body with noncircular cross section 11 p1631 A66-22517

Starlike solutions of optimum transversal contour problem treated by Young inequality 11 p1631 A66-22519

Total drag minimization for three-dimensional body in Newtonian flow, assuming two planes of symmetry and constant skin-friction coefficient 11 p1632 A66-22520

Slender shapes of minimum pressure drag in hypersonic inviscid flow characterized by Newton-Busemann law 11 p1632 A66-22522

Nonslender shapes of minimum pressure drag in flow characterized by Newton-Busemann pressure law 11 p1632 A66-22523

Expansion tube for interferometric observation of hypersonic flow fields 11 p1684 A66-22830

Arc-driven vortex type heater-accelerator for possible use in reentry flight simulation 11 p1684 A66-22832

Performance of simple diffusers of fixed geometry in flow regimes with viscous and compressibility influence involving free-jet test sections, conical and contoured nozzles and gas flows at high Mach numbers 11 p1686 A66-22844

Molecular collision effect on transitional drag on cylinder traversing rarefied gas at hypersonic Mach numbers, discussing departure from free flow 11 p1632 A66-22920

Transition from near free molecular flow at leading edge of flat plate in rarefied hypersonic flow to continuum boundary layer flow downstream 11 p1633 A66-22925

Heat transfer and pressure data extended from classical thin boundary layer regime to near-free-molecule flow in study of low density effects in hypersonic wedge flows 11 p1633 A66-22928

Flow over sharp and blunt flat plates zero angle of attack in hypersonic shock tunnel, measuring surface skin friction, heat transfer, static pressure and shock layer pitot pressure 11 p1633 A66-22925

Pressure distribution and low density effects on sharp flat plates and sharp blunt cones measured in hypersonic wind tunnel 11 p1634 A66-22928

Flat plate in hypersonic flow analysis shock tunnel, obtaining surface pressure using electron beam densitometer 11 p1634 A66-22928

Hypersonic rarefied gas flow in shock ducts, measuring wall static pressure and stream total pressure distributions 11 p1634 A66-22928

Modified Newtonian-Prandtl Meyer approximation technique to determine pressure distribution over blunt body 12 p1796 A66-23606

Inviscid hypersonic flow over compressed side of delta wing of moderate aspect ratio 12 p1796 A66-23606

Steady state expansion of gas into vacuum considering continuum inviscid analysis collision-free analysis, supersonic flow at hypersonic limits, etc, for spherical and cylindrical symmetry 12 p1860 A66-23606

Simplified Navier-Stokes equations for steady hypersonic viscous flow past slender shapes with sharp leading edges 12 p1796 A66-23606

Langmuir probe measurements in hypersonic plasma flow, evaluating properties of plasma jet wind tunnel electron temperature and plasma density 12 p1920 A66-23806

Hypersonic flow of equilibrium dissociated air around sphere numerically analyzed Lunev method 12 p1796 A66-23806

Radiative heat transfer near stagnation point of blunt body in hypersonic flow noting effect on convective heat transfer 12 p1978 A66-24206

Boundary value problems in plane axisymmetric hypersonic flow of viscous ideal gas past blunt body 12 p1797 A66-24306

Hypersonic flow of inviscid gas past cone obtaining solution for entire flow including turbulent boundary layer and velocity field using zero approximation method 12 p1798 A66-24406

Aerodynamic characteristics of rectangular plates in hypersonic flow of rarefied gas differing in aspect ratio, thickness and angles of attack, determining maximum lift drag ratio 12 p1798 A66-24406

Hypersonic or supersonic flow of gas past yawing delta wing with stall fence 12 p1799 A66-24406

Properties of compressible boundary layer with heat transfer and arbitrary pressure gradients calculated, using integral equation and correlation concept for application to hypersonic flows 12 p1865 A66-24506

Laminar hypersonic flow past sphere based on constant-density approximation, solving Navier-Stokes equations and comparing with values of shock Reynolds number 12 p1800 A66-24906

Fundamental phenomena in hypersonic flow - Conference, Buffalo, June 1966 13 p2060 A66-25106

Asymptotic behavior of two-dimensional inviscid flow at infinite Mach number past power-law body, considering flow over flat plate and blunt body followed by cylindrical afterbody 13 p2060 A66-25106

Chemical reactions in gas flows including relation between dissociation and recombination kinetics, thermal decomposition of hydrazine, kinetics of high temperature air, etc, analyzed, using shock tube 13 p2016 A66-25106

Langmuir probe to measure stagnation region shock layer ionization distribution under nonequilibrium hypersonic flow conditions [AIAA PAPER 66-167] 13 p2138 A66-25106

Hypersonic flow field about slender cone derived from heat-pressure-wake survey 13 p1990 A66-25106

Distribution, as function of azimuth, static pressure and mass and heat transfer coefficients for case of interaction between detached shock wave on cylinder nose and hypersonic flow and turbulent boundary

- layer along wall 13 p1991 A66-25464  
 Inviscid hypersonic flow of nonuniform  
 incident stream over wedge, noting vorticity  
 effects, perturbation equations and boundary  
 conditions 13 p1992 A66-26665  
 Rotational flow properties in ideal inviscid  
 near layer about arbitrarily shaped blunt-  
 based body in hypersonic  
 flow 13 p1993 A66-26727  
 First-collision process at sharp leading  
 edge of flat plate aligned with hypersonic  
 free stream 13 p1993 A66-26728  
 Shock bounded self-similar flows over  
 slender bodies with volumetric mass,  
 momentum and energy 13 p2071 A66-26731  
 Addition 13 p2071 A66-26731  
 Laminar separated hypersonic flow over  
 spiked bodies in gun tunnel for analyzing  
 parameters influencing heat transfer rates  
 in reattachment region 14 p2218 A66-27403  
 Mach number, Reynolds number and  
 boundary layer trip devices effect on base  
 pressure 14 p2219 A66-27443  
 Streamline flow of ideal stable gas with  
 constant ratio of specific heats around  
 conical body with arbitrary taper,  
 determining flow velocity  
 components 14 p2220 A66-27679  
 Plane or axisymmetric hypersonic ideal gas  
 flow in divergent nozzle with parabolic wall  
 shape 14 p2221 A66-28056  
 MHD equations applied to hypersonic flow  
 of solar plasma around magnetosphere and  
 approximation with simpler equations of gas  
 dynamics 15 p2483 A66-28815  
 Variation problem solution in hypersonic  
 gas dynamics, noting intake portion  
 construction for body with minimum  
 resistance for limited length and flat  
 end 15 p2477 A66-28956  
 Conditions at head shock wave in viscous  
 hypersonic flow past blunt body for study  
 of boundary layer 15 p2423 A66-28960  
 Separation 15 p2423 A66-28960  
 Flow pattern and heat transfer distribution  
 in regions of adverse pressure gradient and

 at Mach 10 airflow 15 p2424 A66-29271  
 Unsteady flow during starting process in  
 hypersonic nozzle, discussing initial pressure  
 effect and behavior of secondary shock  
 wave 15 p2425 A66-29684  
 Boltzmann equation for Pitot tube  
 problem, using distribution function,  
 deriving equations for rarefied gas flow in  
 impact tube under hypersonic and adiabatic  
 conditions 15 p2481 A66-29739  
 Book on dynamics and thermodynamics of  
 gases, emphasizing modern theory of gas  
 behavior at hypersonic velocities and  
 extremely high altitudes 15 p2482 A66-29914  
 Terrestrial origin of tektites, noting  
 possible connection with cometary collision  
 and evidence of lunar origin for  
 some 16 p2802 A66-30926  
 Stagnation region of solid body of  
 revolution in low density hypersonic flow  
 with low Reynolds 16 p2629 A66-31033  
 Stagnation region for body of revolution in  
 analyzing temperature, velocity and atom  
 hypersonic flow with low Reynolds number,  
 concentration under aerodynamic  
 heating 16 p2686 A66-31037  
 Skin friction methods compared for  
 problem of turbulent compressible boundary  
 layer on flat plate at hypersonic Mach  
 numbers 16 p2686 A66-31118  
 Approximation of Chaplygin plane motion  
 equations of gas flow at high supersonic  
 velocities 16 p2688 A66-31304  
 Hypersonic flow past blunt body near  
 stagnation point examined, noting surface  
 layer, characterized by increased density  
 and decreased entropy of 16 p2630 A66-31305  
 Hypersonic laminar boundary layer flow of  
 equilibrium dissociating 16 p2630 A66-31306  
 Three-dimensional boundary layer flow  
 over windward side of flat delta wing in  
 hypersonic flow at moderate angle of attack,  
 examining viscous-inviscid interaction  
 [AIAA PAPER 66-492] 16 p2631 A66-31477  
 Hypersonic source flow effect on shock  
 shape and surface pressure of sharp-nosed  
 slender bodies 16 p2632 A66-31592  
 Hypersonic strong-interaction similarity  
 solutions for viscous compressible flow past  
 plate analyzed using Navier-Stokes  
 equations 16 p2632 A66-31655  
 Inviscid hypersonic flow past circular cone  
 at finite angle of attack with attached shock  
 wave in presence of dissociation air behind  
 shock wave 17 p2837 A66-32033  
 Pressure distribution, skin friction and  
 heat transfer for sharp- and blunt-nosed  
 slender bodies in hypersonic air  
 flow 17 p2837 A66-32070  
 Source type hypersonic free stream effects  
 on flow field about axisymmetric cone,  
 obtaining properties in shock layer,  
 boundary layer, pressure gradient,  
 etc 17 p2837 A66-32080  
 Base, recompression and laminar near wake  
 regions of cones in hypersonic  
 flow 17 p2838 A66-32438  
 Static and dynamic stability derivatives of  
 sharp wedges in viscous laminar hypersonic  
 flow determined, using approximate  
 pressure relations 17 p2839 A66-32444  
 Hypersonic self-similarity of barrel shock  
 in source-type free jets at high pressure  
 ratio 17 p2839 A66-32468  
 Gap size effect on pressure and  
 aerodynamic heating over flap of blunt delta  
 wing in hypersonic flow  
 [AIAA PAPER 66-408] 17 p2840 A66-32747  
 Laminar separation in supersonic and  
 hypersonic flow analyzed in gun tunnel,  
 noting concept of incipient separation and  
 free interaction principle  
 [AIAA PAPER 66-455] 17 p2910 A66-32761  
 Head wave of frictionless flow of real gas  
 past positioned circular cone for small or  
 zero angles of attack 17 p2842 A66-33169  
 Implicit finite difference method applied  
 to plane hypersonic flow over blunt circular  
 cylinder 17 p2842 A66-33170  
 Extremization of products of powers of  
 functionals as applied to flat top wings for  
 maximizing lift drag ratio in hypersonic  
 flow 17 p2842 A66-33242  
 Hypersonic argon beam flow past  
 cylindrical thermal nozzle 17 p2974 A66-33287  
 Hypersonic low-density free-stream viscous-  
 inviscid interaction along intersection of two  
 planes 17 p2916 A66-33480  
 Inviscid hypersonic flow of perfect gas  
 past symmetric two-dimensional and  
 axisymmetric blunt bodies at angle of attack  
 [AIAA PAPER 66-411] 18 p3045 A66-33636  
 Nose bluntness and angle of attack effects  
 on hypersonic flow, noting shock wave  
 deflection decrease of minimum possible  
 shock angle, varying specific heat ratio,  
 convective heating, boundary layer  
 transition, etc 18 p3046 A66-33639  
 [AIAA PAPER 66-414] 18 p3046 A66-33639  
 Lift, drag and static pitching  
 measurements on lifting bodies at simulated  
 hypersonic cold-wall conditions  
 [AIAA PAPER 66-467] 18 p3046 A66-33651  
 Laminar, transitional and turbulent  
 boundary layer flows with adverse pressure  
 gradient on axisymmetric blunted conical  
 flared body at Mach 10  
 [AIAA PAPER 66-493] 18 p3047 A66-33658  
 Average pressure and skin friction on  
 slender two-dimensional wings in hypersonic  
 flow, taking into account displacement  
 effects of boundary layer 18 p3048 A66-33823  
 Approximation method for compressible  
 laminar heat transfer to blunt axisymmetric  
 bodies in high speed flow 18 p3048 A66-33824  
 Shock wave boundary layer interactions  
 and shear flow regimes in hypersonic inlet  
 flows 18 p3049 A66-34447  
 [AIAA PAPER 66-606] 18 p3049 A66-34447  
 Diffusion of chemically frozen partially  
 dissociated gas over surfaces with  
 discontinuous catalytic 18 p3266 A66-34928  
 Binary flutter of wedges in hypersonic  
 flow according to piston theory and  
 McIntosh derivatives 19 p3473 A66-35625  
 Hall effect influence on steady hypersonic  
 flow of inviscid compressible gas past  
 wedge 19 p3275 A66-35736  
 Optimum form for hypersonic profile with  
 minimum drag for given bending strength  
 solved by variational 20 p3491 A66-36922  
 Hypersonic plasma generator for reentry  
 vehicles with arc tunnel experimental data  
 and analysis of nonequilibrium chemical  
 reaction between cesium atoms and ionized  
 air species 20 p3497 A66-37158  
 Book on transonic and hypersonic flow  
 theory covering motion and shock equations,  
 application of Newtonian theory,  
 temperature effect, behavior of minimum  
 drag bodies, etc 20 p3492 A66-37495  
 Localized convection coefficient for  
 hypersonic separation line along delta wing  
 leading edge calculated, using Mangler and  
 Stewartson transformation 20 p3492 A66-37818  
 Inviscid hypersonic nonequilibrium flow of  
 three-component gas past circular cone,  
 using exact reaction-rate equations to  
 correct solution first obtained from  
 approximate equations 21 p3693 A66-38711  
 Stability derivatives of sharp cones  
 performing pitching oscillations in viscous  
 hypersonic flow 21 p3693 A66-38723  
 Conical MHD shock wave in  
 axisymmetric hypersonic viscous-layer  
 flow 21 p3727 A66-39185  
 Dissociation of hypersonic airflow past  
 circular cylinder at zero angle of  
 incidence 21 p3695 A66-39230  
 Oblique shock wave formal determination  
 of aerodynamic forces and pressure  
 distribution on delta wings in supersonic or  
 moderately hypersonic  
 flow 21 p3695 A66-39602  
 Hypersonic flow, discussing heat effect on  
 flow parameters, shock and motion  
 equations, drag increase,  
 etc 22 p3897 A66-39699  
 Hypersonic gas flow past blunt body  
 problem solved by integral correlation  
 method, taking into account radiation  
 effects and gas dynamic parameter  
 distribution in shock wave  
 layer 22 p3897 A66-39902  
 Model of laminar hypersonic base flow  
 region of slender bodies, introducing base  
 height and Reynolds number variation of  
 base pressure ratio 22 p3843 A66-40345  
 Flow field study of shock wave and  
 boundary layer development at leading edge  
 of sharp flat plate in rarefied hypersonic  
 flow 22 p3844 A66-40349  
 [AIAA PAPER 66-31] 22 p3844 A66-40349  
 Probe design for mass flux, stagnation  
 point heat transfer and total enthalpy  
 measurements of high temperature  
 hypersonic gas flows  
 [AIAA PAPER 66-750] 22 p3919 A66-40635  
 Shock impingement on blunt body in  
 hypersonic flow, noting alteration of flow  
 and local heat transfer rate near  
 impingement point 22 p3846 A66-40641  
 [AIAA PAPER 66-756] 22 p3846 A66-40641  
 Reentry simulation systems using MHD  
 accelerators, technical difficulties,  
 performance and efficiency  
 [ICAS PAPER 66-39] 22 p3896 A66-40661  
 Aerodynamic analysis of complex shapes in  
 hypersonic flow, using digital computer  
 [ICAS PAPER 66-25] 22 p3847 A66-40665  
 Surface catalytic and Reynolds number  
 effects on nonequilibrium hypersonic  
 stagnation flow of air or diatomic gas on  
 highly cooled blunt body 22 p3847 A66-40919  
 Moment method in hypersonic flow of  
 rarefied gas around bodies of arbitrary  
 shape 23 p4054 A66-41357  
 Similarity laws in hypersonic flow of real  
 gas around thin blunted bodies, particularly  
 bodies with rough lateral  
 surface 23 p4009 A66-41720  
 Heat transfer to blunt bodies with catalytic  
 and noncatalytic surfaces in nonequilibrium  
 dissociated hypersonic flow  
 [AIAA PAPER 66-3] 23 p4150 A66-41878  
 Perturbation analysis of radiative cooling  
 in shock layers and radiative heat transfer  
 effects on hypersonic flow over wedge and  
 circular cone 23 p4011 A66-41882  
 Shock wave transport effects on  
 hypersonic leading edge flow past sharp  
 plate, discussing Rankine-Hugoniot  
 relations 23 p4058 A66-41910  
 Flow visualization via afterglow produced  
 in pure low temperature nitrogen and air by  
 electron beam projection 23 p4058 A66-41911  
 Optimization of lift-drag ratio of power law  
 half-bodies in hypersonic viscous flows,  
 considering interrelation between body  
 shape and skin friction 23 p4012 A66-41915  
 Diameter and location of wake neck and  
 trailing wake shock for pointed and blunt

slender hypersonic cones 23 p4012 A66-41919  
 Hypersonic small disturbance theory of unsteady inviscid flow past thin wedge oscillating in pitch motion and effects of wave reflections 23 p4012 A66-41925  
 Inviscid flow near stagnation point of blunt body in hypersonic stream, using thin shock layer theory with very small density ratio 23 p4013 A66-42013  
 Inviscid hypersonic flow past flat wings at large angle of attack analyzed, using homogeneous layer concept of shock layer theory 23 p4013 A66-42014  
 Series truncation applied to hypersonic flow problems by treating elliptic partial differential equation as parabolic or hyperbolic 23 p4014 A66-42060  
 Functional interdependence of four distinctly different parameters represented by gamma in study of thermodynamical relations for shock waves 24 p4193 A66-42270  
 Analytical method for studying pattern of flow from nozzle into vacuum used to calculate plume shape for rocket exhausting into hypersonic stream 24 p4158 A66-42790  
 Reentry and recovery of space vehicles in reliable shock free landings, using modified helicopter rotor for hypersonic flow and thermal problems 24 p4284 A66-43073

**HYPERSONIC GLIDER**  
 Hypersonic wind tunnel measurements to Mach 17 of aerodynamic characteristics of family of hypersonic gliders [ONERA TP 331] 11 p1635 A66-23199

**HYPERSONIC HEAT TRANSFER**  
 Spectral and total radiation studies of bodies traveling at hypersonic speed in simulated Martian and Venusian atmospheres [AIAA PAPER 65-116] 03 p0315 A66-12783  
 Aerodynamic heating of vehicles entering Earth atmosphere at hypersonic speed, noting blunt body concept, radiative and convective heating, heat shield weights, etc 13 p1989 A66-25153  
 Estimates of expected relative magnitudes of convective and radiative heat transfer at stagnation point of blunt body for superorbital speeds and attitudes with continuum flow 13 p1989 A66-25154  
 Foreign planetary atmospheric effect on hypersonic laminar stagnation region heat transfer and skin friction studied for various dissociating gases 13 p1993 A66-26729  
 Design, fabrication and test of sandwich construction box beam made of D-43 columbium and Haynes 25 superalloy for use as hot redundant structure for hypersonic vehicles 16 p2816 A66-30894  
 Hypersonic tunnel measurements of turbulent heat transfer for thin walled slender cone 17 p3039 A66-33474  
 Effect of mass injection into cavity on hypersonic boundary layer transition and on heating downstream 21 p3835 A66-38734

**HYPERSONIC INLET**  
 Diffusion in supersonic duct flow composed of boundary layers, with application to hypersonic inlet with internal compression [AIAA PAPER 64-245] 05 p0606 A66-15071  
 Busemann inlet flow field calculation for hypersonic speeds, considering internal-compression inlet geometry and performance 20 p3493 A66-38178

**HYPERSONIC NOZZLE**  
**SA SPRAY NOZZLE**  
 Displacement and heat transfer effects of laminar and turbulent boundary layers far downstream in slowly expanding hypersonic nozzle, determining inviscid core flow 15 p2424 A66-29273  
 Reduction of thick boundary layers in low density wind tunnel by applying suction to nozzle, using high-speed cryopump 16 p2673 A66-30381  
 Vibrational and rotational nonequilibrium flow effects in hypersonic conical nozzle expansion of nitrogen flows and airflows 17 p2842 A66-33478

**HYPERSONIC REENTRY**  
 Optical radiation transfer equations applied to imaging instruments used in radiometry of hypersonic reentry bodies 08 p1222 A66-18709  
 Electromagnetic wave propagation near missiles during hypersonic atmospheric reentry and computer program for determination of dissociated and ionized particle density in nonequilibrium nitrogen-

plasma flow 13 p2150 A66-26374  
 Graphite composites suitability for use on hypersonic entry vehicle components 14 p2319 A66-28014  
 High temperature refractory alloy fabrication for microwave antennas in hypersonic glide reentry vehicles 19 p3370 A66-36158  
 Flexible uniform-stress truncated disk spinning about central hub for aerodynamic braking useful as reentry decelerator, noting low decelerator weight fractions for wide range of mission parameters 22 p3845 A66-40599  
 Plasma-electromagnetic wave interactions during hypersonic reentry of space vehicle into lower layers of atmosphere [ICAS PAPER 66-37] 22 p3957 A66-40666  
 Hypersonic entry vehicle measurement of Mars atmospheric density, pressure, composition, temperature and detection spectrometry of chemical species in shock layer 24 p4277 A66-42680

**HYPERSONIC SHOCK**  
 Hypersonic shock tunnel study, examining effects of roughness, bluntness and angle of attack on boundary layer transition 08 p1166 A66-19813  
 Instability of hypersonic shock layer flow over blunt bodies with surface cavities coupled to dynamic stability of body 10 p1619 A66-21156  
 Viscous hypersonic blunt body problem examined, using Newtonian thin-shock-layer theory, slip effect, Navier-Stokes shock structure, etc 13 p1990 A66-25157  
 Scattered light spectrum of thermal sound waves used to provide velocity and absorption data about hypersonic waves in several liquids 16 p2745 A66-30300  
 Unification of various small-epsilon theories of real gas flows based on assumption of specific-heat ratio near unity 23 p4151 A66-42050  
 Microwave experimental technique for continuous velocity measurement of shock and contact discontinuities bounding air plasma generated in cylindrical hypersonic shock tube 24 p4190 A66-42173  
 Network for compensating electrical output of thin film resistance thermometers for deviations due to large heat-transfer rates 24 p4207 A66-42176

**HYPERSONIC SPEED**  
 Law of plane cross section applicability to hypersonic motion of deformable bodies in inhomogeneous nonstationary media with time dependent parameters 01 p0006 A66-10460  
 Forced Mandelstam-Brillouin scattering in gases, determining hypersonic velocity for three gases 09 p1408 A66-20770  
 Non slender bodies of revolution with minimum pressure drag, noting derivation of minimizing curves for Newtonian flow 11 p1631 A66-22514  
 Transversal contour of minimum total drag of body in Newtonian flow 11 p1631 A66-22518  
 Inviscid unsteady flow field disturbances caused by blast-generated normal shock wave sweeping past slender wedge moving at hypersonic speed 12 p1795 A66-23577  
 Equations for translatory motion of lifting body moving at hypersonic speed, considering Earth sphericity, noting effect of centrifugal forces 13 p2193 A66-26448  
 Forced Mandelstam-Brillouin scattering in gases, determining hypersonic velocity for three gases 14 p2341 A66-27305  
 PDE of terminal shape of ablating body as function of time derived, noting mass and energy flow, boundary layer thickness, etc 16 p2628 A66-30219  
 Lift-to-drag ratio attainable by slender, homothetic body at hypersonic speeds, assuming Newtonian pressure distribution and constant skin-friction coefficient 17 p2838 A66-32348  
 Oscillatory motion of angle of attack for space vehicles entering Earth atmosphere at hypersonic speeds from satellite orbits 17 p3016 A66-32893  
 Similarity laws for bodies maximizing lift-to-drag ratio at hypersonic speeds, considering longitudinal and transversal contours 19 p3276 A66-36245  
 Newtonian variational problem for pressure

on surface of nonshallow body moving hypersonic velocity 19 p3276 A66-364  
 Wind tunnel testing of delta-like lift bodies at low, supersonic and hypersonic speeds, noting lift to drag ratios and of design performance of caret wave-rid wings [ICAS PAPER 66-24] 23 p4007 A66-410

**HYPERSONIC TEST APPARATUS**  
 Hypersonic shock tunnel study, examining effects of roughness, bluntness and angle of attack on boundary layer transition 08 p1166 A66-19813  
 Laminar separation in supersonic air hypersonic flow analyzed in gun tunnel noting concept of incipient separation as free interaction principle [AIAA PAPER 66-455] 17 p2910 A66-327  
 High Mach and Reynolds number hypersonic facility, noting available stagnation pressure, running time and a storage system [AIAA PAPER 66-758] 22 p3894 A66-406  
 Short-duration aerodynamic testing techniques and new usage of hypersonic shock tunnels [AIAA PAPER 66-762] 23 p4052 A66-413

**HYPERSONIC VEHICLE**  
 Preliminary design for optimum combination of insulating and structural materials for hypersonic cruise vehicles 03 p0436 A66-127  
 Plasma sheaths on radiation patterns antennas on hypersonic vehicles, noting permittivity and transmission loss 04 p0474 A66-134  
 Sounding rocket instability, covering exact and approximate solution and Magnus moment coefficient for hypersonic roll vehicle /Sandia Nitehawk rocket system [AIAA PAPER 66-62] 06 p0958 A66-162  
 X-20 program for maneuverable hypersonic reentry vehicle, noting boost-glide dynamics soaring 08 p1300 A66-185  
 NASA mission, discussing V/STOL transports, SST and hypersonic cruise vehicles [SAE PAPER 660169] 14 p2416 A66-272  
 Hypersonic cruise vehicles for military and civil requirements, considering air breathing propulsion and structural weight 24 p4296 A66-422  
 Structural design problems of hypersonic air vehicles with air breathing propulsion discussing relation to future hypersonic commercial air transport [ICAS PAPER 66-31] 24 p4281 A66-424

**HYPERSONIC WAKE**  
 Hypersonic laminar near wake of blunt bodies considered in terms of dual region model [AIAA PAPER 65-52] 03 p0315 A66-127  
 Hypersonic wake transition map noting free wake, near wake and interpolation phenomena 03 p0356 A66-128  
 Hypersonic wakes, effects of turbulent fluctuations on air ionization reaction rate measured by averaging and regrouping perturbed source terms of chemical rate equations [AIAA PAPER 65-819] 03 p0359 A66-132  
 Mach-Zehnder interferometer study of fluctuations in turbulent wakes of slender cones and spheres in ballistic flight [AIAA PAPER 65-809] 04 p0455 A66-136  
 Hypersonic wake ionization dependence of ablation products, investigating laminar and turbulent flow regions [AIAA PAPER 65-54] 05 p0793 A66-157  
 Spatial distributions of free electrons in near wakes of spheres in hypersonic flight [AIAA PAPER 66-55] 07 p0983 A66-184  
 Aerodynamic characteristics of wake behind hypervelocity bodies [AIAA PAPER 66-53] 08 p1162 A66-189  
 Conservation laws involving mass, momentum and energy applied to asymptotic properties of hypersonic flow 09 p1327 A66-202  
 Stability of laminar boundary layers and wakes at hypersonic speeds, noting existence conditions for subsonic disturbances and effect of hot wake core 13 p2061 A66-251  
 Schlieren photographs of turbulent hypersonic wakes behind cones and spheres at various Mach numbers and pressure analyzing laminar wake core, wake diameter

- and distance to transition 13 p1992 A66-26664
- Hypersonic wake studies in ballistic missile research program, discussing reentry of hypervelocity vehicles, laminar flow, atmospheric turbulence, 14 p2218 A66-27402
- Enthalpy and density fluctuations in high speed wakes, noting typical reentry and ballistic range cases 14 p2219 A66-27431
- Static enthalpy and velocity profile within viscous wake of circular cylinder at Mach 0 18 p3049 A66-34582
- Distance of transition to turbulence of wake measured behind spherical and blunt-cone models at hypersonic speeds in ballistic range 23 p4011 A66-41883
- Transient ionization levels of hypersonic velocity projectile wakes measured by open microwave resonators phase shift observation 24 p4209 A66-42194
- Transmission resonant cavity measurements of electron line densities and collision frequencies in ionized wakes of hypervelocity projectiles 24 p4191 A66-42195
- Coherent CW superheterodyne radar system for studying backscattering from hypersonic velocity projectile wakes 24 p4191 A66-42196
- Supersonic and hypersonic wake flow dependence on near wake pressure, using momentum integral 24 p4158 A66-42775
- HYPERSONIC WIND TUNNEL**
- Pressure and temperature distribution measurements in test chamber of hypersonic blow-down wind tunnel located at University of Tokyo 01 p0053 A66-10632
- Air condensation in hypersonic wind tunnel strongly related to flow expansion rate 01 p0059 A66-10808
- Textbook on design, calibration and operation of near-sonic, transonic, supersonic and hypersonic wind tunnels 03 p0351 A66-12284
- Aerodynamic blast simulation in hypersonic tunnels, noting unsteady tunnel flow behind blast wave 03 p0316 A66-12794
- Design and fabrication of air receiver of hypersonic wind tunnel at University of Tokyo 03 p0438 A66-13084
- Hypersonic pilot wind tunnel using compression heater gives Mach-14 flows 03 p0353 A66-13223
- Scramjet design and combustion testing in hypersonic wind tunnels with arc-heating and MHD accelerators 06 p0805 A66-16320
- Rarified gas dynamics in space flight and hypersonic low density wind tunnel of Goettingen Aerodynamics Research Facility 07 p1017 A66-17479
- NAE helium hypersonic wind tunnel for hypersonic flight simulation and boundary layer studies 07 p1018 A66-18050

- Hypervelocity impact force per crater surface area correlated to stress-to-fracture of target, experimenting with aluminum and copper as targets and projectiles 01 p0154 A66-10496
- Hypervelocity crater depth and target strength 03 p0437 A66-12802
- Cavity depth for waterdrop impacts against water, discussing apparatus, equation for cavity depth, effect of gravitational potential energy, liquid surface behavior, etc 15 p2477 A66-28716
- Metal behavior during hypervelocity cratering, noting momentum and energy equations for impulsive loading, including anisotropic stress and strain rate tensors, etc 17 p3022 A66-32013
- Hypervelocity projectile impact cratering from Ranger photographs of lunar surface 19 p3457 A66-35443
- Micrometeoroid environment effect on metal surface thermal properties, using simulated space vehicle placed in solar space environment chamber [AIAA PAPER 65-138] 23 p4140 A66-41894
- High velocity impact range diagnostic instrumentation including timing and triggering devices, laser and spark photography, radiation monitors, ballistic pendulum, etc 24 p4191 A66-42187
- HYPERVELOCITY FLOW**
- Electron density decay in wakes of hypervelocity aluminum and copper spheres in air and nitrogen as function of time, using transmission resonant cavity 02 p0267 A66-11529
- Simultaneous streak and frame interferometry for short duration hypervelocity facilities 03 p0370 A66-12962
- Aerodynamic characteristics of wakes behind hypervelocity bodies [AIAA PAPER 66-53] 08 p1162 A66-18952
- Hypervelocity techniques - Symposium, Tullahoma, Tennessee, November 1965 11 p1683 A66-22826
- Flow velocity, static pressure and test-section pitot pressure of expansion tube, using unheated /room temperature/ hydrogen driver 11 p1683 A66-22827
- Modified Expansion Tube /MET/ and high density shock tube operated in expansion tube mode for use in hypervelocity flow research 11 p1684 A66-22829
- Nonsteady isentropic compression wave to generate high-velocity air flows with very low ambient dissociation levels 11 p1684 A66-22831
- Momentum and energy accommodation for hypervelocity gas particles on crystal surface, using Lennard Jones potential and approximating lattice by system of independent forced harmonic oscillators 16 p2752 A66-30388
- Spark discharge generated blast wave application to shock on shock simulation, free-stream sound speed determination and hypervelocity flow measurements [AIAA PAPER 66-763] 22 p3894 A66-40645
- Windowless total radiation gauge for shock tube measurements of high temperature gas radiance 24 p4208 A66-42183
- Closed form relationship for estimation of flat plate turbulent heating rates at hypervelocities 24 p4158 A66-42788
- HYPERVELOCITY GUN**
- Wall friction, heat transfer and real-gas propellant effects in two-stage light gas guns 11 p1685 A66-22837
- Packaging techniques for telemetry components and systems to withstand gun-launch accelerations up to 250,000 g 16 p2651 A66-30561
- HYPERVELOCITY IMPACT**
- Linear accelerator for micrometeoroids operated in radially stable mode and variable frequency for hypervelocity impact studies 01 p0053 A66-10852
- Localized bonding or spot welding of aluminum plates by high velocity impact with microparticles 02 p0242 A66-11562
- Hypervelocity impact cratering materials and impact conditions 02 p0300 A66-11855
- Micrometeoroid impact effect on candidate skin materials, determining change in optical properties 03 p0382 A66-12793
- Hypervelocity impacts into space radiator materials, discussing material evaluation for waste heat shield 05 p0701 A66-14931
- Meteoroid protection weight requirements effects on space exploration costs, examining environment and hypervelocity impact penetration [SAE PAPER 650786] 05 p0774 A66-15011
- Ratio of maximum wall thickness to crater depth as function of impact velocity of meteoric particles 06 p0961 A66-17173
- Plates spot welded by hypervelocity impact of microparticle 07 p1037 A66-17468
- IR sensor detection of hypervelocity meteoroid puncture radiation emission 08 p1225 A66-19520
- Hypervelocity particle penetration of manned space station structure, discussing hole formation and repair 10 p1612 A66-21931
- Hypervelocity impact data applied to synthesis of meteoroid barriers in spacecraft design 10 p1612 A66-21954
- Helium gas gun for studying penetration and shock reflection from hypervelocity impact 11 p1687 A66-23263
- Depth of penetration of projectiles impacting at hypervelocities predicted, using dynamic yield strength of material with phenomenological model 12 p1957 A66-23592
- Strong plane shock produced in Al by hypervelocity impact and late stage equivalence examined, using analytical and graphical solution of method of characteristics and realistic state equation 13 p2194 A66-25061
- Meteoroid hazard to space power plant, reevaluating particle mass, flux, density and impact [AIAA PAPER 64-759] 13 p2194 A66-26622
- Material and geometry aspects of meteoroid armor protection for space radiator tubes, discussing bumper-fin concept 14 p2407 A66-28029
- Cratering in materials analysis, considering transient, primary, secondary and recovery phases, using rod projectiles at high velocity impact 15 p2607 A66-28702
- Terrestrial origin of tektites, noting possible connection with cometary collision and evidence of lunar origin for some 16 p2802 A66-30926
- Mathematical model for predicting strength and density of material from deceleration-time history of instrumented impact probe 18 p3253 A66-33805

Peculiarities of dispersion of matter resulting from meteorite impact on lunar surface as explanation of concentric nature of structure of crater 19 p3455 A66-35284

Radiation flux from meteoritic collision with obstacle 19 p3341 A66-35744

Photographic measurement on optical radiation associated with hypervelocity impact of projectile on target 23 p4091 A66-41909

Strength factor expressed as empirical penetration equation for impact target, combining effects of resistance to penetration and strain hardening 23 p4140 A66-41918

### HYPERVELOCITY LAUNCHER

Launching of beryllium, aluminum and steel projectiles up to 54,100 ft/sec 11 p1685 A66-22838

### HYPERVELOCITY PROJECTILE

Head-on interaction of plane shock wave and supersonic cone-cylinder projectile 03 p0316 A66-12813

Autocorrelation functions and gas density spectra from microdensitometer tracings of schlieren photographs of turbulent wakes behind hypervelocity spheres 03 p0317 A66-12947

Laser technique to photograph hypervelocity projectiles in free-flight range 03 p0379 A66-13248

Elastic impact and perforation of aluminum plates at minimal velocities by projectiles 05 p0775 A66-15299

High precision transient measurement of submicrosecond response of shock-loaded materials by instrumentation techniques and target alignment 08 p1226 A66-19694

Equilibrium air total radiation mechanism, vacuum UV radiation and relation to hypervelocity entry studied, using shock tube blunt model test flow [AIAA PAPER 66-103] 09 p1469 A66-20087

Projectile detection in hyperballistics range by using electro-optics and triggering of instrumented stations with luminous and nonluminous projectiles 10 p1538 A66-22042

Orthogonal x radiographs determination of hypervelocity fragment characteristics from shaped charge for potential terminal ballistics application 11 p1685 A66-22839

Behavior of projectiles in hyperballistic tunnel analyzed by photographs of their shock waves, using array of spark gaps flashes correlated with cameras 16 p2673 A66-30313

Moving source scanning spectrometer for ballistic range radiometry noting spectral resolution, operation and performance characteristics 24 p4208 A66-42180

Radiometer system with photomultiplier tube for measuring absolute radiation from hypervelocity projectile flow fields 24 p4208 A66-42181

Vacuum UV radiation measurement from high temperature nitrogen, detecting radiation from shock layer of ballistic model 24 p4208 A66-42182

Projectile-borne and gaseous impurity effects on spectroscopic turbulence and velocity measurements at reentry simulating range 24 p4190 A66-42184

Microwave reflectometer instrumentation for Ames light-gas guns, measuring time-distance values of projectiles during acceleration 24 p4209 A66-42185

Mass of shaped charge accelerator generated fragments determined via high speed flash X-ray photography of projectiles in flight 24 p4209 A66-42186

Transient ionization levels of hypersonic velocity projectile wakes measured by open microwave resonators phase shift observation 24 p4209 A66-42194

Transmission resonant cavity measurements of electron line densities and collision frequencies in ionized wakes of hypervelocity projectiles 24 p4191 A66-42195

Coherent CW superheterodyne radar system for studying backscattering from hypersonic velocity projectile wakes 24 p4191 A66-42196

Double Langmuir probe measurement of turbulent structure and ionization intensity of hypervelocity projectile and spectral characteristics of probe signal fluctuation 24 p4192 A66-42198

## HYPERVELOCITY WIND TUNNEL

Variable-volume arc chamber in Ling-Temco-Vought hypervelocity wind tunnel, examining design, performance and calibration technique 11 p1686 A66-22843

Source type hypersonic free stream effects on flow field about axisymmetric cone, obtaining properties in shock layer, boundary layer, pressure gradient, etc 17 p2837 A66-32080

Free flight model technique in hypervelocity shock tunnel for aerodynamic force and moment measurement by optical instrumentation [AIAA PAPER 66-771] 22 p3847 A66-40652

### HYPERVENTILATION

Shape changes in human chest wall during static respiration at end of spontaneous expiration, maximum expiration and maximum inspiration 15 p2441 A66-29649

### HYPOELASTICITY

Thermodynamics utilized to show that there is no difference between bodies defined as hypoelastic, elastic and hyperelastic 12 p1980 A66-23957

### HYPOTENSION

### S BLOOD PRESSURE

### HYPOTHALAMUS

Blood pressure and heart rate during hypothalamic self-stimulation in dogs, discussing experimental methods and results, physiological response, etc 16 p2640 A66-31154

Medial forebrain bundle, lateral hypothalamic area and reinforcing brain stimulation, discussing self-stimulation 17 p2859 A66-32552

Induction and suppression of hypothalamic self-stimulation behavior by microinjection of endogenous substances at self-stimulation site 20 p3506 A66-37603

### HYPOTHERMIA

Effects of cold and abnormal atmosphere discussing tolerance limits to hypercapnia, anoxia induced hypothermia and hypoxia 04 p0464 A66-14067

Semiconductor cooler creating hypothermia in small animals, operating on Peltier effect and employing quaternary metal alloy 15 p2444 A66-29497

Automatic device for reversible hypothermia in living organism, considering parameters of physiological functions, included in logic circuits 15 p2444 A66-29498

Hematocrit index and arterial-blood gas composition in white rats during artificial hypothermia 15 p2440 A66-29511

### HYPOTHESIS

### S BOWEN HYPOTHESIS

### S INTERMITTENCY HYPOTHESIS

### S NULL HYPOTHESIS

### S SIMILARITY HYPOTHESIS

### HYPOXIA

### SA ANOXIA

Hypoxia protection on taking of second graft of homologous bone marrow in previously irradiated and grafted mice 01 p0020 A66-10609

Effects of cold and abnormal atmosphere discussing tolerance limits to hypercapnia, anoxia induced hypothermia and hypoxia 04 p0464 A66-14067

Thermal homeostasis under hypoxia in man, discussing thermal stress adaptation and physiological responses in oxygen-deficient environment 04 p0465 A66-14068

Gastric secretion after simultaneous action of radiation and hypoxia 06 p0810 A66-16058

Protective effect of adrenaline, subgaleally injected, on survival time of rats subjected to acute hypoxia 06 p0811 A66-16064

Computational analysis employing digital computers to evaluate hypoxic stress reactions in man 07 p0998 A66-17659

Carbon dioxide induced mild hypoxia, correction of alterations on performance of psychologic and psychomotor systems 07 p0998 A66-17661

Cytoplasmic alterations and fat vacuole formation in pneumocytes of guinea pigs exposed to severe hypoxia in low pressure chamber 08 p1175 A66-18769

Effect of oxygen deficiency on acoustic organ of cats, determining content of potassium and sodium ions in perilymph, cerebrospinal fluid and blood serum 13 p2011 A66-26251

Chronic hypoxia effects on thyroid

function of rats, discussing radiolod trapping and acinar cell length 14 p2227 A66-261

Resistance to hypoxia by individuals height of 1650 m trained for high altitude climbing, noting equipment 15 p2435 A66-29

Rats resistance to oxygen deficiency while suffering effects of 750 roentgen dose X-ray exposure 15 p2438 A66-29

Hypoxia in cats and rats due to gradual and abrupt drops in oxygen content of air 15 p2439 A66-29

Superacute hypoxia in cats exposed to pure nitrogen followed by artificial respiration 15 p2439 A66-29

Hypoxic hypoxia attenuation mechanism carbon dioxide enrichment of alveolar intake 16 p2638 A66-30

Hypoxia and lower body negative pressure effects on blood volume, and orthostatic physical tolerance after four weeks hypoxic bed rest 16 p2640 A66-31

Human reaction to pure oxygen inhalation interrupting previous hypoxia 17 p2849 A66-31

Accelerographic and ballistocardiographic evidence of increased stroke volume secondary to acute high altitude hypoxia 17 p2855 A66-32

Retinal adjustment to light at different levels of hypoxia 17 p2859 A66-32

Lifetime high altitude environment effect on man, noting Peruvian natives adapted to constant hypoxia 22 p3854 A66-40

Hypoxia of simulated high altitude exposure prolongs synaptic delay conduction time in brain system of rats 22 p3855 A66-40

Levy hypoxia test and associated arterial oxygen desaturation and increased cardiac output 24 p4163 A66-42

Effects of meprobamate and hypoxia on psychomotor performance during bidimensional tracking, coded problem solving and response to auditory signals 24 p4164 A66-42

### HYSTERESIS

### SA ANTIFERROMAGNETISM

### SA DAMPING

Forced vibration of system with polygenic hysteresis loops in presence of constant force 01 p0159 A66-11

Russian monograph on turbulent plasma theory covering turbulence formation, hysteresis, plasma oscillations, self-consistent wave interactions, etc 03 p0406 A66-13

Electrostatic hysteresis synchronous motion discussing development, operation characteristics, test results, advantages and limitations 04 p0459 A66-13

Polarization and domain structure barium titanate single crystals with double hysteresis loop 06 p0926 A66-16

Capacitance-voltage curves in MOS devices indicating difference in relaxation time of surface states 06 p0940 A66-17

Brushless induction hysteresis motor extreme environments 07 p0991 A66-17

Hysteresis effect in long term variation of cosmic radiation, investigating whether its effect appears during short term Forbush decreases 07 p1125 A66-18

Empirical and experimental modulation functions for cosmic ray intensity variation showing rigidity dependence of intensity changes 07 p1128 A66-18

Digital simulation of magnetic hysteresis using analytic approximation of magnetic curves by seventh degree polynomials 08 p1187 A66-19

Effect of thermal and thermomagnetic treatment of nickel-cobalt ferrite single crystal on rotational magnetic hysteresis losses 09 p1412 A66-19

Hysteresis nature of current-voltage characteristics observed in p-n junctions obtained by bombarding germanium crystal with fast electrons 09 p1413 A66-20

Hysteresis properties of thin ferromagnetic films of nickel-iron and of nickel-iron molybdenum compositions, noting anisotropic dispersion effect 09 p1431 A66-20

Magnetic hysteresis and associated current-carrying capacity of type II superconductor on pinning of flux threads by inter-

- effects 10 p1573 A66-21246
- Stability of steady state response of one degree of freedom double bilinear hysteretic model ASME PAPER 65-WA/APM-4]
- Magnetoresistance effect applied to Rotatable Initial Susceptibility II films, explaining resulting hysteresis loops and torque curves 13 p2161 A66-25183
- Layered film of Cr and NiFe exhibit biased hysteresis loop in easy axis direction and asymmetric hysteresis loops in hard axis direction 14 p2353 A66-26901
- Magnetic torque and hysteresis loop measurements, examining exchange anisotropy in sulfided Fe films 14 p2354 A66-26907
- Magnetic hysteresis and switching property of manganese-bismuth thin magnetic films epitaxially grown by vapor deposition technique 14 p2355 A66-26913
- Dual input describing function (DIDF) of two-state relay with hysteresis 14 p2265 A66-27481
- Hysteresis effects in one-dimensional conducting gas flow through rectangular MHD converter channel with constant magnetic gap and variable electron spacing 15 p2428 A66-29219
- Hysteresis phenomena in He-Ne gas laser in axial magnetic field and polarization of oscillating mode within certain tuning region 15 p2516 A66-29385
- Tuning of ammonia beam maser resonator based on frequency shift method, noting hysteresis appearance and elimination 16 p2720 A66-31696
- Critical current enhancement and degradation due to hysteresis in nonideal type II superconductors in axial magnetic fields 18 p3153 A66-33612
- First-order modulation effects of galactic cosmic radiation, considering hysteresis effect and variation of energy spectrum in 11-yr modulation 18 p3186 A66-34811
- Micromagnetic theory of ferromagnetics, discussing magnetization curve, saturation and hysteresis effects 19 p3439 A66-35714
- Magnetization curve and magnetic hysteresis of ferromagnetic single crystals 19 p3439 A66-35715
- Hysteresis effect in ionospheric propagation indices studied by separating data concerning solar cycle portion with increasing solar activity from decreasing solar activity data 20 p3551 A66-37570
- Magnetization curves for two specimens of semiconducting strontium titanate of given electron density, noting magnetic hysteresis and heat capacity 21 p3796 A66-38553
- Control of magnetic hysteresis mechanism, increasing damping torque for use in gravity-oriented satellite stabilization 21 p3820 A66-38862
- Quenching and hysteresis effects between Zeeman oscillations on single axial mode observed in near-zero magnetic fields for short planar laser 21 p3747 A66-39116
- Esaki diode oscillator, investigating oscillation waveform, conductance characteristics, constants, hysteresis and parasitic oscillation 21 p3712 A66-39221
- Competition, hysteresis and reactive Q-switching in carbon dioxide lasers at 10.6 microns, using moving mirror technique 23 p4079 A66-41631
- Optimizing procedures using Fortran II FAP programming on IBM 709/7090 computers, comparing eight known techniques 19 p3308 A66-35868
- Saturn computer design and fault simulation on IBM 7090 computer 22 p3871 A66-40744
- ICBM
- S INTERCONTINENTAL BALLISTIC MISSILE /ICBM/
- ICE
- Equations describing crystallization process in low level clouds as function of ice crystal penetration from upper clouds or from artificial seeding 02 p0254 A66-12023
- Detection of 3.1 micron mu cepheid absorption band due to interstellar ice particles 05 p0768 A66-15770
- Growth and destruction of ice mantles on interstellar graphite grains by sputtering, thermal evaporation and cloud collisions 05 p0765 A66-15845
- Flows and fractures as types of deformation occurring on Earth under huge loads of ice suggested by isostatic compensation of Antarctica, Arctic basin and glaciated region in North America 12 p1875 A66-24894
- Ice crystal size during expansion of humid air in supersonic nozzle 17 p2948 A66-32417
- ICE FORMATION
- SA DEICING SYSTEM
- Growth of ice crystals freely falling in atmosphere and form when produced by cloud element coagulation analyzed, using low pressure chamber 01 p0097 A66-11105
- Nucleation of ice formation in supercooled clouds as result of lightning-initiated sound waves 04 p0542 A66-13674
- Ice and snow fields in polar regions as observed by high resolution camera on Nimbus satellite 11 p1729 A66-22327
- Urea effective ice nucleant in supercooled clouds due to endothermic heat of solution and high solubility 13 p2122 A66-26125
- Rime effect on reflection efficiency of microwave reflectors, noting surface roughness irregularity and relation between icing and meteorological topographical conditions 20 p3516 A66-37726
- ICE NUCLEUS
- Carbon dioxide effect on shattering of freezing water drops, using methanol-cooled chamber with variable temperature control 10 p1552 A66-21290
- Ice crystallization on solid-insoluble nuclei in high humidity air, noting two measuring methods for nuclei concentration 14 p2327 A66-28134
- Cometary nuclei discussing brightness, models, evidence from photometry, spectrography, dynamic properties of nuclei, and meteors 17 p3009 A66-33368
- Radioactive heating effect on icy conglomerate cometary nucleus and splitting from solar heat shock 17 p3009 A66-33370
- ICE SURVEILLANCE
- Water, ice and slush effects on traction characteristics of runway pavement, noting aquaplaning and aircraft braking criteria 02 p0216 A66-12223
- Airborne albedo measurements of ice in Ross Sea, Antarctica, for various solar elevations and altitudes 05 p0669 A66-14937
- ICING
- S DEICING SYSTEM
- IDEAL FLUID
- Masses attached to body of revolution estimated by Vandrey method of calculating disturbed velocity potential of flow of ideal fluid 01 p0058 A66-10462
- Ordinary differential equations theory yielding hydrodynamics conditions of stability with respect to finite perturbations for plane stationary curvilinear flow of ideal fluid 02 p0219 A66-12104
- Solid bodies in plane parallel flow of ideal fluid, discussing one-parameter family of ablation bodies with steady shape 04 p0596 A66-13554
- Longitudinal motion effect on lateral vibrations of prolate body of revolution in ideal fluid 05 p0775 A66-15315
- Behavior of fluids under weightlessness and in weak gravitational fields, formulating small linear oscillations of ideal fluid under surface tension 06 p0873 A66-18708
- Flow parameters of incompressible ideal fluid in axisymmetric curvilinear channel, obtaining and solving nonlinear differential equation 12 p1863 A66-24243
- Oscillations of cylindrical orthotropic three-layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions 13 p2206 A66-26461
- Laminar fluid flow of two-phase ideally viscous medium between two parallel surfaces 13 p2072 A66-26766
- Boundary problem describing plane jet steady state flow of ideal incompressible fluid, reducing solution to nonlinear integro-differential equations 14 p2272 A66-26775
- Aerodynamic forces acting on harmonically oscillating thin profile in stalled plane parallel flow of ideal incompressible fluid 14 p2220 A66-27695
- Ideal conducting fluid in electromagnetic and gravitational fields treated by relativistic mechanics, using variational principles 14 p2277 A66-28049
- Natural modes and eigenfunctions of low amplitude oscillation determined by Ritz averaging method for ideal fluid with equilibrium surface in weak force field 16 p2687 A66-31297
- Theory of unsteady one-dimensional motion of ideal incompressible fluid, discussing equation of state 16 p2688 A66-31300
- Book on jet theory in ideal fluids, covering compressible flow, steady jet flow, infinite flow past polygonal obstacle, unsteady flow, etc 16 p2632 A66-31746
- Einstein field equations for perfect fluid, coupled to frozen-in magnetic field, in high-density limit of gravitational collapse 17 p2997 A66-31973
- Variational principle for steady flows of ideal liquid and sufficient conditions for nonlinear stability under finite perturbations 17 p2913 A66-33168
- Hamilton principle extended to compressible MHD flow of perfect conducting fluid 20 p3610 A66-37987
- Coefficients of equations of perturbed motion of body containing ideal incompressible liquid 21 p3770 A66-38973
- Hydrodynamic equations derived for classical multicomponent ideal fluid, using expansions in small parameter mu 21 p3728 A66-39297
- Subsonic jet flow past solids, examining two classes of exact solutions in ideal fluid for plane nonvortical steady state flow 22 p3902 A66-40915
- Stability analysis of discontinuous solution of gas dynamics PDEs for ideal fluid 23 p4055 A66-41559
- Inertial motion equations of rigid body bounded by multiply connected surface in ideal infinite fluid 24 p4237 A66-42846
- Axisymmetric vortex jet behavior of ideal incompressible fluid at large distances from nozzle, noting surface waves 24 p4195 A66-42851
- Two-dimensional bubble contours in steady state turbulence-free flow of ideal incompressible fluid, obtaining solution for all internal pressures 24 p4232 A66-43064
- IDEAL GAS
- SA PERFECT GAS
- Plane adiabatic motion of ideal gas determined by separating variables of motion equations in curvilinear coordinates 01 p0006 A66-10471
- Stability of plane stationary detonation wave, using detonation model of ideal perfect gas flowing in pipe at constant supersonic velocity 02 p0217 A66-11391
- Thermodynamic properties of substances in ideal gas state in finite series representation 03 p0443 A66-12512
- Magnetic properties of ideal gas of charged bosons and fermions as affected by dimensionality n of containing space 03 p0409 A66-12630
- Total stopping distance calculated for various experimental conditions for solid piston motion between driver and test gases in closed shock tube 05 p0660 A66-15061
- Power characteristics of linear axisymmetric flow of ideal incompressible conducting gas with Hall effect in two-component magnetic field 08 p1168 A66-18863
- Growth or decay of plane, cylindrical or spherical sonic discontinuity moving in

nonhomogeneous gas in isentropic equilibrium under external forces 08 p1208 A66-19230

Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas 08 p1165 A66-19571

Thermodynamic property calculations from equations of state and ideal gas properties, using entropy as illustrative example 10 p1619 A66-21077

Scalar formulation of ideal charged adiabatic gas flow in presence of gravitational and electromagnetic fields 10 p1524 A66-21814

Equilibrium flow of ideal gas and condensing vapor mixture from nozzle, using basic equations to describe process 12 p1863 A66-24368

Transition solution of physical state across plane nonrelativistic MHD shock of finite strength in compressible dissipationless perfect gas in uniform magnetic field 12 p1923 A66-24578

Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components 14 p2220 A66-27679

Book on uniform steady motion of ideal gas and gas dynamics of supersonic wind tunnels 14 p2220 A66-27789

Plane or axisymmetric hypersonic ideal gas flow in divergent nozzle with parabolic wall shape 14 p2221 A66-28056

Ideal gas flow past infinite circular cone at angle of attack, noting finite-difference method for self-similar solution of Prandtl boundary layer equation 14 p2222 A66-28283

Critical flow rate, critical pressure ratio and critical mass flow of dissipative adiabatic nozzle and pipeflow of ideal gas 16 p2690 A66-31635

Physical phenomena occurring within fluid devices, particularly pneumatic devices, considering Maxwellian distribution of velocities, ideal gas law and mean free path 18 p3098 A66-34118

Channel flow general equations including nonviscous uniform flow, steady flow, stagnation state and speed of sound in ideal gas 18 p3098 A66-34121

Friction and heat exchange effects on one-dimensional flow profile of ideal gases 18 p3098 A66-34122

Shock formation in mixture of chemically reacting ideal gases due to piston action 18 p3100 A66-34641

Transformation and solutions of equations of one-dimensional isentropic motion of ideal gas 19 p3342 A66-36467

Correlation formulas improvement for laminar shock tube boundary layer for air and argon 21 p3727 A66-39167

Stability problem of plane steady detonation wave in ideal gas 22 p3898 A66-40156

## IDENTIFICATION

System measurement and identification, considering stochastic transformation between input and output functions, noting connection with radio communication problems 15 p2473 A66-29375

Aircraft accident victim identification techniques 19 p3294 A66-36444

Identifying critical elements /parts and components/ as criteria for system design tradeoff at system and circuit levels 20 p3568 A66-37916

## IE-A

## S EXPLORER XX SATELLITE

## IFR

## S INSTRUMENT FLIGHT RULE /IFR/

## IGNITER

JP-5 fuel-air mixture ignition by platinum catalytic igniters, using ramjet engine baffle combustors 13 p2171 A66-25594

Igniter performance in solid propellant rocket motors, examining mass discharge rate effect on chamber pressure transients [AIAA PAPER 66-680] 18 p3161 A66-34227

Solid propellant motor ignited from aft end, noting igniter 20 p3629 A66-38261

Static firing tests on special small rockets /SSR/ with different igniter cases and combustion instabilities 23 p4119 A66-41436

## IGNITION

## SA COMBUSTION

## SA SOLID PROPELLANT IGNITION

## SA SPARK IGNITION

Tagaform synthetic hypergolic fuel for hybrid rockets, discussing polymerization, ignition delay, etc 11 p1760 A66-22249

Analytical solution to rate equations for branching chain reactions of hydrogen-oxygen reaction under shock tube conditions, for application to ignition problems 13 p2018 A66-26442

Turbulent jet theory, thermal ignition theory and flameout characteristics of bluff body flame stabilizers 14 p2413 A66-27694

Laminar and turbulent diffusion flame combustion mechanisms, stabilization, flame ionization, Bunsen burner, fuel gas jet eddy diffusion, etc 15 p2616 A66-29068

Automatic ignition in methane-chlorine mixture, investigating photochemical and thermal chlorination of methane in gas phase 17 p2989 A66-32824

Ignition model for condensed thermally unstable propellant by exothermal processes taking place in condensed phase 18 p3260 A66-33719

Ignition of powder prepared from nitroglycerin and nitrocellulose by shock wave in sectioned low-high pressure chamber 18 p3260 A66-33721

Bilateral switching thyristor system on common silicon substrate, discussing ignition 19 p3313 A66-35500

Ignition conditions determined based on linearization of initial nonlinear equations 19 p3477 A66-35742

Unstable combustion products of glow discharge, discussing effect of propagation rate of hydrogen-oxygen flame 21 p3834 A66-38473

Laplace transform analysis of solid or hybrid propellant ignition by exothermic heterogeneous reactions in presence of radiant energy flux 21 p3806 A66-38688

Analytic solution for ignition kinetics of dry carbon monoxide-oxygen reaction obtained, assuming initiation reaction followed by chain-branching steps 22 p3998 A66-40115

Detonability of hydrogen-oxygen mixtures in large vessels at low initial pressures, using strong and weak igniters 23 p4120 A66-41890

## IGNITION LIMIT

Measuring apparatus for autoignition times of explosives, propellants and pyrotechnics under various initial vacuum or pressure ranges 01 p0054 A66-10854

Flammability hazards of aircraft hydrocarbon fuels as function of temperature and pressure based on equilibrium conditions [AIAA PAPER 65-801] 03 p0414 A66-12565

Chemical kinetics of nonequilibrium combustion of propane-air and ethane-air mixtures in one-dimensional flow, including ignition delay and reaction time [CI PAPER WSCI-65-19] 05 p0788 A66-15143

Hypergolic ignition of light hydrocarbon fuels with fluorine-oxygen /Flox/ mixtures [CI PAPER WSCI-65-23] 05 p0743 A66-15147

Ignition of hydrogen-oxygen-argon mixtures containing small amounts of hydrocarbons and bromine substituted hydrocarbons in shock tubes 06 p0822 A66-18634

Upper ignition limit for reaction of fluorine with hydrogen 09 p1338 A66-20394

Discontinuity characteristics of trough-shaped flame stabilizers for combustion in wake of poorly streamlined body during period of ignition arrest 20 p3674 A66-36915

Initial air-side boundary layer effect on ignition of slot injected gaseous hydrogen by hot supersonic air stream [AIAA PAPER 66-644] 23 p4149 A66-41513

## IGNITION SYSTEM

## SA CHOKE

## SA IGNITER

Combustion and heat transfer in rocket combustion chamber burning liquid oxygen and gaseous hydrogen 02 p0279 A66-11668

Fuel drop ignition, discussing parametric extension of quasi-flame surface theory to higher reaction orders and arbitrary stoichiometric ratios [AIAA PAPER 66-70] 06 p0970 A66-16415

Ignition mechanisms of solid composite

propellants containing ammonium perchlorate as oxidizer 15 p2569 A66-2930

Thermal explosion equations solved by Dorodnitsyn method of integral equations 17 p3034 A66-3256

Ignition of liquid propellant rocket engines, discussing propellant flow, pressure and mixture ratio 18 p3163 A66-3418

Ignition of solid propellant rocket motor, considering igniter characteristics, components and materials 18 p3160 A66-3418

Error analysis of absorbed energy flux density and ignition exposure time data accuracy, precision and confidence limit estimates for arc image furnace ignition experiments [AIAA PAPER 66-669] 18 p3261 A66-3422

Ignition pressure transient of rocket motor, discussing initial ignition even flame spreading and final chamber filling convective heating effect on burning rate etc [AIAA PAPER 66-666] 18 p3165 A66-3449

Ignition analysis of condensed phase fuel suddenly exposed to stationary hot oxidizing gas, noting strong pressure effect due to feedback mechanism 20 p3626 A66-3738

Electronic devices for ignition of firn mechanisms designed for carrier rocket stage separation 21 p3822 A66-3963

Ignition and controlled burning of liquid oxygen-liquid methane mixture, evaluating use as rocket monopropellants [AICE PREPRINT 28E] 22 p3969 A66-3988

Low pressure low temperature ignition of hypergolic propellants, particularly hydrazine-nitrogen tetroxide systems, in space environment simulator and conclusion on gas phase reactions 22 p3892 A66-4023

Sea level and high altitude ignition of fuel rich gas generator/turbine manifold assembly 24 p4294 A66-4264

## IGNITION TEMPERATURE

## S COMBUSTION TEMPERATURE

## S SPONTANEOUS IGNITION

## TEMPERATURE

## IGY

## S INTERNATIONAL GEOPHYSICAL

## YEAR /IGY/

## IL-62 AIRCRAFT

## S ILYUSHIN IL-62 AIRCRAFT

## ILLUMINANCE

Illuminance of Earth shadow at three wavelengths by numerical integrator accounting for light attenuation, ozone absorption and extinction, Rayleigh scattering and refractive beam divergence 11 p1770 A66-2257

Angular divergence effect of light beam on illuminance of turbid scattering medium 14 p2326 A66-2754

Gated laser night-viewing system, calculating apparent illuminance as function of target distance 20 p3511 A66-3693

## ILLUMINATION

## SA FLARE

Ruby laser with concentric resonator as illumination source of bubble chamber 01 p0084 A66-1118

Ruby laser with concentric resonator as illumination source of bubble chamber 12 p1890 A66-2401

Reflector-light source requirements for homogeneous format illumination in night aerial photography 13 p2081 A66-2600

Dense continuous *Chlorella* culture growth at various illumination levels 15 p2440 A66-2950

Four-horn and five-horn monopulse antenna system properties including illumination tapers, gain factor, temperature, etc 18 p3080 A66-3426

Photoluminescence effect on growth rate of *Chlorella vulgaris*, discussing action spectrum and mechanism of light requirement for heterotrophic growth 20 p3507 A66-3779

## ILLUSION

## S MOON ILLUSION

## S OCULOGRAPHIC ILLUSION

## S OPTICAL ILLUSION

## ILYUSHIN IL-62 AIRCRAFT

Design, performance capabilities and operational characteristics of Russian high speed jet aircraft IL-62 with tail-mounted engine 24 p4160 A66-4307

## IMAGE

## SA AFTERIMAGE

A OPTICAL IMAGE  
 A RETINAL IMAGE  
 Scattering matrix of slot waveguide  
 calculated, using mirror image  
 method 14 p2252 A66-27250  
 IMAGE CONTRAST  
 Structural character of modern black and  
 white aerial photography films and relation  
 to image definition 01 p0068 A66-10694  
 Determination of contrast range of optical  
 images obtained in aerial camera as function  
 of atmospheric and optical  
 factors 03 p0368 A66-12504  
 Photoelectric storage tube capable of long  
 term integration of faint optical images,  
 employing as storage target low density  
 layer of KCl for increased charge  
 multiplication 06 p0893 A66-17017  
 Raster magnification effect of moire  
 images to observe plane deformation in  
 specimens subjected to  
 impact 11 p1782 A66-22857  
 Unsharpness and contrast effect on slit  
 detection studied by  
 radiography 13 p2086 A66-25820  
 Structural character of modern black and  
 white aerial photography films and relation  
 to image definition 15 p2497 A66-28555  
 Influence of object contrast upon partially  
 coherent image formation 15 p2501 A66-28979  
 Image distortion within cinematographic  
 process as related to photography, noting  
 quality estimation, visual perception criteria,  
 etc 16 p2702 A66-30432  
 Image contrast enhancing by matching  
 spectral reflectance or emittance  
 characteristics 17 p2925 A66-32610  
 IMAGE CONVERTER  
 Soviet electronic telescope, indicating  
 possibility of noneclipse observation of  
 coronal lines in IR band 01 p0137 A66-10456  
 Control circuit of image converter  
 tube 01 p0071 A66-11041  
 Temperature in toroidal theta pinch  
 discharge with image converter  
 camera 04 p0553 A66-14284  
 Text on electron optics covering principles  
 and application, electron lenses, cathode ray  
 tubes, mass and beta ray spectrographs,  
 quadrupole systems, image converters,  
 etc 09 p1402 A66-20333  
 Control circuit of image converter  
 tube 11 p1708 A66-23287  
 UV photography and spectroscopy using  
 spectrally selective image converter and  
 photodetection 14 p2293 A66-27330  
 Photographing of satellites, using optical  
 system and image converter for determining  
 coordinates 15 p2453 A66-30002  
 Epitaxial-planar diffusion techniques to  
 fabricate monolithic electro-optical mosaics  
 of 2500 phototransistor element with  
 internal row and surface column  
 interconnections 16 p2665 A66-31431  
 Information content of photoelectric star  
 images determined by background radiation,  
 optical aberrations and photon noise,  
 deriving equations for rms  
 error 16 p2654 A66-31441  
 Power source for image converter tubes  
 /ITC/ with regulated  
 output 20 p3559 A66-37521  
 Proximity focused biplanar image  
 converter diode for high speed photography,  
 discussing basic geometries with respect to  
 quantitative data gathering  
 capabilities 23 p4070 A66-41673  
 Photographic equipment using image  
 converter tube as electronic shutter with  
 exposure times from 0.5 to 5000  
 microseconds 23 p4070 A66-41674  
 Multipurpose ultrahigh speed camera  
 system, noting use as monosecond Kerr cell,  
 image converter and giant laser pulse  
 generator 23 p4071 A66-41675  
 IMAGE CORRELATION  
 Monochromatic atmospheric transluence  
 measured, using logarithmic photometer  
 with diode photomultiplier for remedying  
 image displacement due to atmospheric  
 fluctuations 07 p1034 A66-17925  
 Monochromatic atmospheric transluence  
 measured, using logarithmic photometer  
 with diode photomultiplier for remedying  
 image displacement due to atmospheric  
 fluctuations 12 p1880 A66-23886  
 Conduction mechanism in discontinuous  
 metal films involving image forces, potential

barrier, activation energies, saturation effect  
 in conductivity, etc 16 p2783 A66-31427  
 Radar image edges sharpness relationship  
 to relative humidity near  
 ground 17 p2948 A66-32270  
 Rotating prism design for continuous image  
 compensation cameras, application to UV  
 and IR regions of  
 spectrum 19 p3354 A66-35384  
 IMAGE DISSECTOR TUBE  
 High resolution solid state precision star  
 tracking system using magnetoresistance  
 multiplier and image disector  
 phototube 08 p1250 A66-19349  
 Bore-sighted star tracker using image  
 disector tube as photodetector and  
 incorporating continuous strip electron  
 multiplier 08 p1252 A66-19499  
 Image disector for lunar observation in  
 conjunction with Earth-based telescope,  
 noting efficiency of resolution contrast  
 sensitivity 12 p1883 A66-24678  
 IMAGE FILTER  
 Fresnel diffraction laws for calculation of  
 light amplitude distribution in image spot of  
 point as function of aperture dimensions  
 used on hologram, source function,  
 etc 04 p0532 A66-14173  
 Ten-element band pass filter section and  
 derivatives with classification of image-  
 impedance functions 11 p1669 A66-23113  
 IMAGE FURNACE  
 Error analysis of absorbed energy flux  
 density and ignition exposure time data,  
 accuracy, precision and confidence limit  
 estimates for arc image furnace ignition  
 experiments  
 [AIAA PAPER 66-669] 18 p3261 A66-34224  
 Arc image stagnation-flow reactor for  
 measuring gas-solid reaction rates between  
 2000 and 3000 degrees K 24 p4216 A66-43214  
 IMAGE INTENSIFIER  
 SA LASER  
 Aberration of width of linear image  
 created by skew rays in composite  
 quadrupole lens 02 p0199 A66-11782  
 Electron avalanches in anode and cathode  
 directed streamers detected by high-gain  
 image intensifier and streak  
 shutter 08 p1263 A66-19079  
 Five-stage transmission secondary-emission  
 image intensifier tube as high speed shutter  
 for moment and streak  
 photography 12 p1883 A66-24937  
 X-ray image intensifier in conjunction with  
 motion picture film sequencing of thrust  
 chamber image during hot firing to obtain  
 failure analysis data 13 p2079 A66-25819  
 Aerial image reproduction on Lith type  
 and extreme resolution emulsions, noting  
 experimental results on sharpness, line  
 width changes and methods of testing with  
 photomicrography 19 p3353 A66-35315  
 Image restoration via phase holograms,  
 noting applications to deteriorated  
 photographic negatives and  
 positives 23 p4068 A66-41411  
 Image intensifier application as aid to  
 visual acquisition of weak luminous moving  
 targets against night sky 23 p4071 A66-41676  
 IMAGE ORTHICON TUBE  
 Manned Orbiting Laboratory experiments  
 such as airglow, solar corona, cosmic ray,  
 plasma, far UV image orthicon,  
 etc 04 p0585 A66-13678  
 Image, display and storage tube for scan  
 conversion, digital storage and signal  
 processing 07 p1036 A66-18270  
 Pulsating auroras observed near  
 equatorward boundary of auroral displays  
 during postbreakup phase with image  
 orthicon TV and  
 photometers 18 p3107 A66-34519  
 Image orthicon slit spectrograph for study  
 of aurora and night glow 22 p3921 A66-40898  
 IMAGE TRANSDUCER  
 Film scanning system using GaAs light-  
 emitting diode and phototransistor light  
 detector 11 p1709 A66-23476  
 IMAGE TUBE  
 Remote extraterrestrial surface navigation,  
 discussing image-tube based stellar field  
 acquisition system  
 parameters 04 p0543 A66-13590  
 Luminescent surfaces and structures for  
 information display, discussing cathode ray  
 tube, image intensifier for night vision,  
 spectral emission, etc 19 p3312 A66-35338

Langmuir current-density limit derived for  
 differing axial and radial electron beam  
 temperatures in high-resolution image  
 devices 20 p3524 A66-36899  
 Photographic radar system employing Q-  
 switched ruby laser, Mullard type 6929  
 image tube and conventional  
 camera 21 p3736 A66-38796  
 Signal generating image tubes for photo-  
 optical tracking and surveillance  
 sensors 23 p4070 A66-41669  
 IMAGE VELOCITY SENSOR  
 SA SPATIAL FILTERING  
 Laboratory simulation to test image-  
 velocity measuring device yielding accurate  
 and useful results 02 p0227 A66-11379  
 Signal-generating astronomical sensors,  
 describing Stratoscope II balloon-borne  
 telescope 08 p1222 A66-18732  
 Image movement from aircraft velocity for  
 vertical and oblique panoramic  
 cameras 13 p2078 A66-25605  
 Control signal generator and output  
 characteristics of angular position and  
 velocity sensors used in single-axis Sun-  
 oriented system of Vostok  
 spacecraft 19 p3394 A66-35280  
 Moving image velocity measuring technique  
 using parallel-slit spatial filter is treated as  
 continuous optical correlation  
 processing 20 p3558 A66-37288  
 Signal generating image tubes for photo-  
 optical tracking and surveillance  
 sensors 23 p4070 A66-41669  
 IMAGERY  
 Nimbus I IR scanning radiometry for  
 nocturnal imagery of clouds and other data,  
 IR spectral returns and relation to image  
 gray scale 10 p1531 A66-21519  
 Geoscience information acquisition by  
 radar return studied by means of terrain  
 target scattering coefficients  
 /scatterometry/ 14 p2244 A66-28407  
 Geometric analysis of recordings by IR  
 scanners, emphasizing significance of stereo  
 imagery 24 p4210 A66-42289  
 IMAGING TECHNIQUE  
 Image translation from plate into  
 coordinate system on another plate using  
 homographic coordinates of object applied  
 to astrometry 01 p0135 A66-10276  
 Electron image of CRT cathode formed  
 directly on view screen, eliminating  
 emission patchiness from oxide coated  
 tubes 01 p0036 A66-10395  
 Radiation patterns of transversely polarized  
 corner reflector antenna, using image  
 method 01 p0044 A66-10937  
 Linear filtering concepts in imaging and  
 optical data processing systems, including  
 three-dimensional photography obtained by  
 wave front reconstruction 02 p0240 A66-11453  
 Metal surface structure, semiconductors  
 and dielectric films analyzed, using image  
 orthicon technique for data on work  
 function, electron reflection coefficient and  
 electric resistance 05 p0621 A66-15578  
 Systems design techniques applied to laser  
 rangefinder and imaging devices,  
 emphasizing relation between operational  
 requirements and laser  
 technology 06 p0889 A66-15967  
 Flight simulation developments for  
 V/STOL visual device requirements  
 including mirrors focusing images at  
 infinity, transparency image storage  
 techniques, optical probes,  
 etc 06 p0869 A66-16814  
 Automatic picture transmission of Nimbus  
 I meteorological satellite, considering  
 frequency choice, vehicle position, antenna,  
 image reception, etc 08 p1180 A66-18612  
 Optical radiation transfer equations applied  
 to imaging instruments used in radiometry  
 of hypersonic reentry  
 bodies 08 p1222 A66-18709  
 Solid-state camera system consisting of  
 monolithic phototransistor mosaic sensor and  
 molecular digital readout  
 system 08 p1226 A66-19545  
 Visual display system providing instrument  
 data in one-to-one correspondence with real  
 world, using cathode ray tube images of  
 horizon and runway projected on aircraft  
 windscreen 08 p1203 A66-19784  
 Imaging and altimeter-type radar employed  
 in orbiting spacecraft for high resolution  
 mapping, scattering cross section studies,

climatology, etc 10 p1532 A66-21521  
 Earth atlas based on high altitude photography, Nimbus and IR imagery and high altitude radar 10 p1532 A66-21527  
 imagery  
 Cardinal points and focal lengths of holographic system established by treating holographic imaging as projective transformation between object and image space 11 p1706 A66-22872  
 Ghost imaging of solid objects by holograms formed in near field without using Fourier transforming lenses 11 p1708 A66-23205  
 Microstructure viewed on several different successive parallel planes simultaneously, using multiple positive or negative transparencies, obtaining three-dimensional photomicrograph 12 p1892 A66-23626  
 Observation satellite optics, discussing focal length, resolution, viewing angle, Earth curvature effect, etc 12 p1915 A66-24935  
 Panoramic facsimile camera providing IR and visible spectrum imagery designed for unmanned space operation, noting construction, weight, etc 13 p2077 A66-25236  
 Lens aberration correction using Gabor wavefront reconstruction method to produce hologram of spherically aberrated wavefront emerging from lens 13 p2080 A66-25990  
 Optical system correction through coefficient selection of aspheric surface, computing vector sums of all aberration orders to give spot diagrams and light distribution in image 14 p2334 A66-27317  
 Luna IX imaging system and analysis of pictorial data of lunar surface 15 p2498 A66-28741  
 Subroutines and functions of BE VISION, package of FORTRAN programs for drawing orthographic views of combinations of plane and quadric surfaces 15 p2510 A66-29770  
 Behavior of projectiles in hyperballistic tunnel analyzed by photographs of their shock waves, using array of spark gaps flashes correlated with cameras 16 p2673 A66-30313  
 Writing rate of rotating-mirror streak camera determined, using Q-switched laser technique 16 p2702 A66-30419  
 Partial coherence theory, discussing mutual coherence function, coherent fields, imaging theory, etc 16 p2748 A66-31241  
 Image related scanning systems for visual simulation display for space rendezvous and docking [AIAA PAPER 65-263] 18 p3093 A66-33788  
 Life detection on Mars by visual techniques, discussing imaging devices, filters, shutters and microcopy 18 p3063 A66-34371  
 Pinhole array camera for multiple image production for integrated circuits 19 p3354 A66-35385  
 Geologic evaluation of simultaneously produced like-and cross-polarized radar imagery 19 p3351 A66-36390  
 Holography principles, discussing basic equation, Fourier transform holograms and hologram interferometry 20 p3556 A66-36929  
 Holography theory and construction methods including experiments with thick or three-dimensional recording media, considering applications to microscopy, X-ray holography and TV 20 p3560 A66-37620  
 Imaging techniques to obtain temperature and emissivity measurements and phase diagrams of high melting point ceramic oxides with aid of solar furnace 21 p3738 A66-39102  
 Modulation transfer function shown to reduce harmonic distortion by forming positive images, provided exposure and development conditions are met 21 p3738 A66-39127  
 Holography, discussing potential uses, frozen wave fields, holograms at X-ray wavelength and stress 21 p3739 A66-39199  
 Finite grain size of photographic film effect on holography for cylindrical wavefronts 21 p3740 A66-39393  
 Imaging performance of error-free optical system limited by deviations in optical imaging surfaces, discussing aperture efficiency 21 p3773 A66-39395  
 Holographic processes, uses and limitations, discussing coherent imaging, holographic

information storage and information display 22 p3918 A66-40292  
 Dependence of complex optical transfer function of image forming system on horizontal range through turbulent atmosphere 22 p3949 A66-40890  
 Computer ray tracing study of image-forming in eyes as affected by pupil size, refractive indices and curvatures of cornea and lens 23 p4025 A66-41149  
 Electronic imaging techniques for engineering, laboratory, astronomical and other scientific measurements - Seminar, Los Angeles, April 1965 23 p4069 A66-41664  
 Radiometric capability of S-10 image orthicon system evaluated for quantitative radiation measurements against reentry vehicles 23 p4070 A66-41668  
 Advanced imaging techniques for Metro camera for space applications 23 p4070 A66-41670  
 Millimeter wave resonant interferometer capable of measuring spatial distribution of electrons in low density transient plasma column subject to perturbation 24 p4209 A66-42191  
 Wide field active imaging, image processing in which pictorial information is placed within laser cavity 24 p4222 A66-42559  
 Correlation of like and cross polarized side-looking radar images with geologic features for terrain discrimination 24 p4173 A66-42634  
 Noise limitations in obtaining three-dimensional images by holographic techniques, considering graininess of photographic emulsion 24 p4212 A66-42752  
**IMBEDDING**  
 SA INVARIANT IMBEDDING  
 Broadband X to K band varactor frequency doubler, noting efficiency increase by replacing variable resistance element with varactor 12 p1832 A66-23908  
**IMIDE**  
 S PYRIMIDINE  
**IMMERSION**  
 Effects of water immersion, recumbency and activity without negative breathing pressures, measuring heart rate and blood pressure with and without tilting 11 p1642 A66-22573  
 Bed rest and water immersion effects on plasma volume and catecholamine response to tilting, noting urinary excretion of norepinephrine and epinephrine 15 p2430 A66-28661  
 Comparative insulative properties of wet and dry type immersion protection flight clothing 16 p2643 A66-31127  
 Buoyancy and magnetohydrostatic stability of magnetic body immersed in magnetizable fluid 16 p2749 A66-31757  
 Characteristic equation for linear flutter problem of elastic cylindrical shell immersed in gas flow, discussing energy radiation, traveling wave propagation and discontinuity problem 22 p3995 A66-40510  
**IMMUNOLOGY**  
 Comparison methods for relationship among enzymes that are same but belong to different organisms 04 p0460 A66-13367  
 Antibody globulin coupled to diazotized aminoaryl derivative of carboxymethyl-cellulose to form immunoadsorbent for extracting antigens 12 p1805 A66-23568  
 Immunochemical studies on interspecies molecular hybrids of hemoglobin 13 p2010 A66-25898  
 Immunological reactions of Russian spacemen before and after space flight 15 p2436 A66-29468  
**IMP**  
 Observations of interplanetary magnetic field by Mariner and Imp spacecraft confirm predictions based on behavior of cosmic rays 03 p0429 A66-13263  
 Solar wind observations with Explorer XII and IMP, noting periodic fluctuations in solar proton flux and detection of 3 mev electrons of interplanetary origin 18 p3167 A66-34335  
 Solar wind in framework of Parker theory, summarizing data obtained from IMP and energetic-particle experiments 18 p3167 A66-34338  
 IMP satellite data on lunar magnetospheric MHD wake and interaction with solar wind 18 p3231 A66-34358  
 Energetic electron spikes in and beyond transition region of Earth radiation zone from IMP observations 18 p3196 A66-3487

**IMP-A**  
 S EXPLORER XVIII SATELLITE  
**IMP-D**  
 S EXPLORER XXXIII SATELLITE  
**IMP-E**  
 Comparison of interplanetary magnetic field measurements obtained by Pioneer V space probe and IMP-III satellite 18 p3233 A66-3454  
**IMPACT**  
 SA ELECTRON IMPACT  
 SA HYPERVELOCITY IMPACT  
 SA ION IMPACT  
 SA PROTON IMPACT  
 Computational method for determination of corridors of launch vehicle trajectory and impact dispersions [AIAA PAPER 66-483] 18 p3226 A66-3362  
**IMPACT ACCELERATION**  
 Cratering in materials analysis, considering transient, primary, secondary and recovery phases, using rod projectiles at high velocity impact 15 p2607 A66-2870  
 Physiological and biomechanical reactions of humans exposed to action of g forces examining effects of impact acceleration 24 p4166 A66-4312  
**IMPACT DAMAGE**  
 SA METEOR HAZARD  
 SA RAIN IMPACT DAMAGE  
 Micrometeoroid impact effect on candidate skin materials, determining change in optical properties 03 p0382 A66-1277  
 Hypervelocity crater depth and target strength 03 p0437 A66-1280  
 Dynamic flexural buckling of rods with axial plastic compression wave, noting strain-hardening law [ASME PAPER 65-APMW-32] 04 p0593 A66-1422  
 Elastic impact and perforation of aluminum plates at minimal velocities by projectiles 05 p0775 A66-1529

Vertical impact of spherical solid half-  
submerged in fluid of finite depth,  
examining effect of bottom on occurring  
phenomena 23 p4056 A66-41728

IMPACT SENSITIVITY  
Input initiation energy and potential  
impact energies available under processing  
conditions, interpreting test  
data 05 p0787 A66-15138  
Liquid nitrogen dilution effect on LOX  
impact sensitivity of selected  
materials 10 p1590 A66-21951  
Nonmonotonicity in sensitivity test data,  
noting results of liquid oxygen impact tests  
on Mylar-aluminum-Mylar laminate bonded  
to polyester foam 12 p1958 A66-23648  
Explosive sensitivity of dust or sprays  
ignited behind reflected shock simulated by  
shock tube, measuring ignition delay  
dependence on shock  
temperature 20 p3680 A66-38039  
Drop-weight tester/photographic apparatus  
for studying impact initiation-explosion  
process in nitroglycerin 23 p4119 A66-41243

IMPACT TEST  
Mechanical properties of commercial heats  
of Al and vacuum melted steel, deriving  
data from impact and tensile tests, noting  
ways of increasing  
toughness 01 p0086 A66-10413  
Impact process beyond limits of Hertz  
theory 01 p0154 A66-10478  
Hypervelocity impact force per crater  
surface area correlated to stress-to-fracture  
of target, experimenting with aluminum and  
copper as targets and  
projectiles 01 p0154 A66-10496  
Wide wedge penetration into thick  
aluminum target, noting adiabatic heating  
and softening 02 p0300 A66-11854  
Charpy test modification using ram to  
deform sample, obtaining data on elastic  
limit corresponding to high stress  
rates 02 p0246 A66-12005  
Fracture toughness of X7000-series  
aluminum alloy plate  
weldments 05 p0686 A66-14695  
Stroboscopic arrangement for photoelastic  
investigation on longitudinal stressed  
beams 05 p0773 A66-14990  
Drop-weight impact sensitivity testing of  
explosives  
[CI PAPER WSCI-65-27] 05 p0788 A66-15140  
Slow-bend impact testing of embrittlement  
of zirconium by hydrogen 06 p0895 A66-16356  
Yield stress dependence on strain rates in  
annealed steel and aluminum subjected to  
ball-indentation tests 08 p1315 A66-19803  
Photoelastic measurement of dynamic  
stresses and loading of structures,  
examining impact stress phenomena, stress  
waves, vibrations, stress distribution,  
etc 08 p1316 A66-19805  
Acoustic detection of micrometeoroids  
from rockets, discussing experimental setup,  
calibration methods and analysis of  
results 09 p1381 A66-20367  
High-chromium ferrite steel Kh25T  
brittleness at 475 degrees C investigated,  
using neutron structural  
analysis 09 p1391 A66-20872  
Impact properties of six materials  
compared on two falling-weight tensile  
impact testers, pendulum tester and high  
speed universal tensile tester, giving stress-  
strain curves 13 p2197 A66-26110  
Reactivity of titanium alloy oxidizer tank  
with nitrogen tetroxide oxidizer under

vibration analyzed for LEM when subjected  
to impact 13 p2111 A66-26222  
Model tests for determination of structural  
response of Apollo command module to  
water impact 14 p2393 A66-28020  
Material and geometry aspects of  
meteoroid armor protection for space  
radiator tubes, discussing bumper-fin  
concept 14 p2407 A66-28029  
Human response to predicted Apollo  
landing impacts in selected body  
orientations 15 p2430 A66-28663  
Cavity depth for waterdrop impacts against  
water, discussing apparatus, equation for  
cavity depth, effect of gravitational  
potential energy, liquid surface behavior,  
etc 15 p2477 A66-28716  
Microscopic strain rate equation  
interpreting macroscopic creep, stress-strain  
and impact test results 24 p4288 A66-42274  
Impact of compact mass of tungsten  
particles on obstacles of polystyrene and  
steel, as meteoritic impact  
model 24 p4292 A66-42886

IMPACT TESTING MACHINE  
Performance of impact machines for  
testing explosive sensitivity to impact  
[CI PAPER WSCI-65-33] 05 p0787 A66-15137  
Drop-weight sensitivity of explosive liquids  
tested with impact apparatus, showing  
increase with temperature  
[CI PAPER WSCI-65-28] 05 p0788 A66-15139  
Docking of logistics vehicle to space  
station investigated, using airbearing  
postimpact dynamic docking  
simulator 08 p1303 A66-18808  
Closed loop hydraulic high-speed universal  
testing machine and simulation of high  
strain rate conditions 13 p2197 A66-26108  
Impulse-impact shock simulation system  
with initial peak sawtooth  
capability 16 p2680 A66-30484  
Notched bar impact testing machine with  
solid slab pendulum and no material  
protruding beyond striking  
edge 22 p3988 A66-39670  
High velocity impact range diagnostic  
instrumentation including timing and  
triggering devices, laser and spark  
photography, radiation monitors, ballistic  
pendulum, etc 24 p4191 A66-42187

IMPACT TOLERANCE  
Human tolerance limits in water impact,  
identifying environmental and trauma  
characteristics 03 p0327 A66-12356  
Structural design of transport aircraft to  
reduce fatalities, analyzing protective shell  
to withstand ground impact load and fuel  
containment  
[AIAA PAPER 65-773] 03 p0434 A66-12592  
Impact strength of austenitic stainless  
steel welds discussing effects of heat  
treatment, carbon and ferrite content  
[ASME PAPER 65-WA/MET-1]  
05 p0704 A66-15692  
Balsa-wood impact limiter for hard landing  
on Mars surface, noting testing,  
performance, parameters and  
manufacture 13 p2191 A66-25264  
Impact dynamics of landing systems using  
material crushing to absorb kinetic energy  
of body impacting at very high  
velocities 14 p2402 A66-27895  
Human reaction to simulated landing  
impact overload, including analysis of EKG,  
kinetocardiogram, blood pressure and  
respiration data 15 p2443 A66-29445  
Skirt Jet peripheral retrorocket for  
lightweight terminal impact attenuation  
system using multiple nozzle rocket motors  
assembled to form annulus around outer  
periphery of vehicle 22 p3986 A66-40598

**IS SPECIFIC IMPULSE**  
**IMPULSE GENERATOR**  
Pulse repetition rate of magnetic pulse  
generators increased by transforming  
generator power supply frequency, using  
static frequency  
multipliers 09 p1352 A66-20301  
Sinusoidal voltage converted to rectangular  
voltage, using charge storage  
diodes 11 p1668 A66-23064  
Pulse generator consisting of active  
unidirectional nonlinear quadrupole having  
feedback circuit with linear quadrupole  
containing reactive  
elements 14 p2251 A66-27233  
Differential minority carrier storage circuit  
with avalanche pulse energization and fast  
rise/fall adjustable length pulse  
output 22 p3872 A66-39717  
Construction method for pulse generator in  
digital magnetic devices and current  
generators in magnetic deflecting  
system 23 p4046 A66-41521  
**IMPULSE NOISE**  
Signal to noise ratio characteristics  
measured for square-law detector, extracting  
signals from non-Gaussian  
noise 06 p0831 A66-16341  
Degradation of matched filter receiver  
operating in non-Gaussian noise, considering  
performance in presence of ideal impulse  
noise 06 p0856 A66-16864  
Hearing impairment from overexposure to  
impulsive noise, noting relationship between  
temporary threshold shift and peak level

and duration of impulsive  
noise 17 p2862 A66-31948  
Combined use of time-domain waveforms,  
detection probability and false alarm  
probability for selection of optimum sample  
period and quantization interval for  
detection of impulse  
waveforms 19 p3299 A66-35663  
Speech communications effects and  
temporary threshold shift reduction  
characteristics of British-made earplugs  
under quiet and high intensity impulsive  
noise backgrounds 24 p4168 A66-42857  
**IMPULSE ORBITAL TRANSFER**  
Optimal free-space fixed thrust trajectories  
using impulsive trajectories as starting  
iteratives  
[AIAA PAPER 66-96] 06 p0956 A66-17094  
Minimum fuel transfer solution of Lawden  
problem involving finite number of impulse  
thrusts separated by coasting arcs  
[AIAA PAPER 66-7] 07 p1136 A66-17881  
First-order perturbation solution to  
problem of minimum-fuel orbit transfer in  
form of equal slope guidance constraint  
[AIAA PAPER 66-11] 07 p1137 A66-17883  
Two-body problem applied to elliptic orbit,  
comparing three-impulse with single-impulse  
plane change applied at  
node 08 p1289 A66-18837  
Optimum impulsive transfer between  
elliptic and noncoplanar circular orbits,  
noting paths with up to three apsidal  
impulses 09 p1459 A66-20884  
Two-body problem of two-impulse transfer  
to or from given circular orbit and given  
nonplanar hyperbolic  
asymptote 10 p1608 A66-21788  
Optimum orbital transfer from circular to  
nonintersecting elliptical orbit with use of  
two impulses of unequal specific  
impulses 14 p2387 A66-28181  
Canonical transformation in optimal  
steering and cut-off-relight programs for  
orbital transfer about central  
field 14 p2387 A66-28182  
Analytical dynamics and optimal transfers  
between orbits 15 p2596 A66-29154  
Impulse functions associated with two-  
impulse transfer between nearly tangent  
noncoplanar coplanar elliptical  
orbits 16 p2805 A66-31539  
Optimum three-impulse rotation of plane  
of circular orbit 16 p2806 A66-31627  
Optimal free-space fixed thrust trajectories  
using impulsive trajectories as starting  
iteratives  
[AIAA PAPER 66-96] 17 p3001 A66-32457  
Minimum impulse orbital transfer between  
coplanar elliptical orbits with aligned axes,  
noting advantage of three- and two-impulse  
transfers 18 p3227 A66-33760  
Single-impulse transition in Newtonian  
central force field from hyperbolic to  
elliptical orbit in case of radial  
impulse 19 p3455 A66-35276  
Infinitesimal economic pulse transfers  
between quasi-circular noncoplanar  
orbits 19 p3459 A66-35583  
Coplanar orbit transfers by tangential  
impulses at apse point in graphical  
presentation of solutions 20 p3657 A66-38176  
Optimum impulsive transfers between  
noncoplanar elliptic orbits having collinear  
major axes and common center of  
attraction, noting overlap configuration of  
initial and final elliptic  
orbits 23 p4129 A66-41686  
**IMPURITY**  
**SA ATMOSPHERIC IMPURITY**  
Incremental-elasticity vs charge  
relationship used for impurity profile of p-n  
junction measurement 01 p0119 A66-10398  
Optimum conditions for improving  
sensitivity of spectral analysis and plotting  
calibration curves for determining impurity  
elements in silicon  
carbide 02 p0188 A66-11995  
Spectral determination of impurities in  
silicon carbide based on evaporation in  
argon atmosphere from cavity cut into  
graphite electrode 02 p0188 A66-11996  
Impurity bandwidth and separation from

of nonself-adjoint differential equations,  
with application to slow viscous  
incompressible Poiseuille  
flow 14 p2273 A66-26935
- Boundary layer generation for viscous  
incompressible fluid flow past rigid wall or  
obstacle to which fluid  
adheres 14 p2274 A66-26940
- Variational problem solved, giving lower  
stability bounds for finite disturbances of  
viscous incompressible  
flow 15 p2478 A66-29245
- Three-dimensional viscous free mixing,  
describing numerical and experimental  
solutions for wake and jet flows  
[AIAA PAPER 65-49] 15 p2424 A66-29272
- Mellor solutions for linearized wakes and  
jets in laminar and turbulent flow for class  
of pressure gradients 15 p2424 A66-29293
- Airfoil theory in incompressible flow for  
boundary layer suction or Helmholtz type  
wake 16 p2629 A66-31039
- Aerodynamic lift and moment during  
unsteady flow of ideal incompressible fluid  
around lattice of thin bent  
profile 16 p2690 A66-31620
- Derivation of constitutive equations for  
incompressible mixtures of Newtonian fluids  
using entropy production  
inequality 17 p2905 A66-31926
- Two-dimensional wake in incompressible  
unsteady vortex flow downstream of  
cylindrical body 17 p2907 A66-32279
- Book on theory of steady viscometric flows  
of non-Newtonian fluids, discussing design  
and interpretation of  
experiments 17 p2912 A66-32992
- Hot wire measurements in radial turbulent  
incompressible air jet 18 p3045 A66-33593
- Turbulent boundary layers in compressible  
and incompressible flow, examining pressure  
gradients, temperature distribution and heat  
transfer effects 18 p3097 A66-33595
- Laminar steady incompressible nonuniform  
flow in rectangular duct, stream tube and  
pipe 18 p3099 A66-34124
- Incompressible turbulent two-dimensional  
wall jet flow, discussing viscous interactions  
with surrounding fluid attachment  
streamline, momentum-flux equations,  
etc 18 p3099 A66-34125
- Boundary layer equations for nonstationary  
plane flow of viscous incompressible  
fluid 18 p3100 A66-34545
- Internal waves of finite amplitude and  
permanent form propagating on horizontal  
stream of incompressible  
fluid 18 p3101 A66-34664
- Velocity profile downstream from stepped  
wall having incompressible turbulent fluid  
flows 19 p3340 A66-35580
- Laminar boundary layer stability of  
incompressible fluid at elastic  
surface 19 p3342 A66-36463
- Navier-Stokes equations for plane interface  
with stagnation point formed by expelling  
different gas from leading edge of airfoil  
opposite to main flow 19 p3277 A66-36635
- Oscillating airfoils in incompressible flow  
in Possio equation, with solutions obtained  
in closed form 21 p3832 A66-39378
- Vector equations of steady incompressible  
viscous flow in absence of extraneous  
forces, discussing Beltrami flow, doubly  
laminar flow and plane  
flow 21 p3728 A66-39435
- Extension of extremum principles  
concerned with velocity fields for boundary  
value problems of incompressible rigid  
viscoplastic /Bingham/  
solid 21 p3832 A66-39440
- Laminar incompressible axisymmetric free  
jet with swirl, examining perturbation  
scheme for stream function and asymptotic  
series 21 p3729 A66-39453
- Nonlinear computational instability and  
long-term numerical integration of two-  
dimensional incompressible flow  
equation 21 p3730 A66-39473
- Mean viscous dissipation and bulk  
temperature variation in incompressible  
fully developed duct heat transfer, using  
Green theorem 22 p3998 A66-40033
- Performance of two-dimensional curvilinear  
jets of air cushion vehicles based on  
incompressible flow theory, noting stability  
criteria 22 p3844 A66-40499
- Book on MHD covering fundamental  
equations, boundary conditions,  
incompressible flow, steady flow MHD  
simple and shock waves,  
etc 22 p3957 A66-40619
- Approximate solution of second-order  
incompressible boundary layer equations,  
using mathematical model reformulated for  
application in vicinity of separation  
point 23 p4058 A66-41924
- Hydrodynamic phenomena in rotating fluid  
systems, characterizing flow of fluid whose  
viscosities, thermal conductivity and specific  
heats are constant 23 p4058 A66-41940
- Boundary layer solutions to two-  
dimensional stationary viscous  
incompressible flow past finite object under  
vanishing skin friction 23 p4060 A66-42009
- Experimental verification of stability  
criteria for incompressible inviscid flow  
with helical streamlines, using rotating  
cylinders 23 p4062 A66-42046
- Incompressible flow in two-dimensional  
bends treated by Rayleigh-Ritz method in  
Kamlyama modification of conformal  
mapping 24 p4157 A66-42264
- Incompressible viscous flow around right  
angle corner, noting effect of geometry on  
boundary layer and cross  
flow 24 p4194 A66-42410
- Regular solutions of laminar boundary  
layer equations near point of vanishing skin  
friction, calculating pressure  
gradient 24 p4194 A66-42413
- Velocity profile in isobaric zone  
downstream from step-shaped wall in case  
of incompressible fluid 24 p4197 A66-43002
- Compressible and incompressible flows  
made visible by optical method sensitive to  
density variations, shadowgraph, schlieren

system, Mach-Zehnder interferometer and holographic interferometry with lasers 24 p4192 A66-43196

## INCOMPRESSIBLE FLUID

Coupling method for determining natural oscillations of ideal incompressible liquid in vessel consisting of two regions 01 p0059 A66-11017

Stability analysis of adiabatic flow of incompressible fluid without equation linearization and by constructing functional from hydrodynamic fields 02 p0220 A66-12170

Transient heat transfer between thin circular tube and incompressible fluid, considering radial conduction and heat loss [ASME PAPER 65-HT-2] 04 p0595 A66-13393

Transverse current MHD conduction generators for AC power 04 p0459 A66-13467

Boundary layer control by blowing, analyzing turbulent boundary layer for flow about flat plate of incompressible fluid with intense cross flows 04 p0509 A66-13573

Injection on surface friction and on parameters of turbulent boundary layer, noting semiempirical Prandtl theory 04 p0509 A66-13655

Book on motions of viscous incompressible fluids, covering laminar and turbulent jets and solutions, based on exact Navier-Stokes equations 06 p0872 A66-16562

Shape and gravitational field of Earth calculated by using  $N$  homogeneous incompressible fluid shells to represent distribution of terrestrial mass 07 p1028 A66-17422

Kelvin-Helmholtz instability in fully ionized plasma in magnetic field, assuming variable streaming velocity 07 p1089 A66-17961

Shock wave propagation in electrically conducting incompressible fluid imbedded in magnetic field 07 p1089 A66-17975

Uniform motion of vortex system in inviscid fluid, examining effect of compressibility on motion of vortex singularities 08 p1204 A66-18528

Acceleration potentials applied to motion, at arbitrary Froude numbers, of high-aspect-ratio wing immersed in incompressible ideal fluid 08 p1205 A66-18601

Thermal laminar boundary layer formation on semiinfinite isothermal plate during uniform motion in viscous incompressible fluid over Prandtl number ranges 08 p1206 A66-18874

Velocity profile of main section of axisymmetric turbulent jet of incompressible fluid flowing into homogeneous companion flow of same fluid 08 p1206 A66-18876

Charge density distribution, electric field strength and flow rate of turbulent flow of incompressible fluid in flat nonconducting channel 08 p1263 A66-19172

Motion of three-dimensional diffusing vortex tube in incompressible viscous fluid 08 p1210 A66-19634

Stationary flow of viscous incompressible anisotropically conducting fluid in coaxial channel 11 p1743 A66-22235

Effect of incompressibility of substance on gravitational instability, deriving dispersion equation and comparing results with problem of incompressible fluids 11 p1735 A66-22410

Marginal convection in self-gravitating sphere of uniform incompressible fluid with uniform heat sources distribution 11 p1785 A66-22437

Small oscillations of pendulum with spherical cavity filled with viscous incompressible liquid 12 p1882 A66-24357

Propagation modes of small disturbances in homogeneous incompressible magnetoelastic medium at Alfvén velocities 12 p1929 A66-24379

Numerical method of calculating unsteady flow past arbitrary thin wing moving in ideal incompressible fluid 12 p1797 A66-24430

Flow graph in model of jet curtain in ideal incompressible weightless fluid with isolated vortex 12 p1798 A66-24433

Linearization of Rayleigh problem for viscous compressible conducting fluid, considering compressibility effects by evaluating solution of pressure equation 12 p1924 A66-24580

MHD gyroscope with axial magnetic field, plotting design parameters, estimating performance, etc 13 p2078 A66-25513

Vortex flow of ideal incompressible fluid past plate or slender wing near solid wall 13 p2067 A66-26532

Incompressible fluid static thrust augmentation devices for aircraft propulsion for cases of presence and absence of heat and work exchange [ASME PAPER 66-GT-116] 14 p2373 A66-27008

Solution of boundary layer equation for two-dimensional laminar steady motion of viscous incompressible fluid in convergent channel with suction at wall 14 p2276 A66-27728

Spin angular velocity stability of gyroscope with incompressible fluid-filled cavity as function of three degrees of freedom 14 p2277 A66-28051

Universal laminar boundary layer equations for incompressible fluid and homogeneous and dissociated gases derived, using parametric approximations 14 p2278 A66-28054

Laminar flow of incompressible fluid in rectangular channel, determining temperature distribution over channel cross section and thermal flux through wall for case of energy dissipation 14 p2415 A66-28317

Potential complex and forces in perfect incompressible fluid at rest at infinity with free vortices determined by pointless profiles excited by arbitrary motion 15 p2479 A66-29637

MHD drag of dielectric oscillating sphere in incompressible conducting fluid with uniform magnetic field aligned along axis of oscillation 15 p2553 A66-29689

Plane rotational motion of incompressible fluids in presence of homogeneous porous circular cylinder 15 p2481 A66-29856

Isotropic turbulence theory for incompressible fluid 16 p2683 A66-30165

Complex flow-perturbing potential for Joukowski profile in incompressible fluid with parabolic velocity distribution, using Jacob first order approximation to solve Dirichlet problem 16 p2627 A66-30211

Pressures in incompressible fluid around obstacle for parabolic velocity distribution at infinite distance upstream 16 p2627 A66-30212

Flow in viscous incompressible conducting fluid subjected to magnetic field in concentric cylinders rotating at different angular velocities, assuming planar motion, using differential equations 16 p2757 A66-30214

Motion equations for incompressible viscous fluid with constant vortex derived, using complex variable 16 p2683 A66-30216

Flow of turbulent incompressible fluid downstream from step-shaped wall, determining velocity fields in isobaric region, considering existence of boundary layer thickness at separation point 16 p2687 A66-31205

Linearized unsteady nonequilibrium flows produced by unsteady motion of thin foil or circular cylindrical shell in incompressible gas 16 p2687 A66-31288

Motion of viscous incompressible fluid in interspace between rotating and parallel fixed permeable plane through which supplementary fluid is injected, solved by Navier-Stokes equations 16 p2687 A66-31293

Steady motion of viscous incompressible fluid between concentric spheres, injecting and ejecting fluid through inlet and outlet holes, describing boundary conditions by series expansion 16 p2687 A66-31294

Navier-Stokes equations for rotational motion of incompressible viscous fluid at small Reynolds numbers between rotational surfaces 16 p2688 A66-31298

Theory of unsteady one-dimensional motion of ideal incompressible fluid, discussing equation of state 16 p2688 A66-31300

Stationary viscous incompressible fluid flow past rough surface, noting solution stability and friction stress determination for given pressure gradient 16 p2688 A66-31301

Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field 16 p2764 A66-31310

MHD boundary layer flow of incompressible conducting rotational fluid over infinite dielectric disk 16 p2765 A66-31414

Velocity and temperature profiles, hydrodynamic elements, heat transfer and friction coefficients of turbulent incompressible flow through circular arc flat tube 17 p2909 A66-32515

Stationary boundary value problem Navier-Stokes equation for incompressible viscous fluids 17 p2911 A66-32818

Self-similar solutions of two-dimensional laminar flow of incompressible electroconductive fluid in channel in cross electric and magnetic fields, using Jacobi elliptic integrals 17 p2971 A66-32818

Performance of hydrodynamic, hydrostatic or hybrid bearings determined by numeric solution of Reynolds lubrication equation for incompressible fluid films [ASME PAPER 66-LUBS-4] 17 p2932 A66-33117

Profile of supercavitating lattice traced for certain parameter values, using perturbative theory of perfectly irrotational incompressible fluid 17 p2914 A66-33218

Vekua method to solve Oseen form Navier-Stokes equation for incompressible viscous fluid flow 18 p3097 A66-33717

Motion of three-dimensional diffusible vortex tube in incompressible viscous fluid 18 p3099 A66-34117

Two-dimensional solution of Laplace equation for vortex formations in incompressible fluid 18 p3100 A66-34618

Hartree solution of MHD laminar boundary layer incompressible conducting fluid, specifically considering flow at inlet semiinfinite flat channel 18 p3147 A66-34618

Flow of incompressible viscous fluid subject to conditions governed by Navier-Stokes equation, examining fluid velocity time tends to infinity 18 p3101 A66-34618

Instability of free laminar boundary layer between parallel streams analyzed for incompressible fluid, noting values Reynolds number 18 p3102 A66-34918

Stress effects on plane creeping Newtonian flows of incompressible second-order fluids 18 p3103 A66-34918

Navier-Stokes equations solutions for incompressible fluid representing boundary layer flows with suction along corners of cylindrical bodies 19 p3341 A66-35819

Steady state heat convection in viscous incompressible fluid sandwiched between two surfaces perpendicular to direction of force of gravity 19 p3342 A66-36419

Behavior of solution of system of equations for unsteady boundary layer of two-dimensional liquid as time approaches infinity 19 p3343 A66-36819

Electromagnetic field effect on heat transfer during laminar flow of electrically conducting incompressible fluid in flat channel 20 p3607 A66-36919

Viscosity effect on small periodic oscillatory disturbance of rigidly rotating incompressible fluid 20 p3545 A66-37419

Plane nonlinear creep of free boundary in incompressible isotropic viscous fluid body 20 p3669 A66-37519

Radial flow of incompressible viscous fluid between two parallel disks 20 p3548 A66-37919

Navier-Stokes equation series form radial flow of incompressible fluid between two rotating parallel disks 20 p3548 A66-37919

Integral-diffusion analysis of turbulent flow of incompressible liquid 20 p3548 A66-38119

Apparent additive mass coefficient for three-dimensional hydrodynamic impact problem of floating sphere in incompressible fluid 20 p3548 A66-38119

Free laminar boundary layer flow between parallel streams of different magnetic field and temperatures for incompressible viscous fluid 21 p3776 A66-38619

Coefficients of equations of perturbed motion of body containing ideal incompressible liquid 21 p3770 A66-38919

Sufficient conditions for instability against small oscillations of symmetric laminar flow of inviscid incompressible perfect magnetofluid 21 p3791 A66-39119

Alfven wave propagation in incompressible fluid stratified by inhomogeneous fluid density or magnetic field strength 21 p3791 A66-39170

Unsteady convective heat transfer of incompressible fluid between two solid channel walls 21 p3728 A66-39340

Velocity distribution of fluctuating axisymmetric flow of incompressible second-order fluid near stagnation point 21 p3728 A66-39346

Two-dimensional unsteady flow of second-order incompressible fluids, noting analogies to Newtonian case 21 p3728 A66-39437

Steady laminar flow of viscous incompressible fluid through two-dimensional channel with fluid sucked or injected with different velocities through uniformly porous parallel walls 21 p3730 A66-39461

Small parameter method to study steady state flow of viscous incompressible fluid in journal bearing 22 p3928 A66-40688

Alfven shocks for flow of highly conducting incompressible fluid over blunt body where magnetic and flow vectors are not aligned 22 p3957 A66-40705

Laminar heat transfer in plane channel with nonuniform temperature field at inlet 22 p4000 A66-40812

Pressure induced flow of elasticoviscous electrically conducting incompressible fluid between relatively moving porous walls in presence of transverse magnetic field 23 p4053 A66-41121

Slow steady flow of viscous incompressible fluid between two coaxial circular cylinders with axial roughness 23 p4054 A66-41122

Existence theorem for stationary flow in magnetic field of incompressible viscous fluid electrically conductive around solid electrically conducting obstacle 23 p4100 A66-41173

Earth shape, moment of inertia and gravitational field determined from two nonlinear integral equations for potential of rotating incompressible fluid 23 p4063 A66-41202

Heat transfer in entrance section in rectangular duct for incompressible fluid in laminar pulsating flow with periodic pressure gradient 23 p4148 A66-41216

Constitutive and balance equations derived in tensorial form for incompressible fluid with nonlinear viscous characteristics 23 p4055 A66-41382

Incompressible fluid motion inside cylinder rotating at constant angular velocity with generatrix forming curve 23 p4055 A66-41560

Unsteady state lift and moment action on lattice of profiles moving in incompressible fluid, determining suction originating at leading edges of profiles 23 p4009 A66-41723

Laminar boundary layer in incompressible fluid, noting effect of variation of kinematic viscosity and density on stability 23 p4056 A66-41725

Volterra equation and Green function to solve MHD problem of unsteady flow of viscous incompressible conducting fluid with time dependency 23 p4106 A66-41837

Boundary value problem of steady two-dimensional MHD flow of viscous incompressible fluid past rigid plate 23 p4106 A66-41875

Steady three-dimensional rotational vortex flow of incompressible fluid, considering viscosity effects 23 p4058 A66-41929

Parametric method in laminar boundary layer theory, noting reduction of equations for incompressible fluid 23 p4059 A66-42008

Hydrodynamic stability of incompressible fluid based on Navier-Stokes equations including numerical calculations of boundary layer disturbances and temperature-independent material constants 23 p4060 A66-42021

Heat transfer in incompressible viscous fluid between two nearly parallel walls with harmonically varying distance, determining velocity field and temperature distribution 23 p4150 A66-42029

Plane laminar jet of incompressible conducting fluid propagating homogeneous magnetic field at magnetic Reynolds number 24 p4196 A66-42872

Laminar flow of fluid with varying viscosity in tube with walls at constant

temperature, analyzing equations of motion and equations for conservation of energy 24 p4197 A66-42991

Two-dimensional bubble contours in steady state turbulence-free flow of ideal incompressible fluid, obtaining solution for all internal pressures 24 p4232 A66-43064

# INCONEL

Nickel-based superalloy Inconel 713C easily forged when made by powder metallurgy methods but not when prepared by casting 11 p1715 A66-22536

Lightweight titanium and Inconel pressure vessel for Apollo cryogenic hydrogen and oxygen storage systems 20 p3541 A66-37092

# INDENTATION

Dynamic indentation of metals with conical projectiles and dynamic tip flattening of projectiles, noting inertia and strain rate effect 02 p0243 A66-11691

Variation of mean applied pressure with deformation size when prismatic body slowly indents semilinear block 08 p1311 A66-19294

Deformation and strength properties of refractory solids at temperatures up to 2000 degrees C, using indentation hardness measurements for stress-strain measurements in strength properties 18 p3254 A66-33967

Indentation damage and subsequent annealing effect on etch-polished Ge surfaces at room temperature examined with optical microscope, using interference contrast techniques 19 p3434 A66-35401

Wiener-Hopf and series solutions to BVP of indentation stresses and displacements in infinite hollow elastic cylinder for axisymmetric punch of finite length and arbitrary profile 22 p3990 A66-40139

# INDEPENDENT VARIABLE

Transformation of unknown functions and independent variables entering into differential equations for motion of nonviscous nonheat-conducting gas 02 p0220 A66-12178

Monograph on Levy method for deflection of loaded simply-supported infinite plate strip, introducing class of real functions 04 p0589 A66-14011

Transition variable as function of superconductor reduced temperature, showing temperature dependency of penetration depth, acoustical attenuation and thermoconductivity 16 p2777 A66-30937

Summability of independent random variables, discussing convergence properties of sequence 19 p3389 A66-35982

Asymptotic behavior of transition probability matrices, analyzing limit theorems involving capacities in Markov chains 19 p3389 A66-35984

Character of continuity of solutions to second-order linear elliptic equations with many independent variables 20 p3592 A66-38421

Synthesis of optimal Liapunov-Bellman function, noting sequential solution method for independent variables and method using first-order partial differential equation 21 p3758 A66-39281

Geometrical properties of partial differential equations with independent variables, using Cartan method 23 p4084 A66-41061

# INDIUM

Radiation damage to germanium, silicon, indium and gallium antimonides and arsenides 01 p0119 A66-10373

Neutron flux in atmosphere measured by method of indium activation 02 p0284 A66-12130

Electron energy diffusion in superconducting thin Sn and In films bombarded by alpha particles observed in terms of IR drop 06 p0927 A66-16755

Critical magnetic field and temperature in superconducting metal 08 p1278 A66-19637

Ultrasound absorption by superconducting indium single crystals, noting nonlinear dependence on sonic field amplitude 09 p1428 A66-20592

Distribution coefficient and electrical behavior of indium in cadmium telluride crystals, using In 114 /half-life 49 days/ as tracer 10 p1574 A66-21352

Behavior of trace elements in gallium arsenide and materials and methods used for ohmic contacts to n-and p-type specimens, stressing importance of indium 11 p1757 A66-23283

Diffusion of indium along sessile dislocation in silicon 14 p2356 A66-27070

Neutron irradiation effect on superconductive properties of tin and indium foils at low temperatures, noting decrease of critical temperature and field 14 p2364 A66-27641

Neutron flux in atmosphere measured by method of indium activation 14 p2377 A66-28087

Geometrical resonance and boundary effects in tunneling from superconducting indium 16 p2767 A66-30126

Energy spacing of geometrical resonance structure in very thick indium films, noting interference between electron-like states which propagate with different velocities 16 p2769 A66-30159

Anisotropy of electrical resistance of indium in magnetic field shown to be nearly absent, confirming absence of open Fermi surface 17 p2977 A66-32315

Fermi surface of indium investigated by means of RF size effect at 3 Mc 17 p2977 A66-32316

Critical magnetic field and temperature in superconducting metal 18 p3155 A66-34180

Resonant frequency of helicon waves in indium, deriving high field Hall coefficient 19 p3445 A66-36331

Ultrasound absorption by superconducting indium single crystals, noting nonlinear dependence on sonic field amplitude 20 p3622 A66-38125

Critical magnetic field and transition temperature measurements of superconducting indium in porous glass, using LF mutual inductance technique 21 p3796 A66-38549

Cyclotron resonance observation of electron scattering by Ga and In atoms in Ge 21 p3797 A66-38754

Indium and thallium first spectra sp2 atom configurations and configuration mixing 22 p3960 A66-39801

Photoionization cross section of negatively charged In atoms in n-type silicon from comparison of intrinsic photoconductivity with impurity photoconductivity 22 p3964 A66-40309

Angular variation of position of energy loss maxima in indium 23 p4110 A66-41180

# INDIUM ALLOY

Thermal and electric properties of indium antimonide/indium telluride alloys as function of composition and annealing temperature 01 p0116 A66-10188

Impurity-recombination emission in diodes of n-type Si single crystals alloyed with In 02 p0206 A66-12092

Magnetic and resistive superconducting transitions on bulk samples of indium-lead alloys in alpha-phase region, considering results relative to Glag

theory 09 p1423 A66-20067  
 Indium-cadmium alloy superconducting transition temperatures for varying compositions, noting electronic structure 13 p2169 A66-26278  
 Semiconducting properties of several gallium and indium antimony tellurides systems and their metallurgical aspects 17 p2986 A66-33296  
 Temperature dependence of mixed-state thermoconductivity of type II superconducting In-Pb alloys in magnetic field 21 p3797 A66-38751  
 New phase in mercury-indium alloy system established by resistance, superconductivity transition temperature and X-ray diffraction measurements 24 p4255 A66-42486

 Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 01 p0043 A66-10764  
 Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 01 p0124 A66-10770  
 Electrical properties of copper diffused p-type indium antimonide crystals 01 p0127 A66-11030  
 Crystal Hall detectors prepared by gluing thin indium antimonide wafer on rectangular parallelepiped ferrite base 01 p0045 A66-11031  
 Quantum oscillation associated with quantization of electron energy spectrum of n-type indium antimonide 02 p0274 A66-11735  
 Helicon effect in semiconductors, using indium antimonide in resonant cavities 02 p0276 A66-12004  
 Electron energy and momentum dissipation in n-type InSb at low temperatures, discussing collision effects on hot electron escape 02 p0276 A66-12079  
 Propagation of LF helicon waves in strongly doped cadmium arsenide and indium antimonide 03 p0410 A66-12944  
 Capacitance-voltage characteristics of anodized InSb surface measured, using metal oxide semiconductor method 03 p0411 A66-13005  
 High electric fields effect on propagation of 24-GHz microwaves along surface on n-type indium antimonide 04 p0562 A66-13749  
 Temperature dependence of electric conductivity in indium antimonide and gallium arsenide measured by noncontact method in terms of Q-factor change 04 p0563 A66-13892  
 Magnetic resonance applied to semiconductors, determining electron density at nucleus sites and kinetic energy temperature of hot electrons in indium antimonide 04 p0563 A66-14030  
 Microwave emission at O-band from n-and p-type indium antimonide subjected to applied electric and magnetic fields 04 p0564 A66-14103  
 Parameters associated with inelastic polar electron scattering in indium antimonide 04 p0565 A66-14267  
 Temperature dependence of effective electron mass of indium antimonide 04 p0565 A66-14275  
 Noise and lifetime of nonequilibrium current carriers in p-indium antimonide 04 p0566 A66-14276  
 Transport coefficients of intrinsically conducting InSb above room temperature in magnetic field of medium strength 04 p0566 A66-14288  
 Influence of microinhomogeneities under magnetic field on Nernst effect in InSb 04 p0568 A66-14345  
 High pressure high current argon discharge covering statistical variations of nonblack body, photon and IR radiation and measurement with InSb photodiode 05 p0720 A66-14507  
 Optical properties of polycrystalline InSb

films noting index of refraction, absorption coefficient and transmission 05 p0741 A66-15852  
 Lattice thermal conductivity of GaAs and InSb calculated for 2 to 300 degrees K, considering separate contributions of longitudinal and transverse phonons 05 p0742 A66-15872  
 Electron drift velocity and mobility of indium antimonide obtained from pulsed measurements of conductivity and Hall effect at various temperatures 06 p0922 A66-16173  
 Direct measurement of energy relaxation time between hot electrons and lattice in n-type indium antimonide in hydrogen temperature range 06 p0929 A66-17036  
 X-ray diffraction method for measuring thermal expansion coefficient of germanium, silicon, indium antimonide and gallium arsenide 06 p0930 A66-17047  
 In-pile neutron and gamma-ray irradiation of n-type indium antimonide, isochronous annealing indicating existence of five recovery stages 06 p0936 A66-17134  
 Magnetic field effects on spectrum and intensity of spontaneous emission in InSb luminescent diode 07 p1094 A66-17316  
 Carrier temperature injected into InSb effect on shape of direct intrinsic line 07 p1095 A66-17317  
 Laser action achieved in n-type indium antimonide excited by 15-kv electron beam at 20 and 4 degrees K 07 p1043 A66-17341  
 Wave propagation in Q band of n-type indium antimonide at low temperature as function of longitudinal magnetic field, noting helicon waves 07 p1101 A66-18200  
 Nonlinearities in helicon wave propagation through InSb cooled by liquid nitrogen 07 p1102 A66-18202  
 Hall current and Hall drift velocity in single crystal indium antimonide under electric and magnetic field 07 p1103 A66-18214  
 Helical oscillations of plasma immersed in time-varying static magnetic field, measuring frequency, amplitude and transition modes 07 p1103 A66-18216  
 Microwave emission from InSb, measuring energy generated at low temperatures and intense electric and magnetic fields 07 p1103 A66-18218  
 Microwave emission from InSb in magnetic fields, explaining experimental results via modified traveling wave helicon model 07 p1104 A66-18219  
 Electron gas energy scattering in n-type indium antimonide at helium temperatures under action of DC field 07 p1104 A66-18259  
 Thermal ionization of small traps in cubic piezoelectric 07 p1105 A66-18377  
 Electron spin effect on quantum oscillations of magnetoresistance and Hall effect in n-InSb single crystal 08 p1269 A66-18971  
 Saturation of microwave impedance and occurrence of microwave emission in indium antimonide for strong longitudinal or transverse magnetic fields 08 p1270 A66-19059  
 Recombination of nonequilibrium charge carriers in p-type indium antimonide, using steady state photomagnetolectric effect 08 p1272 A66-19246  
 Irradiation of indium antimonide with slow neutron 08 p1276 A66-19614  
 Electric properties of single crystal p-type InSb, obtaining samples by zone melting, thermal processing, etc, noting hole concentration plotting 08 p1278 A66-19625  
 Mobility of hot electrons in runaway regime of n-type InSb and GaAs at low temperatures 09 p1412 A66-19987  
 Capacitance of alloyed p-n junctions in p-type InSb is inversely proportional to square root of bias voltage 09 p1429 A66-20814  
 Electron gas energy scattering in n-type indium antimonide at helium temperatures under action of DC field 09 p1431 A66-20903  
 Effective mass in InAs and InSb from Landau shift of peak emission in laser diodes 10 p1543 A66-21579  
 Current-controlled negative-resistance effect between nonsymmetrical ohmic contacts on opposite side of p-type indium antimonide 10 p1585 A66-22081

Current oscillations and microwave emission in indium antimonide subjected high applied parallel electric and magnetic fields at 77 degrees K 10 p1585 A66-22081  
 Indium antimonide optical absorption shift forbidden band narrowing and tin alloy induced by neutron bombardment 10 p1587 A66-22111  
 Temperature and alloying effect on indium antimonide reflection spectrum 10 p1588 A66-22111  
 Hall effect in alloyed crystals of n-type indium antimonide 10 p1589 A66-22111  
 Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 11 p1661 A66-22211  
 Variation in thermoelectromotive force at magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 11 p1749 A66-22211  
 Neutron irradiation of InSb single crystals noting conductivity type change in p-type and conductivity magnitude in n-type crystals 11 p1749 A66-22211  
 Effect of plastic bending on indium antimonide electrical properties, measuring crystal dislocations, Hall coefficient etc 11 p1751 A66-22211  
 Indium antimonide diodes of various thickness for high injection levels, results in graphical form applied to magnetic diode production 11 p1666 A66-22211  
 Indium antimonide thin film preparation via vacuum deposition, noting evaporation rate effects on electrical properties of film 11 p1756 A66-23011  
 New semiconductor materials produced oriented inclusion of very highly conductive phases in semiconductor, noting In properties and application 13 p2161 A66-25111  
 Semiconductor bulk injection laser compared to junction lasers, noting In npp structures 13 p2091 A66-25511  
 Stimulated emission from electron beam excitation of tellurium and pure and n-type doped indium antimonide in semiconductor lasers 13 p2099 A66-26111  
 Photoluminescence and stimulated emission of gallium arsenide and indium antimonide obtained by optical pumping, noting effect of applied magnetic field on laser and diode emissions 13 p2099 A66-26111  
 Propagation of circularly polarized electromagnetic waves in circular semiconductor cylinder surrounded by metal tube and immersed in DC magnetic field 13 p2169 A66-26211  
 Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 14 p2357 A66-27011  
 Spin-lattice relaxation of conduction electrons in semiconductors of n-InSb type with scattering at acoustical and optical phonons 14 p2358 A66-27011  
 Microwave radiation from inductive post of indium antimonide in broadband spectrum occurring when placed in a magnetic field and pulsed to average electric field, results suggest solid state plasma instabilities 14 p2363 A66-27511  
 Nonlinear galvanomagnetic effects in type InSb in quantum limit, using uncompensated and compensated samples 14 p2366 A66-27711  
 Anomalous diffusion of zinc in indium antimonide, noting two diffusion currents 14 p2367 A66-28211  
 Influence of microinhomogeneities under magnetic field on Nernst effect in InSb 14 p2367 A66-28211  
 Sectorial structure effect on current carrier concentration of germanium doped indium antimonide single crystals 15 p2558 A66-28511  
 Electron gas electroconductivity relaxation time and energy loss in n-type InSb cryogenic temperatures 15 p2558 A66-28611  
 Hall coefficient increase with temperature and electron transition to second conduction band in InSb 15 p2558 A66-28611  
 Helicon wave propagation in InSb and In at room temperature 15 p2559 A66-28611  
 Heterodyne detection at millimeter

- wavelengths shown in distributed structure of bulk indium antimonide, noting conversion loss and noise properties 15 p2462 A66-29017
- New type of oscillation when n-type indium antimonide is placed in steady magnetic field at 78 degrees K and pulsed with electric field 15 p2566 A66-29392
- Transport properties in indium antimonide under magnetic field at microwave frequency, showing effect of angular frequency times relaxation time /of electrons and holes/ 15 p2566 A66-29393
- Temperature dependence of electric conductivity in indium antimonide and gallium arsenide measured by noncontact method in terms of Q-factor change 15 p2568 A66-29705
- Spectral distribution of recombination radiation caused by electroluminescence /EML/ in indium antimonide 15 p2568 A66-29726
- Resistance anomaly in n-type InSb at very low temperatures, noting experimental results 16 p2768 A66-30140
- Hydrostatic pressure effect on energy gap, carrier concentration and electron and hole mobilities of indium antimonide 16 p2784 A66-31447
- Generation-recombination and modulation noise power spectrum of high purity p-type InSb at 77 degrees K 16 p2784 A66-31449
- High-mobility InSb thin film preparation by flash evaporation of elemental In and Sb in vacuum and oxidation of film surface prior to recrystallization in inert atmosphere 16 p2785 A66-31575
- Indium arsenic antimonide single crystals in p-n junction laser 16 p2721 A66-31767
- Spontaneous and induced coherent radiation from indium antimonide electron-hole plasma 16 p2721 A66-31768
- Photo-Hall effect and photoconductivity on compensated p-InSb at low temperatures, examining temperature dependence of carrier mobility 16 p2788 A66-31773
- Optical reflection, transparency and Faraday effect for indium antimonide, calculating effective electron mass, relation between energy and wave number, etc 16 p2788 A66-31777
- Electron mobility in p-type indium antimonide, noting entrainment of minority carriers by majority 16 p2789 A66-31784
- Harmonic generation in microwave emission from InSb, attributing resonance type radiation to stimulated cyclotron radiation and plasma wave excitation 17 p2978 A66-32410
- Quantum theory of electric conductivity of semiconductors with nonstandard band, discussing influence of spin splitting of Landau levels on oscillations of transverse magnetoresistance in n-InSb 17 p2978 A66-32508
- Irradiation of indium antimonide with slow neutron 17 p2983 A66-33128
- Electric properties of single crystal p-type InSb, obtaining samples by zone melting, thermal processing, etc., noting hole concentration plotting 17 p2984 A66-33139
- Thermal conversion mechanism in heat treatment of InSb indicates hydrogen dissolved plays role of donor while behavior of oxygen is not yet known 19 p3433 A66-35331
- Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 19 p3440 A66-35764
- Temperature and alloying effect on indium antimonide reflection spectrum 19 p3440 A66-35773
- Hall effect in alloyed crystals of n-type indium antimonide 19 p3441 A66-35779
- Attenuation, guide wavelength and characteristic impedance of rectangular waveguides with indium antimonide side wall derived for propagating modes 20 p3524 A66-37113
- Pinch effect in InSb degenerate plasma, discussing electric conductivity and recombination emission spectra 20 p3615 A66-37371
- Dependence of Hall effect and conductivity of irradiated samples on reciprocal temperature in nuclear transmutations produced in InSb by bombardment with slow neutrons 20 p3617 A66-37485
- Gamma irradiation from Co 60 effect on indium antimonide, determining defect formation on dose and limiting position of Fermi level for n-and p-type material 20 p3617 A66-37552
- Quantum oscillation of transverse and longitudinal magnetothermal emf in n-type indium antimonide compared with oscillations of transverse and longitudinal magnetoresistance and Hall coefficient 20 p3618 A66-37557
- Electron tunneling from metal to doped indium antimonide through oxide layer measured, obtaining characteristics of conductance vs applied voltage for n-and p-type crystals 20 p3620 A66-37769
- Receiver with n-type indium antimonide detector for investigating absorption spectra in submillimeter wave range 20 p3561 A66-37999
- Vacuum thermal decomposition of InSb and GaSb surfaces, noting evaporation rates 20 p3624 A66-38411
- Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 20 p3624 A66-38427
- Impurity atom behavior in diatomic InSb and GaSb crystal lattices analyzed, using nuclear gamma resonance, measuring absolute values of f, chemical displacements and line widths 21 p3799 A66-38922
- Quantum oscillations of Hall effect and longitudinal and transverse reluctance in n-indium antimonide, noting spin splitting and temperature and electron concentration effect on oscillation maximum 21 p3799 A66-38924
- Electrical properties of indium antimonide single crystals with noncompensated impurity concentration, determining position of deep-seated levels in forbidden band 21 p3799 A66-38929
- Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 21 p3800 A66-38960
- Isochronal and isothermal stage II recovery in high energy electron irradiated n-type InSb semiconductor, based on Hall coefficient and electroconductivity 21 p3800 A66-38994
- Cryogenic optically excited recombination emission in single crystal InSb semiconductor and transitions involving phonon creation, acceptor impurities and band-to-band emissions 21 p3800 A66-38996
- Current density, electron mobility, magnetoresistance, negative resistance and impact-ionization-produced solid state magnetoplasma oscillations in InSb single crystal semiconductor at high electric and magnetic fields 21 p3805 A66-39568
- Thermal emf of semiconductors in strong magnetic field, examining formation of spherically symmetric zone subject to arbitrary conduction-electron energy dispersion law 22 p3960 A66-39824
- Nonequilibrium charge carrier lifetime in indium antimonide single crystals with Ge and Au impurities 22 p3965 A66-40315
- Coherent radiation generation in electron-hole indium antimonide plasma, discussing emission spectrum 22 p3965 A66-40319
- Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 22 p3966 A66-40829
- Spin-lattice relaxation of conduction electrons in semiconductors of n-InSb type with scattering at acoustical and optical phonons 22 p3967 A66-40839
- Large-signal AC field effect experiments with A and B real surfaces of indium antimonide exposed to various chemical reactions and high electric field described by tunnel equation 23 p4111 A66-41185
- Sectorial structure effect on current carrier concentration of germanium doped indium antimonide single crystals 23 p4112 A66-41286
- Indium antimonide diodes of various base thickness for high injection levels results in graphical form applied to magnetic diode production 23 p4045 A66-41478
- Nonequilibrium plasmas produced in InSb by both impact ionization and injection, examining instabilities due to HF oscillations and negative resistance 23 p4114 A66-41582
- Magnetic pinch formation in indium antimonide and possibility of population inversion in pinch, using strong current supported by electron-hole plasma 24 p4249 A66-42224
- Thermal conductivity change in single crystal InSb irradiated with electrons, noting additive thermal resistivity increases 24 p4249 A66-42228
- Anisotropic electron distribution in pure semiconductors near avalanche, considering indium antimonide 24 p4252 A66-42355
- ### INDIUM ARSENIDE
- Semiconductor maser design and principles tabulating indium phosphide, gallium and indium arsenide types 04 p0532 A66-14183
- Recombination of nonequilibrium charge carriers in indium arsenide, noting radiative and impact recombination 04 p0569 A66-14357
- Transport coefficients of n-indium arsenide to calculate electron concentration, mobility and three-band scattering mechanism 04 p0570 A66-14481
- Stimulated emission in indium arsenide shows excitation threshold low and light emission highly directional 06 p0893 A66-17026
- Injection luminescence in InAs diodes 07 p1094 A66-17315
- Hall effect measured by splitting alternating voltage produced in Hall circuit into two components, one with phase coinciding with Hall emf and other with phase departing by 90 degrees 08 p1273 A66-19289
- Specific conductivity, Hall, Nernst, Ettingshausen and other transfer effects in InAs-CdTe and InAs-ZnTe alloys 09 p1428 A66-20539
- Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 09 p1429 A66-20768
- Microwave emission from bulk n-type indium arsenide in presence of applied electric and magnetic fields at liquid nitrogen temperatures 10 p1572 A66-21069
- Effective mass in InAs and InSb from Landau shift of peak emission in laser diodes 10 p1543 A66-21579
- Indium arsenide diodes for thermophotovoltaic conversion at 1000 K 11 p1639 A66-22248
- Carbon and ethylene tetrachloride ultrasonic modulators applied to IR laser heterodyne experiments on InAs photodiode 11 p1714 A66-23353
- Hall generator constructed by vapor deposition of thin films of indium arsenide from 4 to 500 degrees K 12 p1838 A66-24407
- Ettingshausen-Nernst effects in InAs-InP solid solutions, discussing differential thermal emf, scattering at acoustical and thermal oscillations of lattice, ionic impurities, etc 12 p1930 A66-24685
- InAs laser emission, discussing radiative transitions, coherent emission from InAs diodes, recombination mechanisms in IR radiation spectra, etc 13 p2089 A66-25065
- Optical excitation in indium arsenide and gallium antimonide yielding laser radiation 13 p2090 A66-25438
- Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 14 p2361 A66-27303
- V-I characteristics of alloyed p-n junctions in InAs in temperature range from 78 to 296 degrees K 14 p2364 A66-27745
- Recombination of nonequilibrium charge carriers in indium arsenide, noting radiative and impact recombination 14 p2368 A66-28255
- Helicon wave propagation in InSb and InAs at room temperature 15 p2559 A66-28630
- Traveling solvent technique for p-n-p or n-p-n semiconductor structures with highly doped middle layer demonstrated on indium arsenide 16 p2779 A66-31088
- Structure and electron mobility of thin indium arsenide films prepared by co-evaporation technique 16 p2780 A66-31094
- Coherent emission of indium arsenide phosphide p-n junction 16 p2721 A66-31788
- Chemical etchants for In As noting functions, rate dependence on bromine in methanol, p-n junction delineation,

etc 19 p3434 A66-35349  
 Thermal and electric properties of InAs-GaAs alloy as function of composition, impurity additions and temperature 19 p3436 A66-35427  
 Quantum oscillations in magnetoresistance, Hall coefficient and thermoelectric power in strong transverse and longitudinal magnetic fields for n-InAs polycrystals at liquid helium temperature 19 p3438 A66-35479  
 Indium arsenide lasers and HgTe-CdTe photodetectors with very fast time constants for IR spectral band 19 p3376 A66-36268  
 Effective electron mass in n-type indium arsenide at high temperatures and high carrier density, noting temperature dependence of effective electron mass 20 p3616 A66-37444  
 Gunn oscillations in indium arsenide, measuring electrical properties of diodes, noting current voltage characteristics as function of applied stress 20 p3620 A66-37773  
 Scattering mechanism in space charge region as possible explanation of temperature fluctuations of carrier mobility in n-and p-type indium arsenide 23 p4115 A66-41829

## INDIUM COMPOUND

Transverse Dember effect in anisotropy of electrical and photoelectrical characteristics of indium selenide 04 p0565 A66-14259  
 Hall coefficient, electric resistance and thermoelectric power in indium-rich solid solutions measured at various pressures and at 110 degrees C 06 p0922 A66-16172  
 Semiconductor radiation damage in III-V compounds indium antimonide, gallium arsenide and indium arsenide, including values of threshold displacement energies, post-irradiation recovery, etc 06 p0935 A66-17129  
 Optical properties of indium oxide, noting direct and indirect transitions in thin films and crystal plates, absorption coefficient as function of photon energy, etc 10 p1577 A66-21560  
 Photoconductivity and optical transmission of cadmium-indium-telluride, noting temperature dependence 13 p2165 A66-25685  
 Cadmium and indium thio germanates, properties and synthesis 14 p2361 A66-27339  
 Fermi surface of metals and semimetals and quantum oscillations in ultrasonic attenuation and magnetic susceptibility of InBi 14 p2366 A66-27763  
 Optical and electrical characteristics of n-type indium oxide films prepared by spraying, noting relation between carrier mobility and particular impurity used 15 p2559 A66-28623

## INDIUM PHOSPHIDE

Temperature dependence of heat conductivity and thermal emf in n-type InP 02 p0277 A66-12094  
 Semiconductor maser design and principles tabulating indium phosphide, gallium and indium arsenide types 04 p0532 A66-14183  
 Intrinsic optical absorption in indium phosphide single crystals mechanically polished and plotted vs photon energy 07 p1095 A66-17318  
 Instabilities of current and potential distribution in n-type GaAs and InP in electric field of several thousand v/cm 07 p1104 A66-18221  
 Mossbauer effect in polycrystalline indium phosphide and gallium arsenide 08 p1277 A66-19618  
 Temperature dependence of integral light flux of recombination radiation in indium phosphide n-p junction 09 p1431 A66-20935  
 Elastic constants obtained from longitudinal and transverse acoustic waves propagated in single-crystal indium phosphide 10 p1578 A66-21585  
 Ettingshausen-Nernst effects in InAs-InP solid solutions, discussing differential thermal emf, scattering at acoustical and thermal oscillations of lattice, ionic impurities, etc 12 p1930 A66-24685  
 Intervally scattering in III-V semiconductors, noting relation to Gunn effect, scattering in GaAs by longitudinal optic phonons, in InP by longitudinal acoustic phonons 16 p2776 A66-30733  
 InP spontaneous and simulated emission spectra, noting separation of lines by longitudinal optical phonon energy,

threshold current magnitude, etc 17 p2886 A66-32407  
 Mossbauer effect in polycrystalline indium phosphide and gallium arsenide 17 p2983 A66-33132  
 Volt-ampere characteristics and photomicrographs of p-n junctions produced by diffusion of Zn and Cd into InP 21 p3798 A66-38918  
 Thermal conductivity of InP-GaAs solid solutions in vacuum 22 p3962 A66-40051  
 Stable space-charge layers in two-valley semiconductors 22 p3963 A66-40101

## INDIUM TELLURIDE

Deviations from stoichiometry in indium telluride, finding that no impurity conduction occurs in this semiconductor 07 p1099 A66-17916  
 Deviations from stoichiometry in indium telluride, finding that no impurity conduction occurs in this semiconductor 18 p3155 A66-34182

## INDOLE

New synthesis of o-nigrophenylacetaldehyde 16 p2646 A66-30621

## INDUCED FLUID FLOW

EHD traveling potential wave interaction inducing electroconvection in slightly conducting current without electrical contact with flow 23 p4104 A66-41496

## INDUCER

SA HELICAL INDUCER  
 Analog computer solution to nonlinear dynamic system model of oscillations associated with cavitating inducers and sequence of trend-and-effect of constituent influences [ASME PAPER 65-FE-14] 06 p0870 A66-16210  
 Hubless inducer with shroud eliminates vane clearance cavitation, noting test data, suction speed, interrelation of boundary layer transition and cavitation, etc [ASME PAPER 66-FE-8] 17 p2932 A66-33262

## INDUCTANCE

Topological analysis for networks containing nonreciprocal components and mutual inductance 02 p0208 A66-11907  
 Inductance of superconducting solenoid calculated from AC resistance and discharge oscillograms 05 p0737 A66-15336  
 Active filters and oscillators using simulated inductance 11 p1661 A66-22387  
 Switch and load inductances and relation to performance reduction in superconductor energy storage systems 12 p1928 A66-24303  
 Inductance of superconducting solenoid calculated from AC resistance and discharge oscillograms 15 p2569 A66-29983  
 Nonlinear inductance effect on leading edge of high voltage nanosecond pulses during passage through ferrite magnetic field 21 p3801 A66-39156

## INDUCTION

SA MAGNETIC INDUCTION  
 SA RLC CIRCUIT  
 Dielectric diode induction effect demonstrated through equivalent circuit 14 p2252 A66-27491

## INDUCTION HEATING

Self-induction of ellipsoidal plasmoid, deriving relevant equations 21 p3787 A66-39051  
 Compressible fuel mixture deflagration perturbation stability in induction regime characteristic of heat-stressed combustion chambers of rocket engines 23 p4122 A66-41790

## INDUCTION SYSTEM

Discharge chamber with water-cooled metallic walls and HF induction 09 p1407 A66-20144  
 Plasma cluster and shock wave acceleration using plasma induction accelerator with radial magnetic field 09 p1333 A66-20984  
 Behavior of current carrying superconducting coil with heat generation in windings, noting voltage-current characteristics 10 p1509 A66-21562  
 Conical induction plasma gun construction in strongly preionized regime and results of electrostatic probe measurements made with discharge camera 17 p2969 A66-32547  
 Discharge chamber with water-cooled metallic walls and HF induction 21 p3793 A66-39415  
 Faraday unipolar induction in solid cylinder of nonideal type II superconductor, noting contributions to observed

emf 23 p4114 A66-41622  
 Rapid transfer of magnetic energy via exploding foils, noting inductive storage 24 p4239 A66-43211

## INDUCTOR

## SA MAGNETIC COIL

Thin film inductors design limitations due to low inductance values, low Q and undesirable coupling 17 p2882 A66-32111  
 Optimal lumped constant dispersive network design with inductors and capacitors functioning independently 23 p4034 A66-41011

## INDUSTRIAL SAFETY

Computer-directed malfunction checkout of rockets, boosters and modern military aircraft 04 p0526 A66-14021  
 Task Committee on Factors of Safety structural reliability and safety evaluation 15 p2614 A66-29611

## INDUSTRY

## SA AIR FREIGHT INDUSTRY

## SA AIRCRAFT INDUSTRY

SA DEFENSE INDUSTRY  
 Book on titanium covering extraction processes, commercial manufacture and fabrication, cost estimates, marketing, etc 15 p2521 A66-28869

Industry approach to determining weapon system concepts in terms of desired system functions and attainable subsystem performance capabilities 19 p3480 A66-35553

LEM program at RCA, discussing history, management, lunar landing, rendezvous, tracking antenna, radar, etc 21 p3714 A66-39511

LEM program history and management at RCA, discussing Apollo mission studies and initial assignments 21 p3822 A66-39511

## INELASTIC BODY

Stress analysis in inelastic range at elevated temperature covering stress-strain law, point/axially symmetric deformations of thick-walled sphere and cylinder with numerical values 03 p0436 A66-12711

## INELASTIC COLLISION

Quantitative comparison of systematic approaches to generation of inelastic impact cross section with aid of simple universal excitation cross section function [AIAA PAPER 66-150] 06 p0913 A66-17059

Cosmic ray particle interaction at hundred bev range, discussing parameters of inelasticity for collision with nucleus 07 p1113 A66-17531

Nucleon-nucleon collisions at high energies describing statistically independent successive interactions of incident particles with target nucleus 07 p1113 A66-17541

Coefficients of inelasticity of interaction between cosmic ray particles with iron and carbon nuclei 07 p1114 A66-17541

Two-fluid shock wave model involving Boltzmann equation and inelastic collision theory for rarefied gas 08 p1204 A66-18521

High energy cosmic ray jet showers noting energy, angular momentum, collisions, inelasticity, secondary meson distribution, etc 11 p1763 A66-22701

Nonequilibrium internal distributions effect on rates of chemical gas-phase exchange reactions 11 p1650 A66-23211

Spectral line broadening due to collision in stimulated Raman effect 14 p2309 A66-27941

Molecular inelastic collision cross section from radiometer force curve 15 p2543 A66-28781

Quantitative comparison of systematic approaches to generation of inelastic impact cross section with aid of simple universal excitation cross section function [AIAA PAPER 65-150] 15 p2545 A66-29261

Meson emission asymmetry, inelastic particle collisions and multiplicity in ultrahigh energy interactions in nuclear emulsion 15 p2545 A66-29541

Collision cross sections of high energy nucleon-nucleon interactions in nuclear emulsion 15 p2583 A66-29541

Experimental data analysis of cosmic ray showers, secondary particle production by nucleon-nucleon collision at high energy, momentum distribution in pions and primary energy-inelasticity relation 15 p2583 A66-29541

U.S.S.R. accelerator experiments in high

- energy nuclear interaction cross section and elasticity, primary and secondary cosmic ray particle energies, charged nuclear-active particle energy spectra, momenta measurements, etc 15 p2545 A66-29549
- Peripheral inelastic encounters, complex orbital momenta and cosmic ray analyses of interactions, noting hydrodynamical model and Regge pole method 15 p2585 A66-29562
- Muon charge ratio derived from inelastic collision model of pion production, considering just average multiplicities 15 p2588 A66-29575
- Line width and shifts in molecular spectra of gases, giving general formulas for pressure broadening, phase shift of rotation, amplitude modulation of radiation and statistically inelastic collisions 16 p2750 A66-30118
- Balance equations derived from kinetic equations for nonequilibrium plasma, considering radiative processes and inelastic collisions between electrons and ions 16 p2766 A66-31603
- Sufficient conditions for absolute stability servosystem with backlash, taking into account plant inertia and hypothesis of absolutely inelastic collisions 17 p2901 A66-32258
- Primary cosmic ray energy spectrum measurements via Proton I satellite, noting inelastic interaction cross sections, chemical composition, etc 18 p3175 A66-34746
- Inelastic neutron cross section for interaction with Pb and C nuclei near 100 ev 18 p3216 A66-35165
- Inelastic n-p cross section at 60 gev determined from attenuation of penetrating power-producing cosmic ray neutrons in paraffin and graphite 18 p3216 A66-35167
- Energy transfer in low velocity inelastic atomic collisions 19 p3401 A66-35464
- Electron velocity distribution function in nonequilibrium plasma having spatial distribution governed by electron-electron and inelastic collisions 20 p3606 A66-36974
- Radiation peak formation in inhomogeneous gas behind shock wave due to radiating atom distribution and heating of electron gas by inelastic molecular collisions 21 p3728 A66-39334
- Radiation peak formation in inhomogeneous gas behind shock wave due to radiating atom distribution and heating of electron gas by inelastic molecular collisions 22 p3897 A66-39704
- Time resolved emission measurements for Ar-Ar mixtures in three spectral regions and ionization occurrence in excited state elastic collisions 23 p4033 A66-42083
- Phenomenological picture of production of secondary particles in nucleon interactions of energies of hundreds and thousands of ev 24 p4267 A66-42902
- Elementary particles interaction with atomic nuclei with energies from tens to thousands of bev 24 p4267 A66-42903
- High energy inelastic interactions, discussing necessity of statistical methods, secondary particle composition and angular distribution, etc 24 p4267 A66-42904
- Inelastic interactions at ultrahigh energies, discussing secondary particle jets production moving in same direction as colliding particles 24 p4268 A66-42912
- ELASTIC SCATTERING**
- ELASTIC SCATTERING**
- NEUTRON SCATTERING**
- Phonon spectra in aluminum single crystals investigated by means of inelastic scattering of slow neutrons 02 p0277 A66-12083
- Parameters associated with inelastic polar electron scattering in indium antimonide 04 p0565 A66-14267
- Anomalies in low temperature properties of noble metal alloys such as thermoelectric power and nonmonotonic behavior of resistivity with temperature 08 p1274 A66-19362
- Compton process argument for quasar relative nearness to our Galaxy and contrast between Compton and synchrotron radiation scattering effects 12 p1950 A66-24389
- Angular distributions of elastic and inelastic alpha-particle scattering in even tin isotopes, using 40 mev alpha beam 18 p3138 A66-34166
- Absorption spectrum of sulfur hexafluoride in far UV due to electron impact and inelastic scattering and oscillator strengths for three absorption bands 21 p3774 A66-38524
- Sudden approximation applied to rotational transition probabilities and inelastic total cross sections for scattering of homonuclear diatomic molecules by atoms 21 p3774 A66-38526
- INELASTICITY**
- Anelasticity and relaxation time in metals and nonmetals, particularly as manifested by internal friction peak as function of frequency or temperature in study of crystalline material defects 05 p0772 A66-14548
- Design analysis related to structures using materials exhibiting inelastic responses, noting deformation analysis for operational loads and instability analysis for structural failure 06 p0963 A66-16473
- Shear stress, shear rate, inelastic thixotropic properties and speed-torque curves for time-independent non-Newtonian fluids 10 p1618 A66-21885
- Displacement bound theorems for work hardening continua subjected to impulsive loading in inelastic continua 11 p1781 A66-22610
- Young air electron-photon showers at 3200 m altitude, noting average nucleon energy and inelasticity coefficient 15 p2583 A66-29552
- High energy muon energy spectrum, energy loss rate, primary nucleon energy spectrum and inelasticity fluctuations 15 p2587 A66-29571
- Inelastic buckling of rib-cored orthotropic sandwich cylinders under external hydrostatic pressure evaluated by deformation theory of plasticity 24 p4285 A66-42147
- Inelasticity in carbon particle nuclei interactions evaluated by variation with depth of energy of electron photon shower in thick absorber 24 p4268 A66-42910
- INEQUALITY /MATH/**
- Starlike solutions of optimum transversal contour problem treated by Young inequality 11 p1631 A66-22519
- Controllability of general class of nonlinear systems describable by nth order ODE with bounded state and control spaces 13 p2052 A66-26079
- Inequality constraints in open-loop minimum time control problem 13 p2053 A66-26080
- Error bounds based on a priori inequalities for solutions of boundary value problems for linear elliptic partial differential equations 16 p2731 A66-30236
- Matrix algebra, discussing factorization, determinants, eigenvalues, polynomials, inequalities, etc 17 p2945 A66-31869
- Garding inequality and Green transformation applied to elliptic operators in eigenvalue problems 21 p3755 A66-38465
- INERT GAS**
- S RARE GAS**
- INERTIA**
- Motion equations for deep spherical shells including effects of transverse shear deformations and rotatory inertia 05 p0781 A66-15740
- Book on time and space, weight and inertia in terms of relativity theory, including accelerations and rotations, dynamical tensor of matter, ideal clock, rigid body, etc 14 p2330 A66-26808
- Longitudinal and circumferential inertial effects on dynamic response of cylindrical shell to time-varying loads 17 p3025 A66-32470
- Inertia and pressure effects on energy potential of homogeneous and isotropic turbulence in weakly compressible medium 18 p3100 A66-34608
- Motion of solid body with rotating flywheels rotating at constant velocities relative to inertial space and body 22 p3948 A66-40682
- INERTIA MOMENT**
- SA ANGULAR MOMENTUM**
- Mechanical model for representing moment of inertia and fuel sloshing in baffled cylindrical missile tanks 08 p1205 A66-18834
- Moon shape related to distribution of continents and maria and relationship between shape and inertia moments 10 p1605 A66-21203
- Kinetic moment variation theorem for deformable system of material points of variable composition 11 p1735 A66-22239
- Motion of gyroscope with variable moments of inertia on movable base, deriving motion equations 14 p2291 A66-27165
- Servomechanism design, noting optimum response parameters, physical characteristics as functions of inertia, external force, energy dissipation, kinetic energy for operation, etc 16 p2671 A66-31062
- Gyroscopic rotor vibrations excited by effect of lubrication layer in sliding bearings and stabilized with intervening elastodamping supports, taking into account moment of inertia of rotor 17 p3027 A66-32605
- Natural oscillation frequency of gyro mounted in torsional suspension, taking into account moments of inertia of sensitive element 17 p2926 A66-32799
- Section moments of inertia by approximation method 17 p3030 A66-32967
- Design of integrating and position servomechanisms having tachometer-generator feedback, noting role of inertial moments effect 20 p3540 A66-38444
- Elastic stability of cylindrical shells reinforced by one or two frames and subjected to external radial pressure, noting inertia moment about skin line and frame bending stiffness 21 p3828 A66-38703
- Optimization DODGE satellite will be capable of two- and three-axis gravity-gradient stabilization at near synchronous altitude, using moment-of-inertia distributions and libration damping 21 p3820 A66-38860
- Gyrorotor shape with minimum aerodynamic resistance, discussing cases with constant and varying moment of inertia 21 p3739 A66-39327
- Gyro in Cardan suspension, discussing stability criteria for rotations about largest or smallest moment of inertia 22 p3947 A66-39695
- Theorem concerning use of instantaneous axis of rotation for simplification of small oscillation equation of angular momentum 22 p3992 A66-40300
- Static stability of rolling motion of aircraft for given aileron angle when inertia cross-coupling is present, with numerical solution of nonlinear equations 22 p3848 A66-40493
- INERTIA PRINCIPLE**
- SA MACH INERTIA PRINCIPLE**
- Energy function and conservation of inertial mass and three-momentum from relativity principle and conservation of energy in particle collisions 05 p0719 A66-15530
- INERTIAL ACCELEROMETER**
- Inertial gyroscope and accelerometer design and components 13 p2076 A66-25127
- INERTIAL COORDINATE SYSTEM**
- Inertial system using gyros and accelerometers, determining autonomously plant curvilinear coordinates and plant space orientation parameter 02 p0260 A66-12168
- Joint motion of two solids and motion of rotating body relative to other due to external forces 12 p1914 A66-24359
- INERTIAL FORCE**
- SA FROUDE NUMBER**
- High speed compression of viscoplastic thin disk between smooth dies considering inertia effects 02 p0299 A66-11690
- Internal or external pressure effect on natural frequencies of conical shell, noting role of inertia forces, using linear shell theory 11 p1780 A66-22330
- Transient response of value-controlled actuator with inertial loading to step input excitation, considering fluid compressibility 11 p1640 A66-22622
- Friction and inertia fields induced by electromagnetic effects arising in motion of hard magnetic moment in thin circular film 11 p1753 A66-22808
- Gravitation theory and new principle of equivalence of inertial and gravitational energies 12 p1913 A66-23770
- Theoretical behavior and frequency response of electrohydraulic valve-controlled cylindrical vibrator capable of high thrust over wide frequency

- range 12 p1803 A66-23798
- Mathematical model of human body predicting inertial properties in any fixed body position, including location of mass center 12 p1810 A66-24719
- [AIAA PAPER 65-498] 12 p1810 A66-24719
- Axisymmetric form of stability loss of cylindrical shell under effect of load suddenly applied along generatrix, considering inertia forces and obtaining differential equations 13 p2206 A66-28456
- Lift, drag and inertial forces due to uniform unsteady flow with constant acceleration past fixed circular cylinder, determining vorticity flux 13 p1993 A66-26705
- Lumped inertia force method for obtaining mode shape and corresponding natural frequencies 17 p3023 A66-32078
- Oscillations and stability of cylindrical shell in gas flow, taking into account inertia forces 17 p3029 A66-32804
- Rotating masses effect on inertial frames, analyzing stress energy tensor and Schwarzschild geometry 22 p3979 A66-40113
- Stability conditions for system with two degrees of freedom, considering effect of inertial and resistance forces on inertialess body 23 p4137 A66-41001
- Dynamic aeroelastic motion resulting from inertial and aerodynamic effects, coupled through elastic deformation, applied to jet aircraft, considering flutter, buffet, wakes and turbulence 23 p4015 A66-41035
- Inertia product terms effect on satellite gravitational torques 24 p4283 A66-42781
- ### INERTIAL GUIDANCE
- #### SA STELLAR INERTIAL GUIDANCE
- Low cost inertial guidance system commands missile attitude so that modified ballistic trajectory is followed along direct line of sight to target 01 p0098 A66-10003
- Unconventional attitude sensors required to make strapped-down gimballess inertial guidance system practical 01 p0139 A66-10004
- Locating low cost aircraft inertial navigation system being designed for compatibility with high performance tactical aircraft 01 p0099 A66-10010
- Microelectronic integrated circuits and thin films applied to inertial navigation systems to achieve cost reduction 01 p0034 A66-10011
- Design philosophy for low cost inertial navigation system including subsystem characteristics 01 p0099 A66-10012
- SGN-10 Inertial Navigator, pure inertial system with no damping or other external input designed for commercial aircraft 01 p0099 A66-10013
- Operation theory and functional elements of low cost Honeywell SIGN I Strapdown Inertial Guidance and Navigation System 01 p0099 A66-10015
- Inertially augmented radio altimeter guidance system for space booster missions with over-horizon orbital injection requirements 01 p0100 A66-10023
- Review of current knowledge and techniques for stabilizing test pads for high precision inertial guidance and control components 01 p0051 A66-10028
- Accelerometers and gyroscopes tested underground, discussing ground motion attenuation with depth investigated in Deep-Hole program 01 p0051 A66-10038
- Isolation of test pads for inertial guidance systems, investigating soil dynamics for proper selection of sites 01 p0052 A66-10039
- Site selection, construction features and acceleration criteria for inertial test facility 01 p0052 A66-10040
- Terminal prediction guidance for rocket vehicles in terms of strapped-down and gimbaled platform concepts 01 p0101 A66-10042
- Navigation, guidance and control systems to meet basic trajectory and crew safety requirements of LEM 01 p0102 A66-10043
- Central Inertial Guidance Test Facility /CIGTF/ at Holloman AFB, outlining tradeoff between operational and analytical considerations 01 p0102 A66-10047
- Inertial-grade gyroscope theory and application, noting two-degree and single degree of freedom gyros, reference frames and gyrocompasses 01 p0067 A66-10488
- Basic navigation concepts and techniques used by MIT Instrumentation Laboratory to design Apollo guidance and navigation system 02 p0254 A66-11316
- Flight testing of Litton LN-12 inertial navigation system consisting of four-gimbal two-gyro platform and analog computer 02 p0259 A66-12049
- Phase II inertial navigation system design and testing 02 p0259 A66-12050
- USAF Central Inertial Guidance Test Facility for testing aircraft navigation systems 02 p0259 A66-12051
- Inertial navigation and accelerometers deriving law of gyroscopics, noting design of gyroscopes like ball and gas bearings, gimbal suspension, electrostatic, laser, etc 04 p0543 A66-13362
- Portable inertial navigator consisting of platform assembly, computer, power supply and mounting base that eliminates warm-up delays 04 p0544 A66-13925
- Evaluation of methods for estimating circular error probable /CEP/ or system accuracy of ballistic missiles employing inertial navigation systems 04 p0544 A66-14444
- Shipboard inertial navigation system recalibration, using periodic position information from communications satellite 05 p0712 A66-14604
- Effectiveness of split cross-flow heat exchangers, emphasizing uniform exit temperature distribution for unmixed fluids [ASME PAPER 65-HT-24] 05 p0783 A66-14745
- Voltage stabilization using cold cathode trigger tubes 05 p0647 A66-14769

 Error sources in strapdown inertial attitude reference system consisting of three pulse torqued gyros and digital differential analyzer 23 p4088 A66-41101  
 Analytic axes alignment for strapdown inertial system, describing computational procedures for ground-based and in-flight correction of attitude parameters 23 p4088 A66-41115  
 Stability analysis of inertial guidance platform control system with saturation and Coulomb friction nonlinearities, using Liapunov method 23 p4089 A66-41319  
 Stability, control, navigation, guidance and air traffic control of hypersonic vehicles noting inertial technology, flight planning and optimal control 24 p4235 A66-42239  
 Space vehicle guidance and navigation, noting instrument techniques, gyroscopic units for reference coordinate realization, inertial navigation systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43123  
**INERTIAL MEASURING UNIT**  
 Internal measurement of latitude, radius vectors and other geophysical properties from center of mass of astronomical system to space vehicle 16 p2698 A66-31386  
 Inertial sensor performance degradation in strapped-down environment, noting gyro drift error and accelerometer bias 21 p3763 A66-38839  
 Six-component balance equipped with semiconductor strain gauges and inertial compensated for hotshot wind tunnels 24 p4206 A66-42167  
 IMU /inertial measurement unit/ gyroscope as attitude reference in space 24 p4214 A66-42955  
 Book on space navigation guidance and control covering manned lunar landing guidance, pulse torquing and inertial measurement units, computer utilization, control systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43122  
 Inertial measurement unit and pulse torquing of Apollo spacecraft, noting components and operation [AGARDOGRAPH 105] 24 p4215 A66-43126  
**INERTIAL NAVIGATION**  
**S SCHULER TUNING**  
**INERTIAL PLATFORM**  
**SA NAVIGATION INSTRUMENT**  
 Floated inertial platform, gimballless all-attitude device utilizing floated sphere to isolate inertial components from acceleration and vibration environments 01 p0099 A66-10014  
 Slab motions affecting test mounts for gyroscopes and accelerometers investigated at underground and surface test locations 01 p0051 A66-10029  
 Control problems associated with stable platforms using single-axis integrating gyroscopes including axes design, drift due to vibration and compensation 03 p0390 A66-12533  
 Response of inertial platform in orbital gyrocompass mode studied for satellite vehicle [AIAA PAPER 64-238] 03 p0369 A66-12736

Specific initial alignment problems and techniques of analytic inertial platform systems 04 p0543 A66-13617  
 Doppler-inertial system combination applied to avoid deterioration of navigational accuracy with time 07 p1070 A66-17719  
 Effect of environmental extremes on Miniature Inertial Navigation System, showing vibration and centrifuge testing data 08 p1251 A66-19491  
 Processing signal information from digital rate gyros and accelerometers in analytic, gimballless inertial platform 08 p1253 A66-19530  
 Inertial techniques extended to height measurement in supersonic aircraft by simple computing addition to main navigation platform 09 p1400 A66-20427  
 Elimination of coupling error between gyroscope and platform, considering rate-integrating gyros with inertial platform 09 p1382 A66-20563  
 Concorde navigation system noting inertial platform, digital computer using integrated circuits and microminiaturization 09 p1401 A66-20685  
 Staff flight test design velocity comparison technique for estimating in-flight inertial platform attitude 18 p3132 A66-34044  
 Slew plane technique for locating two gyro input axes without removing platform from test vehicle and with limited optical access 18 p3133 A66-34048  
 Mechanization of vectorial equations by means of four-gimbal platform and speed sensor for automatic setting of hybrid inertial systems 20 p3597 A66-37395  
 Inertial platform test station for shipboard maintenance and calibration of platform used in A6A and E2A aircraft, examining accelerometer bias and gyro drift tests 21 p3723 A66-38889  
 First-order Markovian gyro drift numerically evaluated and square root plotted vs interval and gyro correlation time 23 p4068 A66-41318  
**INERTIAL REFERENCE SYSTEM**  
**SA GIMBALLLESS INERTIAL REFERENCE SYSTEM**  
 Conditions satisfied by transformation equations connecting inertial and relativistic accelerated systems are deduced for rectilinear motion 03 p0392 A66-12609  
 Lunar orbiter objectives, mission and spacecraft configuration, detailing inertial reference unit 04 p0543 A66-13581  
 Method for initial azimuth alignment of inertial heading reference proven to accuracy of 0.1 percent 07 p1078 A66-17809  
 Inertial reference unit to provide attitude and thrust maneuver measurements for Lunar Orbiter spacecraft 08 p1253 A66-19529  
 Relativistic rocket mechanics, considering coordinate transformation, velocity and dependence of mass on inertial reference system 11 p1775 A66-23118  
 Attitude detectors, characteristics and performance 12 p1879 A66-23745  
 Integration of equations determining location coordinates of moving object on terrestrial sphere 12 p1909 A66-24358  
 Goedel universe analyzed, noting generalized Poisson equation, angular velocity in perturbed metric, equations of motion in inertial frame of reference, etc 13 p2183 A66-25609  
 Variational problem of transition of aircraft with inertial system without stabilizers solved by reduction to Lagrange problem 15 p2534 A66-29336  
 Versatile air-bearing table with three-axis attitude control system for variety of nonspinning zero-g space stations 15 p2534 A66-29362  
 Third-order orbital gyrocompass horizontal and vertical damping techniques to eliminate gyro and bias errors in horizon sensor 18 p3110 A66-33828  
 Time-mass dependent events during motion of material particle, using Hamilton-Jacobi equation of relativistic mechanics in Minkowski continuum 21 p3772 A66-39276  
 Optimizer for shaping control signal of hunting-type system with plant in form of nonlinear inertialess element, examining inadequacy for system operation 22 p3883 A66-39659

## INFINITE SOLID

Equations relating maximum temperature stresses in infinite plate and dimensionless numbers, determining heating rate 09 p1468 A66-20832

## INFLATABLE SPACECRAFT

Parametric requirements for eliminating coupling between bending, sloshing and control in large liquid-propelled elastic space vehicles 10 p1612 A66-21941  
Prestressed circular membrane shell subjected to uniform radial line load, determining stresses and displacements from material properties, internal pressure and original size 24 p4288 A66-42272

## INFLATABLE STRUCTURE

## SA BALLOON

Full scale ground inflation tests to evaluate structural and RF backscatter characteristics of Echo II prototype spheres as function of their internal pressures 01 p0055 A66-11123  
Inflatable plastic structures for space application in U.S. and Germany 06 p0960 A66-17077

## INFLATION

Filling or inflation process of flat circular solid-cloth type parachute canopy operating under finite mass conditions 04 p0457 A66-13530

## INFLUENCE COEFFICIENT

## SA STRUCTURAL INFLUENCE

COEFFICIENT /SIC/  
Influence coefficients for computation of atmospheric components of reentry vehicle circular error probable /CEP/, using Bliss adjoint method, noting effects of certain inadequacies on system performance [AIAA PAPER 66-358] 12 p1908 A66-24517  
Bending behavior of spherical shells through second-order differential equation with complex coefficients, noting effect of load 18 p3253 A66-33765  
Bending characteristics of tapered cylindrical shells, discussing edge and internal influence coefficients 18 p3253 A66-33806  
Block sensitivity coefficient analysis in application of method of transformed circuits to closed-loop control systems, noting dynamic accuracy problem 19 p3327 A66-36014  
Influence coefficients for externally pressurized spherical shells 21 p3828 A66-38724  
Influence coefficients for semifinite and infinite circular cylindrical elastic shell subject to self-equilibrating edge loads 22 p3995 A66-40451

## INFORMATION

Effectetics, informetics, control and stability in modern flight vehicle systems [AIAA PAPER 66-131] 08 p1254 A66-19565  
Effectetics, informetics, control and stability in modern flight vehicle systems [AIAA PAPER 66-131] 18 p3267 A66-33786

## INFORMATION PROCESSING

Energy patterns from space accessible to human senses through data sensors and information acquisition 04 p0472 A66-14093  
Optimum signal shape for transmission of discrete information, discussing signal-noise characteristics 04 p0488 A66-14414  
TV camera, visual display and video-signal information storage tubes, noting secondary electron conduction camera tube 05 p0642 A66-14561  
Error effect in a priori information on sequential estimate variance of linear system states, noting optimal filter synthesis 05 p0653 A66-14601  
Psychological research relevant to human factors engineering of man-machine systems, discussing information processing 05 p0626 A66-14616  
Optical and electro-optical information processing technology - Symposium, Boston, November 1964 05 p0636 A66-14818  
Semiconductor injection laser for use in electro-optical and optical information processing 05 p0692 A66-14823  
Data systems requirement for geographic research, noting use of orbiting sensors to obtain information on terrain, vegetation, human and animal activities, etc 10 p1532 A66-21522  
American Federation of Information Processing Societies, Joint Computer

Conference, Las Vegas, November 1965 12 p1825 A66-23824

Satellite Educational and Informational Television, noting management, market and development problems in terms of profit, demand and growth potential [AIAA PAPER 66-274] 12 p1981 A66-24747

Periodically alternating noise as design problem in theory of information transmission 12 p1824 A66-24854  
Limitations and reliability of human operator of control systems to process information, noting importance of endurance and sensory perception 12 p1807 A66-25012  
Information display techniques for man-machine system 14 p2229 A66-26916  
Collection of information and announcements pertaining to rocket and satellite launchings including objectives, stations, data exchange, etc 15 p2600 A66-29902  
AFIPS Joint Computer Conference, Boston, April 1966 16 p2656 A66-31239

Low-cost computer design using electro-optics for information processing 16 p2657 A66-31240  
Coherent optical transducer for optical information processing 16 p2657 A66-31244  
Information content of photoelectric star images determined by background radiation, optical aberrations and photon noise, deriving equations for rms error 16 p2654 A66-31441

Optimum discrete information system and relations between measurement quality, decisions and system performance 19 p3310 A66-36681  
Information center concept for accurate acquisition and processing of parts, materials and components reliability and maintainability information for task performance 20 p3572 A66-37947  
Vertical sinusoidal vibration as psychological stress in considering capacity for handling information 22 p3854 A66-40007  
Information display - National Symposium, New York, September 1965 22 p3927 A66-40286

Frog retina layered model, stereoscopic system and decision/control system in connection with robot data reduction in Voyager missions 24 p4168 A66-43081

## INFORMATION RETRIEVAL

## SA DATA RETRIEVAL

ESRO/ELDO Space Documentation Service, describing system characteristics, NASA agreement, indexing and search strategy 09 p1473 A66-20658  
Traceability and configuration data system /TAC/ used to determine location of individual parts and assemblies 15 p2506 A66-28791  
R and D problem solving and information gathering in engineering design, reviewing M.I.T. research program on management of science and technology 18 p3268 A66-34064  
Probe and edge theorems for nonlinear optimization algorithms using stored-program computers 19 p3309 A66-35873  
Optimal computer search and application to engineering design 19 p3309 A66-35875  
Maintenance on long-duration manned space flight facilitated by maintenance job aid information stored in high density retrieval and display system 19 p3309 A66-35950  
Satellite instrumentation, discussing data handling systems, cosmic ray detection, signal and information processing, etc 20 p3556 A66-36963  
Delay-line content-addressed memory with information retrieval by word association 24 p4177 A66-43185

## INFORMATION THEORY

## SA COMMUNICATION THEORY

Electronic systems in marine, air and space transportation noting radar, ultrasonic devices, computer techniques, etc 02 p0206 A66-12033  
Information theory applications to angle and line measuring devices with description of use in geodetic instruments 03 p0368 A66-12506  
Textbook on communication engineering emphasizing random processes, information and detection theory, statistical communication theory, applications, etc 03 p0335 A66-12992  
Value of information concept relating

Shannon information theory to theory of optimal solutions 03 p0336 A66-13013  
Existence of statistical relationships between features of different classes of objects determines amount of information obtainable by 03 p0338 A66-13014  
Identification 03 p0338 A66-13014  
Relationship between distribution entropy and variation in distribution of almost periodic channels 05 p0638 A66-15015  
Limitations of communication systems transmitting data from analog sources obtained, using theorem in Shannon paper on information theory 06 p0828 A66-16016  
Scanning slit across point or line space function in determination of radiation irradiance distribution 07 p1081 A66-18018  
Information matrices for estimating parameters of moving targets obtained by combining a priori information with reflected radar signals with additive white Gaussian noise 08 p1180 A66-18018  
Optimum /in Shannon sense/ truncation probability of signal for case of constant power and other conditions 08 p1182 A66-18018  
Spaceflight data handling with emphasis on data compaction techniques based on weighted-information theory, Karhunen-Loeve theory, area recording and transmission procedure 08 p1187 A66-18019  
Upper and lower estimates derived from Shannon reliability of information transmission in channel that is symmetrical with respect to input 09 p1397 A66-20019  
Radio waves and circuits - U.S. Conference, Tokyo, September 1963 11 p1653 A66-22015  
Information recovery from noisy measurements, employing steady quantum measurements, known waveform detection and transfer function evaluation 11 p1656 A66-22015  
Error propagation at above information limits postulated by Shannon sampling theorem and Gabor expansion theorem 11 p1657 A66-23015  
Information theory techniques for sea and analysis of radio signals from extraterrestrial civilizations 12 p1814 A66-23015  
Optimization of high resolution radar based on mathematical results regarding linear transformation of signals and ambiguity functions 12 p1819 A66-24015  
Likelihood detection with multiple Markov process, by expressing statistics distribution function terms 13 p2019 A66-25015  
Man-machine systems for interplanetary exploration, using functional analysis techniques for system design 13 p2013 A66-25015  
Antenna array response to pulsed compression signals, showing dependence of array response on compressed pulse shape 13 p2023 A66-25015  
Radar range measurement accuracy shown to depend on receiver filter 13 p2023 A66-25015  
Quantum information generalizes classical Shannon concept 13 p2025 A66-26015  
Quantum communication channel entropy and information analysis using noncommutative output and input variables including waveguide carrying capacity thermal noise calculations 13 p2025 A66-26015  
Information theory, role in communication systems, detailing coding systems 14 p2239 A66-27015  
Information theory for describing electric and magnetic fields of one-dimensional collisionless plasma 14 p2346 A66-28015  
PCM picture transmission, pseudorandom scanning, noise, bandwidth compression, digital simulation 15 p2450 A66-28015  
Entropy concept of information theory applied to space flight physiological control analysis 15 p2444 A66-28015  
Riemannian signal mapping theory used to clarify stochastic structure of modulation and demodulation in information system 15 p2453 A66-29015  
Coherent optical systems in signal processing techniques, information theory and antenna pattern simulation 16 p2657 A66-31015  
Synthesis of phase synchronization systems

providing maximum-level filtering of internal fluctuation noise, using generalized integral criterion 17 p2898 A66-31853

Easily mechanized method of using stored samples to approximate set of distributions for adaptive pattern recognizer 18 p3073 A66-34073

Value of information concept relating Shannon information theory to theory of optimal solutions 18 p3072 A66-34997

Existence of statistical relationship between features of different classes of objects determines amount of information obtainable by 18 p3074 A66-35002

Information theory criterion applied to nonlinear processing antenna systems yielding optimum system, considering SNR 19 p3318 A66-35885

Learning control system design, discussing hill-climbing and pattern recognition schemes in framework of statistical decision, automata and information 19 p3333 A66-36662

Information theory - IEEE International Symposium, University of California, Los Angeles, January-February 21 p3703 A66-39134

Systematic method of obtaining complex formulations of problems involving white noise, considering deterministic narrow-band signal detection of random phase 21 p3721 A66-39642

**INFRARED ASTRONOMY**

Thermal anomalies found in IR lunar observations attributed to lunar roughness in centimeter scale 01 p1038 A66-10884

Sky survey in two IR spectral ranges, obtaining unbiased census of objects emitting in atmospheric window 04 p0575 A66-13399

Thermal maps of Murray about Venus atmosphere statistically analyzed into solar effects, latitude variations and limb darkening 04 p0579 A66-14450

Visible and IR radiation observations made above atmosphere 10 p1603 A66-21107

Venus IR limb darkening observations by Mariner II 10 p1603 A66-21110

IR emission lines possibly originating from galactic, interstellar and stellar hydrogen regions 10 p1599 A66-21113

12.8-micron IR emission lines observed by glow from planetary nebula IC 17 p3003 A66-32656

IR astronomical measurements for computation of bolometric corrections and effective temperatures of stars of various spectral types 21 p3815 A66-39486

IR observation of Mercury as evidence of nonsynchronous rotation, considering energy radiation as function of position 22 p3979 A66-40305

**INFRARED DETECTOR**

Resistance microwelding process evaluated by IR energy measurements to determine mechanical strength of joint 02 p0234 A66-11328

Hertzian and IR radiometry applied to temperature determination for use in aerial navigation 02 p0257 A66-12032

High detectivity gallium doped germanium detector for far IR 02 p0231 A66-12062

Single crystal semiconductor thermal detector with constant bias current and self-cooling, taking into account end cooling 02 p0232 A66-12063

Graphical method to determine detection range for narrow IR windows in dependence of atmospheric absorption and emission 02 p0223 A66-12064

Varying deposition and firing conditions effect on range of detection of chemically deposited lead sulfide IR detector cells 03 p0407 A66-12332

Design, performance and operation of high-resolution IR radiometer mounted on Nimbus satellite 04 p0518 A66-13468

IR detector types and component structure noting bolometer, thermistor, thermocouple and semiconductor photoelectric type 05 p0676 A66-14679

Cavity type radiometer for absolute total intensity measurement of visible and IR radiation [ISA PREPRINT 1.11-3-65] 05 p0683 A66-15505

IR detectors based on photon-electronic interaction and sensor thermal changes 06 p0880 A66-16559

HF response of copper doped p-type germanium IR detectors 06 p0882 A66-16764

Thermoelectric cooling of IR detectors, examining thermistor bolometers and photoconductive detectors 08 p1221 A66-18683

IR sensor detection of hypervelocity meteoroid puncture radiation emission 08 p1225 A66-19520

Near IR detection system using phototube with type S1 phosphor photocathode, noting tunnel diode discriminator S/N ratio 08 p1227 A66-19696

Sensitivity measure for optical and IR detectors clarified by analysis of noise equivalent power for photodiode 09 p1351 A66-19940

Seasonal variation of atmospheric ozone, determining via IR method total amount and vertical distribution 10 p1526 A66-21124

Terrestrial test sites and aircraft flights used in preparing for remote sensing from Earth orbital spacecraft 10 p1532 A66-21525

Sensitivity and operation of IR detector using avalanche multiplication in microplasmas in silicon junctions, noting SNR at room temperature 13 p2164 A66-25490

Low noise preamplifier with field effect transistors for use with IR detectors 14 p2249 A66-27116

Clear air turbulence detection by measuring associated air temperature gradient by airborne IR radiometer 15 p2500 A66-28927

Indium arsenide lasers and HgTe-CdTe photodetectors with very fast time constants for IR spectral band 19 p3376 A66-36268

Solid cryogenics as heat sinks for cooling electronic components, particularly IR detectors in aircraft and spacecraft 20 p3676 A66-37073

TACITE rocket sounding of characteristics of IR contrast between Earth and space 20 p3663 A66-38033

Gas laser alignment, obtaining oscillation on three lines of He-Ne laser 22 p3930 A66-39718

Double cloud vortex near Antarctica detected by Nimbus I high resolution IR 22 p3942 A66-40053

Low level amplifier for IR receiver for Earth-space IR contrast study 24 p4180 A66-42341

IR sensor classification and selection for specific application 24 p4192 A66-42342

**INFRARED FILTER**

Dimensional filtering in IR technology for background noise elimination, discussing Fourier analysis treatment of system 21 p3768 A66-39646

**INFRARED HORIZON SCANNER**

Automatic control in space reviewing tracking techniques, IR horizon sensors, Apollo spacecraft guidance computer and control systems and terminal guidance system of Surveyor spacecraft 03 p0351 A66-13258

IR planet horizon sensor design, noting filter for uniform radiance, wide angle lens and special detector 11 p1706 A66-22891

IR horizon sensor for determining orbiting satellite attitude with respect to Earth 18 p3110 A66-33873

**INFRARED INSPECTION**

IR nondestructive testing system for usability analysis in production line inspection of Polaris A-3 motors 03 p0373 A66-12996

Thermal IR inspection for bond integrity in solid propellant rocket motors 21 p3808 A66-39154

Magneto-optical phenomena studied by extension of wavelength range of electroradiance measurements in solids using electrolyte into near IR 23 p4111 A66-41263

**INFRARED INSTRUMENT**

Nondispersive IR equipment and techniques for chopping and scanning incident radiation 06 p0880 A66-16560

IR polariscopy method applied to study of photo- and electromechanical effects of n-type silicon films 07 p1034 A66-17875

IR AM TV transmitter and receiver using

GaAs diode and telescope with photomultiplier 08 p1184 A66-19348

Fabry-Perot interferometer with mirrors in form of metallic strips to facilitate use in far IR and microwave spectral regions 11 p1704 A66-22347

Image converter tube for middle IR, noting sensitivity dependence on photoconductor properties 14 p2331 A66-27100

Selection and processing of IR materials and optical glass, discussing similarities and differences between specification and fabrication techniques 15 p2524 A66-28829

Replacing heated tungsten filament and IR filter by GaAs electroluminescent diode without filter for IR illumination 19 p3320 A66-36266

IR spectrometers, radiometers, horizon sensors, rotating-prism planet-seekers and detector cooling using solid cryogenics, for use in high altitude rockets and Earth satellites 24 p4211 A66-42679

**INFRARED MASER**

Quantum-electronic cross-modulation effect noted while monitoring IR laser interferometric fringes 02 p0240 A66-11449

CW IR laser oscillation in HBr and HI gas discharge 06 p0892 A66-16756

Carbon and ethylene tetrachloride ultrasonic modulators applied to IR laser heterodyne experiments on InAs photodiode 11 p1714 A66-23353

Nonequilibrium population buildup and detection for IR solid state lasers and IR-optical double resonance in lanthanum chloride crystal 13 p2098 A66-26177

Far-IR laser molecular spectroscopy including IR laser oscillators, photon noise, detectors and nuclear optics 13 p2100 A66-26195

Optical-and IR-maser spectroscopy of inhomogeneously broadened resonances, using gas lasers 13 p2100 A66-26196

IR maser action on vibrational transitions of thermally pumped polyatomic molecules 13 p2101 A66-26203

IR and visible helium-neon laser modulation using Faraday rotation in YIG 14 p2305 A66-26881

Isotope shifts and Fermi resonance role in carbon dioxide IR laser 16 p2716 A66-30176

Gallium arsenide diode laser as pulsed IR source for experiment and design considerations for radar indication of cloud height and visibility 18 p3066 A66-33616

GaAs crystal as electro-optic modulator at 10.6 microns due to small carrier absorption, freedom from interband transitions and high resistivity 24 p4222 A66-42553

IR GaAs laser amplifier with gains as high as 2000, output powers of 150 mw and saturation occurring with current increase at low light levels 24 p4223 A66-42562

**INFRARED PHOTOGRAPHY**

Design, performance and operation of high-resolution IR radiometer mounted on Nimbus satellite 04 p0518 A66-13468

Resolving power and microphotometric granularity of IR films measured with resolvometer, noting dependence on frequency of incident light 10 p1534 A66-21332

Lunar mapping in far IR, including hot spots during total eclipse of December 19, 1964 16 p2698 A66-31225

IR pyrometry of lunar surface 19 p3457 A66-35447

Quantitative IR radiometric skin temperature measurements, using simple radiometer and method for measuring surface temperature of forearm and hand 20 p3507 A66-38418

Antarctic pack ice boundaries established from TV and IR pictures taken by Nimbus I meteorological satellite 21 p3735 A66-39491

IR photometric measurement of Comet 1965f, noting absolute intensity dependence on distance from Sun, tail intensities and nature of particle emissions 21 p3816 A66-39557

**INFRARED RADIATION**

Visible and IR radiation attenuation by artificial fogs found to depend on droplet size and distribution 01 p0097 A66-10860

IR radiation of refractory solids with radiation properties of flame-sprayed ceramic coatings, determining normal spectral emittance, integrated normal total

emittance and IR intensity curves at 1300 K 03 p0386 A66-13100  
P-n junction of semiconductor CdHgTe behaved as detectors and emitters of IR radiation, showing possibility of laser effect in such alloys 04 p0559 A66-13480  
Two ohmic electrodes or one ohmic and one barrier electrode for current-voltage stable-negative characteristic of cadmium sulfide, noting IR radiation effects 04 p0568 A66-14351  
High pressure high current argon discharge, calculating statistical variations of photon radiation, electron and ion densities 05 p0720 A66-14504  
High pressure high current argon discharge covering statistical variations of nonblack body, photon and IR radiation and measurement with InSb photodiode 05 p0720 A66-14507  
Minority carrier lifetime in silicon measured by contactless method, using laser induced modulation of IR transmission in silicon /LIMIRIS/ effect 05 p0729 A66-14563  
IR emission observation used to deduce composition, temperature and energy budget of stratosphere and mesosphere 05 p0672 A66-15024  
Nitrogen and nitrogen-foreign gas mixtures, determining absorption profile shapes, binary and ternary absorption coefficients and molecular quadrupole moment 06 p0908 A66-16281  
Vacuum fusion and IR absorption determination of bulk oxygen content of germanium crystals 07 p1098 A66-17743  
Time dependent fluctuations in photoconductivity of Cu doped low ohmic n-type gallium arsenide exposed to IR radiation 07 p1099 A66-17876  
Flame as source of emission of visible UV and IR radiation and ionization source for certain combinations of fuels and oxidants 08 p1317 A66-18856  
IR fluctuations radiated by fluid mechanical turbulence of hot shear layers analyzed, assuming gas mixture is black body [AIAA PAPER 66-107] 08 p1206 A66-18955  
Radiometersonde observations of atmospheric IR irradiance, noting measurement results with improved equipment 09 p1369 A66-19869  
Relation between ascending fluxes of Earth and troposphere long-wave IR radiation and temperature of mean energy level 09 p1398 A66-19889  
Handbook of geophysics and space environments, 1965 09 p1370 A66-20267  
IR radiation source, characteristics, transmission and detection, noting atmospheric absorption and emission, IR celestial backgrounds, etc 09 p1371 A66-20277  
Monograph on microwave and IR techniques to investigate plasmas 09 p1402 A66-20328  
Spectroradiometric pyrometry of shock heated gases by IR emission and absorption measurements 09 p1382 A66-20508  
Stationary IR quenching of photocurrent in CdS, discussing recombination channels 09 p1428 A66-20538  
IR and sub-mm wave modulation using free carrier absorption in p-n junction, examining reverse and forward-biased configurations 09 p1432 A66-20972  
Angular distribution of IR radiation of Earth and atmosphere from rocket and balloon sounding 09 p1376 A66-20997  
Angular and spectral distribution of IR radiation emitted by Earth 09 p1376 A66-20998  
IR radiation in upper atm layers investigated by rocket and balloon, noting solar radiation effect 09 p1377 A66-21000  
Interpretation of outgoing IR radiation data from meteorological satellites, including cloud cover identification and Earth surface temperature 10 p1525 A66-21046  
Variation of IR emission from Mars surface with Mars local time in terms of diurnal temperature variations, including atmosphere effect, results suggest low thermoconductivity 10 p1604 A66-21201  
Bipolar excitation of photoconductivity in silicon due to structural disarrangement caused by IR radiation 10 p1583 A66-22019  
IR cooling rate in planetary atmospheres,

noting Curtis-Godson approximation, Doppler line shape, water vapor rotation band, etc 11 p1695 A66-22264  
He-Ne laser IR radiation emission attenuated by atmospheric methane 11 p1657 A66-23090  
Text on engineering radiation heat transfer emphasizing IR energy 12 p1977 A66-23655  
IR radiation effect on photovoltaic effect in cadmium sulfide excited by visible light 12 p1927 A66-23772  
IR applications to reliability assessment, stress analysis, testing, etc, of electrically energized components, thermally or by power dissipation 12 p1842 A66-24671  
Field emission of germanium alloyed with silver and irradiated with IR 13 p2160 A66-25108  
IR emission and electrical resistivity measurements of TA 2000 plasma by interference spectrometer 13 p2138 A66-25124  
Microwave absorption in compressed carbon dioxide between 150 and 300 gc measured, detecting no losses at 150 gc 13 p2021 A66-25383  
IR laser radiation with power of 5.7 watts in vicinity of 10.69  $\mu$ m in sealed tube containing pure carbon dioxide excited by AC or DC current 13 p2131 A66-25410  
IR radiation measurement from Earth-space transition region /project TACITE/ 13 p2192 A66-25498  
IR radiation deficiency of Sun determined by interferometric measurement of solar spectrum 13 p2182 A66-25572  
Atmospheric absorption in IR region, noting effects of water vapor, ozone, carbon dioxide and collision-induced dipole moments 13 p2075 A66-26603  
Simultaneous IR emission and auroral X-ray observations from high altitude balloon flights 14 p2376 A66-27399  
Concepts, symbols, units and nomenclature for transmission of radiant flux through Earth /variable density/ atmosphere 14 p2335 A66-27776  
IR radiation from interstellar grains, measuring intensity as wavelength function and radiation polarization for information on grain temperature and composition and galactic magnetic fields 14 p2377 A66-28122  
Two ohmic electrodes or one ohmic and one barrier electrode for current-voltage stable-negative characteristic of cadmium sulfide, noting IR radiation effects 14 p2368 A66-28249  
IR radiation from gallium arsenide prepared with ohmic contacts and excited by various nanosecond pulses, noting radiation above Gunn effect instability region 15 p2561 A66-28688  
Vacuum spectrometer measurement of absorption band of atmospheric water vapor 15 p2542 A66-29346  
IR transition zone between Earth and space studied by gyro-stabilized satellite 15 p2494 A66-30048  
Possible use of IR radiation to improve visibility through fog, including atmospheric attenuation effects and radiant energy source 16 p2740 A66-30088  
Fundamental vibration spectrum of HD in liquid argon, noting rotation-translation coupling, quantized translational energy levels and perturbation treatment of interaction 16 p2645 A66-30120  
Field emission of germanium alloyed with silver and irradiated with IR 16 p2771 A66-30287  
Radiative flux divergence for lower few centimeters of atmosphere, accounting for combined effects of water vapor, particle absorption and scattering 16 p2699 A66-31640  
Integrating sphere for IR noting efficiency parameters construction, application, etc 17 p2958 A66-32626  
Perturbation approach to IR absorption in p-type semiconductor with zincblende or zinc telluride structure 17 p2982 A66-32971  
Far IR radiation detected at visible frequency, using nonlinear optical mixing with lasers 17 p2959 A66-33322  
IR emitting flares, examining major parameters governing methods of analysis and performance 18 p3135 A66-34192  
IR measurements on eclipsed Moon,

discovering hot spots on lunar surface 19 p3457 A66-354  
Tiros IV atmospheric IR radiati measurements and application to weather analysis, using quasi-global synoptic maps troposphere relative 19 p3393 A66-356  
humidity 19 p3393 A66-356  
Intensity and center-to-limb variation continuous solar spectrum for several models of chromosphere 20 p3650 A66-373  
Vacuum spectrometer measurement absorption band of atmospheric water vapor 20 p3602 A66-373  
IR radiation absorption in imperfect ion crystals 21 p3802 A66-393  
IR and microwave radiations associated with current controlled instability /negative resistance/ in GaAs, noting Gunn threshold and V-I characteristics 21 p3802 A66-393  
IR absorption, reflectivity and transmission in n-type gallium arsenide single crystals at room temperature due to impurities at high carrier concentration 21 p3805 A66-393  
Spontaneous-emission probability and absolute intensity for IR absorption band of nitrous oxide 22 p3947 A66-393  
IR fluctuations radiated by fluid mechanical turbulence of hot shear layers analyzed, assuming gas mixture is black body [AIAA PAPER 66-107] 22 p3899 A66-402  
Statistical correlation of IR cooling measurements by Tiros II /Channel 2 and Channel 4/ and radiometersonde measurements of radiation divergence within atmospheric layers 22 p3944 A66-402  
Radiant energy transfer below cloud cover in Venus atmosphere, noting greenhouse effect caused by atmosphere containing components capable of IR absorption 22 p3980 A66-402  
Monograph on absorption, scattering and attenuation of light and IR radiation in atmosphere 23 p4087 A66-412  
**INFRARED REFLECTION**  
Dispersion theory and multilayer structure approximation of IR reflectivity semiconductor with n on n plus stratified structure 05 p0736 A66-142  
IR spectral reflectance of some common minerals and use in identifying extraterrestrial surfaces 09 p1402 A66-20972  
Heavily doped semiconductor parameters determined from spectral behavior coefficient of reflection and transmission 14 p2357 A66-270  
Heat treatment effect on IR reflectivity of heavily doped n-type silicon 17 p2988 A66-333  
Radio measurements of Moon, particularly IR, showing brightness-temperature maps new, half-and full Moon 19 p3458 A66-356  
Heavily doped semiconductor parameters determined from spectral behavior coefficient of reflection and transmission 22 p3966 A66-402  
**INFRARED SCANNER**  
Nonuniform cooling of lunar surface detected by IR scanning during totality eclipse 02 p0285 A66-113  
Multilayer circuit board defect detection and repairing using computer-controlled radiometer 04 p0498 A66-142  
Continuous moving-scene display system for output of airborne mapping sensors such as radars, microwave radiometers and scanners 06 p0878 A66-159  
Fast scanning IR microscope for semiconductor evaluation used for engineering design analysis, reliability improvement, failure analysis, etc 12 p1843 A66-246  
High resolution IR scanning system a vidicon automatic picture transmission Nimbus II and ground station print instrumentation 21 p3821 A66-393  
Geometric analysis of recordings by scanners, emphasizing significance of stereo imagery 24 p4210 A66-422  
**INFRARED SPECTROMETER**  
Superhigh speed IR spectrometers used for detection and study of free radicals in photochemical reaction, pulse discharges gases, etc 05 p0685 A66-158  
Littrow-type IR spectrometer with diffraction grating 14 p2292 A66-273  
Contaminating effect of water vapor

Optical path of spectrometer on measurements of stratospheric water vapor absorption 15 p2530 A66-28601  
 Transmits 1 to 5 chemical composition and far transmittance measured by vacuum radiating spectrometer 15 p2524 A66-28847  
 Atmospheric temperature profile determination by satellite-borne IR spectrometer, noting instrument design 18 p3113 A66-34556  
 Airborne IR system to detect temperature discontinuities characterizes some forms of near air turbulence /CAT/ (AIAA PAPER 65-459) 19 p3360 A66-36482  
 Near IR two-beam interferometer built for astronomical observations by Fourier transform spectroscopy, noting resolution of spectra of Venus and Mars 20 p3556 A66-36939  
 Optical determination of hole concentration dependence in p-type silicon semiconductors measuring absorption coefficients 21 p3798 A66-38765  
**INFRARED SPECTROPHOTOMETER**  
 IR spectrophotometry of Moon and Jovian satellites of Jupiter, noting surface properties, thermal radiation and albedo increase with wavelength 08 p1298 A66-19458  
 Laboratory method for determining spectral emittance of partially transparent materials in IR 09 p1380 A66-20362  
 Terrestrial thermal radiation field from IR diffraction scanning spectrophotometer aboard Cosmos XLV 09 p1376 A66-20995  
 Optimum wavelength intervals for surface temperature radiometry from total reflectance measurement of common surface minerals 15 p2498 A66-28833  
 Rapid remote sensing method using IR spectrum matching for determining material composition from both terrestrial and extraterrestrial sources 18 p3111 A66-34013  
 Polarization and visible and IR reflectivity studies of Mars indicate that hematite is stable form on Martian surface 18 p3228 A66-34016  
 IR spectrophotometry of Moon and Jovian satellites of Jupiter, noting surface properties, thermal radiation and albedo increase with wavelength 18 p3232 A66-34487  
 Laboratory method for determining spectral emittance of partially transparent materials in IR 19 p3353 A66-35320  
 Chlorine trifluoride analysis using combination of gas chromatography and IR spectrophotometry, noting column containing dichloroethylene 23 p4032 A66-41239  
 Nondestructive detection technique of phosphosilicate layer on semiconductor wafers, using IR spectrophotometer 24 p4181 A66-42390  
**INFRARED SPECTROSCOPY**  
**A RAMAN SPECTROSCOPY**  
 Survey of IR measurement techniques and computational methods in radiant heat transfer (AIAA PAPER 65-657) 01 p0162 A66-10598  
 Mechanical and electro-optical parameters for some acetylene derivatives evaluated from IR spectra 01 p0109 A66-11004  
 IR spectroscopic instrument modifications and innovations, noting filter grating permitting measurement in far IR 02 p0230 A66-11794  
 Electrical, IR property measurements and annealing experiments on electron-irradiated oxygen doped germanium 04 p0562 A66-13747  
 Far IR observation of plasma emitted radiation and observation of plasma effect in propagation of externally generated radiation 04 p0522 A66-14196  
 IR spectroscopy to determine constant of self-combination of donor acceptors of protons in dilute solution 08 p1257 A66-18645  
 Mechanical and electro-optical parameters for some acetylene derivatives evaluated from IR spectra 09 p1404 A66-19942  
 Line-of-sight IR spectral temperature profile measurements in inhomogeneous hot gases 09 p382 A66-20505  
 Transmission of IR radiation from flames through various carbon dioxide wavelengths 09 p1471 A66-20509  
 IR spectroscopic observations with balloon-borne telescope, Stratoscope 10 p1603 A66-21108

IR absorption spectrum of local H-ion oscillations in KCl crystals doped with Na, Rb, Cs, I, Br and F 10 p1588 A66-22158  
 Vanadium oxide bands in near-IR spectra of three Mira stars 13 p2182 A66-25578  
 Humidity attenuation in 8 to 13 micron IR window used in radiance measurement from orbiting satellite 15 p2531 A66-28848  
 Efficiency of radiation sources in IR gas analyzer 16 p2706 A66-30849  
 Liquid oxygen purity control for onboard breathing equipment by IR absorption spectrophotometry and gas chromatography 17 p2866 A66-32233  
 Chemical bonds between rare earth metals and nitrate radicals in lanthanum, gadolinium and yttrium nitrates studied from IR absorption spectra 18 p3063 A66-33842  
 Survey of IR measurement techniques and computational methods in radiant heat transfer (AIAA PAPER 65-657) 19 p3477 A66-35595  
 IR absorption spectrum of local H-ion oscillations in KCl crystals doped with Na, Rb, Cs, I, Br and F 19 p3440 A66-35772  
 Electrolysis of wet hydrogen fluoride, noting analysis of anode products by gas chromatography and water content measurement by IR spectroscopy 23 p4118 A66-41236  
 Spectroscopy of IR emission and laser oscillation resulting from transient population inversions on electronic transitions in molecular nitrogen 24 p4221 A66-42550  
**INFRARED SPECTRUM**  
**SA NEAR INFRARED**  
 Soviet electronic telescope, indicating possibility of noneclipse observation of coronal lines in IR band 01 p0137 A66-10456  
 Oxygen impurity atom interaction with radiation-induced defects in germanium over wide temperature range, producing optically active oxygen defect complexes 02 p0272 A66-11486  
 IR-active lattice vibrational spectra of alpha-aluminum oxide and chromium oxide analyzed by reflection and transmission measurements 03 p0380 A66-12341  
 IR absorption spectra of aluminum and boron doped semiconducting synthetic diamonds 03 p0411 A66-13145  
 IR and UV absorption spectra of free radical NCN observed following photolysis of matrix isolated cyanogen nitride 04 p0473 A66-13644  
 Impurity concentration on semiconductor surface observing photoconductivity of silicon in IR region of spectrum 04 p0569 A66-14356  
 Tellurium alloyed impurity on IR absorption spectrum in n-type gallium arsenide 04 p0569 A66-14360  
 Absorption spectrum sidebands for quasi-local oscillation in KCl-H crystals 05 p0730 A66-14648  
 Unified refractive index and dispersion equations for IR materials in high speed computer calculations 05 p0715 A66-14922  
 IR spectral reflectance of terrestrial atmosphere including ground cover effect, noting data from airborne equipment and instrumented rocket 05 p0669 A66-14947  
 Stain film of chemical species formed by gas phase reaction on silicon 05 p0736 A66-14978  
 IR spectrum of clavacin structure 05 p0629 A66-15107  
 Measurement of surface emittance of surface coatings for selected metals, providing low-thermal emittance characteristics in IR spectrum for thermal and corrosion control (AIAA PAPER 66-18) 05 p0705 A66-15849  
 Fine structure exhibited by near IR absorption and emission spectra of copper ions in ZnS and CdS crystals recorded at low temperatures 05 p0742 A66-15874  
 Internal and vibrational partition functions of carbon dioxide and rotational line intensities arising from transitions from ground and first excited states 06 p0907 A66-15945  
 Kinetics of HF decomposition in HF mixtures behind incident shock waves over various temperature ranges, using IR emission 06 p0941 A66-16127

Free radical CCO spectroscopy when produced by vacuum UV photolysis of matrix isolated carbon suboxide 06 p0821 A66-16128  
 Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation 06 p0924 A66-16515  
 Changes in ordinary refractive index and birefringence of gallium sulfide and gallium selenide as function of wavelength for visible and near IR at low temperatures 06 p0929 A66-16940  
 Theoretical model of isolated Lorentz line of IR absorption by gases applied to atmospheric optics and spectroscopy problems 08 p1248 A66-19307  
 Beer and square root law compared in relation to use for atmospheric extinction correction in IR spectrum 09 p1372 A66-20292  
 Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation 09 p1431 A66-20896  
 Raman scattering and IR absorption spectra of gaseous, liquid and crystalline benzoyl benzoic acid and O-and M-toluic acids 09 p1339 A66-20941  
 Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 09 p1375 A66-20942  
 Nimbus I IR scanning radiometry for nocturnal imagery of clouds and other data, IR spectral returns and relation to image gray scale 10 p1531 A66-21519  
 IR absorption spectra of oxygen-defect complexes in irradiated silicon 10 p1581 A66-21737  
 Vanadium pentoxide-boron oxide-lead oxide system IR absorption spectra and electroconductivity 10 p1582 A66-21917  
 Broadening of IR absorption lines by HF local oscillations attributed to either modulation effects or decay processes 10 p1588 A66-22162  
 IR spectral study of water deficiency in S stars and water abundance variation with Mira phase 11 p1771 A66-22771  
 Spectral emissivity measurements of carbon dioxide at high temperatures 11 p1738 A66-22870  
 Conductivity effective-mass of holes of gallium arsenide crystals with various hole concentrations determined from frequency dependence of spectral reflectivity in IR 12 p1928 A66-23942  
 Spectral and vertical distribution of atmospheric IR radiation flux divergence for five model atmospheres, noting dependence on sighting angle 12 p1874 A66-24868  
 InAs laser emission, discussing radiative transitions, coherent emission from InAs diodes, recombination mechanisms in IR radiation spectra, etc 13 p2089 A66-25065  
 Panoramic facsimile camera providing IR and visible spectrum imagery designed for unmanned space operation, noting construction, weight, etc 13 p2077 A66-25236  
 IR reflection spectrum of Jupiter from second flight of Stratoscope II, discussing deep absorption features 13 p2184 A66-25619  
 Normal emittance, reflectance and transmittance spectra of roughened rock and mineral surfaces from 8 to 25 micron wavelengths 13 p2017 A66-25873  
 Absorption spectrum sidebands for quasi-local oscillation in KCl-H crystals 13 p2167 A66-25923  
 Solar near-IR scattering by sunlit terrestrial clouds as affected by cloud type, altitude and scattering angle 13 p2073 A66-25989  
 Effect of longitudinal magnetic field on output power of gas laser operating in IR spectrum, noting gas-mixture pressure in discharge tube role 14 p2307 A66-27156  
 Transmission and reflection coefficients of semiconductors and insulators for use in visible and IR spectral regions 14 p2334 A66-27334  
 Laser oscillator study of coherent stimulated emission of IR transitions in rare gases 14 p2308 A66-27336  
 Effect of radiative sound absorption in atmosphere, calculating absorption due to radiation by water vapor in far-IR rotation

spectrum 14 p2334 A66-27659  
Faraday effect in rare earth garnet ferrites and metallic ion  $g$  values in IR spectrum 14 p2364 A66-27703  
Characteristic spectral information obtained from surface of fine particles if spectrum is observed at high SNR or particles are compacted 14 p2335 A66-27809  
Reflection spectra of rock powders compared with Stratoscope II spectrum of Mare Tranquillitatis 14 p2386 A66-28126  
Impurity concentration on semiconductor surface, observing photoconductivity of silicon in IR region of spectrum 14 p2368 A66-28254  
Tellurium alloyed impurity on IR absorption spectrum in  $n$ -type gallium arsenide 14 p2369 A66-28258  
Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 15 p2483 A66-28530  
Outgoing Earth and atmospheric radiation observed in IR spectrum at various altitudes by geophysical balloons and rockets 15 p2483 A66-28739  
Optical properties and thermal behavior of new absorption bands in oxygen doped silicon irradiated at low temperatures 15 p2564 A66-28874  
Cloud top heights and areal coverage obtained from satellite IR measurements, noting error estimation and effect of cloud size on accuracy 15 p2485 A66-28938  
IR spectral reflectance of water frost and solid carbon dioxide 15 p2501 A66-28977  
IR absorption of arsenic monoselenide 15 p2565 A66-29198  
IR absorption spectrum of neutron bombarded silicon 15 p2565 A66-29202  
Optical harmonic generation in IR in zinc blende, hexagonal and trigonal crystals, using unfocused carbon dioxide laser in CW and Q-switched operation 16 p2716 A66-30182  
Surface IR photoconductivity spectra of chemically etched  $p$  and  $n$  silicon, noting energy distribution, activation energies of centers, etc 16 p2788 A66-31774  
Low noise photodiodes with avalanche multiplication for high sensitivity, noting capability for low intensity wideband signal detection, performance in IR region, etc 17 p2880 A66-31934  
Phosphorus I lines identified in lambda greater than 2935 region of solar spectrum with aid of tables of Fraunhofer lines 17 p2999 A66-32267  
IR absorption of arsenic monoselenide 17 p2982 A66-33047  
IR absorption spectrum of neutron bombarded silicon 17 p2982 A66-33051  
Profile and center-to-limb variation of IR helium I triplet at 10,830 angstrom photoelectrically observed in spectrum of undisturbed solar disk 18 p3237 A66-35045  
Broadening of IR absorption lines by HF local oscillations attributed to either modulation effects or decay processes 19 p3441 A66-35776  
Silicon IR absorption spectra at various wavelengths before and after irradiation with neutron fluxes 19 p3442 A66-35821  
Theoretical model of isolated Lorentz line of IR absorption by gases applied to atmospheric optics and spectroscopy problems 19 p3400 A66-36043  
Vibrational spectrum of liquid, solid and gaseous tetradeuterated hydrazine and Raman study of hydrogen bonding in hydrazine 19 p3295 A66-36801  
Detectability of coronal IR lines due to Mg, Al and Si ions with practicable IR spectrometers and photoconductive detectors, considering atmospheric attenuation 20 p3649 A66-37333  
Coherent radiation generation in IR region by nonlinear optics 20 p3582 A66-38429  
Coherent radiation generation in IR region by nonlinear optics 21 p3746 A66-38962  
Birefringence of certain crystals sufficiently large to allow collinear backward wave interaction of three electromagnetic waves with signal frequency tunable over large portion of IR spectrum 21 p3771 A66-39113  
Temperature dependence of integral

absorption and band half-width in IR spectra of methyl and ethyl siloxanes 21 p3802 A66-39160  
High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 21 p3749 A66-39336  
High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 22 p3929 A66-39706  
IR I and visual V magnitudes of comet Ikeya-Seki determined, using photoelectric measurements 22 p3977 A66-39863  
Helium atoms in 2P level contribute to formation of excited helium molecules in positive column of DC discharge, noting IR portion of pumping radiation is responsible for enhancement of molecular population 22 p3950 A66-39918  
IR absorption band growth and decay in spectra of oxygen-doped Si irradiated with fast neutron 22 p3962 A66-40085  
Spectral and vertical distribution of atmospheric IR radiation flux divergence for five model atmospheres, noting dependence on sighting angle 22 p3912 A66-40329  
New absorption bands in near IR spectrum of Mars found by Fourier spectroscopy via carbon dioxide absorption measurements 22 p3981 A66-40486  
IR active localized vibrational modes absorption in lithium and copper compensated silicon doped gallium arsenide 24 p4251 A66-42298  
Brightness variation from center to limb for Sun in submillimeter and IR range calculated from some available models of solar atmosphere 24 p4278 A66-42708  
Photodetectors capable of microwave modulation frequency response operating in visible or near IR portion of optical spectrum 24 p4212 A66-42808  
Effect of longitudinal magnetic field on output power of gas laser operating in IR spectrum, noting gas-mixture pressure in discharge tube 24 p4225 A66-42977  
Light emission in near IR by semiconducting GaAs under current oscillations caused by electron-phonon coupling 24 p4258 A66-43000

## INFRARED TRACKING

Packaging design of electronics portion of missiles IR tracker 13 p2040 A66-25841  
IR trackers, discussing method of operation, performance characteristics and application 13 p2025 A66-25983  
Propellant rocket exhaust plume effect on error calculation for radiation balance IR tracker 18 p3240 A66-33798

## INFRASONIC FREQUENCY

LF and infrasonic noise effects on mans cardiac rhythm, hearing, vision, motor control, spatial orientation, speech and subjective tolerance 07 p0999 A66-17656  
Propagation modes of infrasonic waves in isothermal atmosphere with constant horizontal winds and under effect of gravity 17 p2959 A66-33032  
Infrasonic frequency spectrum transformation using magnetic signal recording and reproduction 21 p3713 A66-39322

## INHOMOGENEITY

High field magnetoresistance and random inhomogeneities in arsenic- or antimony-doped  $n$ -type germanium 12 p1931 A66-24805  
Random phase approximation of electron conductivity of turbulent plasma and effects of random static inhomogeneities 13 p2149 A66-26245  
Galerkin vector for elastodynamic problem of isotropic inhomogeneous body 16 p2823 A66-31707  
Overall elastic moduli of inhomogeneous system composed of various solid phases firmly bonded together at arbitrary concentration 17 p3029 A66-32791  
Resistivity of semiconductors with periodic inhomogeneity, noting cases of surface perpendicular and surface parallel stratifications 18 p3155 A66-34229

## INITIAL VALUE PROBLEM

Buckling mechanism for uniform external pressured spherical shell, evaluating transcendental functions via solution of initial value problem 03 p0435 A66-12616

Spectral dynamics of laminar convection, discussing transformation of Benard convection problem into spectral domain 04 p0599 A66-144  
Unique solvability of certain initial boundary problems with equations of mixed type 05 p0727 A66-153  
Initial value problem for Boltzmann-Vlasov and Poisson equation for one-dimensional plasmas 06 p0915 A66-161  
Optimal estimation of initial conditions for numerical prediction 07 p1055 A66-173  
Slow decay of solution of initial boundary value problem for wave equation unbounded region 07 p1059 A66-179  
Landau solution of plasma oscillation problem, discussing dielectric function Lorentzian distribution and cut-off distribution 08 p1260 A66-185  
Nonlinear weather prediction by optimum method of control theory for combining past forecasts with current observations 08 p1248 A66-193  
Geometric program for processing penetrating cosmic ray shower data, consisting of individual track processing at initial point location 09 p1441 A66-202  
Convergence of numerical solutions of OI initial value problems 09 p1394 A66-208  
Initial value problem of converging shock wave propagation in quiescent gas variable density 10 p1521 A66-212  
Stability of baroclinic circular vortex incompressible inviscid fluid for axisymmetric disturbances 10 p1530 A66-212  
Approximate solution of initial boundary value problems involving heat conduction inhomogeneous and anisotropic media 10 p1620 A66-213  
Dependence of hyperbolic equations apex of characteristic cone on initial functions 10 p1551 A66-219  
Initial conditions determination in aircraft takeoff from mobile platform required for solution of differential equations of motion of gravity center 11 p1734 A66-233  
General solution for class of initial value problems for systems of aerodynamic equations, constructing reference solution Cauchy problem involving shock wave expansion waves 11 p1694 A66-233  
Northward momentum transfer across asymmetric jet in three-dimensional atmosphere analyzed, using initial value problem, noting energy transfer across transformation 13 p2064 A66-261  
Cauchy problem of first-order nonlinear partial differential equations 13 p2121 A66-265  
Initial value problem for Navier-Stokes equation 14 p2273 A66-269  
Decay of solutions of initial boundary value problem for hyperbolic equations unbounded regions 14 p2322 A66-276  
Linear initial value problems involving first order differential equations transformed into higher order systems and treated boundary value problems, using numerical techniques 15 p2529 A66-297  
Multidimensional generalized transport equations solutions and calculation difference methods 16 p2732 A66-302  
Gurtin variational principles characterizing linear elastodynamics initial value problem extended to dynamic viscoelasticity theory 16 p2813 A66-302  
Short-range forecasting of stratified cloudiness, noting linear dependence between variations in dew point and air temperature near Earth surface for aperiodic processes 16 p2742 A66-307  
Cause and effect interdependence in line system, noting distribution theory ar double Laplace transform 16 p2670 A66-310  
Nonlinear system position in phase space determined from approximate solution integral equations yielding initial values 16 p2748 A66-315  
Initial value problem for small amplitude wave perturbations solved on zon atmospheric flow with constant vertical shear and vanishing temperature lapse rate 16 p2699 A66-316  
Textbook on numerical solution of initial value problems and approximate numerical integration 17 p2948 A66-334  
Initial boundary value problems involving Maxwell equations in isotropic media solved

merically 18 p3065 A66-33533  
 Partial differential equation describing  
 transient conduction in multidimensional  
 homogeneous media solved by method  
 based on use of known boundary  
 conditions 18 p3262 A66-34380  
 Dependence of hyperbolic equations in  
 hex of characteristic cone on initial  
 functions 19 p3389 A66-36184  
 Wellerstrass necessary condition and basic  
 equations for optimal control of initial or  
 boundary states of continuum mechanical  
 HD and hypersonic partial differential  
 systems 20 p3535 A66-36853  
 Asymptotic behavior of solutions to  
 boundary value and initial problems for ODE  
 with small parameter, using functions of  
 lower law boundary layer 20 p3590 A66-37109  
 Convergence of difference approximations  
 rectangular grids for general first-order  
 quasi-linear hyperbolic initial value problems  
 two independent variables 20 p3590 A66-37526  
 Comparison variables transformation of  
 linearized perturbation initial value  
 problems for nonlinear ordinary first-order  
 differential equation 21 p3756 A66-38817  
 Asymptotic time behavior of longitudinal  
 waves in one-dimensional plasma of  
 relativistic electrons and stationary ions  
 studied, using collisionless Boltzmann  
 equation 21 p3775 A66-39189  
 Initial value problem solution variation  
 linearized by simple transformation 21 p3758 A66-39273  
 Dynamic behavior of soap film stretched  
 between two coaxial rings, assuming  
 potential energy of this surface to be  
 proportional to surface area 21 p3772 A66-39353  
 Implosion experiment, discussing methods  
 for detonation and shock wave propagation  
 phase calculation 21 p3837 A66-39503  
 Cauchy problem of first-order nonlinear  
 partial differential equations 22 p3939 A66-40439  
 Book on numerical processes in differential  
 equations including initial value and  
 boundary value problems 22 p3941 A66-40620  
 Difference assessment between secular and  
 long period perturbations generated by  
 similar initial conditions for celestial  
 mechanics problems 22 p3985 A66-40959  
 Parameters of dynamic systems described  
 by PDEs determined by replacing PDE with  
 integral equation and eliminating via  
 recursion process terms resulting from  
 initial and boundary conditions 23 p4084 A66-41396  
 Radiation and propagation of  
 electromagnetic waves, noting solution to  
 initial value problem for moving point  
 source in infinite homogeneous  
 medium 23 p4040 A66-41635  
 Existence of new isolating integral in  
 restricted three-body problem, computing  
 orbits for various parameter values and  
 initial conditions 24 p4272 A66-42202  
 Vibrations of systems governed by  
 nonlinear partial differential equations  
 analyzed by perturbation method 24 p4236 A66-42267  
 Weak and strict solution existence theorem  
 for initial-boundary value problem for  
 nonlinear hyperbolic equation in relativistic  
 quantum mechanics 24 p4237 A66-42829

 INLET FLOW  
 Behavior of unassisted annular cowed  
 compressor intakes under cross-flow  
 conditions [AIAA PAPER 65-707] 01 p0130 A66-10945  
 Axial compressors with nonuniform inlet  
 flow, investigating size of gap between  
 blade rows and rotating stall 01 p0008 A66-10953  
 Inlet region of laminar meridional flow in  
 arbitrarily shaped narrow gap between two  
 axisymmetrically formed walls 02 p0217 A66-11585  
 Entrance region Newtonian flow analysis in  
 tube of circular cross section for possible  
 use in viscometry and flow stability studies  
 [AICE PREPRINT 19D] 04 p0511 A66-13935  
 Characteristics of jet ejector with faired  
 inlets as augmenters treated by continuity  
 and momentum equation 04 p0456 A66-14388  
 Unsteady state heat transfer with flowing  
 fluid through porous solids [ASME PAPER 65-HT-10] 05 p0782 A66-14736  
 Diffusion in supersonic duct flow composed  
 of boundary layers, with application to  
 hypersonic inlet with internal compression  
 [AIAA PAPER 64-245] 05 p0606 A66-15071  
 Pressure drop in entrance region of abrupt  
 inlet circular tube for continuum laminar  
 flow conditions [ASME PAPER 65-WA/APM-5] 05 p0663 A66-15428  
 Laminar heat transfer in inlet tube,  
 determining velocity and temperature

distribution [ASME PAPER 65-WA/HT-36] 05 p0792 A66-15671  
 Influence of inlet flow profile  
 characteristics on diffuser static pressure  
 efficiency, achieving pressure increase if  
 flow has high decay rate 06 p0801 A66-16002  
 Inlet of XB-70 consisting of two separate  
 parts located under wing, each part  
 supplying air to three of six J-93  
 engines 07 p0987 A66-17278  
 Motion of particles of dispersed phase at  
 inlet to sampling probe analyzed for  
 application to two-phase medium  
 flow 07 p1031 A66-17417  
 Heat transfer in 20-inch hypersonic wind  
 tunnel to two-dimensional inlet ramp at  
 various angles of attack 08 p1318 A66-19147  
 Pressure drop in entrance region of abrupt  
 inlet circular tube for continuum laminar  
 flow conditions [ASME PAPER 65-WA/APM-5] 10 p1523 A66-21471  
 Losses in vaneless diffusers of centrifugal  
 compressors and pumps due to wall friction  
 and sudden expansion mixing at entrance  
 [ASME PAPER 65-FE-1] 10 p1540 A66-21504  
 Behavior of unassisted annular cowed  
 compressor intakes under cross-flow  
 conditions [AIAA PAPER 65-707] 10 p1594 A66-21890  
 Initial flow in entrance of straight circular  
 pipe computed as refinement of Atkinson  
 and Goldstein solution 12 p1867 A66-24980  
 Rarefied gas flow in hydrodynamic  
 entrance region of circular tube, noting  
 variation with density level, velocity profile  
 and pressure drop for developing  
 flow 13 p2070 A66-26713  
 Secondary flow in entrance section of  
 straight rectangular duct, measuring primary  
 and secondary velocities, turbulence, axial  
 component, Reynolds stress gradients,  
 etc 13 p2070 A66-26714  
 Long-life base load service at 1600 F  
 turbine inlet temperature, noting fuel-air  
 and temperature controls [ASME PAPER 66-GT-98] 14 p2372 A66-27000  
 Heat transfer rate in thermal inlet of  
 circular tube, describing experimental  
 apparatus and observational  
 results 14 p2411 A66-27313  
 Pressure drop for non-Newtonian flow in  
 inlet length of straight  
 channel 14 p2279 A66-28464  
 Two-dimensional flow of incompressible  
 conducting viscous liquid in inlet region of  
 straight channel under magnetic field,  
 obtaining flow characteristics 15 p2553 A66-29742  
 Velocity profile of incompressible and  
 electrically conducting flow in entrance  
 region of constant area MHD  
 channel 16 p2763 A66-31255  
 Turbine blades suitable for supersonic  
 relative inlet velocities and performance in  
 cascade 17 p2841 A66-32889  
 Flow characteristics, design and  
 performance data for subsonic two-  
 dimensional straight centerline diffusers  
 [ASME PAPER 66-FE-10] 17 p2915 A66-33264  
 Inlet/door performance characteristics of  
 VTOL lift-engines studied in full-scale wind  
 tunnel tests [AIAA PAPER 66-655] 18 p3048 A66-34222  
 Shock wave boundary layer interactions  
 and shear flow regimes in hypersonic inlet  
 flows [AIAA PAPER 66-606] 18 p3049 A66-34447  
 MHD flow with parabolic velocity at  
 entrance region of flat  
 channel 18 p3149 A66-34915  
 Supersonic compressor flow induction  
 process as affected by Mach number, cone  
 angle, rotational speed and blade angle  
 [AIAA PAPER 66-615] 19 p3275 A66-35943  
 Busemann inlet flow field calculation for  
 hypersonic speeds, considering internal-  
 compression inlet geometry and  
 performance 20 p3493 A66-38178  
 Bell-shape diffuser for rotationally  
 symmetrical flow 21 p3694 A66-38815  
 Slip flow in hydrodynamic entrance region  
 of tube and parallel plate channel  
 determined by solving linearized momentum  
 equation 21 p3730 A66-39459  
 Velocity distribution for inlet flow in finite  
 radial diffuser 21 p3731 A66-39591

Jet V/STOL aircraft inlet temperature rise caused by recirculation of hot exhaust gases in ground proximity [AIAA PAPER 66-740] 22 p3851 A66-40629

Dynamic test method for characteristics and interactions of supersonic aircraft propulsion systems, particularly inlet/engine performance and control compatibility aspects [AIAA PAPER 66-741] 22 p3893 A66-40630

Bluntness and boundary layer displacement effects on air breathing engine hypersonic inlet flow fields [AIAA PAPER 65-617] 23 p4007 A66-41109

Model determination of effects of injecting and mixing fuel in inlet diffuser of two-shock inlet hypersonic ramjet or scramjet [AIAA PAPER 66-648] 24 p4261 A66-42641

Pressure effects of flexible walls on boundary layer transition in turbulent pipe inlet flow 24 p4195 A66-42859

**INNER RADIATION BELT**

SA ARTIFICIAL RADIATION BELT

SA OUTER RADIATION BELT

SA VAN ALLEN BELT

Directional intensity of electron distribution of energies larger than 40 kev with respect to pitch angles in inner belt from Cosmos V data 06 p0951 A66-17172

Relay I satellite mapping of energy spectrum and spatial distribution of protons in inner radiation belt 08 p1283 A66-19396

Particle transfer across drift shells as basic mechanism of acceleration of protons and electrons in outer radiation belt and formation of inner radiation belt 09 p1444 A66-21023

Terrestrial radiation belt during solar minimum, noting results from measurement with Elektron satellite series 18 p3175 A66-34745

German-French high-altitude rocket measurement of inner radiation belt and artificial ion clouds at altitude of 2000 km 19 p3348 A66-36286

Latitude and longitude variation of count rate and intensity-time dependence of proton flux in inner radiation belt measured by Anton 302 G-M counter in Ariel I satellite 20 p3638 A66-38306

Acceleration of electrons in inner radiation belt by magnetic field variations over slope of geomagnetic anomaly in resonance with longitudinal drift frequencies of electrons 20 p3638 A66-38308

Energy spectrum of inner zone protons with conclusions drawn about source and loss mechanisms for protons in inner radiation zone 20 p3638 A66-38309

Temporal stability of inner zone protons determined by Injun I satellite measurements in vicinity of South Atlantic magnetic anomaly 20 p3638 A66-38311

Injection of protons into inner radiation belt caused by decay of fast cosmic ray albedo neutrons and superimposition of low-energy protons of unknown origin 20 p3639 A66-38318

**INORGANIC COMPOUND**

Radiation induced chemical decomposition in inorganic solids such as alkali metals and metallic sulfates 23 p4111 A66-41212

Radiolysis applied to effects of ionizing radiation on volatile inorganic compounds of fluorine, oxygen and nitrogen, noting mass spectrometric peaks 23 p4032 A66-41235

Wolf Trap Mars microorganism detection, assuming photosynthetic and respiration cycles in inorganic biochemical compounds 24 p4168 A66-42676

**INPUT**

Manual methods of entering navigational data on cards for input into computer 17 p2956 A66-33447

**INSECT**

S DROSOPHILA

**INSERT**

S NOZZLE INSERT

**INSERTION**

Radio interference control component RF characteristics and insertion loss measuring techniques 11 p1665 A66-22681

Synthesizing group of parallel-input filters while minimizing insertion loss and reflection coefficient 11 p1656 A66-23065

**INSULATION**

Utilization tests of nonradiating Francia cellular structures placed on spiral insulator

and heated to low and medium temperatures 22 p3852 A66-40247

**INSPECTION**

SA DETECTION

SA INFRARED INSPECTION

SA QUALITY CONTROL

SA X-RAY INSPECTION

NASA Quality Program for Space System Contractors /NPC 200-2/ serves as standard for quality control

Inspectors 03 p0373 A66-12628

Endoscopes in aviation noting role in inspection of wing interiors, power plants, etc 07 p1040 A66-18330

General family of two-stage chain sampling inspection plans 15 p2506 A66-28789

Numerical control for inspection of machine tools and parts 15 p2506 A66-28790

Inspection techniques for NASA, discussing control of supplier plants, Quality Requirements for Hand Soldering of Electrical Connections and personnel accountability 15 p2506 A66-28792

Maintenance and inspection of air transport vehicle structures 19 p3278 A66-35399

Planned inspection of hardware based on warning analysis, relation to improved cost effectiveness 20 p3569 A66-37921

**INSTABILITY**

SA COMBUSTION INSTABILITY

SA MAGNETOSPHERIC INSTABILITY

SA PLASMA INSTABILITY

SA SPUTTERING

SA TAYLOR INSTABILITY

SA THERMAL INSTABILITY

SA WHIRL INSTABILITY

Boltzmann equation for Gunn effect in GaAs, discussing scattering processes, unjustifiability of use of drifted Maxwell distribution, etc 10 p1583 A66-22067

Curve analysis of current instabilities including Gunn effect in n-type gallium arsenide 22 p3961 A66-40045

**INSTRUMENT**

SA TEACHING MACHINE

Instructional System model for meeting USAF maintenance technical training requirements for complying with weapon system requirements 23 p4030 A66-41578

**INSTRUMENT**

SA APPROACH AND LANDING

INSTRUMENT

SA ELECTROMAGNETIC INSTRUMENT

SA ELECTROSTATIC INSTRUMENT

SA FLIGHT INSTRUMENT

SA INFRARED INSTRUMENT

SA MAGNETIC INSTRUMENT

SA OPTICAL INSTRUMENT

SA RECORDING INSTRUMENT

SA SOLAR INSTRUMENT

Instruments and measurements, automatic control - International Conference, Stockholm, September 1964 16 p2706 A66-30879

**INSTRUMENT APPROACH**

Helicopter landing in zero-zero weather, describing experiment in England involving landing in dense fog 17 p2844 A66-32728

**INSTRUMENT ERROR**

Slab motions affecting test mounts for gyroscopes and accelerometers investigated at underground and surface test locations 01 p0051 A66-10029

Test pad stability measurement using two accelerometers and recording autocollimator 01 p0065 A66-10031

Technique for controlling logarithmic amplitude response /LAR/ and regulating logarithmic amplifiers under industrial conditions 01 p0035 A66-10219

Cryogenic problems in temperature and level sensing discussing thermocouples, resistance sensors, vapor and gas bulb thermometers and level gauges and probes 01 p0070 A66-10955

Calibration procedures and statistical analysis for error reduction in ballistic camera lead-screw type comparator 02 p0228 A66-11380

Reseau techniques application to cartographic photography to improve analytical procedures, reduce mensuration errors and aid in automating systematic corrections 02 p0228 A66-11382

Photographic pyrometer using variable-density filter noting temperature master curve, attenuation, calibration and error

sources 02 p0229 A66-115

Doppler radar performance in al navigation noting calibration error, dispersion, hole-altitude phenomena, etc 02 p0256 A66-118

Altimetry methods reviewed for altitudinal in 40,000 to 80,000 ft range, noting calibration and instrument accuracy 02 p0231 A66-119

Errors in Doppler system determination ground speed and improvement trends wider application 02 p0258 A66-120

Angular velocity and linear acceleration measurement by three mutually orthogonal rotating disks 03 p0369 A66-126

Nonlinear analog-to-digital converter for more constant accuracy 03 p0338 A66-129

Assured performance calibration discussion statistical quality control, instrument variability, vacuum tube and digit voltmeter histories, calibration costs etc 04 p0520 A66-139

Bead leakage affect on voltmeter discussing quality control measurement at thermal effects on electric equipment 04 p0521 A66-139

Use of two reference noise sources for measurement of effective noise temperature of conventional receiver system leads serious errors 04 p0484 A66-140

Heat conductivity measurement of solids determine exact values of experiment error 04 p0521 A66-141

Meridian astronomy methods including determination of instrumental error derivation of systems of right ascension and declinations and determining systematic errors 05 p0761 A66-150

Deformation calculation of RM-700 telescope mounting 05 p0680 A66-152

Geocentric pendular control for detection of direction of terrestrial field 05 p0713 A66-154

Effect of lateral refraction and therm conditions near Pavlov passage instrument on azimuthal position values and time measurement results 05 p0766 A66-154

Instrument errors in neutron monitor affected by contact oxide film 06 p0881 A66-166

Instrumental effects distorting data telescopically observed meteors analyzed simultaneously observation with various binocular telescopes and naked eye 07 p1135 A66-176

Checking and calibration of aircraft compasses, discussing compass base Dublin Airport and effect of lightning strikes 07 p1032 A66-176

Controlled direct current applied to flapper valve to stimulate rotation of aircraft compass swing 07 p1033 A66-177

Error of airborne Doppler navigational system 07 p1073 A66-177

Feedback transfer function analyzer for error reduction in performance measurement for servocontrol systems 07 p1016 A66-178

Indicator design for semiconductor strain gauges, discussing basic circuitry, calibration and stability 08 p1226 A66-195

Digital cross multiplication used in cross coupling and off-leveling errors in gravimetric measurements at sea 09 p1369 A66-198

Height measurement from Doppler navigation, examining accuracy of pressure altimeter 09 p1381 A66-204

Measurement error for pulmonary ventilation during sinusoidal vibration and correcting device consisting of time delay and summing circuit 09 p1335 A66-205

Microwave phase measurement technique using slotted-line interferometer for optimum accuracy 10 p1537 A66-2187

Manual control sextant sighting performance for space navigation, using simulated and real celestial targets 10 p1554 A66-2188

Errors of charged-particle analyzer, resulting from expansion of plasma beam within and without 11 p1744 A66-2245

Measurements of decay curves of stored Aitken nuclei with photoelectric nucleus counter show small nonrandom divergence from theoretical curves 11 p1707 A66-2309

Solar-diurnal cosmic-ray variations

- alyzed, showing that averaging  
observational data over worldwide network  
stations leads to large  
errors 12 p1943 A66-24183
- High altitude mesospheric temperature  
measurements, discussing air-to-sensor heat  
transfer mechanism, bead thermistor and  
ascend rate 13 p2124 A66-25256
- [IAA PAPER 66-388] 12 p1908 A66-24510
- Interplanetary trajectory adaptive  
gyrocompass system, discussing orbital  
angular velocity, angular acceleration, error  
sensitivity coefficients, error sources,  
etc 13 p2124 A66-25256
- Controlled direct current applied to flux  
drive to stimulate rotation of aircraft in  
compass swing 13 p2079 A66-25866
- Surface temperature measurement using  
thermocouples, noting error  
sources 13 p2081 A66-26221
- Accuracy of test device determining  
conductivity of semiconductor materials  
increased by using error calculation and  
design systematology 13 p2085 A66-26761
- Compensation for error resulting from  
inclination of frame of gyrocompass with  
elastic recovery moment, based on shifting  
gravity center along major  
axis 14 p2294 A66-27363
- Utilization of confidence interval concept  
for instrument calibration 14 p2296 A66-27818
- Reduction of measurement error in devices  
for testing semiconductors, employing  
mechanical techniques 14 p2297 A66-28132
- Gravimeter error in recording of Earth  
tides, examining levelling and calibration  
problems 14 p2298 A66-28400
- Time jitter due to inherent noise when  
sampling intervals in Fourier transform  
spectroscopy by interferometer, examining  
effects and elimination  
methods 15 p2499 A66-28849
- Errors in wind speed measurements under  
conditions of turbulence, noting quantitative  
aspects of lateral, vertical and data  
processing errors 15 p2533 A66-28940
- Random error estimation for Mach-Zehnder  
interferometer interference fringe  
measurements 15 p2502 A66-29383
- Potentiometric type pressure transducer  
optimization for low static error  
band 16 p2704 A66-30538
- Calibration and testing of temperature  
measuring devices in -200 to 3000 degrees  
16 p2704 A66-30632
- Symmetry measurements in  
communications device and systems, noting  
error 16 p2707 A66-31030
- Error determination in autonomous  
determination of coordinates, obtaining  
solution for kinematic equations of  
navigation in near-polar  
region 16 p2744 A66-31146
- Inertial components and systems evaluation  
with figures of merit for requirements,  
noting accelerometer errors, limiting  
response, etc 16 p2707 A66-31148
- Wire-to-surface heat transfer and error in  
hot-wire anemometer  
measurements 16 p2708 A66-31256
- Nonstationary aerodynamic load for  
harmonically oscillating body in fluid flow  
with constant mean velocity measured,  
determining errors as functions of system  
parameters 16 p2630 A66-31302
- Angular transducer using Hall effect,  
noting errors due to distortions in magnetic  
circuit and temperature  
effects 16 p2709 A66-31577
- Static errors in Hall effect multiplying  
devices 16 p2667 A66-31580
- Maximum absolute error of temperature  
measurements by means of standard  
platinum resistance  
thermometer 16 p2709 A66-31610
- Technique for controlling logarithmic  
amplitude response /LAR/ and regulating  
logarithmic amplifiers under industrial  
conditions 17 p2880 A66-31902
- Russian monograph on gyroscopic stabilizer  
theory and error  
assessment 17 p2925 A66-32567
- Inertial system testing and errors resulting  
from platform  
misalignments 17 p2928 A66-33460
- Propellant rocket exhaust plume effect on  
error calculation for radiation balance IR  
tracker 18 p3240 A66-33798
- Test pad stability measurement using two  
accelerometers and recording  
autocollimator 18 p3110 A66-33815
- Third-order orbital gyrocompass horizontal  
and vertical damping techniques to  
eliminate gyro and bias errors in horizon  
sensor 18 p3110 A66-33828
- Random and systematic errors in satellite  
trajectory computations 18 p3227 A66-33870
- Upper wind theodolite measurement error  
caused by ambiguous utilization of rate of  
climb of balloon 18 p3128 A66-33962
- Optical system for measurement of aerial  
profile accuracy of large parabolic reflector  
noting design principles, instrument  
composition and experimental  
results 18 p3113 A66-34276
- Energy measurement errors effect on  
characteristics of elementary  
interactions 18 p3140 A66-35168
- Constant current sources consisting of  
sealed ionization chambers for calibrating  
electrometers 19 p3357 A66-35809
- Signal processor recovery time effects on  
photon counting accuracy, observed counts  
and true events in some derived  
curves 19 p3359 A66-35919
- Strain gauge strip chart error  
determination, elimination and effects on  
accuracy of electric  
calibration 19 p3360 A66-36307
- Ephemeral geopotential variations from  
deviations in quartz oscillator clocks of  
Paris and Greenwich  
observatories 19 p3351 A66-36370
- Fourier transform used in correction of  
instrument contour error when observing  
solar spectral line profile 20 p3647 A66-37042
- Symbolic programming digital computer  
techniques, hardware interfacing and system  
errors in simulation of lunar midcourse  
guidance and navigation  
systems 20 p3543 A66-37250
- Fuel and propellant gauging, using method  
of capacitance change induced by liquid  
dielectrics 20 p3664 A66-38251
- Ellipsoid mirror reflectometer using  
radiant flux from IR  
monochromator 20 p3561 A66-38297
- Transistorized portable UV dosimeter for  
use in medicine, climatology, physiotherapy,  
meteorology and stimulated plant growth  
study 20 p3562 A66-38436
- Spectral line profiles corrected for  
influence of apparatus 21 p3736 A66-38636
- Radial velocity measurements with  
objective prisms, discussing error sources,  
luminosity, etc 21 p3737 A66-38821
- Error sources in strapdown inertial  
attitude reference system consisting of  
three pulse torqued gyros and digital  
differential analyzer 21 p3763 A66-38840
- Gyro and accelerometer errors in ternary  
torqued inertial components mounted on  
surface to surface missile, noting angular  
vibration environment 21 p3764 A66-38848
- Gemini VII star sightings analyzed, using  
handheld space sextant in Gemini VI,  
discussing effect of bias, timing, angle  
measurement and trajectory  
errors 21 p3767 A66-38893
- Elimination of rate gyro angular  
acceleration error and scale factor  
sensitivity to wheel speed by integration of  
output signal 21 p3767 A66-38895
- Flow velocity effect on thermometer  
reading and consequences for measuring  
thermodynamic efficiency of hydraulic  
machines 21 p3737 A66-38935
- Legibility analysis to investigate effects of  
scale factors, graduation marks, etc, on  
speed and accuracy of reading moving tape  
instruments 21 p3701 A66-39422
- Noise-signal receiver amplitude-limitation  
effect on noise measurement in presence of  
pulsed interference 22 p3861 A66-39655
- Bottom-moored sonar beacons surveyed in  
absolute position coordinates, noting  
transmitter-receiver and celestially  
augmented inertial navigator and error  
minimization techniques 22 p3945 A66-40323
- Narrow laser beam pointing technique in  
deep space-to-earth data transmission for  
reduction in error  
sources 22 p3867 A66-40496
- Observed Faraday polarization variation of  
satellite transmission radio signals due to  
ionospheric irregularities, latitudinal  
electron density variations and antenna  
geometry readout error 22 p3867 A66-40556
- Distortions in aerial photographs due to  
errors in cameras, noting determination  
methods in various  
countries 22 p3919 A66-40622
- Monograph on theory of gyroscopic  
instruments and devices 23 p4066 A66-41052
- Error sources in strapdown inertial  
attitude reference system consisting of  
three pulse torqued gyros and digital  
differential analyzer 23 p4088 A66-41101
- Fluid stratification in floated gyroscope,  
estimating drift rate as function of time,  
geometry and flotation  
mixture 23 p4066 A66-41102
- Error of measurement of mean square  
value of fluctuation signals due to voltmeter  
calibration 23 p4038 A66-41523
- Elastic microstrain of polycrystalline  
titanium measuring device, discussing  
measurement error 24 p4227 A66-42222
- Error of two-rotor gyrohorizon compass  
caused by hydraulic damper during stop or  
steady motion 24 p4210 A66-42447
- Potential sensitivity of energy radiation  
detectors, examining measurement error  
causes for radiation power of natural and  
artificial sources 24 p4172 A66-42523
- Plane gridded retarding potential analyzer  
for measuring dominant constituent ion  
concentrations, temperature and instrument  
potential in planetary  
ionospheres 24 p4201 A66-42605
- Meteorological measurement systems in  
relation to aerospace problems, using flight  
history of rocket vehicle and root mean  
square accuracy 24 p4214 A66-43043
- Sporadic E layer reflection used to  
determine instrument constant in measuring  
radio wave absorption in  
ionosphere 24 p4205 A66-43156
- INSTRUMENT FLIGHT RULE /IFR/**  
Mixed translation and attitude control  
system using single cockpit stick for low-  
speed flight control of VTOL  
aircraft 05 p0610 A66-15078
- EEG experiments on men exposed to  
intermittent photic stimulation under  
simulated IFR conditions produced  
drowsiness as primary  
response 17 p2864 A66-32165
- Cruising level systems and semicircular  
rule 17 p2950 A66-32354
- INSTRUMENT LANDING SYSTEM**  
Adaptive coupler providing extended  
automatic glide slope beam following by  
compensating for beam  
convergence 01 p0101 A66-10036
- Flight control by ground-based radio  
system discussing aerial navigation safety,  
operating principles, equipment for VOR  
and ILS and importance of  
calibration 03 p0390 A66-13011
- Flight testing of distance measuring  
equipment for instrument landing system  
with results shown in  
histograms 07 p1067 A66-17691
- Inertial navigation systems for automatic  
landing, using category I instrument landing  
system 07 p1069 A66-17714
- Onboard equipment designed for transport  
aircraft landings with visibilities less than  
200 ft and runways less than 2600 ft, having  
all devices duplicated 10 p1554 A66-21368
- TALAR, tactical aircraft landing aid-radio  
uses ground-based Cassegrain antenna,  
magnetron transmitter and 4-lb receiver in  
aircraft while providing ILS  
functions 20 p3596 A66-37232
- Integral monitor development for ILS  
localizer, predicting changes in track  
position and width, noting principles of  
operation and  
performance 23 p4044 A66-41322
- INSTRUMENT ORIENTATION**  
Orientation detector mechanism for high  
altitude cosmic ray research utilizing  
directional East-West symmetry in  
geomagnetic rigidity  
cut-off 07 p1034 A66-17980
- Optical rangefinder design using movable  
plane mirrors as optical compensators and  
focusing systems with fixed basis at  
instrument 09 p1380 A66-20312
- INSTRUMENTATION**  
**SA ADVANCED RANGE**  
**INSTRUMENTATION SHIP /ARIS/**

- SA AIRCRAFT INSTRUMENTATION  
SA BIOINSTRUMENTATION  
SA MICROINSTRUMENTATION  
SA RADAR INSTRUMENTATION  
SA ROCKET INSTRUMENTATION  
SA SATELLITE INSTRUMENTATION  
SA SPACECRAFT INSTRUMENTATION  
Book on navigation principles including instrumentation, control, speed, radio, radar, sonar, position finding, route, etc 14 p2328 A66-26874  
Diodes, transistors, rectifiers and inverters application to control and instrumentation systems, providing phase changing, frequency stabilization, source voltage, etc 14 p2249 A66-27118  
Range instrumentation systems calibration and evaluation at Air Force Eastern Test Range 14 p2272 A66-28447  
Calibration ensuring optimal instrument performance, using statistical quality control, noting background of Assured Performance Calibration program 15 p2508 A66-28810  
Instrument methods determining function and density of length distribution of random radio emissions 15 p2451 A66-29123  
Performance of SNAP-10A instrumentation during component qualification, ground system and flight system tests, noting environmental conditions 16 p2744 A66-30439  
Apparatus for analysis and preparation of magnetic properties of thin ferromagnetic films in vacuo, noting hysteresis loop, thermal evaporation, etc 16 p2661 A66-30697  
Sonic boom - Symposium, Saint Louis, November 1965 17 p2846 A66-33020  
Sonic boom measurement instrumentation noting use of frequency response, vibration isolation, wind screening, etc 17 p2926 A66-33025  
Instrumentation of ESRO telemetry receiving stations noting receiver, recording, monitoring and demodulation equipment 21 p3702 A66-38604  
Instrumentation in aerospace simulation facilities - International Conference, Stanford, August 1966 24 p4205 A66-42166  
Field effect transistors in shock tunnel instrumentation circuitry associated with piezoelectric transducers operating in environment of widely ranging pressures, temperatures and testing times 24 p4207 A66-42170  
Mechanical electrical transducers for aerospace instrumentation and control, noting strain gauge, inductive and potentiometric types 24 p4215 A66-43082
- INSTRUMENTATION PROGRAM**  
SNAP-8 instrumentation, emphasizing selection and installation of aerospace type transducers for liquid metal service [ISA PREPRINT 1.11-4-65] 05 p0683 A66-15510  
Radio astronomy instrumentation, describing antenna parameters, design characteristics, instrumentation needs, etc 20 p3524 A66-36962  
Space vehicle guidance and navigation, noting instrument techniques, gyroscopic units for reference coordinate realization, inertial navigation systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43123
- INSULATED STRUCTURE**  
Preliminary design for optimum combination of insulating and structural materials for hypersonic cruise vehicles 03 p0436 A66-12752  
Thermionic converters, discussing resistant metal-bond use for collector-emitter insulation 05 p0622 A66-15590  
Hall effect in two-dimensional flow of conducting gas interacting with external inhomogeneous magnetic field along insulating plane 08 p1205 A66-18533  
Ferrite component for radio relay equipment such as antenna insulator, waveguide and coaxial equipment insulator and circulator 11 p1664 A66-22658  
Ferrites for resonance-directional insulators and circulators, noting properties at microwave frequencies and applicability 11 p1664 A66-22659  
RF sputtering of insulators, noting effects of auxiliary magnetic field, electrode size, oxygen concentration, substrate temperature and target material on thin dielectric film formation 13 p2157 A66-25039  
Current voltage characteristics of dielectric films 13 p2157 A66-25040  
Lightweight insulations for space vehicle cryogenic storage tanks based on design principles of multilayer radiation shields 19 p3473 A66-35598  
Transient gas-flow process in multilayer insulation systems during evacuation predicted by equations in conjunction with measured permeabilities and diffusion coefficients 20 p3675 A66-37065  
Convection effect in helium charged insulation with partially foam-filled honeycomb core 20 p3675 A66-37066  
Gas flow equations for multilayer insulation systems for both continuum and free molecular flow regimes of interest in cryogenic space vehicle design [AICE PREPRINT 22A] 22 p3897 A66-39888
- INSULATION**  
SA ELECTRIC INSULATION  
SA TEMPERATURE CONTROL  
SA THERMAL INSULATION  
SA WATERPROOFING  
Insulation materials and processes for aerospace and hydrospace applications - SAMPE Symposium, San Francisco, May 1965 06 p0898 A66-16284  
Properties of nonirradiated heat-shrinkable silicone and fluorosilicone rubbers for insulating and encapsulating electrical and electronic apparatus, including resistance to aging, fuels, ozone, etc 06 p0900 A66-16298
- INSULATOR**  
SA EXCITON  
Transient effect of ionizing radiation on semiconductor and insulating materials 05 p0739 A66-15488  
Insulators from high purity oxides used in nuclear thermionic power converters, tabulating refractory materials compatibility and noting thermal expansion, electrical conductivity, etc 05 p0714 A66-15592  
Polyimide resins for extreme environments, discussing chemical structure, application, electrical, thermal and mechanical properties, radiation resistance, etc 06 p0899 A66-16292  
Cellular room-temperature-vulcanizing silicone-rubber, describing compound properties, application and possible structural modifications 06 p0900 A66-16295  
New thermal insulations and product design 09 p1393 A66-20937  
Static characteristics of insulated gate field effect transistor with gate electrodes at both sides of semiconducting channel, including space charge limited currents analysis 09 p1359 A66-20974  
Contact barriers on insulating semiconductor cadmium sulfide measurements, based on pulsed light and bridge 10 p1573 A66-21245  
Numerical method of Schrodinger equation and WKB approximation compared in determination of transmission coefficients for thin insulating films 10 p1577 A66-21558  
Segmented electrode MHD generator performance for various electrode-insulator length ratios 13 p2000 A66-25714  
Compressible metal for turbine seal, discussing Nicroseal coating used in sealing clearance between rotor and adjacent stationary parts 13 p2109 A66-25777  
Electric breakdown and insulation properties of vacuum and design of vacuum devices 14 p2249 A66-27105  
Transmission and reflection coefficients of semiconductors and insulators for use in visible and IR spectral regions 14 p2334 A66-27334  
Thermal model for performance of cork insulation on Minuteman missile in launch environment [AIAA PAPER 65-117] 16 p2827 A66-30893  
Behavior of ceramic insulating materials under nonisothermal conditions at high temperatures 16 p2731 A66-31605  
Experimental assembly for measuring true heat capacity of heat resistant insulating materials during natural cooling at temperatures from 1200 to 2400 degrees K 20 p3556 A66-36989  
Lightweight superinsulation testing for cryogenic tank application 20 p3675 A66-37063  
Thermal conductivity of gas-charged cryogenic powder
- Insulation 20 p3675 A66-37063  
Saturn S-IV and S-IVB liquid hydrogen tank internal insulation, using polyurethane foam reinforced with fiberglass threads 20 p3675 A66-37063  
Reinforced plastic materials evaluated a potential low temperature structural insulators 20 p3676 A66-37081  
Sheet cork as thermal protection during vehicle launch and ascent flight [AIAA PAPER 65-356] 22 p3999 A66-40351  
Effectiveness parameters of spherical shield electrode surrounding negative dielectric junction of insulator in high vacuum 23 p4042 A66-41041
- INSULIN**  
Performance and physiological effects of adrenalin or insulin in human subjects 06 p0813 A66-16822
- INTAKE**  
S FOOD INTAKE  
S WATER INTAKE
- INTEGER**  
Gomory all-integer linear programming algorithm based on lexicographical ordering principle and relation to cost function 19 p3309 A66-35871  
Fortran program for finding minimum value of monotonic function defined on ordered sets of positive integers 19 p3309 A66-36049
- INTEGRAL**  
SA CAUCHY INTEGRAL  
SA ELLIPTIC INTEGRAL  
SA FRESNEL INTEGRAL  
SA JACOBI INTEGRAL  
SA PHASE-SPACE INTEGRAL  
SA RIEMANN INTEGRAL  
SA TRANSFORM INTEGRAL  
Approximation formulas for certain collision integrals of gas transport 03 p0395 A66-12834  
Dual-operator Stieltjes integrals 08 p1245 A66-19636  
Integral curves of particular ordinary differential equation containing singularity 11 p1721 A66-22641  
Integrals of equations of small axisymmetrical oscillations of thin elastic shell of revolution 12 p1966 A66-24068  
Integrals of system of equations describing natural oscillations of dome shaped shell 12 p1966 A66-24068  
General vector notation for multiple integrals 12 p1903 A66-24099  
Adiabatic invariants and third integrals of motion in periodic potentials in periodically time-dependent Hamiltonian systems of degrees of freedom 17 p2945 A66-32293  
Approximation formulas for certain collision integrals of gas transport 19 p3404 A66-36777
- INTEGRAL EQUATION**  
SA FREDHOLM INTEGRAL EQUATION  
SA SINGULAR INTEGRAL EQUATION  
SA TRANSPORT THEORY  
SA VOLTERRA EQUATION  
Radiative transfer equation for isothermal model of solar corona, noting radiation flux and electron density variation 01 p0131 A66-10261  
Approximate calculation of Wiener integration 01 p0092 A66-10311  
Charge trapped in electron or ion beams at pressures below breakdown determined from general integro-differential equation using approximation method 01 p0111 A66-10373  
Solving integrals with Bessel functions as integrand 01 p0095 A66-11002  
Plate theory for case of thin elastic deformable circular plate under rotationally symmetrical stress 02 p0296 A66-11242  
Laplace transform technique to develop asymptotic solutions to integral equations describing influence of scattering law or radiation damage displacement cascade 02 p0245 A66-11944  
Necessary and sufficient criteria for absolute minimum of multidimensional integrals, depending on arbitrary number of real functions of real variables and partial derivatives of arbitrary maximum order 03 p0387 A66-12686  
Laminar stability of incompressible and stationary flows with curved streamlines applying integral method and noting time dependence of flow 03 p0357 A66-13081

Number theoretic method to approximate solution of linear integral equations 04 p0539 A66-13488

Reduction of Rabotnov approximate equation describing steady creep in circular cylindrical shells, under axisymmetric loading, to system of integral equations 04 p0588 A66-13567

Forced torsional motion of semiinfinite isotropic elastic cylinder with vibrations excited by harmonically oscillating rigid disk, using integral equation 04 p0589 A66-13829

Nonlinear eigenvalue problem for equilibrium state of rotating rod solved by perturbation procedures and Leray-Schauder degree theory 04 p0589 A66-13948

Rotating polytrope structure analyzed, using approximation technique of integrating outwards from center and inward from surface 04 p0578 A66-14018

Solving integral in propeller design and second-order effects in subsonic airfoil theory 05 p0606 A66-15082

Solutions for integral equation associated with equation of radiative transfer for isotropic scattering and complete redistribution in frequency cases 05 p0762 A66-15276

Recomputation of values of numerical approximation of integral in gain limitations of large antennas, considering sidelobe level 06 p0844 A66-16044

Averaging systems of integrodifferential equations for small parameter and real  $n$  vector functions 06 p0902 A66-16535

Modified Karman-Pohlhausen pulse integral equation for calculating boundary layers is more accurate when seeking flow separation point 07 p1019 A66-17391

Radiant transport with isotropic scattering, evaluating approximate solutions for reflection and transmission of parallel plane radiation 07 p1152 A66-17589

Heat exchange through absorbing media, determining combined modes of radiation and conduction via exchange factor approximation 07 p1152 A66-17590

Solvability of general mixed boundary value problems for multidimensional hyperbolic integro-differential equation of arbitrary order with analytic coefficients 07 p1056 A66-17608

Boundary problems concerning linear integro-differential equations with calorific operator and delayed arguments 07 p1057 A66-17842

Effectiveness of stagnant layer of radiating gas in shielding surface from radiation flux formulated as integral equation, with heat transfer results presented graphically 07 p1155 A66-18346

Continuation of certain classes of differentiable functions beyond limits of region 07 p1060 A66-18465

Compressible turbulent boundary layer as momentum integral and moment-of-momentum integral equations for arbitrary pressure gradient, noting surface heat-transfer effects 08 p1207 A66-19126

Heat capacity expression due to chemical reaction, relating composition variations and binary diffusion coefficient with Lewis number, presenting integral equation for system enthalpy 08 p1318 A66-19164

Idealized cylindrical shell buckling under axial compression derived from generalized integral expression 08 p1310 A66-19166

Stress-strain state of infinite plate with two holes of different diameter solved, using integral equation derived for two-dimensional problem in elasticity theory for anisotropic medium 08 p1314 A66-19578

Stress-strain state of shell having one end clamped and other under concentrated bending moments and concentrated force acting along generatrix solved by integral equation 08 p1314 A66-19579

Method of induced emf and integral antenna equation 08 p1197 A66-19605

Kilatskin objections and improvements concerning integral equation describing current distribution in rectilinear antenna 08 p1197 A66-19607

Boundary problems for differential and integro-differential equations 08 p1245 A66-19631

Conservation laws involving mass,

momentum and energy applied to asymptotic properties of hypersonic flow 09 p1327 A66-20266

Proof, by degenerate kernel method of existence and uniqueness of solution for one class of nonlinear integral equations 09 p1394 A66-20455

Approximate solution of nonlinear heat conduction problems for boundary conditions of first and third kind, using Leibenson integral relations 09 p1471 A66-20750

Ablation of blunt metallic body near stagnation point solution using integral equations, noting pressure effect 09 p1472 A66-20833

Eigenvalues of integral equations in laser resonant cavities 10 p1542 A66-21343

Integral equation formulation of Oseen flow past obstacles and approximate solution of integral equations for low Reynolds numbers 10 p1525 A66-21848

Integration of equations, approximating Maxwell equations, in curvilinear coordinates separating scalar Laplace equation, with vectors representing electric and magnetic fields 10 p1556 A66-21994

Current distribution and input resistance of T-type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 11 p1666 A66-22719

Atomic integral obtained with magnetic dipole-dipole operator in form of finite sum of integrals over hypergeometric functions 11 p1739 A66-22887

Internal flow problems in free, nearly free molecular regimes and higher transition flows, using Boltzmann equation and series expansion to solve integral equation for surface collision density 11 p1693 A66-22940

First-order boundary proximity effect on Stokes resistance of body, using integral equation approach 11 p1693 A66-23008

Spherical summability of Fourier series of function integrable on unitary group 11 p1723 A66-23360

Cauchy type integral on hypersphere, defining Cauchy principal values, noting role in theory of functions of complex variables 11 p1724 A66-23366

Quasi-linear boundary value problems solved with Galerkin convergence method 12 p1902 A66-23863

Approximate solution of equation with normally distributed operators 12 p1902 A66-23899

Stress-strain state of shells of revolution of variable thickness and elastic parameters under effect of external loads and secondary strains obtaining strain, equilibrium and elasticity equations 12 p1963 A66-24043

Forced oscillations of coaxial multidisk rotors, allowing for gyroscopic effect and rotating at different angular velocities determined by replacing differential equations with integral equations 12 p1964 A66-24050

Evaluation of total square integrals arising in minimization problems of discrete data systems not requiring expansion of determinant for solution 12 p1850 A66-24265

Solution of dual integral equations containing Legendre conic functions and trigonometric functions 12 p1905 A66-24344

Kinetic theory of dense gases generalized for all orders, deriving integral equations for transport coefficients and showing temperature dependence of bulk viscosity 12 p1979 A66-24565

Properties of compressible boundary layers with heat transfer and arbitrary pressure gradients calculated, using integral equation and correlation concept for application in hypersonic flows 12 p1865 A66-24581

Two-dimensional Stokes flows for functions time-periodic with common frequency, noting analogy to oscillations of long cylinder in viscous fluid 12 p1867 A66-24963

Nonuniqueness of solutions of nonlinear integral equation for Chandrasekhar S-function for homogeneous semiinfinite atmosphere 13 p2127 A66-25612

Equations describing motion of barotropic fluid with free surface solved, using finite difference methods based on two-step Lax-Wendroff scheme 13 p2121 A66-25814

Asymptotic solution of Cauchy problem for integro-differential equation with small parameter associated with derivative 13 p2119 A66-25908

Functional integration analysis of exponential behavior of nonlinear feedback control systems 13 p2052 A66-26076

Integral equation for slender wing oscillating in subsonic flow near solid wall 13 p2067 A66-26538

Circulation distribution over rectangular wings, based on Chushkin algorithm and lifting surface equation calculated by digital computer 13 p2068 A66-26540

Properties of laminar boundary layer undergoing surface catalysis with two reactants and two products obeying Langmuir-Hinshelwood mechanism, solving concentration field by integral equation 13 p2019 A66-26663

Heat transfer in Couette flow of radiating fluid with viscous dissipation, noting conduction coupling, effects of temperature level, profile, wall emission, fluid optical thickness, etc 13 p2210 A66-26718

Ionospheric electron density profile and Schlomilch integral equation for oblique incidence 13 p2075 A66-26740

Integral equations for radial distribution functions in classical fluid 14 p2273 A66-26828

Electromagnetic scattering by circular wire loops loaded with lumped impedances, obtaining solution to integral equation by Fourier series 14 p2247 A66-26863

Radiation pattern of dielectric antenna using integral equations, noting differences between real antenna and idealized linear traveling wave antenna 14 p2250 A66-27140

Solution of set of  $n$  dual integral equations with Hankel kernel 14 p2321 A66-27377

Newton-Kantorovich method solution of Hammerstein type nonlinear integral equation, with application to elasticity theory of buckling of thin spherical shell 14 p2322 A66-27628

Integral equations derived from correlation functions, determining transport coefficients in classical fluid, formally valid to general order in density 14 p2276 A66-27635

Chemical potential and integral equation for correlation functions of classical fluids, using Percus method when functions exhibit cluster properties 14 p2276 A66-27637

Integral equations defining transport coefficients of moderately dense gas obtained from Boltzmann equation shown to be identical to first order in density, with results obtained by autocorrelation function method 14 p2276 A66-27639

Resonators with confocal mirrors with variable reflection coefficients calculated, using integral equations for field distributions 14 p2254 A66-27746

Radiation from vertical dipole in warm plasma determined by asymptotic series expansion of integral solutions, noting surface wave propagation, transformation from acoustic to electromagnetic mode on boundary, etc 14 p2240 A66-27917

Newtonian approximation for irregularities in statistically homogeneous and isotropic dust-filled universe 14 p2386 A66-28119

Stationary phase technique synthesis of continuous linear antenna and integral equation for determining radiation pattern 14 p2259 A66-28158

Soviet book on geodetic gravimetry including disturbing potential calculation methods based on Molodenskii integral equation 14 p2288 A66-28209

Effect of slope and curvature of Earth surface on disturbing potential, using Molodenskii integral equation, obtaining deflection of vertical, disturbing potential and Stokes constant 14 p2288 A66-28210

Numerical integration principle in calculation of disturbing potential verified, using conical Earth model 14 p2288 A66-28211

Dual trigonometric integral equations solved, then applied to determining stress field due to crack 14 p2325 A66-28391

Numerical solution of integral equation for diffraction by soft strip applied in wave scattering by obstacles with dimensions comparable to wavelength 14 p2325 A66-28399

Numerical solution of nonlinear integro-differential boundary value problems with

parabolic operators and retarded argument 15 p2525 A66-28519

Resonant modes in ring shaped resonators formed by reflector strip bent into circle, noting eigenfunctions and eigenvalues of integral equation 15 p2457 A66-28786

Input and output coupling constants of spin-2 mesons with two pseudo-scalar mesons obtained by producing resonances at experimentally observed positions 15 p2544 A66-28947

Expansion of arbitrary function of Mehler-Fok integral form in terms of spherical functions 15 p2526 A66-28952

Dual integral equation and dual series analysis and application to mixed boundary value problems in elasticity, hydrodynamics and electrostatics 15 p2526 A66-28953

Dual integral equations in elasticity theory, noting Mehler-Fok transformation of spherical functions, Fredholm equation and application to mixed boundary value problems 15 p2526 A66-28954

Boundary between applicability ranges of network and steepest descent methods in equation integration of Timoshenko theory in analysis of plate deformation 15 p2608 A66-28962

Integral equations in determining periodic regimes for nonlinear dynamic systems and for linear systems with periodically varying parameters 15 p2541 A66-29167

Approximate method, using power polynomials, for calculating distance between detached shock wave and profile 15 p2425 A66-29721

Green-Hadamard functions of Tricomi singular problems for generalized wave equation, expressing equation integrals as hypergeometric Humbert and Horn series 15 p2530 A66-29855

Multidimensional generalized transport equations solutions and calculation by difference methods 16 p2732 A66-30240

Noether theorems applied to degenerate cases of improper integral equations with Cauchy kernels 16 p2733 A66-30745

General theory of linear integral equations with power kernel 16 p2734 A66-30746

Solution of boundary value problems describing two-dimensional flow in plastic regions 16 p2815 A66-30789

Averaging systems of integro-differential equations for small parameter and real n vector functions 16 p2736 A66-30973

Boundary problems for differential and integro-differential equations 16 p2736 A66-30980

Volterra series analysis of aperiodic solutions to certain second order integrodifferential equations with nonlinear damping and nonlinear restoring force 16 p2737 A66-31334

Integrating error equations of inertial navigation system for objects in Keplerian motion 16 p2744 A66-31507

Integral equivalence of two given systems of square integral matrices, reducing problem to determination of principal ideal Z ring 16 p2738 A66-31563

Exact determination of electron density distribution in finite anisotropic plasma by integral equation relating tangential electric field and HF plasma current 16 p2767 A66-31691

Asymptotic behavior of nonlinear integral equations with certain conditions on kernel and nonlinearities 16 p2738 A66-31705

Iteration methods for solution of integro-differential equations 17 p2945 A66-31807

Sound power from nonuniform flow determined by summing surface and volume integral over sound sources 17 p2905 A66-31949

Local emissivity of vertex point of diffuse conical or V-groove cavity, noting dependence on wall material, angle factor and agreement with theoretical solution 17 p3035 A66-32613

Arc operation under nonsteady electrical inputs, noting initial conditions, energy equation solution, temperature profiles, application of Green function for moving boundary problem, etc [AIAA PAPER 66-480] 17 p2970 A66-32769

Control forces in nonlinear integral equations solved by iteration method 17 p2902 A66-32816

Loading of thin ring airfoil in unbounded spherical source flow field, calculating vortex distribution, strength, etc [ASME PAPER 66-FE-3] 17 p2914 A66-33259

First transcendent integrals of motion equations of heavy solid about fixed point 18 p3135 A66-34546

Numerical solution of integral form of radiative transfer equation from measurements in finite set of spectral intervals for deducing atmospheric temperature profiles, using satellites 18 p3129 A66-34554

Solution for inhomogeneous differential linear equation in integral form obtained from Wronskian 18 p3128 A66-34701

Poiseuille flow of rarefied gas in annular tube analyzed numerically for inverse Knudsen number, using Bhatnagar-Gross-Krook model and transport integro-differential equation 18 p3102 A66-34920

Klitskin objections and improvements concerning integral equation describing current distribution in rectilinear antenna 18 p3087 A66-34963

Integration of equations, approximating Maxwell equations, in curvilinear coordinates separating scalar Laplace equation, with vectors representing electric and magnetic fields 18 p3136 A66-34971

Relations between primary spectrum, pion multiplicity and sea level muon spectra, using integral equations 18 p3219 A66-35190

Quadratic integral equation solution for bandlimited signal design for binary communication, using memoryless correlation detection 19 p3296 A66-35339

Numerical integration based on definition of Riemann integral, describing application to nonlinear integral equations of isotropic scattering of radiation in plane parallel atmosphere 19 p3388 A66-35830

Dynamic system parameters substituting integral equation for differential equation of motion, noting application to nonlinear, differential and PDE systems 19 p3325 A66-35987

Partial step integration equation for use with Adams or Adams-Bashforth method of integration of differential equations 19 p3309 A66-36045

Normalized self and mutual admittances of two identical bare circular loop antennas in air or conducting medium evaluated, obtaining single integral equation for current distribution 19 p3321 A66-36405

Linearized problem of oblique incidence of weightless flow of ideal gas on surface of heavy liquid, using eigenvalues and eigenfunctions of integral equation 19 p3342 A66-36470

Green formula and moment functions, predicting rate of radiative energy loss from boundaries of absorbing-emitting slab or sphere 19 p3479 A66-36597

Complex convolution integral applied to Laplace transform expressions in sampled data theory 19 p3339 A66-36747

Singular integral equations with constant coefficients solved by Jacobi polynomials and applied to problems in fluid dynamics, crack propagation, plane elastic theory, etc 19 p3393 A66-36836

Integration technique for determining unsteady aerodynamic forces at subsonic speeds, noting role of kernel of integral equation 20 p3491 A66-36955

Application of Rayleigh principle to obtain sharp upper bounds for increase of first eigenvalue of membrane submitted to parallel and equidistant rectilinear constraints 20 p3669 A66-37544

Boundary value problem of wave equation with application to antenna theory of singular integral equations 20 p3531 A66-37730

Convolution type integral equation solution via reduction to Riemann problem in class of generalized functions 20 p3591 A66-37755

Incorrect problems of mathematical physics examined and illustrated by classical Cauchy problem for Laplace equation 20 p3591 A66-37756

Solvability and methods of solution of boundary value problems noting uniqueness, potential theory application in solving polyharmonic equations and second-order equation 20 p3591 A66-37757

Reduction of problems of diffraction of scalar and vector waves at open curvilinear screen to integral equations of second kind 20 p3518 A66-37992

Liquid junction cell design, noting equation, integration for ideal diffusion potential and salt effects potential for heterolonic junctions of uniform ionic strength and cation concentration 20 p3502 A66-38184

Numerical extrapolation solution of kernel characterized integral equations for apparent emissivity of conical and cylindrical cavities 20 p3681 A66-38229

Interior regularity theorem for linear elliptic matrix differential operator 21 p3754 A66-38445

Plasma slab resistance between juxtaposed disk electrodes, obtaining exact two-and approximate three-dimensional solution 21 p3776 A66-38544

Self-induction of ellipsoidal plasmoid, deriving relevant equations 21 p3787 A66-39052

Energy levels of rotationally hindered linear molecules calculated, using variational principle based on schrodinger-like integral equation 22 p3949 A66-39662

Plane supersonic flow with Mach reflection, represented by shock wave interaction noting integral equation obtained from linearized shock equations 22 p3897 A66-39692

Laplace transformation simulation by analog computer for real and complex values 22 p3870 A66-39992

Integral equation for heat flux in inverse heat conduction for infinite flat plate as in solid rocket igniters 22 p3998 A66-40032

Conformal mapping technique applied to boundary value problem of plane wave diffraction by perfectly conducting elliptical cylinder, noting integral equation 22 p3866 A66-40182

Integral equation solution through Jacob polynomials employed as eigenfunctions of certain operators 22 p3941 A66-40792

Shell dynamical integral and integro-differential BVPs for linear deformable shells, examining reciprocity theorem and Kirchhoff-Lowe hypothesis 23 p4136 A66-40992

Soviet literature survey of exact and approximate solution of two-and three-dimensional mixed boundary value problems in theory of elasticity 23 p4136 A66-40992

Disperse material heating by simultaneous radiative and convective energy with temperatures expressed as integral equations 23 p4148 A66-41276

Parameters of dynamic systems described by PDEs determined by replacing PDE with integral equation and eliminating via recursion process terms resulting from initial and boundary conditions 23 p4084 A66-41392

Current distribution and input resistance of T type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 23 p4045 A66-41452

Binary communications integral equations in complex variable functions and application of Fourier transform for bandlimited signals 23 p4085 A66-41532

Lienard type of differential equation for oscillatory system representing solution by Krylov-Bogoliubov method, noting inverse problem 23 p4085 A66-41542

Newton iterative procedure extended to solution of nonlinear integral equations 23 p4085 A66-41552

Proof of existence of boundary value solutions for various mixed component equations by reduction to singular integral equation 23 p4085 A66-41562

Correct conductance and susceptance of infinite cylindrical antenna determined via asymptotic evaluation of parametric integrals 23 p4047 A66-41636

Complete Rayleigh scattered field within homogeneous plane parallel atmosphere, noting scalar transfer equation extension 23 p4065 A66-41813

Thermal transport in channel-gas flow, discussing integral equation and power series solution 23 p4150 A66-41862

Boltzmann equation for dilute monatomic gas, discussing asymptotic interpretation of

- Hilbert and Chapman-Enskog 23 p4097 A66-42011
- Theories 23 p4097 A66-42011
- Stress intensity factors for single-edge cracks in rectangular sheets with end moments, reducing stress distribution to Neumann-Hilbert problem 24 p4286 A66-42161
- Screening function of interacting electron as at high and metallic densities by many-body perturbation theory 24 p4236 A66-42294
- Integral equations for weight function of optimum filter and correlation function of random absolute error 24 p4188 A66-42475
- Huygen principle for elastic media, comparing Kupradze formulation with formulations of Knopoff and Volpert 24 p4237 A66-42495
- Hilbert parametrix method of solving linear BVPs for second-order elliptic PDEs, using Green functions 24 p4232 A66-42740
- Integral equation of flat-roof resonator solved by iteration method, deriving mode patterns, phase shifts and power losses 24 p4174 A66-42807
- Flow behind shock wave in long tube analyzed by time effect and integrating equations, using Galerkin method 24 p4197 A66-42997
- Energy dependence of effective interaction in superconductivity, calculating critical field and specific heat 24 p4259 A66-43018
- Unambiguous transition probability densities describing inhomogeneous stochastic continuous-to-right Markov processes with finite number of states 24 p4232 A66-43021
- INTEGRAL FUNCTION**
- Iterative procedure for constructing and evaluation functions consisting of integrals of products of radial atomic wave functions 01 p0108 A66-10385
- Linear differential equation solution nonfluctuation and boundedness estimate in connection with integral inequalities 01 p0094 A66-10650
- Function for which error functional attains its maximum value as sphere constitutes solution of polyharmonic equation 02 p0250 A66-12109
- Book on probability theory covering mathematical models, randomness concepts, switching logic concepts, integration on abstract space, etc 03 p0386 A66-12369
- Commutable matrices, decomposing determinant of general solution of AX equals XB into linear factors 04 p0539 A66-13869
- Multiple Stieltjes integral representation of functions in form of Markov series 04 p0539 A66-13871
- Calculation of integrals of infinitely differentiable functions, showing error estimate by network method for periodic functions 07 p1056 A66-17597
- Representation of arbitrary integral functions by Dirichlet series in entire plane, determining number of rays on which zeros must be located 07 p1058 A66-17912
- Interaction between Kolmogoroff integrals determined with aid of finite partitions and those determined with aid of denumerable partitions 08 p1244 A66-18702
- Energy integral for holonomic system of points of variable mass, transforming Lagrangian form via Hamiltonian function 08 p1256 A66-19583
- Necessary conditions for existence of univalent integrals in equations of motion of heavy gyrost at fixed at one point 08 p1227 A66-19762
- Boundary layer theory applied to solution of problems of combined heat and mass transfer, using approximate single-parameter integral method 09 p1367 A66-20703
- Asymptotic expansions of double and multiple integrals occurring in diffraction theory, using stationary phase method 10 p1550 A66-21850
- Partial differential equation solved by integral transform under prescribed boundary conditions 10 p1550 A66-21914
- Lowering order of transfer function of automatic control system based on use of generalized integral quadratic estimates of transient processes of 11 p1673 A66-22203
- Limit cycles and global structure of integral curves of nonlinear system of differential equations in five-dimensional parameter space 11 p1724 A66-23364
- Linear differential equation solution nonfluctuation and boundedness estimate in connection with integral inequalities 12 p1903 A66-24021
- Commutable matrices, decomposing determinant of general solution of AX equals XB into linear factors 12 p1903 A66-24025
- Multiple Stieltjes integral representation of functions in form of Markov series 12 p1903 A66-24027
- Integral multiplicity and coupling coefficient estimation of muon-meson component of cosmic rays for case of primary particle impinging at arbitrary zenith angle 12 p1943 A66-24182
- Supersonic flow around blunt body calculated via integral relations, using simultaneous approximation function in two directions 12 p1797 A66-24208
- Cesaro summability and Fourier transform for evaluating divergent series and integrals occurring in circuit design and analysis 12 p1856 A66-24730
- Integral relations method to reduce by approximation PDEs to ODEs or to algebraic or transcendental equations 13 p2119 A66-25854
- Interaction between atoms of solid surface and gas phase, obtaining closed-form solution of motion equations 16 p2753 A66-30786
- Representation of arbitrary integral functions by Dirichlet series in entire plane, determining number of rays on which zeros must be located 16 p2736 A66-30975
- Thermal explosion equations solved by Dorodnitsyn method of integral equations 17 p3034 A66-32564
- Supersonic flow around blunt body calculated via integral relations, using simultaneous approximation function in two directions 22 p3844 A66-40572
- Finite integral transform to solve unsteady-state heat conduction problems for hollow cylinders with moving internal boundary 22 p4000 A66-40819
- Feynman integral for classical waves evaluated, using Hamiltonian approach to summation 23 p4086 A66-41867
- Existence of new isolating integral in restricted three-body problem, computing orbits for various parameter values and initial conditions 24 p4272 A66-42202
- INTEGRAL OPERATOR**
- Pseudo-inverse concept extended to Hilbert space unbounded operators with arbitrary range 01 p0092 A66-10179
- Axially symmetric potentials represented as mean values in integral operators given for Stokes-Beltrami equations 01 p0058 A66-10505
- Extreme properties of operator which degenerates to trigonometric polynomials in case of periodic functions 05 p0709 A66-15358
- Algebra of singular integral operators, discussing action on Hilbert space and homomorphism 06 p0901 A66-16008
- Forced oscillations of elastoherededitary systems, using Rabotnov functions as kernels of integral operators, permitting description of creep curves for materials 08 p1307 A66-18884
- Resolvent kernel for class of integral operators with difference kernels on finite interval for transport processes 10 p1549 A66-21301
- Generalized heat equation solution expansion in terms of radial heat polynomials, Appel transforms and Laguerre polynomials 13 p2118 A66-25793
- Complex cycles of differential equations examined, deriving limit cycle of multiplicity, integration by quadrature, etc 13 p2119 A66-25851
- Uniqueness of operator spectral function of self-adjoint boundary value problem involving second-order differential equation with operator coefficients 14 p2320 A66-27158
- Linear integral operators applied to singular differential equations and to computations of compressible fluid flows 16 p2683 A66-30241
- Bergman integral operator to generate families of transonic flow patterns which yield Ringleb pattern as special case 17 p2909 A66-32498
- Powers of integral operator generated by Cauchy problem for second-order hyperbolic equation solved by Riesz method of analytical continuation 21 p3756 A66-38739
- Existence theorems of periodic solutions to integro-differential equation with delayed argument 21 p3756 A66-38742
- Integral operator for solving aerodynamic problems for slightly rarefied viscous gas 23 p4054 A66-41356
- Computer technique for constitutive equations of viscoelastic modulus, using Laplace transform and Volterra integral equation, applied to data on solid propellants 24 p4289 A66-42279
- INTEGRATED CIRCUIT**
- SA PRINTED CIRCUIT**
- Microelectronic integrated circuits and thin films applied to inertial navigation systems to achieve cost reduction 01 p0034 A66-10011
- Stress survival matrix test in evaluating reliability of monolithic silicon integrated circuit, measuring safety margin and performance parameter drift 01 p0035 A66-10082
- Metal oxide semiconductor /MOS/ integrated circuits 01 p0037 A66-10500
- Face-down ultrasonic bonding, assembly technique to bond integrated circuit chips to thin films 01 p0037 A66-10501
- Western Electronic Show and Convention, San Francisco, August 1965, Part 2, Integrated circuits 01 p0046 A66-11135
- Static and dynamic performance of discrete component and integrated micropower transistor digital circuits 01 p0047 A66-11136
- Complementary bipolar transistor NAND gate for reducing power dissipation and increasing switching speed 01 p0047 A66-11137
- Low power consumption, high reliability and fully integrated silicon monolithic complementary flip-flop circuit 01 p0047 A66-11139
- Monolithic silicon class B hearing aid push-pull amplifier with low idling current and low current drain 01 p0047 A66-11140
- Integrated circuits equivalent to discrete component circuits in performance and superior in economy 01 p0048 A66-11141
- Current status of linear integrated circuits 01 p0048 A66-11143
- Integrated sense amplifier usable with most medium to high speed coincident current memory /CCM/ systems with only two power supplies and no external components 01 p0048 A66-11144
- Thin film epitaxial single crystal silicon on insulating substrate sapphire and advantages of these microelectronic devices 01 p0048 A66-11145
- Fabrication of thin single crystal silicon films on sapphire and integrated circuit process technology 01 p0048 A66-11147
- Silicon-on-sapphire integrated microcircuit and micropower concepts 01 p0048 A66-11148
- Metallographic polishing procedures used to reveal failure modes in gold-aluminum thermocompression bonds 01 p0049 A66-11153
- Reliability control in parallel gap welding used to join integrated circuit flat packs to printed circuit assemblies 02 p0234 A66-11324
- Microminiaturization applied to circuit integration techniques, outlining steps to fully integrated device including power supply and controls 02 p0199 A66-11860
- Packaging techniques interrelated with design specification and manufacturing capabilities noting integrated circuit system, circuit reliability and thermal resistance 02 p0200 A66-11891
- Thin film integrated wideband amplifier with details on circuit, construction, performance and outline of design process 02 p0202 A66-11918
- Simple active filters using tantalum thin film technology 02 p0202 A66-11919
- Feasibility of guard channel receiver, transmitter and marker receiver system by thin film circuit techniques, noting reliability with minimum servicing 02 p0203 A66-11920
- Silicon monolithic integrated circuit or solid circuit design, noting electrical and economical features 02 p0209 A66-11923
- Standard amplifier building blocks used in systems design, stressing manufacture by silicon integrated circuit

processes 02 p0203 A66-11924  
 Price determining factors considered in integrated circuit amplifier for AM receiver 02 p0203 A66-11925  
 Microelectronics technology noting integrated circuits, passive and active elements, reliability, etc 02 p0209 A66-11926  
 Hybrid integrated-and-conventional circuit configuration in electronic equipment noting thin film circuits, encapsulation, costs, reliability, etc 02 p0204 A66-11928  
 MOS transistor advantages in various digital integrated circuit applications 02 p0194 A66-11934  
 Integrated current limiter design using transistor circuits, pn-pn switches or field effect transistors 02 p0204 A66-11935  
 Integrated circuit characterization by black-box analysis of interconnection parameters, noting transient response 02 p0204 A66-11937  
 Integrated logic circuits for high speed digital systems, noting transmission line connection between gate and amplifier 02 p0204 A66-11938  
 Integrated logic circuit design through breadboard, model assembly, system development, final layout, construction and testing 02 p0204 A66-11939  
 Packaging method for integrated circuits based on flow soldering components through printed wiring boards to be used in digital computer design 02 p0204 A66-11940  
 High-speed reliable cost-orientated integrated circuits, detailing element design and logic and circuit form 02 p0205 A66-11941  
 Microelectronic integrated system cells /MISC/ considering yield and utility 02 p0194 A66-11942  
 Integrated circuit economics discussing design, construction and running costs 02 p0205 A66-11944  
 Microminiature electronic devices noting thin film, integrated circuits and semiconductor technology 02 p0205 A66-11973  
 Nondestructive X-ray diffraction technique for measuring flexure in single-crystal silicon wafers at different stages of integrated circuit fabrication 02 p0275 A66-11978  
 Glass-jointed silicon mosaic for integrated devices 02 p0206 A66-12163  
 Microminiaturization, three-dimensional stacking, ceramic printed, thin film, hybrid and integrated circuits, discussing reduction in system size, weight and primary power requirement and improved reliability 03 p0343 A66-13001  
 Technical developments in field of semiconductors measured by degree of integration of electrical devices 03 p0345 A66-13236  
 DC testers for integrated circuits evaluated, emphasizing areas of application, testing methods and operating characteristics 03 p0345 A66-13274  
 Thin film hybrid approach to economical and time saving miniaturization of integrated electronic circuits 03 p0346 A66-13328  
 Thin film and monolithic circuits combined to satisfy need to couple integrated circuit designer to fabrication process 03 p0347 A66-13329  
 Linear integrated circuits discussing differential and operational amplifiers, development, use, capabilities, new techniques, special designs and reliability 03 p0347 A66-13340  
 Digital integrated circuits discussing current mode logic, resistor, diode and complementary transistor logic circuits, crossover method, power dissipation, testing, standardization and limiting factors 03 p0347 A66-13341  
 Integrated circuit testing noting dynamic test system capabilities 04 p0491 A66-13385  
 Practical component packaging system for compatible use of integrated and thin film circuits in spaceborne digital command and data handling equipment 04 p0492 A66-13465  
 Integrated circuit for time division multiplexers having flexible integrated gate driver circuit for field effect transistor analog gates 04 p0492 A66-13598  
 Microelectronic PCM multicoader using integrated circuits, noting power dissipation,

circuit design, packaging, etc 04 p0493 A66-13599  
 Microelectronic integrated circuits and functional blocks in future aerospace electronic system 04 p0493 A66-13632  
 Avionics design using integrated electronics or microelectronics, noting reduction of maintenance requirements 04 p0494 A66-13684  
 Logical and computing devices, discussing construction of homogeneous functional structure using integral circuits 04 p0494 A66-13704  
 Inductance into integrated circuit, noting techniques involving RC networks 04 p0503 A66-13765  
 Numerical characteristics of signal-noise mixture at output of autocorrelation device for sinusoidal signal and Gaussian noise 04 p0501 A66-14407  
 Monolithic silicon integrated circuit technology noting thin film, insulating and conducting layers, microelectronics, MOS systems, etc 05 p0642 A66-14559  
 High performance operational amplifier design, discussing monolithic circuit construction and performance parameters 05 p0642 A66-14567  
 Metal oxide semiconductor structures in integrated circuits as high and low resistances, inverters and AC amplifiers 05 p0643 A66-14569  
 Integrated circuit current switching logic element fabrication, using transistors and standard isolation techniques 05 p0643 A66-14570  
 Diffusion and film techniques combined in design and fabrication of complex integrated computer logic circuits on small die 05 p0643 A66-14571  
 Integrated monolithic circuits for compact intermediate frequency amplifier 05 p0644 A66-14579  
 Problem of DC coupling between integrated circuit devices and silicon substrates 05 p0646 A66-14637  
 Integrated DC differential instrumentation amplifier discussing drift, gain and common-mode rejection 05 p0646 A66-14641  
 Monolithic integrated circuits regenerative interaction between substrate parasitics and intended semiconductor circuit elements exposed to ionizing radiation 05 p0734 A66-14852  
 Modular synthesis of sequential machines, discussing external variable dependent single memory element devices 05 p0637 A66-14927  
 Reliability of integrated circuits noting stress test schedules, failure rates and sources 05 p0650 A66-15369  
 Yields, costs and reliability of monolithic integrated circuits 05 p0650 A66-15496  
 Thermal-electrical systems for showing effect of variations in integrated circuit geometry and packaging on thermal response characteristics of simple structure 06 p0841 A66-15972  
 Stable tunable RC filters with fixed capacitors, variable resistances and positive feedback 06 p0853 A66-16653  
 Radiation damage to integrated silicon circuit and individual transistors when exposed to neutron flux 06 p0853 A66-16665  
 Reliability of integrated circuits 06 p0856 A66-16925  
 Design of digital monolithic integrated circuit 06 p0856 A66-16926  
 Resistor values in semiconductors calculated from diffusion parameters and vice versa 06 p0857 A66-16928  
 Quadrature modulation single-sideband circuit as frequency translating two-port, comparing performance with conventional modulator-with-SSB filter circuit 07 p1015 A66-17746  
 Microminiature element packaging and multilayer circuits, discussing design and production 07 p1010 A66-18247  
 Crystal oscillator described, using quartz as series resonant element with integrated solid state circuit 07 p1010 A66-18250  
 MOS transistor and application to integrated circuits 07 p1012 A66-18274  
 Semiconductor integrated circuits, discussing diffusion preparation techniques, components used, manufacturing,

interconnecting and packaging and combining with evaporated circuitry 08 p1200 A66-18996  
 Gain in signal to noise ratio obtained with integrated circuit connected behind detector and gain determination 08 p1183 A66-19100  
 Microminiaturization in control equipment and computers 08 p1194 A66-19300  
 Pulse-radar altimeter for Saturn launch vehicle incorporating molecular and monolithic integrated circuits 08 p1225 A66-19520  
 Low-cost fast development capability of master-dice technique for custom line integrated circuits 08 p1196 A66-19525  
 Transit time creates current lag transistor, making it inductive for developing integrated frequency selective circuits 08 p1197 A66-19560  
 Probability of signal acquisition by phase locked oscillator system operating frequency search mode, determining maximum admissible search rate without noise 09 p1345 A66-20440  
 Integrated circuit reliability control at determination 09 p1354 A66-20560  
 Digital systems research model design containing logic gates in integrated circuit packages 09 p1356 A66-20670  
 Design of circuits around off-shelf line microcircuits including sine wave oscillator, voltage-to-frequency converter, logarithmic amplifier, etc 09 p1359 A66-20900  
 Microelectronic devices and circuit including integrated, monolithic, diffuse and deposited, noting reliability and costs 10 p1507 A66-21200  
 Design problems involved in transition from discrete-component circuits to integrated microelectronic circuits, noting conversion of analog and digital circuits to system packaging 10 p1512 A66-21700  
 Hybrid circuit rejects avoided by using ceramic channels and ultrasonic bonding during assembly of active semiconductor devices and integrated circuits to thin film network 10 p1512 A66-21700  
 Package densities and power dissipation requirements in hybrid integrated circuit solved by modular arrays 10 p1512 A66-21700  
 Microwave circuit design for HF amplifiers and radar systems using either hybrid approach with germanium transistors or monolithic one with silicon transistors 10 p1512 A66-21700  
 Microminiature Loran-C Receiver/Indicator for analog-to-digital conversion, using integrated circuit technology 10 p1555 A66-22000  
 Parallel-gap soldering technique for interconnecting integrated circuit flat pack and etched circuit board, noting test procedures 11 p1665 A66-22600  
 Variable threshold logic, integrated logic circuits which eliminate noise effects in digital equipment 11 p1676 A66-22600  
 DC-9 flight simulator using monolithic integrated-circuit GP-4 computer 11 p1683 A66-22600  
 Monolithic circuit with chip of semiconductor material having diffuse active and passive elements 11 p1668 A66-23000  
 Batch-fabrication of beam-lead transistor integrated circuits and other components with leads serving as structural, protective and electrical functions 11 p1669 A66-23000  
 Reliability and failure mechanisms in integrated circuits 11 p1669 A66-23100  
 Transistor-tunnel diode flip-flop with built in gating 11 p1669 A66-23100  
 Integrated circuit gate ring counter noting flip-flop variety comparison 11 p1677 A66-23100  
 Monostable and bistable counting circuit synthesis and analysis of volt-ampere characteristics 11 p1678 A66-23200  
 Circuit design techniques for line integrated circuits, noting manufacturing methods, achievement of monolithic construction, etc 11 p1670 A66-23200  
 Integrated modular digital computer system for ICETAN /ICES-FORTRAN programming of engineering problems 12 p1827 A66-23800  
 Silicon monolithic Semiconductor Memory Integrated Device /SMID/ memory system and memory storage

- ement 12 p1827 A66-23834
- Component reliability, especially in 12 p1827 A66-23834

- Integrated circuit processing, particularly array technology, noting key problems 12 p1840 A66-24619
- Microwave integrated circuits in radar systems, detailing airborne forward-looking radar, using phased arrays and pulse compression 12 p1840 A66-24620
- Integrated mixers in S-band construction, using bilithic Schottky barrier diode chip and evaporated microstrip circuitry on alumina dielectric 12 p1840 A66-24621
- Solid state UHF telemetry converter using microwave interdigital multiplexing filter containing integrated semiconductor elements 12 p1840 A66-24622
- Tunnel diode amplifier for broadband radio communication using integrated circuits, noting noise figure, stability and saturation effect 12 p1840 A66-24623
- Monolithic silicon-transistorized integrated amplifier for use as stabilized gain block element in linear circuit 12 p1842 A66-24656
- realizations 12 p1842 A66-24656
- Matrix methods for design of HF integrated circuit 12 p1844 A66-24729
- amplifier 12 p1844 A66-24729
- Polysilicon insulated gate field effect transistor having active element fabricated in epitaxially deposited film on oxidized single crystal silicon 12 p1845 A66-24831
- substrate 12 p1845 A66-24831
- MOS FETs in microelectronics, including digital arrays and logic 12 p1845 A66-24847
- gates 12 p1845 A66-24847
- Metal oxide silicon integrated circuits subsystem size, weight, power and cost compared with double diffused counterpart 12 p1845 A66-24848
- Silicon monolithic circuit development, discussing cost reduction and performance improvement in 12 p1845 A66-24850
- microcircuits 12 p1845 A66-24850
- Properly controlled high-stress life testing used to evaluate failure rate of high reliability solid state components of integrated circuits 12 p1846 A66-24913
- Integrated circuit selective amplifier for intermediate frequency application, using RC active networks 12 p1846 A66-24915
- Thermocompression bonding applied to integrated circuits of semiconductor and thin film type, noting resistance, ultrasonic and electron beam 12 p1846 A66-24916
- welding 12 p1846 A66-24916
- Semiconductor technology applied to design of electronic microsystems 13 p2029 A66-25118
- Optically coupled linear circuit techniques, discussing GaAs p-n junction diode, noncoherent light emitters and silicon p-n junction photosensors 13 p2036 A66-25521
- Design and integrated circuit fabrication of negative impedance converter, using two transistors and two resistors 13 p2036 A66-25523
- Integrated circuits with propagation delays in nanosecond range, noting emitter coupled logic circuit 13 p2036 A66-25534
- Passive thin-film component materials, vacuum evaporation and sputtering processes 13 p2039 A66-25645
- Direct-coupled multistage integrated amplifier design for optimum performance under arbitrary cascade configuration, noting power gain and frequency range 13 p2040 A66-25831
- Band pass characteristics realized by four-layer distributed RC network without series resistance and amplifier scheme used as model for integrated circuits, noting frequency characteristics 13 p2051 A66-26069
- variation 13 p2051 A66-26069
- Reliability assessment techniques for microelectronics, considering integrated circuits, testing procedures, etc 13 p2043 A66-26226
- Electronically tunable circuits for integrated circuits 14 p2263 A66-27047
- Integrated circuit as exclusive-OR gate or as linear amplifier, using transistor or tunnel diode shunted by resistor 14 p2263 A66-27051
- Ministick packaging system for integrated circuits 14 p2249 A66-27109
- Capacitors for monolithic integrated circuits 14 p2252 A66-27306
- Integrated circuit binary counters using majority logic current mode gate element 14 p2255 A66-27803
- Microelectronic PCM multicode using integrated circuits, noting power dissipation, circuit design, packaging, etc 14 p2243 A66-28349
- Logical and computing devices, discussing construction of homogeneous functional structures using integral circuits 15 p2454 A66-28545
- Integrated circuit fabrication noting diffusion steps, temperature and time dependency, doping solid solubility, impurity distribution, etc 15 p2465 A66-29602
- Nondestructive attachment of small electronic components and integrated circuits for simulated mounting in vibration and shock testing 16 p2680 A66-30481
- FM/FM and PAM/PM integrated telemetry systems with MDI for missile evaluation system 16 p2651 A66-30562
- MOS circuit design noting economics, chip area, integrated arrays, etc 16 p2660 A66-30577
- MOS arrays and IC techniques including boxing out, eliminating columns and rows with bad circuits, Fairchild approach, etc 16 p2660 A66-30578
- Transformerless chopper built with integrated circuits, noting low power consumption, offset voltages and HF operation 16 p2661 A66-30660
- Materials science and technology in integrated electronics - Conference, San Francisco, September 1965 16 p2781 A66-31414
- Integrated circuit technology, noting array trend 16 p2664 A66-31415
- Thin film transistors and use in integrated circuits 16 p2664 A66-31416
- Cryoelectronic integrated circuits utilizing superconducting storage and switching devices 16 p2665 A66-31417
- Selective epitaxial deposition of semiconducting GaAs for p-n junction and integrated circuit application 16 p2665 A66-31418
- Fabrication of linear integrated amplifier circuits 16 p2665 A66-31430
- Fabrication of interconnections for integrated circuits operating at microwave frequencies 16 p2665 A66-31433
- Discoloration in contamination area of aluminum bonds in integrated circuits, noting cause and effect on interconnection bond integrity 16 p2665 A66-31434
- Hall voltages in silicon obtained by combining MOS transistor structure with Hall effect of material, noting experimental results, design criteria, etc 16 p2667 A66-31581
- Compatible thin film resistor-capacitor process using nichrome and alumina-silica glass for silicon integrated circuits 16 p2667 A66-31595
- Characteristic parameter selection and transient performance capabilities of integrated logic microcircuit 17 p2880 A66-32057
- Integrated and transistor circuit design, discussing parasitic effects, diode structures, volt-ampere characteristics, capacitors and resistors, temperature and doping effect, etc 17 p2881 A66-32104
- Thin film passive devices combined with monolithic silicon techniques to produce circuits superior in electrical and environmental performance to conventional integrated circuit 17 p2882 A66-32106
- Metal oxide semiconductor transistors use in integrated circuits, discussing field effect devices, analog circuits configurations and applications 17 p2882 A66-32108
- MOS transistors in integrated switching circuits to obtain desirable characteristics of pentode vacuum tubes and bipolar transistors 17 p2882 A66-32109
- Basic guidelines, including estimate of difficulty in incorporating various components into integrated circuits design 17 p2882 A66-32110
- Integrated circuit design, examining layout, tolerances and component interactions 17 p2882 A66-32111
- Step-stress technique to induce failures in integrated circuits to pinpoint source of reliability problems 17 p2882 A66-32114
- Turtle, microcircuit logic or transistor resistor transistor logic /TRTL/ for integrated circuits 17 p2883 A66-32117
- Pulse duration modulator /PDM/ conversion into integrated silicon functional electronic block 17 p2883 A66-32119
- Integrated high speed diode-transistor-logic gate /DTL/ design, discussing, stray capacitance, resistors, diode combination and switching transistors 17 p2883 A66-32121
- Integrated circuit design optimization, using modified direct coupled transistor logic NOR gate 17 p2883 A66-32122
- MOS arrays in improving system size, reliability and power consumption 17 p2883 A66-32126
- Breadboard approach for integrated circuits with reduction of lost and development time, tabulating resistor and transistor parameters 17 p2884 A66-32128
- Integrated circuit breadboarding time saving procedures 17 p2884 A66-32129
- Black-box specifications for best compromise of linear integrated circuit design 17 p2884 A66-32130

- Papers on RCA computer progress 17 p2877 A66-32510
- Monolithic silicon integrated circuit application in design of two third-generation computers 17 p2877 A66-32511
- Monolithic silicon integrated circuit used for current-mode logic of RCA Spectra 70/45 and 70/55 computers 17 p2886 A66-32512
- MOS transistor suitability to integrated logic networks, using arrays of many identical elements with superimposed connections 17 p2901 A66-32514
- Batch fabrication of large-capacity memory stacks, using integration of monolithic-ferrite stack with integrated MOS circuitry 17 p2886 A66-32515
- Developmental memory using monolithic-ferrite integrated arrays of magnetic storage elements provides cost and power savings 17 p2886 A66-32516
- Technique for formation of thin tantalum film resistors on silicon integrated circuits 17 p2887 A66-32699
- Microcircuit design, manufacture and application, noting use of silicon monolithic integrated circuits, performance characteristics, reliability, etc 17 p2894 A66-33101
- Program-controlled module design using strips of nickel foil for welding of flatpack assemblies 17 p2930 A66-33121
- Thick film hybrid integrated circuits 17 p2897 A66-33366
- Thermoconductivity, mechanical stress, processing characteristics, etc, of various adhesives used in integrated circuits, noting neoprene cement 18 p3077 A66-34051
- Integrated circuit connecting and packing, discussing cost flexibility and performance characteristics 18 p3086 A66-34399
- Monolithic, thin-film and hybrid integrated circuits technology 18 p3087 A66-34703
- Quartz crystal active filters noting design and operation of multiresonator filters 19 p3312 A66-35337
- Pinhole array camera for multiple image production for integrated circuits 19 p3354 A66-35385
- Automatic failure detection, location and correction system for failures in unmanned spacecraft using frequency-shift-keyed subcarrier 19 p3316 A66-35679
- Catastrophic failures in glass diode packages and integrated circuit chips exposed to high-intensity electron pulse 19 p3318 A66-35920
- Solid structure tunnel diode, discussing

design and manufacture, noting use of thin film photolithographic process for improved reliability 19 p3319 A66-36164

Circuit functions, electrical parameters and fabrication of integrated analog switch in monolithic silicon block 19 p3320 A66-36322

Integrated circuits, examining thin film evolution, noting advantages of size reduction, reliability and functional value 19 p3322 A66-36817

Applicability of microelectronic technique to construction of integrated wideband amplifier consisting of symmetrical differential circuit and common-emitter circuit 19 p3323 A66-36818

Optimum fabrication of microelectronic devices by interconnection of integrated circuits on ceramic 19 p3323 A66-36820

Homogeneous microelectronic structures using integrated circuit technology for fabrication of logical and sequential facilities 19 p3323 A66-36821

Physical limits of miniaturization, noting element size, packing density, heat dissipation, etc, in connection with integrated circuits 19 p3323 A66-36825

Miniature shaft-angle encoder with integrated-circuit encoding matrix and built-in memory potential using single static commutation ring 20 p3558 A66-37217

Transient radiation response and permanent radiation damage in monolithic silicon-junction-transistorized integrated circuit 20 p3526 A66-37318

Direct-coupled gyrator suitable for integrated circuits and time variation 20 p3527 A66-37447

Acceptance checkout system for checkout assistance to Apollo CSM and LEM facilities during countdown, discussing system configuration variability, composition and operation 20 p3543 A66-37579

Gold-plated nickel used for printed wiring in parallel-gap welding of integrated circuits to provide visual criteria for acceptable welds 20 p3562 A66-37621

Integrated circuits economics, discussing design, construction and running costs 20 p3531 A66-37830

Multilayer board and chip production techniques 20 p3535 A66-38414

Substrate properties effect on processing and reliability of tantalum thin film circuits [ACS PAPER 2-S5-65] 21 p3710 A66-38678

Integrated electronic arrays, examining fabrication, logical design, application and packaging 21 p3710 A66-38828

Microcircuits in ground radar, emphasizing phased array techniques and digitalization of beam steering functions 21 p3710 A66-38829

Assembly and packaging of microelectronic systems by integrated circuits, considering spatial configuration, maintainability, interconnection, thermal transfer and environmental resistance 21 p3710 A66-38830

Component characteristics in integrated circuits 21 p3716 A66-39621

Electronic component, ferrite memory cores, filters and inductances adapted to integrated circuit 21 p3716 A66-39622

utilization 21 p3716 A66-39622

Selective amplification of signal voltages in analog computers with integrated circuitry 21 p3716 A66-39623

Miniaturization of logic components for modular and monolithic integrated circuits in computer design 21 p3708 A66-39624

Boolean algebraic analysis of AND, OR, NAND and NOR functions in electronic integrated circuits 21 p3720 A66-39625

Frequency meter for measuring center frequency of random pulses distributed according to Poisson law, consisting of integrating circuit with high time constant 22 p3918 A66-40404

Nondigital applications and interconnection aspects of integrated electronics - WESCON, Los Angeles, August 1966 22 p3878 A66-40713

Packaging monolithic integrated circuits in UNIVAC 1824 Aerospace Computer Central Processor 22 p3878 A66-40714

Power and control integrated circuits - WESCON, Los Angeles, August 1966 22 p3880 A66-40739

Inverter with integrated components and direct coupled inverter circuit not needing transformers for space

applications 22 p3880 A66-40740

Integrated circuit arrays for solid state inverters, noting Johnson counter and packaging 22 p3881 A66-40742

Microbonding - Colloquium, Sunbury-on-Thames, Middlesex, England, January 1966 23 p4043 A66-41188

Microbonding techniques such as thermocompression bonding, soldering, electrical resistance and ultrasonic welding, noting applicability in transistor manufacture 23 p4043 A66-41190

Integrated circuit welding into electronic equipment via parallel gap method, noting military applications in forward area communications 23 p4044 A66-41198

Active and passive multiplication of RC time constants for subaudio frequency integrated filters 23 p4046 A66-41581

Thin films and semiconductors for integrated circuits in microelectronics, for application to aeronautics and astronautics 23 p4048 A66-41657

Reliability prediction, failure rates, fail-safe design and packaging of integrated circuit and MOS-FET microminiaturized electronic equipment 24 p4179 A66-42098

Optimum use of microelectronic reliability data in system development, discussing relation to sources 24 p4179 A66-42099

Performance modeling procedure to determine characteristics of integrated logic devices 24 p4177 A66-42100

Silicon integrated circuits in rocket telemetry transmitter phase-lock frequency stabilization unit 24 p4180 A66-42262

Contour epitaxial deposition for semiconductor devices and integrated circuits, producing regions with well defined doping and geometry in crystal with flat surface 24 p4181 A66-42386

Systems design and packaging with integrated circuits, discussing proper circuit selection guidelines and parameters 24 p4182 A66-42499

Amplifiers using field effect device in first stage and bipolar transistor in second with limited drain-source voltage 24 p4185 A66-43031

Flat-pack case for thermal resistance of integrated circuit to space environment 24 p4186 A66-43059

Transistor parameters in integrated circuits including saturation resistance, voltage breakdown and frequency response and optimization of operation dependence on impurity concentration, geometry, etc 24 p4186 A66-43079

INTEGRATION

SA BINARY INTEGRATION

SA FUNCTIONAL INTEGRATION

SA NUMERICAL INTEGRATION

SA RUNGE-KUTTA INTEGRATION

Conditions of integrability for certain normal systems of equations with partial derivatives 04 p0538 A66-13469

Statistical approach to derivation of quadrature formulas 07 p1061 A66-18510

Integration of Laplace transformed elastokinetic equations, examining stress function, displacement vector field and boundary and initial value problems 10 p1555 A66-21226

Asymptotic integration of elasticity theory equations and analysis of stressed state of anisotropic shell 15 p2609 A66-28963

Curve fitting technique for integration of hydrostatic equilibrium equations of planetary constitution simplified by introduction of homology-invariant variables 16 p2799 A66-30619

Integration of near equilibrium flows in propulsive nozzles, estimating length of transition region from equilibrium condition to kinetic solution [AICE PREPRINT 28C] 22 p3971 A66-39884

INTEGRATOR

SA DIGITAL INTEGRATOR

Surveying transistorized differentiators and integrators, giving fundamental RC and equivalent circuits 01 p0045 A66-11022

Circuitry of diode pump integrator used for generating mean voltage which is function of repetition rate of applied pulse train 03 p0345 A66-13241

Correlation relations of output voltage of switched RC integrator 06 p0823 A66-15888

Properties of second-gate electrode of

MOS-FET and application as voltage controlled integrator 14 p2248 A66-2705

Integrator, whose transfer function has simple pole in z plane, modified to make possible greater stability with no loss increase or improved signal to noise ratio 15 p2449 A66-2864

LF drift reduction for integrators of repetitive signals 15 p2475 A66-2986

Ideal integrator compared with low pass filters 18 p3076 A66-3383

Noise characteristics at integrator input 1 nonstationary regime 19 p3311 A66-3529

High-quality transistorized gyrator for integration 20 p3528 A66-3744

Rheoelectric integrator simulation method for charge carrier lifetime determination 1 transistor 21 p3713 A66-3932

**SA ELECTROMAGNETIC COMPATIBILITY**

**SA RADIO INTERFERENCE**

**SA WAVE DIFFRACTION**

Interference effects at thin transparent cylindrical glass fibers exposed to coherent light from He-Ne laser 01 p0081 A66-10368

Statistical properties of output of double-sideband receiver when nonlinear mechanisms at input admit unwanted double-sideband signals with Gaussian modulation 05 p0630 A66-14593

Fraunhofer pattern of laser light transmitted through optical fiber, noting spatial frequency of interference fringes between light waves 05 p0696 A66-14972

Maximum likelihood detection of band limited binary signals perturbed by Gaussian noise and intersymbol interference 06 p0829 A66-16193

Learning-type signal processing receivers for binary communication channels with intersymbol interference 06 p0830 A66-16196

Interference phenomenon of serrated system of rings surrounding central beam of gas laser analyzed, using helium neon tube placed between two exterior mirrors 06 p0893 A66-17064

Hologram-generated ghost image experiments to verify fragment displacement theory and diffuse light waveforms 10 p1534 A66-21249

Verification of Klesig equation for interference fringes formed by X-rays scattered from thin films 12 p1926 A66-23712

Moire fringes formed by two zonal gratings

of equal or slightly different pitches 12 p1960 A66-23951

Electron density at large distances from Sun determined by photoelectric measurements during total solar eclipse of July 20, 1963 13 p2187 A66-26134

Anomalous phase variations of GBR transmissions as received in New Zealand correlated with solar season and probably due to long path

Interference 14 p2237 A66-27401

Pressure distribution along wing and body of wing-body combination 14 p2221 A66-28185

Coherence in radiation peaks of ruby laser studied through interference field 17 p2938 A66-33510

Electromagnetic interference from pulse circuits, switches and relays produced by photo-optical control systems 21 p3709 A66-38608

Microwave interference measurement of shock velocity in shock tube, noting standing wave pattern 21 p3738 A66-38798

Plane surface deviation from ideal plane measured by interference method, applied to testing of interferometer plates 21 p3738 A66-39131

Inverse transfer function of pulse-forming network for binary code transmission with small intersymbol interference in time domain and narrow bandwidth in frequency domain 22 p3866 A66-40182

Angle of arrival in amplitude-comparison monopulse antenna arrangement including thermal noise as interference and pulsed radar with ideal radar target 23 p4044 A66-41314

Coherence in radiation peaks of ruby laser studied through interference field 24 p4218 A66-42124

Diffraction gratings by recording laser-generated interference pattern on high resolution film as two-beam hologram 24 p4210 A66-42259

High energy muon flux in interference radiation incident to fast charged particle constant-speed trajectories through periodic laminar medium 24 p4271 A66-42939

**INTERFERENCE DRAG**

Configuration synthesis and optimal utilization of supersonic favorable interference to obtain high lift-drag ratios [AIAA PAPER 65-752] 03 p0315 A66-12732

Interference effect for biconvex aerofoil in wind tunnel with slotted liners 13 p1992 A66-26698

**INTERFERENCE FACTOR TABLE**

Interference ratios in space telecasting, considering methods of control for cochannel broadcasting [AIAA PAPER 66-283] 12 p1821 A66-24754

Basic performance thresholds for 23 desired and undesired modulation types, noting application to interference prediction 23 p4040 A66-41598

**INTERFERENCE GRATING**

Random error estimation for Mach-Zehnder interferometer interference fringe measurements 15 p2502 A66-29383

Transmission characteristics of Fabry-Perot aluminum-magnesium fluoride-aluminum interference filters in far UV region, noting preparation methods, optical properties, etc 17 p2958 A66-32617

Grille spectrometer, noting greater signal to noise ratio than that of scanning Fabry-Perot spectrometer for airglow observations 19 p3353 A66-35378

Interference filter of Fabry-Perot interferometer-type for studying millimeter and submillimeter plasma radiation 22 p3958 A66-40936

Edser-Butler band amplitude dependence on modulating effect of interference grating 24 p4212 A66-42819

**INTERFERENCE LIFT**

Airflow interference theory applied to streamlined wings and bodies undergoing simple harmonic oscillations 07 p0981 A66-18102

**INTERFERENCE MONOCHROMATIZATION**

Wave front shearing interferometer applied to chromatic and monochromatic aberration testing 06 p0878 A66-16117

Coherence properties of optical fields, examining interference effects, intensity fluctuations, photoelectric effects and pulsations 16 p2749 A66-31584

**INTERFEROMETER**

**SA FABRY-PEROT INTERFEROMETER**

**SA MACH-ZEHNDER INTERFEROMETER**

**SA MICHELSON INTERFEROMETER**

**SA MICROWAVE INTERFEROMETER**

**SA RADIO INTERFEROMETER**

Laser interferometer to measure time and spatial variation in repetitively pulsed plasma 01 p0079 A66-10243

Aerodynamic and heat transfer measurements using interferometer with continuous wave laser as source 01 p0069 A66-10849

Spectral measurement of solar simulator sources using polarization interferometer spectrometer 02 p0226 A66-11219

Correlation of phase fluctuations of optical field by photoelectric predetection interferometer 03 p0367 A66-12304

HF direction finder consisting of two orthogonal interferometers built and tested by 16,000 direction-of-arrival measurements 03 p0344 A66-13019

He-Ne laser incorporated into arm of interferometer used to measure fringe shift in small transient plasma 04 p0529 A66-13743

Measurement of electron density of gas discharge plasma by laser interferometer 06 p0916 A66-16379

Interferometer for measurement of ratio of small changes in wavelength of spectral line to linewidth, as basis for measuring plasma electron temperature 06 p0883 A66-16943

Advantages of gas lasers as light sources in aerodynamic research interferometers 06 p0893 A66-16944

Two-element interferometer to investigate Jupiter decimeter circularly polarized radiation 08 p1288 A66-18789

Interferometer for interference perturbation of electromagnetic three-cm waves 08 p1224 A66-19320

Diane ground station interferometry antenna, examining choice of polarization and use of slots for precise measurements 10 p1511 A66-21708

Interferometric determination of radio source positions and use of Royal Radar Establishment Interferometer 11 p1657 A66-23191

Interferometric measurement of ultrasonic velocity in gases at frequencies around 100 kc/s to determine vibrational relaxation 12 p1913 A66-23821

Dependence of Zeeman beat frequency on interferometer tuning in single-mode He-Ne laser with various gas pressures and magnetic field strengths 13 p2101 A66-26201

Multiple element swept-lobe interferometer for study of solar radio bursts 13 p2084 A66-26569

Wavefront shearing prism interferometer applied to testing of chromatic aberration of simple and compound lenses and waveforms characterizing monochromatic aberrations 14 p2291 A66-27319

Lateral shearing interferometer with gas-laser light source for testing large optical systems 14 p2307 A66-27320

Mock interferometer theory with calculation of luminosity and resolving power 14 p2294 A66-27496

Three-meter Ebert grating spectrometer with mock interferometer attachment 14 p2294 A66-27497

Electrostatic probe measurements of velocity displacement and electron density of plasma using laser compared with measurements using microwave interferometer 14 p2346 A66-28269

Optical beam deflection technique using interferometer cavity illuminated by gas laser beam 15 p2512 A66-28689

Holograms of object illuminated with spatially incoherent light from low pressure mercury lamp, using afocal lens in interferometer for wavefront splitting 15 p2497 A66-28694

Gas laser output wavelength stabilization by use of external passive optical interferometer 15 p2513 A66-28835

Fourier transform spectroscopy, history and current status 15 p2498 A66-28838

Collected reports on new development of telescopic, photometric, spectrometric, meteorological, interferometric and detection equipment at various solar and stellar observatories 17 p2923 A66-32020

Plasma density using laser based interferometer, interpreting phase shift of laser signal as time dependent laser frequency variation 19 p3374 A66-35817

Near IR two-beam interferometer built for astronomical observations by Fourier transform spectroscopy, noting resolution of spectra of Venus and Mars 20 p3556 A66-36939

Radio-source fringe visibility survey with NRAO interferometer of 21,500-wavelength base line 20 p3649 A66-37323

Multiple-pass laser interferometer used to confirm electron density inferred from Stark broadening of hydrogen beta line 23 p4101 A66-41260

Optical interferometers for low electron density measurements of transient plasmas 23 p4068 A66-41289

Electron and neutral atom densities in helium and argon afterglow plasma obtained by two helium-neon laser interferometers, noting temporal dependence of electron decay 23 p4101 A66-41364

Low accuracy of interferometric measurement of coefficient of ultrasound absorption in gas 23 p4068 A66-41414

Millimeter wave resonant interferometer capable of measuring spatial distribution of electrons in low density transient plasma column subject to perturbation 24 p4209 A66-42191

**INTERFEROMETER SYSTEM**

Adjustable compensator for Mach-Zehnder interferometer which is suited for large-aperture systems 02 p0233 A66-12216

Laser oscillations and self Q-switching, discussing pulsed flash-lamp excitation experiments with triply activated confocal barium crown glass etalon 04 p0531 A66-13980

Mach-Zehnder interferometer for electromagnetically accelerated shock waves in hydrogen 04 p0554 A66-14285

Two lenses with focal ratios of  $f/4$  and  $f/2.65$  used to collimate light from helium-neon laser 05 p0695 A66-14921

Observation location and instrument vagaries cause discrepancy between photographic and photoelectric interferometric measurements of dayglow at 6300 angstroms 05 p0671 A66-14958

Wave front shearing interferometer applied to chromatic and monochromatic aberration testing 06 p0878 A66-16117

Interferometric examination of Jupiter decimeter radio emission, noting equipment, polarization characteristics and distribution of nonthermal emission 09 p1450 A66-20106

Interferometric measurement of large indices of refraction, noting applicability and accuracy 09 p1403 A66-20516

Gemini rendezvous radar using interferometric angle measuring system, digital range data readout, analog range display and target vehicle command link 09 p1346 A66-20583

RADINT rocket tracking station combines Doppler and interferometer techniques, eliminating need for three or four separate ground stations 09 p1355 A66-20588

Ground station characteristics and requirements in fields of tracking, telemetry and remote control 10 p1520 A66-21706

Long-baseline radio interferometer for radio astronomy, combining wideband signal and one-dimensional linear array to restrict spatial response in two dimensions 11 p1704 A66-22562

Laser application and techniques noting amplification, modulation, interferometry, scattering, plasma diagnostics, nonlinear optics, etc 12 p1889 A66-23931

Power response of two-element interference frequency correlation interferometer to point source of broadband random noise 12 p1840 A66-24626

Holographic interferometry, advantages and operation 13 p2076 A66-25048

Gemini noncoherent pulse radar system using interferometer methods for angle information, noting failures of diode capacitor combination and methods of reliability improvement 13 p2035 A66-25508

Radiotelescope of 40-sec-of-arc resolving power, composed of compound interferometers with small antennas 13 p2058 A66-25569

Radio astronomy antenna theory, discussing antenna resolution, brightness distribution of celestial bodies, interferometer patterns, actual antennas, etc 20 p3530 A66-37721

Intracavity interferometer laser measurements of power gain and output in single-frequency Ar laser and 6328-angstrom Ne isotope shift 22 p3932 A66-40110

Soret Zone Plate simulation by longitudinally distributed coaxial aperture system, noting system activation and operation 23 p4068 A66-41622

Laser induced plasma density measurement using multiple beam interferometry 23 p4105 A66-41630

Zeeman laser interferometer, using axial magnetic field to obtain simultaneous left- and right-hand circularly polarized oscillation modes at upper and lower cavity resonances 24 p4219 A66-42248

**INTERFEROMETRY**

**SA DIFFERENTIAL INTERFEROMETRY**

Interferometric system of Diane satellite tracking stations permits high altitude tracking and measurements with larger solid angle 01 p0030 A66-10788

Ruby crystal optical properties investigated by interference rings from reflecting He-Ne laser beam from crystal face 01 p0083 A66-11045

Polar interferometric method for measuring north-south component of ultrashort wave refraction in ionosphere and optical thickness gradient 02 p0190 A66-11415

Quantum-electronic cross-modulation effect noted while monitoring IR laser interferometric fringes 02 p0240 A66-11449

Laser application problems in interferometry, radar and holography including mechanical stability, noise suppression, dirty laser beam restoration, etc 02 p0240 A66-11454

Schlieren interferometer operating with one prism and single passage 02 p0229 A66-11566

Diane, European interferometric tracking station noting antenna system, calibration operations, angular measurement, etc 03 p0333 A66-12478

Plasma electron density measurements, interferometric and spectroscopic techniques compared with Stark H-beta line and absolute continuum intensity method 03 p0405 A66-13136

Interferometry with holographically reconstructed comparison beam discussing principles, techniques and error sources 04 p0521 A66-13985

Optical interferometry theory, application and verification in plasma study 04 p0522 A66-14197

Heat and mass transfer from vertical plates boundary layer in convection at low Reynolds number by interferometry [ASME PAPER 65-WA/HT-39] 05 p0664 A66-15669

Lens primary aberration evaluation using Twyman interferometer, developing exact equations for high-order lens defects 06 p0879 A66-16118

Book on Fourier transform spectrometry detailing interferometers and programming procedures 06 p0908 A66-16225

Length of compact function estimated from noisy measurement of modulus of Fourier transform 06 p0867 A66-16977

Conventional flow visualization using laser light source [AIAA PAPER 66-127] 06 p0870 A66-17104

Interferometric hologram evaluation and real time vibration analysis of diffuse objects 07 p1144 A66-18040

Interferometric techniques in visual and radio regions for astrophysics 07 p1035 A66-18151

Optical thickness measurement of transparent films on silicon, using spectrophotometric interference technique 07 p1036 A66-18404

Laser application in photography, noting interferometric and holographic techniques 10 p1535 A66-21333

Wave front reconstruction /holography/, hologram production, interferometry, schlieren photography and shadowgrams applied to fluid mechanics 10 p1536 A66-21750

Low-pressure mercury vapor lamp for

interferometric and spectrometric work, noting electrodes, main discharge tube, electrical circuit, etc 10 p1538 A66-22059

Expansion tube for interferometric observation of hypersonic flow fields 11 p1684 A66-22830

Resolution and noise in Fourier transform spectrometer, considering mechanical limitations and diffraction effects 11 p1705 A66-22869

Two-beam interferometry by wavefront reconstruction from hologram recorded with coherent background successively interfered in same latent image 11 p1708 A66-23204

Ruby crystal optical properties investigated by interference rings from reflecting He-Ne laser beam from crystal face 11 p1714 A66-23292

Dissociation rate of nitrogen behind strong shock waves in nitrogen-argon mixtures determined, using time-resolved interferometric measurements of gas density 12 p1861 A66-23616

Polish-made He-Ne red gas lasers, describing power outputs, gas pressure, He/Ne ratio, mirror transmission coefficient and interferometric application 12 p1889 A66-23946

Dual and multiple-beam interferometry by wave front reconstruction from surfaces of standard engineering components, applicable to structural dilatation problems 12 p1884 A66-24967

Interferometric determination of temperature field compared with exact analytical solutions for laminar boundary layer in case of free convection 13 p2208 A66-25314

Interferogram interpretation to determine carbon dioxide concentration in air mixture 13 p2208 A66-25315

Interferometry methods using scatter plate and plane mirror to test long focus optical systems 13 p2080 A66-25992

Lateral, radial and rotational shearing interferometry 13 p2080 A66-25993

Optical length variations in laser amplifiers determined during pumping and amplification, using interferometry 13 p2092 A66-25999

Optical system for schlieren recording/deflection mapping, shadowgraphy and interferometry achieved for laser light, used in recording of refractive index fields 13 p2082 A66-26307

Hyperfrequency interferometer measurement of plasma profile and electron density 14 p2290 A66-26821

Laser beam techniques for study of plasmas with high electron densities 14 p2305 A66-26822

Two-beam interferometry in coherence theory 14 p2330 A66-26965

Theoretical and experimental study of accuracy of Diane interferometric tracking network 14 p2238 A66-27545

Interferometric method for determining stress distributions in semiinfinite plate due to loaded pin 14 p2401 A66-27771

Electron density in laser-induced spark in air determined, measuring simultaneously fundamental laser wavelength and second harmonic 15 p2512 A66-26865

Temperature shift of ruby laser emission measured interferometrically for temperatures between 66 and 210 degrees K 15 p2512 A66-28701

Time jitter due to inherent noise when sampling intervals in Fourier transform spectroscopy by interferometer, examining effects and elimination methods 15 p2499 A66-28849

Shock transition in multihead spin structure of self-sustaining gaseous detonations in oxyacetylene mixtures, including interferometric and schlieren photographic density, temperature and pressure measurements 15 p2618 A66-29607

Gas lasers for interferometric measurements of lengths, noting methods that stabilize wavelengths of lasers 16 p2720 A66-31697

Optical coherence functions and properties from statistical viewpoint for application to spectroscopy and stellar interferometry 17 p2957 A66-31987

Qualitative results on transport mechanisms around dropping mercury

electrode, using long path laser  
interferometry 18 p3110 A66-33924  
Shadowgrams, schlieren photographs and  
interferograms produced from reconstructed  
wavefront 19 p3354 A66-35386  
Preionization and shock wave ionization in  
cylindrical crossed-field plasma source, using  
microwave diagnostic methods including  
interferometry 19 p3408 A66-36277  
Interferometric techniques in visual and  
radio regions for  
astrophysics 21 p3735 A66-38508  
Interferometric measurement of density  
distributions in shock layer of  
nonequilibrium flow field around  
cone 21 p3694 A66-39168  
Interferometric observation of cosmic  
emission at OH frequency, noting emission  
source dimensions 21 p3814 A66-39268  
Line width of well-stabilized laser  
operating far above threshold determined by  
phase random fluctuation, using  
interferometer 21 p3749 A66-39394  
Hologram recording system as  
interferometer 22 p3920 A66-40887  
**INTERGALACTIC MEDIUM**  
Propagation of light in universe with  
inhomogeneously distributed matter,  
considering presence of component  
uniformly spread in space /intergalactic  
gas/ 01 p0135 A66-10281  
Radio galaxies contribution to kinetic  
temperature of intergalactic gas on basis of  
cosmological model 03 p0426 A66-12909  
Density of neutral hydrogen in  
intergalactic space, using spectroscopic  
examination of quasi-stellar source 3C  
9 08 p1288 A66-18782  
Interaction of radiation from distant  
sources with intervening  
medium 08 p1288 A66-18785  
Interstellar and intergalactic plasma  
instability effects on energy distribution  
functions, cosmic ray diffusion and direction  
and interspace field  
interaction 08 p1285 A66-19448  
Radio galaxies contribution to kinetic  
temperature of intergalactic gas on basis of  
cosmological model 14 p2380 A66-27257  
Intergalactic matter temperature  
parameters such as heating by cosmic ray  
ionization, dissipation of hydrodynamic  
turbulence, inelastic electron collision with  
H, He and He-ions 17 p2996 A66-31912  
Interstellar and intergalactic plasma  
instability effects on energy distribution  
functions, cosmic ray diffusion and direction  
and interspace field  
interaction 18 p3169 A66-34477  
Relativistic gas expansion into intergalactic  
space noting energy content, modes of  
expansion and radio source  
distribution 18 p3236 A66-34761  
Intergalactic photon density estimated  
based on luminosity function of  
galaxies 18 p3186 A66-34812  
Principle source of radiative energy loss in  
intergalactic medium in spectral region from  
2 to 18 angstroms is line emission from ions  
of elements oxygen, carbon, neon,  
magnesium and silicon 18 p3237 A66-35046  
Primary gamma ray production, arrival  
directions, particle collisions and  
distribution of EAS penetrating particles in  
intergalactic space 18 p3209 A66-35120  
Expanding universe theory of hot ionized  
intergalactic gas and blackbody radiation  
and X-ray emission energy  
spectra 21 p3817 A66-39561  
Kaufman assumption regarding universe  
expansion considered untenable because it  
requires intergalactic hydrogen temperature  
to remain constant while hydrogen has  
expanded in volume 22 p3978 A66-40008  
**INTERIOR BALLISTICS**  
Development of 23KS20000 motor for Black  
Brant IIB vehicle with emphasis on internal  
ballistics 06 p0942 A66-16702  
Book on quasi-stationary conditions in open  
systems with short reaction times in solid  
propellant rocket engines 09 p1432 A66-20487  
Geometrical quality of elements of exterior  
orientation after double and single point  
resection in space, noting position  
determining characteristics of linear and  
angular parameters 16 p2704 A66-30515  
**INTERMEDIATE FREQUENCY AMPLIFIER**  
Digital IF amplifier for thin film radar

receiver 02 p0202 A66-11917  
Integrated monolithic circuits for compact  
intermediate frequency  
amplifier 05 p0644 A66-14579  
Wideband solid state intermediate  
frequency repeater for communications  
satellites, using waveguide-cavity diode  
down converter transistor amplifier and  
varactor up converter  
[AIAA PAPER 66-300] 12 p1823 A66-24767  
Integrated circuit selective amplifier for  
intermediate frequency application, using  
RC active networks 12 p1846 A66-24915  
Functional approach to electronic  
packaging of 60-mc intermediate frequency  
amplifier using thin film  
circuits 12 p1847 A66-24952  
Signal handling curves in receiver design  
including vacuum-tube capability,  
demodulator circuit, etc 16 p2660 A66-30579  
Receiver consisting of integrated  
millimeter wave mixer and solid state IF  
amplifier chain for operation at 94  
gc 17 p2895 A66-33118  
Black-box approach applied to design of 60-  
megacycle IF amplifier, considering  
application of AGC to circuit and design of  
phase modulator and balanced  
mixer 19 p3321 A66-36423  
Solid state millimeter wave receivers for  
space vehicle environments, discussing  
integral mixer IF amplifiers, oscillators and  
varactor multipliers 22 p3879 A66-40733  
**INTERMETALLICS**  
SA ALLOY  
SA SEMICONDUCTOR  
Joining and metal deposition portion of  
time-temperature effects on gold-aluminum  
thermo-compression bonds 01 p0049 A66-11154  
Electrolytic isolation and precise  
composition of intermetallic phase of  
titanium silicide formed in alloys of system  
Ti-Al-Fe-Si-B-Cr 02 p0245 A66-11994  
Knight shift for nuclear resonance lines of  
intermetallic Nb-Sn phase varies with  
transition temperature 04 p0566 A66-14289  
Physical factors determining hardening of  
nimonic type alloy with high niobium  
content, discussing formation of  
intermetallic phase 05 p0704 A66-15820  
Synthesis and fabrication methods for  
intermetallic carbides, borides, beryllides,  
nitrides and silicides, decreasing  
susceptibility to brittle  
fracture 07 p1051 A66-18298  
Electrochemical and corrosion behavior of  
Al-based Fe, Ni, Ti, Cu and Sb alloys and  
intermetallic compounds 09 p1390 A66-20840  
K absorption spectra of germanium and  
selenium in germanium selenide based on  
band theory of solids by assuming electrons  
transfer, using X-ray  
spectroscopy 11 p1758 A66-23368  
Magnetic and electrical properties of  
intermetallic compound FeRh, discussing  
preparation of thin films 14 p2355 A66-26911  
Heat magnetization in simple model  
applied to thulium intermetallic  
compounds 16 p2745 A66-30177  
Rolling friction studies of intermetallic and  
zirconium oxide for control surface bearings  
for space reentry vehicle  
[ASLE PAPER 66AM 5D4] 16 p2712 A66-30413  
Cold working effect on room temperature  
tensile properties of TiNi intermetallic  
compound 18 p3123 A66-33756  
Aluminide-ductile binder composite alloys  
containing high volume of nickel-aluminum  
compounds and CoAl prepared by powder  
blending and hot  
extrusion 20 p3585 A66-37783  
NaK-77 suitability for 1000-F liquid-metal  
hydraulic flight control  
systems 22 p3852 A66-40498  
Physical factors determining hardening of  
nimonic type alloy with high niobium  
content, discussing formation of  
intermetallic phase 23 p4080 A66-41385  
Magnesium antimonide and magnesium  
bismuthide as materials for power  
generating thermocouples 24 p4227 A66-42111  
Equatorial rare earth germanide magnetic  
structural characteristics 24 p4252 A66-42353  
**INTERMITTENCY HYPOTHESIS**  
Improvement on Montgomery prediction of  
error probability in intermittent system  
operating during short intervals when SNR

is above certain threshold  
level 12 p1816 A66-24138  
Effect of single or periodic disturbances  
on intermittency in pipe flow at various  
Reynolds numbers, noting relation of  
disturbance input frequency to output  
frequency of turbulent  
slugs 16 p2688 A66-31394  
**INTERMODULATION**  
Distortion measurement by total harmonic  
distortion analysis and intermodulation  
distortion analysis 01 p0037 A66-10499  
Intermodulation effects and rule of thumb  
for spurious free dynamic range in  
wideband high sensitivity  
amplifiers 01 p0044 A66-10929  
Nonlinear distortions of HF transistors  
with variable amplification, discussing cross  
and intermodulation  
behavior 04 p0501 A66-14132  
Balanced mixer array with two nonlinear  
elements, one excited in phase and other  
out of phase, has no intermodulation  
outputs, including even-order harmonics of  
out of phase signal 06 p0853 A66-16673  
Cross modulation in varactor-tuned  
limiters 08 p1191 A66-18944  
Fourier analysis of modulation products in  
nonlinear device output and optimum  
frequency conversion for n-frequency  
input 09 p1396 A66-20639  
Nonlinear transfer characteristics derived  
from measured harmonic levels in output  
when input is sinusoidal  
wave 11 p1661 A66-22393  
Intermodulation effect on measurement of  
small Hall coefficients with double AC  
method 16 p2702 A66-30424  
Intermodulation elimination in transistors,  
determining figure of merit and sensitivity  
as function of operating  
current 17 p2895 A66-33115  
First- and second-order sidebands due to  
strong CW signal intermodulation effect in  
3.39 mu He-Ne laser 18 p3117 A66-33615  
**INTERNAL COMBUSTION ENGINE**  
SA PISTON ENGINE  
3-kw internal combustion engine using  
hydrogen and oxygen, discussing design and  
testing for use as space power generator  
[AIAA PAPER 64-756] 13 p2008 A66-26657  
Book on fuel behavior in piston-engine, jet  
and rocket 21 p3306 A66-38950  
**INTERNAL ENERGY**  
Free energy of pure fluids as function of  
thermodynamic temperature determined  
from measurements of internal energy,  
noting case of carbon  
dioxide 12 p1981 A66-24997  
Base drive and internal structural  
irregularities of transistor effect on internal  
current distribution and second breakdown  
characteristics of device 19 p3312 A66-35343  
**INTERNAL FRICTION**  
Mechanical energy dispersion by internal  
friction mechanism of ferromagnetic metals  
in alternating magnetic  
field 01 p0116 A66-10193  
Dislocation relaxation of silver and copper  
and asymmetry of Bordoni internal friction  
peak of metals 01 p0087 A66-10603  
Internal friction and elastic modulus of  
compressor and turbine blade  
materials 03 p0372 A66-12399  
Internal friction, damping and cyclic  
plasticity - ASTM Symposium, Chicago, June  
1964 05 p0771 A66-14546  
Anelasticity and relaxation time in metals  
and nonmetals, particularly as manifested  
by internal friction peak as function of  
frequency or temperature in study of  
crystalline material 05 p0772 A66-14548  
Internal friction measurements for  
studying mechanical properties due to  
crystal dislocations 05 p0698 A66-14550  
Boron addition induced nickel heat  
resistance measured by internal friction as  
function of elastic  
oscillations 05 p0699 A66-14690  
Lithium transformation by plastic  
deformation from bcc to fcc lattice analyzed  
by measuring damping of free torsional  
oscillations of samples, noting role of  
internal friction 05 p0740 A66-15822  
Isothermal annealing effect on internal  
friction and Young modulus of cold-rolled  
aluminum with different

purities 08 p1240 A66-19088  
 Interrelation between relaxation center in tungsten and molybdenum and high temperature internal friction background of spectrum 11 p1719 A66-23386  
 Granato-Luecke frequency dependent internal friction calculated for pinning point distributions after vibration at dislocation temperature 12 p1971 A66-24922  
 Defects in gallium arsenide crystals studied by internal friction with measurements showing damping peak at 140 degrees C 13 p2157 A66-25045  
 Recording assembly for measurement of flexural and torsional moduli and internal friction at various frequencies and temperatures of small samples, using constant amplitude undamped oscillations 13 p2077 A66-25324  
 Low-temperature internal friction peaks in germanium and oxygen-doped and pure silicon crystals 13 p2170 A66-26586  
 LF internal friction of beryllium, noting strain amplitude dependency variation with temperature and purity, obtaining activation energies 16 p2724 A66-31265  
 Mechanical properties of semiconductors, such as elastic modulus and internal friction determined, noting vacuum and temperature conditions 16 p2785 A66-31669  
 Plastic expansion in metals due to alternating torsional and static tensile loading 17 p3029 A66-32808  
 O-O and O-N clusters in niobium detected via internal friction and elastic aftereffect measurements, noting equilibrium, kinetic properties, binding enthalpy, etc 18 p3121 A66-33728  
 Internal friction as function of temperature in cold worked tantalum and niobium containing oxygen and nitrogen 19 p3387 A66-36729  
 Dislocation-induced relaxation in silicon single crystals by measuring internal friction and Young's modulus at temperatures from 77 to 300 degrees K 20 p3618 A66-37561  
 Lithium transformation by plastic deformation from bcc to fcc lattice analyzed by measuring damping of free torsional oscillations of samples, noting role of internal friction 23 p4113 A66-41387  
 Damping mechanisms and phenomenology in materials 23 p4145 A66-41985

**INTERNAL PRESSURE**  
 Full scale ground inflation tests to evaluate structural and RF backscatter characteristics of Echo II prototype spheres as function of their internal pressures 01 p0055 A66-11123  
 Radio beacon telemetry system for measuring orbital performance of Echo II satellite, including internal pressure and skin temperature 01 p0032 A66-11125  
 Stress distribution in vicinity of infinite row of collinear Griffith cracks in elastic body calculated for internal pressure distribution 02 p0298 A66-11577  
 Cylinders subjected to internal and external pressure and axial stress with equations for radial and tangential direction 02 p0299 A66-11706  
 Shells and tubes subjected to internal and external pressures including analysis of transition theory for sheet-bending, considering creep rupture and relaxation 03 p0436 A66-12696  
 Symmetric deformation of viscoelastic-plastic hollow circular cylinder under internal pressure [ASME PAPER 65-APMW-24] 04 p0592 A66-14225  
 Circumferential creep strain of cylinders subjected to internal pressure 12 p1959 A66-23797  
 Time to viscous failure of tubes subjected to internal pressure and axial load 12 p1967 A66-24066  
 Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability 14 p2400 A66-27684  
 Supersonic flutter of circular cylindrical shells subjected to internal pressure and axial compression [AIAA PAPER 65-407] 15 p2610 A66-29281  
 Bending stresses in cylindrical shell with rigid circular inclusion examined under axial

tension and internal pressure [AIAA PAPER 66-525] 16 p2813 A66-30526  
 Symmetric deformation of viscoelastic-plastic hollow circular cylinder under internal pressure [ASME PAPER 65-APMW-24] 18 p3248 A66-33579  
 Isotherms and isobars for polymer liquids using corresponding states principle to establish function describing dependence of internal pressure on volume or temperature 18 p3124 A66-33692  
 Solutions for large plastic deformations of cylindrical membrane shells under internal pressure 18 p3252 A66-33764  
 In-plane stiffness matrices for composite cylinders of filament winding determined by internal pressure, axial tension and torsion tests 20 p3666 A66-37440  
 Nonsteady state zero-moment creep in shells of revolution with clamped edges under internal pressure, finding change range in stresses in time 21 p3826 A66-38612  
 Strength test results on special small rocket covering bending, stiffness and internal pressure strength of various components 23 p4133 A66-41423  
 Photoelastic analysis of stress and strain distributions of case-bonded propellant grains, calculating internal pressure and dependence on mechanical properties of grain material 23 p4120 A66-41440  
 Two-dimensional bubble contours in steady state turbulence-free flow of ideal incompressible fluid, obtaining solution for all internal pressures 24 p4232 A66-43064

**INTERNAL STRESS**  
 Mechanisms and relative magnitudes of internal damping in structural metals subjected to multiaxial state of stress 01 p0150 A66-10153  
 Temperature cycling effect on welds of known strength which are encapsulated with several types of resins to determine internal stress in electronic modules 02 p0234 A66-11326  
 Tangential force and bending moment effect on behavior of internal stresses and moments near application point in spherical shell analysis 04 p0588 A66-13565  
 Dynamic transient response of cylindrical shell to internal pressure pulse generated by blast wave 12 p1959 A66-23799  
 Extensive creep deformation of thin zero-moment shell of revolution under action of internal and axial load 12 p1966 A66-24059  
 Shells produced by rotation of second-order curves about axis of symmetry evaluated for symmetric and antisymmetric loads 13 p2202 A66-26418  
 Variational solution of simultaneous stability equations boundary value problem for transverse displacements and stress state 16 p2819 A66-31137  
 Internal fracture of spheruloids caused by focusing explosive waves 17 p3027 A66-32636  
 Bending characteristics of tapered cylindrical shells, discussing edge and internal influence 18 p3253 A66-33806  
 Characteristic microstresses in plastically deformed iron and aluminum alloy under tensile testing studied by X-ray techniques 19 p3376 A66-35400  
 High speed ferrimagnetic microtransducer capable of embedding in wide variety of materials and sensors to explore stress characteristics and pressure profiles 20 p3555 A66-36851  
 Embedded foil strain gauges for three-dimensional stress measurements 20 p3668 A66-37499  
 Shallow conical shell stability under pneumatic and hydraulic internal loading 20 p3670 A66-37673

**INTERNATIONAL COOPERATION**  
 European Space Research Organization /ESRO/ objectives and program including sounding rockets, satellite payloads and astronomical satellite 01 p0170 A66-10248  
 Methodology for numerically defining international magnitude of space rescue requirements 01 p0143 A66-10792  
 San Marco project, joint effort of NASA and Italian Space Commission to launch satellite for atmospheric and ionospheric measurements 01 p0143 A66-10809  
 Suggestions concerning cooperation of U.S.

and European industry in space projects 02 p0305 A66-11250  
 Advantages and disadvantages between U.S. and Europe in space projects 02 p0305 A66-11250  
 International TV communications using satellite relaying systems noting Telstar Relay and Syncom satellites and frequency sharing, video bandwidth, etc 02 p0190 A66-11511  
 Objectives, nature, origin and organization of Eurospace, noting communications satellite and space transport committees 02 p0306 A66-11674  
 NASA international program including satellite experiments, sounding rocket investigations, etc 02 p0306 A66-12237  
 Station network designed for CNES using Doppler frequency tracking, coherent systems of demodulation, polarization etc 03 p0351 A66-12477  
 Devices on ESRO satellite to be launched in 1967 by NASA rocket, noting photometer for auroral measurements, plasma probe for electron density, scintillation counter etc 03 p0430 A66-12484  
 Historical development of rules governing international cooperation on aircraft accident investigations [AIAA PAPER 65-768] 03 p0446 A66-12597  
 Worldwide F-104 program, discussing licensing agreements and weapons system management [AIAA PAPER 65-776] 03 p0447 A66-13068  
 NASARR international program concerning F-15 fire-control systems for F-104 Starfighter [AIAA PAPER 65-777] 03 p0447 A66-13068  
 Forensic medicine in space environment with reference to international responsibility, noting risks, medicolegal implications, cybernetics, contamination, pollution, etc 03 p0447 A66-13070  
 Space law basis with practical application noting sources, future legal systems, cooperation, etc 03 p0448 A66-13080  
 Astronomical constants system approved by International Astronomical Union at Hamburg in August 1964 05 p0759 A66-14888  
 West Germany and international cooperation in aerospace engine development, noting VTOL aircraft and supersonic and hypersonic spacecraft 06 p0943 A66-16797  
 Radio communication between U.S.S.R. and Great Britain via passive Earth satellite Echo II and Moon signal reflection 07 p1001 A66-17349  
 International coordination and standardization of HF quantity measurements, considering economic, psychologic and accuracy benefits 07 p1002 A66-18224  
 Worldwide civilian communications, satellite system concept, discussing agreements between U.S. and foreign governments or corporation establishment 08 p1179 A66-18566  
 Defense Communication Satellite Program for reliable worldwide military communications 08 p1179 A66-18566  
 International Geophysical Calendar for 1966 prepared by International Ursigram and World Days Service with advice of IQSY reporters 08 p1219 A66-19410  
 Italian participation in COMSAT 09 p1473 A66-20548  
 European and U.S. space transport models characteristics, noting possible cooperation because of costs 09 p1473 A66-20552  
 International cooperation in space law in connection with future space laboratories and lunar and Martian landings 09 p1473 A66-20558  
 Difficulties encountered in applying system of overall project management to ELDO initial program, noting PERT use, costs plans, etc 09 p1473 A66-20657  
 ESRO/ELDO Space Documentation Service, describing system characteristics, NASA agreement, indexing and search strategy 09 p1473 A66-20658  
 Brazilian space research program including geomagnetic field, radio propagation and development of sounding rocket station near magnetic equator 09 p1458 A66-20709  
 Space research activity in Denmark, discussing international cooperation and ionospheric sounding 09 p1458 A66-20712

Scientific experiments for manned orbital flight - Goddard Memorial Symposium, Washington, D.C., March 1965 10 p1607 A66-21517

NASA program, national and international participation, scientific missions, launching of manned and unmanned satellites, etc 10 p1623 A66-21518

Text on international cooperation in space, institutions involved and technical and political constraints 10 p1623 A66-21765

International sanitary regulations and air traffic, noting uniform code for quarantine practices 11 p1647 A66-22479

European space organizations, particularly ESRO and ELDO 11 p1788 A66-23117

Joint experiment of U.S. Naval Observatory and Japan Radio Research Laboratories for synchronizing standard time pulses, using Relay II satellite 12 p1818 A66-24473

Power, industrial and general applications - IEEE International Convention, New York, March 1966 12 p1803 A66-24658

Communications satellites for small nations, describing requirements of worldwide multiple access system [AIAA PAPER 66-281] 12 p1821 A66-24753

International Telecommunications Satellite (INTELSAT) Consortium and COMSAT participation in program [AIAA PAPER 66-332] 12 p1982 A66-24799

Role of International Telecommunication Union in satellite communication development, noting history, organization, operation [AIAA PAPER 66-443] 12 p1983 A66-24800

Report of Panel on International Meteorological Cooperation to Committee on Atmospheric Sciences, NAS/NRC, on global scientific observation 14 p2326 A66-27843

International RF space allocation for astronomical purposes 15 p2449 A66-28743

International coordination of satellite communications by nongovernmental agencies [AIAA PAPER 66-333] 15 p2621 A66-29866

Space research activities in Rumania 15 p2599 A66-29896

Space research in Hungary in 1965 including satellite tracking, ionospheric sounding, solar activity, etc, noting international data 15 p2600 A66-29907

Pakistan space program including rocket soundings, satellite tracking, meteorological research, etc 15 p2601 A66-29913

Polish space program noting international cooperation, satellite observation, radio astronomy, rocket sounding, etc 15 p2601 A66-29932

Space research programs in Italy since May 1965 and cooperation with NASA 15 p2602 A66-29940

Global TV communications systems utilizing Telstar and Early Bird 17 p2875 A66-32900

CNES network of stations for FR-1 and D-1A, discussing checks of proper functioning, orbital corrections, telemetry, ground control, etc 18 p3094 A66-33978

European Space Research Organization (ESRO) history, objectives, organization and activities 18 p3269 A66-34732

Legal question of Moon ownership, discussing international implications of manned landing 19 p3480 A66-35733

Law of outer space - Colloquium, Athens, September 1965 19 p3480 A66-36201

Space vehicle and astronaut assistance and liability for damage 19 p3481 A66-36202

Proposals for international convention on liability for damage caused by spacecraft, noting principles, preparatory work done and future measures 19 p3481 A66-36203

Noncoercive and coercive processes of international law for space use, discussing factors, functions, and applications 19 p3481 A66-36204

Commercial space communication and growth of regional-national organizations 19 p3481 A66-36205

Space legal liability and damage in UN resolution 19 p3482 A66-36206

Global space communications and international cooperation 19 p3482 A66-36209

Space law in planetary explorations 19 p3482 A66-36211

Influence of outer space activities on

development and evolution of international law 19 p3483 A66-36216

Space law education 19 p3483 A66-36217

International agreements as sources of law of outer space including atomic weapons testing, Comsat agreement, etc 19 p3483 A66-36218

UN General Assembly resolutions on outer space as sources of space law 19 p3484 A66-36222

Proposal that International Civil Aviation Organization (ICAO) might serve as specialized agency for administering outer space 19 p3484 A66-36226

Subjective approach to work of UN Committee on Peaceful Uses of Outer Space 19 p3485 A66-36227

Legal problems concerning name, definition and classification of space objects, noting special problems space stations will entail 19 p3485 A66-36228

Processing of satellite observations obtained within INTEROBS program dealing with atmospheric density determination and calculation of satellite orbital elements 20 p3518 A66-37847

Mediterranean cooperation for solar energy - Meeting, Marseille, May 1966 22 p3851 A66-40242

British-French cooperation in aeronautics, discussing Concorde SST, variable geometry aircraft, Olympus 593 turbojet, etc 23 p4016 A66-42069

Breguet 1150 high seas reconnaissance aircraft, noting design features and technological problems 24 p4159 A66-42489

**INTERNATIONAL GEOPHYSICAL YEAR (IGY)**

Geomagnetic pulsation pc-5 in and near auroral zones based on data collected during IGY period, noting local time dependence 01 p0062 A66-10889

Progressive change in worldwide current systems and auroral zone electrojets with geomagnetic bays examined with magnetic data during IGY 01 p0063 A66-10890

Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet 02 p0224 A66-12118

Behavior patterns exhibited by polar ionospheric phenomena indicated by statistical analysis of IGY data 03 p0364 A66-12664

Thermal balance of Earth in light of IGY data 05 p0674 A66-15223

IGY geomagnetic observations, notably magnetic storms in Soviet Union and Antarctic 05 p0674 A66-15224

Cosmic radiation studies in U.S.S.R. during IGY noting 11-year variations, Forbush effect, solar particle propagation, etc 05 p0749 A66-15232

Space-time distribution of perturbed solar diurnal variation at high latitudes during IGY 08 p1214 A66-19033

Geomagnetic and ionospheric observations of 1964 expedition of Zaria 08 p1214 A66-19041

Graph for system of currents of solar diurnal variation during IGY winter season, considering night and evening vorticity individually and using coordinate system 08 p1221 A66-19797

Noncyclic variation during magnetically quiet days, examining seasonal changes in geomagnetic field value at night during IGY 11 p1696 A66-22420

Total counting rate and detected multiplicity spectrum of standard IGY neutron monitor analyzed on basis of neutron production and cosmic radiation components 11 p1765 A66-23144

Cosmic rays, collected papers on international geophysical projects 12 p1939 A66-24159

Cosmic ray variations analysis based on IGY and IGC data, discussing diurnal variations, cosmic ray burst, Forbush effect and existence of interplanetary magnetic field and of solar magnetic traps 12 p1940 A66-24161

Magnetospheric and upper atmospheric meteorological effects on cosmic ray intensity variation and solar corpuscular streams 12 p1940 A66-24163

Cosmic ray variations and solar corpuscular

stream in interplanetary space during March 1958 magnetic storm 12 p1940 A66-24164

Forbush, geomagnetic interaction, cosmic ray variation and solar corpuscular flux effects during magnetic storms in period of maximum solar activity 12 p1940 A66-24165

Variations in cosmic ray neutron component intensity and solar corpuscular flux with H-component of geomagnetic field during magnetic storm 12 p1941 A66-24166

Magnetic storms during IGY, assuming effect on cosmic ray intensity is associated with influence on galactic cosmic rays of magnetic fields of solar and corpuscular fluxes 12 p1941 A66-24169

Calculations of effects of solar cosmic ray flares on instruments and distribution of stations, considering index of differential spectrum of additional flux pulses 12 p1942 A66-24180

IGY and IGC data on atmospheric washout of radioactive fission products by precipitation 14 p2376 A66-27540

Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet 14 p2286 A66-28077

IGY data on solar flares emitting energetic protons in sunspot groups with delta configuration, noting occurrence where magnetic fields have steep gradients 20 p3630 A66-37330

Graph for system of currents of solar diurnal variation during IGY winter season, considering night and evening vorticity individually, using coordinate system 21 p3733 A66-38793

Magnetic field of ring current on Earth surface according to observations during IGY 22 p3914 A66-40768

**INTERNATIONAL LAW**

Comments on various aspects of air and space penal law noting principles, penalties, frontiers, etc 02 p0306 A66-11747

Responsibilities of transport aircraft constructor and subcontractor noting damage risk of third party and purchaser, guarantees, etc 02 p0306 A66-11748

Development, organization and legal bases of satellite communication system developed by U.S., noting details on COMSAT 02 p0306 A66-11888

Law of Outer Space Colloquium, Warsaw, September 1964 03 p0447 A66-13074

Sovereignty with respect to outer space especially celestial bodies and space stations, noting international law for free exploration, navigation, etc 03 p0447 A66-13075

Legal problems in organization and establishment of manned Lunar International Laboratory noting exploitation of lunar lands, sovereignty, communications, etc 03 p0447 A66-13077

Codification to determine international law of celestial bodies resulted in formulation of general principles 03 p0448 A66-13079

Air and space flight legal problems concerning property, noise, liability, aircraft mortgaging and seizure and penal laws 04 p0599 A66-13506

Rule of exhaustion of local remedies and liability for space vehicle accidents 06 p0973 A66-16403

Possible infringement liability regarding unlicensed transmission of copyrighted works via communications satellites 07 p1155 A66-17227

Text on international law of territorial air space, discussing civil aviation, trespassing and crime aboard aircraft 08 p1322 A66-19237

Text on space law including historical, scientific and political background of activities in space 09 p1472 A66-19952

Commercial communications satellite system, impact and problems [AIAA PAPER 66-273] 12 p1981 A66-24746

Communications satellites, legal analysis and prognosis [AIAA PAPER 66-277] 12 p1982 A66-24749

Social and legal questions posed by development of large-scale information grids [AIAA PAPER 66-318] 12 p1982 A66-24789

Legal question in air traffic control concerning recommendation for proof of fault system without limitation on liability 14 p2416 A66-27840

Overcapacity in U.S. international air transport industry due to transition to jet between 1954 and 1963 14 p2417 A66-27841

## INTERNATIONAL QUIET SUN YEAR

## /IQSY/

Aerospace techniques used for research during International Quiet Sun Years /IQSY/ 08 p1286 A66-18570

Cerenkov counter measurement of nuclear component of cosmic rays onboard Elektron II satellite as function of solar activity during IQSY 10 p1595 A66-21043

Comet observations in IQSY 11 p1771 A66-22768

Vertical measurement of ionospheric absorption at continuously varying frequency, showing diurnal variation of absorption 12 p1870 A66-24289

Polar-based riometric observations of solar cosmic ray events during IQSY 15 p2592 A66-30034

Non-Stoermer cut-off variation with geomagnetic latitude of PCA during quiet Sun period 20 p3635 A66-38225

Spatial distribution of auroral radio signal reflection centers based on radar observations 22 p3915 A66-40777

## INTERNATIONAL SATELLITE FOR

## IONOSPHERIC STUDY

## S ISIS SATELLITE

## INTERPLANETARY COMMUNICATION

Interplanetary spacecraft telecommunications system design including block diagrams 14 p2239 A66-27822

Attenuation of radio waves from Taurus A in interplanetary space and in space about Sun 14 p2242 A66-28152

Communication and data transmission techniques via unmanned interplanetary satellites, examining video and telemetry systems 21 p3703 A66-38750

Spacecraft and Earth-terminal antennas for interplanetary communication via high power information transmission 22 p3881 A66-40748

## INTERPLANETARY DUST

## SA ZODIACAL DUST CLOUD

Mariner IV Cosmic Dust Detector measurement of momentum, mass distribution, flux densities and time histories of dust particles near Earth and in space 01 p0073 A66-11113

Data on origin and effects of dust particles in interplanetary space obtained from solar corona, zodiacal light and meteor observation 03 p0425 A66-12850

Mass accretion and variation in shape and dimensions of comet orbits 05 p0761 A66-15130

Velocities of dust particles in cislunar space 05 p0762 A66-15266

Interplanetary dust particles, size distribution, mass density, structure and shape 05 p0767 A66-15752

Chemical nature and origin of solid particles formed in primordial solar nebula, examining growth mechanism based on screw dislocations present in preplanetary nebula 05 p0767 A66-15753

Interplanetary dust dynamics, discussing comet tails, electric charge carrying properties, etc 08 p1287 A66-18635

Particle distribution and motion in field of force, discussing density profile, energy dissipation, Coulomb charge shielding for local thermodynamic equilibrium and free orbital motion 08 p1261 A66-18743

Deposition of black magnetic spherules from atmosphere at two stations in New Mexico believed to be of extraterrestrial origin 09 p1370 A66-19879

Interplanetary dust measurements by satellites indicate meteoric fluxes and dust clouds hazardous to manned spaceflight 10 p1600 A66-21048

Dynamical and light scattering properties of small dust grains orbiting Earth 10 p1529 A66-21154

Cosmic dust particles of interplanetary space hypothesized to carry electrical charges, based on irregularities in zodiacal light, night airglow and noctilucent clouds 12 p1945 A66-23510

Al-26 and Be-10 radioactivities in cores of Pacific sediments and implications regarding low-energy proton flux in interplanetary space over last 100,000 years 12 p1943 A66-24236

Newtonian approximation for irregularities in statistically homogeneous and isotropic dust-filled universe 14 p2386 A66-28119

Dynamics of type II comet trails, noting physical analogy in head and trail with rarified partially ionized gas 17 p3012 A66-33392

Cometary trail classification using Bredikhin method, noting spectrophotometric data on meteoritic microstructure 17 p3012 A66-33393

Comet Moorhouse III photographic analysis, noting tail motion, composition, angular motion of rays, etc 17 p3012 A66-33395

Force action on charged spherical dust particles in cometary atmospheres, noting interaction with ions 17 p3012 A66-33399

Relation between optical and electrical properties of interplanetary dust in upper atmosphere and comparison with twilight-optical and ionospheric parameters 18 p3105 A66-33961

Cosmic radiation age spectrum of chondrites by calculation based on interplanetary erosion rate, discussing asteroidal origin for meteorites 18 p3232 A66-34528

Cosmic dust particles of interplanetary space hypothesized to carry electrical charges, based on irregularities in zodiacal light, night airglow and noctilucent clouds 20 p3646 A66-37023

Comet disintegration as basic source of interplanetary dust based on zodiacal isophots 20 p3549 A66-37037

Flare ion fluxes in space by mass-spectrometric measurements of solar flare rare-gas ions stopped in extraterrestrial material 22 p3973 A66-40016

Zodiacal light, airglow and falling atmospheric dust measurements and observations in terms of solar orbiting small diameter particle clouds 24 p4276 A66-42663

## INTERPLANETARY EXPLORER

## S EXPLORER XXXIII SATELLITE

## S IMPE

## INTERPLANETARY FLIGHT

Data automation system /DAS/ on Mariner IV Mars probe involving real and nonreal time for experiments during cruise and encounter flights 01 p0034 A66-11119

Interplanetary flight reliability problem treated by availability concept in terms of function, duty cycle and subsequent reliability 02 p0235 A66-11619

Manned Venus and Mars flybys and Mars landings using only Saturn-Apollo hardware 02 p0290 A66-12067

Corpuscular radiation effect on electronic components during interplanetary flight, assigning safety margins to each component 04 p0493 A66-13606

Optimal interplanetary guidance, discussing optimization of variable observation rate and correction schedule to achieve desired terminal accuracy 04 p0544 A66-13992

Clinical aspects of interplanetary flights noting models of future cosmic diseases, automation of diagnostics, medical aid aboard spacecraft, etc 06 p0815 A66-16052

Developing trends in space flight, considering eventual exploration and conquest of entire solar system 07 p1156 A66-17832

Civilian and Military Uses of Aerospace-Conference, New York, January 1965 08 p1299 A66-18547

Stochastic optimal control problem solution by dynamic programming and relation to interplanetary guidance 09 p1360 A66-19908

Radiation hazards to astronauts in interplanetary flight from primary cosmic rays, Van Allen belts and chromospheric bursts 10 p1595 A66-21047

NERVA electric manned Mars vehicle design, performance and operation for interplanetary missions 13 p2190 A66-25263

Integrated space suit, suit loop and backpack system for intravehicular operation on interplanetary missions 13 p2013 A66-25277

Man-machine systems for interplanetary exploration, using functional analysis techniques for system design 13 p2013 A66-25281

Trajectory energy requirements for low-thrust flights throughout solar system using

nuclear-electric propulsion [AIAA PAPER 66-497] 16 p2805 A66-31495

Interplanetary mission planning including energy requirements, payload definition, spacecraft design, launching, cost data, etc 19 p3470 A66-36314

Using Mars and Phobos to advanced interplanetary flight 19 p3464 A66-36315

Trajectory corrections of space vehicle launched toward planet, noting fuel consumption 20 p3595 A66-36872

## INTERPLANETARY GAS

Interplanetary medium observation from zodiacal light and radio wave scattering during radio source occultation and influence on galactic and solar cosmic rays 03 p0425 A66-12852

Galactic cosmic ray intensity modulation by interplanetary plasma turbulence, noting cosmic ray and geomagnetic storm 07 p1122 A66-17987

Galactic cosmic ray modulation by interplanetary plasma, deriving by method of best fit, direction and energy spectrum of anisotropy outside of geomagnetic field 07 p1128 A66-18020

Mariner II solar wind measurements including data on Venus electromagnetic radiation, space magnetic fields and charged particles, energy spectra, solar plasma, etc 07 p1130 A66-18077

Penetration of interplanetary plasma into magnetosphere, connected to aurorae and magnetic storms, noting that plasma need not behave like magnetofluid 07 p1138 A66-18081

Current sheet formation on plasma magnetospheric boundary at hyperbolic null point, noting possible connection with solar flare mechanism 07 p1138 A66-18082

Interplanetary medium properties considered in scaling of observed effects of interaction of solar wind with Earth dipolar magnetic field 08 p1292 A66-19123

Exospheric model of solar wind for ionized atmosphere with velocity-dependent collision cross section 10 p1605 A66-21206

Objections to idea of solar ejection of neutral hydrogen and responsibility for geomagnetic storm 11 p1776 A66-23496

Electron irregularity size and motion in interplanetary medium determined from radio source scintillation phenomena 13 p2182 A66-25571

Interplanetary plasma stream analysis using bistatic radar transmissions, considering wave propagation in presence of uniform magnetic field, stream velocity, Faraday rotation, etc 16 p2801 A66-30716

Quasar 3C-48 radio wave scattering by interplanetary plasma inhomogeneities 17 p3003 A66-32666

Type I comet trail relation to interaction of solar wind with geomagnetic field, noting tail ray formation mechanism, interplanetary plasma measurements, etc 17 p3012 A66-33396

Comet gas trail connection with interplanetary plasma and solar activity, noting agreement of results with Mariner II measurements 17 p3012 A66-33397

Compositional, anisotropic and nonradial flow characteristics of solar wind as observed by ARC high-resolution Pioneer VI plasma probe 18 p3170 A66-34542

Cosmic ray origin, discussing role of plasma effects in galaxies, radiogalaxies, metagalactic space, etc 18 p3175 A66-34747

Dynamical behavior of cosmic ray gases, noting modes of hydromagnetic wave propagation and static equilibrium configurations for thermal interstellar gas and field 18 p3178 A66-34759

Long-term modulation of cosmic ray intensity in interplanetary medium 18 p3180 A66-34774

Hydromagnetic wave induced variations in plasma velocity and magnetic field in interplanetary space measured by Mariner II 19 p3466 A66-36766

Interplanetary plasma stream velocities measured by bistatic radar transmissions from Earth to spacecraft, considering presence of uniform interplanetary magnetic field 20 p3648 A66-37214

Correlation between lunar eclipse brightness and interplanetary plasma flux, examining lunar

- luminescence 23 p4131 A66-41862
- Anisotropy of cosmic rays in N-S direction determined by comparison of intensity variations observed in Arctic and Antarctic regions 24 p4263 A66-42464
- Interplanetary exploration space mission objectives, discussing magnetic fields, energetic particles, cosmic radiation, etc 24 p4264 A66-42660
- INTERPLANETARY MAGNETIC FIELD**
- Interplanetary magnetic field model developed by Elliot from data of intensity variation of low energy cosmic rays 02 p0281 A66-11332
- Interplanetary magnetic effects of solar flares recorded by Explorer XVIII and Pioneer V 03 p0419 A66-12681
- Explorer XVIII continuous monitoring of vector field data deemed plausible correlation with noncontinuous data coverage of Pioneer V 03 p0419 A66-12682
- Diffusion of solar particles by interplanetary magnetic field 03 p0422 A66-12872
- Observations of interplanetary magnetic field by Mariner and Imp spacecraft confirm predictions based on behavior of cosmic rays 03 p0429 A66-13263
- Quasi-stationary corotating structure in interplanetary magnetic field observed with Imp I satellite during three solar rotations, noting data on solar wind 05 p0746 A66-14783
- Cosmic rays from solar flare and interplanetary space properties, covering particle scattering and magnetic field induced one-dimensional particle diffusion 05 p0751 A66-15377
- Interplanetary medium phenomena, MHD theory of solar wind and solar rotation as cause of Archimedean spiral twisting of interplanetary magnetic lines 05 p0767 A66-15749
- Cosmic ray diffusion, discussing existence and influence of radial magnetic field 06 p0947 A66-16574
- Frequency distribution of time and energy characteristics of cosmic ray bursts used to construct model of interplanetary magnetic field 06 p0948 A66-16580
- Survey in satellite era of energetic particle radiations, plasmas and magnetic fields in space, including solar wind, solar cosmic rays, etc 06 p0951 A66-16612
- Extraordinarily enhanced radio emission when radio source Taurus A was occulted by supercorona, concluding that supercorona shape is affected by intensity and direction of inclined interplanetary magnetic field 07 p1136 A66-17643
- Cosmic ray variations as affected by space electromagnetic conditions 07 p1121 A66-17986
- Scale and lifetime of magnetic transition region between interplanetary and interstellar space deduced from primary cosmic ray spectrum 07 p1122 A66-17989
- Contribution of spallation and ionization loss to operator that modulates cosmic ray nuclei with Z greater than or equal to 2 during propagation 07 p1124 A66-17998
- Cosmic ray modulation by interplanetary magnetic field indicated by dependence of secular, 27-day and diurnal variations on solar activity 07 p1124 A66-17999
- Active regions on Sun responsible for modulation process evidenced by correlation of cosmic radiation intensity variation with solar activity features 07 p1125 A66-18002
- Forbush effect and region of decreased cosmic ray intensity extending from Earth to Sun 07 p1129 A66-18024
- Asymmetry of cosmic ray variations and structure of interplanetary magnetic field, based on data recorded at Yakutsk and Tiksi 07 p1130 A66-18026
- Motion state of interplanetary plasma and properties of interplanetary magnetic fields, including relation to those of Sun 07 p1138 A66-18078
- Sudden commencement of magnetic storms in outer space caused by oblique MHD shock wave from corpuscular stream 08 p1290 A66-19032
- Spectra of solar, diurnal and secular variations, relation to modulation of cosmic rays by interplanetary magnetic field 09 p1438 A66-20216
- Solar cosmic rays and interplanetary magnetic field, showing polar cap absorption 09 p1439 A66-20218
- Energy dependence of transparency of walls of transition region shell obtained from Forbush effects, in connection with cosmic ray intensity 09 p1439 A66-20221
- Interplanetary space and solar atmospheric particles and fields in various models 09 p1454 A66-20285
- Comparison of interplanetary magnetic field measurements made by Imp-I satellite and those obtained with solar magnetograph at Mount Wilson 09 p1455 A66-20402
- Anisotropic diffusion of solar cosmic rays due to interplanetary magnetic field 09 p1443 A66-20890
- Upper bounds on steady state and pulse outflow of neutrons from Sun determined by assuming neutron-decay protons diffuse in interplanetary magnetic field 11 p1764 A66-23131
- Cosmic ray variations analysis based on IGY and IGC data, discussing diurnal variations, cosmic ray burst, Forbush effect and existence of interplanetary magnetic field and of solar magnetic traps 12 p1940 A66-24161
- 27-day cosmic ray variations from July 1957 to December 1960 and general characteristic of electromagnetic conditions in interplanetary space 12 p1942 A66-24177
- Space probe observations of solar wind, solar magnetic field and interplanetary magnetic field 13 p2187 A66-26286
- Data from satellite 1963 38C, showing existence of 27-day periodicity in intensities of trapped electrons undergoing two increases and linked to interplanetary magnetic field 13 p2175 A66-26353
- Outer solar corona during declining portion of solar activity cycle, noting discrepancy between radio and optical values of electron density 15 p2593 A66-28816
- High energy solar proton propagation in interplanetary magnetic field by Fokker-Planck equation 15 p2575 A66-29081
- Comparison of magnetic and cosmic ray data of Pioneer VI with particle guidance properties of interplanetary magnetic field 15 p2591 A66-30023
- Solar wind interaction with solar dipole magnetic field in coupled hydrodynamic and hydromagnetic equations [AIAA PAPER 66-509] 16 p2793 A66-30608
- Measurements of geomagnetic field at various distances using IMP-I satellite, noting magnetically neutral sheet in tail and observation of five magnetic storms 16 p2695 A66-30715
- Argument in support of Dessler long-tail model of magnetosphere in answer to Van Allen questions 16 p2795 A66-30725
- Type I comet tail origin due to energetic electrons in shock structure, noting inertial slowing down of interplanetary field lines trapped in solar wind 16 p2801 A66-30919
- Origin and propagation of cosmic radiation, discussing interplanetary magnetic fields, plasmas, Faraday rotation of polarized radiation, Zeeman splitting of hydrogen line, etc 17 p2964 A66-32029
- Variations in polarity distribution of interplanetary magnetic field from observations by Mariner II and IV and IMP I 17 p3002 A66-32531
- Cometary tail phenomena interpreted, using plasma dynamics theory coupled with observed solar wind activity 17 p3011 A66-33390
- Correction of magnetic measurements made by Mariner II, noting use of second-order approximation for interplanetary magnetic field 18 p3106 A66-34333
- Interplanetary magnetic-field measurements taken by Interplanetary Monitoring Platform /IMP-I/ 18 p3231 A66-34336
- Solar wind models analyzed, taking into account solar ejected high-velocity gas jets and southward component of interplanetary magnetic field 18 p3167 A66-34339
- Astronomical model study of physics of penetration of interstellar cosmic rays into solar system 18 p3168 A66-34342
- Solar wind origin, examining steady state energy and momentum balance, coronal heating, viscosity effects, velocity distributions and field effects 18 p3168 A66-34343
- Reconnection mechanism for geomagnetic and interplanetary field lines, estimating field-cutting efficiency at magnetopause 18 p3231 A66-34348
- Magnetosphere topology changes due to solar wind interactions, geomagnetic storms and interactions with interplanetary magnetic field outside magnetosphere 18 p3106 A66-34349
- Solar wind interaction with type I comet tails in interplanetary magnetic field 18 p3231 A66-34356
- Anisotropic cosmic radiation with flare effects flowing out of Sun and along filamentary magnetic structures imbedded in solar wind 18 p3170 A66-34537
- Interplanetary magnetic field measurements using flux gate magnetometer sensor mounted on Pioneer VI space probe, noting various graphs 18 p3108 A66-34538
- Collimation of cosmic rays by interplanetary magnetic field based on Pioneer VI measurements during flare event 18 p3170 A66-34539
- Comparison of interplanetary magnetic field measurements obtained by Pioneer VI space probe and IMP-III satellite 18 p3233 A66-34540
- Cosmic radiation, interplanetary magnetic field, solar proton propagation long-term /solar cycle/ modulation of intensity, Forbush effect and daily intensity variation 18 p3175 A66-34741
- Satellite and space probe measurements indicate continual confinement of geomagnetic field by solar wind forming magnetosphere and Earth magnetic tail 18 p3235 A66-34742
- Explorer XVIII satellite measurements of proton energy spectra in region corotating with Sun, noting modulation of galactic cosmic radiation and source of continuous particle accelerations 18 p3177 A66-34754
- Sidereal time variation of cosmic rays explained by diffusion in galactic arm for colinear magnetic field and proximity of solar system 18 p3178 A66-34762
- Anisotropy of cosmic ray with gradient and curvature drifts in spiral interplanetary magnetic field 18 p3181 A66-34780
- Semidiurnal anisotropy of cosmic radiation observed from neutron monitor data treated by numerical filter techniques 18 p3182 A66-34783
- Twenty Forbush decreases with amplitude greater than 4 percent in neutron intensity 18 p3184 A66-34796
- Flux gate magnetometer for interplanetary magnetic field measurements 19 p3356 A66-35674
- Low energy cosmic ray modulation relationship to observed interplanetary magnetic field irregularities in terms of diffusion, using space probes 19 p3454 A66-36765
- Hydromagnetic wave induced variations in plasma velocity and magnetic field in interplanetary space measured by Mariner II 19 p3466 A66-36766
- Diurnal cosmic-ray anisotropy in studying temporal independence of small scale irregularities in interplanetary magnetic field 20 p3630 A66-37302
- Astronomical model for diffusion of galactic cosmic rays in solar system, based on zonal character of solar activity 20 p3630 A66-37329
- Final estimate of interplanetary magnetic field at 1 AU provided by Pioneer V uniaxial induction-coil magnetometer 20 p3649 A66-37336
- Magnetic intensity distribution, polarity and macrostructure of solar and interplanetary magnetic fields 20 p3635 A66-38218
- Ground magnetogram-IMP I data comparison and geomagnetic field effects on interplanetary magnetic field sector structure 20 p3657 A66-38219
- Phase anomaly detected by chemical test D during decreasing phase of last solar cycle 21 p3732 A66-38629
- Acceleration of high energy electrons by means of Parker-Wentzel version of Fernald mechanism due to geometry and distorted structure of interplanetary magnetic field near magnetopause in transition region 22 p3972 A66-40003

Dense particle population of Van Allen belts formed by interaction of high energy corpuscular radiation with interplanetary magnetic field and geomagnetic field 23 p4123 A66-41186

Interplanetary exploration space mission objectives, discussing magnetic fields, energetic particles, cosmic radiation, etc 24 p4264 A66-42660

Anisotropy of Forbush effect in ascertaining structure and intensity of interplanetary magnetic field 24 p4272 A66-43159

# INTERPLANETARY MONITORING PLATFORM /IMP/ S IMP

## INTERPLANETARY NAVIGATION

Manned interplanetary flight, emphasizing nonstop flybys past Mars and Venus, reviewing launch and departure modes, energy requirements, environmental control, navigation spacecraft power source, etc 08 p1286 A66-18561

Navigation, guidance and control of spacecraft in interplanetary space, considering free-fall flight and thrust-vector stabilization during accelerated flight 08 p1248 A66-18586

Electro-optical attitude and velocity sensors for interplanetary navigation and stellar aberration and Doppler shift measurements 08 p1252 A66-19502

Six midcourse guidance techniques, noting Earth-Mars and Earth-Venus trajectory with small and large injection error 13 p2123 A66-25252

Interplanetary midcourse navigation by measuring differential stellar aberration, using Space Velocity Meter /SVM/ 13 p2123 A66-25255

Navigation for spin stabilized deep space interplanetary spacecraft such as Pioneer VI, for missions to Venus, Mars and Jupiter 14 p2329 A66-28456

Optimization of midcourse velocity corrections, applying for variable-time-of-arrival guidance and determining optimum correction time as function of miss parameter 18 p3131 A66-33850

Optimized spacecraft control process eliminates gravitational field-caused nonlinearities by taking as control parameters osculating characteristics of planetocentric motion 18 p3242 A66-33851

Guidance and control systems of Mariner planetary spacecraft, noting requirements, flight performance, systems configuration, etc 18 p3242 A66-33852

Handbook on theory of space flight and navigation of spaceships in interplanetary space, emphasizing characteristics of space trajectories, rocket engines and space vehicles 21 p3812 A66-38947

## INTERPLANETARY PROPULSION CONFIGURATION

Optimization of guidance laws to achieve orbital rendezvous with propulsion system of only moderate throttling capability 01 p0100 A66-10027

Nuclear electric propulsion applied to manned Mars missions, presenting analytical tool to simultaneously optimize interplanetary vehicle design and trajectory [AIAA PAPER 65-414] 23 p4120 A66-41110

Optimization of guidance laws to achieve orbital rendezvous with propulsion system of only moderate throttling capability 24 p4235 A66-42766

## INTERPLANETARY SPACE

Scale of distances and masses in solar system, IR characteristics of Venus and interplanetary space fields and particles revealed by Mariner II 03 p0425 A66-12867

Staudte-Hoffmeister integral for abundance of sporadic meteoric bodies 03 p0427 A66-12921

Interplanetary plasma origin, behavior and effects on space flight studied by space probe 04 p0576 A66-13501

Diffusion coefficient of solar protons in steady state electromagnetic medium of interplanetary space increases with increase in proton momentum 04 p0574 A66-13839

Solar particles zones of incidence during maximum and minimum solar activity 05 p0751 A66-15376

Soviet and other literature on diurnal

variations of cosmic ray intensity used for analysis of electromagnetic conditions in outer space 06 p0949 A66-16587

Total radiation intensity in interplanetary space before and after solar events of March 29 and April 9, 1960 07 p1120 A66-17978

Solar corpuscular radiation behavior, including dynamics of origin at Sun 07 p1130 A66-18079

Energy sources of lunar luminescence noting effects of solar wind, corpuscular radiation, electromagnetic radiation and radioactivity 07 p1139 A66-18090

Propagation mechanisms of solar cosmic radiation in interplanetary space other than classical diffusion 09 p1438 A66-20212

Solar cosmic ray generation, interplanetary proton diffusion and stratospheric showers 10 p1595 A66-21045

Parameters of dynamic modulation determined from measurements of proton and alpha particle spectra, used in cosmic-ray modulation in interplanetary space 11 p1762 A66-22411

Cosmic ray variations and solar corpuscular stream in interplanetary space during March 1958 magnetic storm 12 p1940 A66-24164

Small cosmic ray bursts effect on geomagnetic activity and nature of high-energy solar cosmic ray propagation in interplanetary space 12 p1942 A66-24179

Staudte-Hoffmeister integral for abundance of sporadic meteoric bodies 14 p2380 A66-27270

Interplanetary-space temperature profile appropriate to uniformly expanding corona model 15 p2597 A66-29256

Mariner IV observation of 500-kev protons in interplanetary space 16 p2792 A66-30164

Celestial mechanics covering two-body problem, planetary and asteroid theory, interplanetary trajectories, lunar probe, spherical harmonics, etc 17 p2997 A66-32019

Solar corona and interplanetary plasma noting solar wind effect on comet tails and shock wave caused by interaction of geomagnetic field and plasma 17 p3000 A66-32272

Detection and measurement techniques for collisionless MHD shock wave propagation in interplanetary space, using bistatic-radar Earth-to-spacecraft transmissions 17 p3002 A66-32522

Solar flare electron propagation observations in interplanetary space 18 p3166 A66-34239

Solar wind - Conference, California Institute of Technology, Pasadena, April 1964 18 p3166 A66-34330

Mariner II data analysis on effect of magnetic field on radiation and high energy particles in interplanetary space and solar plasma 18 p3167 A66-34334

Solar wind observations with Explorer XII and IMP, noting periodic fluctuations in solar proton flux and detection of 3 mev electrons of interplanetary origin 18 p3167 A66-34335

Radio astronomy observations applied to solar wind problem, results include radial variation of electron density, size of coronal irregularities and coronal magnetic field direction 18 p3231 A66-34337

Collision-free hydromagnetic shock observed simultaneously in interplanetary space on October 7, 1962 by Mariner II and Explorer XIV 18 p3168 A66-34340

Isotopic changes in materials caused by high energy nuclear active particles and solar wind in interplanetary space and on Earth 18 p3176 A66-34750

Energy characteristics of 11-year cosmic ray variations, evaluating electromagnetic conditions in interplanetary space for proton, alpha particle and electron variations in energy 18 p3176 A66-34752

Relativistic gas expansion into intergalactic space noting energy content, modes of expansion and radio source distribution 18 p3236 A66-34761

Modulation effects in galactic and solar cosmic rays in interplanetary space 18 p3185 A66-34806

Gas tails of brighter comets that may reach 150,000,000 km in length reveal direction and velocity of solar

wind 19 p3452 A66-35797

Interplanetary medium and S-band telecommunications obtained from tracking data from Mariner II and Mariner IV spacecraft 20 p3520 A66-38187

Pioneer VI MIT experimental results on interplanetary plasma 20 p3657 A66-38210

Soviet papers on solar corona and corpuscular radiation in interplanetary space 21 p3812 A66-39119

Interplanetary space environment effect on surface thermal radiative properties, noting results of exposure to simulated solar plasma, solar UV, solar wind, etc 22 p3889 A66-40218

Antenna in interplanetary plasma, noting fluctuation noise in exosphere and radiation impedance when exposed to solar wind 22 p3877 A66-40466

Celestial bodies nature and structure effect on space flights, detailing interplanetary space properties and orbital motion 24 p4280 A66-43131

Interplanetary space and celestial observations from ground stations, satellites and space rockets 24 p4280 A66-43133

INTERPLANETARY SPACECRAFT

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 01 p0100 A66-10026

Spacecraft design for manned planetary missions, emphasizing early Mars landings 01 p0143 A66-10802

Cosmic ray telescope /CRT/ carried on Mariner IV Mars probe to measure flux and energy of protons and alpha particles in interplanetary space and near Mars 01 p0072 A66-11112

History of Mariner space program and discussion of future unmanned vehicles for exploration of interplanetary space 02 p0296 A66-11677

Rocket engine generated voltage as source of electromagnetic interference and electronic component damage on interplanetary vehicles 04 p0480 A66-13628

Requirements and performance expectations of chemical and nuclear propulsion systems for manned Mars and Venus missions 06 p0942 A66-16499

Study of protection requirements for resistance of meteorite penetration damage for various interplanetary spacecraft systems [AIAA PAPER 65-693] 08 p1303 A66-18807

Feasibility design study of solar powered ion propulsion system for interplanetary spacecraft [AIAA PAPER 66-214] 12 p1936 A66-24524

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 14 p2328 A66-27419

Recovery of interplanetary vehicles by low thrust braking outside atmosphere 14 p2391 A66-27472

Motion equations and simulation of spin-stabilized interplanetary spacecraft closed-loop pitch control system, using low-thrust gas jet torquers with rate gyro sensors 14 p2392 A66-27881

Spacecraft orientation during interplanetary flights, using system employing two rigidly connected telescopes, one aimed at Sun and other aimed at stars 15 p2447 A66-28506

Mariner program results of Venus and Mars exploration, discussing atmospheres, surfaces, exospheres, etc 16 p2798 A66-30359

Future spacecraft projects, emphasizing roles of space scientist and industrial manager as illustrated by using Jupiter flyby mission spacecraft design 16 p2808 A66-30364

Reliability, maintainability, and spacecraft safety in hypothetical manned Mars mission 17 p2930 A66-33174

Interplanetary manned spacecraft maneuvers including perihelion brake, off-perihelion acceleration and retromaneuvers and heliocentric planet-approach maneuvers [AIAA PAPER 65-695] 19 p3462 A66-35902

Maintenance on long-duration manned space flight facilitated by maintenance job aid information stored in high density retrieval and display system 19 p3309 A66-35950

## INTERPLANETARY TRAJECTORY

Spacecraft-comet rendezvous trajectory

analyzed in terms of comet properties and spacecraft capabilities to determine feasibility of interception mission  
[AIAA PAPER 63-413] 03 p0424 A66-12739  
Solution to boundary value problems associated with artificial satellite, lunar impact trajectory and interplanetary trajectory 04 p0579 A66-14445  
Mars capture probe planned for 1971 using willight orbit with optimization of payload, propulsion and trajectory 08 p1303 A66-18830  
Gravity assisted trajectories to solar system targets analyzed by two-dimensional solar system model  
[AIAA PAPER 66-10] 08 p1289 A66-18984  
Venus swingby used to decelerate manned spacecraft returning from Mars 10 p1609 A66-21928  
Earth departure plane change, interplanetary mission launches and launch windows 10 p1609 A66-21929  
Interplanetary trajectory adaptive gyrocompass system, discussing orbital angular velocity, angular acceleration, error sensitivity coefficients, error sources, etc 13 p2124 A66-25256  
Matching planetocentric and heliocentric low-acceleration trajectories in analysis of propulsion system performance 15 p2598 A66-29297  
Swing-by and capture-orbit trajectories for Mars or Venus exploration described by numerical methods 16 p2798 A66-30358  
NASA Voyager project, discussing planetary orbit design and selection and Mars orbiter trajectory 16 p2808 A66-30365  
Unmanned spacecraft trajectory and guidance considerations for close flyby of planet Mercury 16 p2801 A66-30885  
Matched asymptotic expansions and patched conics used to simplify flyby interplanetary trajectories  
[AIAA PAPER 65-689] 19 p3462 A66-35895  
Gravity assisted trajectories to solar system targets analyzed by two-dimensional solar system model  
[AIAA PAPER 66-10] 23 p4127 A66-41103  
Graphical construction and geometrical interpretation of particular analytical solution for determining ionic orbits subject to certain boundary conditions 24 p4277 A66-42685  
Trajectory characteristics for unmanned interplanetary missions, propulsion requirements for Earth departure and effect capture at target planets 24 p4277 A66-42686  
Interplanetary trajectories, considering gravity effect, free flight trajectory and forces acting on space vehicle 24 p4280 A66-43132  
INTERPLANETARY TRANSFER  
Fehlberg integration method used to calculate optimum interplanetary transfer orbits at low thrust 04 p0576 A66-13527  
Low energy transfer from Earth to Mars via Venus, considering launch window and planet orientation  
[AIAA PAPER 64-647] 18 p3227 A66-33812  
Steepest descent method of trajectory optimization for computing lunar and interplanetary transfer missions, noting terminal constraints 20 p3651 A66-37391  
Transfer paths to Mars via Venus compared with direct flight, discussing direct free fall transfer, flyby and free fall transfer 20 p3651 A66-37392  
INTERPOLATION  
SA COMPUTATION  
Zeros of general orthogonal polynomials as interpolation modes and relation to Jacksonian properties 07 p1058 A66-17865  
Stability of complex moment problems determined by constructing sequence of interpolation polynomials which converge uniformly to solution in bounded region 07 p1060 A66-18099  
Interpolation function of real variable, investigating process constructed for given system of points 09 p1394 A66-20456  
Deriving interpolatory type quadrature formula by inverting linear systems of differentiation formulas 09 p1395 A66-20622  
Carpet plotting technique for increased interpolation accuracy 13 p2031 A66-25363  
Minimal element determination for certain set related to interpolation of second-order

linear ordinary differential equations 18 p3126 A66-33954  
Erdos and Turan theory of fine and rough convergence of interpolation and quadrature processes 18 p3127 A66-34543  
Lacunary interpolatory polynomials, and Mth derivatives prescribed in roots of unity, examining Dini-Lipschitz condition for convergence 18 p3127 A66-34638  
Auxiliary polynomials for direct determination of Chebyshev interpolation polynomial 19 p3389 A66-35936  
INTERPRETATION  
SA PHOTOGRAPH INTERPRETATION  
Image interpretation in manned space surveillance systems 18 p3060 A66-33742  
INTERSTELLAR COMMUNICATION  
Search via laser receivers for interstellar communications 06 p0892 A66-16669  
Search for intelligent signals from space 12 p1880 A66-23894  
Propagation of radio waves in interstellar medium and Earth atmosphere and effect on visible angular dimensions 12 p1814 A66-23897  
INTERSTELLAR GAS  
General dynamical effects of suprathermal gas particles on hydromagnetic wave propagation in interstellar space 05 p0749 A66-15275  
Origin of solar system, discussing monistic and dualistic theory, interstellar gas characteristics, star formation and planetary development 05 p0767 A66-15756  
Solar magnetic field may have originated during process of Sun formation from galactic magnetic field which pervaded interstellar gas from which Sun condensed 08 p1292 A66-19261  
Discrepancy between theoretical calculation and measurement of far UV radiation from hot stars 10 p1598 A66-21094  
IR emission lines possibly originating from galactic, interstellar and stellar hydrogen regions 10 p1599 A66-21113  
Data on large-scale distribution of interstellar hydrogen important for studies of spiral arms and galactic disk 11 p1766 A66-22257  
Interstellar molecular hydrogen abundance and possible source from giant stars 13 p2182 A66-25579  
Book on interstellar gas dynamics 14 p2378 A66-26807  
Formulae relating 21-cm emission intensity to density of interstellar hydrogen gas 14 p2383 A66-27799  
Astronomical satellite application to sky mapping, stellar photometry, interstellar grains and gas study and statistical stellar sampling 15 p2594 A66-28987  
Irregularity of galactic magnetic field structure in vicinity of Sun indicated by starlight polarization, interstellar cloud motion and Milky Way photography 15 p2595 A66-29130  
Energy dissipation channels of nuclear and electron components of cosmic rays in Galaxy and Metagalaxy 15 p2576 A66-29131  
Solar wind computations beyond one angstrom, noting shock wave formation indicating hot tenuous gas region surrounding solar system 15 p2576 A66-29229  
Interstellar medium survey including cloud structure and velocity field of interstellar gas, galactic magnetic field, etc 16 p2799 A66-30575  
Interstellar plasma wave damping by relativistic suprathermal particles, noting magnetosonic and Alfvén waves 17 p2996 A66-31915  
Presence and detectability of hydrogen in molecular form in galaxy 17 p3001 A66-32365  
Control of abundance of neutral hydroxyl radical in unionized interstellar gas 17 p3003 A66-32658  
Virial theorem study of magnetic field effect on gravitational instability of primeval gas cloud, noting possibility of collapse upon change in magnetic flux 17 p3005 A66-33002  
Proton energy density, pressure and compressibility of galactic cosmic ray gas 18 p3165 A66-34140  
Low rigidity end of differential power spectra of proton and helium components of primary cosmic radiation, considering ionization loss and interaction with

interstellar hydrogen 18 p3189 A66-34830  
Principle source of radiative energy loss in intergalactic medium in spectral region from 2 to 18 angstroms is line emission from ions of elements oxygen, carbon, neon, magnesium and silicon 18 p3237 A66-35046  
Delta electrons formed in interstellar hydrogen-galactic ray collision 19 p3452 A66-35283  
Galactic magnetic fields, considering magnetic flux, frequency of fields in radio galaxy, disk, interstellar gas dynamics and spiral structure 20 p3645 A66-36958  
Nonrelativistic equations of bulk motion of relativistic /cosmic ray/ gas derived by taking moments of collisionless Boltzmann equation 20 p3649 A66-37327  
Molecular hydrogen structure, considering planetary and stellar atmospheres and interstellar space 21 p3815 A66-39487  
Thermal instabilities role in star formation, discussing intercloud medium, magnetic pressure and gravitational collapse 23 p4125 A66-41062  
INTERSTELLAR MAGNETIC FIELD  
Interstellar and intergalactic plasma instability effects on energy distribution functions, cosmic ray diffusion and direction and interspace field interaction 08 p1285 A66-19448  
Virial theorem study of magnetic field effect on gravitational instability of primeval gas cloud, noting possibility of collapse upon change in magnetic flux 17 p3005 A66-33002  
Interstellar and intergalactic plasma instability effects on energy distribution functions, cosmic ray diffusion and direction and interspace field interaction 18 p3169 A66-34477  
Dynamical requirements for existence of interstellar magnetic field in solar neighborhood 23 p4124 A66-41812  
INTERSTELLAR MATERIAL  
SA COSMIC DUST  
SA INTERPLANETARY DUST  
Interstellar and intergalactic gas, dust and magnetic fields 05 p0765 A66-15381  
Detection of 3.1 micron  $\mu$  cepheid absorption band due to interstellar ice particles 05 p0768 A66-15770  
Growth and destruction of ice mantles on interstellar graphite grains by sputtering, thermal evaporation and cloud collisions 05 p0765 A66-15845  
Mie scattering calculation to support theory that interstellar extinction is caused by graphite particles 08 p1288 A66-18786  
Elongation of characteristic curve of polarization for interstellar particles due to surface molecular scattering 11 p1769 A66-22535  
IR radiation from interstellar grains, measuring intensity as wavelength function and radiation polarization for information on grain temperature and composition and galactic magnetic fields 14 p2377 A66-28122  
Hyperbolic comets and Oort hypothesis of cometary cloud, discussing probability distribution and existence of interstellar source 17 p3013 A66-33406  
Solar wind proton, solar flare proton and galactic ray effect on interstellar solids /comet/ 17 p3013 A66-33409  
Dynamical aspects of Oort hypothesis on cometary origin 17 p3014 A66-33413  
Interstellar molecules relation to corresponding cometary phenomena 17 p3014 A66-33415  
Plane interstellar polarization dependence on wavelength observed in 18 stars with UV and IR filter 18 p3235 A66-34657  
Total cross sections for arbitrarily oriented dielectric circular cylinders used in obtaining extinction and polarization by realistically oriented interstellar particles, noting refractive index 20 p3649 A66-37325  
Corpuscular radiation from UV Ceti stars assumed to be mainly protons, noting role of interstellar matter 20 p3652 A66-37611  
Spiral patterns of disk-like galaxies explained in terms of density waves that are collective modes of stellar system analogous to plasma waves 24 p4273 A66-42266  
Source spectra and composition of galactic cosmic rays implied by analysis of interstellar and interplanetary travel, noting

solar modulation 24 p4265 A66-42716

**INTERSTELLAR MICROWAVE SPECTRUM**

Galactic center dynamics revealed by hydroxyl radicals present in interstellar medium, noting detection of radio emissions caused by star-excited atoms and molecules 09 p1453 A66-20239

Observational needs for galactic research, discussing stellar luminosity, interstellar absorption, etc 15 p2594 A66-28986

Maser amplifier based on UV continuum pumping from nearby stars, explaining 18-cm OH emission from anomalous H-2 regions 24 p4280 A66-43042

**INTERSTELLAR RADIATION**

Observation of plane interstellar polarization of 22 stars indicates wavelength dependence of position angles and polarization 02 p0292 A66-12188

Secondary protons from interstellar cosmic-ray collisions, noting solar modulation effects on detection 05 p0747 A66-14796

RF spectrum of OH radiation in interstellar space, including emission intensity and linear polarization 11 p1774 A66-22963

Astronomical model study of physics of penetration of interstellar cosmic rays into solar system 18 p3168 A66-34342

Balloon-borne nuclear emulsion detection of finite fluxes of low energy cosmic ray heavy nuclei and interstellar cosmic radiation propagation 18 p3191 A66-34838

Differential spectra of charge components of primary cosmic ray heavy nuclei at different solar modulation levels and effects of interstellar propagation 18 p3191 A66-34839

Stimulated emission processes interpreting OH microwave emission from points in sky, using anisotropic UV radiation which leads to molecule alignment and population inversion 20 p3650 A66-37343

Interstellar X-ray absorption edges due to K-shell photoionization of oxygen and neon, using element abundances and atomic photoelectric cross section data 21 p3809 A66-38658

Diameters and positions of three sources of 18-cm OH emission determined, using 90-ft steerable paraboloids 21 p3814 A66-39269

Cosmic ray modulations in solar system and in interstellar space, presenting graphs of rigidity spectra of protons and helium 22 p3973 A66-40524

**INTERSTELLAR SPACE**

Goals of future space exploration including atmospheric studies, solar activity effects, planetary characteristics and interstellar space interaction effects 02 p0291 A66-12071

Interstellar extinction in UV by measurement of stellar energy distributions between 3000 and 1200 angstroms 08 p1288 A66-18787

Galactic center dynamics revealed by hydroxyl radicals present in interstellar medium, noting detection of radio emissions caused by star-excited atoms and molecules 09 p1453 A66-20239

Spectra of generically related cosmic ray species 09 p1443 A66-20688

Propagation and attenuation of radio waves in interstellar and near solar space 09 p1348 A66-21014

Interstellar polarization measurement for eight stars 13 p2185 A66-25811

Interstellar space navigation, considering problem of observables, navigation schemes and instrumentation 21 p3767 A66-38894

**INTERSTELLAR TRAVEL**

Interstellar travel using ramjet technique and interstellar gas in conjunction with nuclear fusion 06 p0953 A66-16073

Interstellar vehicle propelled by terrestrial laser beam 19 p3449 A66-35488

Book on possibility of extrasolar intelligence covering origin of planetary systems, development of life and terrestrial biological evolution 20 p3506 A66-37305

**INTERSTITIAL ATOM**

Tungsten single crystal structure and mechanical properties as affected by saturation of carbon, oxygen and nitrogen 01 p0089 A66-10998

Tungsten single crystal study by electron microdiffraction for distribution and effects of interstitial phases 03 p0385 A66-13194

Lattice vacancies and interstitials in II-VI

compounds of cadmium sulfide and zinc selenide caused by electron bombardment often determine advantages or limits of material 06 p0935 A66-17130

Electronic states of single defects in diamond calculated by comparing electronic states of single vacancies and single interstitial carbon atoms 06 p0938 A66-17148

Heat transfer between two metallic cylinders in close contact, examining effect of interstitial gas on thermal contact resistances 07 p1149 A66-17452

Concentration dependence of thermodynamical functions of interstitial solid solutions, calculating energy of formation 08 p1258 A66-18897

Equation for entropy of formation of interstitial solid solution with two interstitial sublattices, using phase diagram for constants in free energy and activity equations 08 p1258 A66-18903

Anisotropy of Snoek relaxation measured for oxygen and nitrogen in niobium 10 p1576 A66-21554

Interference maxima changes in X-ray photographs of neutron irradiated metals attributed to interstitial atoms in lattice 13 p2106 A66-25332

Lattice defect distribution effect on degradation of solid solution of interstitial impurities in cast molybdenum 16 p2727 A66-31530

O-O and O-N clusters in niobium detected via internal friction and elastic aftereffect measurements, noting equilibrium, kinetic properties, binding enthalpy, etc 18 p3121 A66-33728

Elastic relaxation effect due to diffusion of interstitial hydrogen in tantalum and niobium 18 p3123 A66-34058

Thermal conductivity of finely divided and granular materials through solid phase and interstitial gas or by radiation between granules 21 p3835 A66-38768

**INTESTINE**

**SA DIGESTIVE SYSTEM**

**SA GASTROINTESTINAL SYSTEM**

Stress and dietary influence on direct oxidative pathway of carbohydrate metabolism in jejunal mucosa of rats 16 p2641 A66-31383

**INTRUDER AIRCRAFT**

**S A-6 AIRCRAFT**

**INVARIANCE**

**SA GAUGE INVARIANCE**

Conditions that principal invariants of tensor must satisfy to be symmetric or orthogonal 12 p1902 A66-23948

Invariant hyperplanes for linear dynamical systems, discussing geometric properties and relation to controllability and observability 12 p1849 A66-24256

UHF transistor design and performance, noting power gain, stability, low noise figure and correlation between circuit invariants and transistor parameters 13 p2038 A66-25560

Invariance principle applied to motions of material particle that do not depend on particle mass 13 p2127 A66-25625

Synthesis of correcting units for automatic control systems, using quasi-invariance condition 15 p2476 A66-29995

Invariance effect for finite number of coordinates in infinite dimensional automatic control system 19 p3325 A66-35986

Synthesis of control systems invariant to parameter changes, examining sensitivity and advantages over self-adjusting systems 19 p3328 A66-36023

Stability, reproducibility and sensitivity of combined systems of automatic control with variable structure determined by presence of sliding mode region 19 p3329 A66-36025

Coordinate control theory of self-adapting systems, considering problems of sensitivity, optimization and invariance 20 p3535 A66-36852

Group theory of invariance of finite linear state-variable transformations generating new linear dynamic system and application to electric network 20 p3539 A66-38147

Theoretical interpretation of expansions in nonzero determinants formed from vertex and circuit matrices 20 p3539 A66-38283

**INVARIANT IMBEDDING**

Second-order linear partial differential equation transformed to normal form, obtaining invariant representation without

Ricci calculus 07 p1055 A66-1730

Existence and uniqueness theorems for invariant-imbedding nonlinear ODE system for absorption loss rate satisfying Lipschitz condition 07 p1059 A66-1797

Fluctuation problem in electromagnetism cascade theory analyzed, using invariant imbedding method 07 p1083 A66-1797

Invariant imbedding in transport processes and theorems of uniqueness and existence for derived hyperbolic equation 09 p1393 A66-1990

Internal diffuse radiation field computed in finite homogeneous isotropically scattering slab illuminated by parallel rays 10 p1556 A66-219

Nonlinear circuit theory, discussing invariant imbedding, dynamic programming and quasi-linearization 11 p1675 A66-2262

Mathematical programming methods for solving nonlinear state-constrained discrete optimal control problems 13 p2047 A66-2538

Invariant imbedding as basis for integration theory for canonical equations of motion with parallels to Jacobi's theory 17 p2947 A66-3250

Intensity of emergent radiation in finite homogeneous slab absorbing and scattering it isotropically, viewed as boundary value problem determined by imbedding techniques 17 p3037 A66-3300

Sensitivity analysis and Liapunov stability discussing correctly set problem and parametric imbedding within theory of partial differential equations 19 p3326 A66-3600

Sensitivity analysis and invariant imbedding, discussing application to adaptive control theory and reduction of boundary value problems to initial value problems 19 p3326 A66-3600

Nonlinear filtering theory based on invariant imbedding for orbit determination and adaptive control problems 19 p3303 A66-3624

Laplace integral application to inversion of three solar limb-darkening curves obtained in UV 19 p3464 A66-3628

First- and second-order constitutive equations of viscoelasticity based on mechanical and invariant theory, discussing relaxation under finite twist of incompressible isotropic bar 19 p3475 A66-3662

Acquisition phase of attitude control function of space vehicle, using noise measurements on one state 20 p3658 A66-3686

Invariant imbedding and scattering of light in one-dimensional medium with moving boundary, noting relaxation of photoemission and Doppler frequency shift 23 p4087 A66-4154

**INVENTORY CONTROL**

Air cargo transport development, and freight classification and inventory balancing 15 p2620 A66-2979

**INVERSION**

**SA POPULATION INVERSION**

Capacitance-voltage characteristics of anodized InSb surface measured, using metal oxide semiconductor method 03 p0411 A66-1300

Inversion of Hilbert type matrix for finite and infinite cases 10 p1550 A66-2134

Matrix inversion algorithm from Cayley-Hamilton 11 p1724 A66-2340

Radius of convergence of power series obtained by inversion of universal Kepler equation 17 p3001 A66-3234

Charge distribution in thermally grown silicon dioxide and silicon n-type inversion layer 22 p3962 A66-4008

**INVERTER**

**SA STATIC INVERTER**

Worst case design of diode transistor logic inverters, considering resistor end-of-life tolerance, supply voltage variations and minimum beta of switching transistor 10 p1508 A66-2128

Operational characteristics of LC tuned solid state static inverter used as power supply in autopilot gyros of Titan rocket, noting power oscillator circuit 12 p1804 A66-2466

Three-phase half-wave inverter circuit consisting of ring of three SCRs and converting DC into AC power supplied into

azag motor load 12 p1804 A66-24662  
 Transistor inverter with 80 percent efficiency for 400 mv source voltage, noting simplicity of design 17 p2848 A66-31810  
 Inverter with integrated components and direct coupled inverter circuit not needing transformers for space  
 Applications 22 p3880 A66-40740  
 Dual-element power devices for solid state inverters, evaluating potential hazards of reverse second  
 Breakdown 22 p3881 A66-40741  
 Integrated circuit arrays for solid state inverters, noting Johnson counter and packaging 22 p3881 A66-40742  
 Analytic model for describing operation of Parzolf tunnel diode  
 Inverter 24 p4187 A66-43181  
**INVESTMENT CASTING**  
 Investment castings in advanced high strength steels and titanium alloys, noting reliability and quality control  
 [SAE PAPER 650770] 05 p0688 A66-15009  
 Capability of investment casting process in production of integrally cast turbine wheels and nozzles for high temperature gas turbine application  
 [SAE PAPER 650706] 07 p1037 A66-17249  
 Investment cast 17-4PH incorporated into actuating and supporting mechanism double loop leading edge of wing of F-8E/FN/French Crusader 17 p2929 A66-32693  
**INVISCID FLOW**  
**A VISCOUS FLOW**  
 Chemical reaction occurring between low temperature plasma jet and nearly inviscid fluid /water/ 02 p0264 A66-11388  
 Introductory book on hypersonic aerodynamics covering continuum flow of inviscid nonequilibrium perfect gas and real gas, viscous and low density effects in hypersonic flow 02 p0176 A66-11875  
 Stabilization of inviscid pure-vortex flow with finite conductivity, using axially applied magnetic field  
 [AIAA PAPER 64-435] 03 p0399 A66-12787  
 Dissociation or ionization effects of air on inviscid hypersonic flow past circular cone with attached shock wave 03 p0316 A66-12928  
 Numerical solutions for inviscid nitrogen gas flows over circular cylinder where nonequilibrium prevails through nose region 03 p0317 A66-13211  
 Hydrodynamic instability of shear layers, using inviscid linearized stability theory of partially growing  
 Disturbances 04 p0513 A66-14474  
 Flow function equations for transonic flow past closed profile  
 Contours 07 p0982 A66-18121  
 Asymmetric hypersonic blunt body problem of determining two-dimensional steady rotational flow field between profile and detached shock 07 p0982 A66-18132  
 Surface pressure, heat transfer coefficient, wave structure and shock disturbances of inviscid supersonic flow field along corner of intersecting wedges  
 [AIAA PAPER 66-128] 07 p0984 A66-18462  
 Stability of frictionally heated Couette and Poiseuille flows, specifically Couette flow in inviscid limit 08 p1204 A66-18527  
 Clear air turbulence, considering energy source by transfer from large to small flow in gravity wave spectra, noting shear role and motion equations 10 p1552 A66-21289  
 Hypersonic flow of air past circular cylinder with nonequilibrium oxygen dissociation, including dissociation of free stream 10 p1479 A66-21375  
 Numerical method for calculating flow, including gas reactions and nonequilibrium, behind given axisymmetric detached shock wave 10 p1481 A66-21892  
 Inviscid flow of compressible conducting gas with aligned magnetic field through axially symmetric Laval nozzle in various transition regions 11 p1636 A66-23256  
 Shock layer approximation used in inverse hypersonic blunt body  
 Problem 12 p1795 A66-23574  
 Inviscid hypersonic flow over compression side of delta wing of moderate aspect ratio 12 p1796 A66-23605  
 Steady state expansion of gas into vacuum, considering continuum inviscid analysis, collision-free analysis, supersonic flow and hypersonic limits, etc, for spherical and

cylindrical symmetry 12 p1860 A66-23607  
 Analytic design of turbine blades based on inviscid isentropic supersonic vortex flow theory and performance in  
 cascades 12 p1796 A66-23800  
 Stability of plane inviscid jet and wake studied for possible growth in downstream spatial direction 12 p1865 A66-24582  
 Long finite amplitude wave motions and interactions in inviscid fluid  
 flows 15 p2478 A66-29242  
 Direct numerical method for calculation of supersonic inviscid flow about axisymmetric blunt body at large angle of attack [AIAA PAPER 65-24] 15 p2423 A66-29269  
 Displacement and heat transfer effects of laminar and turbulent boundary layers far downstream in slowly expanding hypersonic nozzle, determining inviscid core  
 flow 15 p2424 A66-29273  
 Inviscid and viscous flow in central core of supersonic free jet in wind tunnel, noting shock wave location at high Reynolds number 16 p2628 A66-30375  
 Behavior of inviscid supersonic conical flow fields near crossflow stagnation points studied by constructing coordinate expansions of exact conical flow equations [AIAA PAPER 66-491] 16 p2631 A66-31494  
 Self-similarity criteria in radiative flow for unsteady one-dimensional inviscid flow of perfect gas 17 p3034 A66-32471  
 Head wave of frictionless flow of real gas past positioned circular cone for small or zero angles of attack 17 p2842 A66-33169  
 Method of characteristics computer code applied to partial differential equations of inviscid fluid, calculating flow fields [AIAA PAPER 66-412] 18 p3097 A66-33637  
 Partial differential equations for three-dimensional inviscid flow solved for flow field over blunt body shapes at various angles of attack, for application to Apollo spacecraft  
 [AIAA PAPER 66-413] 18 p3045 A66-33638  
 Channel flow general equations including nonviscous uniform flow, steady flow, stagnation state and speed of sound in ideal gas 18 p3098 A66-34121  
 Boundary layer of steady incompressible plane crossed fields MHD flow at large Reynolds number 18 p3147 A66-34663  
 Newton law for simple inviscid fluid using Hamilton principle, emphasizing physical interpretation of  $\Gamma$   
 constraint 18 p3102 A66-34922  
 Hamilton principle applied to force equation for nonrelativistic and relativistic flow of compressible inviscid fluid with polarization and magnetization in connection with electromagnetic  
 momentum 18 p3102 A66-34923  
 MHD flow past semi-infinite plate under conditions where viscosity is  
 destroyed 20 p3609 A66-37537  
 Flutter of infinitely long panel of finite width with upper surface exposed to inviscid flow, noting critical wavelength and flutter velocity 21 p3827 A66-38691  
 Inviscid hypersonic nonequilibrium flow of three-component gas past circular cone, using exact reaction-rate equations to correct solution first obtained from approximate equations 21 p3693 A66-38711  
 Sufficient conditions for instability against small oscillations of symmetric laminar flow of inviscid incompressible perfect magnetofluid 21 p3791 A66-39169  
 Pseudoviscosity method using finite difference equations for calculating two-dimensional flow fields for supersonic motion of inviscid gas 22 p3901 A66-40494  
 Surface mass transfer effect for supersonic flow over cone, examining solution of equations of motion for inviscid compressible gas with velocity field normal to surface of inner cone 23 p4011 A66-41898  
 Inviscid flow model for stagnation region behind strong shock, examining inviscid energy for radiating gas including self-absorption effects 23 p4150 A66-41906  
 Inviscid flow near stagnation point of blunt body in hypersonic stream, using thin shock layer theory with very small density ratio 23 p4013 A66-42013  
 Three-dimensional oscillatory vortex instability in uniform inviscid rotating fluid 23 p4061 A66-42043

Experimental verification of stability criteria for incompressible inviscid flow with helical streamlines, using rotating cylinders 23 p4062 A66-42046  
**IODATE**  
 Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluoro iodo methylidyne 06 p0892 A66-16771  
 Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluoriodo methylidyne 19 p3372 A66-35368  
**IODIDE**  
 SA SILVER IODIDE  
 SA SODIUM IODIDE  
 Oxygen inhibition of grain boundary movement and stabilization of optical transmission in cuprous iodide thin film 23 p4110 A66-41152  
 Thermally initiated reaction between tert-butyl iodide and tetrafluorohydrazine provides synthetic route to tert-butyl difluoramine 23 p4118 A66-41234  
**IODINE**  
 Kinetics of reactions in iodide method of growing epitaxial germanium layers 08 p1268 A66-18797  
 Iodine evaluated as working fluid in supersonic wind tunnel through study of iodine dissociation process 11 p1683 A66-22594  
 Solar nucleosynthesis of extinct isotopic iodine, noting incorporation of Nakhilic meteorite material and subsequent decay into fissionogenic xenon 18 p3225 A66-33623  
 Hall effect in poly-n-vinylcarbazole-iodine charge-transfer complex, noting sign discrepancy of majority carrier 22 p3963 A66-40109  
 Transitions of first two band systems of iodine excited in argon suitable for laser action 23 p4079 A66-42085  
**ION**  
 S CESIUM ION  
 S FERRIC ION  
 S FREE RADICAL  
 S HEAVY ION  
 S HYDROGEN ION  
 S METAL ION  
 S NITROGEN ION  
**ION-ATOM INTERACTION**  
 Oxygen impurity atom interaction with radiation-induced defects in germanium over wide temperature range, producing optically active oxygen defect complexes 02 p0272 A66-11486  
 Wave function, polarization and decay of negative ion atoms in electric field 03 p0395 A66-12833  
 Interaction mean free path of nuclear-active particles in iron determined by measuring number of interactions in each iron layer in ionization calorimeter 07 p1115 A66-17550  
 Electromagnetic isotope separators used in nuclear physics for analysis of ion-matter interaction 08 p1257 A66-18694  
 Electron loss rate dependence on internal excitation and deactivation processes in F region ion-molecule reactions 08 p1218 A66-19405  
 Specific reaction rates measured as function of ion energy for low energy ion-molecule reaction 08 p1259 A66-19698  
 Intensity variation of 6300 angstrom night airglow and rate coefficient of ion-atom interchange reaction 09 p1372 A66-20381  
 Reaction rate of atomic oxygen with nitrous oxide in shock tube at high temperatures 11 p1649 A66-22881  
 Perturbation effects in differential elastic ion-atom scattering generated by crossing of molecular states from even potentials 11 p1740 A66-22972  
 Ion beam elastic scattering cross section for proton-helium systems 14 p2337 A66-27978  
 Intensity of oxygen red line in night airglow analyzed, obtaining temperature dependence of rate coefficients of ion atom interchange reaction and collisional deactivation, noting red line intensity dependence on solar activity 15 p2484 A66-28905  
 Mass spectrometric investigations of interaction of atmospheric ions with molecules of rocket gas

- release 15 p2495 A66-30061  
Fast ion molecule reaction in carbon dioxide analyzed, using mass spectrometer 16 p2645 A66-30116  
Electron secondary emission from interaction of ion, atom and molecular energetic beams with solids, especially when kinetic energy is significant 16 p2776 A66-30796  
Collision integrals calculated for interactions Li-H, Li-Li, H-H and H-H plus in LiH system 16 p2766 A66-31612  
Composition of cosmic rays of supernova origin, noting limited mixing and enrichment of elements of outer layer with thermonuclearly synthesized core substances due to shock acceleration 18 p3177 A66-34755  
MHD power generator in which ionization of alkali atoms occurs by collision with excited noble gas atoms, calculating velocity-dependent cross section 19 p3406 A66-35436  
Wave function, polarization and decay of negative ion atoms in electric field 19 p3404 A66-36775  
Instrumentation for plasma diagnostics noting electron density profile, temperature, ion-atom and electron-atom interaction, etc 20 p3556 A66-36964  
Ionospheric ion-molecular reaction rates, discussing various measurement results 21 p3734 A66-39319  
Reaction rates for charge transfer reactions of carbon monoxide with oxygen and carbon dioxide measured at 300 degrees K in pulse-discharge flowing afterglow system 22 p3859 A66-39907
- ION BEAM**  
Noble gas ion beams produced by duoplasmatron magnetically analyzed while varying gas pressure in source 01 p0114 A66-10850  
Duoplasmatron with electrostatic lens decreasing ion energy while focusing ions for maximum density parallel beam 01 p0114 A66-10851  
Charge distribution in ion beams after passage through nitrogen and inert gases 02 p0267 A66-11724  
Nonlinear theory LF oscillation excited in magnetoplasma by ion beam 02 p0268 A66-11779  
Interaction mechanisms of neutralized beam of ions and two symmetric neutralized ion beams flowing parallel to magnetic field 03 p0404 A66-12979  
Neutralizer configurations, immersed and withdrawn filaments, for given ion gun based on two-dimensional computer simulation of ion-beam neutralization [AIAA PAPER 65-380] 05 p0723 A66-15168  
Stability of monoenergetic ion beam injected across magnetic field into plasma-filled magnetic trap, noting oscillation excitation 06 p0914 A66-16142  
Plasma emission properties of vacuum spark when producing high current H and D ion beams 06 p0919 A66-16884  
Turbulent condition in plasma beam with virtual cathode characterized by electric field oscillation spectrum, off-center plasma torch spinning into ion side and ion acceleration 08 p1264 A66-19270  
Electron bombardment ion thrusters with two accelerator-grid systems for producing ion beams in directions 180 or 90 degrees apart [AIAA PAPER 66-248] 10 p1593 A66-21457  
Microthruster ion engine system with thrust vector control, using ion beam deflection [AIAA PAPER 66-204] 12 p1937 A66-24526  
Synthesis of plasma by ion beam bombardment, discussing electrostatic instabilities and collisional and noncollisional damping 14 p2339 A66-26816  
Neutralizer configurations, immersed and withdrawn filaments, for given ion gun based on two-dimensional computer simulation of ion-beam neutralization [AIAA PAPER 65-380] 14 p2342 A66-27411  
External injection of ions into cyclotron, examining case of injection of beam in median plane of magnet 14 p2347 A66-28310  
High intensity sharply-focused ion beam from plasma expansion ion source 15 p2552 A66-29405  
Stability of monoenergetic ion beam injected across magnetic field into plasma-filled magnetic trap, noting oscillation excitation 15 p2556 A66-29872  
Ion beam velocity measurement, using radial electric and tangential magnetic field 16 p2701 A66-30347  
Multistage ion gun using separate acceleration and deceleration stages and eucriptite or spodumene emitters 16 p2760 A66-30428  
Quasi-linear theory of plasma cyclotron instability for one-dimensional oscillation spectrum, noting energy of interaction with electromagnetic field, ion velocities, etc 16 p2762 A66-31172  
Positive ion beam polishing of optical surfaces 17 p2958 A66-32625  
Two-stream instability for longitudinal waves in plasma traversed by ion beam 18 p3148 A66-34909  
Hydrogen density in coaxial plasma injector prior to application of high voltage to electrodes, noting experimental setup and results 18 p3151 A66-35072  
Instrument for continuous variation of angle of incidence between ion beam and axis of RF quadrupole mass spectrometer from zero to 90 degrees 20 p3561 A66-38174  
Ion beam interaction with electron plasma and resultant parameter changes and cyclotron instability 21 p3783 A66-39026  
Operation and design principles of mass spectrometer using system of diaphragms and modulators to extract well-constrained ion bunch from plasma beam 21 p3784 A66-39031
- ION BOMBARDMENT**  
Range formula calculation of neodymium ion concentration in two samples of CdS crystals after bombardment at 200 kev Nd ion energies 01 p0126 A66-10970  
Construction problems of continuous-duty DC excited ion lasers 04 p0530 A66-13956  
Temperature, annealing time and radiation dosage effect on electroconductivity of inversion layers generated in n-type silicon during bombardment with boron ions 05 p0730 A66-14646  
Neutron activation and cesium-aluminum sputtering in oxygenated gas atmosphere [AIAA PAPER 66-77] 06 p0913 A66-17103  
Ion damage and successive annealing of germanium observed by electron microscope 07 p1097 A66-17528  
Induced electric conductivity in germanium bombarded by potassium ion in different crystallographic directions 07 p1104 A66-18363  
Formation of photoelectric converters of solar energy by penetration of high-energy phosphorus ions into p-type silicon 07 p1105 A66-18367  
Contact-making process in cadmium sulfide crystals, examining influence on plasma electron efficiency in glow discharge effect 08 p1272 A66-19243  
Electron excitation in germanium by alkali metal ions, noting effect on electrical conductivity 10 p1587 A66-22154  
Temperature, annealing time and radiation dosage effect on electroconductivity of inversion layers generated in n-type silicon during bombardment with boron ions 13 p2167 A66-25921  
Surface blistering of metals due to low energy hydrogen ion bombardment, determining solar absorptance change in gold-plated specimens 14 p2316 A66-28007  
Secondary emission of excited cesium atoms during bombardment of molybdenum and tantalum by fast cesium ions 14 p2338 A66-28248  
Damaged depth in germanium thin films induced by bombardment with low energy argon ions measured, using differences in sputtering yield for given energy 15 p2561 A66-28705  
Radioactive tracer technique to measure yield and angular distribution of copper sputtered from monocrystalline target subject to cesium ion bombardment [AIAA PAPER 65-379] 15 p2566 A66-29290  
Ion bombardment damage of molybdenum sulfide lattice studied by transmission electron microscopy, noting broadening of extinction contours and dislocation lines 15 p2567 A66-29404  
Fast emitted and reflected particles during ionic bombardment of metallic surfaces, considering two-atom collision rules, light emission, ion scattering, etc 16 p2753 A66-30798  
Change in resistance of titanium film deposited in high vacuum from argon ion bombardment, noting dependence on energy value 16 p2789 A66-3178  
Exchange reactions of charges appearing when beam of fast ions passes into thin gas target, examining characteristics of source of high energy neutral particles 17 p2961 A66-3294  
Radiation-induced electroconductivity and secondary emission in alkalal halide single crystals under positive ion bombardment 17 p2988 A66-3341  
Energy distribution of electrons emitted from alkali halide films on Mo substrate during positive helium and argon ion bombardment 17 p2988 A66-3345  
Sputtering yields of various semiconducting single crystals under argon ion bombardment 19 p3436 A66-3542  
Temperature dependence of sputtering yields of germanium under low energy ion bombardment, observing atom ejection patterns above annealing temperatures 19 p3436 A66-3542  
Electron excitation in germanium by alkali metal ions, noting effect on electrical conductivity 19 p3440 A66-3576  
Anisotropy of secondary electron emission in ion bombarded Si single crystals, using electron microscope 19 p3445 A66-3634  
Dislocation dipoles produced by ion bombardment of thin gold films, noting that during annealing dipoles can condense to form only one dipole 19 p3447 A66-3672  
Germanium damage due to low energy He, Ne, Ar and Kr ion bombardment 20 p3623 A66-3838  
Atom ejection patterns for sputtering of semiconductor single crystals 22 p3963 A66-4008  
Reverse breakdown voltage increase resulting from ion drift in silicon p-junctions formed by sodium ion bombardment 24 p4257 A66-4262
- ION CHAMBER**  
Small lightweight ion chamber dosimeter for monitoring radiation exposure to spacecraft crew members 05 p0676 A66-1465  
Rigidity response of ionization chambers in high atmosphere and deep space for study of rigidity dependence of solar cycle modulation of primary cosmic ray 18 p3179 A66-3476  
Cosmic ray ionization intensity measurement using special ion chamber 24 p4264 A66-4260
- ION CHARGE**  
Rate coefficients of ion charge exchange reaction between atomic oxygen ions and oxygen-nitrogen molecules measured at thermal energies by afterglow method 02 p0263 A66-1150
- ION CURRENT**  
Ionization currents in diamond exposed to pulsed excitation and to applied pulse electric field 10 p1586 A66-2215  
Quasi-stationary distributions of potential in one-dimensional ion-electron current near emitting surface, noting unstable regimes regarding slow variations in boundary conditions 14 p2338 A66-2877  
Electron-ion current partitioning effect efficiency of pulsed plasma accelerators due to viscous drag caused by ions carrying current to cathode [AIAA PAPER 65-335] 18 p3147 A66-3458  
Ionization currents in diamond exposed to pulsed excitation and to applied pulse electric field 19 p3440 A66-3575  
Current jet and plasma produced by coaxial plasma gun which is source of abundant slow deuterium plasma and fast plasma, examining acceleration mechanism 19 p3425 A66-3656  
Charged particle diffusion in plasma discharge in chamber with nonconducting walls, noting relations of various parameters 21 p3784 A66-3903
- ION CYCLOTRON**  
Experiments on ion cyclotron heating of plasma generated by Joule heating in Heliotron-B 12 p1919 A66-2385  
Ion cyclotron instabilities in bounded column-plasma system, noting growth rate parameters, instability conditions,

Langmuir probe measurement of electromagnetic field present in cyclotron oscillations 13 p2140 A66-25426  
Landau damping of transverse oscillations in collisionless plasma at ion cyclotron resonance and collisional damping in zero-temperature plasma 13 p2142 A66-25706  
Ion heating by ion cyclotron wave generation in dense plasma created by HF generator in metal discharge chamber, determining ion temperature 14 p2341 A66-27150  
LF wave in cylindrical plasma in magnetic field where ion beam is flowing and modes are nonaxisymmetric 15 p2553 A66-29629  
Nonresonant coupling of, RF power to plasma during ion cyclotron resonance heating in Model C stellarator 17 p2962 A66-31822  
Plasma formation by fast atom injection into mirror magnetic field and well, showing effect of geometric transition on hydromagnetic drift and ion-cyclotron instability 19 p3421 A66-36541  
Ion cyclotron resonance heating and trapping and adiabatic compression of plasma in QP machine 19 p3431 A66-36590  
HF heating of plasma in metallic vacuum chamber, noting generation and absorption of ion cyclotron waves, estimating plasma density 19 p3431 A66-36593  
Ion cyclotron resonance heating applied to stellarator plasma formed by ohmic heating, noting Alfvén wave generation by stix coil 19 p3432 A66-36594  
Higher harmonics generation of ion cyclotron frequency in longitudinally magnetized plasmas, noting experimental setup and pressure effects 21 p3777 A66-38766  
Boundary behavior of plasma heated by ion cyclotron waves 21 p3780 A66-39003  
Electromagnetic wave propagation in plasma along weakening magnetic field, considering spatial dispersion associated with ion thermal motion 21 p3781 A66-39010  
Solid state plasma microwave oscillations and dispersion conditions for ion-cyclotron instability excitation in semiconductor 21 p3804 A66-39335  
Solid state plasma microwave oscillations and dispersion conditions for ion-cyclotron instability excitation in semiconductor 22 p3959 A66-39705  
Ion heating by ion cyclotron wave generation in dense plasma created by HF generator in metal discharge chamber, determining ion temperature 24 p4244 A66-42970  
ION DENSITY  
IONOSPHERIC ION DENSITY  
MAGNETOSPHERIC ION DENSITY  
Charge trapped in electron or ion beams at pressures below breakdown determined from general integro-differential equation, using approximation method 01 p0111 A66-10375  
Data from ion energy spectrometer mounted on Ariel I satellite indicating increased concentration of oxygen ions during afternoon at high altitudes 01 p0061 A66-10498  
Pressure volume recombination coefficient in oxygen, using capacitor to determine average ion density 04 p0549 A66-14286  
Frequency dependence of resistivity, absorption and emission processes in fully ionized plasma 05 p0726 A66-15245  
Electron temperature and ion density profiles across interelectrode gap of thermionic diode operating in ignited mode 05 p0621 A66-15573  
Radar echo effects of satellite disturbance in plasma medium, noting electron and positive ion density distribution 08 p1302 A66-18755  
Thermal conductivity of NaCl crystals and dependence on Ag, Br, Li, K, I and Rb ion concentration 08 p1278 A66-19627  
Composition of outer ionosphere measured, using RF mass spectrometers mounted on board Elektron I and II satellites 09 p1378 A66-21008  
Local magnetic field, ion density flow and electric field in plasma measured downstream of theta-pinch accelerator in presence of uniform guide field

[AIAA PAPER 66-155] 10 p1565 A66-21684  
Ion density profiles in boundary layers associated with supersonic flow of shock heated air over flat plate measured by cylindrical and flush-mounted electrostatic probes  
[AIAA PAPER 66-159] 10 p1565 A66-21686  
Coefficients of space charge effects for growing oxide films, derived from perturbation treatment, evaluated in terms of boundary concentrations of diffusing species 12 p1811 A66-23624  
Correlation between plasma and ion density fluctuations as detected by magnetic probe, spectral emission techniques and Langmuir probe 13 p2142 A66-25703  
Stratospheric small-ion density measurement from high-altitude jet aircraft, noting dust effect 14 p2297 A66-28334  
Perturbations caused by cylindrical body in plasma, obtaining electric field and electron and ion concentration dependences on distance 15 p2595 A66-29086  
Color centers in alkali metal azides, noting change of ion from linear to bent configuration 16 p2777 A66-31023  
Critical electric field for charged droplets atomizing, noting spark discharge and ion concentration in clouds 16 p2742 A66-31109  
Thermal conductivity of NaCl crystals and dependence on Ag, Br, Li, K, I and Rb ion concentration 17 p2984 A66-33141  
Hollow electric collector probe for measuring ion density in rapidly flowing slightly ionized gas 18 p3112 A66-34244  
Mass and energy spectra of ions in Bostik-type plasma source studied by time-of-flight mass spectrometer 21 p3784 A66-39033  
Visibility and small ion density correlated by comparing light scattering with ion attachment processes on airborne scatters 23 p4065 A66-41842  
ION DISTRIBUTION  
Ion direct heating in nonlinear absorption of transverse waves during scattering on plasma ions, noting equation for ion distribution function 03 p0396 A66-12283  
Cyclotron instability dependence on nonmonotonic ion distribution function of plasma with cyclotron resonance 03 p0396 A66-12289  
Structure of disturbed plasma in thermodynamic equilibrium situated near charged solid surface ideally reflecting incident particles 03 p0397 A66-12381  
D-region atmospheric processes such as electron attachment, photo and other detachment processes, recombination and neutralization as studied in laboratory 03 p0362 A66-12640  
Ogo-A first results on mass spectrometry measurements of thermal positive ion composition at high altitudes 05 p0746 A66-14781  
Ion direct heating in nonlinear absorption of transverse waves during scattering on plasma ions, noting equation for ion distribution function 05 p0727 A66-15455  
Ion composition model representing conditions at low temperatures, assuming that solar cycle variation ions are distributed according to diffusive equilibrium theory 06 p0876 A66-18611  
Kelvin-Helmholtz instability in fully ionized plasma in magnetic field, assuming variable streaming velocity 07 p1089 A66-17961  
Flute modes at ion gyrofrequency propagating perpendicular to magnetic field 08 p1260 A66-18535  
Ion distribution in plasma of vacuum spark 10 p1569 A66-21886  
Physical state of water in living cell and model systems such as collagen and wool 11 p1645 A66-22989  
Chemical and photochemical reactions controlling ion composition of atmosphere between 150 and 300 km 11 p1699 A66-23041  
Relative drift between ions in adjacent layers exciting Kelvin-Helmholtz instability analyzed in thermally ionized cesium plasma, noting range of frequency oscillations 12 p1923 A66-24577  
Structure of disturbed plasma in thermodynamic equilibrium situated near charged solid surface ideally reflecting incident particles 13 p2139 A66-25386  
Ionospheric flight simulation in which ion distribution of neutral gas expanding into

rarefied ionized gas under magnetic field is measured 16 p2759 A66-30374  
Instability of nonlinear stationary oscillations of potential in electron-ion flows useful in distribution functions of ions and electrons 16 p2754 A66-31174  
Hydrogen and helium ions formation and destruction, charge transfer, diffusion, role during solar activity, using mass spectrometry, ground radar, etc 19 p3350 A66-36356  
Excitation of collective motions in collisionless plasma in magnetic field for case of large temperature anisotropy 21 p3783 A66-39024  
Lithium ion drift and density distribution in electric field of Si p-n junction 24 p4253 A66-42359  
Average properties of positive-ion component of solar wind observed by Mariner II 24 p4263 A66-42586  
ION EMISSION  
Energy and intensity of ions emitted by metal target as function of characteristics of laser and nature of metal 05 p0697 A66-15109  
Time resolution of electron and ion emission produced by Q-switched ruby laser pulse focused on metal surface 07 p1045 A66-18358  
Surface physics of ion and electron emission during cesium adsorption on polycrystalline wire surfaces [AIAA PAPER 66-222] 10 p1575 A66-21450  
Electron and ion emission from pulsed ruby laser illuminated metallic surface into vacuum, determining application to pulsed ion thruster [AIAA PAPER 66-230] 10 p1542 A66-21453  
Cesium ion emission patterns obtained from rear-fed porous refractory metals, using thermal emission microscope [AIAA PAPER 66-220] 11 p1746 A66-23086  
Energy spectra of ions emitted by beryllium, carbon and molybdenum heated by laser 13 p2131 A66-25479  
Surface temperature determination procedure for laser heated metals based on heat conduction equations and ion emission from surface 15 p2514 A66-29035  
Actual line shape expected from accelerating radiating ion, errors due to Lorentzian approximation and results for ion laser transition in rare gas lasers 16 p2716 A66-30181  
Collisional Stark broadening in RF discharges, noting large ion and electron broadening contribution 17 p2960 A66-31921  
Electron-ion emission pattern distribution obtained by pulsed laser focusing on solid target 17 p2937 A66-33256  
Large amplitude oscillations with frequencies corresponding to ion transit times in thermal cesium plasma diodes with parallel plane construction 19 p3313 A66-35425  
Secondary ions energy spectra dependent on incidence angle of primary ions for varying escape angles, using molybdenum targets 19 p3403 A66-36454  
Electron and ion emission from polycrystalline surface of Be, Ti, Cr, Ni, Cu, Pt and type-304 stainless steel in cesium vapor 20 p3623 A66-38400  
Energies of ions generated from metal surface irradiated by single giant pulse laser 20 p3582 A66-38412  
Beam foil excitation technique application in measuring mean lives of 2p and 3p levels of hydrogen 21 p3774 A66-38543  
Flare ion fluxes in space by mass-spectrometric measurements of solar flare rare-gas ions stopped in extraterrestrial material 22 p3973 A66-40016  
ION ENGINE  
SA PLASMA ENGINE  
Focusing and accelerating electrode materials for cesium contact ion engines, noting advantages of copper, beryllium and molybdenum [AIAA PAPER 64-684] 02 p0278 A66-11537  
Optimum sastrugi ion optical engine design for uniform emission, considering perveance and electrode clearance [AIAA PAPER 65-69] 03 p0416 A66-12765  
Drain currents from iron and copper ion accelerator electrodes of ion engine as functions of cesium flux, temperature, voltage difference and oxygen pressure

[AIAA PAPER 64-686] 03 p0416 A66-12782  
Electrostatic engine with HF ion source  
uses mercury as fuel 04 p0573 A66-13542  
Radiation tolerant electric propulsion  
system to operate on SNAPSHOT satellite,  
permitting orbital test of ion engine and ion  
propulsion with nuclear power supply  
/SNAP-10A/ 04 p0544 A66-13630  
Electrostatic hysteresis synchronous motor  
discussing development, operation  
characteristics, test results, advantages and  
limitations 04 p0459 A66-13681  
Electric rocket propulsion system  
requirements for space propulsion,  
comparing capabilities with chemical and  
electrical rockets 08 p1280 A66-18575  
Electrostatic ion propulsion and  
electromagnetic engine experiments in  
Germany for application to space travel,  
noting nuclear energy power source 08 p1281 A66-18614  
Electric propulsion systems development,  
discussing ion beam neutralization, nuclear  
power sources, contact ionization engine,  
etc 09 p1434 A66-20248  
Sputtering yields of aluminum, copper and  
titanium measured as function of cesium ion  
energies for use as electrodes on cesium ion  
engines  
[AIAA PAPER 66-203] 10 p1575 A66-21445  
Ion engine arcing frequency from  
micrometeoroid impact  
[AIAA PAPER 66-205] 10 p1592 A66-21446  
Electron-ion emitting characteristics of  
various electrode materials with cesiated  
surfaces for cesium contact ion thrusters  
[AIAA PAPER 66-208] 10 p1592 A66-21447  
Comparison of various electrostatic  
thrusters and proposed low pressure  
colloidal power converter for high payload  
lunar and planetary missions  
[AIAA PAPER 66-211] 10 p1592 A66-21448  
Plasma measurements in cesium electron  
bombardment ion engine indicate that  
reversed cathode-anode configuration  
improves radial ion distribution  
[AIAA PAPER 66-246] 10 p1593 A66-21455  
Ion thruster, including mercury feed  
system and shielded neutralizer, designed  
and tested for spacecraft station keeping  
and attitude control  
[AIAA PAPER 66-247] 10 p1593 A66-21456  
Electron bombardment ion thrusters with  
two accelerator-grid systems for producing  
ion beams in directions 180 or 90 degrees  
apart  
[AIAA PAPER 66-248] 10 p1593 A66-21457  
Ion propulsion by electrostatic acceleration  
of cesium ions subjected to transverse  
magnetic field, using negative space charge  
sheath  
[AIAA PAPER 66-256] 10 p1563 A66-21461  
Life testing of electron-bombardment  
cesium ion engine designed for power-to-  
thrust ratio of 160 kw/lb  
[AIAA PAPER 66-233] 10 p1594 A66-21701  
Discharge and exhaust beam of small low-  
power DC magnetic expansion thruster  
[AIAA PAPER 66-195] 11 p1743 A66-22216  
Durability test of mercury electron-  
bombardment ion thrusters, measuring  
lifetime, output, power efficiency, etc  
[AIAA PAPER 66-231] 11 p1760 A66-22218  
Surface ionization engine development,  
considering life testing of sastrugi thrusters  
[AIAA PAPER 66-236] 11 p1760 A66-22219  
Zero-g vapor feed system with no moving  
parts, noting ion engine testing, propellant  
use efficiency and surface tension storage  
[AIAA PAPER 66-249] 11 p1761 A66-23083  
Feasibility design study of solar powered  
ion propulsion system for interplanetary  
spacecraft  
[AIAA PAPER 66-214] 12 p1936 A66-24524  
Porous structures for ion engine  
application, discussing ionizer materials  
preparation, based on powder metallurgy  
and two-phase tungsten base alloy  
[AIAA PAPER 66-221] 12 p1896 A66-24528  
Power conditioning system for ion engine  
used in Sert-I flight test  
[AIAA PAPER 64-681] 12 p1937 A66-24691  
Glessen ion engine utilizing HF mercury  
ion source 12 p1938 A66-24905  
Lightweight flight prototype mercury ion  
engine system development and testing  
[AIAA PAPER 66-216] 13 p2172 A66-25170  
Electron bombardment thrusters using

liquid mercury cathodes, noting lifetime,  
propellant and power efficiency, feed  
system, temperature limits, etc  
[AIAA PAPER 66-232] 13 p2172 A66-25172  
Multistrip cesium contact thrusters,  
integral focus life test engine and various  
integral focus ionizers  
[AIAA PAPER 66-235] 13 p2172 A66-25174  
Zero-gravity mercury feed system for  
mercury-electron bombardment spacecraft  
engines  
[AIAA PAPER 66-250] 13 p2172 A66-25176  
Weight criteria for integration of nuclear-  
electric power supply with electric thruster  
system as primary spacecraft propulsion  
[AIAA PAPER 64-765] 13 p2173 A66-26611  
Power conditioner, source and heat  
removal equipment considered for ion  
engines  
[AIAA PAPER 64-764] 13 p2174 A66-26659  
Power conditioning and ion thruster  
module size and number effect in terms of  
reliability  
[AIAA PAPER 65-68] 14 p2375 A66-27883  
Power conditioning and advanced  
propulsion system of ionic engine, noting  
high voltage inverter design and vaporizer  
heater circuit 14 p2375 A66-28416  
Cesium contact ion engine construction and  
performance and engine neutralizer  
[AIAA PAPER 65-375] 16 p2791 A66-30906  
Axially symmetric or two-dimensional  
electrode system with emitting surface,  
discussing convergence and accuracy criteria  
of iteration methods 17 p2887 A66-32700  
Electrostatic ion drive measuring methods,  
noting Faraday collector for ion current  
density 17 p2991 A66-33197  
Electrostatic ion drives technology  
problems, considering conversion efficiency,  
thrust, reliability, high voltage, mass per  
unit thrust, etc 17 p2991 A66-33231  
Electron bombardment ion thrusters and  
electrostatic accelerators, discussing  
electrode geometry and composition and  
electrode erosion 17 p2991 A66-33233  
Electrostatic ion drives technology  
problems, discussing gaseous discharge ion  
sources, duoplasmatron and electron  
bombardment ion generator 17 p2991 A66-33234  
Surface tension propellant storage and  
feed systems for zero-g ion  
engines 19 p3450 A66-35615  
Ion engine satellite control system noting  
design and laboratory tests  
[AIAA PAPER 65-417] 19 p3450 A66-35616  
Comparison of electromagnet and  
permanent magnet versions of electron  
bombardment cesium ion engine  
[AIAA PAPER 65-373] 19 p3450 A66-35617  
Thruster device using self-induced  
magnetic Lorentz forces to attain velocities  
up to 50,000 m/sec for plasma jet ejected by  
electric arc engines 19 p3451 A66-36637  
Low thrust divergent flow cesium-on-  
tungsten contact ionization electrostatic  
thruster for satellite attitude control and  
stationkeeping missions  
[AIAA PAPER 66-569] 20 p3628 A66-37051  
Lightweight power-conditioning system for  
ion engines using energy-storage  
transformers for conversion, nondissipative  
regulation and protection 20 p3628 A66-37172  
Ion propulsion engine with replenishable  
liquid-film-protected tungsten electrode,  
discussing construction and mass loss rate  
vs temperature  
[AIAA PAPER 65-378] 20 p3629 A66-38167  
Digital computer program for solution of  
space-charge-flow problem applied to design  
of thrusters with variable thrust vector,  
analyzing two ion-thruster configurations  
with aid of computer 20 p3629 A66-38179  
Automatic double probe to determine  
electron temperatures in ion engine  
exhaust 24 p4215 A66-43208

**ION EXCHANGE**  
Classification of ions capable of replacing  
Ti in barium titanate 06 p0927 A66-16719  
Ion exchange in phospholipid  
monomolecular films 12 p1805 A66-23917  
Computer program for current profile and  
trajectory analysis for cesium contact  
thruster leading to integral focus  
configuration of multistrip contact engines  
for long space missions  
[AIAA PAPER 66-206] 16 p2792 A66-31690

**ION EXCHANGE MEMBRANE**

Gas permeation measurements on ion  
exchange fuel cell membranes using  
chromatography 05 p0611 A66-1453  
Heat and mass transfer in ion exchange  
membrane fuel cells 07 p0995 A66-1832  
Hydrogen-oxygen fuel cells, using ion  
exchange electrolytes 07 p0996 A66-1847

**ION EXTRACTION**

Plasma Separator Thruster, advanced ion  
thruster design based on independent  
operation and optimization of plasma source  
and plasma extraction system  
[AIAA PAPER 66-598] 18 p3163 A66-3421  
Plasma potential and ion energy  
determination via ion extraction and energy  
analysis 24 p4247 A66-4320

**ION GAUGE**

Gauges and systems applicable to  
measurement of extremely high vacuum  
considering ion gauges with modulators  
suppressor gauges, extractor gauges and  
cold cathode type gauges 24 p4215 A66-4306

**ION IMPACT**

Optical excitation due to impact of ver-  
slow helium ions on Ar and Kr attributed to  
transfer of kinetic energy into internal  
electron energy 11 p1740 A66-2297  
Phase difference due to elastic wave  
produced by cyclic heating of targets by  
impacting ions from pulsed  
beam 13 p2159 A66-2507  
Long-lived impact excitation states of  
particles measured from cross section of  
nonelastic collision with second  
particle 18 p3137 A66-3402  
Intensity distribution in rotational  
structure of molecular spectra bands upon  
excitation by ion impacts 20 p3604 A66-3736  
Nonequilibrium plasmas produced in InS  
by both impact ionization and injector  
examining instabilities due to HF  
oscillations and negative  
resistance 23 p4114 A66-4158  
Decaying free carrier concentration  
increase in GaAs when subjected to  
increased level of drive during first  
cycle 24 p4253 A66-4237

**ION INJECTION**

Proton injection into radiation belts by  
large B-L space regions by cosmic ray and  
solar proton albedo neutron decay  
injection 11 p1764 A66-2313  
External injection of ions into cyclotron  
examining case of injection of beam in  
median plane of magnet 14 p2347 A66-2831  
Plasma formation by high energy molecular  
hydrogen ion injection followed by  
dissociation and accumulation in static  
magnetic mirror  
configuration 19 p3422 A66-3654  
Aspa device designed for study of  
composition, energy and density  
distributions produced when plasma blob is  
injected into mirror trap with adiabatic  
plasma compression 19 p3423 A66-3655  
Increasing plasma density in Ogr  
1 20 p3610 A66-3805  
Plasma blob capture when injected  
perpendicular to magnetic force line  
attributed to electrostatic repulsion of  
polarization space charge formed by  
interaction 20 p3610 A66-3805  
Deflection of plasma jet generated by  
coaxial gun and injected along axis of  
quadrupole magnetic field eliminates neutral  
gas, producing complete  
ionization 20 p3610 A66-3805  
Plasma injection from coaxial plasma gun  
into magnetic trap with opposite  
fields 21 p3788 A66-3905  
Deep 1/10 micron/ penetration of ion  
implanted donors in silicon, measuring  
density profiles via C-V method and  
parameter of penetrating tail  
section 24 p4250 A66-4225

**ION MICROSCOPE**

Cesium ion emission patterns obtained  
from rear-fed porous refractory metal  
using thermal emission microscope  
[AIAA PAPER 66-220] 11 p1746 A66-2308  
Scanning microscope for studying Si p-  
junctions by electron or ion  
bombardment 17 p2927 A66-3345

**ION MOBILITY**

Tropospheric ion mobility distribution  
conductivity and densities above exchange  
layer 02 p0222 A66-1182

- Effects of variable ionic mobility on current collection by cylindrical body and of ring electric field on sheath size, noting role of diffusion 05 p0722 A66-14724
- Phenomenon 05 p0722 A66-14724
- Pressurizing thrust bearings through use of ions and high electric fields ASME PAPER 65-WA/LUB-1]
- 05 p0689 A66-15525
- Time dependence of electron density during afterglow of plasma in helium-hydrogen, neon-hydrogen and argon-hydrogen mixtures measured by microwave cavity 07 p1091 A66-18398
- Effect of ion drift from discharge on ionization state of helium-plasma model 08 p1265 A66-19374
- Conductivity measurements on silver bromide and silver 09 p1426 A66-20194
- Pressurizing thrust bearings through use of ions and high electric fields ASME PAPER 65-WA/LUB-1]
- 12 p1888 A66-24546
- Mobility of various ions in nitrogen and argon and mobility and diffusion of ions in hydrogen 14 p2345 A66-28138
- Motion of slow positive potassium and nitrogen ions in nitrogen, measuring mobility and diffusion coefficients with apparatus whose characteristics are given 14 p2345 A66-28139
- Motion of potassium ions in argon, using apparatus for simultaneous measurement of mobility and diffusion coefficients 14 p2345 A66-28140
- Ionic drift velocity peak function for two interconverting nitrogen ion species drifting in gas in electric field 15 p2550 A66-28756
- Effect of ion drift from discharge on ionization state of helium-plasma model 18 p3146 A66-34176
- Gerdien type chamber for measurements of ion mobility spectrum in terrestrial mesosphere and Mars atmosphere 18 p3114 A66-34712
- ION MOTION
- SA PENNING DISCHARGE
- Oscillations of electron-ion plasma in external electric field assuming uniformly accelerated motion of plasma components 02 p0268 A66-11784
- Electron beam-hot plasma interaction at low frequencies, explaining cesium discharges and gas noise 03 p0398 A66-12539
- Frequency oscillation role as drift waves excited during interaction of electron beams with plasma, made impossible by ion transverse motion 05 p0722 A66-14723
- Ion motions in theta pinch discharge studies from time-resolved profile measurements of impurity lines 06 p0921 A66-17050
- Kelvin-Helmholtz instability in fully ionized plasma in magnetic field, assuming variable streaming velocity 07 p1089 A66-17961
- Particle localization in spark chamber and ion drift in Wilson cloud chamber, noting experimental result of simultaneous observation of identical particles 09 p1379 A66-20233
- Plasma density drops developing when injecting plasma into trap with combined field, noting rise of HF field and acceleration of fraction of plasma ions with each drop 13 p2137 A66-25104
- Depopulation of ground state chromium ions in ruby under optical pumping explained via rate equations 13 p2089 A66-25188
- Steady state motion of Couette plasma flow in electric field, assuming transfer of collective motion is effected by ions and heat transfer by 14 p2339 A66-26774
- Electrons 14 p2339 A66-26774
- Drift and diffusion of slow positive ions in hydrogen, using redesigned apparatus 14 p2345 A66-28141
- Unified field theory applied to relaxation of ion velocity distribution in plasma 15 p2552 A66-29396
- Wind shear theory of formation of temperate zone blanketing sporadic E layers, noting motion equation for ions in ionospheric E region 15 p2490 A66-29948
- Plasma density drops developing when injecting plasma into trap with combined field, noting rise of HF field and acceleration of fraction of plasma ions with each drop 16 p2758 A66-30283
- Ion motion effects on ionospheric radio wave propagation 17 p2917 A66-32306
- X-ray irradiated MOS structure behavior, noting ionic charge motion in oxidized silicon that depends on electric field 18 p3155 A66-34083
- Fluid equations used in describing electron and ion motion perpendicular to field lines in slab of plasma supported against gravitational field by sheared magnetic field 19 p3417 A66-36527
- MOS capacitance of p-type silicon in inversion layer and ion drift in fringing field 22 p3872 A66-39744
- Electron-ion motion effect on electromagnetic wave reflection from plasma 22 p3955 A66-39997
- Lithium ion drift and density distribution in electric field of Si p-n junction 24 p4253 A66-42359
- Reverse breakdown voltage increase resulting from ion drift in silicon p-n junctions formed by sodium ion bombardment 24 p4257 A66-42621
- Three-dimensional voltage traps for charged particles, using equilibrium equations with or without thermal agitation 24 p4245 A66-42996
- Effect of ion motion along magnetic field on plasma stability 24 p4245 A66-43052
- ION OSCILLATION
- Plasma ion and electron oscillation 05 p0725 A66-15235
- Secondary emission ratio and multiplication constant of electron-ion oscillatory discharge 06 p0919 A66-16872
- Simultaneous electron and ion oscillations on discharge gap of four-electrode chamber 06 p0919 A66-16881
- IR absorption spectrum of local H-ion oscillations in KCl crystals doped with Na, Rb, Cs, I, Br and F 10 p1588 A66-22158
- Decaying plasma density determined from high-mode oscillations produced in magnetic trap with metallic chamber at 2000 to 6000 oe 16 p2756 A66-30099
- Plasma-ion oscillations in drifted plasma effected in diode-type discharge tube by varying longitudinal magnetic field or cathode temperature 17 p2972 A66-32974
- IR absorption spectrum of local H-ion oscillations in KCl crystals doped with Na, Rb, Cs, I, Br and F 19 p3440 A66-35772
- Ion oscillations in high temperature electron-ion plasma with HF fluctuations 23 p4102 A66-41485
- Flute type oscillations of hot ion plasma in homogeneous magnetic field with wave-plasma resonances 23 p4105 A66-41705
- ION PROBE
- Probes in atmospheric pressure argon plasma where ion diffusion is function of temperature 03 p0406 A66-13280
- In situ probe measuring nonthermal components of electron energy distribution in ionosphere, small-scale ionization inhomogeneities and negative ion concentrations in lower ionosphere 08 p1223 A66-18745
- Potential profile around negatively biased spherical and cylindrical ion probes in collisionless plasma computed numerically 13 p2142 A66-25707
- Polarized pyrometric probe for direct measurement of ion and electron energy in hot dense plasma 14 p2290 A66-26825
- Hollow electric collector probe for measuring ion density in rapidly flowing slightly ionized gas 18 p3112 A66-34244
- Vacuum system of ion microprobe mass spectrometer noting design criteria, operation and results 24 p4215 A66-43162
- ION PRODUCTION
- Discrepancy between observed ion production rate in cesium thermionic converter and Saha-Langmuir equation prediction suggests locality of ion formation 05 p0612 A66-14984
- Ion-electron interaction in plasma 05 p0725 A66-15243
- Photolionization upstream of strong shock wave determined by ion continuity and radiative transfer 07 p1022 A66-18107
- Optimum ionizer structure, examining cesium transport through tungsten capillaries
- [AIAA PAPER 66-207] 12 p1922 A66-24529
- Estimation of ion formation rate at various altitudes in ionosphere and zenith angles during low and high solar activity periods 15 p2487 A66-29105
- H, C, N, O, Cl, Ca and Al negative ion formation in plasma, noting role of continuous radiation, formation temperature and metastable and stable states 18 p3144 A66-34041
- Ionization due to alpha, beta and gamma radiation from ground and atmosphere in ground proximity, noting ion pair production rate and energy spectra 20 p3552 A66-37759
- ION PUMP
- Cathode sputtering theory, explaining sputtering dependence on ion angle of incidence, with application in electromagnetic isotope separators, etc 08 p1257 A66-18695
- Molybdenum and titanium cathodes applied in getter ion pump, noting improvement of initial and average performance 13 p2078 A66-25649
- Vacuum equipment selection for thin film processing line, comparing diffusion and ion-pumped evaporation systems 13 p2040 A66-25843
- Space simulation facility, based on ion-getter pump system, using ion and titanium sublimation pumps and stainless steel shrouds for thermal conditioning 16 p2677 A66-30453
- Optimizing performance of ultra high thermal vacuum system 16 p2681 A66-30499
- Diffusion, getter-ion and cryogenic high vacuum pumping methods, showing relationship of pressure vs gas load, operating efficiency and cost as function of system size 17 p2930 A66-32945
- ION RECOMBINATION
- SA ELECTRON-ION RECOMBINATION
- Ion recombination effects on inhomogeneous cylinder deceleration in rarefied plasma 04 p0551 A66-13858
- Helium-plasma decay in spherical balloon and volume removal by electron-ion recombination 06 p0914 A66-16146
- Departures from local thermal equilibrium in helium plasma produced by magnetically-driven shock wave in T-tube 10 p1566 A66-21811
- Helium afterglow in HF pulse-discharge plasma at 77 K from dissociative recombination of molecular helium ion with thermal electron 10 p1572 A66-22022
- Mixtures of ions in wind-shear theory of sporadic E layer, noting ion recombination 14 p2281 A66-26845
- Recombination coefficient and high electron temperature in midlatitude sporadic E layer with ions of oxygen and nitrogen oxide 14 p2281 A66-26849
- Helium-plasma decay in spherical balloon and volume removal by electron-ion recombination 15 p2556 A66-29876
- Rate constant of ion molecular processes in ionosphere, tabulating results of laboratory analyses 15 p2495 A66-30054
- Helium afterglow in HF pulse-discharge plasma at 77 degrees K from dissociative recombination of molecular helium ion with thermal electron 16 p2760 A66-30841
- Plasma model representing phenomena occurring in cesium thermionic converters operating in collisional ignited mode 19 p3406 A66-35429
- Temperature dependence of dissociative recombination coefficients in argon according to hypotheses of Bates and Palgarno 19 p3404 A66-36758
- Altitude profiles for dayglow emissions excited by molecular ion dissociative recombination, solar radiation fluorescence, oxygen photodissociation, electron collisions and chemical reactions 23 p4064 A66-41680
- ION SCATTERING
- Anomalous scatter and energy loss of ions penetrating crystalline semiconductors 05 p0737 A66-15303
- Measurement of equilibrium fractions of helium ions present in helium beams scattered at zero degrees through carbon foils 06 p0912 A66-17038
- Plasma compression effect of space vehicle in magnetolonic medium, discussing injection and removal of quasi-trapped

ions 08 p1302 A66-18756  
Freezing potential for ammonia and sodium chloride solution at constant freezing rates, noting stationary nature of potential under stationary conditions 13 p2121 A66-26124  
Book on electronics and electron physics advances including fast ion scattering, kinetic ejection of electrons, plasma application in microwaves, etc 16 p2747 A66-30794  
Fast emitted and reflected particles during ionic bombardment of metallic surfaces, considering two-atom collision rules, light emission, ion scattering, etc 16 p2753 A66-30795

## ION SHEATH

Thin electrostatic sheath near body immersed in weakly ionized flowing gas in mean free path regime for relatively small Debye length [AIAA PAPER 66-6] 06 p0921 A66-17102  
Satellite charge and sheath formation resulting from photoelectric and secondary emission 08 p1302 A66-18748  
Electromagnetic wave scattering by satellite caused by ionized coating, noting effect on echo 08 p1182 A66-18754  
Plasma and electron gyroresonance effects on admittance of RF plasma probe surrounded by ion sheath 09 p1381 A66-20373  
Drift instabilities in thermionic plasmas, noting excitation of LF oscillations with finite perturbation amplitude around cathode ion sheath 13 p2145 A66-25729  
RF impedance of absorptive surface plasma probe for case of collapsed ion sheath 13 p2136 A66-26294  
Slot admittance for two-layer compressible plasma sheath-ion sheath in plasma half-space 14 p2235 A66-27128  
Normally incident plane electromagnetic wave scattering by circular cylinder coated with radially stratified sheath 14 p2238 A66-27587

## ION SOURCE

Mass spectrometry of positive ion beam produced by nonmagnetic emitter, using electron beam passing through electrostatic field for rare isotope analysis 03 p0397 A66-12391  
Electrostatic engine with HF ion source uses mercury as fuel 04 p0573 A66-13542  
Power transistors used for stabilization of emission current of electron bombardment ion source for mass spectrograph 04 p0498 A66-14037  
Ionization characteristics of various porous metal ionizers and suitability for use in cesium contact thrusters [AIAA PAPER 66-218] 11 p1756 A66-23094  
Mass spectrometry of positive ion beam produced by nonmagnetic emitter, using electron beam passing through electrostatic field for rare isotope analysis 13 p2139 A66-25397  
Polarized ion source yielding current of 0.1 microamperes, with background of unpolarized deuterons of 1-2 percent and of protons 10-15 percent 13 p2134 A66-26244  
Diagnostic work on ion sources in Germany, including electrostatic drive research, duoplasmatron and porosity of tungsten emitter [DGR PAPER 66-005] 13 p2059 A66-26492  
Thin Permalloy film deposition by controlled high-vacuum ion source, noting design of apparatus 16 p2661 A66-30691  
Electrostatic ion sources, noting simulation chamber for tests and measurement results on emissive power of porous tungsten 16 p2791 A66-31191  
Electrostatic ion sources, assessing thrust output and lifetime for various space missions and satellite attitude control 16 p2791 A66-31192  
Mass spectra of isotopically labeled tetraboranes obtained under zero ion source contact conditions, observing parent peak and metastable transition 16 p2647 A66-31379  
Electrostatic ion drives technology problems, discussing gaseous discharge ion sources, duoplasmatron and electron bombardment ion generator 17 p2991 A66-33234  
Quadrupole mass filter coupled to shock tube for analysis of reaction kinetics noting ion source, time constant, smoothness of leak, etc 17 p2904 A66-33464

Laser vaporization and ionization of solid materials to obtain ions for time-of-flight mass spectrometer 21 p3749 A66-39385

## ION TEMPERATURE

Microwave scattering from nonequilibrium plasmas where electrons have large steady drift velocity with respect to ions 02 p0266 A66-11479  
Electron and ion temperatures determination for helium plasma produced by theta-pinch with azimuthal magnetic field, using Doppler broadening and X-ray absorption 03 p0396 A66-12292  
Ratio of ionospheric electron to ion temperature determined independently of spectral measurements, using electron density data obtained with topside sounder 04 p0517 A66-14374  
Ionospheric diffusion probe determining ion and electron temperatures 05 p0674 A66-15112  
Electron and ion temperatures in ionosphere show no temperature equilibrium in F region 06 p0877 A66-17171  
Ion temperature measurement of streaming helium plasma by Langmuir double probe method, discussing effect of stream velocity 10 p1558 A66-21071  
Plasma electron density as function of radius compared with ion cyclotron heating theory and stability criteria [AIAA PAPER 66-158] 10 p1560 A66-21423  
Conductance and susceptance of neon plasma measured by Q-meter method in frequency range from 0.5 to 25 mc 11 p1745 A66-22587  
Electron density distributions in daytime F-2 layer and dependence on neutral gas, ion and electron temperatures 11 p1699 A66-23135  
Ionospheric processes and measurement of variations in ion temperature and concentration using satellites, noting connection with magnetosphere 12 p1871 A66-24400  
Ion heating by ion cyclotron wave generation in dense plasma created by HF generator in metal discharge chamber, determining ion temperature 14 p2341 A66-27150  
Plasma ion and electron temperature measurement via forward scattering spectrum of deuterium plasma 18 p3146 A66-34235  
Nonuniform plasma stability in magnetic field gradient 19 p3417 A66-36530  
Ionospheric ion temperature from cyclotron damping of proton whistler 20 p3554 A66-38195  
Emission spectrum of plasma consisting of colliding blobs, noting photographic and photoelectric recording and ion temperature measurement 21 p3790 A66-39070  
Electron density and electron and ion temperatures in F region studied by ground-based radar observations at Millstone Hill 22 p3909 A66-39976  
Electron density, electron and ion temperature and ionic composition measurements in Peru, using incoherent scattering technique 22 p3910 A66-39977  
Incoherent scattering of radio waves by plasma extended to include effects of unequal ion and electron temperatures and magnetic field 22 p3867 A66-40550  
Ion temperature measurements around 1000 km altitude, using ion energy analyzer and mass spectrometer mounted on rocket 22 p3913 A66-40551  
Ion energy balance equation for ionosphere including effects of O, He, and H ions, thermoconductivity and cooling by atomic hydrogen and helium 24 p4198 A66-42431  
Ruby laser light scattering measurements of electron and ion temperatures of hydrogen and deuterium plasmas produced in theta pinch devices 24 p4222 A66-42558  
Plane gridded retarding potential analyzer for measuring dominant constituent ion concentrations, temperature and instrument potential in planetary ionospheres 24 p4201 A66-42605  
Ion heating by ion cyclotron wave generation in dense plasma created by HF generator in metal discharge chamber, determining ion temperature 24 p4244 A66-42970

## ION TRAP

Ion escape from magnetic mirror trap due to nonlinear stage of plasma instability related to loss cone 01 p0109 A66-10261  
Asymmetric instability and charge motion in metal-silicon oxide-silicon structures 12 p1932 A66-24823  
Ion escape from magnetic mirror trap due to nonlinear stage of plasma instability related to loss cone 13 p2148 A66-25979  
Plane gridded retarding potential analyzer for measuring dominant constituent ion concentrations, temperature and instrument potential in planetary ionospheres 24 p4201 A66-42605

**IONIC COLLISION**  
Cylindrical plasma rotational velocity formulas derived by calculating Boltzmann collision integral in stationary momentum equation 04 p0556 A66-14333  
Charge transfer between helium ions and molecules of nitrogen and oxygen in crossed-beam experiment within energy range 3 to 600 ev 05 p0671 A66-14959  
Elastic differential scattering in low energy helium ion collisions, discussing quantal and secondary interference and two-state theory 05 p0719 A66-15768  
Shock wave frontal ionization effect on electromagnetic transmission and reception from telemetering equipment on ELDIC satellite launching vehicle 09 p1406 A66-19851  
Charge transfer and charge rearrangement in atmospheric ion-neutral particle collisions 10 p1557 A66-21143  
Plasma density instability induced by electron-hole generation in impact ionization as affected by electric field 10 p1575 A66-21536  
Weak collisions effect on ion waves instability in cesium plasma solved via linearized Fokker-Planck equation 10 p1568 A66-21823  
Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 10 p1569 A66-21972  
Born approximation of cross sections for electron and proton impact ionization of Na and Mg 11 p1737 A66-22496  
Cross sections of inelastic collisions of hydrogen and nitrogen molecular ions with hydrogen molecules 11 p1738 A66-22879  
Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization, longitudinal current effect, etc 12 p1921 A66-24204  
Ionospheric radio wave propagation and ionization inhomogeneity drift measured, using doubly reflected signals 12 p1873 A66-24687  
Threshold data for ruby and neodymium laser pulse-induced breakdown in Xe, Ar, Kr, Ne, He, oxygen, nitrogen, air and carbon dioxide 13 p2100 A66-26191  
Ion beam elastic scattering cross section for proton-helium systems 14 p2337 A66-27978  
Seaton formulas used to determine when gas is collision-dominated 14 p2337 A66-28115  
Ionic drift velocity peak function for two-interconverting nitrogen ion species drifting in gas in electric field 15 p2550 A66-28756  
Collision cross sections of ions in isoelectronic sequence of lithium, noting dipolar transitions of type 2s to np 16 p2754 A66-31261  
VLF dipole antenna impedance values, magnetotelluric and collision effects in ionospheric magnetoplasma 17 p2874 A66-32386  
Effective ionization and charge exchange areas of certain gases undergoing collisional ionization by accelerated ions 17 p2961 A66-32954  
Spectrographic investigation of luminescence of carbon monoxide and dioxide excited by collisions with accelerated ions 17 p2961 A66-33403  
Discrepancies in electron-impact broadening of isolated ion lines due to neglect of collision-induced transitions between upper and lower levels of line and Coulomb interactions with perturbed ions 22 p3951 A66-40419

## IONIC CONDUCTION

Electrical damage to cathode ray tube safety glass attributed to current passing

through cathode ray tube face and safety  
 class as result of ionic  
 conduction 10 p1504 A66-21659  
 Anodic oxide film growth on sputtered  
 tantalum films in dilute sulfuric acid, noting  
 ionic conductivity, dielectric constant and  
 optical properties 15 p2562 A66-28718  
 Atmospheric electric field change  
 compensation during measuring air-Earth  
 ionic conduction and electron precipitation  
 current densities 22 p3920 A66-40804  
 Propagation of nervous impulse down  
 unmodulated and unmodulated fibers,  
 obtaining expression involving ionic  
 conductances 23 p4025 A66-41045  
**IONIC CRYSTAL**  
 Physics of luminescent ionic crystal -  
 Conference, Lvov, Ukrainian SSR, January-  
 February 1964 15 p2568 A66-29728  
 Optical properties of complex compounds  
 of divalent platinum, noting absorption  
 spectra, forbidden transitions,  
 etc 15 p2569 A66-29730  
 IR radiation absorption in imperfect ionic  
 crystals 21 p3802 A66-39158  
**IONIC DIFFUSION**  
 Measuring drift velocities of mixed  
 nitrogen ion population in nitrogen gas,  
 noting need of ionization condition control  
 and ion mass analysis 04 p0547 A66-13714  
 Vortical electric field effect on  
 inhomogeneities spreading in weakly ionized  
 plasma /ionosphere/ in magnetic  
 field 04 p0577 A66-13842  
 Diffusion of Li and Cu in GaAs crystals  
 indicates reaction involving divacancies in  
 donor-doped and undoped  
 crystals 06 p0935 A66-17132  
 Diffusion and lifetime of plasma charged  
 particles in magnetic field covering  
 instability, contraction, decay,  
 recombination, etc 13 p2138 A66-25222  
 Precipitation effects in phosphorus-diffused  
 silicon after gold diffusion, using  
 transmission X-ray diffraction  
 microscopy 15 p2561 A66-28700  
 Nonlinear instability theory of weakly  
 inhomogeneous hot-ion plasma when loss cone  
 exists in ion velocity  
 Distribution 17 p2964 A66-31890  
 Ion drift and diffusion of magnetically  
 confined plasma due to inclination of  
 conducting end-plate having electron sheath  
 which reflects ions 18 p3149 A66-34912  
 Instabilities in plasma produced by  
 magnetron source diffusing along static  
 magnetic field, examining effect on particle  
 diffusion perpendicular to magnetic  
 field 19 p3416 A66-36521  
 Volt-ampere characteristics and  
 photomicrographs of p-n junctions produced  
 by diffusion of Zn and Cd into  
 InP 21 p3798 A66-38918  
 Internal electric field effect on singly  
 ionized acceptor or donor impurity diffusion  
 in uniformly doped n-or p-type  
 semiconductors 21 p3804 A66-39468  
**IONIC PROPULSION**  
 Space travel projects noting ion propulsion,  
 electromagnetic drive and tests of flight  
 simulation 03 p0415 A66-12483  
 Propulsion efficiency of magnetic annular  
 arc /MAARC/  
 [AIAA PAPER 66-115] 06 p0808 A66-16251  
 Kaufman-type mercury ion accelerator and  
 efficiency as affected by operating  
 parameters 08 p1281 A66-18722  
 SERT capsule tested two ion engines in  
 space 08 p1281 A66-18735  
 Negatively charged colloid generation by  
 electrostatic spraying, with capillaries  
 arrayed alternately positive and negative  
 [AIAA PAPER 66-251] 10 p1594 A66-21702  
 Cesium-vapor ion electrostatic drives for  
 long-term space flight 11 p1761 A66-23129  
 Colloid particle electrostatic thrusters for  
 lunar ferry missions in specific impulse  
 range 1000-3000 sec 12 p1937 A66-24903  
 Electrical propulsion of space vehicles  
 using solar energy, electrostatic drive,  
 drifting field plasma accelerator, etc  
 [ONERA TP 328] 12 p1937 A66-24904  
 Electrostatic ion sources, noting simulation  
 chamber for tests and measurement results  
 on emissive power of porous  
 tungsten 16 p2791 A66-31191  
 Electrostatic ion sources, assessing thrust  
 output and lifetime for various space

missions and satellite attitude  
 control 16 p2791 A66-31192  
 Melting of solid bodies in chondrule size,  
 discussing accumulation mechanisms  
 involving electrostatic acceleration and gas  
 motions 18 p3225 A66-33622  
 Plasma Separator Thruster, advanced ion  
 thruster design based on independent  
 operation and optimization of plasma source  
 and plasma extraction system  
 [AIAA PAPER 66-598] 18 p3163 A66-34217  
 Propulsion efficiency of magnetic annular  
 arc /MAARC/  
 [AIAA PAPER 65-115] 23 p4107 A66-41901  
 Electrical propulsion devices for space  
 vehicles related to plasma physics, ion-beam  
 generation and particle  
 dynamics 24 p4262 A66-43120  
**IONIC REACTION**  
 Helium afterglow discussing stability of  
 collisional-radiative recombination of ions  
 with electrons and neutral  
 particles 04 p0547 A66-13652  
 Linear free energy relationship between  
 benzoyl and acetyl ion intensities in mass  
 spectra of benzo- and acetophenones  
 explained by kinetic  
 argument 10 p1495 A66-21165  
 Ion-molecule reaction rates and  
 recombination coefficients from mass  
 spectrometric ionospheric  
 data 11 p1702 A66-23492  
 Metal-ceramic boundary structures and  
 reactions, considering metal-oxide and  
 metal-glass interfaces, ionic and covalent  
 bonds, oxidation, reduction, solution and  
 precipitation 13 p2108 A66-25767  
 Proton transfer between hydrogen and  
 methane, ethane, propane and butanes, using  
 high-pressure mass spectrometry, employing  
 ion source with beta rays as ionizing  
 medium 13 p2018 A66-26443  
 IR quantum counter based on energy  
 transfer between two rare-earth ions in  
 tungstate mixture 15 p2568 A66-29642  
 Rate constant for atomic oxygen ion  
 destruction by carbon dioxide measured in  
 pulsed flowing afterglow  
 system 16 p2645 A66-30115  
 Ion-molecular reactions of hydrogen with  
 inert gases caused by low energy electrons  
 in low temperature plasmas, considering  
 energy level populations, reaction cross  
 sections, etc 18 p3064 A66-34026  
 Chemical kinetics of electron plasma  
 reactions, discussing energy states, ion-  
 molecule reactions, charge transfer,  
 transport properties, phase interactions,  
 etc 21 p3702 A66-38448  
 Ionospheric ion-molecular reaction rates,  
 discussing various measurement  
 results 21 p3734 A66-39319  
 Negative ion associative detachment  
 reaction with atomic oxygen in  
 determination of nighttime D region  
 electron density profiles at high  
 latitudes 22 p3905 A66-39945  
 Attachment coefficient and temperature  
 dependence of ionic reactions in F layer for  
 various activation  
 energies 22 p3908 A66-39968  
 Rate constants for atomic and molecular  
 hydrogen ion transfer from tri- and tetra-  
 atomic carbon paraffins to propylene and  
 cyclopropane molecular  
 ions 22 p3861 A66-40905  
 Ionic reaction in nitrogen-oxygen system,  
 discussing reactions of He and N  
 ions 23 p4063 A66-41039  
 Heat of formation of perfluoroammonium  
 ion estimated from thermochemical  
 correlations and compared with estimates by  
 means of Kapustinskii approximation for  
 lattice energies 23 p4031 A66-41222  
 Charge exchange cross sections for argon  
 ions incident on hydrogen and deuterium  
 measured over energy range of 30 to 1000  
 ev, taking into account ion-molecule  
 reactions 23 p4098 A66-41267  
 Cross sections for charge transfer reactions  
 of nitric oxide with atomic and molecular  
 ions of oxygen and  
 nitrogen 24 p4200 A66-42590  
 Ionic reactions of gaseous methane using  
 tandem mass spectrometer, noting  
 translational energy  
 effects 24 p4170 A66-43035

**IONIC WAVE**  
**SA IONOSPHERIC CONDUCTIVITY**  
 Ionic waves amplified by collective  
 behavior in alkali plasma obtained by  
 contact ionization of cesium or potassium  
 vapors on surface of two coaxial tantalum  
 cylinders 01 p0110 A66-10331  
 Saturation and short-time behavior of  
 unstable ion waves in collisionless alkali  
 plasmas in thermal  
 equilibrium 01 p0110 A66-10339  
 Node in radial velocity as boundary  
 condition for ion waves in low pressure  
 plasma and dispersion relations for space  
 charge sheath 01 p0113 A66-10622  
 Collisionless plasma flow over cone when  
 flow velocity is greater than ion wave speed  
 [AIAA PAPER 65-125] 02 p0287 A66-11534  
 Plasma kinetic theory effect of magnetic  
 field on dispersion relation for ionic sound  
 wave 02 p0269 A66-11836  
 Ionization excitation of ionic sound in  
 nonequilibrium discharge plasma and  
 resultant instabilities 03 p0400 A66-12835  
 Steady state jump equations for normal  
 ionizing shock wave propagating into  
 nonconducting gas in electromagnetic  
 field 07 p1087 A66-17939  
 Collision effect on coupling of ion-acoustic  
 waves to neutral acoustic waves at diffuse  
 boundary consisting of partially ionized  
 gas 07 p1088 A66-17955  
 Plasma permittivity modulation by ion  
 waves for thermally ionized alkali plasma in  
 microwave resonator 08 p1266 A66-19811  
 Stagnation layer of rigid plate resulting  
 from cool energetic plasma stream  
 interaction 10 p1567 A66-21820  
 Weak collisions effect on ion waves  
 instability in cesium plasma solved via  
 linearized Fokker-Planck  
 equation 10 p1568 A66-21823  
 Resonant excitation by external forces,  
 propagation and reflection of ion acoustic  
 standing waves between electrodes in  
 mercury vapor discharge 10 p1568 A66-21831  
 Excitation of LF ionic plasma oscillations  
 by HF electronic Langmuir  
 waves 12 p1921 A66-24205  
 Charge sheath role at discharge wall in  
 determining boundary conditions for LF  
 wave in low pressure discharge, using  
 hydrodynamical model 12 p1923 A66-24571  
 Ion acoustic waves propagating along  
 cylindrical plasma column analyzed, deriving  
 boundary condition at plasma  
 surface 12 p1923 A66-24572  
 Excitation of ion-acoustic waves in  
 potassium-cesium plasma when passing  
 current through it, finding natural  
 frequencies of system when plasma is  
 drifting along axis 15 p2550 A66-29214  
 HF heating of dense plasma by resonance  
 excitation of cyclotron-type ion waves and  
 fast magnetoacoustic  
 waves 16 p2756 A66-30095  
 Transverse electromagnetic wave  
 transformation into ion-acoustic plasma  
 oscillations with formation of intermediate  
 Langmuir electron wave 17 p2969 A66-32542  
 Nonlinear ion-acoustic wave propagation  
 in collisionless hot electron plasma with at  
 least one cold ion stream 17 p2973 A66-32976  
 Standing ion acoustic waves in mercury  
 vapor discharges 17 p2973 A66-32983  
 Dispersion of ion waves in mercury vapor  
 discharges, carrying out spectral analysis of  
 acoustic and plasma  
 oscillations 18 p3146 A66-34234  
 Transverse boundary effects on ionic-  
 acoustic wave propagation in  
 magnetoplasma 18 p3150 A66-34938  
 Ionization excitation of ionic sound in  
 nonequilibrium discharge plasma and  
 resultant instabilities 19 p3433 A66-36777  
 Generation of ion plasma waves in weakly  
 ionized gases with measurement of phase  
 velocity and damping 20 p3609 A66-37597  
 Standing ion acoustic waves between  
 cathode and electrically floating auxiliary  
 metal electrode, noting discharges in  
 mercury vapor between plane oxide-coated  
 cathode and nickel anode 22 p3954 A66-39817  
 Excitation of LF ionic plasma oscillations  
 by HF electronic Langmuir  
 waves 22 p3956 A66-40569  
 Ion-acoustic wave propagation and damping  
 in plasma with negative

ions 23 p4104 A66-41505

**IONIZATION**

SA ATMOSPHERIC IONIZATION

SA AURORAL IONIZATION

SA ELECTRON IONIZATION

SA EXCITATION

SA FLAME IONIZATION

SA GASEOUS IONIZATION

SA METEORITIC IONIZATION

SA NONEQUILIBRIUM IONIZATION

SA PHOTODISSOCIATION

SA PHOTOIONIZATION

SA SURFACE IONIZATION

Chromospheric emission lines of magnesium iodine analyzed, calculating hydrogen concentration and ionization degree at 1000 km 01 p0134 A66-10269

Hypersonic wakes, effects of turbulent fluctuations on air ionization reaction rates measured by averaging and regrouping perturbed source terms of chemical rate equations 03 p0359 A66-13230

[AIAA PAPER 65-819] 03 p0359 A66-13230

Resonances below inelastic threshold of electron hydrogen scattering using Feshbach projection-operator technique, converting to eigenvalue problem for projected Hamiltonian 04 p0547 A66-13711

Qualitative interpretation of negative resistance by impact ionization of deep level impurities noting temperature, impurity concentration and energy level 05 p0735 A66-14964

Microwave switching and pulse modulation by impact ionization, using DC electric field to break down n-type germanium 06 p0851 A66-16454

Equilibrium constant of thermal and photolionization of conducting particles present as impurities in partially ionized gas 06 p0918 A66-16838

Low temperature and ionization effects on stability of close-pair defects in semiconductors and behavior at higher temperatures 06 p0932 A66-17113

Satellite ionization effects, CW-reflection and pulse radar techniques in 10 to 20 mc frequency range 08 p1181 A66-18749

Discharge in germanium thin films at liquid helium temperatures, noting electrostatic ionization of impurities and shock-ionization region expansion 09 p1412 A66-19990

Ionization effect on plasma thermoconductivity, noting expressions for conductivity due to energy transfer or dissociation 09 p1407 A66-20136

Average electrical conductivity and state of ionization in RF plasma flow device [AIAA PAPER 66-165] 11 p1742 A66-22209

Radio wave propagation in artificial ionized cloud in upper atmosphere determined, using geometrical optics 12 p1817 A66-24274

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 12 p1930 A66-24460

Gabor type auxiliary discharge thermionic converter producing ions for space charge neutralization by impact, noting critical converter equation 13 p1998 A66-25530

Ionization calorimeter for measuring primary cosmic ray components, discussing nuclear interactions, energy spectra, EM cascades, etc 13 p2175 A66-26011

Ionization process in comets does not depend on solar electromagnetic or corpuscular radiation, considering it as intrinsic property of cometary atmospheres 15 p2598 A66-29267

Electric current density in ionizing discharge layer determined, using multifluid equations of conservation of momentum and gas mass 17 p2967 A66-32435

Electron scattering interpretation of ionization, emission and absorption line spectra of quasi-stellar object 17 p3004 A66-32928

Effective ionization and charge exchange areas of certain gases undergoing collisional ionization by accelerated ions 17 p2961 A66-32954

Microwave limiter device, based on impact ionization of deep levels in silicon 17 p2897 A66-33461

Ionization probability of bound state of atoms in variable electric field 18 p3140 A66-34690

Book on glow discharge and plasma physics

including collisional processes, ionization, vacuum systems, application in electronics, etc 18 p3150 A66-34946

Range fluctuation of high energy mesons including effect of logarithmic increase of ionization loss derived, using analytical solution, considering effects of bremsstrahlung, pair, etc 18 p3222 A66-35209

Prelonization and shock wave ionization in cylindrical crossed-field plasma source, using microwave diagnostic methods including interferometry 19 p3408 A66-36277

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 20 p3620 A66-37692

Intense beams of fast neutral hydrogen atoms injected into magnetic trap by ionization in strong magnetic field 21 p3789 A66-39060

Ionization and secondary effects during reflection of shock waves in argon 21 p3726 A66-39086

Ionization effect on plasma thermoconductivity, noting expressions for conductivity due to energy transfer or dissociation 21 p3793 A66-39408

Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 21 p3794 A66-39551

Flare stars as sources of cosmic X-rays, spectra contain 4686-angstrom line of doubly ionized helium indicating that atmospheres contain either ionizing radiation or electrons 22 p3972 A66-39707

Nonequilibrium plasmas produced in InSb by both impact ionization and injection, examining instabilities due to HF oscillations and negative resistance 23 p4114 A66-41582

Photographic measurement on optical radiation associated with hypervelocity impact of projectile on target 23 p4091 A66-41909

Approximate differential operator replacing integral operator, taking ionization losses into account in electromagnetic cascade theory 24 p4269 A66-42923

**IONIZATION CHAMBER**

Ionization chamber for measuring interplanetary space radiation, using Geiger-Mueller counter as secondary detector 01 p0073 A66-11115

Four-year cosmic ray ionization bursts, using ASK-2-34 ionization chamber 06 p0949 A66-16589

Laboratory simulation, in continuum and rarefied flow regimes, of perturbations of ionosphere by satellite and rocket exhaust 06 p0869 A66-16908

Nuclear active particles analysis by observing integral spectrum of ionization bursts under thick layer of dense material at low altitudes 07 p1115 A66-17554

Ionization bursts in shielded spherical chambers with burst data transformed to give integral energy distribution of muon intensity at sea level 07 p1116 A66-17563

Muon detection and energy determination in multilayer system of ionization chambers and probability of finding muon in n-electron shower at depth 07 p1117 A66-17569

Extensive air shower high energy gamma rays in upper third of atmosphere 07 p1118 A66-17573

Cosmic ray intensity measured during geomagnetically quiet and active days from 1959 to 1963 by using balloon flights, noting role of ionization, Forbush effect, etc 07 p1124 A66-18000

Extensive air showers at various atmospheric depths analyzed, using hodoscope counters and ionization chambers, noting differential spectra of densities 15 p2580 A66-29528

Delta-electron generation by muons and fluctuations in soft cosmic ray component, assuming thick absorption layer 15 p2547 A66-29598

Photoelectric yields of alkali halides measured, using rare gas ion chamber to determine flux distribution of helium continuum and obtain absorption coefficients 16 p2754 A66-30855

Tien-Shan high altitude installation for studying strong interactions at 100-1000 gev of cosmic ray nucleons and

ions 18 p3214 A66-3515

Nuclear cascade particles ionization at various depths in iron compared with experimental data in ionization calorimeter 18 p3214 A66-3515

Nuclear active component of cosmic ray studied with arrangement consisting of ionization calorimeter, Geiger counter, hodoscope and two large spark chambers 18 p3215 A66-3515

Ionization chamber to investigate distribution of energy portion transferred to photons by nuclear active particles colliding with atomic nuclei of C, Fe and Pb 18 p3215 A66-3515

Absorption path of high-energy protons in atmosphere measured by ionization calorimeter 18 p3216 A66-3516

Tskhra-Tskaro installation for study of high-energy cosmic particle interaction with matter 18 p3218 A66-3518

Relationship of neutral and charged particles generating electron-nuclear showers studied by ionization calorimeter 18 p3218 A66-3518

Constant current sources consisting of sealed ionization chambers for calibrating electrometers 19 p3357 A66-3580

Pressurized Ar-filled ionization chamber response to charged particles in cosmic radiation determined as function of atmospheric depth 24 p4284 A66-4260

Interaction of 1000 bev particles in ionization calorimeter technique suggests free path of nuclear active particles in atmosphere decreases as particle energy increases 24 p4287 A66-4290

**IONIZATION COEFFICIENT**

Photolionization and absorption coefficient of carbon oxide measured below 100 angstroms, using Seya-Namioka scanning vacuum UV monochromator with helium continuum as background 02 p0263 A66-1183

Electron-ion recombination rate and effective ionization calculated for cesium plasma by Bates method 03 p0398 A66-1251

Comparison of diurnal variations of ionization level in F region at geographically and geomagnetically conjugate stations in Arctic and Antarctic 04 p0516 A66-1385

Two-fluid approximation of one-dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes 08 p1265 A66-1946

Electric discharges in gases analyzed in terms of ion and electron drift velocity and ionization coefficient 10 p1558 A66-2205

Meteor luminosity/ionization ratio dependence on air density found through analysis of ablation rate of meteor 14 p2387 A66-2817

Ionization and diffusion cross sections of Ca, Fe, Si and Mg atoms of disintegrated meteors 19 p3455 A66-3527

Electron drift velocity, ionization attachment coefficients in water vapor and dry air measured by recording short photoelectron pulses 20 p3605 A66-3809

Magnetic field-aligned ionization detected during minimum sunspot activity, using radio telescopes of radio interferometer 22 p3908 A66-3996

**IONIZATION COUNTER**

Measurement and evaluation of radiation exposure in space flight, noting tissue equivalent system for ionization recording 02 p0182 A66-1164

Pulse ionization manometer based on open 6Zn2P pentode with oxide cathode for measuring fluctuating inactive-gas pressure 04 p0520 A66-1389

Pulse ionization manometer based on open 6Zn2P pentode with oxide cathode for measuring fluctuating inactive-gas pressure 15 p2503 A66-2970

Electron-photon and nuclear active components energy of young air shower measured by ionization calorimeter, determining inelasticity coefficient 18 p3206 A66-3510

Ionization calorimetry of energy spectrum of leading particles in cores of EAS compared with data from model 18 p3206 A66-3510

Measurement and evaluation of radiation exposure in space flight, noting tissue equivalent system for ionization recording 20 p3509 A66-3816

- ionization calorimeter measurement of number of particles in electron photon cascade with energy transferred from ionization calorimeter 24 p4269 A66-42924
- IONIZATION CROSS SECTION**
- Charge exchange and ionization cross sections for hydrogen ions passing through ordinary and heavy hydrogen 01 p0107 A66-10194
- Average energy loss per ion pair of low energy nitrogen and oxygen ions in nitrogen, argon and helium 01 p0107 A66-11096
- Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 02 p0286 A66-11357
- Electron collision cross sections of atoms and molecules of argon, helium, nitrogen and dissociation products of carbon dioxide by dual beam radiosonde methods to study low temperature plasma behind shock front 02 p0268 A66-11780
- Modifications of impulse approximation allowing for motion of bound electrons, providing simple analytic expressions for atomic ionization and detachment cross sections 03 p0394 A66-12328
- Impact ionization coefficient for electrons and holes in silicon determined from distribution function of hot carriers and shown to be weakly dependent on ionization cross section 04 p0565 A66-14262
- Ionization cross section of ground state helium cation by electron impact in Born exchange approximation 04 p0549 A66-14312
- Elastic differential scattering of helium ions discussing energy analysis, geometry and target particle motion effects, and interference phenomena 05 p0719 A66-15767
- Ionization of inert-gas atoms and of hydrogen and nitrogen molecules by alkali metal ions of energies greater than 1 to 30 ev 06 p0915 A66-16151
- Hydrogen molecule multiphoton ionization, determining probability of absorption, affected by ruby laser emission 06 p0891 A66-16517
- Bethe approximation of ionization cross sections of excited states of atomic hydrogen by high energy electrons 06 p0912 A66-17037
- Neutral atomic beam used to measure total ionization cross section of argon atoms incident on low density argon 07 p1083 A66-18421
- Absolute cross section for single ionization of lithium ions by electron impact over 75.6 to 800 ev electron energy 07 p1084 A66-18425
- Nonequilibrium radiative and collision ionization, photoionization and shock wave structure in high temperature hypervelocity low density gas 08 p1204 A66-18521
- Radar echo effects of satellite disturbance in plasma medium, noting electron and positive ion density distribution 08 p1302 A66-18755
- Appleton anomaly of F-2 layer examined, assuming ionization induced horizontal motion of neutral air 08 p1215 A66-19207
- Hydrogen molecule multiphoton ionization, determining probability of absorption, affected by ruby laser emission 09 p1387 A66-20898
- Effective excitation cross sections of alkali metal atoms during collision with slow electrons 09 p1406 A66-20940
- Absolute cross section for ionization of atoms and diatomic molecules by electron impact 09 p1410 A66-20958
- Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 10 p1602 A66-21088
- Exospheric model of solar wind for ionized atmosphere with velocity-dependent collision cross section 10 p1605 A66-21206
- Ionosphere formation theory, reviewing solar radiation, absorption, ionization cross section rate, electron renewal in F and upper E layer, etc 10 p1533 A66-21851
- Multiphoton ionization of xenon atom in powerful electric field by ruby laser radiation 10 p1543 A66-21966
- Born approximation of cross sections for electron and proton impact ionization of Na and Mg 11 p1737 A66-22496
- Born-exchange and Ochkur approximations used to calculate electron impact ionization cross sections for He, Li, Be, Na and Mg atoms in ground states 11 p1737 A66-22497
- Ionization charge stage for spectral lines determined by sending particle beam through field which separates components of different net charge 11 p1739 A66-22949
- Langmuir probe to measure stagnation region shock layer ionization distribution under nonequilibrium hypersonic flow conditions [AIAA PAPER 66-167] 13 p2138 A66-25168
- Ionizing collisions between alkali metal atoms and gas molecules, with measured cross sections applied to physics of atomic collisions 13 p2131 A66-25966
- Ionization cross section for rare gases and hydrogen atoms calculated from perturbation theory, noting ruby laser photon absorption 13 p2133 A66-26188
- Atomic ionization by intense optical field, noting ruby laser-pulse effect on inert gas between electrodes 13 p2134 A66-26189
- Ionization enhancement from Van Allen electrons in South Atlantic magnetic anomaly, noting longitudinal variation of trapped electrons, electron-ion recombination, etc 13 p2176 A66-26362
- Bethe-Born approximation and partial ionization cross sections of singly and doubly charged helium and neon ions 14 p2336 A66-26830
- Bethe-Born approximation and partial ionization cross sections of argon, krypton and xenon ions 14 p2336 A66-26831
- Ionization cross sections for low energy collisions of neutral nitrogen molecules or neutral argon atoms, using asymmetric charge transfer 14 p2337 A66-27980
- Effective excitation cross sections of alkali metal atoms during collision with slow electrons 15 p2543 A66-28529
- Energy spectrum of primary photoelectron, using data from atmospheric density distribution, fluxes of solar XUV radiations and absorption and ionization cross sections 15 p2574 A66-28906
- Asymptotic form of wave function and threshold behavior of cross section for ionization of atomic hydrogen by electron impact 15 p2544 A66-29116
- Photoionization of atoms in coherent states 15 p2515 A66-29205
- Variation of most probable muon energy loss with momentum, noting density effect and decrease in ionization loss 15 p2589 A66-29586
- Cesium ionization cross section measurement from threshold to 50 ev, noting apparatus used and results obtained 15 p2548 A66-29814
- Ionization of inert-gas atoms and of hydrogen and nitrogen molecules by alkali metal ions of energies greater than 1 to 30 kev 15 p2548 A66-29881
- Photoionization of atoms in coherent states 17 p2936 A66-33054
- Ionization of low temperature supersonic plasma jets, noting kinetics of elementary processes, gas dynamic parameters and effects of combustion and alkali metal admixtures 18 p3143 A66-34030
- Retarding potential measurement of kinetic energy of electrons released in Penning ionization by excited helium atoms in metastable electron states 18 p3139 A66-34505
- MHD power generator in which ionization of alkali atoms occurs by collision with excited noble gas atoms, calculating velocity-dependent cross section 19 p3406 A66-35436
- Ionization of hydrogen and hydrogenic positive ions by electron impact 19 p3409 A66-36324
- Second Born and Born-exchange approximations used in calculation of ionization cross sections for Fe XV and Fe XVI 19 p3403 A66-36325
- Excitation of lithium-like ions by electron impacts, with computation of cross sections for resonance and nonresonance transitions 19 p3409 A66-36326
- Photoionization cross sections calculated for carbon, nitrogen and oxygen ions, using Hartree-Fock approximation for final transition stages 19 p3405 A66-36805
- Ionization due to alpha, beta and gamma radiation from ground and atmosphere in ground proximity, noting ion pair production rate and energy spectra 20 p3552 A66-37759
- Ionization of oxygen examined, using charge exchange in double mass spectrometer, noting break in electron impact ionization efficiency curve and constructing breakdown graph 20 p3605 A66-38097
- Multiphoton ionization of xenon atom in powerful electric field by ruby laser radiation 21 p3749 A66-39545
- Replacement of Poisson by Polya distribution in calculating laser intensity threshold necessary to induce ionization breakdown in gases 22 p3929 A66-39715
- Photoionization cross section of negatively charged In atoms in n-type silicon from comparison of intrinsic photoconductivity with impurity photoconductivity 22 p3964 A66-40309
- Ionization cross sections and efficiencies by electron impact and photoionization for molecular ionization at low energies 23 p4098 A66-41268
- Small neutral hydrogen flux in total solar wind flux and electron impact and photoionization mechanisms 23 p4123 A66-41689
- Initial phase of shock produced ionization in argon, krypton and xenon to elucidate atom-atom ionization reaction to determine cross section 23 p4098 A66-42079
- Shock tube monitoring of electron-generation rate in argon-xenon ionization cross section implies that atom-atom processes in noble gases ionization cross section is independent of electronic structure 23 p4099 A66-42080
- IONIZATION FREQUENCY**
- Ionization bursts observed in chambers used for continuous registration of intensity variations in hard component of cosmic radiation, correlating variation frequency with solar cycle 06 p0950 A66-16591
- Diffusion technique preparation of GaP p-n junctions and relation of p-i-n junction electric field calculation to Baraff carrier ionization rate theory 07 p1108 A66-18415
- Dependence of variations in critical F-2 ionization on solar activity 08 p1220 A66-19791
- Loss rates of charged particles from ohmically-heated discharges in C-Stellarator, showing confinement time parameters 10 p1568 A66-21825
- Ion-molecule reaction rates and recombination coefficients from mass spectrometric ionospheric data 11 p1702 A66-23492
- Computer method for determination of distribution of low lying ionization, using ordinary and extraordinary wave traces in ionograms 12 p1873 A66-24838
- Critical ionization frequencies in F-2 layer in near-polar region observed at Northern Hemisphere high latitude stations 15 p2487 A66-29107
- Perturbation theory approach to calculation of autoionization rates 15 p2548 A66-29807
- Dependence of variations in critical F-2 ionization on solar activity 21 p3733 A66-38787
- Time resolved emission measurements for Cr-Ar mixtures in three spectral regions and ionization occurrence in excited state inelastic collisions 23 p4033 A66-42083
- IONIZATION GAUGE**
- Nuclear interaction at high energies, discussing active component structure ionization calorimeter application, energy spectrum of particles, etc 07 p1113 A66-17536
- Modulation method applied to Bayard-Alpert and suppressor ionization gauges for reducing lower pressure limits 07 p1033 A66-17742
- Electrode geometry, optimum configuration of hot-filament vacuum ionization gauges, and ion-collector burying technique 17 p2923 A66-31981
- Hydrogen, nitrogen, oxygen and helium gas pumping by ionization pressure gauges in space simulators 22 p3891 A66-40233
- Ionization gauge for transient gas pressure measurement 24 p4215 A66-43210
- IONIZATION POTENTIAL**
- Alkali-ion desorption energies measured on

polycrystalline refractory metals at low surface coverage by electron work function 02 p0263 A66-11483

Ionization potential of thulium obtained from hfs of thulium I, using discharge tube and Fabry-Perot etalon 03 p0393 A66-12322

Relative density and shock front velocity for strong shock waves in hydrogen, helium and argon, using ionization-potential drop deducible from Debye-Huckel theory 04 p0556 A66-14338

Ionization under laser action extended to metals and dielectrics, noting influence on thresholds 06 p0893 A66-17065

Partition function of hydrogen plasma derived classically and by quantum mechanics, obtaining Saha equation containing effective lowering of ionization potential 07 p1090 A66-18155

Mass spectrometric electron impact ionization potentials rapidly obtained by electronic control and automatic data processing systems 07 p1091 A66-18489

Potential and charge density distributions derived for stationary charged sphere and charged body moving through plasma 08 p1261 A66-18744

Potential striae determined in hollow cathode plasma 08 p1264 A66-19183

Ionization energy in silicon carbide and germanium irradiated by electrons 08 p1278 A66-19628

Solar radiation effect on Langmuir frequency, noting ionization of cesium vapor at low potential differences 09 p1409 A66-20925

Ionization threshold observation in Si Zener diodes and multiplication factor 10 p1509 A66-21586

Ionization phenomena in argon due to laser radiation by measuring electron density and energy as time function after laser pulse initiation at different gas pressures and preionized conditions [AIAA PAPER 66-176] 10 p1565 A66-21690

Electron impact ionization cross section of H<sup>+</sup>/2s/ and H<sup>+</sup>/2p/ in Born A, Born B, Born-Ochkur and classical approximations 11 p1738 A66-22498

Ionization charge stage for spectral lines determined by sending particle beam through field which separates components of different net charge 11 p1739 A66-22949

Hydrogen plasma ionization density calculation by three methods 11 p1747 A66-23265

Diurnal and seasonal altitude variations of E and F layers analyzed for geomagnetic activity from rocket measurement of electron concentration 12 p1869 A66-24269

Electrical characteristics of linear, segmented electrode, Hall and Faraday MHD generators operating in equilibrium and nonequilibrium ionization modes, obtaining data on loss mechanisms 13 p2001 A66-26256

Band shift in strongly doped semiconductor under influence of impurity atom electrostatic field 14 p2356 A66-27069

Franck-Condon factors for ionization of hydrogen and deuterium, noting vibrational eigenenergies of D sub 2 14 p2387 A66-27972

Temperature dependence of mean ionization energy changes in germanium and silicon samples exposed to X-rays caused by changes in forbidden bandwidth 16 p2788 A66-31782

Molecular orbital method for boron hydrides from self-consistent field, analyzing dipole moments, ionization potentials, molecular charge distributions, wave functions, etc 17 p2870 A66-32851

Lanthanum oxide as crystal growth modifier, noting habit modifications, optical quality, etc 17 p2982 A66-33060

Ionization energy in silicon carbide and germanium irradiated by electrons 17 p2984 A66-33142

Laboratory work on comets, discussing spectroscopic data, incompleteness of knowledge of dissociation energies and ionization potentials, etc 17 p3012 A66-33400

Ionization potential, dissociation energy and electron affinity for molecular oxygen 18 p3137 A66-33989

Electrostatic potential near nucleus immersed in plasma evaluated, using finite-temperature Thomas-Fermi model 18 p3230 A66-34152

Multiphoton ionization of krypton and argon by ruby laser radiation may occur by absorption 19 p3403 A66-36721

Barium ion concentration computed from Ba II 4554 angstrom line and Lyman alpha radiation intensity in lower chromosphere 20 p3646 A66-37013

Saha equation correction based on consideration of ionization energy reduction from particle interaction in thermal plasma 21 p3793 A66-39371

Dissociation energies of GaF, InF and TiF measured by high temperature mass-spectrometric techniques, noting possibility of potential maxima in excited states 22 p3859 A66-39917

Band shift in strongly doped semiconductor under influence of impurity atom electrostatic field 22 p3966 A66-40828

Mercury, cesium and rubidium vapors ionization in intense radiation flux by Q-switched ruby laser 23 p4076 A66-41156

Qualitative detection of alkyl-free radicals generated by pyrolyzing certain organic compounds, using modified commercial mass spectrometer 23 p4067 A66-41246

Cosmic ray ionization intensity measurement using special ion chamber 24 p4264 A66-42603

Plane gridded retarding potential analyzer for measuring dominant constituent ion concentrations, temperature and instrument potential in planetary ionospheres 24 p4201 A66-42605

**IONIZED GAS**

**SA PLASMA**

Electric conductivity of N-component gas mixture containing one partially ionized component 02 p0265 A66-11389

Positive gas discharge column equilibrium and instability factors, noting increase in ionization and plasma conductivity from decreased electron heating 03 p0398 A66-12509

Quasi-one-dimensional ionized gas motion through channels of arbitrary cross section in crossed electrical and magnetic field 03 p0398 A66-12516

Quantum statistical theory of multicomponent systems applied to fully ionized gas in thermal equilibrium 03 p0398 A66-12605

Macroscopic theory for fully ionized plasma waves 03 p0399 A66-12785

Ring of ionized hydrogen in region 3.5 to 4.5 kpc from galactic center 03 p0426 A66-12908

Total thermoconductivity of ionized gas calculated with no simplification of components 03 p0401 A66-12964

Physics of ionized media - French Society of Physics, National Colloquium, Toulouse, France, May 1965 03 p0401 A66-12965

Ohm law for partially ionized gases and plasmas 03 p0403 A66-12974

Structure of steady plane shock in partially ionized gas, using three-fluid Navier-Stokes model, obtaining velocities, temperatures, electric field and potential distributions through shock 03 p0357 A66-12976

Travelling fields in interaction of ionized gases with electromagnetic field currents checking Lorentz force and magnetic induction 03 p0404 A66-12980

Dispersion relation for plane longitudinal waves within macroscopic theory, considering collisions and viscosity of neutral particles, noting acoustical and ionic modes 03 p0404 A66-12983

Relativistic theory for plane shock wave in ionized hydrogen 03 p0358 A66-13140

Space shift between electron density and luminous intensity of plasma in stationary striation by microwave resonator 03 p0372 A66-13282

Radiation resistance of antennas in gyroelectric media 04 p0492 A66-13424

Ray dispersion of electromagnetic waves by free electrons produced in cone-shaped ionized wake 04 p0481 A66-13843

Electromagnetically driven ionizing shock waves propagating in hydrogen at speeds to relativistic conditions 04 p0511 A66-14010

Spectral line intensities of hydrogen and helium plasma in P.I.G. discharge 04 p0553 A66-14283

Small amplitude wave propagation in hot ionized gases, noting magnetic field

presence 05 p0721 A66-147

Computation of shock wave parameter partially ionized hydrogen 05 p0662 A66-148

Speed of sound in ionized argon, noting electronic excitation influence 05 p0723 A66-151

Estimation in equilibrium state surface potential and distributions of electric potential field and electron density vicinity of object moving in ionized medium 05 p0685 A66-157

Nonequilibrium ionization of K-seeded Na-seeded argon for MHD generators, noting current density-electric field characteristics 05 p0625 A66-158

Plasma generation of ionized gases electromagnetic field and properties 05 p0729 A66-158

Plasma velocity in weakly ionized gas with strong magnetic field and neutral component velocity determined independently [AIAA PAPER 66-4] 06 p0916 A66-162

Equilibrium constant of thermal arc photoionization of conducting particles present as impurities in partially ionized gas 06 p0918 A66-168

Physics of spark discharges igniting gaseous mixtures, noting increase in thermal power of discharge by gas preionization resulting from energy redistribution 06 p0919 A66-168

Radial distribution of electrical conductivity in ionized gas jet based on value measured by induction method at known temperature distribution 06 p0919 A66-168

Photon momentum distribution in fully ionized gas 07 p1082 A66-174

Steady state jump equations for nonionizing shock wave propagating in nonconducting gas in electromagnetic field 07 p1087 A66-178

Current density and heat flux expression in terms of transport coefficients partially ionized gas, noting thermoconductivities 07 p1088 A66-179

Detection of ionized gas front passage at differentiating it from current sheet magnetically driven shock tube 07 p1020 A66-179

Isotope shift, linewidth and predicted wavelength of laser emission in ionized Hg 07 p1044 A66-180

Steady state exothermal hydromagnetic discontinuity in perfectly conducting gas in arbitrarily oriented magnetic field 08 p1267 A66-198

Electron and ion recombination coefficient in weakly ionized gas of homopolar molecules 09 p1407 A66-199

Nonequilibrium transport properties of electron relaxation at cooled surface partially ionized argon 10 p1559 A66-212

Boltzmann transport equation solution for electrons in ionized gas with nonuniform electron concentration gradient 12 p1916 A66-237

Transference numbers in ionized gas contrasting current flow in electrolytes with steady state current flow in weakly ionized gases 12 p1920 A66-240

Electrical precursors in immediate vicinity of ionizing shock waves in argon analyzed using model describing electron diffusion through shock 12 p1923 A66-245

Nonequilibrium effect in two-dimensional steady flow of ionizing gas past magnetized wall, calculating velocity distribution along wall 12 p1924 A66-248

Measurement of effective cross sections of double charge of hydrogen, lithium, sodium and potassium ions in gases, considering error due to unequal scattering of primary and secondary particles 12 p1918 A66-248

Metal wall ionized argon lasers, discussing use of water-cooled quartz discharge channels, CW lasers, development of satisfactory metal, etc 13 p2091 A66-255

Electrical and gas dynamical parameter effect on length of linear constant Mach number MHD duct, assuming gas is ionized by neutron irradiation in expansion nozzle preceding duct and electron recombination takes place in duct 13 p2000 A66-257

Partially ionized plasma drift across toroidal magnetic field arises from collision with neutral gas 13 p2146 A66-257

- Transition probabilities and lifetimes in ionized argon gas lasers 13 p2102 A66-26207
- Differential scattering of ionized helium on neon and argon and ionized argon on argon measured at various relative energies and scattering angles 13 p2135 A66-26269
- Current density in slightly ionized gas for arbitrary collision cross section 13 p2150 A66-26274
- Numerical solution of steady state jump equations for normal ionizing shock waves in hydrogen, assuming upstream and downstream states at chemical equilibrium 13 p2154 A66-26661
- Shock and ionization fronts propagation in gas-dust medium 14 p2380 A66-27255
- Ring of ionized hydrogen in region 3.5 to 4.5 kpc from galactic center 14 p2380 A66-27256
- Mobility of various ions in nitrogen and argon and mobility and diffusion of ions in hydrogen 14 p2345 A66-28138
- Propagation of ionizing fronts across magnetic field, examining flow behind and ahead of front 14 p2347 A66-28305
- Electrical discharge in air, mercury vapor and nitrogen, using RF signal probe, determining electron density and temperature and random velocity in plasma 15 p2548 A66-29715
- Ambipolar diffusion of plasma cloud imbedded in ionized gas with homogeneous magnetic field, assuming electric current is not vanishing 15 p2494 A66-30045
- Spectrum of plasma fluctuations in ionized turbulent gas explained by statistical turbulence theory, noting that electron temperature is larger than gas temperature 16 p2757 A66-30173
- Steady flow of highly rarefied ionized gas through channel with magnetic field solved by Monte Carlo method obtaining density, energies, wall shear stress, etc 16 p2759 A66-30371
- Transistor surface properties degradation by simulated space radiation environment 16 p2662 A66-30998
- Ionized gas flow rate behind detonation wave used with Chapman-Jouguet condition to determine speed of sound in reaction products 16 p2687 A66-31160
- Spectroscopy of plasmajets and electric arcs, noting spectral intensity, line width, etc 16 p2707 A66-31188
- Mean probability of coupling between electrons of flame on electronegative gas and radioactive bromine tracer injected into flame, calculating electrons coupling cross section on bromine 16 p2763 A66-31208
- Ionization equation for optically thin plasma, considering collisional ionization and recombination 16 p2763 A66-31350
- Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator 16 p2637 A66-31377
- Electron motion examined as major contributor to conductivity of thermally ionized gas in electrical field 17 p2964 A66-31892
- Origin and propagation of cosmic radiation, discussing interplanetary magnetic fields, plasmas, Faraday rotation of polarized radiation, Zeeman splitting of hydrogen line, etc 17 p2964 A66-32029
- Electron velocity distribution in ionized gas under alternating electric field as function of density, temperature, etc, including effects of recombination, ionization, etc 17 p2960 A66-32426
- Electric conductivity of multicomponent partially ionized gas calculated by simplified Chapman-Enskog method 17 p2967 A66-32446
- Steady-state axially-symmetric channel flow of ionized gas in external electromagnetic field in one-dimensional approximation 17 p2971 A66-32867
- Longitudinal Faraday emf, thermoelectric and Hall effects on channel flow of ionized gas 17 p2972 A66-32868
- Measurable range of ionizational relaxation behind shock front in argon extended to equilibrium region by mm-wave technique 17 p2912 A66-32982
- Spectroscopy of highly ionized atoms in problems which arose from solar spectrum study 17 p3006 A66-33074
- Ion lasers involving electron transitions in atoms or molecules with lost electrons 17 p2937 A66-33249
- Dynamics of type II comet trails, noting physical analogy in head and trail with rarified partially ionized gas 17 p3012 A66-33392
- Laminar boundary layer heat transfer measurements by thick-film calorimeter gauges on flat plate in dissociated and partially ionized air 17 p3039 A66-33483
- Theta pinch discharge study of four times ionized nitrogen /N V/ spectrum 18 p3136 A66-33628
- Radiation-induced gas ionization effects on surface properties of shielded transistors 18 p3076 A66-33984
- Magneto-Fanno flow shock tube experiments to determine one-dimensional MGD interactions between partially ionized gas flow and external magnetic field 18 p3145 A66-34111
- Hot flame gases ionization by electron reactions at atmospheric pressure 18 p3137 A66-34116
- Hollow electric collector probe for measuring ion density in rapidly flowing slightly ionized gas 18 p3112 A66-34244
- Transport properties of ionized monatomic gases, using Chapman-Enskog-Burnett approximation method for determination of thermal conductivity, diffusion coefficients and viscosity 18 p3149 A66-34927
- Boundary layer behavior in fully ionized two-temperature plasma 19 p3433 A66-36827
- Interaction between weakly ionized plasma cylinder and electromagnetic fields, plotting dependences between resonance current vs frequency for different gases 20 p3612 A66-38446

 Electromagnetic wave absorption and cosmic noise absorption measurements useful in radio communication 01 p0072 A66-11101  
 MHD absorption of internal gravitational waves in ionospheric F layer in terms of traveling disturbances 02 p0283 A66-12116  
 Auroral type of riometer absorption and magnetic disturbances for stations situated at different longitudes in auroral zone 03 p0364 A66-12660  
 Multiple antenna based on corner reflector used in absorption measurements in magnetically conjugate regions 03 p0334 A66-12661  
 Auroral absorption height obtained from statistical satellite data on average precipitation rate of electrons in auroral zone as function of energy 03 p0364 A66-12663  
 Excessive cosmic radiation absorption in lower nocturnal ionosphere at middle geomagnetic latitudes during Forbush

effects 04 p0514 A66-13443  
 Frequency dependence of cosmic noise levels during anomalous type II absorption, noting shielding sporadic E layer 04 p0574 A66-13859  
 Seasonal variation in short-wave signal absorption at different latitudes reflected in seasonal variation of gas density and ionospheric absorption at D region and lower E region 05 p0672 A66-15025  
 Coronal and prominence phenomena accompanying solar flares noting shock wave, radio burst, ionospheric fadeouts and absorptions, coronal density and temperature increases, etc 07 p1130 A66-18071  
 Spatial and time variations in ionospheric absorption at long wavelengths for small elevations of Sun and at nighttime 08 p1220 A66-19778  
 Annual variations of ionospheric absorption at medium and long wavelengths measured by A3 method at midlatitudes 08 p1220 A66-19779  
 Energy spectrum for auroral zone X-rays, measuring simultaneously bremsstrahlung X-rays and ionospheric absorption 10 p1599 A66-21146  
 Anomalous ionization of lower ionosphere at medium latitudes during worldwide geomagnetic storm result in increased radio wave absorption in ionosphere 11 p1696 A66-22416  
 Radio wave absorption at high latitudes dependent on frequency, noting AZA and PCA are inversely proportional to powers of frequency 12 p1817 A66-24276  
 Vertical measurement of ionospheric absorption at continuously varying frequency, showing diurnal variation of absorption 12 p1870 A66-24289  
 Cosmic radio emission attenuation in ionosphere measurements including characteristic period and seasonal absorption measurements 13 p2186 A66-26050  
 Anomalous ionospheric radio wave absorption during winter in 40 degree northern latitude 13 p2026 A66-26741  
 MHD absorption of internal gravitational waves in ionospheric F layer in terms of traveling disturbances 14 p2286 A66-28075  
 Anomalous polar type radio emission absorption in ionosphere on April 4, 1965 measured, using radio astronomy 14 p2377 A66-28476  
 Proton flux measured by satellite at high latitude compared to ionospheric absorption, measured with riometers, noting absorption variation with latitude across polar caps 15 p2576 A66-29228  
 Winter anomaly of nondeviative ionospheric absorption of radio waves and relation to diurnal, seasonal, local and solar cycle variations 15 p2490 A66-29948  
 Vertical drift of charged particles effect on electron density profile as cause of seasonal variations in ionospheric absorption 15 p2490 A66-29944  
 Ionospheric absorption effects in D and E layers, noting refraction role and effective collision frequency 15 p2493 A66-30036  
 Early morning ionospheric characteristics measured by geophysical rocket, noting electron concentration, solar UV emission, intensity changes, electron temperature, absorption profile, etc 15 p2494 A66-30052  
 Electron precipitation in auroral zone, using observations from riometer, balloon rocket and satellite experiments 17 p2917 A66-32363  
 Riometer recordings at high geomagnetic latitude of intense and sporadic absorptions events correlated with occurrence of auroral and geomagnetic disturbances 18 p3108 A66-34532  
 Stability of Earth radiation belts, considering wave absorption in ionosphere noting role of proton fluxes, Alfvén wave generation, etc 18 p3197 A66-34877  
 Auroral absorption of cosmic radio noise 18 p3238 A66-35086  
 Ionospheric radio wave absorption, noting inverse correlation between solar activity with stability of reflections from sporadic E layer 19 p3344 A66-35262  
 Position of anomalous radio absorption in ionosphere during various phases of solar activity cycle 19 p3345 A66-35269

- Latitudinal effect on behavior of  
ionospheric absorption determined by  
absorption measurements at four  
stations 19 p3350 A66-36358
- Ionospheric absorption measurement by A3  
method in which field strength of distant  
CW transmitter is continuously  
recorded 19 p3351 A66-36359
- Low and medium frequency absorption  
measurements at steep ionospheric  
incidence for demonstrating diurnal, annual  
and sunspot cycle changes in lower  
ionosphere 19 p3351 A66-36360
- Cosmic radio noise used to measure  
ionospheric absorption, comparing  
extraordinary and ordinary wave flux effect  
in overcoming measurement  
problems 19 p3351 A66-36361
- Ionospheric absorption relation to solar  
activity, considering sudden ionospheric  
disturbances, polar cap absorption and  
sudden storm  
commencement 19 p3453 A66-36362
- Separation of D-E and F-layer contribution  
to integral absorption of cosmic noise by  
means of combined pulse reflection and  
cosmic noise  
measurements 19 p3351 A66-36363
- Spatial and time variations in ionospheric  
absorption at long wavelengths for small  
elevations of Sun and at  
nighttime 21 p3732 A66-38774
- Annual variations of ionospheric absorption  
at medium and long wavelengths measured  
by A3 method at  
midlatitudes 21 p3732 A66-38775
- Computer calculations from Sen-Wyller  
expression for specific absorption of radio  
wave in lower ionosphere 22 p3906 A66-39954
- Riometric data on ionospheric absorption  
applied to determination of dissociative  
recombination coefficient, noting  
ionospheric ionization by fragment gamma-  
radiation 22 p3973 A66-40468
- Ionization level of D region at middle  
geomagnetic latitudes as affected by fast  
proton flux 24 p4265 A66-42757
- Nondeviative radiowave absorption in plane  
and parabolic ionospheric layers, noting  
change with time 24 p4174 A66-42760
- Sudden cosmic radio noise absorption,  
polar cap absorption and auroral  
absorption 24 p4202 A66-42832
- Sporadic E layer reflection used to  
determine instrument constant in measuring  
radio wave absorption in  
ionosphere 24 p4205 A66-43156
- Differential absorption and Faraday  
rotation in D region, using closed loop  
feedback system and two signals of  
different frequencies 24 p4205 A66-43218
- IONOSPHERIC COMPOSITION**
- Space studies of Cosmos and Elektron  
satellites including space radiation hazards,  
particle observation, ionosphere chemical  
composition, onboard equipment,  
etc 01 p0136 A66-10415
- RF mass spectrometer measuring ionic and  
neutral particle composition of outer  
ionosphere, mounted on Elektron  
satellites 02 p0229 A66-11662
- Ariel I measurement of ionospheric  
electron density, temperature and ion  
composition 03 p0366 A66-12877
- Communications system of Explorer XX  
ionospheric satellite 04 p0481 A66-13801
- Space exploration discussing terrestrial  
effects of electromagnetic and corpuscular  
solar radiation 04 p0574 A66-13805
- Rocketborne resonance probe experiments  
for measurement of electron temperature,  
density and collision  
frequency 05 p0669 A66-14944
- Atmospheric ionization, discussing  
formation of different ionospheric  
regions 05 p0675 A66-15744
- Ion composition model representing  
conditions at low temperatures, assuming  
that solar cycle variation ions are  
distributed according to diffusive  
equilibrium theory 06 p0876 A66-16611
- Ionospheric research from space vehicles,  
comparing experimental data with  
theoretical models of D, E and F  
regions 07 p1029 A66-18089
- In situ probe measuring nonthermal  
components of electron energy distribution  
in ionosphere, small-scale ionization  
inhomogeneities and negative ion  
concentrations in lower  
ionosphere 08 p1223 A66-18745
- Limit on stably trapped particle fluxes  
determined theoretically and compared with  
data from Explorer  
satellites 08 p1184 A66-19391
- Ionospheric composition and density from  
90 to 1200 km determined from  
measurements made during solar minimum  
period 08 p1284 A66-19413
- Composition of outer ionosphere measured,  
using RF mass spectrometers mounted on  
board Elektron I and II  
satellites 09 p1378 A66-21008
- Role of coupling phenomena in  
recombination processes of complex  
ionosphere composed of two types of  
positive ions examined via wind-shear  
theory 10 p1526 A66-21123
- Ionosphere formation theory, reviewing  
solar radiation, absorption, ionization cross  
section rate, electron renewal in F and  
upper E layer, etc 10 p1533 A66-21851
- Space exploration, discussing terrestrial  
effects of electromagnetic and corpuscular  
solar radiation 12 p1938 A66-23638
- Upper atmospheric model of variations for  
solar minimum conditions based on satellite  
drag and rocket sounding 13 p2073 A66-26130
- Laboratory instrumentation for testing and  
calibration of in situ probes for lower  
ionosphere, mesosphere and  
stratosphere 13 p2059 A66-26549
- Aerobee-borne magnetic mass  
spectrometric measurements of neutral  
composition of lower  
thermosphere 15 p2490 A66-29946
- Electron-ion recombination coefficients for  
atmospheric ions determined in laboratory  
and compared with ionospheric  
analysis 15 p2548 A66-29947
- Role of corpuscular radiation in lower  
ionosphere formation, noting charged  
particle flux, energy spectra,  
etc 15 p2591 A66-30024
- Subsonic parachute-borne blunt probes for  
charged particle measurement in  
ionosphere 15 p2493 A66-30039
- Neutral particle densities of nitrogen,  
molecular and atomic oxygen and argon in  
upper atmosphere, noting density profile  
irregularities, diffusive separation altitude,  
etc 15 p2497 A66-30086
- Lyman alpha ionization of nitric oxide and  
ion molecule reactions accounting for ionic  
nitric oxide content of D and E  
regions 16 p2694 A66-30705
- Alouette satellite observation of  
ionospheric cyclotron resonance, obtaining  
plasma frequency at particular  
height 17 p2920 A66-33085
- Soft electrons and ions study by traps on  
Cosmos V satellite 19 p3451 A66-35248
- Electron and ion concentrations as function  
of solar radiation intensity and variation of  
ionospheric conditions, noting nitrous oxide/  
oxygen ion ratio 19 p3345 A66-35287
- Resistive and reactive components of  
impedance of short dipole in lower  
ionosphere 20 p3525 A66-37300
- Chemical equilibrium in nighttime  
ionosphere, estimating diffusion coefficients,  
noting role of transport  
processes 20 p3554 A66-38207
- Ionospheric ion-molecular reaction rates,  
discussing various measurement  
results 21 p3734 A66-39319
- Topside ionosphere constitution, examining  
electron and ion distribution, charged  
particle scale height, ion composition,  
electron and ion temperatures and  
magnetosphere 22 p3909 A66-39971
- VLF resonances in conjunction with  
topside sounder provide information about  
composition and temperature of terrestrial  
ionosphere 22 p3909 A66-39975
- Electron density, electron and ion  
temperature and ionic composition  
measurements in Peru, using incoherent  
scattering technique 22 p3910 A66-39977
- Ionospheric ionic composition and  
temperatures as function of altitude in  
radar spectrographic  
estimates 22 p3910 A66-39981
- Role of positive ion composition in wind  
shear theory of sporadic E layers, examining  
cases for meteoritic, No and oxygen  
ions 23 p4063 A66-41644
- IONOSPHERIC CONDUCTIVITY**
- SA IONIC WAVE
- Electric current system arising from  
sudden enhancement of ionospheric  
conductivity in auroral  
zone 04 p0516 A66-13853
- Exchange of energy between ionosphere  
and protonosphere, noting nonlocal heating  
by photoelectrons, thermal conductivity and  
heat input by downward  
flux 08 p1215 A66-19204
- Admittance measurements for antenna in  
ionosphere, effect of local magnetic field  
variations, plasma frequency and  
gyrofrequency 09 p1341 A66-19854
- LF admittance measurements on  
orthogonal dipoles in  
ionosphere 09 p1341 A66-19855
- Nocturnal electrical conductivity of  
equatorial ionosphere 09 p1373 A66-20384
- Ionospheric electrodynamics, discussing  
conductivity, wind and dynamo theory, drift  
effect on ionospheric formation and wind-  
electromagnetic field  
interaction 10 p1533 A66-21852
- Correction of Fatkullin expressions for LF  
conductivities of homogeneous plasma in  
presence of electron-ion collisions in  
ionosphere 15 p2488 A66-29109
- LF ionospheric measurement of  
admittances of three orthogonal short  
dipoles, noting impedance variation with  
respect to frequency attitude and  
voltage 15 p2493 A66-30038
- IONOSPHERIC CROSS MODULATION**
- Solar wind modulation of far daytime field  
of extra-long radio waves in ionospheric C  
layer 19 p3345 A66-35268
- Ionospheric cross modulation analysis by  
computer-oriented simulation process, noting  
D region electron density and collision  
frequency profiles 23 p4041 A66-41641
- IONOSPHERIC CURRENT**
- Progressive change in worldwide current  
systems and auroral zone electrojets of  
geomagnetic bays examined with magnetic  
data during IGY 01 p0063 A66-10890
- Diurnal velocity variations of ionospheric  
wind in auroral zones and disturbance daily  
solar variation 01 p0064 A66-11161
- Homogeneous auroral arcs orientation and  
relation to magnetic disturbance  
currents 01 p0064 A66-11164
- Book on lower ionosphere physics noting  
radio wave propagation, ionospheric  
currents, solar radiation and flares, ion  
kinetics, electron collision frequencies,  
etc 04 p0515 A66-13835
- Current system of solar disturbed diurnal  
variations of magnetic field at high latitudes  
in terms of dynamo theory, taking into  
account forward and Hall  
conductivities 04 p0516 A66-13854
- Midlatitude ionospheric currents detected  
by rocketborne rubidium vapor  
magnetometers in Nike-Apache  
rockets 05 p0667 A66-14791
- Electric currents in ionosphere measured  
by sounding rockets equipped with nuclear  
free precession magnetometers and  
Langmuir probes launched near  
Peru 05 p0668 A66-14800
- Lower ionospheric wind effect on  
geomagnetic field variation 05 p0668 A66-14935
- Cosmic ray intensity and geomagnetic field  
changes induced by electric current systems  
excited in ionosphere, noting seasonal  
changes in diurnal  
variations 06 p0950 A66-16596
- Sporadic E layer at middle and low  
latitudes and relation to solar quiet daily  
variations in ionosphere 08 p1213 A66-19027
- Aurora relations with ionospheric currents  
responsible for magnetic disturbance, noting  
sign of bay 08 p1215 A66-19054
- Ionospheric dynamo  
theory with  
consideration for magnetospheric current  
along geomagnetic force lines, noting Sq  
variation in solstices 09 p1372 A66-20374
- Magnetospheric electric fields, noting  
implications of magnetic storm  
theories 10 p1528 A66-21149
- Changes in current kinetic theory of No-O  
reaction, based on observation of release of  
nitric oxide in E region 11 p1703 A66-23494
- Magnetic disturbances at midlatitudes,

noting origin from locally generated currents 12 p1871 A66-24292

Equatorial electrojet cross section profile, describing longitudinal variations, current density, magnetic field produced and electron drift velocity 13 p2074 A66-26357

Sporadic E and ionospheric current correlation in summary of E layer, wind-shear theory and wind 14 p2281 A66-26846

Overhead ionospheric current function corresponding to  $S_q$  field, examining assumption of rotation of quiet day horizontal component 15 p2488 A66-29231

Three-dimensional polarizations of high-latitude micropulsations derived for conjugate point observatories from hydromagnetic wave-ionospheric current model 18 p3107 A66-34527

Ionospheric electric current effects on upper atmospheric electromagnetic wave transmission and propagation, discussing magnetospheric effects, solar wind, geomagnetic field, etc 20 p3550 A66-37434

Successive hourly variations of equivalent current systems of magnetic bay disturbance patterns and F layer minimum frequency increases 20 p3658 A66-38232

Geomagnetic field model based on definition of core field, crustal field, ionospheric currents and plasma pressures, examining trapped particle behavior 20 p3555 A66-38302

Acceleration of electrons in inner radiation belt by magnetic field variations over slope of geomagnetic anomaly in resonance with longitudinal drift frequencies of electrons 20 p3638 A66-38308

Generalization of differential equation of dynamo theory of geomagnetic variations to include unsteady dynamo effect in ionosphere 22 p3914 A66-40759

Rocket observation of upper atmospheric wind around ionospheric E layer by sodium release method, noting cloud drift 24 p4199 A66-42466

Ionospheric winds measurement by luminous trimethyl aluminum trails produced by gun-launched projectiles 24 p4200 A66-42592

Power spectrum analysis of mean daily values of magnetic data for 27 observatories 24 p4201 A66-42597

**IONOSPHERIC DRIFT**

Ionospheric irregularities and drift parameters deduced from fading records of second-order echoes of radiowave reflected vertically from ionosphere 01 p0022 A66-10160

Nocturnal auroral drift in meridional direction 01 p0064 A66-11163

Magnetic activity effect on F-2 region drifts and variation with time at low latitude station 03 p0361 A66-12633

Soviet report on ionospheric structure variations, drift magnitude, velocity and direction 05 p0874 A66-15226

Photographic and radar observations of meteors, discussing pulse coherent techniques for studying ionospheric drifts and winds 05 p0761 A66-15227

Ionospheric drift in F region compared with overall circulation in troposphere and stratosphere 08 p1214 A66-19048

Appleton anomaly of F-2 layer examined, assuming ionization induced horizontal motion of neutral air 08 p1215 A66-19207

Equilibrium electron density distribution in F-2 region of equatorial ionosphere, noting effects of photoionization, loss, diffusion along geomagnetic field lines and electromagnetic drift 08 p1216 A66-19210

Equilibrium theory of ionization transport in ionosphere predicts tendency for thin layers of overdense ionization to form in E region 10 p1531 A66-21279

CW bistatic radar design with arrival direction, distance and Doppler measurements obtained from phase comparisons and used in ionospheric wind determination from meteor trails 10 p1501 A66-21626

Measurement of horizontal ionospheric drifts in E and F regions over magnetic equator 11 p1696 A66-22381

Inhomogeneities shape effect on drift rate in ionosphere under wind and electric field effect 11 p1696 A66-22413

Upper atmospheric diurnal tide determined via sodium vapor trail measurements 11 p1701 A66-23146

Winds in upper atmosphere as revealed by sodium vapor trails explained on basis of prevailing and tidal components critically analyzed 11 p1701 A66-23147

Ionospheric radio wave propagation and ionization inhomogeneity drift measured, using doubly reflected signals 12 p1873 A66-24687

Ionospheric wind patterns studied by distortion of chemiluminous vapor trails from rockets 14 p2280 A66-26838

Ionospheric winds characteristics from observation of motions and growth of sunlit trails of alkali vapor compared to rocket probing of electron concentration 14 p2280 A66-26839

Ionospheric winds from midlatitude winds delineated by luminous trails in five reports at Estes Park seminar 14 p2282 A66-26852

Atmospheric motions from sodium cloud firings in 80 to 200 km height region, noting internal gravity waves, atmospheric tides and drift 15 p2489 A66-29661

Equatorial ionospheric drifts observed at Ibadan, Nigeria, during solar activity minimum, and relation to diurnal variation of sunspot cycle and drift velocity variations in E and F region 16 p2700 A66-31759

Magnitude of vertical drifts in F-region during high and low sunspot years, considering effect of ambipolar diffusion along geomagnetic lines of force 19 p3347 A66-35923

Coupling phenomena in recombination processes of complex ionosphere composed of positive ions under vertical field of ionization drift applied to wind shear theory of sporadic E layers 22 p3907 A66-39962

Ionospheric drift and radio wave dispersion determined from selective fading records and symmetry of cross correlation functions, using Fourier transforms 22 p3916 A66-40807

Geomagnetic disturbances due to dynamo effect of ionospheric winds in lower layers of ionosphere 24 p4204 A66-43150

**IONOSPHERIC ELECTRON DENSITY**

Radio propagation experiment using transmitted VHF waves from OGO-A to deduce electron density in ionosphere and magnetosphere 01 p0063 A66-10892

Book on satellite-caused ionospheric disturbances, particularly in particle density and electric and magnetic fields in vicinity of artificial body 01 p0138 A66-10975

Electron concentration-distribution data for ten quiet days during spring 1958 in F-2 layer 01 p0063 A66-11027

Minimum ionospheric electron density needed for radio reflection in F-2 layer 01 p0031 A66-11037

Mean electron density and collision frequency determined from radio noise absorption, average electron drift velocity and magnetic disturbance intensity observations 01 p0065 A66-11167

Variation of total ionospheric electron content up to 1000 km between sunspot maximum and minimum measured by Faraday fading of Sputnik III signals 02 p0279 A66-11262

Ionosphere electron content near auroral zone obtained from differential Faraday observations of multifrequency beacon satellite Explorer XXII, noting corpuscular radiation role 02 p0223 A66-12017

Electron density and collision frequency observation during auroral absorption event, discussing rocket experiment techniques and results of analysis 03 p0363 A66-12645

Electron-density variation at 1000 km observed by Alouette 03 p0419 A66-12674

Equatorial F-region electron density distribution is natural steady state distribution for charged fluids as shown by momentum transport equation for charged gaseous fluids 03 p0364 A66-12678

Photoelectron energy distribution in F region 03 p0364 A66-12684

Ionospheric interference with cosmic radio waves, analyzing scintillation, noting diffraction of wavefront passing through ionospheric electron density layer 03 p0335 A66-12855

Ariel I measurement of ionospheric electron density, temperature and ion

composition 03 p0366 A66-12877

Ionospheric electron density measured by rocketborne RF spectrometer, dispersive Doppler measurements and variable-frequency impedance probe 03 p0366 A66-12878

Electron density and collision frequency in lower D region measured by rocket sounding 03 p0366 A66-12879

Recombination coefficient and electron production rate in lower D region during solar flare 04 p0574 A66-13444

Accuracy estimation in determination of maximum values of electron production 04 p0514 A66-13444

Spatial distribution of electron density along given path inferred from oblique incidence soundings taken at terminal of path 04 p0515 A66-13679

Difference in Doppler shifts of radio waves emitted at various frequencies by satellite, Elektron I radio station, plotting electron concentration dependence on altitude 04 p0515 A66-13837

Effective ion mass in upper ionosphere from electron-density profiles obtained from Alouette satellite, compared with theory 04 p0517 A66-14177

Electrostatic probe, discussing Explorer XXII measurements of electron concentration and temperature at 1000 km altitude 05 p0746 A66-14782

Ion distribution and temperature in topside ionosphere from plasma scale height profiles from Alouette electron density data 05 p0687 A66-14788

Electric currents in ionosphere measured by sounding rockets equipped with nuclear free precession magnetometers and Langmuir probes launched near Peru 05 p0688 A66-14800

Electron distribution in quiet D region derived from rocket measurements of wavefield generated by LF ground transmitter 05 p0670 A66-14948

Ionospheric F region electron density and electron and ion temperatures measured by ground-based radar backscatter 05 p0670 A66-14950

Electron energy loss rate for D region determined by Maxwellian velocity distribution of thermal component brought about by collisions with molecular nitrogen involving rotational transition 05 p0672 A66-15021

Vertical electron transport velocity in ionosphere 06 p0877 A66-16895

F-layer structure at subauroral and auroral latitudes measured by multifrequency beacon satellite Explorer XXII 08 p1212 A66-18610

Faraday rotation analysis of single frequency radio transmission from satellites to determine local electron density 08 p1181 A66-18752

Inhomogeneities of ionospheric electron concentration in Pacific Ocean region obtained with aid of signals from Explorer VII satellite 08 p1213 A66-19025

Electron concentration profiles above maximum of F layer calculated from measurements made on Earth surface 08 p1213 A66-19026

Geomagnetic sudden-commencement storms effect on electron concentration in F-2 layer above Europe 08 p1215 A66-19082

Ionospheric plasma diffusion, noting electric field effect in derived equation of continuity for F region 08 p1215 A66-19206

Equilibrium electron density distribution in F-2 region of equatorial ionosphere, noting effects of photoionization, loss, diffusion along geomagnetic field lines and electromagnetic drift 08 p1216 A66-19210

Power series solution of F-2 layer diffusor equation, calculating equilibrium electron density from equatorial profile 08 p1216 A66-19211

Ionospheric F-2 region equatorial anomaly may not be caused by geomagnetic field 08 p1217 A66-19211

Improved HF prediction using ray tracing techniques to determine F-2 layer scale heights and scale height  $h'$  for alpha Chapman electron density distribution 08 p1217 A66-19211

Thermospheric heating effect on F-region ionization and electron density in daily back-

- Faraday polarization rotation of linearly polarized lunar-reflected radio waves used to measure ionospheric electron content during July 20, 1963 solar eclipse 08 p1284 A66-19412
- Electron concentration data obtained by rocket probes in quiet ionosphere with solar and geomagnetic activity, as function of time of day, season and altitude 08 p1285 A66-19776
- VLF sudden phase anomaly data for 1963 compared with solar X-ray emission measurements made by Vela satellites 09 p1435 A66-19972
- Upper atmospheric parameters that control daytime electron density distributions in F-1 region determined with use of N/h profiles 09 p1372 A66-20369
- Binary transport of electrons and ions in equatorial ionosphere and effect on brightness of 6300 angstrom airglow at Huancayo 09 p1372 A66-20376
- Source energy spectrum of solar XUV produced photoelectrons in ionosphere 09 p1372 A66-20382
- Latitudinal dependence of sunrise effect in F region determined from Schermerling data for four ground stations 09 p1373 A66-20383
- Structure, ionization-neutralization balance and dynamics of stratified formation in ionosphere 09 p1373 A66-20483
- Electron production, density and absorption in D region as effected by X-radiation 09 p1373 A66-20484
- Relation between height-time distribution of electron concentration and inhomogeneous formations of outer ionosphere 09 p1377 A66-21001
- Radiophysical investigations of outer ionosphere with aid of Cosmos II and Elektron I satellites and certain geophysical rockets 09 p1377 A66-21002
- Physical experimental data collected by Cosmos II satellite dealing with ionospheric structure 09 p1377 A66-21004
- Electron and ion concentration measurements in ionosphere at altitudes of up to 200 km, using rockets and satellites from 1960-64 09 p1377 A66-21005
- Variation and behavior of ionospheric electron concentration at altitudes of 100 to 200 km as measured by rocket probes 09 p1378 A66-21007
- Vertical electron density profiles determined at 725 and 1525 kc, using Elektron II satellite /1964 10 p1600 A66-21050
- Ionospheric aerial impedance measurements of wire dipole at frequency of 60 kc and plasma electron and collision frequency estimations 10 p1526 A66-21119
- Lower ionosphere measurements at solar minimum, discussing positive ion density, electron density, solar radiation optical depth, etc 10 p1527 A66-21139
- Integrated electron content of ionosphere determined from measurements of polarization angle received from Syncom III transmissions, presenting mean diurnal variation 10 p1528 A66-21148
- Simultaneous comparison of RF standing wave impedance probe, plasma frequency probe and resonance rectification probe techniques in determining ionospheric electron density 10 p1529 A66-21155
- Diurnal changes in total ionospheric electron content measured, using Randle Cliff antenna 10 p1530 A66-21162
- Plasma electron density and temperature from measurement of LF impedance of Langmuir probe, noting ionospheric probing 10 p1536 A66-21549
- Ground station installations for observation in ionosphere of noncoherent diffusion of plasma by electrons 10 p1532 A66-21711
- VHF ionospheric radio signal cross correlation coefficients determined, using pulse counting techniques 10 p1505 A66-21731
- Ionospheric electrodynamics, discussing conductivity, wind and dynamo theory, drift effect on ionospheric formation and wind-electromagnetic field interaction 10 p1533 A66-21852
- Spiralling electrons in geomagnetic field and superimposed electric field aligned with magnetic field lines 11 p1695 A66-22371
- Central Italy ionospheric electron density, examining Faraday rotation of 54 mc signals from Transit IVA satellite 11 p1695 A66-22377
- Curves of difference in Doppler shift in observations of transmitter of Elektron I satellite, noting fluctuations in electron concentration 11 p1762 A66-22409
- Focusing inhomogeneities in ionospheric electron density investigated by radio astronomical techniques at frequencies from 13 to 54 megacycles 11 p1696 A66-22415
- Critique of local ionospheric electron concentration determined by dispersion method with aid of satellite and new ionization maximum 11 p1697 A66-22429
- Substantiating possibility of determining local electron concentration by dispersion method with aid of satellites and new ionization maximum 11 p1697 A66-22429
- Effective electron collision frequency from electron temperature profile for ionospheric heating in F region 11 p1697 A66-22499
- Electron density distributions in daytime F-2 layer and dependence on neutral gas, ion and electron temperatures 11 p1699 A66-23135
- Satellite observational data indicates that nighttime electron temperatures in upper F region are larger than neutral gas temperature 12 p1868 A66-23559
- Spectrometer for measuring electron flux and energy at Gemini orbital altitudes 12 p1876 A66-23682
- Diurnal and seasonal altitude variations of E and F layers analyzed for geomagnetic activity from rocket measurement of electron concentration 12 p1869 A66-24269
- Electron distribution from 400 to 1200 km measured, using Ariel I satellite, noting latitudinal and longitudinal anomalies associated with geomagnetic field [AIAA PAPER 66-395] 12 p1872 A66-24511
- Effects of solar flare radiation on electron density of F-2 layer at maximum level in zone 12 p1944 A66-24834
- Explorer XX satellite observations of plasma resonances at fixed frequencies in topside ionosphere, noting patterns, effect of geomagnetic field, electron concentration, etc 13 p2074 A66-26352
- Sporadic E layer electron density detected from VHF ionospheric propagation and reflection 14 p2234 A66-26836
- Ionospheric winds characteristics from observation of motions and growth of sunlit trails of alkali vapor compared to rocket probing of electron concentration 14 p2280 A66-26839
- Rocket probing of winds and charge particle density and temperature in sporadic E layer 14 p2280 A66-26841
- Sporadic E layer electron density from rocket probing 14 p2280 A66-26842
- Sporadic E layer structure from very low electron density probing by radio during sunrise period on July 15, 1964 14 p2280 A66-26843
- Wind-shear theory of sporadic E layer at temperate zone with single ion and many ions, noting electron density 14 p2281 A66-26844
- Mixtures of ions in wind-shear theory of sporadic E layer, noting ion recombination 14 p2281 A66-26845
- Midlatitude sporadic E layer formation from vertical gradients of charge density, electric and geomagnetic fields 14 p2281 A66-26847
- Rocket measuring techniques for E layer charge particles and magnetic field discontinuities 14 p2282 A66-26851
- Unique ionospheric electron density distribution from ionograms from valley between E and F region 14 p2283 A66-27126
- Solution of continuity equation for electrons leads to high loss rate in prenoon maximum of electron density in F-2 layer 14 p2283 A66-27397
- Helium whistler detection by VLF receiver aboard Canadian satellite Alouette II, noting application to composition and electron density measurement of ionosphere 14 p2285 A66-27847
- Ionospheric electron density distribution investigated by ground reception of satellite signals from Elektron I 15 p2482 A66-28495
- Cyclic variations in maximum electron concentration of F-2 layer with solar activity explained by upper atmosphere temperature variations 15 p2486 A66-29093
- Dependence of electron concentration in F-1 layer on zenith angle of Sun 15 p2486 A66-29095
- Electron-concentration distribution in ionospheric F-2 layer with vertical distribution of electron-ion gas 15 p2486 A66-29096
- Relation between solar radiation and electron concentration up to F layer analyzed in winter and summer 15 p2487 A66-29106
- Formation mechanism of ionospheric narrow sporadic E layers by high energy electron fluxes captured by geomagnetic field 15 p2488 A66-29110
- Ionospheric D-region electron distributions in middle latitudes deduced from reflection of long radio waves 15 p2489 A66-29631
- Total electron content from S-66 satellite received at nine stations, using differential Faraday technique 15 p2491 A66-30017
- Upper ionospheric electron density measurement by signals propagated between two parts of high altitude rocket 15 p2493 A66-30037
- Ionospheric thin-layer stratifications and valley region analyzed by integrating propagation method and by impedance probe 15 p2494 A66-30042
- Ionospheric electron density measurement by gyroplasma probe, using sweep frequency impedance technique 15 p2604 A66-30047
- Total ionospheric electron content measurements at Delhi using Faraday fading of satellite beacon transmissions during solar minimum 15 p2495 A66-30067
- Electron content for ionospheric station located 47 degrees N determined from observation of Faraday polarization rotation 15 p2496 A66-30073
- Atmospheric neutral and ion composition and ionization radiation rates from rocket data compared with electron densities around 200 km 15 p2496 A66-30081
- Electron density in E-and D-regions above Kjeller, Norway, from rocket measurements of absorption and height of reflection of radio waves 16 p2692 A66-30332
- Total electron content of ionosphere in middle latitudes, noting results of satellite Doppler measurements, effect of solar radio noise flux, etc 16 p2694 A66-30706
- F-layer nightglow 6300 angstrom emission intensity and electron density data, noting variations in emissions 16 p2694 A66-30708
- Altitude-time distribution of electron concentration, noting satellite measurements of ionospheric inhomogeneities and difference in Doppler shifts of coherent radio waves emitted by Elektron I satellite 16 p2696 A66-30920
- Ionospheric electron density measurement by radio-frequency probes, noting error correction 16 p2697 A66-30994
- Field potential, electron and ion concentration contours in wake of orbiting body 16 p2631 A66-31540
- Variational method calculation of refraction angle in inhomogeneous laminar medium, using approximate integration of series of exponential functional of electron concentration 17 p2873 A66-32241
- Variations in electron density with reflection of long waves in D region 17 p2918 A66-32878
- Altitude variations of frequencies and electron density with reflection in D region 17 p2919 A66-32879
- Dependence of electron density in E layer on Sun zenith distance, based on new ionospheric data and ionization neutralization phenomena 17 p2919 A66-32880
- Anomalous behavior in correlating maximum electron density dependence on solar zenith distance and asymmetry in critical frequency for E layer 17 p2919 A66-32881
- Ionospheric electron generation formula derived, based on analysis of interaction of cosmic radiation on ionosphere 17 p2994 A66-32882
- Ionospheric electron content determined from satellite measurements, noting seasonal and diurnal variation of content and utilization of Faraday fading for

measurements 17 p2920 A66-33069  
 Topside ionograms electron density data both at and below orbit of Alouette I satellite 17 p2920 A66-33092  
 Height distribution of electron density accounting for behavior of LF and VLF radio wave propagation during sudden ionospheric disturbance 17 p2922 A66-33349 /SID/  
 Lunar semidiurnal tides in ionosphere over Puerto Rico determined from electron density profiles for heights between 150 and 300 km 17 p2923 A66-33362  
 Ionospheric electron content determined by closely spaced frequency and rotation rate methods, using satellite transmission 18 p3104 A66-33547  
 Three rocket tests described for measurement of ionospheric electron density 18 p3105 A66-33983  
 Faraday rotation from 24-hr satellite at high frequencies provides means of studying electron content of ionosphere and fluctuations 18 p3106 A66-34200  
 Correlation of geomagnetic index and plasma scale height in topside ionosphere observed from Alouette topside sounder and planetary geomagnetic data 18 p3169 A66-34517  
 Temporal variations in temperature and drift velocity in ionosphere determined from nighttime variations of F-region electron density profiles at Puerto Rico 18 p3107 A66-34522  
 Ionospheric Faraday effect and determination of total electron content in ionosphere 18 p3109 A66-35042  
 Local electron concentration determination by dispersion method and satellite proved unreliable because of horizontal ionization gradient and ionospheric instability 19 p3344 A66-35259  
 Total electron component of ionosphere column between satellite and Earth calculated, using differential Doppler effect 19 p3361 A66-36654  
 Occurrence frequency patterns of topside spread-F on Alouette satellite ionograms, discussing radio propagation, magnetic irregularities, electron density-induced refraction, etc 20 p3554 A66-38196  
 Very steep latitudinal electron density gradients in topside F layer at high altitudes 20 p3554 A66-38197  
 Ionospheric electron content variation with solar radio flux from Faraday rotation data at magnetic equator 20 p3633 A66-38198  
 Modification to theory of differential absorption experiment involving Fresnel reflection coefficient of ionospheric irregularities 20 p3555 A66-38209  
 Upper atmospheric parameters that control daytime electron density distributions in F-1 region determined with use of N/h profiles 20 p3636 A66-38235  
 Alouette satellite, topside sounder measurement of ionosphere electron density from above 20 p3639 A66-38313  
 Relativistic electron production by cosmic radiation in lower ionosphere 20 p3645 A66-38437  
 E-layer critical frequency variations conditioned by solar zenith angle, taking account of transport, gradient and time variations of height scale 21 p3732 A66-38664  
 Electron concentration data obtained by rocket probes in quiet ionosphere with solar and geomagnetic activity, as function of time of day, season and altitude 21 p3809 A66-38772  
 Ionospheric electron content over Ahmedabad and Bombay from differential Faraday rotations of plane polarized radio waves from Beacon 21 p3734 A66-39229  
 Electron density profiles in ionosphere and exosphere - NATO Advanced Study Institute, Flinse, Norway, April 1965 22 p3903 A66-39943  
 Negative ion associative detachment reaction with atomic oxygen in determination of nighttime D region electron density profiles at high latitudes 22 p3905 A66-39945  
 Faraday rotation experiment for determination of electron density and collision frequency observations in arctic D region 22 p3905 A66-39946

Collision frequency in E and D regions of ionosphere for electrons and neutral molecules 22 p3906 A66-39948  
 Partial reflections utilizing different amplitudes of ordinary and extraordinary backscattered waves for electron number densities and collision frequency measurement in lowest ionosphere 22 p3906 A66-39949  
 Electron density and collision frequency profiles for D region obtained through simultaneous measurement of radio wave phase and amplitude 22 p3906 A66-39953  
 Electron density measurements in D layer obtained, using LF radio wave propagating into ionosphere and rocketborne receivers 22 p3906 A66-39955  
 Electron density profiles in D layer measured through Doppler shift on VLF signal propagating from ground up and received by rocket 22 p3907 A66-39957  
 Number densities of ions and electrons in D region measured, using Arcas rocket 22 p3907 A66-39958  
 Mean variation of electron density profile of ionosphere above Lindau/Harz, noting semiannual variation of F-2 layer peak height related to solar activity 22 p3908 A66-39965  
 Lunar tidal effects on noon real-height F-2 electron density profile data from two-year interval 22 p3908 A66-39967  
 True height in-line computation of electron density profile from ionograms, using analog computer in real time 22 p3908 A66-39969  
 Seasonal, diurnal and latitudinal variations of electron density distributions in topside of ionosphere as revealed by Alouette I satellite 22 p3909 A66-39974  
 Electron density and electron and ion temperatures in F region studied by ground-based radar observations at Millstone Hill 22 p3909 A66-39976  
 Electron density, electron and ion temperature and ionic composition measurements in Peru, using incoherent scattering technique 22 p3910 A66-39977  
 F layer electron temperature fluctuations and resultant electron density changes in daytime 22 p3910 A66-39980  
 Nighttime F layer recombination and diffusion coefficients estimated from incoherent scatter measurements of electron densities and electron and ion temperatures 22 p3910 A66-39983  
 Midlatitude ionospheric electron content variation with season and solar cycle 22 p3911 A66-39984  
 Latitudinal and diurnal variations of ionospheric electron content near auroral zone in winter from Faraday rotation data 22 p3911 A66-39985  
 Ionospheric electron content variation at low latitude, noting correlation with solar and geophysical phenomena 22 p3911 A66-39986  
 Faraday rotation measurements of decimeter wavelength radiation from Jupiter, calculating ionospheric electron content 22 p3977 A66-39987  
 Upper ionospheric electron density, electron gyrofrequency, ion density and ion gyrofrequency deduced from whistler-mode waves group index, energy distribution and dispersion curves 22 p3911 A66-39989  
 Observed Faraday polarization variation of satellite transmission radio signals due to ionospheric irregularities, latitudinal electron density variations and antenna geometry readout error 22 p3867 A66-40556  
 Doppler frequency shift for radio waves radiating coherently from satellite in ionosphere, considering electron concentration and angles of refraction 22 p3869 A66-40779  
 Guiding of whistlers due to exospheric anisotropy, electron density and geomagnetic field effects 22 p3915 A66-40803  
 Cosmic radio wave, whistler and transmitted radio wave interactions with ionospheric magnetoplasma in collision-dominated, photoequilibrium and photoionization-dominated regions 22 p3916 A66-40873  
 Rocketborne RF electron density probe for ionospheric profile determination 23 p4064 A66-41683

Anomalous enhancement of ionospheric F-2 region electron density at post-sunset time in low and equatorial latitudes 24 p4198 A66-42462  
 Ionospheric electron density measured by rocket carrying new gyro-plasma impedance probe 24 p4199 A66-42465  
 Ionospheric electron content at temperature latitudes during declining phase of sunspot cycle determined by observation of Faraday effect 24 p4200 A66-42595  
 Decrease in electron density of ionospheric F region following passage of powered rocket 24 p4201 A66-42609  
 F-1 layer formation as affected by solar activity, seasons and time of day 24 p4202 A66-42766  
 Ionospheric constituent parameters at altitude between 78 and 100 km by local measurements of VLF field radiated from ground transmitter 24 p4203 A66-43074  
**IONOSPHERIC F-SCATTER**  
 Dense sporadic E cloud effects on high latitude HF backscatter observation 05 p0667 A66-14792  
 Times of peak cosmic radio noise concentration and usefulness to forward propagation ionospheric scatter reception on DEW-Line as performance monitor, etc 06 p0825 A66-15985  
 Received field strength dependence on maximum and minimum usable carrier frequency range for ionospheric scattering 06 p0836 A66-17034  
 Ambipolar diffusion parameter calculation by Quinn and Nisbet found erroneous for night F layer 08 p1219 A66-19420  
 Short wave radio transmission and reception, examining masking by E region, focusing and attenuation due to scattering at ionospheric and other nonuniformities 08 p1186 A66-19780  
 Ionosphere formation theory, reviewing solar radiation, absorption, ionization cross section rate, electron removal in F and upper E layer, etc 10 p1533 A66-21851  
 Fluctuations in diurnal variations of ionization of F-2 layer interfering with radio wave propagation determined by series expansion 12 p1869 A66-24270  
 Geophysical rocket determination of aerosol scattering coefficient variation from brightness values at 70-450 km heights 15 p2495 A66-30057  
 Contribution to dependence of variation of unperturbed ionospheric F-2 critical frequencies on season and solar activity 18 p3105 A66-34097  
 Phase fluctuations of ground-backscattered signals recorded, noting phase stability of sporadic E-layer-supported and F-2-layer-supported ground backscatter 18 p3071 A66-34534  
 Short wave radio transmission and reception, examining masking by E region focusing and attenuation due to scattering at ionospheric and other nonuniformities 21 p3703 A66-38776  
 Electron density and electron and ion temperatures in F region studied by ground-based radar observations at Millstone Hill 22 p3909 A66-39976  
 Diurnal behavior of topside and bottomside spread F at equatorial latitudes and association with geomagnetic activity 24 p4200 A66-42595  
**IONOSPHERIC HEATING**  
 Heat transfer and mass flux expressions for recombination interactions at solid-gas interface due to transport of atomic and ionized particles to spacecraft in ionosphere 08 p1161 A66-18747  
 Ionospheric heating by magnetic conjugate point photoelectrons, showing variation of electron temperature with time 08 p1218 A66-19402  
 Effect of heating of ionosphere by photoelectrons coming from magnetically conjugate point, using electron temperature measurements 16 p2698 A66-31214  
 Ionospheric heating by photoelectrons streaming from sunlit magnetic conjugate point established from incoherent backscatter spectra data 22 p3910 A66-39977  
**IONOSPHERIC ION DENSITY**  
 Time dependency effect on effective recombination coefficient in lower ionosphere 02 p0223 A66-12111

Current theories for auroral excitation, general excitation and ionization by fast particles in air and relation between luminosity and ionization in aurora 03 p0418 A66-12656

Ion distribution and temperature in topside ionosphere from plasma scale height profiles from Alouette electron density data 05 p0667 A66-14788

Correction to paper on rocket studies of sporadic-E ionization and ionospheric winds 05 p0671 A66-14957

Ionosphere and plasma in near space, discussing Soviet rocket observations on ionospheric structure, expansion and space ionization 05 p0749 A66-15231

Fractional concentration of hydrogen ions in ionosphere from VLF proton whistler measurement 08 p1218 A66-19393

Electron and ion concentration measurements in ionosphere at altitudes of up to 200 km, using rockets and satellites from 1960-64 09 p1377 A66-21005

Lower ionosphere measurements at solar minimum, discussing positive ion density, electron density, solar radiation optical depth, etc 10 p1527 A66-21139

Midlatitude trough in F-region ionization of night ionosphere revealed by ion trap on solar-orbiting satellite 11 p1699 A66-23134

Ion-molecule reaction rates and recombination coefficients from mass spectrometric ionospheric data 11 p1702 A66-23492

Inhomogeneity, transparency and ionospheric ion density parameters for screening and semitransparent sporadic E layers 12 p1873 A66-24686

Rocket probing of winds and charge particle density and temperature in sporadic E layer 14 p2280 A66-26841

Midlatitude sporadic E layer formation from vertical gradients of charge density, electric and geomagnetic fields 14 p2281 A66-26847

Smith subprotonospheric whistlers and digital computation of ion effects on whistler-mode ray tracing 14 p2282 A66-26858

Time dependency effect on effective recombination coefficient in lower ionosphere 14 p2286 A66-28074

High incidence and erraticism of sporadic E occurrence in temperate zones where horizontal component of geomagnetic field is greatest, attributed to horizontal wind shear 15 p2490 A66-29949

Atomic ions of meteoric origin indicated as source of midlatitude E region in IQSY rocket measurement 15 p2492 A66-30033

Nike-Cajun rocket investigation of equatorial D and E region parameters and effect on electrojet 15 p2493 A66-30035

Ionospheric plasma movement, neutral-neutral and charged-neutral particle collisional interactions, electron-ion collision frequencies, mobility and LF Hall conductivity, irregularities, etc 15 p2495 A66-30053

Ion composition and effective recombination coefficient variation of ionosphere in study of X and UV radiation ionization of E layer 15 p2495 A66-30059

Macroscopic equations describing effect of negative ions on diffusion of electrons and positive ions in lower ionosphere 17 p2917 A66-32255

Nitric oxide distribution in lower ionosphere calculated from reaction coefficients and mass spectrometric measurements of density 17 p2922 A66-33354

Meteoric atomic ions in lower ionosphere 17 p2922 A66-33355

First-order correction to Hault theory for measuring ion density in D region, especially those involving heat transfer and compressibility 18 p3107 A66-34523

Electron and ion concentrations as function of solar radiation intensity and variation of ionospheric conditions, noting nitrous oxide/oxygen ion ratio 19 p3345 A66-35287

Positive ion composition in lower ionosphere, particularly D region, considering sources for water ions, stratification of metallic ions, etc 19 p3350 A66-36354

Negative ion density and composition in lower ionosphere 19 p3350 A66-36355

Chemical composition of ionized

components of outer ionosphere above main ionization maximum region measured by satellites 19 p3350 A66-36357

Ionospheric ionization produced by precipitation of particles from Van Allen belts, examining influence of magnetic anomalies, longitudinal drift and local effects during magnetically quiet periods 20 p3641 A66-38325

Gerdien-condenser rocketborne probe used to measure ion densities in D region of atmosphere 22 p3905 A66-39947

Ion mass spectrometry of D layer, using magnetic fields and cyclotron resonance principle 22 p3907 A66-39956

Number densities of ions and electrons in D region measured, using Arcas rocket 22 p3907 A66-39958

Ionospheric ionic composition and temperatures as function of altitude in radar spectrographic estimates 22 p3910 A66-39981

Upper ionospheric electron density, electron gyrofrequency, ion density and ion gyrofrequency deduced from whistler-mode waves group index, energy distribution and dispersion curves 22 p3911 A66-39989

Minimum effective heights of ionospheric layers in continuous recording for study of ionization and disturbance 22 p3920 A66-40773

Role of positive ion composition in wind shear theory of sporadic E layers, examining cases for meteoritic, No and oxygen ions 23 p4063 A66-41644

Plane gridded retarding potential analyzer for measuring dominant constituent ion concentrations, temperature and instrument potential in planetary ionospheres 24 p4201 A66-42605

Measurement technique for variations in optical path of gyroelectric echoes generated by long wave transmitter and propagating in whistler mode 24 p4176 A66-42995

## IONOSPHERIC IRREGULARITY

### SA SUDDEN IONOSPHERIC DISTURBANCE /SID/

Ionospheric irregularities and drift parameters deduced from fading records of second-order echoes of radiowave reflected vertically from ionosphere 01 p0022 A66-10160

Satellite probe measurements of irregularities of electron density distribution above F-2 layer in polar region 03 p0363 A66-12642

Radar echoes explained in terms of backscatter from field-aligned irregularities in F region 03 p0334 A66-12679

Discrete radio source scintillation, considering irregular diffraction pattern caused by ionospheric irregularities 04 p0575 A66-13380

Ionospheric disturbances traveling at subauroral latitudes compared at different altitudes 04 p0514 A66-13481

Vortical electric field effect on inhomogeneities spreading in weakly ionized plasma /ionosphere/ in magnetic field 04 p0577 A66-13842

Small amplitude LF waves in ionosphere covering momentum and energy dissipation, zero temperature plasma and waves in nonuniform plane-stratified medium 04 p0516 A66-13961

F-layer behavior over Genoa-Monte Capellino noting diurnal and seasonal variation, solar activity, nighttime concentration, spread-F, ionospheric and geomagnetic perturbations 05 p0671 A66-14982

Laboratory simulation, in continuum and rarefied flow regimes, of perturbations of ionosphere by satellite and rocket exhaust 06 p0869 A66-16908

Characteristic distortion of Doppler curves and radio signals of artificial satellite from behind horizon 07 p1000 A66-17209

Satellite charge and sheath formation resulting from photoelectric and secondary emission 08 p1302 A66-18748

Satellite ionization effects, CW-reflection and pulse radar techniques in 10 to 20 mc frequency range 08 p1181 A66-18749

Space-time distribution of perturbed solar diurnal variation at high latitudes during IGY 08 p1214 A66-19033

Planet-wide characteristics of ionospheric perturbation as indication of solar radiation 08 p1214 A66-19047

Ionospheric E region inhomogeneity investigated by photographic recordings of reflected signal fading 08 p1214 A66-19049

Ionospheric inhomogeneity movements in E and F-2 regions and height variation of drift velocity 08 p1215 A66-19052

Comparison of signals received on two VHF scatter circuits of different geometry but viewing common scattering region 08 p1184 A66-19211

Ionograms showing satellite traces interpreted as inverted trough disturbance traveling in F region 08 p1216 A66-19212

True height variations of F-2 layer for bay disturbances of geomagnetic field obtained from ionograms, assuming they are caused by horizontal electric field 08 p1216 A66-19213

Satellite emission of variable frequency signal guided by ionization irregularity existing along force line of geomagnetic field 09 p1374 A66-20886

Seasonal variation of F-region parameters at sunspot minimum, noting effects of ionospheric disturbances 11 p1695 A66-22368

Inhomogeneities shape effect on drift rate in ionosphere under wind and electric field effect 11 p1696 A66-22413

Internal gravity wave propagation in thermally stratified atmosphere 11 p1697 A66-22567

Relation between magnetic activity and ionospheric disturbances in F-2 layer studied on basis of 30-year data 12 p1870 A66-24285

Statistical distribution of monthly median noon critical frequency of F-2 layer from ionospheric stations at mid-latitudes, auroral regions and at polar cap 12 p1870 A66-24286

Ionospheric radio wave propagation and ionization inhomogeneity drift measured, using doubly reflected signals 12 p1873 A66-24687

Ionograms made at Australian ionosonde stations during magnetically quiet world day interval, obtaining information on F region ionization, noting existence of universal time control of ionization 12 p1873 A66-24835

Signal amplitude of Transit IVA satellite recorded at two stations, using time difference between observing similar fluctuations in fading period to determine height of ionospheric irregularities 12 p1874 A66-24843

D-region electron distribution, collision frequency and amplitudes of partially reflected waves 13 p2075 A66-26739

Cause and structure of temperature latitude sporadic E - Seminar, Swiss Village, Colorado, June 1965 14 p2279 A66-26834

Sporadic E layer from causal standpoint 14 p2280 A66-26835

Cross correlation of satellite signals through slab containing small anisotropic irregularities 14 p2237 A66-27398

Frequency deviations in carrier frequencies of ionospherically propagated HF radio waves produced by fluctuations in solar ionizing radiation 14 p2286 A66-27903

Scintillations of Jupiter decametric radio wave emission explained in terms of diffraction and refraction by single ionospheric irregularities 15 p2593 A66-28903

Electron concentration inhomogeneities during traveling gravity wave propagation through F layer 15 p2485 A66-29084

Ionospheric plasma movement, neutral-neutral and charged-neutral particle collisional interactions, electron-ion collision frequencies, mobility and LF Hall conductivity, irregularities, etc 15 p2495 A66-30053

Latitudinal variations of ionospheric irregularities studied via synchronous and 1000 km satellites, noting Early Bird data, scintillation index graphs, radio star signals, etc 15 p2496 A66-30071

Scintillation height measurement, noting irregularity distribution during various ionospheric conditions 16 p2691 A66-30230

Spectrum analysis of critical frequency of F-2 layer 16 p2692 A66-30330

Day-to-day variations in F-2 critical frequency 16 p2693 A66-30339

Maximum ionization in ionospheric F region around geomagnetic equator, noting

instruments and observed variations 16 p2697 A66-30995

Solar class 2 flares, noting activity on September 16, 1963, associated ionospheric disturbances, etc 16 p2795 A66-31149

Frequency of strong ionospheric disturbances, noting effect of high and low solar activity, deviations from monthly median, use of statistical analysis, etc 16 p2699 A66-31387

Spread F and ionospheric F region irregularities relation to magnetic field alignment, discussing radio star scintillations 17 p2923 A66-33433

Correlation of peak occurrence of HF radar echoes and high-latitude spread-F measurements near time of local sunset 18 p3107 A66-34525

Horizontal dimensions of ionospheric irregularities determined from differences in angular diameter observed in discrete radio sources 18 p3108 A66-34533

Nature of middle-latitude ionospheric perturbations 19 p3344 A66-35262

Solar activity dependence of sporadic E layer, noting cyclic variation in characteristics from 1957 to 1964 19 p3344 A66-35264

Two-year variation in troposphere, ionosphere and stratosphere regions, noting sporadic E layer in Far East 20 p3552 A66-37571

Anomalous enhancement of F-2 ionization in high latitude around geomagnetic noon due to formation of irregularity or new layer around locality 20 p3658 A66-38234

LF incompressible waves and gradient instabilities in ionosphere 21 p3733 A66-39183

Explorer XX topside sounder observations of ionospheric irregularities in electron density and plasma wave electrostatic resonances 22 p3909 A66-39972

Ionospheric electron content variation at low latitude, noting correlation with solar and geophysical phenomena 22 p3911 A66-39986

Ionization irregularities in bottomside and topside ionosphere, noting circulation effect 22 p3911 A66-39988

Data processing of signal reception from Soviet satellites indicates radio signals scintillation caused by diffraction of waves from ionospheric nonuniformities 22 p3866 A66-40467

Observed Faraday polarization variation of satellite transmission radio signals due to ionospheric irregularities, latitudinal electron density variations and antenna geometry readout error 22 p3867 A66-40556

Automatic, multichannel system for data recording and processing obtained in studies of ionospheric structural inhomogeneities, containing magnetic-tape memory and device for digital tape memory and device for digital computer input 22 p3920 A66-40772

16-megacycle backscatter echoes from sporadic E region recorded near Brisbane, Australia, examining dimensions of horizontally moving irregularities 23 p4064 A66-41685

Nonsymmetric inflation of dipole magnetic field by ionized gas, noting nonsymmetric gas dissipation 24 p4199 A66-42587

Traveling disturbance in ionosphere due to nuclear detonation detected as acoustic-gravity wave modes, noting range-time diagrams 24 p4200 A66-42594

Diurnal variation of ionospheric irregularities, using differential Doppler method for analysis of data transmitted by Beacon satellite 24 p4200 A66-42596

Irregular diffraction analysis with ultrasonic waves, measuring air stream temperature fluctuations and velocity 24 p4176 A66-43020

# IONOSPHERIC NOISE

Broadband VLF emissions observed to determine whether whistler mode signals appearing below ionosphere travel toward polar regions and at low latitude from auroral zone 01 p0012 A66-10893

Theory of thermal noise in ionosphere developed from Nyquist theorem expressing thermal fluctuations of current in localized resistance 09 p1340 A66-19846

Polar cap absorption effect on polar VLF emissions used for analysis of solar proton events 09 p1374 A66-20880

UK-2 satellite measurement of ionospheric noise bands and propagation of waves in Z mode, including orientation determination methods 10 p1604 A66-21117

Effect of Soviet atmospheric nuclear explosions on D and F-2 ionospheric layers, particularly observing enhancement of atmospheric noise 10 p1600 A66-22058

SEA effect at VLF 11 p1651 A66-22373

VHF hiss zone morphology and correlation with particle precipitation events, from Alouette I satellite observations 11 p1700 A66-23136

Simultaneous appearance of in-phase ULF geomagnetic pulses at two conjugate points 13 p2076 A66-26759

Radioelectric emission of VLF at two conjugate points 16 p2693 A66-30590

Frequency-time spectrograms supporting discovery of two whistlers in VLF radio noise data from Injun III satellite 17 p2919 A66-32930

Ionospheric thermal radiation, discussing noise power per unit volume, spectral distribution, frequency, etc 19 p3352 A66-36631

# IONOSPHERIC PROPAGATION

SA RADIO PROPAGATION

SA WAVE PROPAGATION

Pisa University research program since 1958 on AM waves which have undergone linear distortions in ionospheric propagation 01 p0022 A66-10332

Coherent nonlinear interaction of two electromagnetic waves in plasma, noting F layer radio communication 01 p0029 A66-10594

Polar interferometric method for measuring north-south component of ultrashort wave refraction in ionosphere and optical thickness gradient 02 p0190 A66-11415

Time measurement as applied to aerial navigation noting atomic clocks, time transmission by ionospheric propagation of electromagnetic radiation, etc 02 p0257 A66-12031

Damping of longitudinal plasma waves emitted by artificial Earth satellite moving in ionosphere 02 p0269 A66-12132

Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 02 p0284 A66-12133

LF propagation and probe experiment yielding profile of ionospheric D region, discussing experimental techniques, computations, RF impedance probes and formulas for ionospheric data derivation 03 p0334 A66-12643

Schumann resonances of Earth ionosphere cavity and excitation by lightning flashes 04 p0474 A66-13427

VLF radio wave propagation in Earth ionosphere waveguide assuming finite ground conductivity 04 p0475 A66-13429

Sporadic E layer characteristics according to data on ionospheric propagation at ultrashort wavelengths 04 p0514 A66-13445

Refractive index obtained from equation describing electromagnetic wave propagation in ionosphere 04 p0481 A66-13826

Magnetotonic splitting of radio signal in E and F layers, comparing calculated and theoretical gyrofrequency values 04 p0482 A66-13861

French FR-1 satellite for observation of ionized layers of atmosphere by propagation of VLF waves in ionosphere 04 p0586 A66-14385

Phase steps and amplitude fading of VLF signals at dawn and dusk, supposing two waveguide modes exist in dark part of path and one in daylight 05 p0632 A66-14838

Electromagnetic wave propagation in multimode Earth waveguides of variable height 05 p0632 A66-14839

Comments on Volland paper about analytical model of Earth-ionosphere waveguide supposedly agreeing with Austin radio transmission formula 05 p0632 A66-14840

Azimuthal propagation in nonuniform concentric cylindrical waveguide with application to Earth-ionosphere waveguide 06 p0835 A66-16978

Planar gap in plasma medium as idealized model for studying electromagnetic and plasma waves in plasma sheaths and

ionospheric layers 06 p0920 A66-17015

Linear demodulation of AM electromagnetic wave propagating through dispersive medium 06 p0836 A66-17033

/ionosphere/ Improved F-1 layer prediction system that can be used to predict maximum usable frequency /MUF/ for northern latitudes 07 p1000 A66-17213

Frequency-dependent ionospheric refraction effects on Doppler shift of satellite signals 08 p1181 A66-18714

Limiting frequencies of above-ground trajectories for ionospheric radio propagation, estimating attenuation and coverage of satellite radiation 08 p1186 A66-19789

Cylindrical and truncated cone-type metallic dipole antennas for reception of VLF, examining theory of behavior in ionosphere 09 p1340 A66-19847

Lower ionospheric characteristics determined by VLF radio waves propagated over long distances by multiple reflections between Earth and D region 09 p1370 A66-19979

Sporadic E signal strength calculator useful for estimating interference in UHF or HF communications 09 p1344 A66-20380

Ionospheric parameter measurements based on ground reception of radio signals broadcast from Elektron I satellite 09 p1377 A66-21003

Ionospheric focusing of extraterrestrial radio waves received by satellite antenna 10 p1496 A66-21120

Field produced at 100 km altitude by ground located VLF transmitter examined noting absorption, power propagation and propagation variation 10 p1526 A66-21127

High RF magnetotonic propagation effects on polarization scattering matrix 10 p1501 A66-21628

Diurnal phase variation of VLF signals propagated through Arctic polar cap as affected by solar plasma and associated ionospheric activity 11 p1657 A66-23107

Auroral zone, ionospheric scattering and nongreat-circle HF propagation statistically analyzed 11 p1700 A66-23140

Amplitude and phase velocity of electromagnetic waves in 1-30 kc range near Earth surface for plane and spherical Earth-ionosphere waveguide 12 p1817 A66-24278

Ionospheric effect of sudden magnetic storm eruption, noting propagation of disturbance above terrestrial surface 12 p1870 A66-24288

Long distance propagation of ultrashort radio waves by ionospheric scattering in subpolar region, noting graphs of signal level changes 12 p1817 A66-24290

Lower ionosphere guidance of HF and VHF waves for global communications, outlining computer simulation of phenomenon of whispering galleries 13 p2023 A66-25780

Scientific satellite FR-1 and VLF radio transmission 13 p2193 A66-26232

Skip distance and horizontal range of microwave propagation, assuming spherical Earth and ionosphere 13 p2028 A66-26235

Lower hybrid resonance in VLF range in satellites, noting noise emission due to trapping of electromagnetic wave propagation in transverse magnetic field 13 p2074 A66-26364

Sporadic E layer propagation and reflection of VHF signals 14 p2234 A66-26837

Sporadic E layer support of radio transmission by specular reflection and scattering 14 p2281 A66-26850

Doppler frequency changes in vertically incident and reflecting sounding wave associated with geomagnetic disturbances yields information on ionospheric electric field 14 p2234 A66-26856

Spatial selective fading as random process, discussing spatial coherence, wave number, dispersion profile, time delay profile, etc, in ionospheric propagation 14 p2234 A66-26858

VLF electromagnetic propagation parameter determination by field strength measurements over medium distances in ionosphere 14 p2235 A66-27130

Anomalous phase variations of GBR transmissions as received in New Zealand correlated with solar season and probably due to long path

- interference 14 p2237 A66-27401
- Field separation of ground transmitter into ordinary and extraordinary modes when traversing lower boundary of anisotropic ionosphere, noting effect of incidence angle, magnetic azimuth, etc, on energy dissipation of VLF ground wave 14 p2238 A66-27613
- Frequency deviations in carrier frequencies of ionospherically propagated HF radio waves produced by fluctuations in solar ionizing radiation 14 p2286 A66-27903
- Damping of longitudinal plasma waves emitted by artificial Earth satellite moving in ionosphere 14 p2345 A66-28089
- Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 14 p2241 A66-28090
- Satellite emitted radio wave propagation mechanism based on radio wave paths in horizontally inhomogeneous spherically stratified ionosphere with variable electron density 15 p2447 A66-28492
- Radiation of prescribed polarization from cross-dipole antenna on aircraft carrier 15 p2447 A66-28570
- Low power long-range digital communications system based on narrow bandwidth portable transmitter and fixed station receiver 15 p2450 A66-28972
- Electron concentration inhomogeneities during traveling gravity wave propagation through F layer 15 p2485 A66-29084
- Frequency correlation of ionospheric radio waves in inhomogeneous thin layer medium and effect of irregular horizontal ionization gradients 15 p2451 A66-29111
- Delayed cyclotron pulse generation in topside ionosphere deduced from Alouette I data 15 p2452 A66-29678
- Naturally occurring electromagnetic radiation in audiofrequency range studied at Kiruna Geophysical Observatory 16 p2691 A66-30232
- Transmission loss in whistler mode of propagation of VLF radio waves for path propagation underneath ionosphere, using geometrical optics 16 p2652 A66-30709
- Propagation characteristics of whistler mode radio signal over one-hop path from transmitter magnetic conjugate point to far-away receiver, noting transmission loss 16 p2652 A66-30710
- Communication effectiveness over VLF paths impaired by variability of VLF field strength due to modal interference effects 16 p2653 A66-30723
- Phase variation of vlf radio waves received from NPG/NLK 16 p2653 A66-30799
- Occurrence percentage of spread F in world-wide maps drawn from ionosonde data during years of high and low sunspot numbers 16 p2696 A66-30818
- Alouette I satellite data on extraordinary wave resonance trace propagation along ionospheric magnetic field-aligned waveguide 16 p2697 A66-31001
- Ion motion effects on ionospheric radio wave propagation 17 p2917 A66-32306
- Frequency variation of ionospherically propagated radio waves by spectrum analysis of received signal 17 p2874 A66-32384
- Sonic diffraction mechanism used in tropospheric transhorizon propagation 17 p2876 A66-33361
- Coupled electromagnetic and electroacoustic wave propagation in inhomogeneous compressible plasma 18 p3069 A66-34089
- Equatorial transmission of geomagnetic micropulsations through ionosphere and lower exosphere below 2000 km altitude 18 p3107 A66-34526
- Flat Earth approximation of LF propagation theory 18 p3072 A66-34711
- Longitudinal propagation of superlow frequency electromagnetic waves through plane-laminar magnetoactive ionospheric plasma 19 p3296 A66-35298
- Radio wave guiding in horizontally stratified magnetoionic medium in which electron density varies monotonically with height 19 p3305 A66-36629
- Theoretical calculation of propagation path geometry of VHF aurora backscatter communications compared with experimental observations 19 p3306 A66-36653
- Hysteresis effect in ionospheric propagation indices studied by separating data concerning solar cycle portion with increasing solar activity from decreasing solar activity data 20 p3551 A66-37570
- Latitudinal variation of Pc-1 micropulsation propagation, examining attenuation by ionospheric F region duct that acts as waveguide for hydromagnetic waves 20 p3554 A66-38203
- Phase angle irregularities in scattering of ionospheric radio waves 20 p3521 A66-38357
- Limiting frequencies of above-ground trajectories for ionospheric radio propagation, estimating attenuation and coverage of satellite radiation 21 p3703 A66-38777
- Nonlinear modulation distortions of high power radio waves propagating in ionosphere, noting electron temperature increase from radio wave 22 p3861 A66-39647
- Whistler mode excitation in ionosphere by leakage from VLF guide-wave modes, noting nonreciprocal attenuation over north-south propagation path 22 p3863 A66-39932
- HF and VHF guided propagation in ionospheric whispering gallery treated by geometrical optics, emphasizing long-range paths between two terminals in ionosphere 22 p3863 A66-39933
- VLF radio wave propagation in model Earth-ionosphere waveguide of arbitrary height and finite surface impedance boundary 22 p3863 A66-39936
- Electron density measurements in D layer obtained, using LF radio wave propagating into ionosphere and rocketborne receivers 22 p3906 A66-39955

- Dense sporadic E cloud effects on high latitude HF backscatter observation 05 p0667 A66-14792
- Wave propagation for LF radio waves analogous to geometrical optics with path integral describing effects of Earth conductivity, curvature and reflection height 05 p0632 A66-14841
- Propagation between Earth and ionosphere up to 100 km of VLF radio waves sent by ground transmitter, calculating field pattern 05 p0672 A66-15041
- Time-dependent changes caused by fluctuations in tracking parameters in radio signals reflected from ionosphere or Moon and dispersed by troposphere 06 p0832 A66-16514
- HF radar search for effects of Earth satellites upon ionosphere, discussing reflection, perturbation and anomalies within F layer 08 p1213 A66-18751
- Ionospherically reflected backscattered radar pulse structure analyzed, using simplified geometry 09 p1341 A66-19867
- Motion of D region under daytime conditions 09 p1374 A66-20485
- Reception of LF signals by radio astronomy satellites, utilizing mathematical techniques for ray tracing in spherical ionosphere 11 p1651 A66-22367
- Excitation, internal reflection and limiting polarization of whistler waves in lower ionosphere, establishing reciprocity relation between incident waves from above and below 11 p1651 A66-22369
- Ground diffraction pattern caused by radio wave reflection from F region, using array of three aerials 11 p1651 A66-22374
- Antenna orientation effect on polarization components of radio waves reflected from ionosphere, noting occurrence and properties of magnetoionic component of polarization 12 p1869 A66-24273
- Ionospheric-plasma density determined by phase difference of incident waves on and reflected from plasma 12 p1870 A66-24284
- Parametric analysis of stability of reflection from sporadic E layer during 11-year solar cycle 12 p1870 A66-24287
- Polarization of atmospheric pulses due to successive reflections at ionosphere in echo type atmospherics 12 p1873 A66-24839
- Height of peaks of ionospheric layers using five-point Kelso analysis and single polynomial analysis 12 p1874 A66-24846
- Oscillations of vertical component of ionospheric refraction measured, using cliff radio interferometer and signals from satellites 13 p2020 A66-25223
- Continuous measurement of ionospheric winds based on observation of meteor trails 13 p2072 A66-25449
- Results of daily recordings of characteristics of some sporadic E layers, noting occurrence of layers as discontinuous succession of two types of structures 13 p2072 A66-25466
- Time-dependent changes caused by fluctuations in tracking parameters in radio signals reflected from ionosphere or Moon and dispersed by troposphere 13 p2024 A66-25954
- D-region electron distribution, collision frequency and amplitudes of partially reflected waves 13 p2075 A66-26739
- Ionospheric electron density profile and Schlomilch integral equation for oblique incidence 13 p2075 A66-26740
- Satellite-emitted short radio wave field intensity and ionospheric parameters 15 p2447 A66-28493
- VLF radio wave propagation in model Earth ionosphere waveguide with finite surface impedance and arbitrary height 15 p2449 A66-28598
- Fast phase fluctuations of signal reflected from F-2 layer 15 p2451 A66-29094
- Ionospheric D-region electron distributions in middle latitudes deduced from reflection of long radio waves 15 p2489 A66-29631
- Effect of meteor activity on fading of radiowave reflected from E region 16 p2692 A66-30331
- Complex refractive index of Earth surface and ionospheric Faraday effect measurements 17 p2873 A66-32200
- Phase observations of 20- and 60-khz signals received at different locations 17 p2875 A66-32535
- Variations in electron density with reflection of long waves in D region 17 p2918 A66-32878
- Altitude variations of frequencies and electron density with reflection in D region 17 p2919 A66-32879
- Backscatter returns from ionospheric sporadic E on sea and land 17 p2923 A66-33357
- Angular scattering of reflected radio waves from ionosphere, giving results of 300 cases 19 p3344 A66-35266
- Modification to theory of differential absorption experiment involving Fresnel reflection coefficient of ionospheric irregularities 20 p3555 A66-38209
- Collision effects on full-wave and ray-

optics virtual height computations for LF radio waves reflected from stratified ionosphere 20 p3521 A66-38360

Partial reflections utilizing different amplitudes of ordinary and extraordinary backscattered waves for electron number densities and collision frequency measurement in lowest ionosphere 22 p3906 A66-39949

Winter variability of electron number density and collision frequency in lower ionosphere measured, using partial reflection method 22 p3906 A66-39950

Electron density profile measurements in auroral zone D layer during quiet ionospheric conditions, using partial reflection method 22 p3906 A66-39951

Collision frequency gradient effect on weak partial reflections from ionosphere 22 p3906 A66-39952

Plasma lines caused by radar incoherent scattering from longitudinal electrostatic plasma oscillations in ionosphere 22 p3910 A66-39982

Statistical properties of phase and amplitude fluctuations during total reflection of waves from ionospheric layer 22 p3869 A66-40762

Reception of signals reflected from ionosphere in vertical radar probing, examining frequency-difference combinations 22 p3869 A66-40780

Auroral disturbances resulting in multipath distortion in propagation by ionospheric reflection and description of chirp ionosonde and antenna systems 23 p4036 A66-41143

Transmission curves for retrodiffusion echoes, identifying propagation modes and synthesizing equivalent vertical ionograms 23 p4063 A66-41182

Seasonal and diurnal fluctuation of radio wave in ionosphere in connection with fading process of reflected signal 24 p4204 A66-43155

Sporadic E layer reflection used to determine instrument constant in measuring radio wave absorption in ionosphere 24 p4205 A66-43156

Optimum communications working frequencies for F-2 layer reflection selected with aid of communications reliability function 24 p4176 A66-43160

**IONOSPHERIC SOUNDING**

**SA DORNIER PARAGLIDER ROCKET**

Oblique incidence sounding of ionosphere based on short wave scattering by Earth surface at Murmansk 01 p0065 A66-11168

Ionospheric, auroral and geomagnetic observation at Syowa Base, Antarctic 02 p0222 A66-11684

Computer processing of data obtained from panoramic vertical sounding of ionosphere to separate reliable portions of height-frequency characteristic from total 02 p0224 A66-12122

Positive system of recording ionospheric characteristics on ionosonde of automatic ionospheric station 02 p0232 A66-12144

Ionosphere and high latitude particles - COSPAR Symposium, Alpbach, Tirol, Austria, March 1964 03 p0361 A66-12639

Probe techniques in polar ionosphere covering cylindrical Langmuir, RF and mobility probes, Gerden condensers, error sources, techniques, etc 03 p0362 A66-12641

Ionospheric plasma density measurement utilizing variable frequency impedance probe, dispersive Doppler measurements and RF spectrometer field strength detection theory 03 p0398 A66-12644

Injun I and III particle observations discussing methods and results on fast electrons, particle counters, energy separation, spectra, flux variation, angular distributions, etc 03 p0363 A66-12647

Rocket and satellite methods for studying ionosphere 03 p0370 A66-12862

Electron energy spectrum during auroral absorption measured by Nike-Cajun analyzer 03 p0366 A66-12880

X-ray photograph confirmation in 1964 of solar brightness distribution derived from ionospheric observations during solar minimum in 1954 04 p0579 A66-14179

Ratio of ionospheric electron to ion temperature determined independently of spectral measurements, using electron

density data obtained with topside sounder 04 p0517 A66-14374

Ionospheric magnetic dipole transition, noting radiative transfer equation for atomic oxygen and nitric oxide 05 p0667 A66-14793

Admittance of short dipole antenna in ionosphere measured during rocket flights, deducing values of plasma frequency 05 p0669 A66-14945

Ionospheric diffusion probe determining ion and electron temperatures 05 p0674 A66-15112

Airborne ionospheric probes on both sides of magnetic equator at low African latitudes during equinoctial and solstice periods, obtaining daily behavior of F layer 05 p0674 A66-15113

Evaluation of sounding rockets for meteorology for 30 to 200-km altitude range, noting role in X and gamma ray detection, sporadic E layer, etc 07 p1140 A66-17610

Resonant effects theory observed by sounding equipment on ionospheric satellite Alouette 08 p1212 A66-18620

Geomagnetic and ionospheric observations of 1964 expedition of Zaria 08 p1214 A66-19041

Ionospheric triplet observation at low latitude by vertical sounding 08 p1214 A66-19051

Upper atmosphere sounding rocket program in increased space research activities in Australia 09 p1458 A66-20707

Space research activity in Denmark, discussing international cooperation and ionospheric sounding 09 p1458 A66-20712

Space and atmospheric research programs in Pakistan 09 p1459 A66-20720

Space research in Sweden including cosmic rays, aurora, radio astronomy, rocket sounding, etc 09 p1459 A66-20724

Correlation characteristics of signal reflection and magnetoionic components obtained in phase fluctuation measurements 11 p1696 A66-22414

Data on satellite orbits used for Earth figure, upper atmosphere density, solar radiation, etc 12 p1868 A66-23637

Enhanced ionization along midnight auroral zone during elementary geomagnetic disturbances 12 p1872 A66-24472

FR-1 French satellite, functions, structure and performance 13 p2192 A66-25493

Ionospheric station simultaneous observations of sporadic E layer critical frequency variations 13 p2073 A66-26236

Cross sections of geomagnetic field intensity and ionospheric characteristics obtained by airborne equipment crossings of geomagnetic dip equator 13 p2074 A66-26358

Oblique ionospheric sounding at medium-sweep frequencies, noting performance of chirp techniques 14 p2233 A66-26771

Plasma oscillation resonance phenomena of ionospheric antenna excitation near lower hybrid resonant frequency 14 p2340 A66-27127

Ringling phenomena in ionospheric magnetoplasma as evidenced by spikes on ionograms from Alouette satellite 14 p2283 A66-27513

Computer processing of data obtained from panoramic vertical sounding of ionosphere to separate reliable portions of height-frequency characteristic from total 14 p2287 A66-28081

Positive system of recording ionospheric characteristics on ionosonde of automatic ionospheric station 14 p2297 A66-28100

Soviet space research in 1965 including Moon and planets, magnetosphere, radiation belt, upper atmosphere, space vehicle dynamics, etc 15 p2599 A66-29897

Danish space program, emphasizing polar ionosphere and high energy primary cosmic radiation studies 15 p2601 A66-29936

Polar cap absorption observational results from ionospheric soundings, proton flares before 1956 and prediction for 1966-68 15 p2591 A66-30019

Impedance measurement of 39.5 meter tip-to-tip dipole antenna made during ionospheric rocket flight 15 p2469 A66-30046

Early results from topside sounder experiments in Alouette II satellite, presenting ionograms, plasma spike, electron number density and scale 15 p2496 A66-30075

Rocket borne ionospheric direct sounding instruments to measure ion and electron density, electron temperature, thermal electron energy distribution and space electric potential versus rocket potential 16 p2705 A66-30819

Ionospheric sounding using random diffusion of electromagnetic wave by ionospheric plasma with continuous wave through two separate antennas 16 p2653 A66-30953

Klystron transmitter for ionospheric diffusion soundings, noting method to obtain high stability in output power 16 p2661 A66-30954

Transmitting antenna of Cassegrain type, noting conical horn, primary and secondary mirror, etc 16 p2661 A66-30955

Geometrical characteristics of framework and reflecting surface of ionospheric diffusion probe antenna, noting specifications on design, manufacture, erection, alignment and adjustment 16 p2662 A66-30956

Receiver of ionospheric diffusion probe, noting radio telescope, low noise parametric amplifier, filters, signal detection, etc 16 p2662 A66-30957

Satellite signals wave polarization by ionosphere above 18 p3106 A66-34366

Antarctic Diffusion spectrum modifications due to positive ions collision with neutral particles, observed through ionospheric probe in E layer 19 p3346 A66-35590

Nitrogen temperature and density in thermosphere region from thermosphere probe data, examining inconsistency with satellite drag estimates 19 p3349 A66-36347

Ion temperature measurements around 1000 km altitude, using ion energy analyzer and mass spectrometer mounted on rocket 22 p3913 A66-40551

Relation between diurnal, seasonal and cyclic variations of stratifications in E layer and fine structure of sporadic E layer and E-2 layer 22 p3914 A66-40761

**IONOSPHERIC STORM**

**SA SUDDEN IONOSPHERIC DISTURBANCE /SID/**

MHD absorption of internal gravitational waves in ionospheric F layer in terms of traveling disturbances 02 p0283 A66-12116

Energy characteristics of ionospheric disturbances and nature of geomagnetic and ionospheric disturbances 02 p0284 A66-12117

Anomalous polar cap absorption during chromospheric flare of July 7, 1958 02 p0285 A66-12247

Ionospheric and polar-geomagnetic disturbance and PCA event on February 11, 1958 caused by solar flare 03 p0360 A66-12345

Effects connected with auroras and magnetic storms in lower ionosphere considering radio wave attenuation, cosmic ray absorption, etc 03 p0365 A66-12854

E-layer disturbances caused by particles, impinging upon atmosphere during auroras, noting ionization, X-rays and electrical conductivities 03 p0365 A66-12858

Continuous recording of CW transmission frequency M.S.F. Rugby permits study of effects of traveling ionospheric disturbances, on phase height of reflection levels of both magnetoionic components 04 p0488 A66-14379

Ionospheric magnetic perturbations at high latitudes of northern hemisphere during years of maximum solar activity 08 p1213 A66-19028

Ionospheric disturbances following geomagnetic sudden commencements propagating from two isolated locations in high latitudes which are conjugate points 08 p1216 A66-19214

Long-period acoustic-gravity waves launched into F region by Alaskan earthquake of March 28, 1964 08 p1219 A66-19418

Lower ionosphere ionization for quiet and disturbed Sun calculated for comparison of experimental and theoretical values for electron concentration and effective recombination 11 p1696 A66-22417

MHD absorption of internal gravitational waves in ionospheric F layer in terms of traveling disturbances 14 p2286 A66-28075

Energy characteristics of ionospheric disturbances and nature of geomagnetic and

- ionospheric disturbances 14 p2377 A66-28076  
Microbarographic analysis of troposphere-ionospheric storm relationship, ground level pressure fluctuations and polar region traveling pressure waves 17 p2920 A66-33088  
Initial disturbances in F-2 layer at middle altitudes during magnetic storms which begin with sudden commencement and relation to magnetic field 17 p2922 A66-33353  
Cosmic ray meson component distribution with time plots of particle flux revealed characteristic disturbances accompanying sudden commencements of geomagnetic storms associated with Forbush decreases 20 p3632 A66-38074  
Simultaneous long term ionospheric variation in midday averages of critical frequency E and F-2 at Washington, D.C. before and after increased geomagnetic activity 22 p3914 A66-40560  
Dependence of seasonal occurrence probability of F-zero layer on level of geomagnetic activity and ionospheric activity observed above 22 p3914 A66-40760  
Soviet book on high latitude research in field of geomagnetism and aeronomy including ionospheric storm, atmospheric absorption, etc 24 p4203 A66-43149  
Classification system of ionospheric storms by degree of anomalous absorption, average duration, gradual or sudden commencement, etc 24 p4204 A66-43154
- IONOSPHERIC TEMPERATURE**  
Ion distribution and temperature in topside ionosphere from plasma scale height profiles from Alouette electron density data 05 p0687 A66-14788  
Resonance radiation emitted by alkali cloud for ionospheric temperature measurement, considering multiple scattering and radiative transfer inside cloud 05 p0672 A66-15040  
Electron and ion temperatures in ionosphere show no temperature equilibrium in F region 06 p0877 A66-17171  
Ionospheric processes and measurement of variations in ion temperature and concentration using satellites, noting connection with magnetosphere 12 p1871 A66-24400  
Sounding rocket measurement of ionospheric electron temperature 15 p2494 A66-30043  
Neutral atmosphere reduces electron gas thermal conductivity below 200 km during both day and night 20 p3552 A66-37590  
E layer properties noting role of pressure, temperature, composition and recombination coefficient when varying with height and time 22 p3907 A66-39960  
Topside ionosphere constitution, examining electron and ion distribution, charged particle scale height, ion composition, electron and ion temperatures and magnetosphere 22 p3909 A66-39971  
VLF resonances in conjunction with topside sounder provide information about composition and temperature of terrestrial ionosphere 22 p3909 A66-39975  
Time dependent thermal behavior of ionospheric electron gas 22 p3913 A66-40552  
Nighttime electron temperatures in upper F region suggest corpuscular energy input 23 p4064 A66-41682  
Ion energy balance equation for ionosphere including effects of O, He, and H ions, thermoconductivity and cooling by atomic hydrogen and helium 24 p4198 A66-42431

 process 06 p0896 A66-16607  
 Martensitic transformation kinetics and maraging mechanisms in Fe-Mn-Ni-Ti alloy observed by electron and X-ray diffraction 08 p1236 A66-18762  
 Iron and nickel concentrations effect on composition, quality and current yield of electrodeposition of titanium from aqueous solutions 08 p1229 A66-18794  
 Perpendicular anisotropy of Ni and Fe films and saturation magnetization under various pressures 08 p1270 A66-19011  
 Structural change effects on plasticity and fracture characteristics on iron alloys with annealing 11 p1716 A66-22745  
 Crystalline structure and magnetic properties of single-crystal films of iron-nickel alloys, for application as memory elements of computers 11 p1753 A66-22807  
 Induced anisotropy of ferromagnetic atom pairs and magnetostriction stresses in Fe-Ni thin films subject to annealing 11 p1755 A66-22818  
 Creep behavior in Ni-Fe alloys at high temperatures, using one composition inside ordered regions and another 11 p1717 A66-22993  
 Age hardening response correlated with structural observations of iron-nickel-cobalt alloys 12 p1895 A66-24374  
 Effect of preparation conditions on formation of carbide phases in iron-carbon thin films, using vacuum condensation 12 p1933 A66-25025  
 Magnetoresistance effect applied to Rotatable Initial Susceptibility II films, explaining resulting hysteresis loops and torque curves 13 p2161 A66-25183  
 Age-hardening of Fe-Ni-Ti alloy martensite associated with formation of ordered Ni-Ti phase 13 p2106 A66-25331  
 Martensitic transformation of Ni-Fe alloy from fcc to bcc lattice, noting stress produced by chemical free energy difference between austenite and martensite structure 15 p2520 A66-28649  
 Trace element effect on lifetime of iron-chromium-aluminum heat-resisting alloy 16 p2723 A66-30311  
 Grain growth from solution precipitation and grain coalescence in liquid phase sintering of W-Ni-Fe and W-Ni-Cu alloys 17 p2939 A66-32393  
 Element distribution in cermet alloys of W-Ni-Fe system determined by X-ray spectral analysis 17 p2940 A66-32848  
 Structural transformations in alnico alloy with titanium studied by X-ray 18 p3123 A66-34401  
 Graphite content effect on antifriction properties of graphitized nickel-based copper and iron alloys 18 p3117 A66-34981  
 Characteristic microstresses in plastically deformed iron and aluminum alloy under tensile testing studied by X-ray techniques 19 p3376 A66-35400  
 Plessite composition and texture, discussing possible origin in terms of meteorite thermal history 19 p3460 A66-35732  
 Phase separation from tempering of martensite in iron-nickel alloys with aluminum additions 19 p3386 A66-36426  
 Phase and chemical compositions of structural components forming in iron-nickel-chromium alloys with aluminum and titanium content 22 p3936 A66-40787  
 Magnetic transformation and effect of plastic strain on shear modulus of Fe-Cr-Ni alloys 24 p4227 A66-42310  
 Alpha and gamma solubility limits in Fe-Ni phase diagram at temperatures above 500 degrees C, using quench-and-anneal and diffusion-couple techniques and electron probe microanalyzer 24 p4227 A66-42365  
**IRON COMPOUND**  
**SA FERRITE**  
 Mariner IV observations of Mars surface, showing no detectable magnetic field or radiation belts, suggest iron on surface oxidized from photodissociation of water vapor 10 p1606 A66-21211  
 Sublimation rate of iron fluoride and identification of vapor species by Knudsen technique, using mass spectrometer 11 p1651 A66-23413

Iron selenides of nickel arsenide structure analyzed, noting dependence of semiconductor characteristics on iron gap arrangements 13 p2164 A66-25471  
 Paleogenetic study of ferredoxin structure, reconstructing evolution from amino acid sequence 14 p2228 A66-27810  
 Niobium dissolution kinetics in iron carbide 19 p3386 A66-36447  
 Microwave energy attenuation by dissipative material consisting of epoxy resin loaded with fine powder of iron carbonyl 20 p3587 A66-37585  
 Properties of ferrous ion in iron germanium oxide studied in terms of Mossbauer effect and susceptibility measurements 20 p3621 A66-37823  
 Kinetic energy causing anomalous increase in thermoelectric power in semiconducting p-type iron-chromium sulfide near Curie temperature 21 p3803 A66-39261

**IRON METEORITE**

Gallium concentrations in iron phases of several chondritic meteorites 02 p0290 A66-11962  
 Cl 36 in stony meteorites produced by spallation reactions and neutron capture 04 p0579 A66-14318  
 Rare gas measurements in iron meteorites and troilite and schreibersite inclusions, using mass spectrometer 04 p0580 A66-14484  
 Cosmic ray induced lithium and calcium in iron meteorites by improved technique of potassium isotope 04 p0580 A66-14487  
 Isostructural and jadeite mineral called ureyite found as rare emerald-green grains in iron meteorites Coahuila, Toluca and Hex River Mountains 05 p0674 A66-15197  
 Mineral content and structure of graphite and sulfide inclusions in iron meteorites measured by reflected light and microprobe 06 p0952 A66-15940  
 Concentration gradients in meteoritic kamacite predicted from Fe-Ni phase diagram and diffusion 06 p0955 A66-16787  
 Strontium-rubidium age of iron meteorite 07 p1132 A66-17234  
 Discovery of new fragments of typical iron meteorite near Wolf Creek, Australia 07 p1133 A66-17457  
 Low-background gamma-ray spectrometry of induced radioactivity resulting from Bogou meteorite cosmic radiation 08 p1291 A66-19094  
 Polyminal contents of globular and elongated nodules in Odessa iron meteorite 08 p1292 A66-19259  
 Radionuclide production in iron targets bombarded with 400-mev protons investigated by Monte Carlo method for cosmic ray effects on meteorites 11 p1775 A66-23145  
 Iron meteorites with low cosmic ray exposure ages examined via analysis of product of argon 39 and 38 13 p2177 A66-25135  
 Aerodynamic heating of ferrous Santa Catharina meteorite 14 p2381 A66-27350  
 Iron and stony meteorite evolution, cosmic radiation ages and space erosion model 14 p2390 A66-28409  
 Fe-Ni-P system and structure of iron meteorites 15 p2603 A66-29967  
 X-ray diffraction study of minerals from shocked iron meteorites 16 p2803 A66-31014  
 Ferrous /manganous/ orthophosphates, sarcoside and grafitonite found in four iron and pallasite meteorites 16 p2803 A66-31221  
 Isotopic abundance and content used to trace history of 20 iron and stony meteorites 16 p2803 A66-31223  
 Mass spectrometric measurement of distribution of spallation produced chromium nuclides between alloys in iron meteorite 17 p3007 A66-33282  
 Isotopic composition of silver in Canyon Diablo iron meteorite 18 p3228 A66-34017  
 Cosmic ray produced lithium and calcium in iron meteorites 18 p3236 A66-34890  
 Radiation age of 74 iron meteorites estimated from content of cosmogenic isotopes Ga and Ge 19 p3456 A66-35361  
 Determination of constancy of cosmic radiation and of terrestrial and cosmic ages of ferrous meteorites by radioactivity of Al 26 and Be 10 20 p3651 A66-37411

Widmanstätten patterns for electrolytic dissolution of iron meteorites and separation of nonmetallic portions, particularly kamacite 21 p3816 A66-39493  
 Butler iron meteorite composition, noting unusually high cobalt and germanium content and low cooling rate 22 p3978 A66-40013  
 Butler iron meteorite composition, noting very high concentration of germanium, gallium and nickel exhibiting Widmanstätten pattern 22 p3978 A66-40014  
 Revision of Levin average value of accommodation coefficient K for iron meteoric bodies 22 p3984 A66-40783  
 Shield of volatile matter acting as cosmic radiation barrier as possible explanation of contraction between radiation ages of stony and iron meteorites 23 p4065 A66-41832

**IRON OXIDE**

Electrical properties of alpha ferric oxide containing magnesium, noting temperature effect, carrier concentration, conductivity variations, etc 08 p1271 A66-19221  
 Structure and properties of intermediate components of iron-oxide-germanium-oxide system analyzed, using heat treatment 13 p2162 A66-25355  
 Combustion behavior of aluminum-ferric oxide thermite with aluminum oxide additions used as combustion model for involatile condensed systems 18 p3259 A66-33718  
 Mossbauer, X-ray and magnetic measurements of wustite structural and magnetic decomposition properties 20 p3623 A66-38391

**IRRADIATION****SA PROTON IRRADIATION****SA X-RAY IRRADIATION**

Free radical reactions in irradiation of model systems and role of radicals in radiation damage 13 p2010 A66-26227  
 Conversion of 2-formyl dienone III into dienone IV upon irradiation in acetic acid followed by base-catalyzed deformation of crude photoproduct 15 p2446 A66-28873  
 Generation recombination noise in Ge single crystals under fast neutron irradiation, using reversible technique to vary noise parameters 16 p2778 A66-31072  
 Irradiation system for experiments with Plum Brook Reactor in nuclear rocket program, noting cryogenic system, dynamic testing, etc 17 p2956 A66-32045  
 Thermal neutron irradiation effect on superconducting properties of niobium aluminum and vanadium silicide doped with fissionable impurities 17 p2979 A66-32630  
 Oxygen defect complexes in neutron irradiated germanium 17 p2980 A66-32647  
 Silicon IR absorption spectra at various wavelengths before and after irradiation with neutron fluxes 19 p3442 A66-35821  
 Q-switch pulsed ruby laser irradiation-induced chemical dissociation and ionization in residual gases 23 p4079 A66-42076  
 2-carboxy-3-keto-9-methyl hexahydronaphthalene converted in high yield into 5/7 fused products on irradiation in aqueous and nonaqueous media 24 p4171 A66-43101

**IRREVERSIBLE PROCESS**

Text on theory of heat and mass transfer from viewpoint of thermodynamics of irreversible processes 01 p0161 A66-10237  
 Irreversible tempering brittleness of spring steel with Mn, Cr, Si and C 01 p0086 A66-10452  
 Heat and mass transfer treated by thermodynamics of irreversible processes 01 p0162 A66-10623  
 Parameters of internal heat and mass transfer determined from temperature and moisture content measurements and using characteristic function of irreversible thermodynamics 01 p0162 A66-10624  
 Molecular transfer equations derived on basis of irreversible thermodynamics and law of conservation of matter 01 p0163 A66-10625  
 Heat and mass transfer in nonuniform gas-suspension flow treated by irreversible thermodynamics 01 p0163 A66-10628  
 Nonequilibrium thermodynamics applied to problem of solid carrying electric and heat currents in presence of external magnetic field

ASME PAPER 65-HT-1] 05 p0782 A66-14732  
Kinetic equations of complex reactions  
derived, using conical graphs, reducing  
reversible reaction problems to problems of  
irreversible kinetics 06 p0822 A66-16544  
Nonequilibrium thermodynamics applied to  
problem of solid carrying electric and heat  
currents in presence of external magnetic  
field  
ASME PAPER 65-HT-1] 11 p1785 A66-22186  
Generalized form of variational principle  
for minimum dissipation of energy applied  
to anisotropic thermal conductivity  
formulation 11 p1788 A66-23448  
Thermodynamics of irreversible processes  
applied to continuum mechanics, deriving  
classical rheological  
equations 12 p1976 A66-23546  
Two branches of fluctuation theory,  
conventional thermostatics or equilibrium  
statistical mechanics and time-dependent  
correlation functions 12 p1976 A66-23553  
Variational calculus methods for convective  
heat transfer to nonhomogeneous fluids and  
fluids with thermal  
expansion 12 p1979 A66-24817  
Heat and mass transfer phenomena  
analyzed, using thermodynamics of  
irreversible processes and incorporating  
certain particular data of kinetic and  
statistical theories 12 p1980 A66-24910  
Irreversible form of chemisorption by  
semiconductor as affected by volume  
impurity and reaction with  
chemisorbate 13 p2017 A66-25696  
Relativistic hydrothermodynamics in  
covariant form for simple viscous fluid,  
omitting infinite heat conduction velocity  
and instantaneous diffusion flux theory from  
treatment of Eckart 13 p2210 A66-26333  
Heat and mass transfer treated by  
thermodynamics of irreversible  
processes 14 p2416 A66-28486  
Second law of thermodynamics, discussing  
Clausius and Boltzmann mathematical  
expressions of entropy, role of  
irreversibility and relationship between  
increase of entropy and increase of  
disorder 15 p2616 A66-29062  
Planck entropy equation and irreversibility  
of radiation matter interaction for stationary  
isothermal gas emitting resonance lines of  
two-level atoms 17 p2957 A66-32044  
Nonisothermal deformation of viscoelastic  
medium analyzed on basis of  
thermodynamically irreversible  
processes 20 p3671 A66-38112  
Thermodynamics of irreversible processes  
methods applied to stress-strain relations of  
single-phase nonelastic continuous  
medium 21 p3830 A66-38986  
Solution to chain of kinetic gas equations,  
showing effect of fast reversible and slow  
irreversible processes on particle  
distribution function 21 p3771 A66-39248  
Irreversible thermodynamics of large  
viscoelastic deformations, showing hidden  
coordinates as scalar functionals and  
applicability to quasi-equilibrium  
states 22 p3999 A66-40456  
Generalized strain and transition concepts  
for elastic-plastic deformation creep and  
relaxation 23 p4144 A66-41973  
Inequality, derived from entropy law, for  
irreversible processes of nonequilibrium  
thermodynamics, with attention to  
viscoelastic materials 24 p4293 A66-42136  
Stress-strain temperature equations and  
energy equation with heat conduction for  
isotropic nonlinear viscoelastic materials,  
using irreversible  
thermodynamics 24 p4289 A66-42280  
ROTATIONAL FLOW  
Maximum friction along jet path in mixing  
zone at constant pressure applied in finding  
irrotational wall velocity 13 p2063 A66-25468  
Potential complex and forces in perfect  
incompressible fluid at rest at infinity with  
free vortices determined by pointless  
profiles excited by arbitrary  
motion 15 p2479 A66-29637  
SCHEMIA  
Effect of head-to-foot accelerations of up  
to 10 g on rabbits, noting changes in ECG,  
EEG, brain histology, etc, leading to  
ischemic conditions 18 p3060 A66-34408  
ENTROPIC PROCESS  
Isentropic expansion of argon plasma in

Laval nozzle, discussing parallel flow  
parameters, frozen flow, thermodynamic  
equilibrium, energy balance,  
etc 05 p0720 A66-14509  
Self-similarity of solutions to motion  
equations for relativistic gas possessing  
point symmetry and nonexistence of  
isentropic flow 06 p0954 A66-16538  
Approximate methods for integration of  
equations of plane isentropic motion of gas  
at supersonic velocities 08 p1165 A66-19572  
Polytropic technique for gas turbine  
performance, prediction and evaluation,  
noting use of sophistication factor  
[SAE PAPER 660161] 09 p1434 A66-20161  
Inviscid flow of compressible conducting  
gas with aligned magnetic field through  
axially symmetric Laval nozzle in various  
transition regions 11 p1636 A66-23256  
Analytic design of turbine blades based on  
inviscid isentropic supersonic vortex flow  
theory and performance in  
cascades 12 p1796 A66-23800  
Nonrelativistic force in simple  
magnetizable fluid derived from  
thermodynamic information about energy  
and power 12 p1915 A66-24651  
Incompressible fluid static thrust  
augmentation devices for aircraft propulsion  
for cases of presence and absence of heat  
and work exchange  
[ASME PAPER 66-GT-116] 14 p2373 A66-27008  
Circumventing turbine inlet temperature  
limitation of gas turbines by direct fluid-to-  
fluid energy exchanger, using isentropic  
compression waves to avoid shock losses  
[ASME PAPER 66-GT-117] 14 p2373 A66-27009  
Self-similarity of solutions to motion  
equations for relativistic gas possessing  
point symmetry and nonexistence of  
isentropic flow 15 p2603 A66-29978  
Supersonic diffuser for eliminating  
separation of boundary layer in isentropic  
compression 19 p3276 A66-36084  
Isentropic two-dimensional nonstationary  
flow of polytropic gas adjoining region with  
quiescent gas, constructing approximate  
picture of motion near arbitrary  
discontinuities 24 p4195 A66-42723  
Argon entropy diagram calculation from  
sound velocity data and P-V-T  
relation 24 p4238 A66-42887  
ISIS SATELLITE  
Canadian ISIS program for launching of  
satellites containing enough instrumentation  
to measure all ionospheric parameters  
simultaneously 24 p4283 A66-42696  
ISLAND  
Optical absorption of island films of gold  
as function of island density obtained from  
electron micrographs and film  
thickness 19 p3435 A66-35416  
ISOBAR  
Isotherms and isobars for polymer liquids  
using corresponding states principle to  
establish function describing dependence of  
internal pressure on volume or  
temperature 18 p3124 A66-33692  
ISOBUTYLENE

resonance spectra for degenerate  
isomerizations of disubstituted benzofuran  
oxides 05 p0629 A66-15155  
Master equation for intramolecular  
relaxation processes, with application to  
internal vibrational relaxation and  
isomerization reactions 06 p0911 A66-16170  
Conversion of 2-carboxy-3-keto-9-methyl-  
unsubstituted hexahydronaphtalene into 5/7-  
fused products on irradiation in aqueous and  
nonaqueous media, observing photochemical  
rearrangements 24 p4170 A66-42314  
ISOPHOTE  
Mapping 6300 angstrom airglow isophotes  
from observations of scanning photometer at  
Haleakala, Hawaii 17 p2918 A66-32534  
Profiles of isophotes and relative  
intensities for Aristarchus region of Moon  
taken during total eclipse on December 19,  
1964 18 p3237 A66-35048  
Comet disintegration as basic source of  
interplanetary dust based on zodiacal  
isophotes 20 p3549 A66-37037  
ISOPROTENOL  
S ADRENERGICS  
ISOSTATIC PRESSURE  
Statics and kinematics of rigid bodies in  
structural mechanics, establishing isostatic  
support conditions 03 p0436 A66-12733  
ISOTHERM  
Isotherms and isobars for polymer liquids  
using corresponding states principle to  
establish function describing dependence of  
internal pressure on volume or  
temperature 18 p3124 A66-33692  
ISOTHERMAL FLOW  
Interaction or coupling of radiation with  
conduction and convection mechanisms in  
nonisothermal nongray gas flowing in  
entrance region of tube with isothermal  
black walls  
[AIAA PAPER 66-136] 06 p0875 A66-17090  
Superfluid critical velocity in He 2  
isothermal gravitational flow in narrow  
channels 09 p1366 A66-20018  
Critical velocities and supercritical velocity  
dissipation effects in isothermal flow of  
liquid He 2 in narrow  
channels 09 p1366 A66-20019  
Exact solutions for triple wave type  
hydrodynamic equations for confined  
isothermic gas flow and polytropic gas  
efflux into vacuum 12 p1863 A66-24360  
ISOTHERMAL LAYER  
Turbulent velocity fluctuation field in  
isothermal boundary layer with  
homogeneous injection and combustion  
[AIAA PAPER 65-820] 04 p0510 A66-13689  
First-order perturbation analysis of free  
convection of liquid metal from isothermal  
vertical finite plate extended to uniform  
heat flux 10 p1619 A66-21054  
Surface boundary layer charge of  
isothermal atmosphere of fully ionized  
equilibrium plasma in gravitational  
field 10 p1609 A66-21813  
Justification for multiple isothermal layer  
approximation to real atmospheric acoustic-  
gravity wave propagation 14 p2234 A66-26857  
Internal atmospheric gravity waves in

isothermal medium, solving hydrodynamic equations, determining wave propagation in realistic atmosphere for range of wave parameters, wind amplitude, reflected energy, etc 20 p3554 A66-38202

## ISOTHERMAL PROCESS

Statistical behavior of reacting mixture in incompressible isotropic turbulence when reaction rate is quadratic function of local concentration of reactant, using Kraichnan direct interaction hypothesis [ATAA PAPER 65-812] 03 p0358 A66-13180

Practical Philips cycle for low temperature refrigeration, noting equal coefficient of performance to that of ideal Carnot cycle under isothermal 09 p1472 A66-20879

Decaying second-order isothermal reaction in limit of homogeneous turbulence in final period of decay 10 p1496 A66-21828

Compact Ackeret-Keller closed cycle thermodynamic nuclear turbine power plant [ASME PAPER 66-GT/CLC-6] 14 p2329 A66-26980

Mutual reactions occurring between various allotropic forms of TA6A during isothermal treatments of austenitized beta alloy 17 p2939 A66-32327

Steady isothermal motion of viscous gas between outer fixed sphere and eccentrically located rotating inner sphere 19 p3371 A66-36481

Boundary value problem for isothermal unidirectional deformation of hyperelastic material applied to inflation of thick walled sphere 22 p3988 A66-39673

## ISOTOPE

SA BERYLLIUM 10

SA DEUTERIUM

SA NUCLEAR ISOTOPE

MONOPROPELLANT

SA RADIOACTIVE ISOTOPE

SA TRITIUM

Mass spectrometry of positive ion beam produced by nonmagnetic emitter, using electron beam passing through electrostatic field for rare isotope analysis 03 p0397 A66-12391

Holbrook meteorite discussing abundance of lithium isotopes, measurement techniques, apparatus, and concentration pattern over surface 03 p0429 A66-13268

Cohen theory of square cascades and countercurrent separation processes for thermal diffusion columns 04 p0598 A66-14317

Performance of thermal diffusion columns studied for limits of validity of theory of isotopic mixtures in case of mixtures of gases 04 p0598 A66-14325

Isotopic ratios and location of light primordial rare gases in stony meteorites and correlation with diffusion coefficients 04 p0580 A66-14482

Rare gas measurements in iron meteorites and troilite and schreibersite inclusions, using mass spectrometer 04 p0580 A66-14484

Potassium content and K-A ages of 18 amphoterite chondrites determined from isotope dilution technique 04 p0580 A66-14486

Cosmic ray induced lithium and calcium in iron meteorites by improved technique of potassium isotope detection 04 p0580 A66-14487

Separation of gases from isotopes in compression shock produced in expanding gas flow past obstruction, dependent on gas density and hydrokinetic properties of components 06 p0875 A66-17052

Isotope shift, linewidth and precise wavelength of laser emission in ionized Hg 07 p1044 A66-18035

Critical magnetic field curves of superconducting Ru isotopes and dependence of superconducting transition temperature on isotopic mass 07 p1109 A66-18443

Electromagnetic isotope separators used in nuclear physics for analysis of ion-matter interaction 08 p1257 A66-18694

Low temperature chromatographic separation of hydrogen isotopes based on interaction with alumina surface electric fields 11 p1650 A66-23209

Mass spectrometry of positive ion beam produced by nonmagnetic emitter, using electron beam passing through electrostatic

field for rare isotope

analysis 13 p2139 A66-25397

Rare gas concentrations and isotopic compositions in Khor Temiki meteorite 13 p2186 A66-25877

Capillary viscosity meter measurements of hydrogen-deuterium solutions 13 p2114 A66-25970

Telescopic measurements of primary energy spectra and abundances of He 3 and He 4 in galactic cosmic radiation 16 p2793 A66-30198

Isotopic abundance and content used to trace history of 20 iron and stony meteorites 16 p2803 A66-31223

Angular distributions of elastic and inelastic alpha-particle scattering in even tin isotopes, using 40 mev alpha beam 18 p3138 A66-34166

Isotopic changes in materials caused by high energy nuclear active particles and solar wind in interplanetary space and on Earth 18 p3176 A66-34750

Abundance of isotopic helium 3 nuclei in primary cosmic radiation, using nuclear emulsion stack 18 p3189 A66-34828

Tracks of nuclei of primary cosmic rays that ended within nuclear emulsions and possibility of separating isotopes 18 p3192 A66-34842

Relative abundance of carbon isotopes in primary cosmic radiation estimated by separation of isotopes method in nuclear emulsion 18 p3192 A66-34843

Balloon-borne scintillation counter measurements of isotopic composition, energy/nucleon and rigidity spectra of primary cosmic helium nuclei 18 p3193 A66-34848

Isotopic composition of xenon extracted from Ca-poor achondrites, noting relation between enstatite achondrites and enstatite chondrites 22 p3983 A66-40558

Isotopic composition of Xe indicates that two Ca-rich achondrites comprise group of diopside-olivine achondritic meteorites containing fission-produced Xe 24 p4264 A66-42606

## ISOTOPE SHIFT

Isotopic volume shift in X-ray molybdenum K alpha 1 line 01 p0084 A66-10255

Isotopic shift in components of five even ytterbium isotopes measured on ten spectral lines of neutral and ionized atom 09 p1431 A66-20938

Isotope shift measurement for 6328 angstroms helium-neon laser transition 10 p1540 A66-21070

Isotopic volume shift in X-ray molybdenum K alpha 1 line 13 p2110 A66-25972

Isotopic shift in components of five even ytterbium isotopes measured on ten spectral lines of neutral and ionized atom 15 p2557 A66-28527

Spectroscopic analysis of isotope shift between tetraborane /10/ and pentaborane /11/ 15 p2446 A66-29236

Isotope shifts and Fermi resonance role in carbon dioxide IR laser 16 p2716 A66-30176

Solar nucleosynthesis of extinct isotopic iodine, noting incorporation of Nakhilite meteorite material and subsequent decay into fissionogenic xenon 18 p3225 A66-33623

Isotope shifts for zero-phonon absorption lines associated with radiation induced color centers in lithium fluoride single crystals 18 p3154 A66-33921

Generically related cosmic ray spectrum explaining variations in abundance ratios of helium isotopes and light to medium elements in terms of solar and geomagnetic modulation 18 p3178 A66-34758

He-3-He-4 isotopic composition of primary cosmic ray helium flux in terms of energy, rigidity and solar modulation 18 p3192 A66-34841

Intracavity interferometer laser measurements of power gain and output in single-frequency Ar laser and 6328-angstrom Ne isotope shift 22 p3932 A66-40110

Homogeneous isotopic exchange reaction between hydrogen and deuterium in single-pulse shock tube with excess argon 22 p3860 A66-40902

## ISOTROPIC MEDIUM

Longitudinal elastic wave of finite amplitude propagation in isotropic solid 01 p0057 A66-10421

Electromagnetic wave propagation through multilayer isotropic and anisotropic structure 01 p0025 A66-10525

Approximate solution of principal boundary value problem of electrostatics 02 p0262 A66-12246

Shock waves in elasticity discussing upstream, downstream and Lagrange coordinate-related configurations, propagation conditions in isotropic medium and developing equations for arbitrary shock amplitudes 03 p0392 A66-12535

Vacuum and low temperature X-ray camera for structural analysis of oxidized materials 04 p0518 A66-13499

Background radiation density in isotropic homogeneous universe, discussing Olbers paradox 04 p0574 A66-14017

Linearized version for isotropic elastic plates and shells by series expansion method obtained as Euler equations 04 p0591 A66-14201

Static deformation of model of three-constant isotropic elastic material exhibiting phenomenon of couple stresses [ASME PAPER 65-WA/APM-3] 05 p0776 A66-15427

Stress relaxation of wound reel of magnetic tape, assuming homogeneous and isotropic material, exhibits instantaneous and delayed elasticity, creep under shear and elastic behavior under hydrostatic stress [ASME PAPER 65-WA/APM-8] 05 p0689 A66-15430

Three-dimensional linear elasticity problems in homogeneous transversely isotropic elastic materials like infinite circular cylinder, using potential function method [ASME PAPER 65-WA/APM-26] 05 p0778 A66-15447

Maxwell equations for isotropic medium bounded by conductors in three-space dimensions solved by applying Laplace equations described in Minkowski space 06 p0851 A66-16450

Radiant transport with isotropic scattering, evaluating approximate solutions for reflection and transmission of parallel plane radiation 07 p1152 A66-17589

Elastic interaction energy of two infinitesimal dislocation loops in a transversely isotropic medium estimated from fundamental elasticity tensor 07 p1144 A66-18044

Stressed state of unbounded nonlinear isotropic plate with square hole during triaxial uniform tension 08 p1307 A66-18880

Dynamic problems of transversely isotropic half-space and elastic layer, solving contact and boundary value problems 08 p1315 A66-19708

Approximate solution for elasticity problems, noting mathematical determination of stress distribution in any homogeneous isotropic body 09 p1468 A66-20642

Static deformation of model of three-constant isotropic elastic material exhibiting phenomenon of couple stresses [ASME PAPER 65-WA/APM-3] 10 p1615 A66-21480

Stress relaxation of wound reel of magnetic tape, assuming homogeneous and isotropic material, exhibits instantaneous and delayed elasticity, creep under shear and elastic behavior under hydrostatic stress [ASME PAPER 65-WA/APM-8] 10 p1539 A66-21481

Longitudinal elastic wave of finite amplitude propagation in isotropic solid 11 p1738 A66-22606

Polarization and birefringence of photoelastic plastic medium 11 p1781 A66-22613

Input impedance of spherical emitter in infinite homogeneous isotropic conducting medium 11 p1656 A66-23031

Propagation of MHD emissions in Alfvén mode along high latitude geomagnetic field lines, auroral zone signal energy penetration and isotropic wave mode transformation 11 p1701 A66-23151

Potential representation of solution of equations for homogeneous and isotropic medium in presence of magnetic and temperature fields 13 p2195 A66-25401

Buckling of unstable perfectly elastic isotropic rectangular 13 p2195 A66-25401

- plate 14 p2396 A66-27312
- Stresses and displacements in circular cylinder of transversely isotropic material for mixed boundary conditions, obtaining solution by using partial differential equation 14 p2397 A66-27388
- Stresses in composite spheroids of two different isotropic elastic materials under compressive forces acting along common axis of revolution 14 p2397 A66-27391
- Dislocation problems of circular ring with simple type nonhomogeneity and of isotropic circular ring with thickness varying inversely with square of radial distance 14 p2397 A66-27392
- Fundamental equations for birefringence of isotropic elastic solids and isotropic viscous fluid derived from Toupin theory of photoelasticity and stress 14 p2408 A66-28388
- Optics 14 p2408 A66-28388
- Huygen principle for electromagnetic field in moving, isotropic, homogeneous and linear medium, using Maxwell-Minkowski equations and Green function for field equation 15 p2537 A66-28783
- Theory of transversely isotropic fluids for fluid having rigid microstructure 15 p2480 A66-29692
- Galerkin vector for elastodynamic problem of isotropic inhomogeneous body 16 p2823 A66-31707
- Finite rotational and inflational deformation of incompressible homogeneous isotropic torus 17 p3018 A66-31928
- Variational and reciprocity theorems on thermoelastic distortions in homogeneous isotropic body 17 p3032 A66-33331
- Three-dimensional linear elasticity problems in homogeneous transversely isotropic elastic materials like infinite circular cylinder, using potential function method [ASME PAPER 65-WA/APM-26] 18 p3248 A66-33582
- Elastic equilibrium of infinite isotropic homogeneous plate with soldered circular isotropic ring 18 p3251 A66-33703
- Second-order volumetric change in isotropic elastic materials without external loads 18 p3258 A66-34639
- Transfer efficiency of laser pumping cavities with diffusely reflecting wall determined, based on approximately isotropic nature of light inside cavity 19 p3372 A66-35379
- Numerical integration based on definition of Riemann integral, describing application to nonlinear integral equations of isotropic scattering of radiation in plane parallel atmosphere 19 p3388 A66-35830
- Photoelastic Wertheim law in general tensor coordinate system derived for linearly anisotropic or isotropic homogeneous matter 19 p3474 A66-36320
- First- and second-order constitutive equations of viscoelasticity based on mechanical and invariant theory, discussing relaxation under finite twist of incompressible isotropic bar 19 p3475 A66-36639
- Linear model for macroscopically uniform elastic medium, deriving expression for Green tensor in weakly and highly dispersed isotropic media 19 p3476 A66-36834
- Elastic deformation of unbounded transversely isotropic body with internal plane-circular slot under slot surface load 19 p3476 A66-36839
- Bending problems of transversely isotropic circular plates based on Ambartsumian theory of anisotropic plates 21 p3830 A66-38980
- Heat transfer in conducting, absorbing, emitting, scattering and heat generating medium 21 p3836 A66-39438
- Input resistance of short filamental antenna in warm isotropic plasma from kinetic /Vlasov equation/ rather than hydrodynamic approach 22 p3874 A66-39939
- HF conductivity of quasi-equilibrium isotropic fully ionized two-temperature plasma 23 p4102 A66-41367
- Electromagnetic wave transmission through and reflection from homogeneous nonlinear anisotropic slab between two linear isotropic media 24 p4173 A66-42706
- Numerical integration of equations of Love first approximation for thin isotropic shells, presenting results for torus and flask having variable wall thickness 24 p4292 A66-42964
- ISOTROPIC TURBULENCE**
- Weak turbulence in media with decay spectrum, analyzing second component of collision term with isotropic model 02 p0264 A66-11385
- Dynamic equations for two-point double correlations of fluid pulsation velocities and particles suspended in it, noting isotropic turbulence degeneration 02 p0217 A66-11393
- Statistics of locally-isotropic turbulent field for gas with density sensitive heating mechanism [AIAA PAPER 65-38] 02 p0302 A66-11532
- Damping of longitudinal plasma waves emitted by artificial Earth satellite moving in ionosphere 02 p0269 A66-12132
- Statistical behavior of reacting mixture in incompressible isotropic turbulence when reaction rate is quadratic function of local concentration of reactant, using Kraichnan direct interaction hypothesis [AIAA PAPER 65-812] 03 p0358 A66-13180
- Presence of suspended particles leads to more rapid attenuation of pulsations in final stage of degeneration of isotropic turbulence 04 p0512 A66-14436
- Turbulence in hydrodynamics and plasma physics 05 p0727 A66-15260
- Anisotropic grid-generated turbulence passed through axisymmetric nozzle of small contraction ratio followed by straight section 12 p1866 A66-24947
- Damping of longitudinal plasma waves emitted by artificial Earth satellite moving in ionosphere 14 p2345 A66-28089
- Inertia and pressure effects on energy potential of homogeneous and isotropic turbulence in weakly compressible medium 18 p3100 A66-34608
- Cosmic ray isotropy mechanism, examining plasma beam instability and cosmic ray scattering at plasma turbulent pulsations 20 p3629 A66-37032
- Contraction to improve isotropy of grid-generated turbulence 22 p3899 A66-40381
- Four-plasmon hydrodynamic equations describing weak turbulence spectrum in universal equilibrium region of plasma without magnetic field 24 p4243 A66-42532
- Channel flow deriving equation for /proper/ turbulence spectrum and expression for spectrum of dynamic and turbulent quantities 24 p4197 A66-43061
- ISOTROPISM**
- SA ANISOTROPY**
- Near-isotropic circularly polarized antenna 13 p2035 A66-25503
- ISRAEL**
- Aerospace and related research conducted at various universities, institutes and agencies in Israel during 1964 and 1965 09 p1458 A66-20716
- ITALIAN SATELLITE**
- S SAN MARCO SATELLITE**
- ITALY**
- Milan airport system noting air traffic 05 p0661 A66-15846
- European Miniature Electronic Components and Assemblies Data 1965-1966, Part I, Germany and Italy 06 p0858 A66-17158
- Italian participation in COMSAT 09 p1473 A66-20548
- Aerospace research in Italy including San Marco project, ionospheric measurements, cooperation with NASA, rocket experiments, etc 09 p1458 A66-20717
- Space research programs in Italy since May 1965 and cooperation with NASA 15 p2602 A66-29940
- ITERATION**
- Convergence, oscillation, functional stability and reliability of m-by-1 homogeneous polyfunctional nets under iteration 10 p1517 A66-21691
- Axially symmetric or two-dimensional electrode system with emitting surface, discussing convergence and accuracy criteria of iteration methods 17 p2887 A66-32700
- Programming tasks optimization through infinite iteration procedure 22 p3941 A66-40542
- ITERATIVE NETWORK**
- New block diagram compiler for sampled data system simulation 12 p1828 A66-23827
- Iterated theoretical admittance of cylindrical antenna, determining effective length and approximating ideal independent susceptance 20 p3534 A66-38365
- ITERATIVE SOLUTION**
- Solution to linear programming problems, using iterative method 01 p0050 A66-10170
- State assignment effect on sequential circuit reliability represented by Markov chain, using iterative assignment method with dynamic programming 02 p0207 A66-11521
- Theorems for determining common point of convex sets by method of successive projection 02 p0250 A66-12097
- Isotropic scattering of radiation from point source in finite atmosphere bounded by totally absorbing spherical shell, deriving iterative series solution 04 p0548 A66-13828
- MHD equations linearized by Newton iteration method, describing weak perturbation propagation 04 p0574 A66-13841
- Iterative process to refine solution to system of linear equations 04 p0540 A66-14392
- Iterative procedure for analyzing linear electrical networks by digital computer 05 p0638 A66-15127
- Computer analysis of axisymmetric free vibrations of orthotropic shells of revolution and elastic rings [AIAA PAPER 65-109] 05 p0781 A66-15790
- Circuit network in designing low pass filters with minimum attenuation requirements in stopbands and optimum transient behavior, using Schussler technique and iterative process 07 p1008 A66-17751
- Iterative procedure for determining linear separability of Boolean function and threshold functions for logical switching circuit design 07 p1059 A66-17971
- Computational reduction of high speed memory requirements in solving optimization problems by dynamic programming and supersonic transport trajectory application 07 p1004 A66-17976
- Iteration technique used to study minimum climb time of rockets 07 p1141 A66-18232
- Rapidly convergent iterative unique determination of linear steering function for desired orbit conditions 08 p1289 A66-18826
- Iterative guidance law for Saturn launch vehicle for lunar landing, examining trajectory optimization 08 p1253 A66-19539
- Formulation and iterative solution of small strain plasticity problems, using Hencky-Nadai hardening law as mathematical model for material behavior 09 p1466 A66-20263
- Globally convergent iteration function for solution of polynomial equations according to certain algorithms 09 p1395 A66-20624
- Tensor product analysis of alternating direction implicit iteration techniques for approximate solution of elliptic partial differential equations 09 p1396 A66-20637
- Dynamic stability of circular elastic rods, noting iteration method analysis of nonlinear coupling effect between axial force and curvature in forced in-plane vibrations 09 p1467 A66-20638
- Iterative method for computing optimum values of parameters for best agreement in least squares sense between given values and corresponding calculated values 10 p1507 A66-21213
- Iterative technique for determination of prime implicants of switching functions specified in maxterm form 10 p1517 A66-21695
- Chaplygin asymptotic series solution method for differential equation systems 10 p1551 A66-21915
- Numerical solution to first geodetic problem of ellipsoid of rotation, using iterative application of Runge-Kutta method to differential equations of geodetic line 11 p1698 A66-22767
- Numerical convergence of iterative solution to complete Bhattacharya-Gross-Krook equation for strong shock waves 11 p1690 A66-22909
- Iterative solution to shock wave structure in highly rarefied flows through kinetic theory and full Boltzmann equation 11 p1690 A66-22910
- Successive approximation methods of solving optimal control problems, based on variational calculus and Euler-Lagrange equation 11 p1679 A66-23273
- Newton-Raphson method iterative solution

of two-point boundary value problem and application to trajectory optimization and tubular reactor design 11 p1680 A66-23276

Successive approximations to determine vector in theory of optimal control 13 p2045 A66-25294

Mathematical programming methods for solving nonlinear state-constrained discrete optimal control problems 13 p2047 A66-25352

Iterative method solution of kinetic equation with functional derivatives for ionized plasma 13 p2141 A66-25476

Combined optimization problem, equivalent to dual control problem, considering determination of optimal control policies for plant under random disturbances, using iterative equations 13 p2051 A66-26065

Method for automatically adjusting networks for best approximation to desired responses, using iterative gradient techniques, constraint equations and Carroll programming technique 13 p2051 A66-26070

Iterative approximation of rational transfer function in Laplace transform variable  $s$ , optimal with respect to given input and output time functions, and deviation from desired output-input-time functional relation 13 p2054 A66-26087

Reflection coefficient for arbitrary lossy waveguide with large number of identical periodically positioned inhomogeneities determined by iteration 14 p2250 A66-27145

Boundary value problem of elastic/viscoplastic beams solved, using iteration method, noting wave propagation and effect of shear and inertia of axial motion of beam in motion equation 14 p2397 A66-27386

Approximate iterative calculation of non-Newtonian supersonic gas flow past highly blunt bodies 15 p2423 A66-28959

Iterative derivation of approximation of real function by exponential series 15 p2527 A66-29056

Tesseral harmonics of coordinates using Baker-Nunn data and geopotential and dynamical procedures, noting iterative cycle for correction 15 p2491 A66-29999

A posteriori error bounds in iterative matrix inversion 16 p2732 A66-30238

Iteration method of general linear programming on digital computer, using penalty functions, compared to equilibrium problem of mechanical system 16 p2669 A66-30759

Function approximation from finite number of arbitrary points, using iteration methods 16 p2734 A66-30760

Stresses and displacements in linearly elastic and toroidal shells of circular cross section determined by nonlinear numerical method [AIAA PAPER 65-144] 16 p2816 A66-30905

Iterative solution to Krook-Boltzmann kinetic equation noting Navier-Stokes numerical solution, computation and analysis of distribution function within shock wave 16 p2685 A66-30945

Molecular-kinetics experiments /trajectory calculation of particle interaction/ using digital computer iterative method for theoretical comparison 16 p2656 A66-30947

Iteration methods for solution of integro-differential equations 17 p2945 A66-31807

Rayleigh scattering scalar source functions and source matrix computed by iteration of auxiliary equation 17 p2917 A66-31922

Control forces in nonlinear integral equations solved by iteration 17 p2902 A66-32816

Iteration scheme based on Newton approximation method applied to two-dimensional and rotationally symmetric flows past obstacles 17 p2913 A66-33066

Iterative gradient method application to trajectory optimization problems, noting feasibility to systems with continuous bang-bang controls 17 p2903 A66-33254

Iterative solution of large signal abrupt junction varactor doubler as input frequency is varied, given power of source and load impedance 17 p2895 A66-33276

Simplification of steepest-ascent method for determining optimal control program by introducing penalty method to eliminate

adjoint variables 18 p3089 A66-33603

Digitally computed tables of Chebyshev approximations of Laplace shift operator transfer function enabling analog simulation of time delay systems 18 p3090 A66-34069

Iterative determination of space flight trajectory and velocity represented as sum of Kepler motions about celestial bodies 18 p3234 A66-34635

Computer iteration scheme for calculating arbitrary hyperbolic transfer orbit in field of attracting center, based on Gauss equations 19 p3455 A66-35278

Space mission trajectory optimization by iterative minimizing of residual vector, using linear correction [AIAA PAPER 65-697] 19 p3462 A66-35903

Iterative solutions to high-speed actions, noting reduction to successive problems of maximization of linear form from finite state 19 p3325 A66-35931

Numerical integration of primitive equations by simulated backward difference method, using two-step iteration for divergent barotropic model of atmosphere 19 p3393 A66-36057

Class  $K$  matrices, discussing new methods and application to convergence rate of iteration procedures 19 p3391 A66-36335

Iterative approximation method for solution of proper elements /eigenvalue/ of Sturm-Liouville equation 19 p3392 A66-36783

Fourth-order multipoint iterative methods for solving equations which cost one function and two derivative evaluations per iteration, for use in root finding 19 p3392 A66-36786

Iterative solution of time optimal control boundary value problem resulting from application of Pontryagin maximum principle 20 p3535 A66-36850

Iterative computational procedures applicable to optimal control problems including treatment of minimum-error regulator, minimum-error rendezvous and minimum-fuel terminal control 20 p3536 A66-36855

Unimodal function minimum located by successive approximations to interval of uncertainty 20 p3589 A66-36903

Acoustic oscillations in solid propellant rocket chambers, discussing cases of small amplitude perturbations and solving wave equations 20 p3628 A66-37387

Iterative method for extracting annual and Chandlerian terms of variation of Earth rotation from experimental data of universal time 20 p3550 A66-37410

Iterative guidance mode with application to three-dimensional upper stage vacuum flight 21 p3768 A66-38897

Communication possibility over memoryless channel with computational iterative decoding scheme that is asymptotically complex 21 p3704 A66-39141

Iterative solution of equations for diffuse reflection and transmission in finite plane-parallel atmosphere with arbitrary stratification 21 p3734 A66-39220

Simultaneous nonlinear estimation of parameter vector via iterative procedure for known and unknown covariance matrix 22 p3939 A66-40000

Newton iterative procedure extended to solution of nonlinear integral equations 23 p4085 A66-41556

Singular solutions for Chaplygin equations using generalized wave functions, noting iteration method for finding wave equation corresponding to first terms of expansion series 23 p4085 A66-41561

Energy dependence of effective interaction in superconductivity, calculating critical field and specific heat 24 p4259 A66-43018

Iterative design procedure for optimum placement of vapor deposited Nb-Sn ribbon superconductors in high field large bore modular magnets 24 p4186 A66-43175

Boundary layer equation transformation, using special curvilinear coordinates 08 p1206 A66-18872

Two-dimensional isothermal liquid flow electrically conducting in channel under electromagnetic fields, finding self-modeling solutions, using Jacobi functions 15 p2551 A66-29221

Invariant imbedding as basis for integration theory for canonical equations of motion with parallels to Jacobi theory 17 p2947 A66-32500

Self-similar solutions of two-dimensional laminar flow of incompressible electroconductive fluid in channel in crossed electric and magnetic fields, using Jacobi elliptic integrals 17 p2971 A66-32866

Existence of new isolating integral in restricted three-body problem, computing orbits for various parameter values and initial conditions 24 p4272 A66-42202

**JACOBI POLYNOMIAL**

Multistage rocket trajectory optimization, extending maximum principle to include Weierstrass and Jacobi conditions 11 p1733 A66-23337

Bilinear expansions treating Euler transform of special integrand, reviewing properties of Jacobi function for application in quantum mechanics or plasma physics 12 p1905 A66-24566

Locating zeros of complex functions by computing topological index 13 p2121 A66-26326

Contact problem of half-plane inelasticity theory using Jacobi polynomials and taking into account thermal stresses and presence of adhesion and friction in contact area 19 p3476 A66-36835

Singular integral equations with constant coefficients solved by Jacobi polynomials and applied to problems in fluid dynamics, crack propagation, plane elastic theory, etc 19 p3393 A66-36836

Integral equation solution through Jacobi polynomials employed as eigenfunctions of certain operators 22 p3941 A66-40798

**JAHN-TELLER EFFECT**

Jahn-Teller effect in excited 4-T-2 state of trivalent Cr ions in ruby, discussing unilateral elastic strain effect splitting of pure electronic line 597 nm in U band 03 p0410 A66-12941

Dynamic Jahn-Teller effect in excited state vanadium doped aluminum oxide 17 p2981 A66-32717

Three-dimensional X-ray diffraction data to determine structure of crystal of potassium barium hexanitrocobaltate, discussing Jahn-Teller effect 17 p2871 A66-33486

Jahn-Teller shift reorientation in Ni impurity centers of diamond and rise of C-N pair EPR spectrum with temperature 22 p3964 A66-40307

Static Jahn-Teller effect on impurity centers in semiconductors, discussing nature and magnitude of splitting of ground state 24 p4256 A66-42527

**JAMMING**

Selection of optimum ranging signal for jam resistant satellite communications system [AIAA PAPER 66-292] 12 p1822 A66-24762

**JAPAN**

F-104J production program from Japanese standpoint [AIAA PAPER 65-804] 03 p0446 A66-12600

Japanese space research during 1964, particularly meteorological rocket observation, satellite tracking and space experimental techniques and data 09 p1458 A66-20718

Heat transfer bibliography of 32 Japanese works including heat transfer application, phase change, separated flow, radiation, transpiration and mass transfer 14 p2410 A66-26937

Space research in Japan in 1965 15 p2602 A66-29941

Height distributions of atmospheric refractive index variations over Japan 16 p2653 A66-30796

Japanese air traffic control using real time computer data processing 22 p3945 A66-40617

**JEANS THEORY**

First order /Jeans/ stability analysis of infinite uniform medium pervaded by magnetic field 13 p2187 A66-26138

## JACOBI INTEGRAL

First order nonlinear partial differential equation discussing global locally-Lipschitzian solutions via Jacoby theorem extension 06 p0901 A66-16006

- Homogeneous rotating low density plasma permeated by magnetic field with anisotropic velocity distribution may exhibit homogeneous instability as well as gravitational instability 21 p3794 A66-39562

- FAA study of jet takeoff and landing noise effect on population around airport, establishing numerical value of noisiness 10 p1482 A66-21373
- Optimum magnitude of jet-noise reduction in cylindrical muffler 13 p2056 A66-25090
- Acoustic power emitted by coaxial subsonic jets in relation to aerodynamic parameter 13 p2063 A66-25432
- Sequential Noise Output Recording Equipment /SNORE/, aircraft engine noise test facility, for jet noise and compressor noise and acoustic absorption materials test facility [ASME PAPER 66-GT/N-41] 14 p2269 A66-26986
- Optimum magnitude of jet-noise reduction in cylindrical muffler 21 p3721 A66-38515
- Interactions among technical, economic and political aspects of aircraft noise problem, examining relation between thrust and jet engine noise
- [ICAS PAPER 66-5] 23 p4152 A66-42068
- Mean flow refraction of self noise and generation of shear noise in jets 24 p4194 A66-42414
- NOZZLE**
- Jet tab system influence on pressure distribution within rocket nozzle for missile control 03 p0431 A66-12749
- Thrust measurement for calibrating nozzle flow coefficients by direct primary method [ASME PAPER 64-WA/FM-3] 06 p0871 A66-16220
- Chemical reaction kinetics and gas dynamics combined to analyze processes occurring in combustion chambers and nozzles of jet and rocket engines 10 p1620 A66-21367
- Axisymmetric shock wave formation at nozzle exit when jet pressure is less than ambient pressure 12 p1799 A66-24447
- Acoustic output, turbulence in jets and noise sources in fluid amplifiers noting design, noise reduction by jet edge, input nozzle design, forced secondary flow, etc 18 p3054 A66-34132
- Binary adder and other pneumatic logic elements producing any two-valued function of three two-valued input parameter by proper arrangement of input jet nozzles 20 p4946 A66-36862
- PILOT**
- Medical aspects of commercial jet pilot fatigue, examining effects of socio-economic and off-duty activities 15 p2442 A66-28665
- PLUME**
- Highly underexpanded sonic jet in wind-tunnel study of stagnation temperature-pressure and shock profiles 08 p1164 A66-19134
- Propellant rocket exhaust plume effect on error calculation for radiation balance IR tracker 18 p3240 A66-33798
- Multiple rocket engine exhaust plumes calculated by method of characteristics and finite difference and compared with schlieren data
- [AIAA PAPER 66-651] 18 p3264 A66-34448
- Wind tunnel test program for simulation of gas-particle rocket exhaust plume, separated flow around nozzle and base recirculation [AIAA PAPER 66-767] 22 p3895 A66-40648
- Wind tunnel tests determining plume induced flow separation pattern on missile configurations as ratio of nozzle to ambient pressure 23 p4012 A66-41914
- Laminar shock layer structure in which streamlines retain appropriate momentum, calculating exhaust plume structure for rocket nozzle 23 p4012 A66-41921
- Absorption cross section, scattering cross section and angular scattering distribution of solid alumina particles emitted in homogeneous solid propellant rocket plume 24 p4294 A66-42778
- PROPULSION**
- Production and recent developments in gas turbines and propulsive engines in West Germany 06 p0942 A66-16795
- High by-pass turbofan for business aircraft, comparing jet propulsion system efficiency with fan engines, cost factors and market potentials [SAE PAPER 660221] 13 p2173 A66-26400
- Dynamic test method for characteristics and interactions of supersonic aircraft propulsion systems, particularly inlet/engine performance and control compatibility aspects [AIAA PAPER 66-741] 22 p3893 A66-40630
- PUMP**
- Design charts for determining ejector characteristics for optimum performance of jet pump systems [ASME PAPER 65-WA/FE-32] 05 p0691 A66-15709

Optimum design parameters for water ejectors  
[ASME PAPER 65-WA/FE-31] 05 p0691 A66-15710

Jet inducer with multiple nozzles calibrated in liquid mercury and water to minimize feed pump performance degradation due to off-design operation and cavitation 07 p1025 A66-18170

Jet pump cavitation correlation by similarity parameter 07 p1025 A66-18171

Jet pump development and testing on Lear Jet Model 24 and Model 40, noting fuel pump system performance, requirements and configuration  
[SAE PAPER 660223] 13 p2002 A66-26398

High-lift jet-pump boundary layer control system for STOL short haul S-1600 transport 16 p2633 A66-31282

Variable fluid-transformer control of fluid flow in increasing efficiency of hydraulic control systems 19 p3281 A66-36671

**JET STREAM**

Quasi-Lagrangian study of inviscid barotropic fluid for analysis of certain ageostrophic jet flows 02 p0222 A66-11825

Vertical velocity fluctuations in nocturnal low level jet examined by sonic anemometers 04 p0541 A66-13666

Energy distribution near jet stream and associated wave amplitude relations 05 p0711 A66-14544

Annual variation of wind direction and jet stream across Greenwich meridian 07 p1063 A66-18337

Winter jet stream structure and turbulence over Australia 10 p1552 A66-21317

Observational study of cloud forms in vicinity of jet streams as viewed from ground and Tiros meteorological satellite 11 p1727 A66-22316

Reliability of locating jet streams by means of cloud patterns in Tiros pictures, determining most definitive characteristics of those patterns 13 p2121 A66-25813

Wind tunnel experiments on thin two-dimensional airfoil with sharp leading edge and with jet blowing through mid-chord slot on upper surface in order to control boundary layer and circulation around it 18 p3048 A66-33950

One-dimensional analysis used by Hope and Segars invalid for ejector with supersonic primary stream 18 p3100 A66-34604

Wall interaction digital stream amplifier with increased flow gain, impedance matching, outputs decoupled and noise reduction 19 p3283 A66-36812

Jet impact on plane surface at oblique angle, noting transformation from jet to thin sheet and role of stagnation pressure 20 p3546 A66-37805

Supersonic gas flow states in transition regime, discussing change from dynamical to molecular flow, velocity and pressure distribution and conditions for freezing of translational degrees of freedom 20 p3548 A66-38084

Clear air turbulence near jet stream, discussing velocity profiles and various meteorological parameters 22 p3902 A66-39677

High altitude turbulence in presence of strong jet stream or under influence of orographic systems 22 p3942 A66-39730

Stress, eddy viscosity and viscous dissipation estimations in jet stream obtained during Project TOPCAT in Australia, using aircraft soundings 24 p4234 A66-42984

**JET TRANSPORT**

SA BOEING 737 AIRCRAFT

Fail-operative stability augmentation system for C-141 jet transport aircraft yaw control axis, using triple redundant sensors and signaling 01 p0011 A66-10662

Slender wing research and short-range transport operation are among studies at Royal Aircraft Establishment 03 p0321 A66-12885

Takeoff and overshoot director system for jet transport aircraft 05 p0712 A66-14701

Short-range jet transport operating cost reduction through technical innovation, labor cost and research 06 p0804 A66-15992

Possible cost reduction with all-wing short-range aircraft, noting ogee design 06 p0804 A66-15993

Design trends in landing gear for medium- and short-range jet transports 07 p0987 A66-17286

VC10 C Mk I jet transport for troop transport, freighting, casualty evacuation and refueling 07 p0989 A66-18163

Passenger injuries due to decompression, impact and explosion from dynamite in rear lavatory of Boeing 707 at high altitude 09 p1336 A66-20522

V/STOL transport aircraft design and application, noting performance with varying number of propulsion units 10 p1482 A66-21369

Wind tunnel, simulator and flight test results to evaluate cockpit accelerations, handling qualities and stability and control of jet transports in severe turbulence  
[AIAA PAPER 65-330] 16 p2634 A66-31317

Operational cargo handling requirements to make economically feasible supersonic transport and giant subsonic jet 22 p3848 A66-40021

New jet transports, discussing subsonic, SST and stretched versions of subsonic transports 23 p4016 A66-41302

Promotion of aviation safety, discussing adoption of new accident statistics, elimination of catastrophes and STOL design extension to medium and long-range aircraft 23 p4152 A66-41305

**JET VANE**

S GUIDE VANE

**JETSTREAM AIRCRAFT**

S HANDLEY PAGE HP-137 AIRCRAFT

**JETTISON SYSTEM**

Frequency, dynamic response and jettison analyses for payload shrouds, with application to OAO 16 p2808 A66-30468

Environment simulation for space vehicle explosive separation system testing, noting equipment, performance, etc 16 p2679 A66-30470

**JOINT**

SA BONDING

SA FASTENER

SA LAP JOINT

SA METAL JOINT

SA RIVETED JOINT

SA SOLDERED JOINT

SA WELDED JOINT

Strength of adhesive joints showing ratio of normal and shear stress as important parameter, using crack propagation theory 01 p0152 A66-10380

Attachment and joining aspects in space age structures noting selection of materials  
[SAE PAPER 650788] 01 p0156 A66-10842

Double universal joints for transmission of mechanical power 04 p0526 A66-13800

Qualities required of materials for joint sealing, particularly elastomers, noting properties and possibilities 12 p1899 A66-23818

Approximation method for checking stability of compression members in rigid-joint space truss or stability against out-of-plane buckling of compression members in rigid-joint plane truss 19 p3475 A66-36489

Energy dissipation effect on panel vibration damping due to structural joints 21 p3827 A66-38693

Spacecraft joint design for fabric-type flexible structures with nonflexible structural components 22 p3926 A66-40281

Joint designs for reinforced plastic structures, emphasizing unidirectional mechanical properties 22 p3927 A66-40282

Joint strength analysis for brittle materials 22 p3927 A66-40283

Optimum seal and sealants for joints and connections in spacecraft 22 p3927 A66-40285

**JOINT /BIOL/**

S BONE

**JORDAN FORM**

Completely plastic torsion of cylindrical bar with simply connected cross sections examined, using ridge of Jordan domain analogy 09 p1466 A66-20130

Structure and representations of noncommutative Jordan algebras, using proof of analog of Jacobson coordinatization theorem 18 p3127 A66-34456

Construction of Cayley-Dickson type and involution type bimodules for composition algebras 22 p3939 A66-40002

**JOSEPHSON CURRENT**

Quantitative electrodynamic experiment on

Josephson oxide tunneling junction, verifying time dependence of Josephson equation 07 p1108 A66-18438

Tunnel junction RF modes driven by AC Josephson current 09 p1417 A66-20030

Persistent currents and flux quantization in superconducting rings interrupted by Josephson junction 09 p1417 A66-20031

Flux quantization, Josephson tunneling and persistent currents in superconductor studied by model of charged Bose gas at zero K 09 p1417 A66-20034

Dependence of step-like structure of volt-ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 09 p1428 A66-20593

Josephson effect in superconductors with paramagnetic impurities in absence of potential difference between superconductors 14 p2361 A66-27197

Josephson effect in superconducting bodies 14 p2370 A66-28355

Josephson type superconducting tunnel junction for generation of microwaves and submillimeter waves 15 p2461 A66-29012

Dependence of step-like structure of volt-ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 20 p3622 A66-38128

Spectral response curves of superconducting point contacts, noting existence of frequency dependent Josephson current amplitudes peaking in vicinity of energy gap 21 p3803 A66-39282

Kinetic tunneling theory in superconductors, clarifying conditions for onset of Josephson current 21 p3803 A66-39309

Tunnel current dependence on magnetic field for two superconductors with thin dielectric interface 21 p3804 A66-39314

Josephson effect in superconductors with paramagnetic impurities in absence of potential difference between superconductors 24 p4259 A66-43095

**JOULE HEATING**

Hydrodynamic acceleration of plasma in discharge tube into which energy is released in form of Joule heat 04 p0552 A66-14154

Heating of completely ionized quasi-neutral gas by Joule energy dissipation 04 p0556 A66-14420

Ionizing role of photon radiation in gas thermionic converter, noting experimental results and application to solar energy converters, tubular emitter converters, etc 09 p1405 A66-20923

Experiments on ion cyclotron heating of plasma generated by Joule heating in Heliotron-B 12 p1919 A66-23851

High magnetic field limit of shock wave in steady state model plasma moving along x axis studied transverse to magnetic field 18 p3148 A66-34905

Integral method derivation of thermoconductivity coefficient of cylindrical semiconductor immersed in liquid He and superheated by Joule heating 24 p4255 A66-42494

**JOURNAL BEARING**

Vibrational and stability behavior of unbalanced shaft running in cylindrical journal bearing, noting oil film elastic effects 01 p0151 A66-10285

Stability of symmetrical elastic rotor in journal bearings with flexible damped supports  
[ASME PAPER 65-APMW-8] 04 p0528 A66-14214

Exact thermoelastic solutions for clearance variation in short cylindrical dry journal bearings with unsymmetrical frictional heating  
[ASME PAPER 65-LUB-3] 04 p0527 A66-14239

Whirl instability and pneumatic hammer for rigid rotor in pressurized gas journal bearings  
[ASME PAPER 65-LUB-12] 04 p0527 A66-14245

Cylindrical squeeze-film gas journal bearing, noting load deflection experiments  
[ASME PAPER 65-LUB-13] 04 p0527 A66-14246

Reynolds equation for compressible and incompressible lubrication for load

- coefficients and attitude angles of axial groove cylindrical bearings  
[ASME PAPER 65-LUB-16] 04 p0528 A66-14248
- Prandtl mixing-length theory used to predict performance of journal bearings operating in turbulent regime  
[ASME PAPER 65-LUB-17] 04 p0528 A66-14249
- Self-excited torsional vibrations of power transmission drives under boundary lubrication, developing rotating shaft/bearing relations 05 p0772 A66-14643
- Load capacity and attitude angle of gas lubricated short journal bearing 06 p0885 A66-16224
- Dynamic stability conditions of self-acting gas lubricated journal bearings 07 p1039 A66-18231
- Continuous fluid film self-acting cylindrical journal bearing theory and design data, introducing isothermal bulk modulus into lubrication equations  
[ASME PREPRINT 65AM 3A2] 07 p1039 A66-18285
- Externally pressurized nonrotating porous wall air lubricated journal bearing properties, taking into account surface roughness effects  
[ASME PREPRINT 65AM 3A5] 07 p1039 A66-18286
- Mercury lubricated hybrid bearings for lubrication requirements of mercury Rankine Silent Compact Auxiliary Power (SCAP) system  
[ASME PREPRINT 65AM 3A3] 07 p1039 A66-18288
- Stability of symmetrical elastic rotor in journal bearings with flexible damped supports  
[ASME PAPER 65-APMW-8] 10 p1539 A66-21488
- Cylindrical squeeze-film gas journal bearing, noting load deflection experiments  
[ASME PAPER 65-LUB-13] 12 p1888 A66-24551
- Load capacity of condensing vapor-lubricated long self-acting journal bearing, examining two-phase and single-phase regions  
[ASME PAPER 65-LUBS-5] 12 p1888 A66-24554
- Test rig for gas-lubricated journal bearings measuring frictional torque, gas film pressure distribution, static and dynamic eccentricity changes, etc 12 p1859 A66-24929
- Designing hydrostatic journal-and thrust-gas bearings 13 p2085 A66-25365
- Externally pressurized gas journal bearings, evaluating various design parameters for operating at high temperatures and high speeds  
[ASME PAPER 66AM 4B2] 16 p2711 A66-30410
- Rotor-tilting pad gas lubricated journal bearing system performance determined by solving dynamic equations together with time-transient Reynolds equation  
[ASME PAPER 66-LUBS-3] 17 p2931 A66-33177
- Turbulent hydrodynamic lubrication theories and solution of Constantinescu equation for finite-length journal bearing  
[ASME PAPER 66-LUBS-11] 17 p2931 A66-33184
- Eigenvalues and eigenvectors obtained by numerical solution of special Hill equation in lubrication theory  
[ASME PAPER 66-LUBS-13] 17 p2932 A66-33185
- Prediction of hydrostatic gas journal bearing performance by solving simultaneous flow equations with Fortran II computer program  
[ASME PAPER 66-LUBS-16] 17 p2932 A66-33187
- Small parameter method to study steady state flow of viscous incompressible fluid in journal bearing 22 p3928 A66-40688
- P-4 JET FUEL
- Measurement of friction of materials sliding in JP-4 fluid to predict performance of hydraulic pump 06 p0884 A66-16136
- P-5 JET FUEL
- JP-5 fuel-air mixture ignition by platinum catalytic igniters, using ramjet engine baffle combustors 13 p2171 A66-25594
- JUMP
- Jump conditions at point of contact for corresponding cases of sliding and rolling contact in plane motion 21 p3769 A66-38476
- JUNCTION
- SA BARRIER LAYER
- SA N-P JUNCTION
- SA N-P-N JUNCTION
- SA NIP JUNCTION
- SA P-N JUNCTION
- SA P-N-P JUNCTION
- SA SILICON JUNCTION
- Wideband junction circulator design with maximum product of isolation and frequency bandwidth but maintaining minimum temperature and DC magnetic field variation 01 p0040 A66-10548
- Electron distribution disruption by electric current across n-n heterojunction resulting in heating and cooling of respective electron gases in each of semiconductors, noting electron scattering 07 p1104 A66-18362
- Quantitative electrodynamic experiment on Josephson oxide tunneling junction, verifying time dependence of Josephson equation 07 p1108 A66-18438
- Transport equation for germanium-gallium arsenide-iodine system and epitaxial vapor growth preparation of GaAs-Ge heterojunction by closed tube process 13 p2161 A66-25185
- Injection and extraction of hot electrons in n-n heterojunctions with rapid Maxwellization of electron gas, negative resistance and semiconductor characteristics 13 p2166 A66-25920
- Design of lossless junction, given one row in scattering matrix 14 p2268 A66-27965
- Flow graph analysis of lossless nonideal 3- and 4-port junction circulators for visualizing scattering matrices and calculating coefficients of combined networks 17 p2896 A66-33277
- Perturbation theorems for waveguide junctions expressing changes in impedance or admittance matrix elements 18 p3077 A66-34057
- Numerical solution of problems on discontinuity at junction between homogeneous and inhomogeneous waveguides 18 p3078 A66-34094
- Hybrid junction diplexer connecting transmitter and receiver to common antenna 22 p3873 A66-39784
- Effectiveness parameters of spherical shield electrode surrounding negative dielectric junction of insulator in high vacuum 23 p4042 A66-41040
- Alloyed semiconductor heterojunction metallurgy and physics, noting processes of interface alloying, solution growth and vapor transport-interface alloy 24 p4252 A66-42348
- JUNCTION DIODE
- P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 01 p0036 A66-10422
- Increased efficiency and power-handling capability of high order idlerless frequency multipliers by using hyperabrupt varactors 02 p0195 A66-11363
- Large signal transient response simulation of p-n junction diode using RC analog network 02 p0200 A66-11882
- Microwave power measuring device using p-n junction diodes and operating at 8, 4 and 2 mm 02 p0200 A66-11885
- Impurity-recombination emission in diodes of n-type Si single crystals alloyed with In 02 p0206 A66-12092
- Semiconductor diodes discussing germanium and silicon diode structures, ultrasonic chip bonding and epitaxial material effects on structures 03 p0348 A66-13344
- Temperature sensitivity of p-n junction volt-ampere characteristic may make such devices suitable for meteorological sensors 04 p0519 A66-13675
- Aircraft and commercial application of three-phase direct current resistance welding, using silicon diodes 05 p0685 A66-14518
- Rise of junction temperature during continuous operation of GaAs injection laser 05 p0692 A66-14771
- Operating principles of pulse and frequency modulation, using step-recovery diodes as circuit elements 05 p0651 A66-15835
- Transient process during instantaneous switching of semiconductor junction diode from forward to neutral direction 06 p0852 A66-16546
- Characteristics of spontaneous IR source for which external quantum efficiency of forward-biased GaAs p-n junction measures 40 percent at 20 degrees K 06 p0855 A66-16766
- Emitter degeneration effects in design of transistor amplifiers when it is desirable to predict and control amount of distortion produced by nonlinearity of transistor input characteristic 06 p0857 A66-16974
- Switching transients of semiconductor junction diodes with arbitrarily thick base 06 p0859 A66-17189
- Injection luminescence in InAs diodes 07 p1094 A66-17315
- Energy spectrum of recombination radiation from forward-biased heavily doped GaAs diodes at 4.2, 77 and 290 degrees K as function of current density 07 p1096 A66-17326
- Temperature dependence of loss and gain factor of GaAs diode and threshold current density of GaAs laser and junction luminescence of GaAs 07 p1042 A66-17332
- Uniaxial strain effects in /100/ junction orientation GaAs laser diodes, discussing photon polarization 07 p1042 A66-17335
- Stimulated emission in GaSb diodes made from crystals prepared by Czochralski method 07 p1096 A66-17336
- Amplification factors and optimum matching conditions calculated for complex capacitive diode frequency converters 07 p1005 A66-17347
- Effect of irradiation of silicon by fast neutrons on switching time of alloy diode synthesized on silicon base 07 p1099 A66-17929
- Current-voltage relationship of Au on GaAs Schottky barrier, examining introduction of single temperature independent parameter 07 p1106 A66-18399
- Neutron and electron irradiation damage in uniform silicon avalanche junction diode and effect on avalanche pulse rate 07 p1012 A66-18410
- Formed point contact gallium arsenide backward diodes compared with conventional millimeter-wave diodes show advantage as low level baseband current detectors 08 p1189 A66-18658
- Rectifying and ohmic contacts used in manufacture of gallium phosphide diodes that emit light when current is reversed 08 p1273 A66-19291
- Room temperature capacitance voltage characteristics and built-in diffusion voltages in n Ge-n Si double saturation heterojunction 09 p1411 A66-19912
- Gallium arsenide phosphide heterojunction diode used to triple from X band to Ka band 09 p1350 A66-19924
- Electrical contact for very small planar junctions and embodiment in millimeter-wave mixer diode 09 p1350 A66-19926
- Effect of thickness nonuniformity on capacitance of Al-Al<sub>2</sub>O<sub>3</sub>-Al tunnel junction structure compared with device with uniform thickness 09 p1426 A66-20198
- Dependence of step-like structure of volt-ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 09 p1428 A66-20593
- IR and sub-mm wave modulation using free carrier absorption in p-n junction, examining reverse and forward-biased configurations 09 p1432 A66-20972
- Directional radiation from incoherent electroluminescent diodes, noting increase in refractive index for dielectric slab model 10 p1509 A66-21581
- P-i-n diode modulators for K and Q frequency bands, extending operation from 18 to 40 gc 10 p1513 A66-21856
- Time dependence of multiplication and refinement in silicon technology needed to establish uniform multiplication for Read diode prototype 10 p1515 A66-22089
- Silicon diode microwave oscillators and amplifiers, noting application of avalanche transit time for increased efficiency of p-n

junctions 10 p1515 A66-22090  
 Indium arsenide diodes for thermophotovoltaic conversion at 1000 K 11 p1639 A66-22248  
 Schottky diode and metal-base transistor design and operation with metal-semiconductor contact 11 p1660 A66-22271  
 P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic to electrical oscillations 11 p1664 A66-22608  
 Cadmium sulfide space charge limited diodes, noting current voltage characteristics and field and electron density distributions 11 p1668 A66-23026  
 Scanning electron microscope observation of electrical leakage paths due to crystal defects in silicon diodes 11 p1668 A66-23028  
 Sinusoidal voltage converted to rectangular voltage, using charge storage diodes 11 p1668 A66-23064  
 Semiconductor diode mixer relatively free of modulation distortion and cross modulation 11 p1669 A66-23066  
 Volt-ampere characteristics of short semiconductor diode at high injection levels 11 p1757 A66-23229  
 Parameter dependence of intermediate frequency voltage indicated during establishment of optimum conditions for optical receivers and merit of subcarrier mixing 12 p1832 A66-23960  
 Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 12 p1929 A66-24456  
 Reverse current across collector-base junction in transistor 12 p1844 A66-24822  
 Quantitative observation of light modulation by electro-optic effect in reverse-biased GaAs p-n junctions at wavelength of 1.15 microns 13 p2159 A66-25067  
 Hot-carrier diode characteristics and application to HF and microwave devices such as mixers and detectors 13 p2031 A66-25359  
 Optically coupled linear circuit techniques, discussing GaAs p-n junction diode, noncoherent light emitters and silicon p-n junction photosensors 13 p2036 A66-25521  
 Voltage buildup on p-n junction and base of semiconductor diode during jump in forward current 13 p2041 A66-25943  
 Voltage dependence of barrier height in Al-AlN-Mg tunnel junction 13 p2170 A66-26596  
 Radiation effects on silicon p-n junction diode solar cell and use of transparent radiation shield 14 p2225 A66-27107  
 Green emission lines from solution-grown p-n junctions in GaP diodes doped with shallow donors and acceptors 14 p2251 A66-27231  
 Formula derivation for dynistor delay time and switching-on time on basis of system of charge equations 14 p2254 A66-27741  
 Long diode theory not limited by conditions of quasi-neutrality, noting V-I characteristics 14 p2254 A66-27744  
 Exact circuit analysis of abrupt-junction varactor diode frequency doubler 14 p2268 A66-27957  
 Conventional point-contact diodes and junction diodes with point-contact geometry, examining fabrication techniques and millimeter wave application 15 p2461 A66-29013  
 Bandwidth of nonoverdriven abrupt-junction varactor-frequency doubler, deriving upper bounds for minimum constant T for lossless case 15 p2465 A66-29323  
 Stable microwave oscillations in single crystal Ge alloy p-n junction diodes 15 p2567 A66-29402  
 Reverse recovery phenomena in silicon alloyed p-n junction 15 p2467 A66-29710  
 Minimum spectral line width, threshold current density, radiation-peak displacement and possible recombination mechanism for GaSb laser diode p-n junctions in coherent radiation 16 p2721 A66-31764  
 Origin of polarization of radiation from GaAs diodes, noting intensity dependence on current density and effect of anisotropic electron velocity

distribution 16 p2667 A66-31770  
 Varactor frequency doubler response to amplitude and phase modulated signals 17 p2878 A66-31811  
 Silicon microwave p-n diode design and use as variable resistance 17 p2891 A66-32909  
 Signal analysis of abrupt and graded junction varactor harmonic generators with idlers, showing how load and source resistances may be optimized 17 p2893 A66-32922  
 Iterative solution of large signal abrupt junction varactor doubler as input frequency is varied, given power of source and load impedance 17 p2895 A66-33276  
 Strong injection in nondegenerated p-n junction producing electron-hole plasma in n region near junction 17 p2986 A66-33307  
 Photocurrent and leakage current in zinc diffused GaAs junction diodes in terms of channel effect 17 p2987 A66-33319  
 Microplasma internal parameter measurement including switch-on voltage, switch-off voltage, plasma resistance, parallel capacity and internal series resistance 17 p2896 A66-33320  
 One-dimensional diode model with high resistivity n region and built-in electrical field 18 p3088 A66-35038  
 Energy band structure, carrier behavior and characteristic curve of p-n junction diode at high-current level, solving transport and Poisson equations 19 p3312 A66-35346  
 Switching transients of semiconductor junction diodes with arbitrarily thick base 19 p3314 A66-35547  
 Gallium arsenide lasers operating at room temperature investigated, based on diffusion p-n junctions, discussing emission spectrum 19 p3375 A66-36070  
 Low-distortion modulation of IR and submillimeter waves, using free-carrier absorption in pair of crossed reverse-biased junction diodes 20 p3528 A66-37452  
 Avalanche transistor generation of jitter-free nanosecond current pulses for driving GaAs laser diodes at low temperatures 20 p3528 A66-37453  
 Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 20 p3619 A66-37688  
 Signal analysis of abrupt and graded junction varactor harmonic generators with idlers, showing how load and source resistances may be optimized 20 p3531 A66-37831  
 Dependence of step-like structure of volt-ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 20 p3622 A66-38126  
 RC network model applied to study of transient response of semiconductor diode, obtaining accuracy estimates for finite-difference representation of one-dimensional diffusion equation 21 p3713 A66-39298  
 Avalanche breakdown voltage of quasi-planar /circular cylindrical/ silicon junction and relation to increased electric field intensity in curved portion 22 p3959 A66-39741  
 Far-field light emission mode pattern of GaAs diode injection lasers, dielectric gradient in inversion layer and refractive index in junction 22 p3930 A66-39743  
 Gold doping effects on recovery time of phosphorus, boron and arsenic impurity gaseous-diffused junction diodes and estimated gold recombination center densities 22 p3873 A66-39749  
 Four-layer p-n-p-n diodes having two separate capacitance modes enables use as controlled element in frequency keying circuits 22 p3875 A66-40074  
 Injection luminescence in forward-biased CdTe p-n junction diode 23 p4112 A66-41298  
 Capture effect on I-V characteristics of junction diodes and injection coefficients in forbidden transition zone 23 p4045 A66-41444  
 I-V characteristics of junction diode with antibarrier layer and oxide film pressed on rear contact 23 p4045 A66-41445  
 Unidirectional semiconductor-diode parametric amplifier and mixer, emphasizing power transfer and low noise characteristics 23 p4048 A66-41856

Avalanche radiation from bulk of long thin forward-biased p-n-p silicon diodes 24 p4180 A66-42258  
 Injection electroluminescence in AlAs-GaAs as p-n junction diodes of graded energy gap 24 p4251 A66-42300  
 Multiple energy bands effects on stress dependence of breakdown and order of magnitude in breakdown voltage of Ge and Si junction diodes 24 p4251 A66-42306  
 Transistor theory approximation of DC and small signal I-V characteristics of p-n-p-n junction diodes and triodes 24 p4184 A66-42744

**JUNCTION TRANSISTOR**  
 General progress of semiconductor junction and ruby lasers, especially in experimental field 02 p0238 A66-11370  
 Collector-to-base junction breakdown occurring in planar transistors over whole surface due to emitter presence 02 p0205 A66-12002  
 Synthesis of equivalent circuits consisting of lumped elements for active region of distributed model of junction transistor 03 p0346 A66-13321  
 Increase in collector voltage at constant power dissipation will increase junction temperature and give apparent effect of higher thermal resistance 04 p0500 A66-14102  
 Electrical and radiation storage time in transistors with respect to majority carrier storage in base, calculating photocurrent 05 p0735 A66-14855  
 Punch-through avalanche phenomena, describing fast rise pulse production in junction transistors of variable base width 05 p0651 A66-15840  
 Characteristics of electrochemical cells in which concentration of ionic species in chamber can be varied via applied electrical signal as analog of junction transistor 06 p0852 A66-16637  
 Distributed model of junction transistor and application in prediction of emitter-base diode characteristic, base impedance and pulse response of device 06 p0855 A66-16785  
 Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 06 p0860 A66-17196  
 Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 06 p0860 A66-17197  
 Heterojunction preparation by vacuum evaporation, describing epitaxial deposition of germanium on gallium arsenide substrate 08 p1270 A66-19058  
 Unifron, junction-type unipolar field transistor, design, operation, parameter, production technology and uses in electronic circuitry 08 p1193 A66-19277  
 Small signal properties of field effect devices, junction and MOS 08 p1195 A66-19356  
 Switching waveform prediction of simple transistor inverter circuit from charge control equations 08 p1195 A66-19358  
 Light activated low level switch consisting of electroluminescent GaAs p-n diode and double emitter silicon transistor 08 p1195 A66-19359  
 Analog multiplier-divider based on properties of saturated transistors 08 p1198 A66-19735  
 Tunnel junction RF modes driven by AC Josephson current 09 p1417 A66-20030  
 Electrical properties, solubility and diffusion characteristics of gold in silicon, noting discrepancy between theoretical calculations and experimental measurements 09 p1432 A66-20975  
 Nonresonant solid state magnetic, semiconductor and dielectric devices, noting operation characteristics, control parameters, etc 10 p1509 A66-21418  
 Field effect transistor input capacitance in pinch-off region derived by using two parallel coupled condensers as equivalent 10 p1510 A66-21657  
 Impurity atom diffusion through narrow diffusion mask opening determined by relaxation method 10 p1512 A66-21762  
 Dynamic transient thermal response and voltage feedback in junction transistors 10 p1512 A66-21764  
 Polarity and harmonics of nonlinear

distortion sources in common emitter transistor amplifiers operated in normal domain 11 p1661 A66-22391

Dependence of recombination-generation current and injection coefficient of p-n junction on forward bias 11 p1666 A66-22730

Minority carrier flow in base region of Graded Band Gap Base /GBGB/ transistor, determining effect of injected current level upon carrier transit time 11 p1668 A66-23024

Mathematical approximation for alpha of drift transistors derived in terms of equivalent dominant pole and excess phase 11 p1671 A66-23245

Component reliability, especially in transistors, noting techniques, design, tests and mounting as monolithic circuits 12 p1833 A66-24082

Existence of limitation on properties and diffusion mode in junction and insulated gate field effect transistors 12 p1837 A66-24306

Noise figure of microwave transistors, noting effect of parasitics associated with wafer and package 13 p2038 A66-25562

Normalized low-level characteristics of saturated transistor 14 p2247 A66-27043

Junction field effect transistor used for switching 14 p2252 A66-27459

Synthesis of equivalent circuits consisting of lumped elements for active region of distributed model of junction transistor 14 p2260 A66-28295

Thermal noise of input conductance and gate-drain conductance in junction-gate FET 15 p2458 A66-28892

Unijunction transistor parameter and design charts 17 p2888 A66-32780

Secondary breakdown in transistors, noting effect of irregularities in collector base junction and tunneling sites 17 p2894 A66-33108

Direct current volt-ampere characteristics of junction gate germanium alloy FET, including field-dependent mobility effect and channel-height distribution 17 p2897 A66-33463

DC theory of unijunction transistor, calculating idealized one-dimensional model, neglecting diffusion currents but taking into account bulk recombination effects 18 p3076 A66-33934

Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 19 p3315 A66-35554

Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 19 p3315 A66-35555

Differential low level junction field effect transistor commutators performance and characteristics for design considerations 19 p3317 A66-35702

Varactor characteristics, applications, equivalent circuits, measurement problems, etc 19 p3319 A66-36165

Frequency variations of pi-equivalent circuit parameters of junction transistor, noting expansion of hyperbolic function into Taylor series 22 p3873 A66-39815

Monograph on electronic theory of heavily doped semiconductors covering energy spectrum, perturbation theory, absorption of electromagnetic waves, density states, etc 23 p4109 A66-41119

Heterojunction formation between substrate and compound semiconductor synthesized by substitution reaction during alloying process 23 p4113 A66-41300

Dependence of recombination-generation current and injection coefficient of p-n junction on forward bias 23 p4045 A66-41468

HF transistor stability in common emitter configuration, examining performance of input admittance in circuit design and analysis 24 p4181 A66-42377

Charge transport through hemispherical metal contacts on semiconductors, calculating V-I characteristics and injection ratios 24 p4254 A66-42388

Small signal forward and reverse transfer parameters derived for metal oxide semiconductor and junction-gate field effect transistors from simple unified charge-control analysis 24 p4185 A66-43030

JUPITER /PLANET/

Jupiter radio emission, with plasma waves in planet ionosphere as source of radiation 01 p0131 A66-10273

Spectral index of radiation from Jupiter between 178 and 810 02 p0282 A66-11502

Visual data of sudden changes in motion of Jupiter Great Red Spot during 1962 02 p0292 A66-12191

Spectral data of Galilean satellites of Jupiter 03 p0427 A66-12919

Simultaneous passage of shadows of two Jupiter satellites across planet disk, including tabulation of dates and times of phenomenon 05 p0758 A66-14731

Concepts concerning Jupiter surface revised following transformations observed since 1962 and estimation of ash particles in planet atmosphere 05 p0759 A66-14880

Jupiter emission data re-analyzed, supporting Bigg finding of control by satellite X 05 p0760 A66-14946

Decameter emission from Jupiter, discussing polarization characteristics such as direction, magnitude, measurement techniques and data 05 p0762 A66-15280

Geometrical UV reflectivity of Jupiter in terms of Rayleigh scattering determined from objective-grating rocket spectrometer 05 p0762 A66-15281

Radiation from Jupiter magnetospheric tail contributes to decametric noise 07 p1133 A66-17467

Effects of commensurability with mean motion of Jupiter upon distribution of mean motions of short-periodic comets 07 p1135 A66-17640

Two-element interferometer to investigate Jupiter declimeter circularly polarized radiation 08 p1288 A66-18789

Jovian phase variations and limb-darkening of surface detail examined by scanning isodensitometer 08 p1293 A66-19266

IR spectrophotometry of Moon and Galilean satellites of Jupiter, noting surface properties, thermal radiation and albedo increase with wavelength variation 08 p1298 A66-19458

Decametric radiation of Jupiter, discussing environment of planet and properties of magnetosphere 09 p1449 A66-20102

Decametric radiation of Jupiter, discussing effect of Io satellite and asymmetrical stop zones 09 p1449 A66-20103

Frequency and polarization structure of Jupiter decametric emission on 10-msec scale 09 p1450 A66-20104

Jupiter microwave emission, noting brightness distribution, Van Allen belt flux density and polarization 09 p1450 A66-20105

Interferometric examination of Jupiter declimeter radio emission, noting equipment, polarization characteristics and distribution of nonthermal emission 09 p1450 A66-20106

Relation of Jupiter declimeter radiation intensity and polarization to distribution of synchrotron radiating electrons in Van Allen belt 09 p1450 A66-20107

Simultaneous observations of Jupiter on three frequencies, noting phase consistency of flux variations, Faraday rotation and flux density 09 p1450 A66-20108

High-resolution spectra of decametric radio bursts from Jupiter 09 p1457 A66-20470

Jupiter in 1964/65 photographic observation 11 p1771 A66-22648

Postdetector correlation interferometry of size of noise burst at decameter wavelengths from Jupiter 13 p2182 A66-25552

IR reflection spectrum of Jupiter from second flight of Stratoscope II, discussing deep absorption features 13 p2184 A66-25619

Short-period Trojan orbits in restricted three-body problem numerically determined, using Jupiter and Sun as principal masses 13 p2185 A66-25807

Spectral data of Galilean satellites of Jupiter 14 p2380 A66-27268

Conceptual unmanned spacecraft designs for Jupiter exploration including flyby and orbiter missions 14 p2394 A66-28176

[AIAA PAPER 65-388] 14 p2394 A66-28176

Relation between RF of Jovian decametric emission bursts and modulation by Io searching for modulation by three outer Galilean satellites 15 p2597 A66-29232

Measurements of location of centroid of

Jovian radio emission relative to nearby radio source 15 p2597 A66-29259

Jupiter decametric radio emission spectrum noting power at various frequencies, mean flux density, magnetic pole locations, etc 16 p2801 A66-30922

Jupiter planetary surface observations show slow evolution of atmospheric phenomena 16 p2804 A66-31310

Jupiter Red Spot coordinate measurement from recent plates 17 p3006 A66-33011

Radio noise bursts from Jupiter at decameter wavelengths noting Cerenkov emission, Doppler-shifter cyclotron emission and escaped-whistler models 18 p3225 A66-33550

Nonsolar absorption lines in spectra of inner three Galilean satellites of Jupiter 18 p3230 A66-34155

Thermal contrast of satellite eclipse shadows and band structure during 1965 apparition of Jupiter 18 p3230 A66-34156

IR spectrophotometry of Moon and Galilean satellites of Jupiter, noting surface properties, thermal radiation and albedo increase with wavelength variation 18 p3232 A66-34487

Angular sizes of sources of Jovian radio bursts measured by using interferometers suggest they are produced by diffraction or focusing process in interplanetary space 18 p3237 A66-35083

Growth rate of forward-subliminuous-mode electromagnetic wave excited in helical stream-plasma used to calculate Jupiter decametric emission 19 p3463 A66-35924

Magnetic fields and trapped radiation intensities of other planets in solar system, particularly Jupiter 20 p3639 A66-38316

Faraday rotation measurements of decameter wavelength radiation from Jupiter, calculating ionospheric electron content 22 p3977 A66-39987

Millisecond radio pulses from Jupiter 22 p3980 A66-40400

Jovian radio bursts containing millisecond pulses, noting effect of Io position on probability of decametric emission 22 p3982 A66-40521

Polarization, periodicity and angular diameter of radiation from Jupiter at 610 mc/s 23 p4125 A66-41064

Hot shadows cast on Jupiter by satellites explained in terms of freezing of supercooled ammonia 23 p4128 A66-41308

Periodicities in Jupiter decametric radiation and methods of assessing statistical and physical significances, noting natural satellites effects 23 p4129 A66-41684

Jupiter radiation recorded almost every night with antenna arrays shows emission dependency on Jupiter longitude and Io position 23 p4131 A66-41817

Radio emission from Venus, Jupiter, Pluto and other planets at 1.9 cm analyzed, using radio telescope, noting effective temperatures 23 p4131 A66-41818

Asteroid belt flyby spacecraft concepts based on Atlas family with potential growth for Jupiter flyby 24 p4278 A66-42691

**JUPITER ATMOSPHERE**

Jupiter photoelectric spectral scan in UV reproduced as geometric reflectivity vs wavelength, using Aerobee rocket 02 p0286 A66-11359

Discrepancy between derived temperature for cloud tops of Jupiter and Saturn and expected value for model in simple equilibrium with solar radiation attributed to presence of ammonia 04 p0579 A66-14180

Optical thickness of Jupiter isothermal atmosphere assuming it consists of hydrogen, methane and ammonia 05 p0759 A66-14879

Separation between fluid phases in multicomponent atmosphere as possible explanation of Jupiter great red spot 08 p1298 A66-19592

Jupiter photoelectric spectral scan in UV reproduced as geometric reflectivity vs wavelength, using Aerobee rocket 10 p1603 A66-21099

Image converter tube spectrophotometry of zonal variation of methane absorption bands on Jovian disk in near IR region 12 p1944 A66-23504

Jovian rotational effects on magnetospheric

- model and conditions of fluting and two-stream instability 15 p2602 A66-29952  
 Rapid drift in longitude of small dark spot on south edge of Jupiter North Temperate Belt, noting sinusoidal displacement characteristics and measurement with blue and UV photography 17 p3005 A66-33009  
 Experimental analysis of Taylor columns likely to bear on processes occurring in Jupiter atmosphere 17 p3006 A66-33013  
 Image converter tube spectrophotometry of zonal variation of methane absorption bands on Jovian disk in near IR region 20 p3646 A66-37017  
 Spectral study of Jupiter, Saturn and rings of Saturn, determining methane concentration in cloud layers 20 p3647 A66-37035  
 Planetary scale atmospheric circulations of Jupiter and Saturn using fluid dynamics, noting rotation effects 23 p4129 A66-41679
- JUPITER PROJECT**  
 Reliability design requirements for Data Transmission System for Jupiter Precursor Spacecraft 20 p3513 A66-37208

## K

## K-BAND

- K absorption spectra of germanium and selenium in germanium selenide based on band theory of solids by assuming electrons transfer, using X-ray spectroscopy 11 p1758 A66-23368  
 K emission band of graphite examined, using grazing incidence spectrometer and Gaussian window function 12 p1931 A66-24802  
 K beta 5 emission band and fundamental K-edge absorption of vanadium analyzed and results compared with vanadium spectra from other series 12 p1898 A66-25024  
 Emission and absorption bands in K spectral region of titanium, using single setup 14 p2314 A66-27371  
 K-band Fabry-Perot resonator using plane and concave mirrors, determining overvoltage factors in interferometer, noting diffraction losses 16 p2707 A66-31207

## K-MESON

## S KAON

## KALMAN-SCHMIDT FILTER

- Self-contained orbital navigation system using Earth-horizon measurements in 14-16  $\mu$  carbon dioxide absorption band, using Kalman linear filter theory 01 p0100 A66-10024  
 Kalman filter divergence control, noting analytical and empirical modification methods 21 p3766 A66-38883  
 Apollo inertial navigation system estimation, using statistical filtering to reduce computation 21 p3767 A66-38886  
 Integrated navigation system /INS/ using stellar inertial subsystem with optimum data processing 21 p3767 A66-38891

## KAMACITE

- Concentration gradients in meteoritic kamacite predicted from Fe-Ni phase diagram and diffusion 06 p0955 A66-16787  
 Widmanstätten patterns for electrolytic dissolution of iron meteorites and separation of nonmetallic portions, particularly kamacite 21 p3816 A66-39493

## KAMAN MILITARY HELICOPTER

## S UH-2 HELICOPTER

## KAON

- Normal scalar nonet, K1 meson-2 pion decay, K1-K2 mass difference and S-wave pion scattering 15 p2544 A66-28946  
 Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio 15 p2587 A66-29573

## KAON PRODUCTION

- Kaon decay contribution to sea level muon flux at large zenith angles, using Ashton and Wolfendale procedure 15 p2588 A66-29579

## KARHUNEN-LOEVE EXPANSION

- Spaceflight data handling with emphasis on data compaction techniques based on weighted-information theory, Karhunen-Loeve theory, area recording and

- transmission procedure 08 p1187 A66-19536
- KARMAN-BODEWADT FLOW**  
 Coupled flow problem, comparing flow induced by steady rotation of permeable and impermeable disks 06 p0871 A66-16353
- KARMAN VORTEX STREET**  
 Karman vortex street pattern of mesoscale eddies in wake of islands [AIAA PAPER 65-16] 02 p0221 A66-11548  
 Turbulence wake suppression in Karman vortex street of circular cylinders by controlling transverse oscillations of vortex generating cylinder in transition range 04 p0453 A66-13514  
 Mesoscale eddies in wake of islands describing properties, characteristic parameters via Karman vortex street pattern, drag theory and empirical observation 07 p1061 A66-17365
- KAWASAKI KH-4 HELICOPTER**  
 Flight test determination of parasite drag area and required power of Kawasaki Bell KH-4 single-rotor helicopter 07 p0988 A66-17525
- KEPLER LAW**  
 Orbits of artificial satellites for suitable variables, noting oblate shape of Earth and air resistance 02 p0285 A66-11256  
 Kepler method in determining length of satellite radius vector independent of linear measurements from Earth, discussing accuracy in geodetic measurement 03 p0366 A66-13197  
 Optimum transfer between Kepler ellipses, noting Hohmann orbital transfer method and geodesics and metric tensors in phase space 04 p0579 A66-14459  
 Approximate value of mass of Moon calculated, using noncalculus derivation of Newton modification of Kepler third law 08 p1296 A66-19380  
 Solution of Kepler equation by stepwise approximation, discussing elliptical orbit, parabolic ellipse and hyperbolic orbit 12 p1950 A66-24398  
 Book on satellite orbital flight trajectory theory and celestial mechanics 15 p2595 A66-29128  
 Simplified method for derivation of universal gravitation law from Kepler law of planetary orbits 16 p2747 A66-30870  
 Integrating error equations of inertial navigation system for objects in Keplerian motion 16 p2744 A66-31507  
 Radius of convergence of power series obtained by inversion of universal Kepler equation 17 p3001 A66-32347  
 Iterative determination of space flight trajectory and velocity represented as sum of Kepler motions about celestial bodies 18 p3234 A66-34635  
 Elliptic restricted problem of three bodies, discussing analytical determination of characteristic exponent to equilibrium solutions [AIAA PAPER 65-685] 19 p3461 A66-35892
- KERNEL FUNCTION**  
 Nonlinear viscoelastic incompressible materials under small finite deformation for short time ranges, noting kernel functions for tensor tests [ASME PAPER 65-APMW-31] 04 p0593 A66-14231  
 Poisson pseudokernel and pseudodifferential operators on manifold with boundary 05 p0708 A66-15093  
 Classes of uniqueness for solutions of Cauchy problem and representation of positively defined kernels 07 p1056 A66-17598  
 Improved numerical procedure for harmonically deforming lifting surfaces from supersonic kernel function method [AIAA PAPER 66-78] 08 p1163 A66-18995  
 Kernel function procedure for solving oscillatory lifting surface problem at subsonic speeds, using least squares method 08 p1165 A66-19149  
 Proof, by degenerate kernel method of existence and uniqueness of solution for one class of nonlinear integral equations 09 p1394 A66-20455  
 Nonlinear system analysis by Volterra-Wiener functionals, considering convergence and kernels 09 p1363 A66-20797  
 Resolvent kernel for class of integral operators with difference kernels on finite interval for transport processes 10 p1549 A66-21301

- Nonlinear filters, including system analysis optimization, realization via Volterra functionals, etc 11 p1675 A66-22630  
 Construction of rational second order kernels with aid of rational functions of order  $n$ , applying result to theory of approximation of functions 12 p1902 A66-23765  
 Plane stationary problem of heat conduction for mixed boundary conditions solved, using Fredholm integral equation with symmetrical kernel 12 p1979 A66-24372  
 Dynamic optimization and minimizing kernel function for dual control problem 13 p2117 A66-25348  
 Generalized heat equation solution expansion in terms of radial heat polynomials, Appel transforms and Laguerre polynomials 13 p2118 A66-25793  
 Circular kernels and circular transformations in analysis of infinite sequences 14 p2322 A66-27627  
 Noether theorems applied to degenerate cases of improper integral equations with Cauchy kernels 16 p2733 A66-30745  
 General theory of linear integral equations with power kernel 16 p2734 A66-30746  
 Asymptotic behavior of nonlinear integral equations with certain conditions on kernel and nonlinearities 16 p2738 A66-31705  
 Two Fredholm integral equations encountered in elasticity theory solved by Wiener-Hopf method 17 p2947 A66-32783  
 Nonlinear viscoelastic incompressible materials under small finite deformation for short time ranges, noting kernel functions for tensor tests [ASME PAPER 65-APMW-31] 18 p3248 A66-33577  
 Estimation of Poisson kernels of elliptic operator with variable coefficients by using maximum principle and Fatou theorem 19 p3390 A66-36248  
 Integration technique for determining unsteady aerodynamic forces at subsonic speeds, noting role of kernel of integral equation 20 p3491 A66-36955  
 Numerical extrapolation solution of kernel-characterized integral equations for apparent emissivity of conical and cylindrical cavities 20 p3681 A66-38298  
 Subsonic aerodynamic loading on harmonically oscillating nonplanar lifting surfaces in kernel-function formulation 21 p3694 A66-38733  
 Spline theory methods of interpolating linear functional containing Peano kernel 21 p3757 A66-39257
- KEROSENE**  
 Thermal stability aspects of commercial kerosene for supersonic transport [AIAA PAPER 66-670] 18 p3162 A66-34442
- KERR CELL**  
 Optically biased pulsed transmission mode operation of Q-switched laser, in connection with Kerr cells inhibiting lasing action 09 p1386 A66-19937  
 Kerr cell as shutters and laser modulators in high speed photography 10 p1537 A66-21869  
 Segmented-rod ruby laser structure operated as giant pulse laser, using Kerr cell to provide Q-switching, noting number of oscillating modes 13 p2088 A66-25038  
 High speed stroboscopic photography using Kerr cell modulated laser source 16 p2705 A66-30828  
 High power nonspiking operation of ruby laser for continuous output on microscopic and macroscopic scale 20 p3581 A66-38242  
 Multipurpose ultrahigh speed camera system, noting use as monosecond Kerr cell, image converter and giant laser pulse generator 23 p4071 A66-41675  
 Carbon disulfide traveling wave Kerr cells with identical microwave and dielectric constants, noting light modulator construction at microwave frequencies 24 p4185 A66-42814
- KERR EFFECT**  
 Free-carrier magneto-Kerr effect analysis considering amplitude ratio of two polarized components of reflected wave and phase difference between these two components 03 p0412 A66-13151  
 Kerr effect measurement of coercive force, nucleation field and saturation field for thin films 11 p1754 A66-22814

- Magneto-optical study of critical curves of thin films by observing domain structures during magnetization process 11 p1755 A66-22820
- Self-focusing of light from Kerr effect and changes in density of matter 13 p2127 A66-25109
- Domain wall mobility effect on multilayer magnetic thin films consisting of permalloy layers separated by silicon oxide 14 p2351 A66-26888
- Magneto-Kerr effect at surface of laboratory plasma 15 p2556 A66-29811
- Self-focusing of light from Kerr effect and changes in density of matter 16 p2745 A66-30288
- Pulse switching of permalloy films by use of interrupted pulses and Kerr magneto-optical effect 16 p2773 A66-30683
- Amplitude and phase of complex Kerr magneto-optic coefficients measured, describing technique and results 17 p2958 A66-32623
- Linear instability of laser propagation in fluid with coupling between light and medium 18 p3120 A66-35034
- Laser light modulation by Pockels or Kerr effect for application to telecommunications system, examining electrical birefringence modulation 19 p3304 A66-36262
- Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274
- Spin wave excitation by ferromagnetic resonance, measuring coercive field as function of temperature by Kerr effect method and determining magnetic properties of thin films 20 p3621 A66-38085
- Optical deflection of light beams via Kerr effect, ultrasonic waves, piezoelectric crystals and mirror galvanometer 22 p3877 A66-40293
- Electro-optic light modulation using Pockel and Kerr effects in crystals for communications applications, using lasers 24 p4225 A66-42811
- ESTREL AIRCRAFT**
- S HAWKER P 1127 AIRCRAFT**
- ETONE**
- Thermal decomposition of tert.-butyl hydroperoxide with oxygen and acetone addition studied by isotopic tracer 13 p2017 A66-26305
- Sensitization of polyvinyl cinnamate, using Michler ketone 14 p2290 A66-27016
- Tandem column gas-liquid chromatography labeling technique for mass spectrometry, noting ketones exchange and data on deuterium and oxygen compounds 15 p2446 A66-28872
- KEYING**
- S FREQUENCY-SHIFT KEYING**
- S PHASE-SHIFT KEYING**
- KH-4 HELICOPTER**
- S KAWASAKI KH-4 HELICOPTER**
- KIDNEY**
- S RENAL FUNCTION**
- S URINE**
- KINEMATIC EQUATION**
- Kinematic and physical relations for small motion superposed on initial motion defined in fixed reference frame 01 p0106 A66-10735
- Force and moment response of pneumatic tires undergoing nonstationary lateral motions, using motion equations [ASME PAPER 65-AV-2] 11 p1636 A66-22471
- Error determination in autonomous determination of coordinates, obtaining solution for kinematic equations of navigation in near-polar region 16 p2744 A66-31146
- Laminar boundary layer in incompressible liquid, noting effect of variation of kinematic viscosity and density on stability 23 p4056 A66-41725
- KINEMATICS**
- SA BODY KINEMATICS**
- SA MICROWAVE REFLECTOMETRY**
- Kinematic systems and reduction gears used in turboprop engines, outlining design features 01 p0079 A66-11060
- Statics and kinematics of rigid bodies in structural mechanics, establishing isostatic support conditions 03 p0436 A66-12733
- Book on MHD including kinematic aspect, magnetic force effects, boundary conditions, MGD, etc 04 p0556 A66-14384
- Kinematic computer calculations of energy distribution among products of repulsive, mixed and attractive energy release exothermic reactions 11 p1787 A66-23213
- Small motion superposed on stationary slow deformation process of viscoelastic material with fading memory, based on Rivlin and Ericksen differential equation 14 p2397 A66-27384
- Similarity method for accelerations and velocities 17 p2960 A66-33424
- Mayor-Mises method for solution of kinematic and kinetostatic problems of three-dimensional mechanisms [ASME PAPER 66-MD-2] 21 p3741 A66-38475
- Continuous media model theory and comparison with theory of many-dimensional non-Euclidean manifolds, noting kinematic characteristics of particle deformation, variational principles, thermodynamic equation, etc 21 p3756 A66-38627
- Graph theory and enumeration of basic kinematic chains and mechanisms 23 p4097 A66-41978
- KINETIC ENERGY**
- SA FROUDE NUMBER**
- Tapered circuit TW amplifier experiments considering circuit phase velocity tapering effects on small signal gain, bandwidth, dynamic power limiting, etc 01 p0036 A66-10394
- Stationary and kinetic methods determining parameters of sensitizing recombination r-center in high resistivity monolayer photoconductors 02 p0273 A66-11718
- Steady flow possessing extremal kinetic energy compared to equivortex flow for stability analysis 02 p0219 A66-12169
- Modifications of impulse approximation allowing for motion of bound electrons, providing simple analytic expressions for atomic ionization and detachment cross sections 03 p0394 A66-12328
- Kinetic energy in unstable and weakly stable plasma noting optical and acoustical modes in electron-ion system, Vlasov term in quasi-linear theory and two-particle correlation term 04 p0550 A66-13406
- Energy conversion from available potential to kinetic broken into spectral components permitting analysis in vicinity of extratropical cyclone 04 p0541 A66-13665
- Magnetic resonance applied to semiconductors, determining electron density at nucleus sites and kinetic energy temperature of hot electrons in indium antimonide 04 p0563 A66-14030
- Input initiation energy and potential impact energies available under processing conditions, interpreting test data 05 p0787 A66-15138
- Atmospheric energetics during January-February 1963 stratospheric warming investigated, using spectral energy equations for zonal and eddy kinetic and potential energies 07 p1027 A66-17360
- Identification of charged fast particles in nuclear emulsions, measuring multiple scattering of protons and mesons along track with various kinetic energies 07 p1114 A66-17543
- Kinetic energy variations in different parts of baric centers during atmospheric motion 08 p1217 A66-19301
- Unbounded isothermal atmosphere response to time harmonic point disturbances, exact solutions obtained for frequency ranges of acoustic waves, trapped oscillations and gravity 13 p2183 A66-25613
- Amplification of interaction of atoms and of pulsed or periodic cooling of transparent media produced by laser beam, noting changes in kinetic energy of atoms 13 p2093 A66-26021
- Limiting cases of screened Coulomb T matrix in complex energy plane 15 p2547 A66-29618
- Electron secondary emission from interaction of ion, atom and molecular energetic beams with solids, especially when kinetic energy is significant 16 p2776 A66-30796
- Epitaxial growth of low pressure sputtered-silver films, noting dependence of growth on kinetic energy distribution of sputtered atoms 16 p2784 A66-31532
- Retarding potential measurement of kinetic energy of electrons released in Penning ionization by excited helium atoms in metastable electron states 18 p3139 A66-34505
- Kinetic energy variations in different parts of baric centers during atmospheric motion 19 p3348 A66-36038
- Temperature potentials in cylinder of known radius, investigating optimal heating regime and thermal kinetic factor effect on maximum potential magnitude 20 p3665 A66-36912
- Collision integrals, effective cross sections and deflection angles for Morse potential calculated, using dimensionless relative kinetic energy of pair of atoms 21 p3775 A66-39073
- Kinetic energy causing anomalous increase in thermoelectric power in semiconducting p-type iron-chromium sulfide near Curie temperature 21 p3803 A66-39261
- Frequency dependence of electrostatic energy density in undamped longitudinal plasma oscillation, noting contribution of kinetic and thermal energy 23 p4104 A66-41507
- Rotating body in vacuum, examining motion dependency on body configuration and kinetic energy distribution, noting effect of change in energy on motion 24 p4281 A66-42337
- Plasma temperature increase by randomization of kinetic plasma energy through acceleration stages, obtaining higher plasma velocities 24 p4244 A66-42888
- KINETIC EQUATION**
- Self-field electron kinetic reaction to electromagnetic propagation in three-fluid Brownian plasma 01 p0110 A66-10335
- Singularities of kinetic /plasma/ dispersion equation 01 p0113 A66-10637
- Kinetic equation of laser optimum emission, determining pumping efficiency, value of losses in special modes, etc 01 p0084 A66-11058
- Equilibrium configuration of plasma confined by magnetic field on kinetic equations of particle drift without considering collisions 02 p0268 A66-11781
- Static force factor introduced into kinetic longitudinal plasma oscillation equation, noting Landau damping factor 03 p0397 A66-12382
- Kinetic equation with relativistic interaction correlation for homogeneous plasma 03 p0405 A66-13139
- Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 04 p0510 A66-13879
- Electrical conductivity of polar semiconductors in electric fields, calculating lattice and Coulomb electron scattering mechanism by kinetic equation method 04 p0568 A66-14350
- Structure of solutions of chain of equations for deriving Boltzmann kinetic equation of gases 05 p0663 A66-15344
- Kinetic equations of complex reactions derived, using conical graphs, reducing reversible reaction problems to problems of irreversible kinetics 06 p0822 A66-16544
- Lagrangian formulation of wave kinetics in weakly turbulent plasma, taking into account interaction of plasma oscillations 07 p1085 A66-17647
- Thermal conditions in boiling liquids including container wall damage-flux density relationship, stable and unstable boiling in bubble evaporation region and film vaporization 07 p1154 A66-18066
- Kinetic equations, considering free and bound charges in weakly ionized hydrogen plasma, noting self-consistent approximation for second distribution function 08 p1265 A66-19375
- Kinetic equation for plasma in strong static magnetic field derived, using Bogoliubov method 09 p1408 A66-20371
- Balescu-Lenard kinetic equation derived for fully ionized zero-external-field homogeneous unbounded plasma, with relativistic corrections for thermal motion 10 p1567 A66-21816
- Kinetic equation for density matrix of discrete system undergoing relaxation in

presence of instantaneous collisions 10 p1622 A66-21983

Second harmonic generation by laser beams of finite spectral width, using quantum transitions and kinetic equations, noting shape of pumping line at fundamental frequency 10 p1544 A66-22026

Coulomb collisions and equilibrium states in fully ionized plasma, deriving kinetic equation in pairwise collision approximation 10 p1572 A66-22037

Kinetic moment variation theorem for deformable system of material points of variable composition 11 p1735 A66-22239

Kinetics and gas dynamics equations derived to determine state of gas behind strong shock waves, accounting for all excited states of neutral atoms 11 p1688 A66-22586

Properties of moving dislocations in unstabilized creep at various temperatures analyzed by kinetic equations in Akulov theory 11 p1784 A66-23323

Hydrodynamic approximation of interaction between charged particle beam and plasma confined by ideally conducting sheath 13 p2139 A66-25389

Nonlinear kinetic equation for waves and particles in nonisotropic plasma where anisotropy is due to magnetic field, noting probability of wave absorption-emission by particles 13 p2140 A66-25409

Iterative method solution of kinetic equation with functional derivatives for ionized plasma 13 p2141 A66-25476

Second optical harmonic generation equations for steady state laser derived from density matrix 13 p2092 A66-25682

Phase stability of system of particles in cyclic accelerator with automatic frequency correction of accelerating field, noting kinetic equation method 13 p2147 A66-25748

Solution of reactor kinetics equation numerically unconditionally stable for all values of reactivity or integration step size 13 p2126 A66-25791

Transport equation for classical unstable electron plasma extended to quantum mechanical multicomponent case, rewriting kinetic equation 13 p2155 A66-26674

Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 14 p2275 A66-27569

Electrical conductivity of polar semiconductors in electric fields, calculating lattice and Coulomb electron scattering mechanism by kinetic equation method 14 p2368 A66-28247

Difference equations arising when one-velocity kinetic equation is solved by characteristics method, estimating error 14 p2338 A66-28280

Structure of solutions of chain of equations for deriving Boltzmann kinetic equation of gases 15 p2482 A66-29972

Second harmonic generation by laser beams of finite spectral width, using quantum transitions and kinetic equations, noting shape of pumping line at fundamental frequency 16 p2718 A66-30845

Parametric resonance in plasma situated in magnetic field, noting oscillation, frequency stability, kinetic equations, electric field effect, etc 16 p2762 A66-31170

Balance equations derived from kinetic equations for nonequilibrium plasma, considering radiative processes and inelastic collisions between electrons and atoms 16 p2766 A66-31603

Book on laser theory based on kinetic equations with emphasis on emission from luminescent center transitions, semiconductor junctions and Raman scattering 17 p2934 A66-32558

Successive approximation solution to integral kinetic equation and corrections to moments of distribution function for viscous and rarefied gases 17 p2909 A66-32585

Electron capture detector parameters in pulse sampling mode analyzed, noting kinetic processes, temperature effect, etc 17 p2961 A66-32660

Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance,

radiation density, characteristic damping, etc 17 p2938 A66-33515

Kinetic equations, considering free and bound charges in weakly ionized hydrogen plasma, noting self-consistent approximation for second distribution function 18 p3146 A66-34177

Light absorption by free current carriers role in kinetic equations of semiconductor laser/radiation system 18 p3119 A66-34691

Longitude dependence of distribution function of electrons for fixed value of McIlwain parameter, using kinetic equation 18 p3197 A66-34873

Quantum theory of laser model, deriving kinetic equations for radiation and single-particle density matrices, using Bogoliubov expansion procedure 19 p3374 A66-36008

Nonlinear plasma wave interaction, discussing Langmuir wave scattering on particles and energy transformation 19 p3418 A66-36532

Quadrupole relaxation in multilevel systems by method of kinetic equations 20 p3512 A66-37140

Digital computer analysis of kinetic equations for CO burning in presence of hydrogen 20 p3679 A66-37702

Improvement of gyroscopic accuracy by increased kinetic moment, noting use of gyromotor with rotors placed inside each other 21 p3739 A66-39326

Flow of strongly rarefied ionized plasma past electrically charged body solved by kinetic and Poisson equations in absence of magnetic field 21 p3795 A66-39604

Integration of near equilibrium flows in propulsive nozzles, estimating length of transition region from equilibrium condition to kinetic solution [AICE PREPRINT 28C] 22 p3971 A66-39884

Kinetic equations in hydrodynamic approximation for weakly reacting and excited Bose systems, finding asymptotic expressions for Green function 23 p4055 A66-41412

Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 24 p4219 A66-42128

Nonlinear integral equations formulated that are equivalent to Krook kinetic equation for steady problems in two and three space dimensions 24 p4193 A66-42407

Statistical mechanics methods applied to plasma, deducing kinetic equation 24 p4246 A66-43111

## KINETIC FRICTION

Turbine rotor subject to thermal stresses due to friction of accidental contact with stator 23 p4075 A66-41995

## KINETIC HEATING

Radio galaxies contribution to kinetic temperature of intergalactic gas on basis of cosmological model 03 p0426 A66-12909

Reversed heat conduction in natural convection at thermal leading edge on vertical wall [ASME PAPER 65-WA/HT-34] 05 p0792 A66-15672

Heat-sensitive paint in measuring kinetic heating in hypersonic wind tunnel 08 p1316 A66-18720

Structural design of Concorde supersonic airliner, noting airframe strength parameters 10 p1483 A66-21717

Radio galaxies contribution to kinetic temperature of intergalactic gas on basis of cosmological model 14 p2380 A66-27257

Homogeneous nucleation of liquid drops in supersaturated vapors, noting kinetic treatment for heating of growing clusters and irreversible thermodynamics of nonisothermal nucleation 19 p3477 A66-35566

Equilibrium deviation occurring in plasma with variable kinetic temperature due to radiation transport within plasma volume and outflow beyond limits of volume 20 p3606 A66-36973

Kinetics of heating and evaporation of exploding copper and brass wires in air and polyethylene tubes studied by X-ray techniques 24 p4238 A66-42976

## KINETIC THEORY

SA BOKINETIC THEORY  
SA DIFFUSION

Kinetic theory of Lorentz plasma in rotating magnetic fields and electromagnetic fields based on Boltzmann equation 01 p0113 A66-10640

Electromagnetic H-wave propagation of given frequency along plasma sheet surrounded by vacuum 01 p0030 A66-10897

Cauchy problem for linearized Boltzmann equation in kinetic theory of gases 01 p0107 A66-11011

Plasma kinetic theory effect of magnetic field on dispersion relation for ionic sound wave 02 p0269 A66-11836

Dissociation of oxygen molecules by vibrational excitation 03 p0396 A66-13211

Kinetic theory of unstable plasma covering growth and stabilization of spatially homogeneous electron plasma in uniform neutralizing positive charge field, Pines-Schrieffer and formally equivalent kinetic equations and Balescu theory 03 p0406 A66-13359

Kinetic processes in simple plasma, using linear Liouville equation for N-body particle distribution and expanding solution as power series 05 p0727 A66-15259

Book on physical gas dynamics including transport theory, kinetic theory, thermodynamics, equilibrium, fluid flow, radiative transfer, etc 05 p0666 A66-15848

Kinetic theory approach to plasma fluctuations taking particle pair collisions into account 06 p0918 A66-16778

Class of exact solutions for one-dimensional single-relaxation equation with arbitrary collision frequency 08 p1316 A66-18532

Acoustic and optical phonon drag of pure ionic n-type semiconductors having NaCl structure, calculating kinetic coefficients 08 p1273 A66-19252

Book on dynamics of rarefied gas discussing kinetic theory, shock wave structure, Couette flow, gas flow between coaxial cylinders and plasma dynamics 08 p1208 A66-19321

Book on kinetic theory of simple liquids including equilibrium properties, time-dependent system, Markov processes, Brownian motion, transport coefficients, etc 08 p1209 A66-19463

Initial stage of motion in Rayleigh problem, calculating time variable velocity of tangential stress on and velocity of gas near plate 08 p1209 A66-19477

Kinetic model construction of maximum number of Boltzmann collision integral properties 08 p1259 A66-19577

Kinetic instability of terrestrial outer radiation belts calculated, using magnetospheric electron flux data 08 p1286 A66-19789

Superfluid basic theory noting Josephson tunneling, liquid helium kinetic theory, quantized vortex lines, etc 09 p1415 A66-20005

Kinetic approximation of passage of electromagnetic wave through plasma layer, noting angle of incidence of wave on layer 10 p1506 A66-21993

Kinetic theory of passage of electromagnetic waves through plasma layer 10 p1506 A66-22004

Kinetic approximation of electromagnetic surface wave propagation in infinite plasma sheath solved by Fourier method, noting resulting dispersion equation 11 p1743 A66-22441

Rarefied gas dynamics - International Symposium, Institute for Aerospace Studies, University of Toronto, July 1964, Volume 1 11 p1688 A66-22901

Sound wave propagation in rarefied gas dynamics, using kinetic theory 11 p1736 A66-22903

Accuracy of kinetic theory approximations assessed by comparison of approximate and exact solutions of Krook kinetic equation for Couette flow and shock wave structure 11 p1690 A66-22906

Iterative solution to shock wave structure in highly rarefied flows through kinetic theory and full Boltzmann equation 11 p1690 A66-22910

Shock structure calculations from kinetic theory, using ellipsoidal distribution function 11 p1690 A66-22912

Rayleigh problem at low Mach numbers

and arbitrary Knudsen number investigated in rarefied gas dynamics according to kinetic theory 11 p1692 A66-22922

Kinetic theory of leading edge of plate interacting with streaming gas evaluated by Bhatnagar-Gross-Krook equation of statistical mechanics 11 p1633 A66-22924

Transport properties, thermoconductivity, molecular collision and viscosity of polyatomic gas of circular cylindrical molecules with hemispherical caps 11 p1741 A66-23215

Electromagnetic H-wave propagation of given frequency along plasma sheet surrounded by vacuum 11 p1658 A66-23299

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization, longitudinal current effect, etc 12 p1921 A66-24204

Kinetic theory of passage of s-and p-polarized electromagnetic waves through thin inhomogeneous plasma layer 12 p1816 A66-24225

Kinetic theory of dense gases generalized for all orders, deriving integral equations for transport coefficients and showing temperature dependence of bulk viscosity 12 p1979 A66-24565

Brillouin scattering by gases as experimental test of kinetic theory away from hydrodynamic regime 12 p1917 A66-24585

Milne-Eddington model in heat and mass transfer, showing analogy between radiation and particle transfer and correspondence to simplified Boltzmann equation 13 p2208 A66-25162

Two-time probability distribution function, autocorrelation function, Liouville equation and fluctuation theory of plasma kinetics 13 p2156 A66-26685

Rarefied gas flow in hydrodynamic entrance region of circular tube, noting variation with density level, velocity profile and pressure drop for developing flow 13 p2070 A66-26713

Text on vacuum science and technology including kinetic theory of gases, gas flow, pumps, vacuum measurements and equipment, etc 14 p2335 A66-27721

Solution to dispersion equation of linearized Boltzmann equation in kinetic theory of rarefied gases, noting root behavior and distribution function structure 14 p2278 A66-28285

Kinetic theory of two-photon absorption from single mode of radiation field, noting dependence on coherence properties of field 15 p2544 A66-28943

Classical analytical mechanics applied to mechanics of continua, noting relation between kinetic-stress functions and Ostrogradskii-Hamilton principle and stress tensor and finite deformation tensor 15 p2539 A66-29148

Surface protrusions and holes, Maxwell kinetic gas theory and surface interaction of current of free molecules and rigid body 16 p2686 A66-31042

Textbook on molecular thermodynamics, statistical mechanics and kinetic theory of gases, with applications to ideal gas, crystal, radiation field, etc 16 p2829 A66-31312

Kinetic theory of electromagnetic propagation in confined magnetoactive plasma 17 p2968 A66-32539

Pulsating plasma column acceleration in high current pulsed accelerator 17 p2972 A66-32870

Linearized model of Boltzmann equation to examine problems of kinetic theory of nonuniform gases 17 p2911 A66-32961

Kinetic theory of liquid viscosity made tractable by using approximation of perturbation of radial distribution function of monatomic liquid by nonuniform flow field 17 p2940 A66-33335

Kinetic theory of ionospheric satellite trail, discussing neutral and charged components from BGK model equation [ATAA PAPER 66-477] 18 p3226 A66-33654

Computer programs for combustion rates of hydrogen-air mixture 18 p3063 A66-33830

Physical phenomena occurring within fluid devices, particularly pneumatic devices, considering Maxwellian distribution of velocities, ideal gas law and mean free path 18 p3098 A66-34118

Boltzmann equation, interpreted in terms of certain correlation functions known as product densities, applied to fluctuation theorem and gases and liquids not in equilibrium 18 p3136 A66-34706

Variational principle applied to boundary value problems in kinetic theory, specifically examining Kramer problem, plane Couette flow and plane Poiseuille flow 18 p3102 A66-34919

Kinetic approximation of passage of electromagnetic wave through plasma layer, noting angle of incidence of wave on layer 18 p3072 A66-34970

Kinetic theory approach to plasma fluctuations taking particle pair collisions into account 19 p3405 A66-35375

Wall term in Boltzmann H relationship leads to increase in entropy for solutions to Boltzmann equations 19 p3401 A66-35584

Kinetic theory of passage of electromagnetic waves through plasma layer 19 p3303 A66-36088

Relation of kinetic theory to unstable plasmas /weak turbulence/, noting expansion parameters and extension to include discrete particle effects 19 p3418 A66-36536

Rarefied gas motion instability, constructing general solution for effect of various force fields 19 p3343 A66-36846

Necessary and sufficient conditions of kinetic processes involving two systems of point masses 20 p3598 A66-36910

Electrodynamic properties of homogeneous magnetoactive plasmas including wave propagation, excitation, scattering, etc 20 p3608 A66-37488

Metastable dislocation crack transformation into polygonal walls of edge dislocations caused by diffusion over crack surface 20 p3669 A66-37551

Rotary inertia and shear deformation as finite approach of kinetic beam and plate problems 21 p3826 A66-38585

Kinetic instability of terrestrial outer radiation belts calculated, using magnetospheric electron flux data 21 p3809 A66-38785

Solution to chain of kinetic gas equations, showing effect of fast reversible and slow irreversible processes on particle distribution function 21 p3771 A66-39248

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization longitudinal current effect, etc 22 p3956 A66-40568

Kinetic theory of passage of s-and p-polarized electromagnetic waves through thin inhomogeneous plasma layer 22 p3867 A66-40587

Orientation relaxation in symmetrical-top gases and binary gas mixtures, noting prediction of cross sections from kinetic theory data for molecules 22 p3860 A66-40901

Monograph on kinetic theory of plasmas, deriving state equation, Maxwell equation for plasma-magnetic field interaction and boundary layer heat transfer expressions 23 p4102 A66-41400

Boltzmann equation for dilute monatomic gas, discussing asymptotic interpretation of Hilbert and Chapman-Enskog theories 23 p4097 A66-42011

Static elastic and thermoelastic stability, discussing kinetic theory and physical interpretation of energy methods 24 p4287 A66-42271

Monte Carlo analysis of plasma of heavy ions, obtaining thermodynamic properties, potential energy and pair distribution 24 p4245 A66-43036

# KINETICS

SA CHEMICAL KINETICS  
SA ELECTROKINETICS  
SA HYDROKINETICS

Soviet and foreign papers on physics of boiling including heat transfer, heat release, bubbling processes, kinetics and sonic aspects of boiling and bibliography 09 p1469 A66-20100

Kinetics of CN radicals association generated by shocking cyanogen-argon mixtures at high temperatures in reflected shock region of expansion 12 p1811 A66-23615

Soviet and foreign papers on physics of boiling covering heat transfer, heat release, bubbling processes, kinetics and sonic

aspects of boiling, including bibliography 21 p3834 A66-38509

Kinetics of nonuniform generation of longitudinal plasma waves by transverse wave beam with narrow spectrum, noting effect of magnetic field 22 p3958 A66-40931

Turbulence in conducting medium treated by fluid mechanical approach and kinetic theory, noting energy transfers between eddies 23 p4108 A66-42033

# KIRCHHOFF LAW

Finite linear time-invariant passive reciprocal electrical networks including Kirchhoff generalized constraints 07 p1014 A66-17745

Validity of Kirchhoff law for apparent local spectral emittance and absorbance and total flux calculations for spacetrack cavities [ATAA PAPER 65-135] 08 p1316 A66-18793

Notions of one-and two-dimensional topology in network theory as applied to Kirchhoff laws and network duality 13 p2050 A66-26058

Combined frequency and space correlation of wave fields scattered by rough surfaces where conditions of applicability of Kirchhoff approximation hold true 14 p2236 A66-27144

Differential equations of linear theory of elastic shells derived under Kirchhoff-Love hypothesis with aid of static-geometric analog 23 p4142 A66-41956

# KIWI ROCKET REACTOR

Behavior of Kiwi-and Nerva-type nuclear rocket reactors under induced failure conditions to determine validity of theoretical prediction of total energy released 09 p1401 A66-20585

# KLEIN-GORDON EQUATION

Stochastic processes in microscale relativistic fluid mechanics, discussing Dirac fluid, Klein-Gordon equation, diffusion, quantum potential, spin fluids, etc 12 p1914 A66-24093

Irreducible unitary representations of restricted Lorentz group on manifolds of time-, light-and spacelike 4-vectors, obtaining plane-wave solutions of Klein-Gordon equation 15 p2528 A66-29622

# KLYSTRON

Periodic electrostatic focusing scheme for ungridded multicavity klystron amplifier 01 p0044 A66-10932

Synchronization of reflex klystron loaded with resonator with nonlinear capacitance from p-n junction of semiconductor diode at third harmonic of external signal 03 p0342 A66-12626

Two-cavity klystron frequency multiplier for generating waves less than 1 mm 03 p0342 A66-12881

CW klystron frequency multiplier for generating submillimeter waves 04 p0492 A66-13422

Microwave amplifier, electrostatically focused klystron, for spaceborne equipment used in telecommunications of deep space 04 p0493 A66-13603

Microwave tube technology noting klystrons, crossed field devices, traveling wave tubes, etc 05 p0642 A66-14560

Experimental verification of spectrum asymmetry at output of pulsed RF klystron amplifier transmitter leads to modulation technique called Control of Unwanted Radiated Energy /CURE/ 06 p0841 A66-15956

Ballistic klystron theory approximation for bunching enhancement of three-cavity klystron whose center cavity is detuned to HF side for maximum efficiency 06 p0852 A66-16643

Reflex klystron as subcarrier detector for microwave signals modulated by RF carriers in 100 to 500 kc range 06 p0853 A66-16651

Coupled monotron analysis of band-edge oscillations in high power traveling wave tubes, discussing electron beam interaction with coupled-cavity structure 06 p0855 A66-16768

Predicting and measuring FM of reflex klystron noise performance when subjected to random acoustical and mechanical vibration 07 p1008 A66-17512

Difference frequency between harmonics of millimeter wave oscillators at submillimeter wavelength, using crossed waveguide harmonic generator as harmonic mixer 07 p1008 A66-17514

Klystrons, cross field devices and traveling-wave tubes, including design and application 07 p1011 A66-18269

Frequency stabilization method for reflex klystrons and other self-excited microwave oscillators 09 p1357 A66-20780

Spectra of amplitude and phase fluctuations in drift klystron under initial energy spectra of randomly correlated fluctuations of current and velocity 09 p1358 A66-20810

Microwave regenerative amplifier using reflex klystron, considering beam current, supply voltages, mismatch, input and output amplitudes, phase lead, etc 11 p1655 A66-22725

Reflex klystrons as microwave FM detector and theoretical circuit predictions 11 p1670 A66-23160

FM and AM noise spectra of low-noise microwave tubes, solid state klystrons and solid state chains 12 p1835 A66-24135

Klystron and TWT, generating high powers at millimeter wavelengths, combined in single amplifier for radar systems 12 p1839 A66-24614

Noise and amplification characteristics of millimeter-wave reflex klystron amplifiers 13 p2037 A66-25549

High power generators for studying interaction of oscillating fields with plasmas 14 p2246 A66-26818

Short circuited crossguide coupling used to stop oscillation of reflex klystrons and convert them into stable millimeter wave amplifiers 14 p2248 A66-27058

Extension of nonlinear TWT equations to floating drift relativistic klystron, noting formulas for first harmonic of current in two- and three-cavity klystron 14 p2250 A66-27139

Spurious X-band output signals observed during interaction of dual reflex klystron cavities and klystron beams 14 p2258 A66-27956

Submillimeter wave mixing of output of carinotron and output of klystron in crossed-waveguide harmonic generator 15 p2463 A66-29025

Klystron transmitter for ionospheric diffusion soundings, noting method to obtain high stability in output power 16 p2661 A66-30954

Three-cavity extended-interaction klystron with cavities consisting of resonated sections of bar structure tested in pulsed operation, noting relation between cavity length and efficiency 16 p2663 A66-31020

Frequency stabilization method for reflex klystrons and other self-excited microwave oscillators 22 p3874 A66-39839

Traveling wave tubes and klystrons, discussing microwave power generation efficiency, application for satellite communications, etc 22 p3878 A66-40701

Microwave regenerative amplifier using reflex klystron, considering beam current, supply voltages, mismatch, input and output amplitudes, phase lead, etc 23 p4045 A66-41463

**KNUDSEN CELL**

High temperature equilibria among vapor species produced by fluorination of beryllium in Knudsen effusion cell, using mass spectrometer, deriving dissociation energy 12 p1811 A66-23621

Knudsen gauge designed by university sophomores, measuring molecular collision cross sections 15 p2498 A66-28787

**KNUDSEN FLOW**

Adherence of gas to wall, investigating Boltzmann equations for perfect fluid, Prandtl-type flow and state of rest fluid 05 p0661 A66-14535

Tube gas flow theory applicable to laminar flow, slip flow, transition region of flow and free molecular flow 07 p1023 A66-18131

Rarefied gas dynamics - International Symposium, Institute for Aerospace Studies, University of Toronto, July 1964, Volume 1 11 p1688 A66-22901

Mass flow of nitrogen gas through circular orifice at five Knudsen number values from 0.13 to 1.78 and range of upstream to downstream pressure 11 p1692 A66-22936

Internal flow problems in free, nearly free molecular regimes and higher transition

flows, using Boltzmann equation and series expansion to solve integral equation for surface collision density 11 p1693 A66-22940

Boltzmann-Krook equation in Knudsen layers for Rayleigh shear flow and related flow of rarefied gas 21 p3731 A66-39578

**KNUDSEN NUMBER**

Transition flow of nitrogen through short circular tubes with length-to-diameter ratios from 0.005 to 1 and pressure ratios from 1 to 20 05 p0605 A66-14704

Aerodynamic properties of simple bodies in hypersonic transition regime 08 p1164 A66-19132

Cylindrical Poiseuille flow of rarefied gas for inverse Knudsen number from zero to 10 10 p1524 A66-21806

Boltzmann equation behavior, at large Knudsen numbers, for free molecular interactions with infinite collision cross section 11 p1691 A66-22918

Rayleigh problem at low Mach numbers and arbitrary Knudsen number investigated in rarefied gas dynamics according to kinetic theory 11 p1692 A66-22922

Aerodynamic drag torque on rotating sphere in transition regime, noting dependence of gas inertia on Reynolds number 11 p1635 A66-22935

Poiseuille flow of rarefied gas in annular tube analyzed numerically for inverse Knudsen number, using Bhatnagar-Gross-Krook model and transport - integro-differential equation 18 p3102 A66-34920

**KOLMOGOROFF THEORY**

Contraction to improve isotropy of grid-generated turbulence 22 p3899 A66-40381

Grid turbulence for large Reynolds numbers, noting consistency of power spectra values with Kolmogoroff scaling, decay law and Reynolds number effect on turbulence 24 p4194 A66-42408

Extension of formalism of theory of branching random processes applied to fluctuations in development of extensive air shower cascade by Kolmogoroff method 24 p4269 A66-42920

**KONIG THEOREM**

Critical analysis of certain conformal mappings of ellipsoid of revolution onto plane 18 p3109 A66-34739

**KROOK EQUATION**

Class of exact solutions for one-dimensional single-relaxation equation with arbitrary collision frequency 08 p1316 A66-18532

Cylindrical Poiseuille flow of rarefied gas for inverse Knudsen number from zero to 10 10 p1524 A66-21806

Linearized one-dimensional Krook equation solved for half-space of gas bounded by oscillating wall 11 p1736 A66-22902

Accuracy of kinetic theory approximations assessed by comparison of approximate and exact solutions of Krook kinetic equation for Couette flow and shock wave structure 11 p1690 A66-22906

Numerical calculations of axially symmetric two-dimensional steady expansions of monatomic gas, using approximate Boltzmann equation with Krook collision term 11 p1690 A66-22908

Numerical convergence of iterative solution to complete Bhatnagar-Gross-Krook equation for strong shock waves 11 p1690 A66-22909

Internal flow problems in free, nearly free molecular regimes and higher transition flows, using Boltzmann equation and series expansion to solve integral equation for surface collision density 11 p1693 A66-22940

Iterative solution to Krook-Boltzmann kinetic equation noting Navier-Stokes numerical solution, computation and analysis of distribution function within shock wave 16 p2685 A66-30945

Kinetic theory of ionospheric satellite trail, discussing neutral and charged components from BGK model equation [AIAA PAPER 66-477] 18 p3226 A66-33654

Numerical solutions of Krook kinetic equation for Couette flow and plane shock wave 18 p3101 A66-34665

Boltzmann-Krook equation in Knudsen layers for Rayleigh shear flow and related flow of rarefied gas 21 p3731 A66-39578

Nearly free molecular flow in rarefied gas dynamics in comparison of theoretical and experimental results with reference to

drag 23 p4060 A66-42025

Numerical solution of Bhatnagar-Gross-Krook model for shock wave structure problem, noting Chapman-Enskog approximation 23 p4061 A66-42037

Nonlinear integral equations formulated that are equivalent to Krook kinetic equation for steady problems in two and three space dimensions 24 p4193 A66-42407

**KRYPTON**

Radioactive krypton-85 diffusion technique for temperature mapping of turbine blade surfaces [SAE PAPER 650704] 06 p0944 A66-17078

Xenon, radiogenic Xe 129R and krypton contents and xenon and krypton isotopic composition of Bruderheim meteorite 08 p1297 A66-19409

Sensitivity and safety of Kr-85 /radiokrypton/ for leak detection 22 p3928 A66-40497

X-rays and Auger electron emission by krypton 81 measured, using proportional counter 24 p4262 A66-42430

**KU-BAND**

Solid-dielectrically loaded strip transmission line techniques extended to Ku-band region 08 p1192 A66-18946

**L-BAND**

Sinusoidal step response of L-band waveguide to step-modulated RF excitation 03 p0332 A66-12432

Experimental L-band traveling wave maser developed with exceptionally wide tuning range 06 p0889 A66-15958

Parametric generation and amplification of magnetoelastic waves in single-crystal yttrium iron garnet cylinder at L-band at room temperature 06 p0851 A66-16457

Ground clutter shields for L-band radar using 60-ft parabolic reflector with Cassegrain geometry 15 p2457 A66-28596

Nuclear radiation hardened telemetry transmitter in L-band, noting tests and radiation effect problems 16 p2650 A66-30554

L-band traveling wave maser using chromium doped rutile, discussing inverted susceptibility as figure of merit 20 p3580 A66-38239

**L-2000 AIRCRAFT**

**S LOCKHEED L-2000 AIRCRAFT**

**LABORATORY**

SA ASTRONOMICAL OBSERVATORY

SA ENGINE TESTING LABORATORY

SA ENVIRONMENTAL LABORATORY

SA LUNAR MOBILE LABORATORY /MOLAB/

SA MANNED ORBITAL LABORATORY /MOL/

SA MANNED ORBITAL RESEARCH LABORATORY /MORL/

SA MISSILE TESTING LABORATORY

SA SPACE LABORATORY

SA TEST FACILITY

Air Force Avionics Laboratory and problem of transition from exploratory development to operational hardware 15 p2618 A66-28746

**LABORATORY APPARATUS**

Laboratory simulation to test image-velocity measuring device yielding accurate and useful results 02 p0227 A66-11379

Cesium diode thermionic converter, noting design, operation, application 10 p1485 A66-21515

Lunar dust depth in Mare Cognitum determined by comparing Ranger VII photographs with laboratory crater photographs 11 p1770 A66-22571

Laboratory duplication of processes exciting airglow, noting green line of oxygen atoms 11 p1699 A66-23116

Laboratory instrumentation for testing and calibration of in situ probes for lower ionosphere, mesosphere and stratosphere 13 p2059 A66-26549

Automated Biological Laboratory for Mars mission exobiological experiments controlled by computer routines 18 p3062 A66-34369

Laser application survey 19 p3374 A66-35798

Laboratory simulation of thermal shock failure in tungsten under missile firing conditions 19 p3385 A66-36154

Laboratory equipment protection from vibration environment, noting instrumentation and results 21 p3722 A66-38873

**ABYRINTH**  
Measurement of oculogravic illusion in subjects with or without labyrinthine defects, showing validity as specific response to stimulation of otolith organs 06 p0813 A66-16828  
Vestibular function in conditions of subgravity 11 p1641 A66-22481  
Labyrinthine nystagmus and sensation of turning evoked by impulsive stimuli in yaw, pitch and roll compared for subjects in plane of rotation and in tilted position 24 p4163 A66-42448

**ACTIC ACID**  
Crystalline lactic dehydrogenases in reaction with p-hydroxymercuribenzoate in urea 13 p2009 A66-25796

**LAGRANGE COORDINATE**  
Lagrange theorem extended for solution of three-body problem to regular configurations of more than three particles 16 p2804 A66-31393  
Motion equations of rigid body, discussing transformation from Lagrange equation to Euler equation 19 p3400 A66-35831  
Three-body model including low thrust forces used to generate artificial libration points or assure stability of five Lagrangian libration points in Earth-Moon space [AIAA PAPER 65-682] 19 p3461 A66-35889  
Lagrange libration points in plane of two mutually gravitating heavy masses applied to theory of SYNCOM lunar satellites 22 p3979 A66-40176

**LAGRANGE EQUATION**  
Global maximum for particle idealization of rocket propelled vehicle moving in calculus of variations, noting Lagrange equation 04 p0538 A66-13462  
Correlation matrix of natural thermal noise put forward for arbitrary passive linear system described by Lagrange equations and thermal equilibrium 07 p1013 A66-17431  
Partial-fraction expansion of transfer matrix, using Lagrange interpolation formula 08 p1246 A66-19738  
Non-Einsteinian gravitation, noting that expression for invariant density of free Lagrange gravitational field holds only for slowly varying weak fields 09 p1403 A66-20769  
Strict complementary energy theorem for finite deformation of elastic continuum established, using Lagrange strain and stress tensors as conjugate deformation and stress tensors characterizing deformation 10 p1615 A66-21478  
Variational principle application to heat conduction in solids, noting temperature dependence, physical meaning of Lagrangian heat flow between parallel plates, etc 12 p1975 A66-23542  
Lagrangian for particular collisional models in fluid dynamics, considering fluctuation theory relations and stability in presence of external field 12 p1918 A66-23552  
Lagrange equations of motion for solid body with liquid-filled cavities derived, using Hamilton-Ostrogradskii principle of least action 13 p2127 A66-25628  
Lunar origin hypothesis suggesting capture in gravitational field of Earth following storage in solar system 13 p2188 A66-26366  
Lagrange equation approach to linear aeroelasticity in modern aircraft from structural and aerodynamic data 13 p1997 A66-26696  
Non-Einsteinian gravitation, noting that expression for invariant density of free Lagrange gravitational field holds only for slowly varying weak fields 14 p2334 A66-27304  
Active-control and similar-control stabilization of Lagrange solutions of restricted three-body linear perturbation problem 14 p2382 A66-27559  
New method of introducing nonholonomic constraints into Lagrangian formulation of mechanics 16 p2749 A66-31724  
Lagrange equation for symmetric, nonhomotropic, spherical, cylindrical and one-dimensional unsteady flow of perfectly conducting gas behind normal shock wave of variable strength 18 p3102 A66-34728

Generalizations of functional Lagrange expansion to multivariable nonlinear systems such as state space and functional equations in s domain for control problems application 19 p3391 A66-36704  
Generalized Lagrange equations for rheonomic-holonomic mechanical system 20 p3602 A66-37542  
Inadequacy of Corson variational principle as foundation of classical and quantum dynamics 24 p4237 A66-42406  
Correction of motion of two degree of freedom system with one cyclic coordinate 24 p4189 A66-42837

**LAGRANGE MULTIPLIER**  
Rayleigh-Ritz method, stationary complementary and potential energy principles and Lagrange undetermined multipliers applied to free vibration of elastic body 11 p1781 A66-22611  
Lagrange and Mayer problems of optimal control of cost 11 p1680 A66-23277  
Existence theorems for optimal control solutions of Pontryagin and Lagrange problems 11 p1725 A66-23458  
Dual quadratic programming of dynamic response of frictionless mechanical system with one-sided constraints 13 p2117 A66-25347  
Variational problem of Lagrange with inequality, analyzing splitting of extremals, dead-end, entry and exit from boundary, etc 13 p2120 A66-26139  
Lagrangian multiplier representation for coast periods of optimum trajectories 14 p2381 A66-27433  
Variational problem of transition of aircraft with inertial system without stabilizers solved by reduction to Lagrange problem 15 p2534 A66-29336  
Lagrangian multiplier method applied to mixed boundary value problems such as stresses due to temperature changes in semiinfinite slab 15 p2615 A66-29733  
Natural frequencies of all-clamped rectangular sandwich panel vibrations, using Lagrange multipliers 24 p4286 A66-42160

**LAGRANGE SIMILARITY HYPOTHESIS**  
Quasi-Lagrangian study of inviscid barotropic fluid for analysis of certain ageostrophic jet flows 02 p0222 A66-11825  
Single fluid heat exchanger, using Lagrange method and thin walled stainless steel tube for theoretical and experimental dynamic response analysis [ASME PAPER 65-WA/HT-9] 05 p0791 A66-15653  
Lagrangian similarity hypothesis to determine structure of turbulence that arises during fluid flow over rough rigid wall 07 p1022 A66-18103  
Single fluid heat exchanger, using Lagrange method and thin walled stainless steel tube for theoretical and experimental dynamic response analysis [ASME PAPER 65-WA/HT-9] 11 p1785 A66-22193

**LAGUERRE FUNCTION**  
Linear system impulse response approximation, determining time-scaling factor via orthonormal Laguerre functions 06 p0866 A66-16748  
Second derivatives of Legendre and Laguerre polynomials based on Markov inequalities 08 p1244 A66-18792  
Inverse Laplace transformations in terms of Laguerre functions 12 p1905 A66-24654  
Generalized heat equation solution expansion in terms of radial heat polynomials, Appel transforms and Laguerre polynomials 13 p2118 A66-25793  
Functional integration analysis of exponential behavior of nonlinear feedback control systems 13 p2052 A66-26076  
Signal analysis with aid of Laguerre polynomials 16 p2655 A66-31688

**LALLEMAND CAMERA**  
Vectorial photoelectric effect and quantum efficiency measurement in thin gold films for two light polarizations, using Lallemant electronic camera 20 p3614 A66-37279

**LAMB WAVE**  
Lamb shift in lithium isotope measured by determining lifetime from photon emission and employing analog formula of Bethe and Salpeter 11 p1739 A66-22948

**LAME WAVE EQUATION**  
Stress-strain distribution of sharp corners

effect on surface of elastic body, examining mathematical difficulties in application of Lame equation and boundary data smoothing 23 p4135 A66-40991

**LAMINA**  
**S LAMINAR BOUNDARY LAYER SEPARATION**  
**S MONOMOLECULAR LAYER**  
**LAMINAR BOUNDARY LAYER**  
Three-dimensional laminar boundary layer on body of revolution at small incidence at its stability 01 p0055 A66-10203  
Two-phase flow over flat plate analyzing velocity profile, shear coefficient and heat transfer of laminar boundary layer formed over plate 01 p0006 A66-10423  
Laminar boundary layer of nitrogen flow over helium cooled sphere with porous wall 01 p0162 A66-10463  
Heat transfer data obtained in combined convection regime for rotating isothermal cone, noting influence of cone vertex angle 01 p0164 A66-10902  
Surface modifications of recovered small-scale plastic models after high speed flight used to estimate extent of laminar and turbulent flow over surface related to ablation studies 02 p0303 A66-11560  
Three-dimensional laminar boundary layer flow on rotating helical blade 02 p0176 A66-11952  
Multiphase flow system with regard to chemical and nuclear processes, rocketry and air pollution control noting adiabatic potential, laminar and electrodynamic flow 03 p0354 A66-12312  
Laminar boundary layer transition on highly cooled 10 degree cone in hypersonic flow, using heat gauges to study turbulent burst propagation 03 p0315 A66-12788  
Laminar boundary layer control wind tunnel results, using perforated plastic reinforced by glass fiber 04 p0453 A66-13513  
Incompressible laminar boundary layer for plate with slot suction at high Reynolds number 04 p0509 A66-13654  
Porous blowing and suction for laminar boundary layer during free convection at vertical surface 04 p0597 A66-13820  
Laminar boundary layer on impulsively started rotating sphere, discussing viscous incompressible axially symmetric flow in terms of nonsteady partially linearized Navier-Stokes equations 04 p0513 A66-14477  
Interaction of radiation and convection in laminar boundary layer of perfect gas on flat black plate [ASME PAPER 65-HT-54] 05 p0785 A66-14760  
Integral method based on method of moments to investigate compressible laminar boundary layers 05 p0607 A66-15466  
Cylinders in reciprocating harmonic rotation, calculating momentum, heat and mass transfer in forced convective field via perturbation technique [ASME PAPER 65-WA/HT-6] 05 p0791 A66-15654  
Quasi-linearization solution of two-component laminar compressible boundary layer with heat transfer on ablating wall [ASME PAPER 65-WA/HT-41] 05 p0792 A66-15667  
Viscous fluid flow, examining effect of time dependent suction applied at wall of infinite extent 06 p0871 A66-16351  
Temperature distribution of fluid in laminar boundary layer of flat plate and heat flow from fluid to plate 06 p0872 A66-16467  
Aerodynamic calculations for diffusion combustion in laminar boundary layer between two plane parallel conducting gas flows in transverse magnetic field 06 p0918 A66-16844  
Linear stability of laminar boundary layers for asymptotic suction profile, obtaining solution of inviscid equation in terms of hypergeometric function 06 p0874 A66-16998  
Pressure gradient effect on stability of laminar boundary layer when skin friction at wall vanishes, noting Reynolds number of flow 06 p0874 A66-16999  
Controlled three-dimensional roughness effect on hypersonic laminar boundary layer transition [AIAA PAPER 66-26] 06 p0804 A66-17092  
Wake from bluff bodies interaction with initially laminar boundary layer

[AIAA PAPER 66-126] 06 p0875 A66-17096  
Concentration profile in laminar boundary layer frozen to wall by catalytic chemical reaction 07 p1019 A66-17245  
Combined free and forced convection flows with heat and mass transfer in laminar boundary layers on vertical surfaces 07 p1150 A66-17579  
Incompressible laminar boundary layer equations for flow due to jet against body of revolution extending to infinity in absence of pressure gradient but with axially symmetrical swirl 07 p0981 A66-18045  
Similar solutions to laminar boundary layer equations affected by Prandtl number, viscosity-temperature variation, mass transfer and hypersonic parameter 07 p1023 A66-18136  
Laminar boundary layer on cone with uniform mass transfer, discussing velocity and energy fields 08 p1161 A66-18530  
Pressure distribution and heat transfer for laminar boundary layer flow over highly swept blunt delta wings in hypersonic free stream  
[AIAA PAPER 66-130] 08 p1162 A66-18953  
Axisymmetric stagnation-point boundary layer with constant shear inner layer solution 08 p1207 A66-19150  
Laminar boundary layer in gas flow with arbitrary external velocity and temperature gradient solved by single-parameter approximation 08 p1319 A66-19424  
Hypersonic shock tunnel study, examining effects of roughness, bluntness and angle of attack on boundary layer transition 08 p1166 A66-19813  
Distribution of specific thermal flux on body surface heated by plasma jet 09 p1407 A66-20139  
Heat exchange, friction and mass exchange in laminar multicomponent boundary layer during injection of extraneous gases 09 p1368 A66-20705  
Laminar boundary layer problems for compressible and incompressible fluids 09 p1368 A66-20751  
Onset of turbulence in detached laminar shear layer 09 p1368 A66-20803  
Numerical solution of laminar boundary layer momentum, energy and diffusion differential equations for heat and mass transfer on moving continuous flat surface with injection or suction 10 p1619 A66-21053  
Heat transfer and distribution of velocity, temperature and concentration in laminar supersonic boundary layers with blowing of light gas with desired pressure and heat distribution 10 p1620 A66-21394  
Transition region and amplification factor of unstable disturbances in laminar boundary layers with distributed suction 10 p1522 A66-21408  
Dissociated laminar boundary layer with heterogeneous recombination 10 p1524 A66-21805  
Thickness of laminar liquid film draining from vertical surface analytically determined by assuming evaporation rate is known constant  
[ASME PAPER 65-HT-39] 11 p1785 A66-22189  
Laminar MGD boundary layer on conducting surface in crossed electric and magnetic fields for flow core of constant temperature 11 p1745 A66-22590  
Heat exchange, friction and mass exchange in laminar multicomponent boundary layer during injection of extraneous gases 11 p1688 A66-22591  
Thick laminar boundary layer influence at supersonic speeds and low Reynolds numbers 11 p1634 A66-22933  
Asymptotic expansions to heat-transfer rate for laminar boundary layer flow at small or large Prandtl number 11 p1786 A66-23012  
Book on basic developments in fluid dynamics including numerical solution of problems in gas dynamics, stability of parallel flows, blast wave theory, etc 12 p1861 A66-23806  
Analytical solution for surfaces with longitudinal curvature of larger magnitude than that considered in early forms of boundary layer theory, noting condition for self-similar solutions, main flow, boundary layer equations, etc 12 p1861 A66-23811  
Similar solution of differential equations

for compressible laminar boundary layers in case of insulated walls 12 p1862 A66-23861  
Equation for laminar boundary layer on flat plate in viscous compressible gas flow under chemical relaxation, solved by approximate method in series 12 p1863 A66-24244  
Parametric method of solving equations of laminar boundary layer with longitudinal pressure gradient during equilibrium gas dissociation 12 p1863 A66-24367  
Heat transfer and mass transfer near stagnation point during injection and suction of various gases through blunt body surface 12 p1979 A66-24427  
Transverse flow velocity effect on laminar flow shape stability 12 p1863 A66-24428  
Properties of compressible boundary layers with heat transfer and arbitrary pressure gradients calculated, using integral equation and correlation concept for application in hypersonic flows 12 p1865 A66-24581  
Stability of laminar boundary layers and wakes at hypersonic speeds, noting existence conditions for subsonic disturbances and effect of hot wake core 13 p2061 A66-25165  
Interferometric determination of temperature field compared with exact analytical solutions for laminar boundary layer in case of free convection 13 p2208 A66-25314  
Porous blowing and suction for laminar boundary layer during free convection at vertical surface 13 p2209 A66-25319  
Compressible laminar boundary layer equations solved, noting wall flow and suction problem 13 p2063 A66-25467  
Laminar boundary layer characteristics determined by Howarth and Kochin-Loitianskii methods, using simple quadratures 13 p2066 A66-26487  
Surface roughness effect on laminar-turbulent transition, noting plane flow past isolated cylindrical element in laminar boundary layer 13 p2068 A66-26542  
Properties of laminar boundary layer undergoing surface catalysis with two reactants and two products obeying Langmuir-Hinshelwood mechanism, solving concentration field by integral equation 13 p2019 A66-26663  
Approximate methods of computing heat transfer through laminar boundary layer, considering boundary layer along flat plate and second order effects 13 p1993 A66-26712  
Thermal insulation of surfaces by cold gas injection into laminar compressible boundary layer of air in chemical equilibrium 13 p1993 A66-26730  
Nonequilibrium laminar boundary layer of binary dissociating gas determined by solving nonlinear partial differential equations governing system  
[AIAA PAPER 65-129] 14 p2274 A66-27406  
Finite-difference method for computing transient velocity profiles in laminar boundary layer around two-dimensional cylinder, noting Blasius flow oscillations 14 p2274 A66-27434  
Solution of boundary layer equation for two-dimensional laminar steady motion of viscous incompressible fluid in convergent channel with suction at wall 14 p2276 A66-27728  
Universal laminar boundary layer equations for incompressible fluid and homogeneous and dissociated gases derived, using parametric approximations 14 p2278 A66-28054  
Laminar air flow past porous plate through which fuel and oxidizer mixture is injected, deriving diffusion combustion processes that develop in laminar boundary layer 14 p2371 A66-28318  
Integration of third-order differential equation of laminar boundary layer on porous surface 15 p2477 A66-28777  
Series expansion solutions for shock tube laminar wall boundary layer, taking into account mutual interaction between boundary layer and free stream 15 p2479 A66-29270  
Displacement and heat transfer effects of laminar and turbulent boundary layers far downstream in slowly expanding hypersonic nozzle, determining inviscid core

flow 15 p2424 A66-29273  
Double unsteady laminar boundary layers on solid bodies in presence of oscillating external flow of small amplitude 15 p2480 A66-29686  
Laminar boundary layer of low temperature plasma on isolator walls in channel of MHD generator in presence of transverse magnetic field 16 p2758 A66-30327  
Asymptotic behavior of solutions to equations for laminar boundary layer far from wall 16 p2684 A66-30582  
Laminar boundary layer separation in supersonic flow on body with symmetry of revolution 16 p2629 A66-30583  
Stability of idealized laminar boundary flow, determining phase velocity, amplification rate and wave number of all disturbances 16 p2686 A66-30948  
Interaction of radiation and convection in laminar boundary layer of perfect gas on flat black plate  
[ASME PAPER 65-HT-54] 16 p2828 A66-30988  
Laminar boundary layer in oscillatory flow along infinite flat plate with variable suction 16 p2686 A66-31107  
Hypersonic laminar boundary layer flow of equilibrium dissociating gas 16 p2630 A66-31306  
Laminar boundary theory perturbation solutions modified by formulating perturbation about Blasius solution 16 p2691 A66-31663  
Source type hypersonic free stream effects on flow field about axisymmetric cone, obtaining properties in shock layer, boundary layer, pressure gradient, etc 17 p2837 A66-32080  
Momentum-integration method for laminar boundary layer interactions in rotating flow 17 p2907 A66-32278  
Response of two-dimensional laminar boundary layer to fluctuating free stream or surface oscillation 17 p2908 A66-32443  
Laminar boundary layer on cylinder with symmetric cross section bounded by two equal circular arcs treated by Pohlhausen method 17 p2911 A66-32836  
Laminar boundary layer on cylinder with symmetric cross section bounded by two equal circular arcs 17 p2911 A66-32837  
Electric and magnetic fields effect on three-dimensional laminar boundary layer of conducting fluid near line of intersection of two surfaces 17 p2971 A66-32865  
Mangler rectilinearization of axisymmetric laminar boundary layer flows and Prandtl boundary layer hypotheses, applicability to non-Newtonian fluids 17 p2912 A66-33045  
Laminar boundary layer heat transfer measurements by thick-film calorimeter gauges on flat plate in dissociated and partially ionized air 17 p3039 A66-33483  
Laminar, transitional and turbulent boundary layer flows with adverse pressure gradient on axisymmetric blunted conical flared body at Mach 10  
[AIAA PAPER 66-493] 18 p3047 A66-33658  
Boundary layer problem concerned with effects of radiation absorption and emission for flow of high speed gas over flat plate  
[AIAA PAPER 66-521] 18 p3047 A66-33662  
Step function distribution of heat transfer for laminar supersonic boundary layer described as function of decay factor 18 p3261 A66-34363  
Hartree solution of MHD laminar boundary layer incompressible conducting fluids, specifically considering flow at inlet to semiminfinite flat channel 18 p3147 A66-34636  
Instability of free laminar boundary layer between parallel streams analyzed for incompressible fluid, noting values of Reynolds number 18 p3102 A66-34921  
Hydrogen combustion in air above solid noncatalytic wall heated to 800 degrees C, examining diffusion equation for slow combustion and laminar boundary layer flow over noncatalytic wall 19 p3479 A66-36249  
Laminar boundary layer stability of incompressible fluid at elastic surface 19 p3342 A66-36463  
Finite difference method approach to discontinuity in parabolic equations for shear laminar boundary layer flow of injected gas past wall 19 p3342 A66-36477  
Separation of laminar boundary layer of gas flow from cone as function of angle of

- attack, Mach number, etc 19 p3277 A66-36478
- Flow coefficient of nozzle calculated by thickness of quantity of motion of laminar boundary layer at nozzle 20 p3545 A66-37412
- exit 20 p3545 A66-37412
- General theorems for dissociated and chemically reacting compressible laminar unsteady two-component boundary layers derived, based on Nirenberg maximum principle 20 p3510 A66-37524
- Approximate method of integrating linearized equation for laminar boundary layer to establish relations of velocity distribution with friction 20 p3546 A66-37679
- stress 20 p3546 A66-37679
- Free laminar boundary layer flow between parallel streams of different magnetic fields and temperatures for incompressible viscous fluid 21 p3776 A66-38682
- Free convection boundary layer along isothermal plate, using equation of laminar compressible flow and heat transfer, noting profile dependency upon wall coordinate 21 p3835 A66-38945
- Correlation formulas improvement for laminar shock tube boundary layer for air and argon 21 p3727 A66-39167
- Distribution of specific thermal flux on body surface heated by plasma jet 21 p3793 A66-39411
- Von Karman integral concept for incompressible laminar boundary layers extended to second-order for two-dimensional or axisymmetric flow by generalizing definition of displacement and momentum thickness 22 p3898 A66-40137
- Strouhal number effect on sound-excited laminar-turbulent transition in separated boundary layers formed by round or plane nozzle 22 p3899 A66-40382
- Short duration technique providing simulation of thermodynamic properties and composition of exhaust products of liquid and solid propellant rocket engines [AIAA PAPER 66-760] 22 p3894 A66-40643
- Laminar boundary layer equations solved in presence of nonuniform velocity and enthalpy profiles in initial cross section or on bodies extending to infinity upstream and downstream 22 p3901 A66-40685
- Heat transfer in nonisothermal plate with laminar boundary layer 22 p4000 A66-40822
- Pressure gradient calculation in three-dimensional laminar boundary layer, using method of local similarity 23 p4009 A66-41724
- Laminar boundary layer in incompressible liquid, noting effect of variation of kinematic viscosity and density on stability 23 p4056 A66-41725
- Approximation of self-similar plane and axisymmetric problems for high temperature laminar boundary layer, based on equations for boundary layer of finite thickness for high temperature gas 23 p4149 A66-41783
- Nongray radiation effects on laminar boundary layer of absorbing gas over flat plate, using absorption coefficient with stepwise frequency dependence 23 p4012 A66-41903
- Plaint coatings applied to streamlined bodies to reduce hydrodynamic drag by stabilizing laminar boundary layer against transition to turbulence 23 p4059 A66-41943
- Similar solutions for laminar boundary layer under forced convection of mixture of fluids with constant mass density and temperature and composition dependent parameters for flat plate analysis 23 p4059 A66-42007
- Parametric method in laminar boundary layer theory, noting reduction of equations for incompressible fluid 23 p4059 A66-42008
- Separation point of laminar boundary layer before dihedron, determining conservation of momentum and mass 23 p4013 A66-42010
- Shear flow transition to turbulence and instability phenomena, discussing parallel and laminar flows 23 p4060 A66-42019
- Stability of laminar boundary layers at concave wall with vortex type disturbance introduced by interference baffles 23 p4060 A66-42022
- Flow coefficient of elliptical cylindrical pipe, analyzing boundary layer at exit for various Reynolds numbers, noting velocity profile 23 p4014 A66-42057
- Flat plate laminar boundary layer in supersonic wind tunnel, measuring pressure distribution and profiles and heat transfer rates, noting dissociation fraction effects 24 p4194 A66-42411
- Laminar boundary layer characteristics on continuous moving surface, noting high critical Reynolds number, disturbance amplitude function and energy criterion for stability 24 p4194 A66-42412
- Regular solutions of laminar boundary layer equations near point of vanishing skin friction, calculating pressure gradient 24 p4194 A66-42413
- LAMINAR BOUNDARY LAYER SEPARATION**
- Pohlhausen method applied to shock wave/boundary layer interaction, calculating flow characteristics of laminar separation region 04 p0455 A66-14138
- Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 04 p0512 A66-14220
- Laminar boundary layer behavior of centrifugal impeller blades, discussing exact solution via perturbation technique [ASME PAPER 65-WA/FE-15] 05 p0608 A66-15612
- Separation point position determined for laminar layer on cylindrical surface at various Reynolds numbers 09 p1368 A66-20835
- Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 10 p1523 A66-21469
- Laminar boundary layer behavior of centrifugal impeller blades, discussing exact solution via perturbation technique [ASME PAPER 65-WA/FE-15] 12 p1799 A66-24543
- Laminar boundary layer separated flow of particulate suspension, including Brownian diffusion, jet flow, etc 14 p2275 A66-27561
- LAMINAR FLAME**
- Laminar diffusion flame occurring in mixing zone between undiluted fuel and undiluted oxidizer by process of molecular diffusion 03 p0443 A66-12489
- Laminar flame speeds predicted by Spalding formulation in stoichiometric mixtures with nonnormal diffusion 03 p0443 A66-12490
- Burning modes in initially unmixed reactants, describing stagnation region formation by interaction of opposed flows of fuel and oxidant [AIAA PAPER 66-71] 06 p0969 A66-16258
- Time dependent stability of one-dimensional laminar flames with distributed heat losses 10 p1621 A66-21809
- Effect contributing to laminar flame stability with surface variations 14 p2410 A66-26780
- Laminar and turbulent diffusion flame combustion mechanisms, stabilization, flame ionization, Bunsen burner, fuel gas jet eddy diffusion, etc 15 p2616 A66-29068
- Plasma behavior in laminar and turbulent hydrocarbon-air flames, discussing flame ionization, electron concentration and recombination, detonation wave ionization data, ignition, etc 18 p3143 A66-34027
- LF self-vibrations of laminar diffusion flames in axial mode at frequencies corresponding to fuel system natural frequencies [WSCF 66-30] 18 p3263 A66-34414
- Stability analysis of one-dimensional steady laminar flame propagation with conductive heat loss 20 p3680 A66-38045
- LAMINAR FLOW**
- Laminar flow through parallel and uniformly porous walls of different permeability 01 p0057 A66-10425
- Interaction of two identical spheres falling freely in viscous fluid under laminar flow conditions 01 p0058 A66-10487
- Transfer of heat or nonstationary mass in circular cylindrical laminar flow tube 01 p0166 A66-11086
- Inlet region of laminar meridional flow in arbitrarily shaped narrow gap between two axisymmetrically formed walls 02 p0217 A66-11585
- Heat transfer and friction for laminar flow of gas in circular tube at high heating rate, using finite difference method 02 p0304 A66-12198
- Nonisothermal wall problem for vertical right circular cone in laminar free convection for fluids with low Prandtl numbers 02 p0305 A66-12200
- Rheology of liquids discussing viscometers, models for prediction and industrial and biological application 03 p0355 A66-12601
- Hypersonic laminar near wake of blunt bodies considered in terms of dual region model [AIAA PAPER 65-52] 03 p0315 A66-12789
- Combustion and sublimation in aerothermochemical interaction between dissociated air stream and graphite surface in hypersonic laminar viscous flow [AIAA PAPER 65-42] 03 p0444 A66-12797
- Stabilization of laminar conducting fluid flowing down inclined plane in transverse magnetic field 03 p0356 A66-12946
- Laminar stability of incompressible and stationary flows with curved streamlines, applying integral method and noting time dependence of flow 03 p0357 A66-13089
- Viscous dissipation effect on temperature profile in thermal entrance region between parallel plates, considering flow laminar and velocity profile developed 03 p0358 A66-13092
- Extremal concentrations in laminar flow of incompressible viscous liquid along tube of constant cross section, noting recombination reactions 04 p0597 A66-13695
- Laminar and turbulent flow in eccentric annular ducts compared 04 p0511 A66-13938
- Laminar flow development of incompressible Newtonian fluid in hydrodynamic entrance region of flat duct 04 p0511 A66-13939
- Hydrodynamic behavior of mercury in laminar and turbulent flow in tube, discussing effect of vacuum and protective gas 04 p0511 A66-14185
- Convective mass exchange in heterogeneous chemical reactions in laminar flow along wall 04 p0597 A66-14186
- Laminar flow stability of layer of viscoelastic fluid flowing down infinite inclined plane under action of gravity 04 p0512 A66-14428
- Laminar flow in two-dimensional channel with uniformly porous walls through which fluid is uniformly injected 05 p0662 A66-15057
- Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions [ASME PAPER 65-WA/APM-5] 05 p0663 A66-15428
- Heat pipes as heat removal systems in space thermionic power supplies, discussing laminar, turbulent flow and heat transfer efficiency 05 p0789 A66-15542
- Heat transfer and velocity characteristics of thermal and hydrodynamic laminar flow in ducts of arbitrary cross section, considering boundary conditions at wall [ASME PAPER 65-WA/HT-13] 05 p0790 A66-15650
- Nonsimilar boundary layer flow and heat transfer of cone rotating in forced flow [ASME PAPER 65-WA/HT-31] 05 p0608 A66-15674
- Local heat transfer coefficients in nozzle under conditions of cold-wall low density high speed laminar flow 05 p0609 A66-15774
- MHD boundary layer equations with explicit solutions for longitudinal field in plane stationary incompressible laminar flow 06 p0920 A66-17007
- Convective heat transfer in thin rectangular channels commonly found in nuclear reactor fuel assemblies 07 p1148 A66-17299
- Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 07 p1020 A66-17889
- Mass transfer method for measuring skin friction from isothermal adiabatic leading-edge flat plate in compressible laminar airflow with negligible pressure gradient 07 p0980 A66-17943
- Electron diffusion in mutually perpendicular static electric and magnetic fields based on stability of laminar flow 07 p1081 A66-17953

Wall jet on rotating disk totally immersed in fluid, with derivation of laminar flow velocity profiles 07 p0981 A66-18047

Heat transfer and stability of laminar hypersonic separated flow around annular cavity conical model 07 p0981 A66-18117

Tube gas flow theory applicable to laminar flow, slip flow, transition region of flow and free molecular flow 07 p1023 A66-18131

Performance of air Tesla turbine for various flows investigated by differential equation of motion 08 p1161 A66-18824

Electron conservation equation and effects of laminar or turbulent flow on breakdown in gases 08 p1206 A66-18933

Book on two-dimensional laminar boundary layers with and without suction noting velocity profile role, wind tunnel models, transition measurements, etc 08 p1208 A66-19355

Adiabatic laminar flow in concentric sleeve seal where rotating shaft changes fluid temperature and viscosity [ASLE PREPRINT 65AM 4C3] 08 p1232 A66-19382

Laminar circulation and thermal equilibrium in stars generated by nonspherical perturbations 09 p1448 A66-20096

Forced convection problem for steady fully-developed laminar flow in straight channel when fluid properties are functions of temperature 09 p1366 A66-20175

Heat transfer in laminar flow between parallel porous walls with discontinuous change in wall temperature 09 p1470 A66-20176

Laminar fully-developed flow of water between parallel flat plates examined, using motion equation with experimental values for viscosity, conductivity, specific heat and density 09 p1470 A66-20179

Interaction of two identical spheres falling freely in viscous fluid under laminar flow conditions 09 p1367 A66-20701

Parameter estimation for laminar conical flow of viscous inelastic non-Newtonian fluids 10 p1521 A66-21056

Mathematical model of flame propagation in laminar and turbulent flow 10 p1619 A66-21072

Pressure drop and heat transfer to Newtonian fluids in cooled pipes for laminar flow, establishing empirical correlation 10 p1620 A66-21272

Electrical conduction behavior of laminar arc-heated flow in contact with cooled anode, noting anode current parameters [AIAA PAPER 66-188] 10 p1561 A66-21435

Friction factors and mean electrical conductivity for argon arc plasma flow, examining laminar-turbulent flow modes [AIAA PAPER 66-189] 10 p1561 A66-21436

Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions [ASME PAPER 65-WA/APM-5] 10 p1523 A66-21471

Velocity overshoot within boundary layer in alternating laminar air flow near mouth of square channel 10 p1524 A66-21827

Combined free and forced laminar convection heat transfer inside inclined circular tubes of varying position [ASME PAPER 65-WA/HT-3] 11 p1785 A66-22191

Mean and dynamic skin friction, separation and transition in low-speed laminar and turbulent flow measured by thin-film heated element 11 p1693 A66-23013

Mechanical flow processes and variational methods based on fluctuation theory, noting relations on minimum entropy production, two-dimensional laminar flow of incompressible fluid, etc 12 p1975 A66-23543

Elgensolutions for laminar flow in porous two-dimensional channel subject to certain boundary conditions 12 p1862 A66-23994

Asymptotic series solution to problem of laminar film condensation on nonisothermal vertical plate, considering inertia and convection effects 12 p1978 A66-23996

Liquid film flow stability, considering two-dimensional perturbations, hydrodynamic friction with allowance for finite curvature radius of bounding surface 12 p1864 A66-24435

Mixing of laminar viscous incompressible

jets expelled from equally spaced holes in vertical wall, obtaining solution by using Navier-Stokes equation 12 p1864 A66-24444

Laminar hypersonic flow past sphere based on constant-density approximation, solving Navier-Stokes equations and comparing with values of shock Reynolds number 12 p1800 A66-24943

Transition from laminar to turbulent flow, establishing critical Reynolds number of 2223 for steady pipeflow 13 p2069 A66-26702

Laminar fluid flow of two-phase ideally viscous medium between two parallel surfaces 13 p2072 A66-26766

Hypersonic wake studies in ballistic missile research program, discussing reentry of hypervelocity vehicles, laminar flow, atmospheric turbulence, etc 14 p2218 A66-27402

Laminar ducted flow of viscous electrically conducting fluid under uniform arbitrarily oriented magnetic field for rectangular duct with nonconducting walls 14 p2342 A66-27407

Effect of instantaneous change in viscosity on laminar vortex of flow through suddenly widening pipe 14 p2277 A66-27933

Oscillating laminar separated flow formed ahead of forward facing step oscillating transversely to hypersonic free stream, noting phase differences between separation point movement and that of step 14 p2221 A66-28110

Laminar fluid flow in channel generated by arbitrary generatrix, allowing for interaction between boundary layer and flow core, calculating boundary layer 14 p2278 A66-28316

Laminar flow of incompressible fluid in rectangular channel, determining temperature distribution over channel cross section and thermal flux through wall for case of energy dissipation 14 p2415 A66-28317

Two-dimensional laminar MHD flow in convergence channel with uniform input, finding effect of flow convergence on boundary development for arbitrary magnetic field induction 15 p2549 A66-28638

Three-dimensional viscous free mixing, describing numerical and experimental solutions for wake and jet flows [AIAA PAPER 65-49] 15 p2424 A66-29272

Mixing of free jet boundary which includes laminar and turbulent flow region in tandem 16 p2685 A66-30805

Laminar steady motion transition to turbulent flow in systems described by hydrodynamic equations, including small amplitude steady periodic motion analysis 16 p2689 A66-31512

Laminar electrohydrodynamic flow in plane diffusor, taking into account molecular diffusion of space charge 17 p2969 A66-32544

MHD approximation of laminar duct and channel flow of electroconductive viscous Newtonian fluid 17 p2971 A66-32861

Self-similar solutions of two-dimensional laminar flow of incompressible electroconductive fluid in channel in crossed electric and magnetic fields, using Jacobi elliptic integrals 17 p2971 A66-32866

Gravitational stability of laminar liquid layer flowing down inclined plane and heated from below 17 p2914 A66-33172

Laminar flow velocity field and pressure distribution in inlet region of rectangular ducts [ASME PAPER 66-FE-7] 17 p2914 A66-33261

Approximate solution of boundary layer problems by variational techniques, using multiparameter approach 18 p3096 A66-33594

Fully developed laminar incompressible flow in stepped rectangular channel, with velocity profiles obtained by variational method 18 p3097 A66-33596

Laminar steady incompressible nonuniform flow in rectangular duct, stream tube and pipe 18 p3099 A66-34124

Critical parameters and flow characteristics of swept wings with full-chord laminar flow, noting boundary layer disturbance effects 18 p3050 A66-34950

Interface propagation in mixed laminar-turbulent flow between counter-rotating concentric cylinders, noting spiral turbulence as dominant feature of Couette flow transition 20 p3547 A66-37979

Distortion of laminar circular Couette flow measured by end effects, noting two-

dimensional tangential motion near axial plane of symmetry 20 p3547 A66-37980

Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 21 p3723 A66-38686

Quantities and relations for describing two-phase flows, kinematics and kinetics of both phases of laminar pipeflow 21 p3724 A66-38933

Sufficient conditions for instability against small oscillations of symmetric laminar flow of inviscid incompressible perfect magnetofluid 21 p3791 A66-39169

Vector equations of steady incompressible viscous flow in absence of extraneous forces, discussing Beltrami flow, doubly laminar flow and plane flow 21 p3728 A66-39435

Pressure distribution in laminar flow between parallel disks, noting inertia effects 21 p3729 A66-39439

Heat transfer in laminar flow of Bingham material through circular pipe, taking into account dissipation effect 21 p3836 A66-39441

Steady laminar flow of viscous incompressible fluid through two-dimensional channel with fluid sucked or injected with different velocities through uniformly porous parallel walls 21 p3730 A66-39461

Laminar forced-convective heat transfer for dissipative fluid in tube bounded by concentric circles 21 p3837 A66-39610

Pitot tube technique for measuring velocity profiles, using Bernoulli equation in stress measurement in laminar viscoelastic flow 22 p3898 A66-40010

Model of laminar hypersonic base flow region of slender bodies, introducing base height and Reynolds number variation of base pressure ratio 22 p3843 A66-40345

Gaseous dispersion in laminar flow through circular tube with mass transfer to retentive layer 22 p3900 A66-40411

Heat transfer in entrance section in rectangular duct for incompressible fluid in laminar pulsating flow with periodic pressure gradient 23 p4148 A66-41216

Laminar shock layer structure in which streamlines retain appropriate momentum calculating exhaust plume structure for rocket nozzle 23 p4012 A66-41921

Temperature distribution of laminar channel flow with tangential stress and wall temperature 24 p4294 A66-42720

Secondary steady or periodic flow generation from stability loss by laminar flow of viscous incompressible fluid, noting nonuniqueness of solution 24 p4195 A66-42840

Laminar flow of fluid with varying viscosity in tube with walls at constant temperature, analyzing equations of motion and equations for conservation of energy 24 p4197 A66-42991

Generalization of experimental data on hydraulic resistance in tubes with ribbon turbulizers for laminar flow with macrovortices and turbulent flow 24 p4198 A66-43223

**LAMINAR FLOW AIRFOIL**

Drag reduction for sailplanes, investigating adoption of laminar foil section 01 p0008 A66-11097

Preventing turbulent contamination of laminar flow on highly swept wings by attaching bump on leading edge 06 p0801 A66-15998

Laminar profile characteristics affected by wind tunnel flow turbulence 07 p1018 A66-17857

**LAMINAR FLOW CONTROL**

Laminar flow control /LFC/, aircraft performance benefits include increased endurance, loiter time and cruise altitude 18 p3050 A66-34948

Flight testing of laminar flow control on X-21 aircraft, noting degradation of laminar performance in proximity of clouds or atmospheric turbulence, feasibility, handling, etc 18 p3050 A66-34949

Aerodynamic design criteria for maintaining laminar flow control including instability limit, surface roughness, acoustical environment, etc 18 p3050 A66-34951

Optimum high payload laminar flow control aircraft offer 20 to 25 percent range improvement, indicated by design studies of

- large logistics aircraft 18 p3053 A66-34952  
Flight testing of laminar flow control on full-scale swept wings, examining total pressure probes, wing wake drag and boundary layer stability utilizing pressure transducer [AIAA PAPER 66-734] 22 p3846 A66-40625
- LAMINAR HEAT TRANSFER**  
Transfer of heat or nonstationary mass in circular cylindrical laminar flow tube 01 p0166 A66-11086  
Heat transfer by laminar forced convection for dissipative fluid in annulus calculated, using complex variable method 04 p0598 A66-14211  
Limiting relative laws of friction and heat transfer applicable to nonisothermal gas flow with finite Reynolds numbers 04 p0598 A66-14440  
Spectral dynamics of laminar convection, discussing transformation of Benard convection problem into spectral domain 04 p0599 A66-14472  
Free convection on laminar forced flow heat transfer in horizontal circular tube [ASME PAPER 65-HT-23] 05 p0783 A66-14744  
Laminar flow heat transfer in polygonal ducts, covering analog solution by Moire and point matching method [ASME PAPER 65-HT-27] 05 p0784 A66-14746  
Laminar boundary-layer heat transfer and shear stress predictions from similarity solutions, emphasizing large free-stream velocity gradients and highly cooled walls [ASME PAPER 65-HT-62] 05 p0786 A66-14763  
Quasi-linearization solution of two-component laminar compressible boundary layer with heat transfer on ablating wall [ASME PAPER 65-WA/HT-41] 05 p0792 A66-15667  
Laminar heat transfer and pressure distribution in open cavity supersonic flow, noting heat-transfer coefficient [ASME PAPER 65-WA/HT-37] 05 p0808 A66-15670  
Laminar heat transfer in inlet tube, determining velocity and temperature distribution [ASME PAPER 65-WA/HT-36] 05 p0792 A66-15671  
Nonsimilar boundary layer flow and heat transfer of cone rotating in forced flow [ASME PAPER 65-WA/HT-31] 05 p0608 A66-15674  
Stagnation point heat transfer for binary pair diffusion model including dissociation and ionization 05 p0665 A66-15775  
Reference-point results applied to variations in laminar heat transfer to total vehicle over range of vehicle attitudes and associated trajectories [AIAA PAPER 66-28] 07 p0980 A66-17890  
Thermal laminar boundary layer formation on semilinear isothermal plate during uniform motion in viscous incompressible fluid over Prandtl number ranges 08 p1206 A66-18874  
Heat exchange, friction and mass exchange in laminar multicomponent boundary layer during injection of extraneous gases 09 p1368 A66-20705  
Local boundary layer approximations of first order for steady laminar convection flow produced by nonuniform axisymmetric heating or cooling of infinite horizontal surface 10 p1620 A66-21276  
Heat exchange, friction and mass exchange in laminar multicomponent boundary layer during injection of extraneous gases 11 p1688 A66-22591  
Laminar free convection flow and velocity and temperature distributions in air above thin horizontal electrically heated wire 12 p1980 A66-24906  
Mars atmospheric composition and laminar convective heating and ablation studied to predict performance of heat protection systems during entry 13 p2208 A66-25274  
Unsteady laminar forced and free convection in coaxial sector tubes in presence of constant axial temperature gradient, accounting for oscillation and resonance 13 p2210 A66-26719  
Heat and mass transfer process in reacting boundary layer of compressible gas in laminar flow along semilinear porous plate 14 p2416 A66-28484  
Free convection on laminar forced flow heat transfer in horizontal circular tube [ASME PAPER 65-HT-23] 16 p2828 A66-30983  
Laminar flow heat transfer in polygonal ducts, covering analog solution by Moire and point matching method [ASME PAPER 65-HT-27] 16 p2828 A66-30985  
Text on convective heat and mass transfer for first-year graduate students in mechanical, nuclear and aeronautical engineering 16 p2829 A66-31315  
Heat transfer of forced laminar convection in multiply connected regions 16 p2830 A66-31708  
Approximation method for compressible laminar heat transfer to blunt axisymmetric bodies in high speed flow 18 p3048 A66-33824  
Electromagnetic field effect on heat transfer during laminar flow of electrically conducting incompressible fluid in flat channel 20 p3607 A66-36980  
Integral solution of laminar film condensation with combined gravitational-type body force and forced convection concurrent and parallel to surface 20 p3678 A66-37118  
Laminar forced convection heat transfer to gas from circular tube, achieving boundary condition of uniform heat flux 20 p3679 A66-37508  
Calculation of heat transfer in laminar flows of structurally viscous fluids in tubes with constant thermoconductivity, heat capacity and density 20 p3681 A66-38122  
Regression rate for gas-solid hybrid motor described by convective heat transfer feedback mechanism through laminar sublayer [AICE PREPRINT 34B] 22 p3970 A66-39876  
Laminar boundary-layer heat transfer and shear stress predictions from similarity solutions, emphasizing large free-stream velocity gradients and highly cooled walls [ASME PAPER 65-HT-62] 22 p3997 A66-40024  
Laminar heat transfer in plane channel with nonuniform temperature field at inlet 22 p4000 A66-40812
- LAMINAR JET**  
Velocity distribution in laminar viscous liquid-into-liquid jet 01 p0057 A66-10407  
Comparison of Landau and Schlichting solution for laminar submerged jet discharging from infinitely thin pipe 04 p0512 A66-14439  
Laminar and turbulent MHD free jet, using Peskin analysis 05 p0721 A66-14719  
Book on motions of viscous incompressible fluids, covering laminar and turbulent jets and solutions, based on exact Navier-Stokes equations 06 p0872 A66-16562  
Asymptotic derivation for viscous decay of wake behind plane plate in fluid with power law 07 p1019 A66-17841  
Magnetic forces effect on laminar wall jet of electrically conducting incompressible fluid of constant properties 12 p1796 A66-23594  
Laminar jets in nitrogen from DC plasma torch analyzed, using schlieren and spectroscopic techniques, noting jet form dependency on Reynolds number 14 p2344 A66-27849  
Diffusion combustion in laminar boundary layer between two plane-parallel co-current streams 14 p2416 A66-28485  
Laminar to turbulent transition in free jets 15 p2424 A66-29303  
Laminar argon arcjet mixing with coaxial flow of cool helium, considering turbulent characteristics and heat transfer [AIAA PAPER 65-587] 17 p3033 A66-32442  
Velocity distribution in laminar plasma jet determined from energy equation and spectroscopic measurement of temperature distribution 17 p2967 A66-32459  
Navier-Stokes equations, differences for laminar jets and turbulent jets, submerged jets and transition layer 18 p3099 A66-34123  
Similarity solutions of heated two-dimensional laminar free jets with arbitrary Prandtl number and nonlinear viscosity-temperature energy dissipation relationships 18 p3103 A66-34932  
Acoustic sensitivity and logic circuitry of fluidic turbulence amplifiers for application to laminar jet streams 18 p3056 A66-35012  
Turbulence amplifier developed as pure fluid amplifier and logic element in which laminar jet is directed at mouth of collector tube and pressure at any input causes turbulence, reducing output to zero 20 p3501 A66-37653  
Laminar incompressible axisymmetric free jet with swirl, examining perturbation scheme for stream function and asymptotic series 21 p3729 A66-39453  
Plane laminar jet of incompressible conducting fluid propagating homogeneous magnetic field at magnetic Reynolds number 24 p4196 A66-42872
- LAMINAR MIXING**  
Inviscid stability of laminar mixing of two parallel streams of compressible fluid with respect to three-dimensional wavy disturbances 02 p0218 A66-11955  
Two-dimensional isoenergetic compressible mixing of jet with fluid at rest for laminar and turbulent mixing 12 p1795 A66-23572  
Laminar mixing of two parallel streams of compressible fluid stability with respect to supersonic disturbances 22 p3900 A66-40385  
Laminar gas jet mixing as affected by periodic vorticity produced by mechanical vibration of orifice 23 p4055 A66-41497  
Similar solution of laminar mixing of curved half-jet and curvature effect of boundary layer flow along curved surface 23 p4059 A66-42003
- LAMINAR WAKE**  
Incompressible laminar axisymmetric near wake behind very slender cylinder in axial flow 02 p0175 A66-11527  
Relationship of laminar wake width to wake transition distance for cones 02 p0175 A66-11561  
Stagnation temperature measurement in laminar wakes behind wedge and cone in hypersonic shock tunnel, noting effect of Reynolds number variation [AIAA PAPER 65-53] 03 p0315 A66-12790  
Wake from bluff bodies interaction with initially laminar boundary layer [AIAA PAPER 66-126] 06 p0875 A66-17096  
Aerodynamic characteristics of wakes behind hypervelocity bodies [AIAA PAPER 66-53] 08 p1162 A66-18952  
Stability of plane inviscid jet and wake studied for possible growth in downstream spatial direction 12 p1865 A66-24582  
Laminar viscous wake interaction with supersonic external inviscid flow downstream treated by implicit finite difference method [AIAA PAPER 66-454] 16 p2689 A66-31468  
Base, recompression and laminar near wake regions of cones in hypersonic flow 17 p2838 A66-32438  
Static enthalpy and velocity profile within viscous wake of circular cylinder at Mach 20 18 p3049 A66-34582  
Interaction between hypersonic wake flow and aerodynamic deployable decelerator, predicting pressure and heat transfer of decelerator 22 p3846 A66-40605  
Diameter and location of wake neck and trailing wake shock for pointed and blunt slender hypersonic cones 23 p4012 A66-41919
- LAMINATE**  
**SA MULTILAYER STRUCTURE**  
Printed circuit laminate measilng, definition, origin, effects and control 11 p1664 A66-22673  
Multilayer circuit laminate fabrication and comparison of glass-base laminates with phenolic-paper-base and epoxy-paper-base grades 11 p1664 A66-22675  
Prestressing effect on fiber alignment and strength of glass fiber laminates 24 p4289 A66-42338
- LAMINATED MATERIAL**  
Modification of Ritz equations for natural frequencies of homogeneous isotropic plates to apply to natural frequencies of laminated panels 01 p0149 A66-10150  
Physical properties of 181 glass cloth laminates of diallyl orthophthalate and isophthalate in high temperature range 02 p0248 A66-11689  
Thin copper clad laminates and problems arising in application to multilayer printed circuit boards 03 p0347 A66-13330  
Curves relating loss factor, characteristic mode value and frequency parameter for designing damped sheet laminates 05 p0687 A66-14992  
Vibrational characteristics, natural

frequencies and associated composite loss factor of finite-length laminated beam with alternate elastic and viscoelastic layers [ASME PAPER 65-WA/APM-1] 05 p0776 A66-15425

Vibrational characteristics, natural frequencies and associated composite loss factor of finite-length laminated beam with alternate elastic and viscoelastic layers [ASME PAPER 65-WA/APM-1] 10 p1616 A66-21483

Strength of structural composites of orthotropic materials with arbitrary thickness and orientation including lamination and anisotropy effects [AIAA PAPER 65-75] 10 p1617 A66-21781

Nonmonotonicity in sensitivity test data, noting results of liquid oxygen impact tests on Mylar-aluminum-Mylar laminate bonded to polyester foam 12 p1958 A66-23648

Strain gauge load measuring transducer operating in bending mode and based on elastic properties of epoxide glass fabric laminate 12 p1884 A66-24985

Impact fracture toughness of brazed laminates of maraging steels and titanium alloys found to be 2 to 7.8 times greater than homogeneous specimens of like size [AIAA PAPER 65-566] 19 p3377 A66-35620

Plastic laminates use for ablation shields, noting importance of heat flow and comparison of thermal screens 22 p3938 A66-40417

High temperature structural properties of glass fabric-reinforced polybenzimidazole, polyimide and phenolic laminates for aerospace application 23 p4083 A66-41389

Laminated reinforced plastics used in construction of jettisonable fuel tank, aircraft equipment components, radomes, missiles and satellite parts 23 p4074 A66-41654

Laminated structure with dominant displacement from reference point for solid medium working beyond elastic limit 23 p4144 A66-41969

**LAMP**

SA ARC LAMP

SA ELECTROLUMINESCENT LAMP

Demountable high-power xenon arc lamp with replaceable silica discharge tube 08 p1168 A66-19296

Low-pressure mercury vapor lamp for interferometric and spectrometric work, noting electrodes, main discharge tube, electrical circuit, etc 10 p1538 A66-22059

**LAND**

S EARTH

**LANDAU DAMPING**

Static force factor introduced into kinetic longitudinal plasma oscillation equation, noting Landau damping factor 03 p0397 A66-12382

Resonance and response characteristics of unbounded one-dimensional plasma immersed in nonuniform static field 03 p0400 A66-12951

Plasma waves propagating transverse to uniform external magnetic field discussing electron motion, wavelength magnitude, frequencies and application of results 03 p0406 A66-13358

Plasma resonance of cylindrical plasma in absence of magnetic field noting conductivity kernel, scattering of radiation, nonuniformity of plasma sheath and Landau damping 04 p0474 A66-13425

Laminar Landau collisionless damping of finite amplitude disturbances in collision-free plasmas 05 p0727 A66-15257

Landau solution of plasma oscillation problem, discussing dielectric function, Lorentzian distribution and cut-off distribution 08 p1280 A66-18536

Equivalence of oscillating electric field on plasma boundary, with specularly reflecting bounding wall, to unbounded plasma with planar oscillating grid at wall position 08 p1261 A66-18546

Quantum statistical electromagnetic wave propagation and relativistic damping effects in uniformly magnetized electron-positron gas 08 p1187 A66-19809

Landau damping and velocity Fourier transform of initial perturbation in longitudinal plasma oscillations 10 p1567 A66-21817

Hydrodynamic approximation of interaction

between charged particle beam and plasma confined by ideally conducting sheath 13 p2139 A66-25389

Landau damping of transverse oscillations in collisionless plasma at ion cyclotron resonance and collisional damping in zero-temperature plasma 13 p2142 A66-25706

Cross section for inelastic scattering of electromagnetic radiation by electron density fluctuations in anisotropic solids, using laser sources, investigating Landau and collision damping of plasmons 13 p2132 A66-26153

Transverse reluctance of bismuth telluride in pulsed magnetic fields revealing fine structure of Shubnikov-De Haas oscillations interpreted as spin-splitting of Landau levels 16 p2786 A66-31695

Gravitational instability of magnetoplasma in radial electric field, noting resistive drift modes, stabilization criterion effect of Coriolis force, Landau damping, etc 17 p2966 A66-32425

Landau damping in inhomogeneous plasmas indicated by solution of Vlasov equation 18 p3150 A66-34936

Verification of Landau theory that longitudinal electron waves in plasma of finite temperature are damped even in absence of collisions 19 p3416 A66-36522

Drift-wave instability in weakly inhomogeneous fully ionized plasma confined in strong magnetic field in Q machine 19 p3416 A66-36523

Electrostatic-wave propagation in collisionless plasma, noting Landau damping 19 p3432 A66-36760

Electrostatic wave dispersion characteristics in one-dimensional plasma exhibiting Landau damping 19 p3432 A66-36761

Reversible property of Vlasov equation describing thermalization of electron beam in plasma and Landau damping, noting entropy is constant in nonlinear approximation 20 p3608 A66-37460

Asymptotic time behavior of longitudinal waves in one-dimensional plasma of relativistic electrons and stationary ions studied, using collisionless Boltzmann equation 21 p3775 A66-39189

Landau damping of longitudinal electron plasma waves in finite-diameter uniform-density cylindrical plasma, assuming Maxwellian velocity distribution 22 p3955 A66-40104

SA RUNWAY

Landing task and pilot acceptance of displays for landing in reduced weather minimums [AIAA PAPER 65-722] 03 p0328 A66-12579

Airborne navigation and flight-control equipment for reducing weather minimums to lowest possible level 06 p0907 A66-16427

Direct lift control as landing approach aid by providing more rapid means of changing and controlling flight path than conventional methods [AIAA PAPER 66-14] 08 p1167 A66-18985

Optimum antenna requirements for radio-slope guidance system and vertical control in blind landing procedures 08 p1254 A66-19833

Radio augmented and calibrated inertial navigation equipment and operation 10 p1554 A66-21898

Head-up display system as aid in bad-weather landing 17 p2951 A66-33199

Bendix microvision head-up display system all-weather landing aid 17 p2952 A66-33201

Head-up display systems, discussing state of the art and arguments in favor of their use 17 p2952 A66-33202

Blind landing equipment, discussing type 191 collimator unit tested on Caravelle aircraft 17 p2952 A66-33203

Pilot performance and problems arising during transition from instrument to visual flight in landing approach with low visibility 17 p2952 A66-33204

TALAR, tactical aircraft landing aid-radio, uses ground-based Cassegrain antenna, magnetron transmitter and 4-lb receiver in aircraft while providing ILS functions 20 p3596 A66-37232

**LANDING DEVICE**

Rotor recovery system for spacecraft landing 08 p1303 A66-1882

Onboard equipment designed for transport aircraft landings with visibilities less than 200 ft and runways less than 2600 ft, having all devices duplicated 10 p1554 A66-21368

Unmanned planetary probe and lander capsule design, emphasizing Mars lander capsules 16 p2808 A66-30366

**LANDING GEAR**

SA AIRCRAFT TIRE

SA AIRFRAME

SA FAIRING

Cause and elimination of vertical oscillations of aircraft landing gear system in motion of aircraft over unpaved airfield 01 p0011 A66-10470

Landing gear with one to eight wheels, weight, wheel well volume and allowable traffic on heavy airplanes, noting flexible pavement design and tire pressure [SAE PAPER 650799] 01 p0053 A66-10815

Soft and rough airfield landing gears, discussing ground flotation and shock absorbers for aircraft of several sizes [SAE PAPER 650844] 01 p0011 A66-10834

Analytical landing simulation to analyze dynamic loads and aircraft response, particularly high sink speed landing gear [SAE PAPER 650845] 01 p0011 A66-10835

Landing gear design challenges for V/STOL service XC-142A and relative success or failure [SAE PAPER 650843] 01 p0012 A66-10848

Statistical analysis of dynamic system response used to design aircraft undercarriage systems [AIAA PAPER 65-710] 01 p0013 A66-10947

C-5A aircraft design load criteria for landing gear of large aircraft that must operate from semi-improved airfields [AIAA PAPER 65-711] 01 p0013 A66-10948

Airport pavement roughness data and aircraft response data evaluated to determine pavement design and construction criteria [AIAA PAPER 65-712] 01 p0055 A66-10949

British Lockheed undercarriage and hydraulic system for German HFB 320 Hansa aircraft 04 p0458 A66-13932

Aircraft landing gear designs in past 12 years 05 p0611 A66-15134

XB-70 landing gear inspection, describing hydraulic jack used 06 p0869 A66-16793

Design of landing gear for military cargo aircraft and supersonic transports 07 p0985 A66-17255

Two-stage /descent and ascent/ Lunar Excursion Module control system for landing gear, ascent stage, liftoff from lunar surface, etc 07 p1140 A66-17280

Design trends in landing gear for medium- and short-range jet transports 07 p0987 A66-17286

Aircraft landing gear design, evaluating undercarriage of research aircraft and weapons systems 07 p0987 A66-17359

British and French VTOL landing gear design, describing unique SConc fixed-wing VTOL aircraft 08 p1167 A66-18627

Aircraft landing gear design and maintenance, noting elimination of sharp corners and radii, weldability criterion, joints, part identification, bushings, etc 10 p1482 A66-21135

Modern landing gear design as function of aircraft type and size 13 p1997 A66-25499

Concorde aircraft front and rear auxiliary landing gear noting geometry, steering and anti-shimmy control, etc 16 p2633 A66-30317

Airport pavement roughness data and aircraft response data evaluated to determine pavement design and construction criteria [AIAA PAPER 65-712] 16 p2683 A66-31590

- Landing gears and operation illustrated in modern aircraft 16 p2635 A66-31681
- Main landing gear design for Concorde SST 17 p2846 A66-32950
- Air cushion landing gear for aircraft, noting rubber tubing under fuselage forming pneumatic bumper blown up by turbine engine 17 p2848 A66-33082
- P-3 tricycle landing gear assembly, examining mechanical and hydraulic mechanisms for brakes and steering, using graphic charts 19 p3279 A66-36059
- Maraging steels for landing gear forgings, noting fabrication, distortion and fatigue tests 21 p3751 A66-39237
- Airframe and landing gear of Beagle B.206 series II low-wing monoplane of all-metal stressed skin construction 22 p3848 A66-39687
- LANDING MODULE**
- SA LUNAR LANDING MODULE
- SA MARS EXCURSION MODULE /MEM/
- Model tests for determination of structural response of Apollo command module to water impact 14 p2393 A66-28020
- Next-generation lunar transports for multimanned crew landing [SAE PAPER 660443] 17 p3017 A66-33158
- Electric power generator selection for Mars probe/lander 23 p4020 A66-41748
- LANDING SIMULATION**
- Analytical landing simulation to analyze dynamic loads and aircraft response, particularly high sink speed landing gear [SAE PAPER 650845] 01 p0011 A66-10835
- Lunar landing research vehicle used for simulated lunar landings on Earth 04 p0585 A66-13636
- Man, system and vehicle simulation program for landing and docking phases of Apollo lunar landing mission 08 p1202 A66-18577
- Full-scale and model test for dynamic effects of LEM landing 14 p2393 A66-28019
- Human reaction to simulated landing impact overload, including analysis of EKG, kinetocardiogram, blood pressure and respiration data 15 p2443 A66-29445
- Dynamic and steady state flow disturbances encountered by aircraft during carrier landing approach in water tunnel simulation study [AIAA PAPER 65-332] 16 p2634 A66-31319
- Landing run and taxiing problems in very low visibility 17 p2952 A66-33206
- Pilot dynamic response in bank angle control maneuver simulation of sidewind landing of aircraft [ICAS PAPER 66-14] 22 p3945 A66-40672
- Full-scale and model test for dynamic effects of LEM landing 24 p4283 A66-42771
- LANDING SITE**
- SA LUNAR LANDING SITE
- Military STOL and conventional civil aircraft behavior on rudimentary airstrips 18 p3051 A66-33686
- Technological approaches to use of aircraft on undeveloped or semideveloped field from standpoint of load and terrain roughness 18 p3051 A66-33937
- Engineering constraints involved in selection of Martian landing site for lander vehicles 18 p3232 A66-34367
- LANDING SPEED**
- Discrete control signal effect on lateral motion of aircraft landing in presence of correction, considering slideslip equation 23 p4089 A66-41355
- LANDING SYSTEM**
- SA AUTOMATIC LANDING SYSTEM
- SA INSTRUMENT LANDING SYSTEM
- Advanced integrated landing system /AILS/ consisting of azimuth and elevation ground station, ground display site and airborne unit, emphasizing scanning-beam technique 01 p0101 A66-10034
- Lateral maneuver capability of high lift-drag ratio used to extend period of daylight landings from orbit 03 p0390 A66-12774
- Spacecraft landing systems, examining laboratory and full-size studies with steerable parachutes 04 p0584 A66-13529
- Aircraft braking system, determining energy absorbed during landing or interrupted takeoff 06 p0807 A66-16970
- Flight deck display for future aircraft projects, emphasizing vertical scale director instruments for cockpit display 11 p1649 A66-23250
- Fog chamber tests and runway lighting requirements, considering landing, cockpit vision and photometry [AIAA PAPER 65-333] 12 p1857 A66-23801
- Impact dynamics of landing systems using material crushing to absorb kinetic energy of body impacting at very high velocities 14 p2402 A66-27895
- Flight simulator techniques applied to all-weather landing problems 17 p2899 A66-33205
- Landing approach navigational problems, discussing transition to visual flight at low altitude of 100 ft 17 p2898 A66-33209
- Pilot acceptance factors in development of all-weather landing and SST navigation systems 17 p2955 A66-33219
- All-weather landing system for Caravelle aircraft in joint Sud Aviation-Lear program 18 p3133 A66-34680
- Parachute and cushion landing system for specific payload geometry for touchdown with gliding descent, considering minimum weight design 19 p3278 A66-35626
- Radiation attenuation effect of atmospheric aerosols on all-weather aircraft landing guidance systems using lasers 19 p3397 A66-36051
- Aerodynamic deceleration systems - AIAA Conference, Houston, September 1966 22 p3848 A66-40589
- Base-mounted landing rocket system for Apollo-type vehicle evaluated for heat-shield water pressure, ground effect, vehicle dynamics, etc 22 p3987 A66-40612
- Land landing system for Apollo spacecraft with roll control, steerable parachutes and landing rocket 22 p3987 A66-40613
- All-weather landing systems in U.K., examining safety and reliability criteria in connection with trident airborne equipment [ICAS PAPER 66-8] 22 p3946 A66-40676
- LANGMUIR PROBE**
- Effect produced by nonhomogeneous HF field on distributed plasma parameters 01 p0115 A66-11050
- Nonlinear scattering effect of Langmuir oscillations on electrons of plasma located in strong magnetic field 01 p0115 A66-11055
- Beam width of two antenna systems measured and compared for accuracy in determining plasma density 02 p0269 A66-11969
- Probe techniques in polar ionosphere covering cylindrical Langmuir, RF and mobility probes, Gerding condensers, error sources, techniques, etc 03 p0362 A66-12641
- Langmuir probes in spacecraft, considering plasma effects 03 p0370 A66-12876
- Plasma instabilities in dipole magnetic field 03 p0400 A66-12893
- Comparing data of two Langmuir probes placed in cesium plasma 04 p0550 A66-13476
- Inhomogeneous plasma from hot-cathode arc discharge at various pressures using various gases, recording oscillations from plasma instability with Langmuir probes 04 p0552 A66-13868
- One-dimensional self-consistent problems involving interaction between Langmuir and ionic-acoustic plasma oscillations caused by induced combination scattering of former on latter 04 p0556 A66-14418
- Inhomogeneous plasma from hot-cathode arc discharge at various pressures using various gases, recording oscillations from plasma instability with Langmuir probes 05 p0727 A66-15459
- Cesium plasma created in thermionic converter investigated by Langmuir probe to determine potential, gain, velocity and oscillations 05 p0620 A66-15571
- Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma [AIAA PAPER 66-5] 07 p1034 A66-17880
- In situ probe measuring nonthermal components of electron energy distribution in ionosphere, small-scale ionization inhomogeneities and negative ion concentrations in lower ionosphere 08 p1223 A66-18745
- Stable plasma belt trapped in permanent dipolar magnetic field, measuring floating potential, electric and magnetic drifts, etc 08 p1265 A66-19408
- Computation and measurement of Hall potentials and flow field perturbations in MGD flow of axisymmetric free jet 08 p1266 A66-19815
- Solar radiation effect on Langmuir frequency, noting ionization of cesium vapor at low potential differences 09 p1409 A66-20925
- Ion temperature measurement of streaming helium plasma by Langmuir double probe method, discussing effect of stream velocity 10 p1558 A66-21071
- Langmuir probe velocity and acceleration measurements for coaxial Hall accelerators [AIAA PAPER 66-196] 10 p1562 A66-21441
- Single and double Langmuir probe for low density plasma, noting measurement of electron temperature and density 10 p1535 A66-21514
- Plasma electron density and temperature from measurement of LF impedance of Langmuir probe, noting ionospheric probing 10 p1536 A66-21549
- Electron density and temperature measured in exhaust of magnetoplasma dynamic (MPD) source, using Langmuir probe and spectrometry [AIAA PAPER 65-298] 10 p1594 A66-21780
- Feasibility of using Langmuir probe for measuring statistical properties of unsteady or turbulent electron-rich plasmas [AIAA PAPER 65-544] 12 p1919 A66-23580
- Langmuir probe measurements in hypersonic plasma flow, evaluating properties of plasma jet wind tunnel, electron temperature and plasma density 12 p1920 A66-23853
- Low pressure plasma electron temperature inferred from Langmuir probe measurements differs from plasma mean electron energy 12 p1920 A66-23959
- Approximate equality of drift and random currents at boundary between Faraday dark space and head of striated positive column in discharges through neon 12 p1920 A66-23961
- Hot-wire anemometer determination of electron and ion temperature, neutral particle temperature, concentration and velocity and potential of partially ionized helium plasma 12 p1882 A66-24223
- Plasma edge phenomena in unified Langmuir treatment for probe in collisionless plasma 12 p1925 A66-24816
- Disturbance of thermal equilibrium of weakly ionized cesium contact plasma due to wall losses measured by Langmuir probe 13 p2137 A66-25117
- Langmuir probe to measure stagnation region shock layer ionization distribution under nonequilibrium hypersonic flow conditions [AIAA PAPER 66-167] 13 p2138 A66-25168
- Langmuir probe measurement of electromagnetic field present in cyclotron ion oscillations 13 p2140 A66-25426
- Correlation between plasma and ion density fluctuations as detected by magnetic probe, spectral emission techniques and Langmuir probe 13 p2142 A66-25703
- Time resolved Langmuir probe measurements of plasma density in electromagnetic shock tubes 13 p2149 A66-26243
- Resonance probe with variable HF voltage superimposed on DC voltage applied to conventional Langmuir plasma probe 14 p2289 A66-26820
- Plasma potential and sheath radius of positive cylindrical and spherical Langmuir probes 14 p2339 A66-26829
- Response of Langmuir probes in rocket exhaust jets, noting sensitivity to chamber temperature and pressure and alkali metal concentration 14 p2294 A66-27421
- Comparison between microwave and Langmuir probe plasma diagnostic techniques 14 p2343 A66-27506
- Electroconductivity of combustion products of propane-air mixture determined by double Langmuir probes 15 p2617 A66-29312
- Electron temperature correlation with excitation in temperature in argon plasma established, using spectral analysis and Langmuir probe 15 p2555 A66-29762
- Electric potential and space charge density near Langmuir probe in hot rarefied plasma at rest, calculating current collected from plasma 16 p2759 A66-30372

Disturbances about solid body in flowing low density plasma applied to satellite-ionosphere interactions and Langmuir probe data analysis 16 p2759 A66-30373

Scattering of electromagnetic waves in plasma, noting effect of eddy current fluctuations 16 p2654 A66-31179

Ultrahigh frequency plasma oscillations, noting Maxwellian equilibrium between plasma electrons and primary, monoenergetic electrons 16 p2766 A66-31651

Sublimation of rhenium and Langmuir method vapor pressure measurements using vacuum microbalance 17 p2938 A66-31882

Langmuir probe curves for pulsed plasma obtained by time-sampling probe technique and compared with BBM analysis for ion saturation current 19 p3405 A66-35411

Instrumentation for plasma diagnostics noting electron density profile, temperature, ion-atom and electron-atom interaction, etc 20 p3556 A66-36964

Plasma decay technique to measure density in discharge tubes compared to value obtained by Langmuir 21 p3792 A66-39182

Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma [AIAA PAPER 66-5] 22 p3918 A66-40350

Langmuir type probe in argon arc jet, discussing surface contamination problems, causes of high electron temperature and development of automatic cleaning technique 22 p3899 A66-40368

Hot-wire anemometer determination of electron and ion temperature, neutral particle temperature, concentration and velocity and potential of partially ionized helium plasma 22 p3919 A66-40585

Electron number densities measured behind shock wave in pressure driven shock tube by microwave resonant cavity technique and by electrostatic quasi-Langmuir probe 24 p4191 A66-42197

Double Langmuir probe measurement of turbulent structure and ionization intensity of hypervelocity projectile and spectral characteristics of probe signal fluctuation 24 p4192 A66-42198

**LANGUAGE**

**SA MACHINE LANGUAGE**

**SA SPEECH**

Dictionary of mathematical terms in English, French, Russian, German and Armenian, with English terms in alphabetical order 04 p0540 A66-14003

Space technology jargon, noting language used, origin and formation of words, acronyms, etc 16 p2831 A66-31151

Facilitating effect of repetition on recall of word from list of unconnected words 23 p4025 A66-41044

**LANGUAGE PROGRAMMING**

**SA BLOCK DIAGRAM COMPILER /BLODIB/**

Universal programming languages and processors, survey and new concepts 12 p1826 A66-23825

Digital simulation languages, discussing history, input format, effectiveness, programming error diagnostics, etc 12 p1826 A66-23826

New block diagram compiler for sampled data system simulation 12 p1826 A66-23827

User-oriented computer programming system using Flexowriter modified to construct new two-dimensional programming language 12 p1826 A66-23828

Integrated modular digital computer system for ICETAN /ICES-FORTRAN/ programming of engineering problems 12 p1827 A66-23833

Symbolic programming digital computer techniques, hardware interfacing and system errors in simulation of lunar midcourse guidance and navigation 20 p3543 A66-37250

Abstract machine design with recursive function programming language, showing simulator construction in Fortran 20 p3523 A66-38018

Aitol computer programming language for spacecraft checkout systems and automatic support operations in Saturn launch vehicle 20 p3544 A66-38257

Optimization of two-way space frame with single column supports for minimum weight

of steel by digital language programming techniques 21 p3833 A66-39539

**LANSRAUX SERIES**

**S BESSEL FUNCTION**

**S HANKEL FUNCTION**

**LANTHANIDE**

Solid state reduction of lanthanide ions in laser hosts, effect of presence of recombination hole-centers in photoreduced samples and elimination during electrochemical process 14 p2362 A66-27464

**LANTHANUM**

Energy gap and thermoconductivity of normal and superconducting fcc lanthanum 03 p0407 A66-12320

Staining properties of trivalent lanthanum cation on cell membranes 06 p0812 A66-16565

Ultrasonic absorption in superconducting lanthanum explained by two models for loss of energy from low-energy phonon field in London superconductor 09 p1415 A66-20021

Magnetic state of gadolinium impurities in superconducting lanthanum 16 p2768 A66-30134

Thermal conductivity of lanthanum and monochalcogenides, noting role and temperature dependence of crystal-lattice conductivity 20 p3617 A66-37556

**LANTHANUM ALLOY**

High temperature oxidation of liquid yttrium and liquid lanthanides and their alloys with gold, obtaining parabolic diffusion-controlled rate constants 08 p1235 A66-18622

Molybdenum recrystallization as affected by La and Y additions under various types of heat treatment 15 p2520 A66-28670

**LANTHANUM CHLORIDE**

Nonequilibrium population buildup and detection for IR solid state lasers and IR-optical double resonance in lanthanum chloride crystal 13 p2098 A66-26177

**LANTHANUM COMPOUND**

Crystalline structure of simplest lanthanum and samarium silicates 05 p0702 A66-15337

Surface ionization of Cs atoms on lanthanum hexaboride cathode with intrinsic thermionic emission of cathode observed from mass-spectrometric measurement of ion current 06 p0912 A66-16885

Thermionic emission properties of rhenium tape coated with lanthanum hexaboride, examining usefulness as low temperature emitter 06 p0883 A66-17029

Superconducting transition temperature of stoichiometric lanthanum sulfide 07 p1108 A66-18437

Specific heat evidence for gapless superconductivity, examining experimental results on lanthanum doped with magnetic impurity gadolinium 09 p1420 A66-20053

Conductivity of working fluid of MHD generator, using thermionic emission from suspended lanthanum hexaboride powder 15 p2552 A66-29408

Lanthanum hexaboride evaporation from Knudsen cell studied by mass spectrography for composition, sublimation heat and ion current 17 p2981 A66-32849

X-ray and metallographic examination of tungsten alloys, noting decrease of work function during thermal emission upon addition of lanthanum hexaboride 20 p3584 A66-37414

Lanthanum germanide synthesis using arc furnace, noting chemical properties 20 p3584 A66-37416

**LANTHANUM OXIDE**

Lanthanum oxide as crystal growth modifier, noting habit modifications, optical quality, etc 17 p2982 A66-33060

**LANTHANUM TELLURIDE**

Superconductivity of chalcogenide lanthanum telluride, noting temperature variations relationship to stoichiometric composition of samples 16 p2772 A66-30290

**LAP JOINT**

Load partition in double-lap butt joints for bearing type connections including expressions for stress-strain relationship and bolt shear deformation 02 p0302 A66-12242

Strength of adhesive-bonded lap joints as affected by changes in temperature and fatigue 14 p2401 A66-27772

**LAPLACE EQUATION**

**SA STOKES-BELTRAMI EQUATION**

Approximation of spherical functions by analogs of Fejer and Vallée-Poussin

sums 04 p0539 A66-13488

Numerical solution to Laplace equation in two dimensions, subject to boundary conditions imposed by conducting surfaces and dielectrics, applied to transmission line problems 06 p0846 A66-16097

Maxwell equations for isotropic medium bounded by conductors in three-space dimensions solved by applying Laplace equations described in Minkowski space 06 p0851 A66-16450

Integration of equations, approximating Maxwell equations, in curvilinear coordinates separating scalar Laplace equation, with vectors representing electric and magnetic fields 10 p1556 A66-21994

Cauchy problem for two-dimensional Laplace equation in infinite strip 11 p1722 A66-22646

Approximate continuation of harmonic and parabolic functions as solutions of Laplace and heat equations 16 p2732 A66-30242

Noniterative finite-difference method for solution of Poisson and Laplace equations for linear boundary conditions, discussing slow viscous flow results [ASME PAPER 66-FE-1] 17 p2914 A66-33258

Two-dimensional solution of Laplace equation for vortex formations in incompressible fluid 18 p3100 A66-34634

Integration of equations, approximating Maxwell equations, in curvilinear coordinates separating scalar Laplace equation, with vectors representing electric and magnetic fields 18 p3136 A66-34971

Laplace integral application to inversion of three solar limb-darkening curves obtained in UV 19 p3464 A66-36258

Incorrect problems of mathematical physics examined and illustrated by classical Cauchy problem for Laplace equation 20 p3591 A66-37758

Stress separation in photoelasticity, using series solution of Laplace equation and least squares method 24 p4292 A66-42862

**LAPLACE OPERATOR**

Digitally computed tables of Chebyshev approximations of Laplace shift operator transfer function enabling analog simulation of time delay systems 18 p3090 A66-34069

Elliptic BVP in equilibrium theory of thin plates employing iterated Laplace operator 21 p3822 A66-38464

Eigenvalue problem for Laplace operator for two-dimensional region with boundary composed of piecewise-analytical simple closed curves solved by finite difference method 22 p3938 A66-39901

**LAPLACE TRANSFORM**

**SA MELLIN TRANSFORM**

Stability analysis of multiloop multirate sampled systems using identities expressing Laplace transforms of sampled signals in terms of shifted transforms of same signals sampled with smaller periods 01 p0100 A66-10018

Lubich generalization of Laplace transform as related to Cauchy problem 01 p0094 A66-10651

Laplace transform technique to develop asymptotic solutions to integral equations describing influence of scattering law on radiation damage displacement cascade 02 p0245 A66-11946

Fodor terminal-state problem solved on basis of distribution theory without using heuristic operators 03 p0388 A66-12703

Distribution theory used to remove apparent contradictions observed when applying Laplace transform to discontinuous functions 03 p0388 A66-12704

Transistor equivalent circuit parameters by inverse Laplace transform of time behavior 04 p0497 A66-13966

Donnell-type nonlinear theory for instability of cylindrical shell subjected to axisymmetric moving loads with constant velocity [ASME PAPER 65-APMW-35] 04 p0594 A66-14235

Transient response of narrow-band networks to narrow-band signals, using Laplace transforms with positive frequencies 05 p0652 A66-14595

Asymptotic expressions for axial stress in thin viscoelastic shells due to longitudinal impact obtained, using Laplace transform, determining viscosity effect on propagating

wave shape  
[ASME PAPER 65-WA/APM-10]  
05 p0776 A66-15432  
Random vibrational system, solving first passage time via conversion to first order Markov process  
[ASME PAPER 65-WA/APM-18]  
05 p0777 A66-15440  
Necessary and sufficient condition for matrix distribution to have positive-real Laplace transform  
09 p1396 A66-20641  
Laplace transform and analog computation applied to simulation of heat transfer between wall separated fluids, determining transfer functions and frequency responses  
09 p1472 A66-20908  
Integration of Laplace transformed elastokinetic equations, examining stress function, displacement vector field and boundary and initial value problems  
10 p1555 A66-21226  
Asymptotic expressions for axial stress in thin viscoelastic shells due to longitudinal impact obtained, using Laplace transform, determining viscosity effect on propagating wave shape  
[ASME PAPER 65-WA/APM-10]  
10 p1615 A66-21476  
Laplace transform solution for small time used as complement to problem of one-dimensional propagation of stress pulse in bar with continuously nonhomogeneous elastic modulus  
10 p1617 A66-21498  
Space and time dependent randomly distributed stress and temperature fields in cylinder with deformable surface calculated, using approximation  
12 p1959 A66-23864  
Random vibrational system, solving first passage time via conversion to first order Markov process  
[ASME PAPER 65-WA/APM-18]  
12 p1961 A66-23990  
Liubich generalization of Laplace transform as related to Cauchy problem  
12 p1903 A66-24022  
N-dimensional two-sided Laplace transformation and n-dimensional Mellin transformation of  
12 p1904 A66-24194  
Inverse Laplace transformations in terms of Laguerre functions  
12 p1905 A66-24654  
Exact solution, using Laplace transform, for problem of transient characteristic of semiconductor diode, challenging Nosov view  
13 p2031 A66-25229  
Iterative approximation of rational transfer function in Laplace transform variable s, optimal with respect to given input and output time functions, and deviation from desired output-input-time functional relation  
13 p2054 A66-26087  
Nonhomogeneous solid sphere radiative cooling asymptotic representation based on heat conduction theory by Laplace transforms  
14 p2414 A66-28144  
Evaluation of solution moduli of nonlinear contour problems pertaining to polyvibrant systems with delayed remainders and arguments  
15 p2529 A66-29653  
Interaction between atoms of solid surface and gas phase, obtaining closed-form solution of motion  
16 p2753 A66-30786  
Cause and effect interdependence in linear system, noting distribution theory and double Laplace transform  
16 p2670 A66-31024  
Generalization of Barbier-Eddington approximation, for inversion of darkening law  
16 p2803 A66-31258  
Green functions for heat source and concentrated force acting in unbounded thermoelastic space, applying perturbation method and Laplace transforms  
17 p3018 A66-31836  
Symmetrical stress wave propagation in thin plate with small, circular hole at center, noting boundary conditions and solutions via Laplace transforms and by method of characteristics  
17 p3022 A66-32012  
Donnell-type nonlinear theory for instability of cylindrical shell subjected to axisymmetric moving loads with constant velocity  
[ASME PAPER 65-APMW-35]  
18 p3248 A66-33574  
Numerical inversion of Laplace transform  
18 p3127 A66-34082

Pressure distribution, surface roughness, dry friction and elastic coupling effects on wave propagation and reflection in elastic rod, using modified-Laplace transformations  
18 p3259 A66-34940  
Functional polynomial fitting of continuous functional, using Laplace transforms to reduce number of measured records for identifying kernels of second-degree approximation  
19 p3391 A66-36703  
Complex convolution integral applied to Laplace transform expressions in sampled data theory  
19 p3339 A66-36747  
Series expansion of inversion of n-dimensional Laplace transforms in terms of ultraspherical polynomials having coefficient computed recursively  
19 p3392 A66-36784  
Transient processes in linear automatic control systems dependent on parameters which appear when differential equations of analyzing system are transformed by Laplace-Karson method  
20 p3537 A66-36892  
Unified approach to synthesis of orthonormal exponential functions with elements whose asymptotic order may be chosen arbitrarily and poles that may be real, complex or both  
20 p3522 A66-37665  
Laplace transform applied to small pressure variations effect on gunpowder burning stability  
20 p3681 A66-38121  
Laplace transform analysis of solid or hybrid propellant ignition by exothermic heterogeneous reactions in presence of radiant energy flux  
21 p3806 A66-38688  
Laser amplifier theory using Fabry-Perot interferometer and Laplace transform for obtaining transient solutions in addition to steady state solutions  
21 p3748 A66-39224  
Minimum mean-square-error design of distributed-parameter control systems characterized by Laplace transform transfer functions  
21 p3720 A66-39430  
Laplace transformation simulation by analog computer for real and complex values  
22 p3870 A66-39996  
Transient response of narrow band networks to narrow band signals, using Laplace transforms with positive frequencies  
22 p3864 A66-40063  
Criterion for spatial-amplification or nontransmittance using double Laplace transforms in light of complex values of wave vector  
22 p3869 A66-40928  
Fresnel formulas for transformation of transverse electromagnetic wave into longitudinal plasma wave at dielectric-plasma interface, using Laplace transforms  
22 p3869 A66-40929  
Linear viscoelastic bending analysis of anisotropic plates  
23 p4145 A66-41975  
Power spectrum analysis of short-time transient response of one degree of freedom system to random excitation, evaluating error generated, using Laplace method  
24 p4286 A66-42164  
Computer technique for constitutive equations of viscoelastic modulus, using Laplace transform and Volterra integral equation, applied to data on solid propellants  
24 p4289 A66-42279  
Combination of probability density functions for system error analysis, using convolution or transformation methods  
24 p4189 A66-42827  
Laplace transform analysis of transistor switching circuit controlled by RC time constant, using PWM circuit as example  
24 p4185 A66-42946  
**LARMOR ORBIT**  
Reflection and transmission of charged particles incident on plane moving plasma shock with small thickness compared to Larmor radius of  
04 p0552 A66-14019  
Plasma conductivity as function of Larmor electron frequency and mean electron-atom collision interval in transverse magnetic field of argon and mercury plasma  
06 p0918 A66-16835  
Flute instability of plasma of finite pressure and zero pressure, examining stabilizing effect of finite larmor radius  
07 p1086 A66-17651  
First mode of flute disturbances in axisymmetric plasma will be unstable for very large Larmor ion  
07 p1086 A66-17653  
Larmor precession of charged particles

effect on nonstationary temperature field in plane channel  
12 p1922 A66-24361  
Growth rate of sheet pinch instability calculated in small Larmor radius limit, using integration along unperturbed orbits, finding instability driven by resonant electrons  
12 p1951 A66-24573  
MHD instability in plasmas during pinch discharge, noting wave velocity dependence on Larmor radius, Hall effect, electron temperature fluctuations, etc  
13 p2142 A66-25704  
Charged particles in nonadiabatic magnetic traps, noting behavior in mirror machine with spatially modulated central field, using model with square wave modulation  
13 p2145 A66-25727  
Finite Larmor radius equations for plasma, noting pressure tensor modification and approximate moment equations  
15 p2555 A66-29757  
MHD theory of stability reduced to fourth-order differential equation with arbitrary parameter for highest order derivative  
17 p2964 A66-31893  
Set of fluid equations in finite Larmor radius obtained by systematic asymptotic expansion, using gyration period and radius as small space and time parameters  
18 p3150 A66-34965  
Drift-wave instability in weakly inhomogeneous fully ionized plasma confined in strong magnetic field in Q machine  
19 p3416 A66-36523  
Drift instabilities calculated in beta limit, examining influence on electron cyclotron harmonic waves, Larmor radius flute, structure of infinite plasma in magnetic field, etc  
19 p3418 A66-36535  
Macroscopic hydromagnetic equations with magnetic viscosity for collisionless plasma, determining Larmor radius ratio to characteristic length, using Vlasov equation in drift frame  
20 p3610 A66-38054  
Short-circuit effects by metal walls and influence on plasma boundary stability  
21 p3791 A66-39177

Optical phase modulator using ferroelectric barium titanate crystal  
01 p0117 A66-10240  
Laser characteristics of and coherent oscillations from trivalent Tm, Ho, Yb and Er ions in yttrium aluminum garnet  
01 p0079 A66-10241  
Laser interferometer to measure time and spatial variation in repetitively pulsed plasma  
01 p0079 A66-10243  
Economical feasibility requirements for optical maser communications systems  
02 p0189 A66-11301  
Laser bibliography covering devices and related systems for period January-June 1965  
02 p0239 A66-11372  
Reflection coefficient of mirrors measured on operating wavelength of laser in which they are used  
02 p0239 A66-11420  
Laser beam modulation methods assessed for making use of capability of laser for carrying multitude of signals simultaneously  
02 p0191 A66-11692  
Multiphonon absorption in laser GaAs and ruby crystal of optical generator  
02 p0241 A66-11727  
Laser mirrors consisting of alternating lead-oxide and cryolite films  
02 p0241 A66-11820  
Superconducting states in impurity-free semiconductors created by laser illumination  
02 p0242 A66-12091  
Fabry-Perot interferometric modulator for laser beam, noting error of precise alignment of reflecting surfaces and Gaussian type of imperfections  
02 p0232 A66-12202  
Angular scanning of laser beam forming multiple beam phased array, making use of

- time coherence 03 p0377 A66-12445  
 Light emission in forward biased semiconductor p-n junction 03 p0409 A66-12577  
 Possible materials for second harmonic generation and laser action discussing centrosymmetric and piezoelectric crystals and single crystal plate with alternate layers of noncentrosymmetric composition 03 p0378 A66-12940  
 Biological effects of laser radiation with reference to intact animals, primate eyes and skin and malignant tumors of animal and human origin 03 p0325 A66-12994  
 Optical data processing techniques considering storage, manipulation, holography and pattern recognition using matched filters 03 p0378 A66-12997  
 Physical fundamentals of lasers such as population inversion, induced emission and principal optical apparatus explained for communications engineers 03 p0379 A66-13233  
 Laser technique to photograph hypervelocity projectiles in free-flight range 03 p0379 A66-13248  
 Magnitude of anisotropic line broadening in ruby 03 p0413 A66-13278  
 Preparation of single crystals of double molybdates of Na and La /or other rare earth elements/ doped with Nd, Tb or Pr for laser application 04 p0529 A66-13478  
 Hazards, effect, safety and precaution for prevention of physical injuries from laser radiation 04 p0529 A66-13694  
 He-Ne laser incorporated into arm of interferometer used to measure fringe shift in small transient plasma 04 p0529 A66-13743  
 Optical resonator using cylindrical mirror with variable radius of curvature 04 p0530 A66-13890  
 Semiconductor laser radiation by direct zone-to-zone transitions 04 p0532 A66-14273  
 Angular width and intensity of light from two lasers that cause plasma to oscillate and in turn are scattered by induced fluctuations 04 p0533 A66-14328  
 Local electron temperature and electron density in theta pinch measured by means of scattering of laser beam 04 p0555 A66-14334  
 Optically connected laser constructed on gallium arsenide p-n junction, noting coherent radiation 04 p0533 A66-14363  
 Production laser welding of intricate and critical subassemblies incorporated into space vehicles and components 05 p0691 A66-14514  
 Laser beam welding electronic-component leads 05 p0685 A66-14517  
 Trimming microcircuit elements like evaporated thin-film and silk-screened cermet-film resistors attempted with CW and pulsed lasers 05 p0692 A66-14562  
 Laser welding evaluated with regard to performance and production application 05 p0686 A66-14692  
 Laser digital devices, examining quenching of gain and optical absorption 05 p0693 A66-14826  
 Waveguide coupling between adjacent parallel fibers as means of transferring radiation from one element to another 05 p0693 A66-14827  
 Some laser properties from viewpoint of second law of thermodynamics of irreversible processes 05 p0694 A66-14899  
 Automatic frequency control of laser local oscillator for heterodyne detection of laser signal and use of 2.5 gc frequency offset to permit retrieval of microwave data 05 p0633 A66-14908  
 Radiation damage and annealing of gallium arsenide laser diode 05 p0696 A66-14979  
 History and development of molecular amplification by stimulated emission of radiation, noting various laser types 05 p0696 A66-15034  
 Molecular anisotropy of propagation of intense light beam, noting Raman and Brillouin effects 05 p0696 A66-15106  
 Energy and intensity of ions emitted by metal target as function of characteristics of laser and nature of metal 05 p0697 A66-15109  
 Heating process in laser welding of metal sheets, taking into account energy distribution, heat transfer and flux densities 05 p0688 A66-15347  
 Transmission through tapered quartz tube in laser near field 05 p0697 A66-15481  
 Interaction mechanism between laser beam and surface in ultrahigh vacuum 05 p0697 A66-15484  
 Instrumentation techniques for new type of gas density measuring system using light scattered from laser beam as measured quantity 05 p0698 A66-15794  
 Second harmonic light generated on reflection of giant-pulse laser beam from surface of silver mirror 06 p0921 A66-16072  
 Local laser heating of cathode for electron extraction from plasmoid 06 p0889 A66-16149  
 Continuous optical second-harmonic generation using ND/YAG laser and crystal of single-domain lithium niobate 06 p0889 A66-16378  
 Measurement of electron density of gas discharge plasma by laser interferometer 06 p0916 A66-16379  
 Frequency-selective transmission etalon replaces end mirror of FM laser so that total power is obtained as single optical frequency 06 p0890 A66-16381  
 Gain measurements of Raman amplifier pumped by diffuse ruby radiation 06 p0891 A66-16388  
 Photon trapped wave effect for developing optical waveguides in which optical beam creates waveguide as it propagates 06 p0892 A66-16662  
 Line narrowing of neodymium glass laser with reflection 07 p1041 A66-17291  
 Atmospheric turbulence, power fluctuation and radar detection in laser systems design 07 p1041 A66-17294  
 Lock-on band of continuously operating laser oscillator determined for traveling wave circuit 07 p1043 A66-17623  
 Estimation of energy parameters of laser light beam used to weld metals 07 p1037 A66-17626  
 Brillouin scattering of light by phonons and phonon maser in derivation of conservation theorems from basic equations 07 p1045 A66-18397  
 Coherence and stimulation threshold of Stokes line 08 p1232 A66-18648  
 New optics techniques including interference filters, lasers and optical fibers 08 p1255 A66-19118  
 Onset of retonation, laser technology and high repetition-high resolution schlieren stroboscopic wave phenomena records 08 p1318 A66-19200  
 Optical laser pumps, high power CW laser operation by cathodoluminescence and suitable selection of phosphors 08 p1234 A66-19546  
 First-order relativity test using phase change of two coherent beams 09 p1385 A66-19935  
 Continuous optical quantum generator operating at room temperature on calcium tungstate doped with neodymium ions 09 p1386 A66-19956  
 Earth-Moon distance measurement using laser technique 09 p1453 A66-20129  
 Electronics methods used in laser technology and vice versa, emphasizing microwave photoelectronic devices, self-consistent gas discharges at optical frequencies, etc 09 p1386 A66-20434  
 Quantum theory of interaction of electromagnetic waves in plasma considered in terms of light-light scattering and plasma-laser beam interaction 10 p1558 A66-21173  
 Laser application in photography, noting interferometric and holographic techniques 10 p1535 A66-21333  
 Eigenvalues of integral equations in laser resonant cavities 10 p1542 A66-21343  
 Spontaneous emission noise effects on coherence properties of laser 10 p1542 A66-21550  
 Diffusion of light by plasma electrons produced in laboratory for very small effective diffusion area 10 p1566 A66-21712  
 Coherent laser light for conventional and unconventional photographic situations 11 p1705 A66-22670  
 Bibliography of open literature on lasers, Part V 11 p1712 A66-22876  
 Quantum optics theorem on classical source for which effect of detector and dissipation mechanism is negligible 11 p1713 A66-22967  
 Laser scattering by bound charged particles 11 p1713 A66-23080  
 Irregular bends and lens displacements effect on wavelength and modes in laser waveguide 11 p1713 A66-23103  
 Dismountable flash lamp for laser, including cross sectional scale drawing and wiring diagram 11 p1714 A66-23296  
 Raman laser materials selection, emphasizing frequency shifts and excitation power threshold 11 p1721 A66-23477  
 Clear air turbulence detection with laser Doppler optical radar [AIAA PAPER 66-374] 12 p1818 A66-24498  
 Consistent theory of nonlinear optical effects in bounded light beams by extending parabolic equations to nonlinear problems 12 p1891 A66-24888  
 Stimulated Raman effect and tunability of Raman laser 13 p2089 A66-25062  
 Optical communication for Mars exploration with outline of laser modulators and antennas 13 p2021 A66-25251  
 Electron-beam-controlled CRT scanlaser 13 p2091 A66-25557  
 Quantum theory for noise in steady state of laser oscillator above threshold, comparing semiclassical and quantized linear theories 13 p2091 A66-25650  
 Optical instrumentation radar for real-time positional data on high-speed cooperative targets 13 p2023 A66-25654  
 Thermally-induced optical path distortions in laser rods measured by obtaining time resolved interferograms, using Mach-Zehnder interferometer and Q-switched laser 13 p2092 A66-25994  
 Thermal optical behavior of glasses and other potential laser materials and thermal distortion in air, water, benzene, ethanol and toluene 13 p2092 A66-25996  
 FM laser and optical heterodynes in optical communication systems 13 p2093 A66-26004  
 Laser welding of aerospace structural alloys and resultant joint properties 13 p2087 A66-26019  
 Monte Carlo technique to determine total energy and energy distribution in laser crystal due to optical pumping 13 p2093 A66-26028  
 Neodymium-doped yttrium-aluminum garnet crystal laser oscillator as regenerative amplifier of noise 13 p2103 A66-26212  
 Nonlinear quantum mechanical analysis of laser steady motion, stability under deviations and noise effect on line width and intensity fluctuations 13 p2103 A66-26213  
 Quantum theory of lasers presented in terms of correlation functions of second-quantized electromagnetic and matter fields 13 p2103 A66-26214  
 Thermalization of plasma by creating imploding shock wave driven by laser energy release 13 p2106 A66-26683  
 Production of neutral or ionized gas plasmoids by focusing beam of coherent light emitted by ruby laser on target of pure metal or metal containing gas 14 p2339 A66-26819  
 Laser beam techniques for study of plasmas with high electron densities 14 p2305 A66-26822  
 Laser frequency tuning by dielectric material interaction to produce nonlinear effects 14 p2305 A66-26887  
 Optical communication using laser techniques 14 p2234 A66-26918  
 Monograph on lasers including gas lasers, ruby lasers, giant-pulse techniques, oscillation modes, etc 14 p2305 A66-26961  
 Nonlinear optics, considering Maxwell equation and nonlinear material response 14 p2330 A66-26964  
 Solid state reduction of lanthanide ions in laser hosts, effect of presence of recombination hole-centers in photoreduced samples and elimination during electrochemical process 14 p2362 A66-27464  
 Laser radiation to determine electron density in dense high temperature plasma 14 p2374 A66-27507  
 Protection and hazard to eyes of uninformed operators and bystanders from laser light 14 p2309 A66-27668  
 Ultrasonic modulation of laser oscillation from neodymium glass rod 14 p2309 A66-28044  
 Optically connected laser constructed on gallium arsenide p-n junction, noting

- coherent radiation 14 p2310 A66-28262
- Parametric amplifiers and 14 p2310 A66-28358
- lasers 14 p2310 A66-28358
- Perspective rendering of field intensity 14 p2310 A66-28358
- diffracted at circular aperture with reference to laser-scanning technique 15 p2499 A66-28843
- Quantum theory of laser having only single-mode oscillation and ignoring atomic motion and spatial variations in cavity mode 15 p2515 A66-29117
- Open laser resonator composed of two ideally spherical mirrors with rectangular aperture 15 p2515 A66-29200
- Relation between nonlinear luminescence quenching and concentration of luminescence centers in laser crystal 15 p2515 A66-29204
- Thermal effects in various media due to laser beam 15 p2515 A66-29209
- Shape and dimension of spark arising during focusing of laser emission 15 p2516 A66-29210
- Two-quanta absorption and scattering loss in powerful laser 15 p2516 A66-29350
- Regenerative helium-neon laser with amplification coefficient of 1000 15 p2516 A66-29352
- Optical resonator using cylindrical mirror with variable radius of curvature 15 p2518 A66-29703
- Local laser heating of cathode for electron extraction from plasmoid 15 p2519 A66-29879
- Heating process in laser welding of metal sheets, taking into account energy distribution, heat transfer and flux densities 15 p2511 A66-29989
- Satellite range measurements using laser in conjunction with photoelectric receiver and Baker-Nunn camera 15 p2453 A66-29998
- Single-mode laser field model consisting of amplitude stabilized sine wave with slowly varying random phase plus stationary noise field 16 p2716 A66-30127
- Laser communication by optical beam waveguide 16 p2717 A66-30594
- Paramagnetic resonance spectra shift due to temperature change in cross-relaxation rutile maser 16 p2718 A66-30820
- Growth of single crystals of rare-earth fluorides for laser application, using hydrogen fluoride atmosphere, noting ion exchange purification 16 p2779 A66-31082
- Laser welding for advanced electronic packaging 16 p2715 A66-31593
- Polarizing properties of laser reflector consisting of two identical rectangular prisms 16 p2721 A66-31803
- Laser for photoelasticity including scattered-light method, conventional transmission polariscope with static loads and dynamic photoelasticity 17 p3022 A66-32072
- Book on laser theory based on kinetic equations with emphasis on emission from luminescent center transitions, semiconductor junctions and Raman scattering 17 p2934 A66-32558
- Parametric oscillator threshold with single mode optical masers and observation of amplification in lithium niobate 17 p2935 A66-32716
- Retardation-type laser modulators, examining driving power, transmission and dynamic range 17 p2935 A66-32820
- Open laser resonator composed of two ideally spherical mirrors with rectangular aperture 17 p2935 A66-33049
- Relation between nonlinear luminescence quenching and concentration of luminescence centers in laser crystal 17 p2936 A66-33053
- Thermal effects in various media due to laser beam 17 p2936 A66-33058
- Shape and dimension of spark arising during focusing of laser emission 17 p2936 A66-33059
- Physical mechanism of molecular lasers and vibrational rotation relation 17 p2936 A66-33246
- Fluorescent-solid lasers design and performance noting materials 17 p2937 A66-33250
- Readout technique for laser fog disdrometer 17 p2927 A66-33346
- Space communication requirements using lasers and microwaves in manned Mars flights
- [AIAA PAPER 65-324] 18 p3067 A66-33794
- Electron temperature and concentration in DC plasma arc determined from Thomson scattering of laser radiation 18 p3118 A66-33840
- Laser system for measuring surface contours in large steerable antennas 18 p3119 A66-34296
- Yttrium vanadate crystals grown and processed for optical purposes 19 p3373 A66-35434
- Interstellar vehicle propelled by terrestrial laser beam 19 p3449 A66-35488
- Cooperative scattering of laser light by thetatron plasma 19 p3373 A66-35489
- Quantum theory of laser model, deriving kinetic equations for radiation and single-particle density matrices, using Bogolubov expansion procedure 19 p3374 A66-36008
- Radiation attenuation effect of atmospheric aerosols on all-weather aircraft landing guidance systems using lasers 19 p3397 A66-36051
- Transmission of luminous flux due to ionization of gases by high power laser, measuring energy absorption in ionized zone 19 p3403 A66-36255
- Two-laser cavity in tandem to resolve components with homogeneously broadened /Doppler/ line 19 p3376 A66-36720
- Book on lasers including pulsed and organic, Q modulation and modes in optical resonators 20 p3575 A66-36967
- Q modulation of laser theory and application, presenting giant pulse production, phenomenological theory, output response to step function change, electro-optic and mechanical modulators 20 p3576 A66-36971
- Two-quanta absorption and scattering loss in powerful laser 20 p3576 A66-37355
- Regenerative helium-neon laser with amplification coefficient of 1000 20 p3576 A66-37357
- Laser theory and application 20 p3577 A66-37420
- Laser application as measuring equipment in metal working, discussing surface-grazing interferometer, feedback laser device and length measuring laser [ASME PAPER 66-MD-43] 21 p3742 A66-38491
- Polarizing properties of laser reflector consisting of two identical rectangular prisms 21 p3747 A66-39105
- Laser bibliography July-December 1965, including references to holograms 21 p3749 A66-39541
- Powerful laser employing induced two-quanta luminescence 22 p3930 A66-39771
- Temperature distribution in two-layer plate during welding by laser light flux 22 p3923 A66-40194
- Consistent theory of nonlinear optical effects in bounded light beams by extending parabolic equations to nonlinear problems 23 p4076 A66-41095
- Time dependent Schroedinger equation for Bloch electron in presence of laser field, using WKB approximation method, compared with perturbation theory 23 p4077 A66-41266
- Laser technique acquisition of data on exploding-wire phenomena in explosion model, supersonic model and ablation model 23 p4091 A66-41701
- Superconductor solenoid application to laser devices and development of magnetic plasma traps for research in controlled thermonuclear reactions 23 p4115 A66-41743
- Wide field active imaging, image processing in which pictorial information is placed within laser cavity 24 p4222 A66-42559
- Signal excitation in negatively charged antenna rod in effect of unfocused laser beam 24 p4224 A66-42753
- Magnetic dipole moment in spark produced by focusing laser radiation 24 p4226 A66-43055
- Compressible and incompressible flows made visible by optical method sensitive to density variations, shadowgraph, schlieren system, Mach-Zehnder interferometer and holographic interferometry with lasers 24 p4192 A66-43196
- experiments 07 p1001 A66-17217
- Oscillation, modulation and transmission problems regarding long distance electric signal communication possibilities of lasers 07 p1045 A66-18359
- Data pulsed transmission over electron-injection laser communication system, using continuous waves 09 p1385 A66-19934
- Microwave communications, discussing radio relay techniques, carrier telephony, satellite microwave communications, television, laser light wave communication, etc 11 p1655 A66-22696
- Optical communication for Mars exploration with outline of laser modulators and antennas 13 p2021 A66-25251
- Solar noise in optical communications, background radiation dependence on detector aperture, noise power and application to GaAs diodes and gas lasers 13 p2024 A66-25833
- FM laser and optical heterodynes in optical communication systems 13 p2093 A66-26004
- Optical communication using laser techniques 14 p2234 A66-26918
- Atmospheric turbulence effects on laser beam propagation, noting beam cross section, phase variation, AM and FM, etc 14 p2235 A66-27035
- Coherent transmission of optical radar from laser source and use of RF subcarriers placed on optical beams for wideband communications purposes 14 p2244 A66-28404
- Multiple scattering effects on propagation of coherent optical signals studied for laser communications application 15 p2448 A66-28580
- Laser communication by optical beam waveguide 16 p2717 A66-30594
- P-n junction lasers for short range communications, examining design, technological problems and performance 17 p2933 A66-31956
- Space communication requirements using lasers and microwaves in manned Mars flights
- [AIAA PAPER 65-324] 18 p3067 A66-33794
- Acquisition and reacquisition in spacecraft-spacecraft and spacecraft-to-Earth communications using laser systems 18 p3067 A66-33795
- Ultrasonic cell which modulates intensity of He-Ne laser beam for communication of intelligence 18 p3118 A66-34059
- System design analysis of laser methods of deep space communication, examining local heterodyne system /LHS/, direct detection system /DDS/ and transmitted reference system 19 p3300 A66-35666
- Book on laser receivers covering noise performance, atmospheric effects, detection techniques, hardware and systems available, optical communication in visible and IR spectrum, etc 19 p3375 A66-36060
- Laser light modulation by Pockels or Kerr effect for application to telecommunications system, examining electrical birefringence modulation 19 p3304 A66-36262
- Coherent laser light use in atmospheric communications system, discussing effect of atmospheric turbulence and small vibrations on coherent detection efficiency and SNR 20 p3511 A66-36930
- Laser communications system design, describing range equation, modulation and detection techniques, atmospheric effects, etc 20 p3515 A66-37257
- Narrow laser beam pointing technique in deep space-to-earth data transmission for reduction in error sources 22 p3867 A66-40496
- Atmospheric turbulence effect on laser beam intensity distribution 23 p4035 A66-41030
- Atmospheric turbulence effect on frequency spectra of light intensity fluctuations examined, using He-Ne laser 23 p4035 A66-41031
- Tropospheric propagation using laser as transmitter, analyzing effects of Benard cells, turbulence, wind shear, etc 24 p4171 A66-42367
- Optical communication systems, discussing available equipment, transmission characteristic, lack of long distance operation reliability, etc 24 p4174 A66-42805
- Electro-optic light modulation using Pockel and Kerr effects in crystals for

- communications applications, using  
lasers 24 p4225 A66-42811  
Book on laser applications in radio  
communication systems 24 p4226 A66-43226
- LASER MODE**  
Self-locked gas laser mode dependence on  
cavity length and position of laser medium  
in cavity 01 p0081 A66-10347  
Phase relations of longitudinal modes in  
gas laser with annular  
resonator 01 p0082 A66-10726  
Induced emission modes of traveling wave  
laser 01 p0082 A66-10778  
Gas laser interferometers for plasma low  
electron density  
measurement 01 p0069 A66-10856  
Two-and three-step laser cascades detected  
experimentally in helium-neon mixtures,  
analyzing two-step cascade starting with  
density matrix  
formulation 02 p0241 A66-11477  
Laser model possessing two modes of  
different vibrational  
frequency 02 p0241 A66-11728  
Optical whispering mode of polished  
cylinders and implication in laser  
technology, noting trapped fluorescent  
light 02 p0262 A66-12203  
Mode-controlled giant pulse laser used to  
produce two-beam hologram in short  
exposure time of 30 nsec 02 p0233 A66-12215  
Synchronized mode of excitation for  
diffraction-coupled laser 03 p0375 A66-12293  
Laser excitation in quartz of elastic modes  
of thick plate, suggesting energy coupling  
mechanisms 03 p0376 A66-12423  
Pressure dependence of dominant emission  
modes from PbSe diode  
laser 03 p0378 A66-13003  
Multireflector Fabry-Perot laser resonators,  
discussing suppression effect against  
unwanted modes 03 p0380 A66-13325  
Time characteristics in generation of giant  
laser pulse studied by circuit with prismatic  
shutters 04 p0530 A66-13889  
Mode guiding and gain in junction laser  
due to dielectric sandwich confining wave  
propagation 04 p0530 A66-13952  
FM laser oscillation theory discussing  
effect of arbitrary atomic line shape,  
saturation, mode pulling, power output,  
sideband amplitude, distortion,  
etc 04 p0530 A66-13954  
Modes of emission-vs-time spectrum,  
optical emission spectrum and superposition  
spectrum of short confocal ruby laser in  
near field 04 p0532 A66-14290  
Spatial distribution of hollow-cone shaped  
emission of modes which are totally  
reflected in neodymium-glass  
lasers 04 p0532 A66-14291  
Mode selective characteristics of plane-  
parallel dielectric plate as reflector for  
ruby laser resonator 04 p0533 A66-14330  
Mode of operation of various ruby lasers  
with plane-parallel mirrors at room  
temperature 04 p0534 A66-14500  
Laser deflection and scanning by means of  
multimode cavities with dynamic spatial  
filters 05 p0693 A66-14829  
Laser light redistribution in illuminating  
optical signal processing systems noting  
apodization, spatial modes and aspheric  
elements 05 p0693 A66-14830  
Microwave beats identified between modes  
in bromine-argon mixture 05 p0695 A66-14923  
Peripheral modes in chelate laser, noting  
luminescence emitted by axis of cylindrical  
cell and lateral face 05 p0697 A66-15171  
Mode competition and coupling in Q-  
switched ruby laser 06 p0890 A66-16383  
CW laser oscillation between 11.48 and  
11.55 microns from nitrogen-carbon disulfide  
system 06 p0890 A66-16384  
Time dependence of laser operation modes,  
using laser model with two oscillation  
types 06 p0891 A66-16626  
Multiple internal-reflection folded-path  
rectangular laser configuration for obtaining  
length of active media between Fabry-Perot  
reflectors 06 p0891 A66-16652  
CW IR laser oscillation in HBr and HI gas  
discharge 06 p0892 A66-16756  
Derivation of two  
electromagnetic field and population  
inversion in solid state  
laser 06 p0893 A66-16773  
Self-modulation of laser with two-mode  
resonator 06 p0893 A66-16775  
Oscillation mode control in p-n junction  
lasers for current density reduction for  
stimulated emission 07 p1041 A66-17329  
Intensity distribution of fringe systems  
used to verify phase inversion between two  
lobes of laser in TEM-10  
mode 07 p1043 A66-17453  
Solid state laser system, describing  
quantum mechanical treatment of self-  
sustained oscillation for one  
mode 07 p1044 A66-17817  
Generation of induced laser radiation in  
prestationary regime 07 p1044 A66-17877  
Quasi-Fermi level, frequency, threshold  
pumping value and particular mode in  
radiative intraband  
transition 07 p1045 A66-18361  
Phase-locking effect and phase sum of LF  
and HF oscillating modes in  
laser 07 p1046 A66-18413  
Laser emission in pure cadmium sulfide  
crystals bombarded by electron  
beams 08 p1233 A66-18650  
HF modulation of radiation spikes due to  
beats between oscillation modes in optical  
ruby laser 09 p1386 A66-19955  
Time dependent emission behavior of  
single axial mode of diffraction limited ruby  
laser at room  
temperature 09 p1386 A66-20420  
Neodymium doped glass laser found to  
oscillate in conventional random pulsating  
manner under mode-locked  
conditions 10 p1541 A66-21251  
Single filament junction laser emitting  
coherent light of simpler modes, showing  
that laser has two portions, each with  
selective diffused region 10 p1542 A66-21357  
Induced emission modes of traveling wave  
laser 11 p1711 A66-22290  
Quantum mechanical nonlinear theory of  
intensity and phase fluctuations of  
homogeneously broadened laser  
noise 11 p1711 A66-22466  
Parasitic internal oscillations in laser  
crystal with dielectric rod caused by total  
reflection from generatrix of cylindrical  
sample 11 p1712 A66-22739  
Standing waves in laser resonators verified  
by placing thin metallic films between  
external mirrors of pulsed neodymium  
laser 11 p1713 A66-22893  
Mode suppression techniques for gas laser  
single axial mode operation for large mirror  
separations 11 p1713 A66-23093  
Excitation of axial oscillation modes in  
semiconductor lasers analyzed, based on rate  
equations for chemical potentials of carriers  
and number of photons 12 p1890 A66-24455  
Equations of motion governing interaction  
of optical modes in presence of time-varying  
parameters 12 p1890 A66-24559  
Two-level atom interaction with multimode  
gas laser cavity, obtaining stationary state  
and solving unique eigenvalue in special  
cases 12 p1891 A66-24568  
Dependence of beat frequency of  
neodymium laser axial modes on distance  
between mirrors and neodymium rod  
position within resonator 12 p1891 A66-24881  
Segmented-rod ruby laser structure  
operated as giant pulse laser, using Kerr  
cell to provide Q-switching, noting number  
of oscillating modes 13 p2088 A66-25038  
Multimode ruby resonator output as  
affected by mode number and mode  
degeneracy 13 p2088 A66-25043  
Second harmonic generated by transmitting  
laser radiation through tellurium  
monocrystal, while filtering out fundamental  
frequency 13 p2090 A66-25437  
Digital-mode FM CW laser ranging and  
tracking system using compound axis  
servomechanism 13 p2024 A66-25982  
Natural modes of plane and cylindrical  
dielectric resonators in optical  
band 13 p2093 A66-26042  
Laser oscillation and energy losses in  
medium containing active  
molecules 13 p2093 A66-26043  
Atmospheric observation with advanced  
light radar, noting equipment characteristics,  
molecular scattering mechanism,  
etc 13 p2122 A66-26133  
Parametric oscillator theory applied to  
tunable coherent optical parametric  
oscillation in lithium  
niobate 13 p2096 A66-26145  
Raman light forward emission in liquids  
when illuminated by laser, obtaining  
stimulated Raman action without feedback,  
which suggests existence of mechanism  
contributing to modulation of medium  
polarizability 13 p2097 A66-26160  
Laser action in gallium antimonide diodes,  
examining emitted light spectrum vs  
injected current, temperature effect,  
radiative efficiency, etc 13 p2100 A66-26184  
Spontaneous and coherent emission from  
lead sulfide, telluride and selenide diode  
lasers in oriented magnetic field,  
determining band edge parameters from  
spin-split zero order Landau level  
transitions 13 p2100 A66-26185  
Multiple quantum equations for mode  
amplitude and frequency determination for  
magnetic field-tuned gas optical  
maser 13 p2101 A66-26200  
Dependence of Zeeman beat frequency on  
interferometer tuning in single-mode He-Ne  
laser with various gas pressures and  
magnetic field strengths 13 p2101 A66-26201  
High resolution piezoelectrically scanned  
Fabry-Perot interferometer used to study  
gain profiles, mode structures and emission  
line widths of CW Ar, Kr and Xe ion lasers  
and Hg-He pulsed laser 13 p2102 A66-26208  
Correlations and intensity fluctuations in  
light from individual lasing and nonlasing  
modes of CW GaAs laser and threshold  
noise change in laser  
emission 13 p2102 A66-26210  
Periodic undamped oscillations in power  
intensity of two-mode optical  
maser 13 p2103 A66-26217  
Absolute flux measurement for pulsed and  
triggered lasers requiring only quantum  
receivers 13 p2104 A66-26375  
Phase locking of one laser to another by  
direct injection of first laser beam into  
second laser cavity 13 p2105 A66-26593  
Relaxation oscillation in single-mode  
operation of room-temperature CW ruby  
laser 14 p2306 A66-27028  
Steady state regime of electromagnetic  
oscillation in laser 14 p2306 A66-27065  
Axial and transverse mode selection,  
emission spectrum and transient emission  
behavior of confocal ruby laser operated in  
ellipsoidal pumping  
system 14 p2308 A66-27606  
Experimental observation of regular  
spiking in neodymium doped glass laser rod  
attributed to simultaneous oscillation of  
many transverse and longitudinal  
modes 15 p2513 A66-28727  
Solar pumping and modulation of various  
laser materials for deep space  
communication, noting TV picture  
transmission 15 p2513 A66-28971  
Hysteresis phenomena in He-Ne gas laser  
in axial magnetic field and polarization of  
oscillating mode within certain tuning  
region 15 p2516 A66-29385  
Reversible bleachable dye-solutions for  
expander elements in  
laser 15 p2517 A66-29388  
Ultrashort optical pulses generated by  
mode locking continuous neodymium doped  
yttrium-aluminum garnet  
laser 15 p2517 A66-29391  
Time characteristics in generation of giant  
laser pulse studied by circuit with prismatic  
shutters 15 p2518 A66-29702  
Crystal motion effect on time behavior of  
laser generation mode, using high speed  
photography and  
oscillograms 15 p2518 A66-29725  
Length dependent threshold data for  
stimulated Raman emission in liquids, noting  
correlation between laser beam self-focusing  
and onset of Raman  
emission 16 p2716 A66-30157  
Nonuniform pumping effects on near-axial  
low-order transverse mode structure in solid  
state laser cavity 16 p2719 A66-31087  
Mode locking in gaseous laser whose cavity  
is length modulated at mode separation  
frequency 16 p2719 A66-31095  
Modes of tilt-mirror optical resonator,  
using spillover radiation to extract coherent  
far IR 16 p2747 A66-31134  
Ionization of air with laser radiation in  
spike mode 16 p2762 A66-31150  
Linear absorption effect on threshold for

self-focusing of laser beam in cadmium sulfide, noting variation of absorption coefficient 16 p2720 A66-31537

Laser mode operation in pressure of radiation absorbing impurity analyzed by extended Thomson type system 16 p2720 A66-31558

Low noise photodiodes with avalanche multiplication for high sensitivity, noting capability for low intensity wideband signal detection, performance in IR region, etc 17 p2880 A66-31934

Second-harmonic enhancement in nonlinear crystal by loss modulator coupling of pulsed ruby laser modes 17 p2933 A66-31939

Steady state oscillations of molecular beam laser with inhomogeneous sinusoidal field in resonator 17 p2885 A66-32243

Laser operated with saturable filter for Q-switching, noting two modes of excitation soft and hard regime/ 17 p2934 A66-32314

Effect of anomalous dispersion on stimulated emission spectrum of doped cadmium fluoride crystals 17 p2977 A66-32317

Selective diffused junction laser, discussing GaAs laser used for quenching experiment 17 p2934 A66-32408

Fabry-Perot etalon use for interferometry and laser control, noting low angle scattering, laser oscillation, thermal tuning sensitivity, etc 17 p2925 A66-32619

Oscillation conditions for feedback lasers, superradiant directionally coherent emission lasers and coherence brightened emission lasers 17 p2934 A66-32628

Michelson interferometer used to study modes of red He-Ne laser 17 p2937 A66-33316

Laser radar ranging system using pseudorandom code modulation, considering application to pulse and digital circuitry, statistical communication theory and electro-optical engineering 18 p3117 A66-33557

Mode characteristics of solid state lasers from analytical solution of conservative equation 18 p3118 A66-33839

Optical frequency breakdown threshold of inert gas mixtures, using focused beam radiation from Q-spoiled neodymium laser 18 p3138 A66-34236

Derivation of two equations for electromagnetic field and population inversion in solid state laser 19 p3372 A66-35370

Self-modulation of laser with two-mode resonator 19 p3372 A66-35372

Transfer efficiency of laser pumping cavities with diffusely reflecting wall determined, based on approximately isotropic nature of light inside cavity 19 p3372 A66-35379

Doppler shift and high velocity mirror translation effects on mutual optical coherence function of gas laser Michelson interferometers 19 p3354 A66-35387

Laser mirror transducer decoupling from mechanical resonances of laser cavity 19 p3374 A66-35813

Mode theory of spherical mirror resonators, discussing diffraction losses, resonant conditions, mode patterns, internal focusing elements, mode selection, etc 20 p3599 A66-36972

Second harmonic frequency generation obtained in process of optical mixing of collinear neodymium laser beams in potassium dihydrogen phosphate 20 p3578 A66-37550

Phase relations of longitudinal modes in gas laser with annular resonator 20 p3579 A66-37663

Excitation of axial oscillation modes in semiconductor lasers analyzed, based on rate equations for chemical potentials of carriers and number of photons 20 p3579 A66-37687

Electron beam scanlaser based on laser cavity directly and/or transversely degenerate having Q-spoiled for all modes but one 20 p3581 A66-38244

Pulsed-mode gain characteristics in neodymium-doped silicate glass laser experimentally related to giant-pulse laser energy output 20 p3582 A66-38396

Coupling of adjacent axial modes in external Raman resonator observed as first Stokes frequency with benzene as Raman medium and Q-switched ruby laser as pump source 21 p3747 A66-39109

Quenching and hysteresis effects between

Zeeman oscillations on single axial mode observed in near-zero magnetic fields for short planar laser 21 p3747 A66-39116

Laser mode-locking during resonator Q-factor modulation 21 p3748 A66-39303

Stable limiting cycles of laser resulting from mutual synchronization of phase-shifted oscillation modes 22 p3929 A66-39653

Frequency doubling of laser light with variable Q-switched resonator 22 p3929 A66-39654

Intensity and frequency equations for interband optical transitions and multimode properties in semiconductor lasers 22 p3929 A66-39666

Atomic degeneracy influence on mode interactions in gas laser 22 p3931 A66-39930

CW ruby laser of 10-mm length in ellipsoidal pumping system under water cooling, noting various modes 22 p3931 A66-40100

Electron thermalization effect on semiconductor laser behavior, noting optical transition between impurity level and band, taking into account diffusion process 22 p3933 A66-40790

Steady state regime of electromagnetic oscillation in laser 22 p3933 A66-40824

Dependence of beat frequency of neodymium laser axial modes on distance between mirrors and neodymium rod position within resonator 23 p4076 A66-41088

Theory of steady multimode oscillation of solid state laser extended to cavities with inefficient end mirrors or losses dependent on frequency 23 p4077 A66-41274

Frequency tuning of coherent emission over vibronic continuum of phonon-terminated optical masers by thermal tuning and wavelength-selective feedback 23 p4077 A66-41369

Quantum theory of Q-spoiled laser, noting statistics of number of photons in mode bear qualitative resemblance to Poisson statistics 23 p4077 A66-41373

Parasitic internal oscillations in laser crystal with dielectric rod caused by total reflection from generatrix of cylindrical sample 23 p4078 A66-41477

Ruby laser giant pulse off-axial modes detected with high resolution spherical Fabry-Perot interferometer 23 p4079 A66-41627

Spectral width of peak type and monopulse type radiation of solid-body laser in nonstationary regime 24 p4219 A66-42133

Photoelectron emission statistics determining probability distribution of photoelectron counts in photomultiplier illuminated by laser below and above threshold of oscillation 24 p4220 A66-42543

Mode selection, relaxation oscillations, mode interaction and thermal effects in room temperature CW lasers in ellipsoidal pumping systems 24 p4221 A66-42546

Spectroscopy of IR emission and laser oscillation resulting from transient population inversions on electronic transitions in molecular nitrogen 24 p4221 A66-42550

Current measuring device for EHV transmission line, obtaining instantaneous magnetic field by gauging Faraday rotation angle of laser beam in flint glass rod 24 p4222 A66-42556

Single transverse and longitudinal modes observed in output of passive Q-switched ruby laser when two spherical mirrors are used for resonator 24 p4223 A66-42563

Mode coupling in ruby laser with reactance placed within cavity resonator with modulation frequency close to separation of axial modes, examining electric field envelope 24 p4223 A66-42565

Scattering matrix analysis of single frequency Michelson type He-Ne gas laser, including frequency and amplitude stability analysis of oscillation spectrum 24 p4223 A66-42566

Laser beams and resonators, discussing beam propagation in free space, geometrical optics application and resonator modes in view of aperture diffraction effects 24 p4225 A66-42806

Laser mode control and stabilization using internal time-varying perturbation 24 p4174 A66-42813

# LASER OUTPUT

Pentacarbocyanine compound used to reduce monopulse duration in neodymium laser 01 p0080 A66-10262

Fast photoionization aureole detection and cloud of concentrated long-lived ionization from spark shock wave in laser beam 01 p0080 A66-10263

Ruby laser output exhibiting regular spikes 01 p0080 A66-10324

Focused laser as accelerating cavity for cyclic particle accelerator 01 p0080 A66-10328

Peak power transients of near confocal helium-neon laser working at 6328 angstroms on pulsed discharge basis 01 p0080 A66-10329

Self-locked gas laser mode dependence on cavity length and position of laser medium in cavity 01 p0081 A66-10347

Laser transition identification in electron beam pumped gallium arsenide, primarily on concentration of shallow donors and acceptors 01 p0081 A66-10348

Electron beam pumping of noble gas ion laser 01 p0081 A66-10350

Laser oscillation increase in efficiency in neodymium doped glass produced through energy transfer 01 p0081 A66-10352

Gallium arsenide injection laser for prolonged operation at liquid nitrogen temperatures 01 p0081 A66-10369

Atomic beam lasers, particularly for population inversion in levels of optical transition 01 p0082 A66-10448

Laser with diffraction limited radiation pattern 01 p0082 A66-10450

Breakdown of gases under influence of laser spark phenomena with subsequent absorption of laser radiation and gas heating 01 p0082 A66-10646

Current and voltage distribution over length of HF discharge in helium-neon laser 01 p0082 A66-10704

Nonlinear interaction of oscillations of two types in laser does not affect stationary operation when oscillations are sufficiently apart in band 01 p0082 A66-10724

Aerodynamic and heat transfer measurements using interferometer with continuous wave laser as source 01 p0069 A66-10849

Thermal limitations on capabilities of gallium arsenide p-n junction lasers 01 p0082 A66-10895

Two-dimensional laser deflection using Fourier optics 01 p0083 A66-10897

Carrier frequency stabilization of FM laser with respect to center of atomic gain profile, using small distortion present in laser oscillation 01 p0083 A66-10966

Laser-action threshold in electron-beam excited gallium arsenide and effect of temperature and doping 01 p0083 A66-10971

UV and visible laser oscillations in fluorine, phosphorus and chlorine atoms in pulsed chlorine, phosphorus fluoride and sulfur fluoride gas 01 p0083 A66-10972

Discharges sharply directional coherent radiation generation by synchronized lasers or multimirrored resonator of single laser 01 p0083 A66-11007

Kinetic equation of laser optimum emission, determining pumping efficiency, value of losses in special modes, etc 01 p0084 A66-11058

Cadmium telluride laser with electron excitation 01 p0084 A66-11188

Metallic plasma tube for ion lasers allows them to run at higher current densities than with ceramic tubes 02 p0239 A66-11373

Pressure dependence of output of helium-neon gaseous laser in high pressure range 02 p0239 A66-11375

Second harmonic light generation, stressing saturation effects occurring at high laser power levels, solving nonlinear coupled Maxwell equations 02 p0239 A66-11443

Quantum-electronic cross-modulation effect noted while monitoring IR laser interferometric fringes 02 p0240 A66-11449

Laser transition in vibrational state of ground electronic state of CN from rotational level 8 to 7 with population inversion as result 02 p0240 A66-11451

Laser application problems in interferometry, radar and holography including mechanical stability, noise suppression, dirty laser beam restoration,

etc 02 p0240 A66-11454  
 Development in U.S. of laser application with table including government supported programs in photography, data processing, radar, etc 02 p0240 A66-11455  
 Linear coefficient of amplification of carbon dioxide subjected to HF excitation field for laser emission 02 p0241 A66-12003  
 Current status of theoretical and experimental studies of variant of Raman effect encountered in scattering of laser light 02 p0241 A66-12065  
 Quantum yield coefficient of stimulated emission and angular distribution of laser diode emission 02 p0242 A66-12086  
 Lossless conversion of plane laser wave to plane wave of uniform irradiance, noting planoaspheric lenses method and aberrated lens system 02 p0242 A66-12204  
 Gain and bandwidth narrowing in regenerative helium-xenon laser amplifier 03 p0376 A66-12308  
 Brillouin scattering in liquids examining velocity, frequency and lifetime of thermally excited hypersonic sound waves, using laser light sources 03 p0376 A66-12422  
 GaAs optically coupled transistor structure with lasing emitter 03 p0377 A66-12442  
 Cut-off of ruby laser emission by pulsed electron and bremsstrahlung radiation, using adiabatic temperature 03 p0377 A66-12447  
 Output power and pulse duration of ruby laser 03 p0378 A66-12602  
 Pulsed laser-created plasmas by light absorption by skin effect 03 p0403 A66-12975  
 Intense laser beam focusing effect in gas to study light-induced discharges by time-resolved spectroscopy and photography 03 p0378 A66-12978  
 Internal bubble formation and cracking in rods of Q-switched ruby and Nd-glass lasers caused by laser light, and in case of Nd-glass rods, by platinum inclusions in glass 03 p0378 A66-13002  
 Pressure dependence of dominant emission modes from PbSe diode laser 03 p0378 A66-13003  
 Polarization of light from glass laser doped with two percent positive trivalent neodymium measured with time resolution of less than microsecond 03 p0378 A66-13006  
 Intensity distribution in Fabry-Perot interferometer producing resonant waves for large Fresnel number applied in model for filament-form laser mechanism 03 p0379 A66-13097  
 Model for behavior of optical maser in static magnetic field of arbitrary strength in Z direction and in electromagnetic field composed of traveling waves 03 p0379 A66-13135  
 Pulse energy and power of lasers under continuous operating conditions measured, using calorimeters, photoelectric effect of radiation, etc 03 p0379 A66-13205  
 Lasers as triggering mechanism for spark gaps, noting delay time between pulse arrival and current flow 03 p0379 A66-13247  
 Quantum statistics for analyzing radiation fields interacting with other systems applied to model laser operating as linear amplifier 03 p0379 A66-13260  
 Pentacarbocyanine compound used to reduce monopulse duration in neodymium laser 03 p0379 A66-13307  
 Fast photoionization aureole detection and cloud of concentrated long-lived ionization from spark shock wave in laser beam 03 p0379 A66-13308  
 Atomic beam lasers, particularly for population inversion in levels of optical transition 03 p0380 A66-13311  
 Laser with diffraction limited radiation pattern 03 p0380 A66-13313  
 Measuring device for pulsed laser output power using bolometer, amplifier and oscilloscope 04 p0520 A66-13888  
 Experiments on helium-neon FM lasers covering phase-locked and FM region power output, modulation index and distortion experiments 04 p0530 A66-13955  
 Construction problems of continuous-duty DC excited ion lasers 04 p0530 A66-13956  
 Laser oscillations and self Q-switching, discussing pulsed flash-lamp excitation experiments with triply activated confocal barium crown glass etalon 04 p0531 A66-13980

High power Brewster window laser with gas fills, discussing power output and efficiency parameters 04 p0531 A66-13983  
 Static characteristics of gas laser internal modulation circuit, using electro-optical crystal inserted into gas laser resonator 04 p0531 A66-14059  
 Fractures in neodymium-doped alkaline silicates and borosilicates produced by laser beam 04 p0532 A66-14174  
 Conical emission in ruby lasers with exterior mirrors 04 p0532 A66-14278  
 Spikefree emission from laser using long ruby crystal doped heavily with chromium and suitable symmetry for pump radiation 04 p0533 A66-14331  
 Rise time and output power of single pulse in He-Ne laser measured by method of changing Q-factor by plate located in resonant cavity 04 p0533 A66-14332  
 Interaction of light pulse from ruby laser with mercury surface, observing mechanical impact believed to be rapid vaporization process 04 p0533 A66-14373  
 Laser beam use in biology and medicine, noting interaction of electromagnetic radiation with biological systems, hazards, diagnostics, therapeutics, etc 04 p0534 A66-14455  
 Plasma generation by focusing laser beam in air at atmospheric pressure and room temperature indicate connection with luminous energy absorption during breakdown 05 p0692 A66-14538  
 Minority carrier lifetime in silicon measured by contactless method, using laser induced modulation of IR transmission in silicon /LIMIRIS/ effect 05 p0729 A66-14563  
 Gallium arsenide p-n junction laser diode covering injection current distribution, density and emission spectra variation 05 p0692 A66-14659  
 Thomson scattering measurements of magnetic annular shock tube plasmas using Q-switched ruby laser light beam 05 p0680 A66-14707  
 Rise of junction temperature during continuous operation of GaAs injection laser 05 p0692 A66-14771  
 Atmospheric breakdown limitations to optical maser propagation 05 p0632 A66-14837  
 Helium-neon laser output characteristics as function of laser parameters 05 p0694 A66-14897  
 Laser oscillation in calcium tungstate crystals activated with trivalent praseodymium 05 p0694 A66-14898  
 Stimulated Raman and Brillouin scattering for Stokes radiation parallel to laser beam in rectangular waveguide 05 p0694 A66-14901  
 Output spectra of argon ion laser in ring resonator and two mirror resonators 05 p0694 A66-14904  
 Ruby lasers discussing output characteristics, beam divergence, beat modes and respective experimental techniques 05 p0695 A66-14919  
 Photographic film used for quantitative measurements of intensity distribution in Q-switched laser beam 05 p0695 A66-14920  
 Electrodeless excitation of discharge in helium-neon gas laser tube applied to voice transmission 05 p0696 A66-14924  
 Fraunhofer pattern of laser light transmitted through optical fiber, noting spatial frequency of interference fringes between light waves 05 p0696 A66-14972  
 Laser oscillations of silicon tetrachloride, silicon tetrafluoride and ethyl silicate in gaseous discharge 05 p0696 A66-14973  
 Time dependent emission behavior of ruby laser discussing rate equations, Q-value, output power, steady state values, etc 05 p0696 A66-14981  
 Evolution of luminous zone of plasma generated by focusing laser beam in air 05 p0723 A66-15097  
 Airborne laser-radar light detection and ranging /LIDAR/ systems applied to detection of clear air turbulence /CAT/ 05 p0697 A66-15297  
 Propagation rate of high power laser light pulse in inversely populated medium 05 p0717 A66-15333  
 Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 05 p0697 A66-15352

Modulation of laser light with composite Fabry-Perot resonator, using more than three multiple reflecting plates 05 p0698 A66-15836  
 Intensity distribution of radiation immediately after leaving laser and after focusing within lens, noting optimum focusing conditions 05 p0698 A66-15853  
 Optical-misalignment effect on threshold power of solid state laser and compensation via lens in resonator 05 p0698 A66-15854  
 Energy losses in ruby laser due to heat evolution during optical pumping, noting relation between energy absorption and population inversion 05 p0698 A66-15858  
 Powerful pulse of ruby laser emission generated by ultrasonic traveling wave diffraction modulator 05 p0698 A66-15861  
 Variation of scattering cross section with beam intensity for ruby laser light on atomic hydrogen 05 p0698 A66-15864  
 Dispersion resonator performance in ruby laser, showing generation of R sub 1 and R sub 2 lines 06 p0889 A66-16346  
 CW laser action in carbon dioxide-helium mixtures 06 p0890 A66-16385  
 Ruby laser noise radiation consisting of increased luminescence and laterally dispersed generation determined from energy level populations 06 p0891 A66-16628  
 Optical design of elliptical cavities and comparison of energy transfers from light source to ruby laser with cylindrical cavities 06 p0891 A66-16647  
 Laser communications link security against interception, examining frequency bandwidth for minimum SNR 06 p0891 A66-16650  
 Helium-neon gas lasers, discussing amplitude variation suppression technique 06 p0892 A66-16670  
 Regular periodic spiking in output of pulsed neodymium doped borate glass laser at pumping levels slightly above threshold 06 p0892 A66-16672  
 Life performance characteristics of uncoated ruby laser Q-switched by rotating prism forming end reflector of laser resonator 06 p0892 A66-16675  
 Ground state ESR saturation effect on ruby laser output frequency at cryogenic temperature 06 p0892 A66-16753  
 CW high-power carbon dioxide-nitrogen-helium laser operation, noting helium addition 06 p0892 A66-16754  
 Stimulated emission in indium arsenide shows excitation threshold low and light emission highly directional 06 p0893 A66-17026  
 Gas breakdown by laser can be accounted for by both microwave breakdown theory and inverse bremsstrahlung 06 p0893 A66-17040  
 Ionization under laser action extended to metals and dielectrics, noting influence on thresholds 06 p0893 A66-17065  
 Conventional flow visualization using laser light source [ATAA PAPER 66-127] 06 p0870 A66-17104  
 Light output from helium-neon gas maser photographed with and without intracavity modulation at locking frequency, using high speed rotating mirror 07 p1040 A66-17205  
 Fused silica output coupling component for laser system, using frustrated total internal reflection configuration 07 p1040 A66-17287  
 Recording sampling system for measuring energy incident on biological system exposed to laser beam 07 p1030 A66-17293  
 Laser radiation absorbed along slant paths, spectral line overlapping and center line shift with pressure variation 07 p1041 A66-17295  
 Temperature dependence of emission spectrum and threshold current in GaAs lasers 07 p1042 A66-17333  
 Excitation of semiconductor lasers by beam of fast electrons, discussing work of Shockley, Popov, Keldysh and Krokhin 07 p1043 A66-17337  
 Laser-beam scattering by individually introduced charged polystyrene spherical particles and droplets of naphthalene and water in combination 07 p1043 A66-17473  
 Oscillation spikes in quasi-continuous operation of ruby laser at room temperature, noting threshold pumping energy 07 p1043 A66-17532

- Compton scattering of laser photons, noting transformation into gamma radiation photons upon collision with high energy electrons 07 p1044 A66-17816
- Isotope shift, linewidth and precise wavelength of laser emission in ionized g 07 p1044 A66-18035
- Pulsed laser welding, wire-to-wire, sheet-to-sheet, circuit board, vacuum tube, etc 07 p1038 A66-18153
- Diffraction velocimeter detecting and measuring transverse movement of surface by sensing light backscattered by it when laser illuminated 07 p1044 A66-18333
- Electron energy spectra in neon, xenon and helium-neon laser discharges, calculating production and destruction rate parameters 07 p1045 A66-18354
- Stable single-frequency output from laser cavity obtained by filter method and resonance suppression 07 p1045 A66-18356
- Frequency stabilization of gas lasers, using atomic resonance and interferometers 07 p1045 A66-18357
- Time resolution of electron and ion emission produced by Q-switched ruby laser pulse focused on metal surface 07 p1045 A66-18358
- Replica techniques and electron and optical microscopy to study laser irradiated metal surfaces 07 p1052 A66-18393
- Organic cations effect on laser threshold of solutions of tetrakis form of europium benzoyltrifluoroacetate 07 p1046 A66-18418
- Laser action on rotational transitions of  $10_0-9_8$ ,  $8-7$ ,  $7-6$  and  $6-5$  vibrational bands of ground electronic state 07 p1046 A66-18424
- Intensity fluctuations in output of four-level CW laser oscillators by linearized rate equations 07 p1047 A66-18434
- Peak irradiance of optical pump and total pump-energy incident upon laser crystal determined, accounting for temperature variation effects 07 p1047 A66-18487
- Helium-neon gas discharge intensification for 6328A laser wavelength, discussing measurement techniques, gain parameters and results 08 p1232 A66-18632
- Statistical model of random quasi-sinusoidal function of constant amplitude represented by emission of laser or radio transmitter 08 p1244 A66-18637
- Laser development, discussing basic theory, pumping methods and laser types 08 p1233 A66-18700
- Cross section measurement for electromagnetic backscattering of laser beams from rough aluminum and magnesium oxide surfaces 08 p1182 A66-18930
- Laser with neodymium-glass Q-factor modulation 08 p1233 A66-18970
- Heating by laser beam with application to lithium, noting use for high temperature plasma production 08 p1233 A66-18972
- Higher order calculation of laser output, noting approximation method for linewidth parameter and Lamb dip shape 08 p1233 A66-19063
- Correlation factor for induced radiation frequency shifts and crystal temperature variations in ruby laser 08 p1233 A66-19269
- Gas laser emission solution by determining emission field density dependence on resonator parameters, relaxation characteristics and atom excitation in gas discharge plasma 08 p1234 A66-19271
- Laser regime with giant pulses generated in dysprosium doped cadmium fluoride under continuous pumping by xenon lamps, obtaining Q factor modulation by rotating prism 08 p1234 A66-19376
- Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion 08 p1234 A66-19669
- Micromachining with pulsed helium-neon gas laser, noting experimental techniques, operation and application 08 p1232 A66-19734
- Decay time of regular spiking in ruby laser in nearly concentric cavity and photomixing of light output 08 p1235 A66-19812
- Wavelength change of spontaneous and stimulated emission with uniaxial pressure under CW operation of GaAs diode laser at 4 degrees K 09 p1385 A66-19922
- Optically biased pulsed transmission mode operation of Q-switched laser, in connection with Kerr cells inhibiting lasing action 09 p1386 A66-19937
- Sharply directional coherent radiation generation by synchronized lasers or multimirrored resonator of single laser 09 p1386 A66-19945
- Spark discharge in air induced by focusing laser radiation, determining temperature of plasma produced near focus 09 p1386 A66-19959
- Induced radiation at high photon densities, noting applicability of perturbation theory to multiphoton resonance radiation of lasers 09 p1386 A66-20344
- Output power of CW laser measured by wire bolometer in form of plane single-layer spiral as sensitive element 09 p1381 A66-20364
- Effect of load mismatch on laser output, determining nonlinear dependence of equivalent negative conductance as function of oscillation amplitude in laser resonator cavity 09 p1386 A66-20435
- Intense UV pumping effect on ruby laser output 09 p1387 A66-20519
- Solid state laser output exhibiting regular and irregular spikes analyzed through relaxation oscillations and classical physics 09 p1387 A66-20568
- Superconductors applied to magnets, lasers and MHD power generation 09 p1429 A66-20674
- Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 09 p1387 A66-20893
- Laser radar as instrument to obtain operational meteorological information 10 p1540 A66-21067
- Isotope shift measurement for 6328 angstroms helium-neon laser transition 10 p1540 A66-21070
- Laser configuration generating single frequency radiation in single spatial mode with high output achieved by suppressing all resonances but one 10 p1541 A66-21250
- Dielectric cavity maser composed of ruby rod separating metal plates, noting strength saturation behavior, power output, etc 10 p1541 A66-21308
- Pump power dependence of ruby laser starting and stopping time predicted via rate equation analysis 10 p1541 A66-21309
- Spiking behavior of multimode ruby laser in spherical resonator, interpreting near-field patterns, frequency spectrum, etc 10 p1542 A66-21311
- Laser induced gas breakdown at high pressures, noting effect of plasma density on index of refraction via optical frequency resonance measurement 10 p1542 A66-21564
- CW laser action on triple state phosphorus-sulfur transition, using hydrogen sulfide-noble gas mixtures 10 p1543 A66-21577
- Effective mass in InAs and InSb from Landau shift of peak emission in laser diodes 10 p1543 A66-21579
- Carnahan proposed first order ether drift experiment using two lasers shown to be of second order nature, noting role of phase shifts 10 p1543 A66-21656
- Ionization phenomena in argon due to laser radiation by measuring electron density and energy as time function after laser pulse initiation at different gas pressures and preionized conditions 10 p1565 A66-21690
- [AIAA PAPER 66-176] 10 p1565 A66-21690
- Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion 10 p1543 A66-21836
- Silicon and selenium doping effects on gallium arsenide laser characteristics 10 p1543 A66-21879
- Soviet and foreign papers on plasma diagnostics by scattering of laser beams at plasma electrons 10 p1569 A66-21990
- Second harmonic generation by laser beams of finite spectral width, using quantum transitions and kinetic equations, noting shape of pumping line at fundamental frequency 10 p1544 A66-22026
- Degree of excitation of metastable state determined, using luminescence saturation phenomenon, calculating population of working level of laser substance 10 p1544 A66-22027
- Measurement of radiation pattern of ruby laser emission for various resonators and operating regimes, noting laser effect on angular half-width values 10 p1544 A66-22028
- High sensitivity fast-response laser detection system, describing microwave response photoelectric detector with amplification and mixing functions 10 p1544 A66-22046
- Gallium arsenide laser excitation by fast electrons 10 p1544 A66-22146
- Plasma production by optical irradiation of gases and by solids, considering interaction of laser radiation with surfaces and irradiation of particles of solid material in vacuum [AIAA PAPER 66-174] 11 p1742 A66-22212
- Dispersion resonator performance in ruby laser, showing generation of R sub 1 and R sub 2 lines 11 p1711 A66-22345
- Equations obtained from Hamiltonian for coupling, first Stokes line, first anti-Stokes line and coherent field for Raman laser 11 p1711 A66-22490
- Wavelength measurement of helium-neon laser emission by double-channel recording interferometer, using krypton-86 primary standard 11 p1712 A66-22874
- Optical diffraction velocimeter, using backscattered laser light to measure relative velocity between light source and surface 11 p1706 A66-22958
- Moon shape determined by measuring distance from lunar surface points to lunar center of mass, using optical laser radar 11 p1774 A66-22964
- Design and operation of helium-neon laser noting radiation, frequency structure, power density, external magnetic field effect, application, etc 11 p1713 A66-22980
- He-Ne laser IR radiation emission attenuated by atmospheric methane 11 p1657 A66-23090
- Current and voltage distribution over length of HF discharge in helium-neon laser 11 p1714 A66-23309
- Mach-Zehnder laser interferometer as diagnostic tool in shock tube experiments 11 p1714 A66-23352
- Carbon and ethylene tetrachloride ultrasonic modulators applied to IR laser heterodyne experiments on InAs photodiode 11 p1714 A66-23353
- Laser action on rotational line in carbon dioxide and nitrous oxide vibrational spectra in both P and R branches up to J values of over 50 11 p1714 A66-23357
- Efficient conversion of electrical energy into laser radiation, using coaxial optical pump 11 p1715 A66-23479
- Single pulse operation of lasers, noting energy storage and amplification effect for four- and three-level active medium 12 p1889 A66-23667
- Laser ranging via digital counter coupled photomultiplier tube, noting spectral response, gain transit time dependence, output coupling and effective cathode diameter 12 p1830 A66-23759
- Spatial amplitude of field of ideally parallel laser beam focused by optical systems with spherical aberration 12 p1889 A66-23778
- Laser application and techniques noting amplification, modulation, interferometry, scattering, plasma diagnostics, nonlinear optics, etc 12 p1889 A66-23931
- Polish-made He-Ne red gas lasers, describing power outputs, gas pressure, He/Ne ratio, mirror transmission coefficient and interferometric application 12 p1889 A66-23946
- Cadmium telluride laser with electron excitation 12 p1890 A66-24009
- Optically pumped rubidium 87 maser oscillator 12 p1890 A66-24124
- Focused energy techniques for joining, including laser welding [ASTME PREPRINT AD66-718] 12 p1886 A66-24413
- Laser welding for production microwelding, noting design, construction and application [ASTME PREPRINT MM66-707] 12 p1886 A66-24415
- Spatially independent laser rate equation generalized for multimode effects, noting steady state oscillation threshold singularities, spiking parameters,

etc 12 p1891 A66-24560  
 Steady state value of inverted population, power output, threshold behavior and spiking characteristics for single-mode laser when radiation intensity has spatial dependence 12 p1891 A66-24562  
 Pulsed induced emission in hydrogen beam laser for case of two relaxation times, determining polarization only by number of active particles in resonator 12 p1891 A66-24884  
 Dependence of emission intensity of gas laser on longitudinal and transverse magnetic fields, using simplified model 12 p1891 A66-24885  
 Treatment of steel with laser beam, obtaining precision holes without affecting microhardness of metal 12 p1888 A66-24898  
 Correlation functions of amplitude and intensity fluctuation for laser model near threshold obtained by using distribution functions evaluated by Fokker-Planck equation, treating amplitude as random variable 12 p1892 A66-25018  
 Segmented-rod ruby laser structure operated as giant pulse laser, using Kerr cell to provide Q-switching, noting number of oscillating modes 13 p2088 A66-25038  
 Ruby laser amplifier dynamics, noting amplification in energy gain regimes and correlation to theoretical equations 13 p2089 A66-25049  
 Formation of ultrasonically gated giant laser pulses by Q-spilling, noting photographs of ruby and role of cavitation in gating mechanism 13 p2089 A66-25057  
 Traveling wave beats created by ring laser on rotating platform, noting frequency division rotating rate and capture band parameters 13 p2089 A66-25102  
 Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 13 p2089 A66-25103  
 Holograms and wavefront reconstruction techniques involving prismatic refraction of monochromatic and coherent laser light causing interference pattern on photographic emulsion 13 p2076 A66-25144  
 Cavity loss and optimum reflectivity of output mirror in ruby laser with external mirror 13 p2089 A66-25187  
 Angular distribution of stimulated Raman radiation, discussing axial and off-axial Stokes and surface radiation mechanism 13 p2090 A66-25189  
 Optical resonator diffraction loss, noting laser oscillations in high loss arrangements, output beam power, field patterns, etc 13 p2090 A66-25195  
 Laser producing two or three light pulses in sequence with interval between pulses mechanically controlled by optical wedge inserted into resonator 13 p2090 A66-25322  
 Adjustment procedure for laser with polygonal resonator, noting spatial mirror adjustment in addition to angular adjustment 13 p2090 A66-25323  
 Effective diffusion cross section of ultrasonic and laser beam while acting on turbulent flow 13 p2062 A66-25404  
 IR laser radiation with power of 5.7 watts in vicinity of 10.69  $\mu$ m in sealed tube containing pure carbon dioxide excited by AC or DC current 13 p2131 A66-25410  
 Second harmonic generated by transmitting laser radiation through tellurium monocrystal, while filtering out fundamental frequency 13 p2090 A66-25437  
 Optical excitation in indium arsenide and gallium antimonide yielding laser radiation 13 p2090 A66-25438  
 Energy spectra of ions emitted by beryllium, carbon and molybdenum heated by laser 13 p2131 A66-25479  
 Neodymium doped YAG crystal and lithium meta niobate as CW laser materials and potassium tantalum niobate as optical modulator material 13 p2164 A66-25518  
 Optical ray tracing to predict focusing characteristics of laser light in refractive targets, calculating heating effects in target, noting target geometry, refractive index, thickness of skin layers, etc 13 p2090 A66-25531  
 Coherent light recording/reproducing techniques based on Debye theory of coherent light source focusing 13 p2091 A66-25541

Output power of 6328 angstrom He-Ne gas laser as function of laser gain, cavity loss and output coupling 13 p2091 A66-25651  
 Alignment of laser mirrors using gas laser with highly collimated beam of small diameter 13 p2092 A66-25824  
 Gallium arsenide p-n junction laser diode, injection current distribution, density and emission spectra variation 13 p2092 A66-25934  
 Sensitivity and tracking capabilities of precision laser automatic tracking system 13 p2025 A66-25984  
 Laser pumping by intense noble gas discharge in zeta-pinch geometry 13 p2092 A66-25995  
 Spectroscopy of lithium fluoride crystals activated with uranium trioxide for laser action, showing anomalous fluorescent decay under high intensity pumping 13 p2092 A66-25997  
 Elliptic cavity design for solid state lasers, discussing multiple reflections, absorption coefficient, refraction losses, etc 13 p2092 A66-25998  
 Optical length variations in laser amplifiers determined during pumping and amplification, using interferometry 13 p2092 A66-25999  
 Photographic copies of holograms taken with laser light noting film, light source, directional effect, processing, etc 13 p2081 A66-26000  
 Microwave models of optical resonators, discussing correction of discrepancies resulting from approximations in measurements 13 p2093 A66-26006  
 Amplification of interaction of atoms and of pulsed or periodic cooling of transparent media produced by laser beam, noting changes in kinetic energy of atoms 13 p2093 A66-26021  
 Automodulation of emission from solid state laser 13 p2093 A66-26041  
 Helium-neon laser multibeam generation in gas discharge tube, using spherical mirrors and tapered plates 13 p2093 A66-26053  
 Magnetization induced by circularly polarized laser light incident on nonabsorbing material, in absence of external magnetic field, in doped calcium fluoride proportional to light intensity and Verdet constant 13 p2131 A66-26142  
 Second harmonic generation of light analyzed, stressing saturation effects occurring at high laser power, solving nonlinear Maxwell equations 13 p2096 A66-26144  
 Light frequency multipliers for nonlinear optical effects at various wavelengths, considering focusing, laser beam finite divergence, air breakdown, stimulated Raman emission, etc 13 p2096 A66-26146  
 Nonlinear light scattering in pressurized methane, noting displacement of spectral line from laser frequency 13 p2132 A66-26148  
 Nonlinear susceptibility describing second harmonic generation of light measured in semiconductors with zinc-blende symmetry, using quantum mechanics and laser wavelength 13 p2168 A66-26149  
 Cross section for inelastic scattering of electromagnetic radiation by electron density fluctuations in anisotropic solids, using laser sources, investigating Landau and collision damping of plasmons 13 p2132 A66-26153  
 Scattering of electron beam by standing waves of photons inside laser cavity corresponds to stimulated Compton effect 13 p2096 A66-26155  
 Effect of fluctuating laser pump on stimulated Raman scattering, noting growth of coupled Stokes-anti-Stokes waves in presence of two-mode pump 13 p2096 A66-26158  
 Absorption spectra in optical region when laser radiation and continuous radiation are simultaneously incident on molecular medium 13 p2133 A66-26161  
 Interaction between stimulated Brillouin and Raman scattering in carbon sulfide, using optical resonator and laser beam 13 p2097 A66-26162  
 Velocity and lifetime of microwave thermal phonons in liquids and solids determined by spectrum of light scattering from laser illuminated sample 13 p2133 A66-26166  
 Excitation radiation transfer from trivalent

chromium to neodymium examined via fluorescence spectroscopy, noting energy transfer parameters and effect on laser output 13 p2098 A66-26175  
 Photoluminescence and stimulated emission of gallium arsenide and indium antimonide obtained by optical pumping, noting effect of applied magnetic field on laser and diode emissions 13 p2099 A66-26182  
 Steady state variation of light intensity with distance for monochromatic light, noting dependence of absorption coefficient on degree of excitation of electronic system 13 p2099 A66-26183  
 Electrical breakdown of gases by optical frequency radiation, noting laser beam attenuation and subsequent energy absorption by plasma 13 p2134 A66-26190  
 Growth rate of ionization by electron impact in presence of laser beam, elastic and inelastic scattering cross sections, free-free absorption, excitation and ionization coefficients, breakdown times and thresholds 13 p2134 A66-26193  
 Pressure effects in Fabry-Perot lossy-cavity gas laser output 13 p2101 A66-26199  
 Threshold studies of ion laser oscillations in sulfur and saturation and quenching of laser intensity 13 p2102 A66-26209  
 Optical system for schlieren recording, deflection mapping, shadowgraphy and interferometry achieved for laser light, used in recording of refractive index fields 13 p2082 A66-26307  
 Magnitude and phase of complex spatial coherence of He-Ne laser beam 13 p2104 A66-26334  
 Helium-neon laser emission on 6401 angstrom line, noting intensity vs mirror shift and optical cavity 13 p2104 A66-26336  
 Self-pumping chemical laser theory and operation, noting chemical pumping 13 p2104 A66-26382  
 Cooler for semiconductor lasers and photodetectors using low temperature gas 13 p2104 A66-26559  
 Alignment of angular positions of spherical mirror and grating of Fastie-Ebert spectrometer, using bright collimated monochromatic beam of He-Ne laser 13 p2084 A66-26564  
 Maximum output power approximated for 6328 angstrom He-Ne gas laser, noting optimum mirror transmission and laser geometry 13 p2105 A66-26571  
 Mathematical model of GaAs injection laser applied in determining maximum obtainable power output, using rate equations of electron and photon densities and thermal resistance for optimum value 13 p2105 A66-26572  
 Cataphoresis, moving striations and associated noise in He-Ne laser 13 p2105 A66-26591  
 IR and visible helium-neon laser modulation using Faraday rotation in YIG 14 p2305 A66-26881  
 Laser oscillations in CdSe and CdS bombarded by fast electron beam 14 p2306 A66-27031  
 Laser Doppler velocimeter for measuring localized flow velocities in liquids 14 p2306 A66-27053  
 Ruby laser energy reflected off Explorer XXII satellite 14 p2306 A66-27054  
 Laser radiation coherence property deterioration and molecular scattering during propagation through turbulent atmosphere 14 p2236 A66-27131  
 Effect of longitudinal magnetic field on output power of gas laser operating in IR spectrum, noting gas-mixture pressure in discharge tube role 14 p2307 A66-27156  
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 14 p2307 A66-27187  
 Pumping neodymium lasers through use of coherent emission of ruby lasers, finding threshold energy 14 p2308 A66-27605  
 Energy-rich plasmas produced by light pulses from Q-switched laser, noting energy transfer from electrons to ions during expansion process 14 p2308 A66-27607  
 Time parameters of powerful laser measured with GaAs photodiode, noting time constant and time resolution of photodiode 14 p2309 A66-27750

Laser safety standards, discussing nature of photobiological mechanisms responsible for tissue damage upon exposure to laser radiation 14 p2309 A66-27775

Fluorescent lifetimes of neodymium, ytterbium and samarium incorporated in ordered perovskite-type compounds determined, noting crystal structure potential for laser emission 14 p2367 A66-27976

Performance of two-photon laser operating in continuous wave mode, deriving formula for pulse frequency 14 p2310 A66-28166

Electrostatic probe measurements of velocity displacement and electron density of plasma using laser compared with measurements using microwave interferometer 14 p2346 A66-28269

Measurements of maser beam propagated through atmosphere, emphasizing beam broadening and signal fluctuation due to clear air turbulence 15 p2448 A66-28581

Atmospheric exploration with lidar, noting high resolution and sensitivity 15 p2530 A66-28600

Light transmission through optical diffraction lattice consisting of medium in EM field of laser beam 15 p2511 A66-28626

Electron density in laser-induced spark in air determined, measuring simultaneously fundamental laser wavelength and second harmonic 15 p2512 A66-28685

Coherent emission from trivalent holmium ions in rare earth substituted yttrium aluminum garnet, noting three energy transfer combinations in YAG 15 p2512 A66-28690

Measurement of single line in P branch of carbon dioxide vibro-rotational absorption band using tuned optical maser spectroscopy, noting presence of shifted frequencies 15 p2512 A66-28691

Radiative cascade patterns in helium-neon gas system using idealized model, computing spontaneous decays which are compared with laser experiments 15 p2512 A66-28699

Temperature shift of ruby laser emission measured interferometrically for temperatures between 66 and 210 degrees K 15 p2512 A66-28701

Damage thresholds for various glasses exposed to laser pulses, emphasizing internal damage 15 p2524 A66-28732

Intensity distribution at focus of high power laser, noting measuring method 15 p2513 A66-28834

Gas laser output wavelength stabilization by use of external passive optical interferometer 15 p2513 A66-28835

Pulsed toroidal excitation of gas ion lasers extended to drive high power CW laser transitions in Ar, Kr, Cl and Br, noting operating parameters and power output 15 p2513 A66-28877

CW IR laser oscillation in atomic Cl in HCl and HI gas discharges, noting use of two power supplies and energy level diagram 15 p2513 A66-28880

Stimulated Raman effect in acetone and acetone-carbon disulfide mixtures, noting similarity of Stokes radiation pattern to Raman effect 15 p2513 A66-28881

Dependence of magnitude of Herschel bleaching in photographic emulsion on delay between forward and bleaching exposure, using laser radiation 15 p2513 A66-28884

118-micron wavelength water vapor gas laser with 4-inch diameter two-meter focal length mirror resonator system 15 p2514 A66-29010

Surface temperature determination procedure for laser heated metals based on heat conduction equations and ion emission from surface 15 p2514 A66-29035

Resonator geometry and mirror positions and effect on radiation output in helium-neon laser 15 p2515 A66-29201

Spectral composition of laser light within framework of theory of nonlinear optical effects 15 p2542 A66-29356

Relation between laser parameters and cathode diameter in excitation of He-Ne mixture by discharge of hollow cylinder 15 p2516 A66-29357

Hole burning in bleachable absorbers used as laser Q-spoller 15 p2517 A66-29387

Laser oscillation with totally reflecting roof prism as cavity, noting output vs

mirror alignment for two rotation axes 15 p2517 A66-29414

Pulsed laser operation in wedge-shaped ruby rod at room temperature 15 p2517 A66-29415

Neon level broadening under effect of laser radiation studied by observing Hanle effect on fluorescent light 15 p2517 A66-29640

Detection of very low levels of modulation on laser beam to determine performance of microwave light modulators 15 p2518 A66-29682

Measuring device for pulsed laser output power using bolometer, amplifier and oscilloscope 15 p2503 A66-29701

Dynamics of field and generation frequencies in giant pulse of ruby laser with passive shutter, using solution of cryptocyanine in ethanol, noting mirror reflection coefficient 15 p2518 A66-29727

Output power frequency response of single mode helium neon laser, determining effects of atomic collisions on frequency response of individual atoms 15 p2518 A66-29812

Statistical analysis of light fields created by superposition of laser light and chaotic light 15 p2519 A66-29815

Second harmonic generation /SHG/ by focused laser beams in nonlinear crystals 15 p2519 A66-29816

Coupling and synchronization of lasers, noting field amplitudes, delayed interaction and dielectric constant dispersion 15 p2519 A66-29885

Propagation rate of high power laser light pulse in inversely populated medium 15 p2543 A66-29980

Cooperative interactions between ions and electrons in forward scattering of ruby laser beam from plasma 16 p2716 A66-30153

Unmodulated laser output at controlled frequency, using correcting beats from reference laser 16 p2717 A66-30205

Traveling wave beats created by ring laser on rotating platform, noting frequency division rotating rate and capture band parameters 16 p2717 A66-30281

Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 16 p2717 A66-30282

Laser action with nonresonant feedback using high gain ruby crystals 16 p2717 A66-30297

Writing rate of rotating-mirror streak camera determined, using Q-switched laser technique 16 p2702 A66-30419

Topocentric distance of geodetic satellite GEOS-A measured by laser telemetry from station 16 p2652 A66-30586

Demodulation method in which phase modulation of laser beam is converted to amplitude modulation by autocorrelation 16 p2717 A66-30616

Radiative corrections to Thomson scattering in laser beams arising from damping of electron motion and photon density, using quantum mechanics 16 p2717 A66-30628

High speed stroboscopic photography using Kerr cell modulated laser source 16 p2705 A66-30828

Second harmonic generation by laser beams of finite spectral width, using quantum transitions and kinetic equations, noting shape of pumping line at fundamental frequency 16 p2718 A66-30845

Degree of excitation of metastable state determined, using luminescence saturation phenomenon, calculating population of working level of laser substance 16 p2718 A66-30846

Measurement of radiation pattern of ruby laser emission for various resonators and operating regimes, noting laser effect on angular half-width values 16 p2718 A66-30847

Breakdown by neodymium glass laser radiation in atomic and molecular gases, determining power densities, noting relation of pressure to breakdown power 16 p2718 A66-30938

Dislocations and precipitates in GaAs injection lasers revealed by new A-B etchant 16 p2718 A66-31071

Collision broadened linewidth and saturation parameters for 6328 angstrom transition of Ne in He-Ne laser 16 p2718 A66-31084

Time resolution of laser-induced electron emission from cesium diode at high laser power 16 p2719 A66-31135

Statistical effects during generation of second harmonic in optically transparent crystals, noting coefficient of correlation between harmonic and fundamental radiation power of solid state laser 16 p2747 A66-31167

Recording of light-induced light scattering using laser beam, calculating cross section of photon-photon scattering 16 p2748 A66-31175

Giant coherent light pulse generation by Q-factor-modulated laser 16 p2719 A66-31183

Initial pulse in luminous emission of discharge laser, using photomultiplier preceded by mobile iris, determining geometrical distribution of discharge brightness 16 p2719 A66-31209

Laser beam energy profile determined by multiple-layer aluminum foil technique 16 p2719 A66-31217

Effects and parameters influencing optical path length within pumping process in ruby and doped glass laser rods 16 p2719 A66-31443

High voltage pulsed electrodeless discharge in rare gas as light source for ruby and Nd glass laser excitation and observation of output characteristics 16 p2720 A66-31448

Laser cavity output optimization for maximum external quantum efficiency showing dependence on length and reflectivity for given current density 16 p2720 A66-31535

Laser induced spontaneous electron emission from rear side of metal foils, noting electron energy vs laser energy pulse magnitude, etc 16 p2784 A66-31536

Granularity characteristics of scattered light from helium-neon laser directed onto moving surface 16 p2720 A66-31725

Near-field diffraction of helium-neon laser at circular apertures 16 p2720 A66-31727

Laser beam effect on hardening of steel 16 p2721 A66-31802

Breakdown of gases under influence of laser spark phenomena with subsequent absorption of laser radiation and gas heating 17 p2933 A66-32061

Static characteristics of gas laser internal modulation circuit, using electro-optical crystal inserted into gas laser resonator 17 p2933 A66-32225

Laser and maser development, discussing design improvements and application for television, space communications, etc 17 p2934 A66-32353

Nonlinear scattering of ruby laser beam by plasma at second and third harmonic 17 p2967 A66-32433

Sun pumped continuous wave one-watt YAG crystal laser, noting equipment setup and output duration 17 p2934 A66-32620

Internal phase modulation in He-Ne laser using electro-optic effect in crystal quartz, observing spectrum and RF mode beats 17 p2934 A66-32621

Frequency shift relative to spectral width for single pulses of triggered laser determined by measuring variations of emitted wavelength as function of time 17 p2934 A66-32622

Stimulated Brillouin scattering from nitrogen and methane using giant pulse laser, noting convergence angle of backscattered beam sound, velocity measurement, etc 17 p2961 A66-32627

Heat transfer and stress wave evolution prior to ablation and thermal equilibrium in exposure of solid and liquid materials to laser sources 17 p2979 A66-32638

Intensity noise in multimode GaAs laser emission 17 p2935 A66-32689

Power enhancement in pulsed He-Ne lasers, noting overshooting for RF discharge modulation with square wave 17 p2935 A66-32963

Resonator geometry and mirror positions and effect on radiation output in helium-neon laser 17 p2935 A66-33050

Strong axial magnetic field effect on constant current discharge in continuous-duty ion laser, noting plasma diffusion, charged particle density and laser output decrease 17 p2936 A66-33117

Ion lasers involving electron transitions in atoms or molecules with lost

electrons 17 p2937 A66-33249  
Far IR radiation detected at visible frequency, using nonlinear optical mixing with lasers 17 p2959 A66-33322  
Low threshold neodymium glass laser oscillator with high repetition 17 p2937 A66-33325  
High power continuous wave four-level solid neodymium glass laser showing length and host loss as dominant factors in limiting output power 17 p2937 A66-33334  
Experimental study of emission control in ruby laser using diffraction modulator with modulated traveling ultrasonic wave 17 p2938 A66-33516  
Optical modulation in bulk gallium arsenide, using Gunn effect 18 p3152 A66-33606  
Ionized noble gas lasers, considering problems at higher powers, especially those of inversion mechanism and magnetic field effects 18 p3118 A66-33767  
Communication systems at microwave and optical frequencies for future Mars missions 18 p3067 A66-33793  
Qualitative results on transport mechanisms around dropping mercury electrode, using long path laser interferometry 18 p3110 A66-33924  
Photoconductivity induced in uncolored sodium chloride and aluminum oxide single crystals by radiation from ruby laser 18 p3154 A66-33939  
Ruby photoconductivity when exposed to laser irradiation, noting oscillograms 18 p3154 A66-33941  
Laser action on several hyperfine transitions in Mn I 18 p3118 A66-34000  
Coherent and spontaneous emission from lead-tin telluride alloys upon excitation by GaAs diode laser, noting band structure of alloy system 18 p3119 A66-34159  
Laser regime with giant pulses generated in dysprosium doped cadmium fluoride under continuous pumping by xenon lamps, obtaining Q factor modulation by rotating prism 18 p3119 A66-34178  
Ne-He laser output dependence on pressure and nonexcited atom concentration 18 p3119 A66-34696  
Energy and power of Q-switched neodymium glass laser measured, using calorimetric devices, vacuum photodiodes, etc 18 p3120 A66-34904  
Soviet and foreign papers on plasma diagnostics by scattering of laser beams at plasma electrons 18 p3150 A66-34967  
Holography principles and development, considering wave front reconstruction, Lippmann photography, laser light, application to TV, etc 18 p3115 A66-35244  
Output power of CW laser measured by wire bolometer in form of plane single-layer spiral as sensitive element 19 p3353 A66-35321  
Helium-neon laser assessment as source in high precision range measurements 19 p3372 A66-35362  
Light energy measurements made with argon bomb used as chemically powered laser pump 19 p3373 A66-35388  
CW He-Ne laser measurement of light scattering in crystals noting laser output, performance and crystal imperfections 19 p3373 A66-35402  
Orientation effect in GaAs injection lasers, noting emission characteristics and structural spectra 19 p3373 A66-35404  
Laser action in closed molecular system with mixture of carbon dioxide, nitrogen and water vapor, noting coupling-out plate reflectivity and population inversion 19 p3373 A66-35433  
Laser illuminated electro-optical imaging noting energy variation parameters, equipment used and results obtained in TV reception 19 p3355 A66-35531  
Multicolor laser display, discussing components and future application 19 p3355 A66-35532  
Ring laser sensor parameters and characteristics, noting application to measurement of angular rate, mass flow, navigation and guidance 19 p3356 A66-35533  
Spatial coherence measurement of He-Ne laser output 19 p3373 A66-35592  
Laser application for vibration measurement utilizing Doppler shift

produced on wave reflected from surface vibrating normal to beam 19 p3356 A66-35673  
path 19 p3356 A66-35673  
Gallium arsenide laser excitation by fast electrons 19 p3374 A66-35760  
Laser application survey 19 p3374 A66-35798  
Plasma density using laser based interferometer, interpreting phase shift of laser signal as time dependent laser frequency variation 19 p3374 A66-35817  
Laser output energy controller having eight-to-one improvement in pulse repeatability in solid state lasers 19 p3374 A66-36034  
Valence band spin-orbit splitting in highly degenerate semiconductors determined from splitting of peak laser diode emission in high magnetic fields 19 p3374 A66-36036  
Resonant birefringence in potassium vapor under influence of electric field of ruby laser emission 19 p3375 A66-36066  
Gallium arsenide lasers operating at room temperature investigated, based on diffusion p-n junctions, discussing emission spectrum 19 p3375 A66-36070  
Pulsed discharges of OCS molecular laser 19 p3375 A66-36080  
Measurements on physical and laser properties of vapor-grown ruby single crystals prepared by epitaxial growth 19 p3375 A66-36081  
Coherent laser-type light generators with capability of adjusting frequency over visible spectrum 19 p3375 A66-36265  
Plasma production by firing giant pulse laser at solid deuterium pellet /ice/, noting strong anisotropy in plasma outburst 19 p3432 A66-36595  
High temperature high-density plasma from single solid particle of lithium hydride suspended in vacuum, using ruby laser irradiation 19 p3432 A66-36596  
Fast overlap of microwave radiation by ionization aureole of spark in laser beam 19 p3376 A66-36719  
Multiphoton ionization of krypton and argon by ruby laser radiation may occur by absorption 19 p3403 A66-36721  
Gated laser night-viewing system, calculating apparent illuminance as function of target distance 20 p3511 A66-36938  
Pulsed ruby lasers, considering pumping and threshold, output, quantum mechanics and variation on basic device 20 p3575 A66-36968  
Frequency spectrum of laser impulse in Q-switching regime wider than that of single impulse radiated by laser in ordinary regime 20 p3576 A66-37141  
Solid laser radiation operating in Q-switched resonator regime noting effect of finite rate of switching, finiteness of relaxation time, transmission coefficient factor, etc 20 p3576 A66-37142  
Two-photon laser excitation conditions deteriorated by presence of resonator tuned on transition frequency between operating levels of matter 20 p3576 A66-37143  
Frequency doubling in resonance laser, obtaining second harmonic field for laser radiation by giant pulses 20 p3576 A66-37144  
High time resolution polarimeter for laser analysis, beam intensity after passing through analyzers measured by photomultipliers 20 p3558 A66-37285  
Q-switched ruby laser output increased by use of saturable dye solution in laser cavity 20 p3576 A66-37290  
Spectral composition of laser light within framework of theory of nonlinear optical effects 20 p3602 A66-37360  
Relation between laser parameters and cathode diameter in excitation of He-Ne mixture by discharge of hollow cylinder 20 p3576 A66-37361  
Giant pulse formation theory, measuring shape and duration of neodymium glass laser pulses for various values of inverse population 20 p3577 A66-37367  
Crystal growth, diffusion and fabrication of gallium arsenide-phosphide junction lasers with low threshold current densities 20 p3577 A66-37401  
Nonreciprocal effects associated with excitation current observed in DC-excited He-Ne ring laser, noting coupling phenomena between right and left waves 20 p3577 A66-37408

Magnitude of Hanle effect of neon atoms emitted by laser dependence on excitation, discharge intensity explained by multiple coherent diffusion at metastable level 20 p3577 A66-3740  
Optical techniques in laser detection systems 20 p3516 A66-3743  
Laser emission interferograms obtained with Fabry-Perot cross-grating interferometer in submillimeter wavelength range 20 p3559 A66-3754  
Submillimeter laser emission from ICH noting interferograms 20 p3578 A66-3754  
Single cavity microwave laser amplifier analysis, determining gain, bandwidth, noise cavity Q-factor effect and width of magnetic resonance line 20 p3578 A66-3758  
Identification of number of lines at 1 microns emitted from pulsed carbon dioxide laser as P branch of carbon dioxide vibrational transition 20 p3579 A66-3762  
Nonlinear interaction of oscillations of two types in laser does not effect stationary operation when oscillations are sufficiently apart in band 20 p3579 A66-3766  
Laser TV system operation, performance characteristics and application 20 p3517 A66-3774  
Pulsed operation of electron-beam pumped zinc oxide laser emitting radiation in UV at very low temperatures, noting importance of use of cavity 20 p3579 A66-3776  
Continuous wave UV ionized gas laser, emission over four transitions in neon krypton and argon 20 p3579 A66-3777  
Upper laser states deriving population through cascade transitions from higher layer states of argon ion noting consistency of laser output current dependence with current dependence of cascade rate 20 p3579 A66-3777  
Degradation of continuous argon laser performance when positioned in axial magnetic field, noting role of quenching radiation trapping and excitation mechanisms 20 p3579 A66-3777  
Photodissociation laser system, discussing output energy dependence on pressure, temperature and number of successive optical pumping flashes 20 p3579 A66-3778  
Submillimeter wavelength electronic devices, examining development of lasers, and reflected wave tubes with overlapping effective wave range 20 p3580 A66-38004  
Stimulated emission spectrum in axial-mode model of plane resonator in stationary generation regime 20 p3580 A66-38127  
Trajectories of light rays through medium subjected to acoustic waves examined, knowing that acoustic waves in laser medium function as optical waveguide 20 p3580 A66-38238  
Discharge current and laser light noise measurements effect in gas discharge helium-neon laser, using equivalent circuit 20 p3580 A66-38240  
Frequency stabilization of gas laser to lock output to center of atomic resonance, using error signal 20 p3580 A66-38242  
High power nonspiking operation of ruby laser for continuous output on microscopic and macroscopic scale 20 p3581 A66-38242  
Confocal resonator theory instead of diffraction as explanation of 90 degree rotation between near and far fields of ruby lasers 20 p3581 A66-38243  
Spontaneous emission noise power added to amplified signal in laser amplifier in He-Xe gas discharge and saturation relation to population inversion 20 p3581 A66-38387  
Laser machining, discussing hole drilling, microwelding metal removal and application to hard brittle materials [ASME PAPER 66-MD-28] 21 p3742 A66-38484  
Unfocused ruby laser radiation field-biphenyl compound interaction, resulting luminescence and apparent multiphoton absorption 21 p3745 A66-38528  
Second-harmonic generation by focused laser beams based on experiments using He-Ne gas laser, noting SHG should be strongly peaked when focus is at either of crystal surfaces 21 p3746 A66-38554  
Fokker-Planck equation applied to laser under influence of quantum fluctuations connected with dissipation, pumping and cavity thermal noise, noting distribution and

correlation function 21 p3746 A66-38930  
 Performance of GaAs semiconductor laser with resonator, noting dependence of forbidden zone width and absorption coefficient on free carrier concentration and incident photon energy 21 p3746 A66-38955  
 Interchannel generation transfer and multichannel generation in laser with four splits levels, noting radiation density, temperature effect and variations in coefficients of losses 21 p3746 A66-38956  
 Modulation by ultrasonic diffraction of 10.6 micron laser radiation in photoelastic CdS, GaAs and Si crystals 21 p3747 A66-39112  
 Optical spectra of ultrashort optical pulses generated by mode-locked glass-doped neodymium lasers, considering saturable absorber cell placed parallel to Fabry-Perot reflector 21 p3747 A66-39115  
 Neodymium laser oscillator using time-variable reflector, noting loading and pumping of optical cavity with nearly maximum amount of energy 21 p3747 A66-39118  
 Photoconductive and luminescent behavior of undoped cadmium sulfide single crystals at room temperature under laser excitation 21 p3748 A66-39165  
 Molecular laser action by vibrational excitation of nitric oxide during flash photolysis of nitrosyl chloride 21 p3748 A66-39166  
 Laser amplifier theory using Fabry-Perot interferometer and Laplace transform for obtaining transient solutions in addition to steady state solutions 21 p3748 A66-39224  
 Gas laser frequency and emitted power dependence on resonator tuning 21 p3748 A66-39308  
 High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 21 p3749 A66-39336  
 Line width of well-stabilized laser operating far above threshold determined by phase random fluctuation, using interferometer 21 p3749 A66-39394  
 High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 22 p3929 A66-39706  
 Single pulse operation of lasers, noting energy storage and amplification effect for four- and three-level active medium 22 p3929 A66-39711  
 Replacement of Poisson by Polya distribution in calculating laser intensity threshold necessary to induce ionization breakdown in gases 22 p3929 A66-39715  
 Far-field light emission mode pattern of GaAs diode injection lasers, dielectric gradient in inversion layer and refractive index in junction 22 p3930 A66-39743  
 Laser radiation effect on metals, noting disintegration mechanism, indentation formation and vapor formation 22 p3930 A66-39763  
 Ruby laser pumping threshold energy, divergence angle and output power as affected by resonator length 22 p3930 A66-39769  
 Effective brightening of laser radiation propagating in strongly absorbing medium 22 p3930 A66-39770  
 Thermoelastic wave equations in continuum mechanics model of laser-induced fracture in transparent media in terms of laser beam energy absorption 22 p3931 A66-40089  
 Spectral hole burning and cross relaxation effects on steady state gain saturation of laser amplifier with inhomogeneously broadened linewidth 22 p3931 A66-40098  
 Intracavity interferometer laser measurements of power gain and output in single-frequency Ar laser and 6328-angstrom Ne isotope shift 22 p3932 A66-40110  
 Reflecting mirrors in laser oscillators treated as reflecting elements and transducers for coupling power from oscillator to external space 22 p3932 A66-40184  
 Temperature measurements of laser sparks from relative intensity of X-ray flux transmitted through beryllium foils of different thickness 22 p3933 A66-40421  
 Dynamic laser wavelength selection by insertion of dispersive tunable electro-optic Q-spoller within laser

cavity 22 p3933 A66-40866  
 Paschen series laser lines in atomic and molecular hydrogen 22 p3933 A66-40892  
 Spectral analysis of laser discharge in pure and impure He, obtaining spectra of spark at various pressures, determining electron concentration at various stages 22 p3934 A66-40946  
 Quantitative photographic determinations of laser beam power density distributions and Q-switched ruby oscillator-amplifier system divergence characteristics 23 p4075 A66-41032  
 Neodymium doped glass laser using saturable liquid Q-switch 23 p4075 A66-41033  
 Transients and stability of idealized two-level laser system, obtaining rate equation solution, noting characterization by relaxation times 23 p4076 A66-41034  
 Pulsed induced emission in hydrogen beam laser for case of two relaxation times, determining polarization only by number of active particles in resonator 23 p4076 A66-41091  
 Dependence of emission intensity of gas laser on longitudinal and transverse magnetic fields, using simplified model 23 p4076 A66-41092  
 Mercury, cesium and rubidium vapors ionization in intense radiation flux by Q-switched ruby laser 23 p4076 A66-41156  
 Internal self-damage in 25 mw ruby laser oscillator rod 23 p4076 A66-41160  
 Crystal defects and performance in ruby laser, measuring coherence function of light and output energy and crystal homogeneity 23 p4077 A66-41291  
 Master equation solved to obtain diagonal elements of density matrix for laser light, taking into account pumping scheme characterizing three-level laser 23 p4077 A66-41374  
 Laser beam effect on hydrodynamic bearings, discussing microcracks and critical energy, explaining breakdowns 23 p4078 A66-41409  
 Estimated greatest permissible mirror misalignment, active medium inhomogeneity and extra-axial beam losses for artificial realization of very narrow radiation pattern in real laser 23 p4078 A66-41449  
 Radiative power amplification of He-Ne laser with nearly confocal resonators 23 p4078 A66-41453  
 Linearly and circularly polarized fields in laser amplifier interaction with axial magnetic field, emphasizing combination tone production 23 p4079 A66-41624  
 Laser induced plasma density measurement using multiple beam interferometry 23 p4105 A66-41630  
 Multipurpose ultrahigh speed camera system, noting use as monosecond Kerr cell, image converter and giant laser pulse generator 23 p4071 A66-41675  
 Resonator misalignment effect on output of neon-helium laser with spherical mirrors 23 p4079 A66-41830  
 Transitions of first two band systems of iodine excited in argon suitable for laser action 23 p4079 A66-42085  
 Experimental study of emission control in ruby laser using diffraction modulator with modulated traveling ultrasonic wave 24 p4219 A66-42129  
 Conductivity modulation by heavy-to-light hole transitions in p-type germanium noting carrier lifetime and ringing of laser pulse 24 p4219 A66-42249  
 Time dependency of phase difference of two weakly coupled nonlinear optical oscillators, considering coupling of two traveling waves in laser 24 p4220 A66-42257  
 Q-switching laser system to obtain simultaneous giant pulses from five ruby laser oscillators 24 p4220 A66-42302  
 Giant pulse generation range in transverse direction after Q-switching in ruby laser, examining resonator properties 24 p4220 A66-42516  
 Multiple cyclotron resonance absorption lines in degenerate valence bands of Ge semiconductor studied with far IR laser submillimeter spectrometer 24 p4257 A66-42545  
 Linearized population rate equations and quantum noise sources used to calculate spectra of intrinsic second moment intensity

fluctuations in 3- and 4-level CW laser oscillators 24 p4221 A66-42548  
 Radiation interaction between laser oscillators with different active materials and frequencies 24 p4221 A66-42549  
 Self-trapping of laser beam due to diffraction from dielectric waveguide arising from permittivity increase of birefringent beam 24 p4222 A66-42554  
 Ring laser rotation rate sensor noting relation to electromagnetic radiation 24 p4223 A66-42564  
 Gas pumping effect on output of repetitively pulsed ion lasers 24 p4223 A66-42569  
 Narrow spectral outputs from actively Q-switched lasers, deriving fractional energy expression for injected mode group 24 p4223 A66-42570  
 Configurations for realization of multiple laser light scattering using microwave acoustic waves and two Porro prisms 24 p4224 A66-42636  
 Radiation of giant pulses of superluminescence by highly excited active medium of Nd glass with rapid cut-in of amplification 24 p4224 A66-42755  
 Glass lasers, comparing glass with crystals as hosts for laser ions, considering neodymium laser properties 24 p4224 A66-42800  
 Lasers applied to logic, memory, input-output and data transmission-linkages parts of computers 24 p4225 A66-42804  
 Nonlinear optics emphasizing parametric oscillation, self-focusing and trapping of laser beams and stimulated Raman, Rayleigh and Brillouin scattering, using Maxwell equations and electric dipole approximation 24 p4225 A66-42810  
 Laser beam deflection and scanning techniques 24 p4175 A66-42817  
 Current transducer for measuring current pulses in kiloampere range and suitable for laser research applications 24 p4213 A66-42820  
 Effect of longitudinal magnetic field on output power of gas laser operating in IR spectrum, noting gas-mixture pressure in discharge tube 24 p4225 A66-42977  
 Optical transmission of plasma column generated by ionized gas explosion determined, using laser beam 24 p4245 A66-42998  
 Perturbation of ruby laser by vibrating one of mirrors constituting resonant cavity 24 p4225 A66-42999  
 Spectroscopic, chemical and laser properties of piperidinium salt of europium tetrakis 24 p4226 A66-43034  
 Laser system for meteorological data using oscilloscope to display return signal, translated as concentrations of matter or aerosols 24 p4226 A66-43044  
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 24 p4226 A66-43085  
**LASER RADAR**  
**S LIDAR**  
**LATERAL OSCILLATION**  
 Rotating orbiting cables, determining lateral vibration in orbital plane via mathematical model analysis [AIAA PAPER 66-98] 06 p0962 A66-16264  
 Force and moment response of pneumatic tires undergoing nonstationary lateral motions, using motion equations [ASME PAPER 65-AV-2] 11 p1636 A66-22471  
 Lateral vibration of rotating bar with circular cross section under simultaneous axial force and torque, noting eigenvalue equations and damping effects 21 p3833 A66-39598  
**LATERAL STABILITY**  
 Lateral buckling of I-beam, examining stress and strain induced change in elasticity moduli and rigidity 06 p0964 A66-16479  
 Variational analysis of stability of infinitely long cylindrical panel under constant evenly distributed lateral loading 08 p1308 A66-18890  
 Stability of bending-torsional equilibrium of cantilevered bar subjected at end to follower force, as in case of wing under jet, determining critical thrust 19 p3475 A66-36432  
 Three-dimensional parachute dynamic stability theory 22 p3845 A66-40593

## LATERAL STABILITY AND CONTROL

Lateral-directional handling qualities of large transport, examining factors involved in pilot maneuvers 01 p0101 A66-10037

Lateral-directional handling qualities of large transport, examining factors involved in pilot maneuvers 16 p2634 A66-31318

## LATEX

## S RUBBER

## LATITUDE

## SA GEOMAGNETIC LATITUDE

Existence of significant latitudinal variation in density from 200 to 800 km 12 p1868 A66-23556

Seasonal-latitudinal variations in lower thermospheric density, temperature and composition 15 p2490 A66-29820

Atmosphere models for seasonal and latitudinal variation in thermosphere as function of solar flux and geomagnetic index 15 p2492 A66-30031

Latitudinal variations of ionospheric irregularities studied via synchronous and 1000 km satellites, noting Early Bird data, scintillation index graphs, radio star signals, etc 15 p2496 A66-30071

Latitudinal effect on behavior of ionospheric absorption determined by absorption measurements at four stations 19 p3350 A66-36358

## LATITUDE SENSING

Azimuth and latitude determination without time recording based on observation of stars at same horizontal elevation 02 p0255 A66-11694

Azimuth and latitude determination without time recording based on observation of stars at same horizontal elevation 02 p0255 A66-11702

Internal measurement of latitude, radius vectors and other geophysical properties from center of mass of astronomical system to space vehicle 16 p2698 A66-31386

## LATTICE

## SA CRYSTAL LATTICE

## SA MOLECULAR CHAIN

## SA SPIN-LATTICE RELAXATION

Phase transition in two-dimensional lattice gas of hard-square molecules 17 p2978 A66-32505

Profile of supercavitating lattice traced for certain parameter values, using perturbation theory of perfectly irrotational incompressible fluid 17 p2914 A66-33253

## LATTICE IMPERFECTION

## SA INTERSTITIAL ATOM

Determination methods for various types of dislocation in germanium lattice and influence on physical properties of germanium 02 p0276 A66-12066

Symmetry of ground states of P, As and Sb donors in silicon determined optically 03 p0411 A66-13144

Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 05 p0730 A66-14644

Lattice vacancies and interstitials in II-VI compounds of cadmium sulfide and zinc selenide caused by electron bombardment often determine advantages or limits of material 06 p0935 A66-17130

Implementation of Kossel line technique of crystallographic analysis and lattice parameter measurement in study of lattice defects in semiconductor crystals 06 p0935 A66-17133

Diffuse X-ray scattering in crystal structure of Ni-Be and Cu-Be alloys during first stage of aging due to anisotropic monoclinic lattice distortions 08 p1235 A66-18589

Interrelation between relaxation center in tungsten and molybdenum and high temperature internal friction background of spectrum 11 p1719 A66-23386

Zeta phase in tantalum-carbon system, noting diffusionless transformation of carbon-deficient lattice under compressive stress 12 p1892 A66-23566

Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 13 p2166 A66-25917

Propagation distribution of impurity atoms in heavily doped semiconductors 14 p2356 A66-27068

Cuprous oxide conductivity caused by

ionization of thermal lattice defects 14 p2358 A66-27091

Lattice distortions and field gradients in alkali halide solutions, noting discrepancy in calculation of electric field gradients 16 p2775 A66-30731

Lattice defect distribution effect on degradation of solid solution of interstitial impurities in cast

molybdenum 16 p2727 A66-31530

Phonon-drag thermopower variation in dilute copper alloys assuming Rayleigh law for phonon scattering 17 p2884 A66-33152

Crystal lattice defects in metals caused by neutron irradiation 18 p3120 A66-33621

Radiation damage in solids including crystal lattice defects, thermal migration, channeling and focusing effects, etc 18 p3155 A66-34136

Magnetic properties of lattice imperfections in lithium fluoride, potassium chloride and sodium chloride single crystals 18 p3157 A66-34499

Lattice defects and tensile strength 20 p3584 A66-37694

Structure and properties of thin films in terms of deposition conditions, noting conditions for continuity, surface roughness, grain size, lattice defect density, crystalline orientation, purity, etc 20 p3621 A66-38087

Interband microwave scattering of holes by cyclotron resonance in Ge 21 p3797 A66-38753

Propagation distribution of impurity atoms in heavily doped semiconductors 22 p3966 A66-40827

Cuprous oxide conductivity caused by ionization of thermal lattice defects 22 p3967 A66-40847

LATTICE POINT

Location and nature of singularity of Ising square lattice susceptibility, using Padé approximation based on Clapp spin-spin correlation function 02 p0263 A66-11887

Detailed account of dislocation loops according to continuum theory 04 p0590 A66-14164

LATTICE VIBRATION

Space and time dependence of increased phonon population /amplitude of lattice vibration/ in amplifying cadmium sulfide crystal 01 p0122 A66-10575

IR-active lattice vibrational spectra of alpha-aluminum oxide and chromium oxide analyzed by reflection and transmission measurements 03 p0380 A66-12341

Interaction of conduction electrons with lattice vibrations in semiconductor produces additional transmission bands or disappearance of resonance absorption region 04 p0564 A66-14251

Group II-VI semiconductors, examining theory of bound exciton complexes, lattice vibrations, phonon-assisted edge emission and higher energy bands 08 p1271 A66-19239

Neutron diffraction in ordered nickel-manganese alloys with near equilibrium distribution of atoms over lattice points 09 p1389 A66-20612

Interaction potential of inert gases defined in terms of transport properties, noting contribution of nonadditivity to static lattice energy 12 p1917 A66-23936

Electron and lattice heat conductivity of mercury selenide crystals 14 p2356 A66-27066

Temperature dependent soft-mode lattice vibration in perovskite-type ferroelectric crystal single-oscillator 15 p2567 A66-29394

Lattice vibrational properties of hexagonal CdSe 16 p2778 A66-31075

Electron vibration spectra of light absorption in molecular crystals, taking oscillation frequency changes as principal mechanism of exciton-phonon interaction 16 p2780 A66-31178

Current-carrier scattering in germanium telluride 16 p2788 A66-31780

Vibration spectrum of lattice of rectilinear vortices in charged and neutral superfluid systems studied in terms of Landau superfluid hydrodynamics 19 p3400 A66-35997

X-radiation alignment of quartz crystals for generation and detection of reverberating acoustic echoes at liquid-helium temperatures 20 p3624 A66-38409

Ruby laser-induced effect of pulsed pressure on KDP crystal surface and thermal bulk effect on excitation of

ultrasonic oscillation in crystal 22 p3932 A66-40318

Electron and lattice heat conductivity of mercury selenide crystals 22 p3966 A66-40825

Nitrate heat of formation value revised by re-evaluating lattice energy of cesium nitrate, considering charge distribution in anion 23 p4031 A66-41221

## LAUE DIFFRACTION

Pendellosing fringes in elastically deformed silicon, observing X-ray wavefield beam interference upon superimposition on crystal exit surface 07 p1098 A66-17815

Preparation, X-ray measurements and photovoltaic properties of Ge-epitaxial-Pb heterojunctions 15 p2562 A66-28711

Von Laue and Cowley diffraction theories of coherent diffuse X-ray scattering from random alloys, predicting diffuse intensity singularities at reciprocal lattice points 22 p3948 A66-40084

Laue reflection method of X-ray diffraction, determining single crystal orientation 24 p4255 A66-42506

## LAUNCH

## S LUNAR LAUNCH

## S ORBITAL LAUNCH

## S PRELAUNCH TESTING

## S SEA LAUNCH

## LAUNCH COMPLEX

Moon launch pads at Cape Kennedy noting structural and functional groups, crawlerway, propellant facilities, etc 01 p0054 A66-10862

Ground support equipment and launch installations for Apollo launch operation and testing 02 p0215 A66-11614

Orbital Launch Facility for performing launch operations of advanced planetary missions 02 p0293 A66-11620

Gemini spacecraft and launch vehicle interface design, development and configuration control 02 p0294 A66-11636

Hammaguir firing range facilities and planned launch of D-1A geodesic satellite 11 p1687 A66-23378

Launch operations and safety analysis of first test flight of SNAP-10A in SNAPSHOT satellite 12 p1953 A66-23678

## LAUNCH SITE

Siting of manned lunar launch facilities 09 p1365 A66-20699

Wind and turbulence distribution caused by barriers and complex surfaces adjacent to missile launching sites [AIAA PAPER 66-335] 12 p1906 A66-24483

Launching range facilities of Diamant rocket including equipment, radars, interferometers, telemetry, data processing, etc 16 p2682 A66-31233

## LAUNCH TIME

Plane trajectory with multistage rocket in minimum climb-time 02 p0296 A66-11703

Linear interpolation method for analyzing wind conditions at Wallops Island for launch operational problem [AIAA PAPER 66-340] 12 p1906 A66-24486

Gemini rendezvous launch operations planning for simultaneous launch countdown 14 p2394 A66-28438

## LAUNCH VEHICLE

SA ATLAS AGENA LAUNCH VEHICLE

SA ATLAS CENTAUR LAUNCH VEHICLE

SA ATLAS LAUNCH VEHICLE

SA BOOSTER

SA CENTAUR LAUNCH VEHICLE

SA DIAMANT LAUNCH VEHICLE

SA ELDO LAUNCH VEHICLE

SA LITTLE JOE II LAUNCH VEHICLE

SA MISSILE LAUNCHER

SA RECOVERY LAUNCH VEHICLE

SA SATURN V LAUNCH VEHICLE

SA SATURN LAUNCH VEHICLE

SA THOR LAUNCH VEHICLE

SA TITAN III LAUNCH VEHICLE

SA TITAN LAUNCH VEHICLE

Major phases in total testing program to validate booster in man-rated launch vehicle 01 p0141 A66-10107

Electromagnetic waves and effect of plasma from vehicle exhaust on microwave communication link between in-flight launch vehicle and ground station 01 p0027 A66-10549

Difficulties in control system synthesis for

- launch vehicles exhibiting severe mode interaction 01 p0104 A66-10673
- Design of reusable space launch vehicle systems considering propulsion, structural weights, heat protection and cost [SAE PAPER 650801] 01 p0144 A66-10816
- Structural, propulsion, guidance and flight control systems of Saturn IB and V Apollo launch vehicles 02 p0294 A66-11629
- Launch vehicle guidance, premidcourse orbit determination and midcourse maneuver of Ranger IX spacecraft lunar mission and merger 02 p0260 A66-12056
- Turboramjet-powered hypersonic aircraft evaluated for cruise and boost mission for orbital launching [AIAA PAPER 65-759] 03 p0318 A66-12553
- Turborocket application to air breathing satellite launcher program describing engine design, performance and weight characteristics 04 p0572 A66-13539
- Design and comparison of apogee impulse systems developed for booster rocket thrust augmentation 04 p0573 A66-13541
- Structural dynamic load and instability problems in launch vehicles and spacecraft in lunar exploration emphasizing reliability, crew safety and mission success 04 p0585 A66-13549
- Gemini System Interference Monitor /SIM/ for simultaneous monitoring and remote control of many widely separated test points from central location 05 p0645 A66-14592
- Design and manufacture of Blue Streak satellite launcher structure, noting propellant tank 06 p0888 A66-17070
- Solid propellants for future large launch vehicles noting motor configurations, costs, thrust, size, etc 07 p1110 A66-17613
- Support Evaluation Technique for computer simulation, evaluation and control of complex logistic problems 08 p1203 A66-19527
- Booster rocket survey of U.S. and Western Europe 10 p1612 A66-21958
- Satellite and launch vehicles since Sputnik 13 p2189 A66-25129
- Orbital satellite launching systems, problem of increasing percentage orbital payload at minimum cost and advantages of air breathing engines 14 p2391 A66-27010
- Survival probability of launch vehicle rising through random wind field determined from component responses 14 p2391 A66-27870
- Flight Load Survey program, written in Fortran IV, for accurate and rapid sounding of wind-induced loads on aerospace launch vehicle [AIAA PAPER 66-470] 16 p2811 A66-31473
- Propulsion systems for European launch vehicles for scientific satellites, interplanetary probes and orbiting astronomical observatories 17 p2990 A66-32370
- Launch vehicle development, discussing requirements to support program, economic and operational development and reusability [SAE PAPER 660452] 17 p3017 A66-33161
- Computational method for determination corridors of launch vehicle trajectory and impact dispersions [AIAA PAPER 66-483] 18 p3226 A66-33656
- Structural dynamics research on launch vehicles at Langley Research Center, examining analytical method limitations and need for improved mathematical models for vibrational characteristics 18 p3240 A66-33818
- Gain specification of linear controller for large launch booster, using new application of linear control theory 19 p3471 A66-36687
- Computerized cost-effectiveness model for large payload test vehicle system of 50-150 launch program 20 p3684 A66-37901
- Aircraft, missile and space launch systems, considering in-flight transportation and separate and multiple orbital missions [AIAA PAPER 65-344] 20 p3664 A66-38150
- Titan III launch vehicle development in engine, material and flight control for various orbits and trajectories [AIAA PAPER 65-309] 20 p3664 A66-38152
- Adaptive control system requirements for launch vehicles includes insensitivity to parameter variations and adjustability as function of measured flight conditions 20 p3664 A66-38182
- Turboramjet powered hypersonic aircraft evaluated for cruise and boost mission for orbital launching [AIAA PAPER 65-759] 23 p4015 A66-40974
- Payload capabilities of launch vehicles, particularly for missions with high velocity requirements, analyzing various propulsion systems 23 p4121 A66-41315
- Launch vehicle and spacecraft cost trends including larger vehicles, post Saturn phase, performance improvement by throttling, etc [SAE PAPER 660463] 24 p4281 A66-42394
- Titan III standard space-launch system configuration, describing booster-spacecraft and physical-electrical interfaces 24 p4282 A66-42693
- LAUNCH VEHICLE CONFIGURATION**
- Estimation technique for combined effect of all variables acting simultaneously on mission of large launch vehicles 03 p0416 A66-12768
- Design criteria for launch-vehicle high-energy stage, emphasizing operational reliability, mission range and low development effort 06 p0959 A66-16494
- Launch vehicle parameter design for optimal support of communications satellites [AIAA PAPER 66-285] 12 p1955 A66-24756
- LAUNCH WINDOW**
- Missile and spacecraft countdown and meeting prespecified launch window probabilities by Markov chain techniques 01 p0140 A66-10087
- Earth departure plane change, interplanetary mission launches and launch windows 10 p1609 A66-21929
- Low energy transfer from Earth to Mars via Venus, considering launch window and planet orientation [AIAA PAPER 64-647] 18 p3227 A66-33812
- Guidance, navigation and two phases of targeting of Saturn V lunar landing mission, analyzing launch, boost to orbit and iterative guidance 21 p3768 A66-38898
- Optimum launch and transfer conditions for two concentrations of orbits within meteor stream associated with Kreutz group of sun-grazing comets in space mission 22 p3976 A66-39859
- LAUNCHING**
- SA INFRARED TRACKING**
- SA SATELLITE LAUNCHING**
- Responsibility for damage caused by space launchings 03 p0447 A66-13076
- Probability distribution of number of system failures and generating function for compound probability distribution of required launches 09 p1463 A66-19911
- Trajectory corrections of space vehicle launched toward planet, noting fuel consumption 20 p3595 A66-36872
- Launch and recovery system for large instrumented free flight models in high speed wind tunnel, using miniaturized telemetry and recording equipment [AIAA PAPER 66-776] 22 p3896 A66-40656

- SA ELECTRIC LEAD**
- Interaction mean free path of nuclear-active particles in iron determined by measuring number of interactions in each iron layer in ionization calorimeter 07 p1115 A66-17550
- Angular correlation of photons measured for positrons annihilating in normal and superconducting lead without observing any effect on Fermi surface 07 p1109 A66-18440
- Tunneling characteristics of superconducting energy gap of lead above critical magnetic field 09 p1416 A66-20027
- Temperature range of transition from superconducting to normal state in very pure lead determined from variation of specific heat and magnetic susceptibility 09 p1419 A66-20044
- Batch-fabrication of beam-lead transistors, integrated circuits and other components with leads serving as structural, protective and electrical functions 11 p1669 A66-23087
- Absorption bands in thin lead films, vacuum prepared, considering general analysis of elements in group IVA of periodic table 14 p2369 A66-28271
- Subharmonic structure in superconductive Pb-Pb tunneling junctions, noting energy gap values and background current temperature dependence 16 p2769 A66-30160
- Oscillating tunneling characteristics from electron interference in normal metal induced by superconducting contacts between silver and lead 16 p2769 A66-30168
- Ultrasonic attenuation dependence on

frequency in Pb crystals at low temperatures 16 p2770 A66-30179

Parallel and perpendicular magnetic transitions of superconducting lead films and foils determined from transverse magnetization and AC susceptibility measurements 16 p2770 A66-30190

Attenuation of longitudinal sound in pure crystals of superconducting lead 17 p2978 A66-32506

Negative temperature coefficient of electrical resistance, anomalous Hall constant and magnetoresistance constant for thin films of Be and Pb 18 p3157 A66-34627

Grain boundary migration in pure aluminum and lead under reversed torsional and bending stresses at elevated temperatures 19 p3386 A66-36365

High temperature fatigue in pure lead and aluminum observed continuously by microscopic cinecamera combined with fatigue machine 19 p3386 A66-36366

Troilite-graphite phase from Toluca meteorite analyzed to determine concentration and isotopic composition of lead using mass spectrometer, noting radiogenic problem 22 p3976 A66-39684

## LEAD ALLOY

Klim-Anderson model of flux pinning to compute magnetization of cylindrical hard superconductor, e.g. lead alloy 03 p0413 A66-13277

Magnetic and resistive superconducting transitions on bulk samples of indium-lead alloys in alpha-phase region, considering results relative to Glag theory 09 p1423 A66-20067

Phonon spectrum of lead indium alloys noting distinctness of impurity band as inferred from electron tunneling measurements 16 p2768 A66-30130

Au-Sn-Pb section of Au-Pb-Sn phase diagram, examining solderability of gold coatings of electronic components 16 p2722 A66-30223

Temperature dependence of mixed-state thermoconductivity of type II superconducting In-Pb alloys in magnetic field 21 p3797 A66-38751

## LEAD COMPOUND

Ferroelectric properties and morphotropic phase boundary in phase diagram of ternary system of compounds of lead, titanium and nickel 06 p0927 A66-16720

Synthesis, X-ray studies and dielectric measurements of lead containing perovskites 07 p1092 A66-17220

Temperature dependence of optical birefringence on single crystals of lead zirconate-titanate solid solution measured, noting they are optically negative 08 p1269 A66-19006

Lead stearate effect on thermodynamic properties of propellant, using heat-of-explosion test 16 p2790 A66-31685

Synthesis, X-ray studies and dielectric measurements of lead containing perovskites 17 p2976 A66-31991

Temperature and magnetic field effect on flux pinning by superconducting Sn precipitates in lead-indium matrix, noting occurrence of magnetic hysteresis 19 p3444 A66-38077

Lead stearate effect on heat of explosion in nitro-cellulose propellant combustion at various pressure levels 20 p3626 A66-38041

## LEAD OXIDE

Lead oxides formed from tetraethyl lead /TEL/ in combustion zone identified in analysis of antiknock properties 03 p0413 A66-12486

Vanadium pentoxide-boron oxide-lead oxide system IR absorption spectra and electroconductivity 10 p1582 A66-21917

Properties of hydrothermally grown single crystals of tetragonal lead monoxide, with contacts applied by metal evaporation 14 p2359 A66-27099

## LEAD SELENIDE

Pressure dependence of dominant emission modes from PbSe diode laser 03 p0378 A66-13003

Photo-induced recombination radiation from single crystals of PbSe and PbTe as function of carrier concentration and temperature 07 p1094 A66-17312

Spontaneous emission band analyzed to invoke principle of detailed

balance 07 p1094 A66-17313

Spontaneous and coherent emission from lead sulfide, telluride and selenide diode lasers in oriented magnetic field, determining band edge parameters from spin-split zero order Landau level transitions 13 p2100 A66-26185

Preparation temperature and condensation rate effect on current carrier mobility in lead selenide and telluride films 16 p2787 A66-31769

## LEAD SULFIDE

Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption 01 p0124 A66-10765

Varying deposition and firing conditions effect on range of detection of chemically deposited lead sulfide IR detector cells 03 p0407 A66-12332

Reflectivity of n-type lead sulfide measured as function of wavelength, temperature and carrier density 03 p0412 A66-13147

Radiative recombination emission and photoconduction in lead sulphide, emphasizing chemical deposition or vacuum evaporated layers 07 p1094 A66-17311

Numbers theory for lead sulfide photoconducting films, noting balancing of n and p-type impurities, various activation energies, etc 10 p1578 A66-21574

Photoconduction model for illuminated lead sulfide films with shunt path increase during barrier modulation 10 p1578 A66-21575

Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption 11 p1748 A66-22276

Spontaneous and coherent emission from lead sulfide, telluride and selenide diode lasers in oriented magnetic field, determining band edge parameters from spin-split zero order Landau level transitions 13 p2100 A66-26185

Preparation, X-ray measurements and photovoltaic properties of Ge-epitaxial-PbS heterojunctions 15 p2562 A66-28710

## LEAD TELLURIDE

Thermal and magnetic properties of GeTe and PbTe semiconductors containing transition elements in solution 01 p0127 A66-11079

NaCl substrate surface temperature and structure effect on orientation, structure and characteristics of vacuum-deposited PbTe film 04 p0564 A66-14255

Lead telluride single crystal grown on cleaved rock-salt substrates for thin-film field effect transistors 06 p0854 A66-16679

Photo-induced recombination radiation from single crystals of PbSe and PbTe as function of carrier concentration and temperature 07 p1094 A66-17312

Spontaneous emission band analyzed to invoke principle of detailed balance 07 p1094 A66-17313

Effect of sample geometry on frequency of helicon waves in lead telluride at low temperature 07 p1101 A66-18201

Cyclotron resonance in Azbel-Kaner geometry in n- and p-type lead telluride, examining anisotropy of absorption under anomalous skin effect conditions 07 p1102 A66-18205

Magneto-optical reflection measurements at liquid-helium temperature for p-type PbTe samples in Faraday and Voigt configuration 07 p1102 A66-18206

Pressure induced change in energy gap and forbidden bandwidth of lead telluride 10 p1587 A66-22152

Hall mobility and Hall constant variation for lead telluride-tin telluride polycrystals at high temperatures 13 p2163 A66-25419

Spontaneous and coherent emission from lead sulfide, telluride and selenide diode lasers in oriented magnetic field, determining band edge parameters from spin-split zero order Landau level transitions 13 p2100 A66-26185

Microscopic and electron diffraction structural analysis of epitaxial growth of PbTe by sublimation on split surface of NaCl at 150 degrees C in vacuum 13 p2170 A66-26757

Hall coefficient and thermal emf of electron gas of PbTe in strong magnetic field 14 p2358 A66-27088

Temperature dependence of Hall effect and conductivity of lead telluride single crystals containing bismuth 14 p2364 A66-27645

Entropy and heat of formation of lead telluride determined by emf temperature coefficient measurement 14 p2369 A66-28330

Preparation temperature and condensation rate effect on current carrier mobility in lead selenide and telluride films 16 p2787 A66-31769

Multiphoton plasma production and stimulated recombination radiation in lead telluride, considering electron-hole pair production rate 17 p2975 A66-31884

Coherent and spontaneous emission from lead-tin telluride alloys upon excitation by GaAs diode laser, noting band structure of alloy system 18 p3119 A66-34159

Pressure induced change in energy gap and forbidden bandwidth of lead telluride 19 p3440 A66-35766

Sublimation rates of pressed-and-sintered lead telluride and lead stannous telluride thermoelements 19 p3281 A66-36294

Predicted plasma mode in microwave frequency range for magnetoplasma excitations in germanium, applying theory to n-type and p-type lead telluride 22 p3960 A66-39805

Vibration modes frequencies of lead telluride propagating in certain symmetric direction determined by inelastic neutron scattering 22 p3966 A66-40405

Hall coefficient and thermal emf of electron gas of PbTe in strong magnetic field 22 p3967 A66-40844

Bond degradation and diffusion of braze and shoe constituents in lead telluride thermoelectric elements 24 p4247 A66-42107

Evaporation rates of lead telluride and lead tin telluride in pressed and sintered thermoelement form 24 p4247 A66-42108

Neutron activation analysis of sodium dopant concentrations and distributions in lead telluride thermoelectric materials during couple operation in vacuum and argon atmosphere 24 p4247 A66-42109

Thermoelectric material testing and selection for high-performance generator, noting lead telluride 24 p4160 A66-42112

Silicon-germanium lead-telluride segmenting for improved thermoelectric efficiency, noting sequential fabrication process difficulties 24 p4248 A66-42115

W-diffusion bonding in preparing segmented silicon-germanium-lead telluride thermoelements, noting properties 24 p4248 A66-42116

W-diffusion bonding of lead telluride base thermoelements with nonmagnetic electrodes 24 p4216 A66-42117

## LEAD TITANATE

Design and fabrication techniques for high voltage impulse generation by conversion of mechanical to electrical energy, using piezoelectric ceramics 01 p0016 A66-10916

Temperature and bias characteristics of ceramics of Pb/Zr-Ti/O-3 and its families, using schematic model on reorientations of 180 and 90 degree domains 08 p1243 A66-19061

## LEADING EDGE

## SA LEADING-EDGE SWEEP

## SA SHARP LEADING EDGE

Simplified leading-edge flow boundary value problem of Bhatnagar-Gross-Krook equation solved by finite difference method 01 p0058 A66-10633

Gas dynamics equation for wing of zero-thickness with two subsonic leading edges in supersonic flow reduced to wave equation 06 p0803 A66-17006

Leading edge pressure distributions measured on circular cylinders in normal cross flow, obtaining data from tests in arc heated perfect gas and variable atmosphere wind tunnels 11 p1686 A66-22845

Kinetic theory of leading edge of plate interacting with streaming gas evaluated by Bhatnagar-Gross-Krook equation of statistical mechanics 11 p1633 A66-22924

Flow field near leading edge of heated flat plate in Mach 0.5 airflow 11 p1634 A66-22934

Effect of variation in thermal expansion

- coefficient upon thermal stress in thin leading edge to set upper and lower limits 12 p1957 A66-23597
- First-collision process at sharp leading edge of flat plate aligned with hypersonic free stream 13 p1993 A66-26728
- Subsonic wing design, classical linearization technique used to describe leading edge boundary 15 p2425 A66-29638
- Shape of head wave in linearized supersonic flow past finite span wing, considering waves with convex and concave leading edge 16 p2632 A66-31792
- Nonlinear theory for flow past slender wings with leading edge vortices in sudden plunging motion 17 p2837 A66-32082
- Turbulent heat transfer measurements on transpiring flat plate in Mach 8 tunnel using nitrogen, helium and argon as injection gases 17 p2838 A66-32439
- Separated unsteady flow about flat plate rotating impulsively from rest to uniform angular velocity about axis along leading edge, noting torsional oscillations [AIAA PAPER 66-427] 17 p2910 A66-32753
- Wind tunnel experiments on thin two-dimensional airfoil with sharp leading edge and with jet blowing through mid-chord slot on upper surface in order to control boundary layer and circulation around it 18 p3048 A66-33950
- Flow in two-dimensional plane wall jet in still air with various initial gaps between nozzle exit and leading edge of wall 18 p3097 A66-33951
- Linearized calculation of subsonic wings with rounded leading edge 20 p3491 A66-36949
- Localized convection coefficient for hypersonic separation line along delta wing leading edge calculated, using Mangler and Stewartson transformation 20 p3492 A66-37818
- Nonlinear inductance effect on leading edge of high voltage nanosecond pulses during passage through ferrite magnetic field 21 p3801 A66-39156
- Welded titanium wing leading edge design and manufacture for increased range and load carrying capacity 22 p3924 A66-40256
- Lifting wings in supersonic regime, analyzing flow separation at leading edges [ICAS PAPER 66-20] 22 p3847 A66-40670
- Theory of wings with curved leading edges in supersonic flow, including delta wings with straight leading edges in case where motion is conical 23 p4008 A66-41379
- Supersonic unsteady gas flow around bodies at low Strouhal numbers, noting angle of attack amplitude and leading edge shock wave 23 p4009 A66-41719
- Unsteady state lift and moment action on lattice of profiles moving in incompressible fluid, determining suction originating at leading edges of profiles 23 p4009 A66-41723
- Shock wave transport effects on hypersonic leading edge flow past sharp plate, discussing Rankine-Hugoniot relations 23 p4058 A66-41910
- LEADING-EDGE SWEEP**
- Angle of attack, leading edge sweep and thickness effects on hypersonic flow field of slender delta wing 08 p1164 A66-19135
- Boundary layer transition measurements on swept wings with supersonic leading edges 14 p2219 A66-27439
- LEAKAGE**
- Leak detection methods and equipment for testing propellant actuated cartridges, missile fuses and timers 11 p1708 A66-23257
- Multiple quick-disconnect valve used in auxiliary power unit /APU/ of aircraft and serving several systems at once while preventing fluid leakage from one system to another 14 p2226 A66-28032
- Leak-rate transducers capable of aerospace flight detection of small gas flow rates in critical joints of Saturn engine systems 20 p3557 A66-37215
- Electronic hydrogen leak and fire detector systems installed on Saturn S-IVB static test firing stands, discussing installation and operational problems 20 p3557 A66-37216
- Sensitivity and safety of Kr-85 /radiokrypton/ for leak detection 22 p3928 A66-40497

- First-order Markovian gyro drift numerically evaluated and square root plotted vs interval and gyro correlation time 23 p4068 A66-41318

Approximate solution to digital sequential least squares estimation of eigenstates of nonlinear processes 23 p4050 A66-41614

Real time computer technique for least squares estimates of current system state for noisy nonlinear system, using Pontryagin maximum principle 23 p4050 A66-41615

Least squares estimates and random sampling theory, examining outliers in samples of size three 23 p4086 A66-41930

Stress separation in photoelasticity, using series solution of Laplace equation and least squares method 24 p4292 A66-42862

**LEE WAVE**

Mountain lee waves at White Sands Missile Range investigated by balloon soundings 02 p0253 A66-11970

**LEGAL LIABILITY**

Law of outer space - Colloquium, Athens, September 1965 19 p3480 A66-36201

Space vehicle and astronaut assistance and liability for damage 19 p3481 A66-36202

Proposals for international convention on liability for damage caused by spacecraft, noting principles, preparatory work done and future measures 19 p3481 A66-36203

Space legal liability and damage in UN resolution 19 p3482 A66-36206

Liability resulting from space activities 19 p3482 A66-36208

Legal problems and general principles of space law 19 p3484 A66-36224

**LEGENDRE FUNCTION SERIES**

Solution of dual integral equations containing Legendre conic functions and trigonometric functions 12 p1905 A66-24344

Maximum error curves for Lanczos selected point method of polynomial solution to ordinary differential equations, using Chebyshev and Legendre functions 17 p2947 A66-32858

Fourier series of Gegenbauer function, examining convergence characteristics 18 p3126 A66-33696

Transformation of infinite Legendre sums into finite series of Legendre polynomials by transforming sum into integral leading to difference equations 22 p3995 A66-40458

**LEGENDRE POLYNOMIAL**

Second derivatives of Legendre and Laguerre polynomials based on Markov inequalities 08 p1244 A66-18792

Approximate theory of shells of revolution of average thickness, using seminverse method and expansion into series in Legendre polynomials 11 p1779 A66-22229

**LEGENDRE TRANSFORM**

Thermodynamic formalism based on fundamental relation and Legendre transformation, with macroscopic and statistical application 08 p1319 A66-19292

Decomposition technique by which convex control programming problem, having coupled subsystem constraints, can be decomposed into smaller subproblems 13 p2117 A66-25349

Legendre transformation and characteristics of MGD potential equation 13 p2142 A66-25708

**LEGIBILITY**

Effect of color and brightness contrast, direction of contrast and contrast values on legibility of circular dial 21 p3701 A66-39420

Legibility analysis to investigate effects of scale factors, graduation marks, etc, on speed and accuracy of reading moving tape instruments 21 p3701 A66-39422

**LEM**

**S LUNAR EXCURSION MODULE /LEM/ LENS**

**SA LUNEBERG LENS**

**SA QUADRUPOLE LENS**

**SA VISUAL ACCOMMODATION**

**SA WIDE ANGLE LENS**

Statistics of beam waveguide light-ray propagation extended to include correlations between displacements of different lenses 05 p0634 A66-15179

Design of intentional bends of beam waveguide, giving relations between waveguide parameters and radius of curvature of guide axis 06 p0846 A66-16093

Transverse beam width and phase constant of nonsquare law media for light propagation in imperfect lenslike media requiring repeater 13 p2127 A66-25539

Lens aberration correction using Gabor

wavefront reconstruction method to produce hologram of spherically aberrated wavefront emerging from lens 13 p2080 A66-25990

Fast lens component for SFR high speed photographic recorder with asymmetric objectives 17 p2927 A66-33439

**LENS ANTENNA**

Beam waveguides for long distance electromagnetic wave transmission at optical wavelengths described by theory of focusing antennas 11 p1656 A66-22737

Thinned lens approach in optimizing cost and performance of phased array antenna 15 p2455 A66-28568

Beam waveguides for long distance electromagnetic wave transmission at optical wavelengths described by theory of focusing antennas 23 p4037 A66-41475

**LENS DESIGN**

**SA OPTICAL CORRECTION PROCEDURE**

Duoplasmatron with electrostatic lens decreasing ion energy while focusing ions for maximum density parallel beam 01 p0114 A66-10851

Constructing and evaluating electrostatic filter lenses with wide image angles for low voltage electron microscope 02 p0228 A66-11498

Electron microscope filter lenses with unconventionally shaped electrodes and large image angles 02 p0228 A66-11499

Lossless conversion of plane laser wave to plane wave of uniform irradiance, noting planoaspheric lenses method and aberrated lens system 02 p0242 A66-12204

Two lenses with focal ratios of f/4 and f/2.65 used to collimate light from helium-neon laser 05 p0695 A66-14921

Light waveguide for general lens-like media, ideal lenses and continuous media with square-law index variation 05 p0634 A66-15178

Periodic gas lenses, discussing structure ray optics properties of alternating gradient focusing systems 05 p0717 A66-15180

Cardinal points of optical glass lenses and technique for converting thick single lenses into equivalent lenses of zero thickness 07 p1030 A66-17202

Lens centering errors effect on optical image quality and wave front aberration 08 p1255 A66-19220

Best-fit sphere approximation to general aspheric lens surface, discussing computer program 09 p1402 A66-20514

Irregular bends and lens displacements effect on wavelength and modes in laser waveguide 11 p1713 A66-23103

Two wide-angle camera lenses, one adapted by NASA for Tiros satellite, noting freedom from astigmatism and distortion correction by choosing refractive index 14 p2291 A66-27318

Wavefront shearing prism interferometer applied to testing of chromatic aberration of simple and compound lenses and waveforms characterizing monochromatic aberrations 14 p2291 A66-27319

Lens decentering distortion using thin prism and Conrady models, noting application of precise calibration to photogrammetry 16 p2746 A66-30514

LASL lens design program for Doublet Achromat, from existing Fraunhofer design, used in solar corona monochromatic photography 19 p3354 A66-35383

Lens design by computer methods known as Flair and Triplet 19 p3399 A66-35824

Flexible lens design program system for determining optimum solution to set of requirements 19 p3399 A66-35825

Structural design relationship to optical design with reference to tolerance in range tracking instruments 19 p3358 A66-35826

Two-dimensional microwave lenses with large angular field for radar antenna, noting residual aberrations 20 p3527 A66-37427

**LENTICULAR BODY**

Feasibility study indicates that cap-type microwave reflectors can be used as communication satellites 04 p0586 A66-13927

Martian clouds analysis and topographical relationships, discussing white and yellow classification and frequency of occurrences 15 p2602 A66-29951

**LEONID METEOR**

Luster micrometeoroid sampling payload

launched during Leonid meteor shower November 16, 1965 at White Sands Missile Range 15 p2604 A66-30066

Aerobee rocket measurement in sampling of micrometeoroid debris during peak of Leonid meteor shower 15 p2605 A66-30068

**LEPTON**

Effects of derivative terms in leptonic current of photon interaction yielding neutrino and antineutrino 07 p1083 A66-18239

Static properties and interactions of neutrinos noting mass, spin, helicity, charge, lepton number, etc 15 p2546 A66-29582

Statistical equilibrium of fundamental particles at elevated temperatures, determining degeneration parameters 15 p2618 A66-29645

**LES**

**S LINCOLN EXPERIMENTAL SATELLITE /LES/**

**LESA**

**S LUNAR EXPLORATION SYSTEM FOR APOLLO /LESA/**

**LEWIS NUMBER**

Convective heat transfer measurements for partially dissociated carbon monoxide and hydrogen with high Lewis number [ASME PAPER 65-WA/HT-27] 05 p0793 A66-15676

Heat capacity expression due to chemical reaction, relating composition variations and binary diffusion coefficient with Lewis number, presenting integral equation for system enthalpy 08 p1318 A66-19164

**LIAPUNOV FUNCTION**

Collected works of Liapunov on equilibrium configurations of fluids 01 p0056 A66-10304

Liapunov work on equilibrium configuration of inhomogeneous rotating fluid 01 p0056 A66-10305

Series of equilibrium configurations for homogeneous rotating fluid in monograph of Liapunov 01 p0056 A66-10306

Liapunov monograph on equations for surfaces of equilibrium configurations of rotating fluid deriving from ellipsoids 01 p0056 A66-10307

Stability equilibrium criteria for orthotropic rectangular plates discussing Liapunov and other theories 01 p0154 A66-10476

Liapunov function determining sufficient conditions for stability of autonomous functional differential equations with finite time lag 02 p0249 A66-11900

Stability of solution to autonomous Liénard equation, using second Liapunov method 03 p0392 A66-12688

Current trends in nonlinear control theory 03 p0349 A66-12701

Stability of automatic control system with nonlinear elements, obtaining quadratic equations by using Liapunov method 03 p0349 A66-12707

Axiomatic approach to control system theory as generalization of dynamic systems, noting weak and strong stability and Liapunov function 03 p0351 A66-13255

Book on motion stability using Liapunov method noting motion equations, perturbing forces effect on equilibrium, instability, Lagrange theorem, etc 03 p0393 A66-13286

Liapunov stability equilibrium for systems with infinite number of degrees of freedom, discussing stability criteria 04 p0545 A66-13558

Quadratic form as Liapunov function for linear homogeneous vector differential equation with constant coefficient matrix 04 p0539 A66-13825

Book on state variables for control theory noting transfer functions, time domain, nonlinear system stability using Liapunov method, optimization, etc 04 p0504 A66-13836

Global asymptotic stability problem for complex high order system solved by transformation into interconnected set of lower subsystems 05 p0654 A66-14608

Optimization theory and converse of circle criterion for simple time-varying feedback system 05 p0655 A66-14620

Solution method for Poincaré problem concerning periodic solutions of nonautonomous systems with analytical right-hand side 05 p0708 A66-15338

Equilibrium solution stability of discrete systems represented by origin in state space

- studied by Liapunov functions and quadratic moments  
ASME PAPER 65-WA/AUT-17] 05 p0710 A66-15619

- Theorems and corollaries describing bounds for quadratic Liapunov functions 10 p1551 A66-21918
- Unilateral estimates under conditions of asymptotic stability of solutions to differential equations with unbounded operators 10 p1552 A66-21985
- Liapunov first method and applicability to asymptotic stability of stationary points of nonlinear differential systems 11 p1721 A66-22641
- Sufficient conditions for asymptotic dynamic stability of linear differential system with random retardation, using Liapunov function method 11 p1736 A66-22643
- Liapunov function for case of stability with constantly acting disturbances in nonlinear spaces 11 p1723 A66-23316
- Stability and boundedness for solutions of class of complex differential systems obtained in terms of Liapunov-like functions 11 p1725 A66-23426
- Existence of Liapunov functions for problem of Lure with removal of complete controllability and observability 11 p1681 A66-23451
- Liapunov second method applied to interconnected differential systems 11 p1682 A66-23456
- Overall stability of equilibrium position in critical Liapunov case, using extension of Malkin method 12 p1848 A66-24030
- Liapunov second method applied to stability of general second order bang-bang control systems 12 p1850 A66-24259
- Two theorems on Liapunov second method, discussing related automatic control system techniques and asymptotic system stability 12 p1850 A66-24264
- Stability and quality evaluation of nonlinear sampled data control systems using Popov criteria for continuous nonlinear systems 12 p1852 A66-24325
- Dynamic system stability, developments, application and literature 12 p1854 A66-24636
- Stability of pulse frequency modulated closed-loop control systems determined, using state variables which define system output and error 12 p1855 A66-24640
- Man-machine systems for interplanetary exploration, using functional analysis techniques for system design 13 p2013 A66-25281
- Stability criteria of trivial solution of rheolinear differential equation verified by calculating Liapunov function for nonlinear equations 13 p2117 A66-25399
- Plasma stability problem, discussing macroscopic and microscopic approaches and application of Liapunov method 13 p2141 A66-25583
- Averaging method for differential equations with retarded arguments 13 p2118 A66-25827
- Countable systems of differential equations, considering differential operator theory and infinite systems 13 p2119 A66-25850
- Equations for two coupled van der Pol oscillators, Liapunov function used to find four-dimensional phase space nonperiodicity cylinder and subspace of exiting trajectories 13 p2042 A66-26088
- Liapunov stability and instability in critical case of determining equation with even number of zero roots 14 p2336 A66-28065
- Domains of attraction in large of periodic solutions of weakly nonlinear systems, using Liapunov function and differential equations 15 p2525 A66-28509
- Existence, boundedness, decay and exponential decay of solutions of classes of nonlinear systems of differential equations, using suitable Liapunov functions 15 p2525 A66-28510
- Sufficient conditions for recurrence and positivity of diffusion process defined by stochastic differential equation, using Liapunov function 15 p2525 A66-28512
- Singular characteristics of dynamic systems with steady state motion, noting effect of constantly acting small perturbations 15 p2537 A66-28950
- Liapunov stability of motion of heavy rigid body with fixed point moving along spherical surface 15 p2537 A66-28966
- Liapunov method and dynamic programming of stability of motion of variable mass point in Oxyz coordinate reference system, allowing for Earth rotation effects 15 p2538 A66-29046
- Existence and stability theorems for almost periodic solutions of nearly Liapunov systems 15 p2527 A66-29050
- Control system stability under external forces discussing Liapunov function construction, transfer functions and matrix analysis, frequency conditions of absolute stability, etc 15 p2470 A66-29147
- Dynamic system stability, control and observation, noting optimal system synthesis, application of functional analysis, Liapunov function and dynamic programming 15 p2470 A66-29149
- Liapunov function method used simultaneously as criterion of motion stability of several Liapunov functions and of derivatives of higher order than first 15 p2539 A66-29151
- Liapunov methods of studying motion stability of solid bodies with liquid-filled cavities 15 p2539 A66-29155
- Differential equations for motion stability of systems with time delay solved, using Liapunov function methods 15 p2540 A66-29156
- Stability of gyroscopes, gyrostabilizers and gyroscopic systems treated by methods of Liapunov and Chetaev 15 p2542 A66-29173
- Stochastic extensions of techniques for using Liapunov second method in design and analysis of feedback controls, using differential equations 15 p2473 A66-29376
- Normal solvability of Dirichlet problem for Bitsadze elliptic system, noting conditions under which homogeneous problem has nonzero regular solutions 16 p2734 A66-30784
- Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 16 p2670 A66-30832
- Convex programming problems, developing parametric gradient method for approximate solution 16 p2656 A66-30836
- Solution method for Poincare problem concerning periodic solutions of nonautonomous systems with analytical right-hand side 16 p2735 A66-30968
- Stability analysis for steady disk movement over rough horizontal plane, using Liapunov function method 16 p2715 A66-31616
- Book on stability, oscillation and time lags in differential and differential-difference equations, discussing Liapunov stability theorem 16 p2739 A66-31754
- Stability of constant solutions for second-order nonlinear differential equation which uses Hahn notations and definitions 17 p2945 A66-31837
- Basic theorems of Liapunov direct method with theory of first approximation/linearization/ and stability criteria for linear motions 17 p2946 A66-32325
- Topological classification of higher dimensional systems of ordinary differential equations by Liapunov functions 18 p3127 A66-33976
- Discontinuous Liapunov functions applied to stability analysis of position-controlled system with symmetrically-controlled asynchronous motor 18 p3091 A66-34671
- Poincare-Liapunov systems of ordinary differential equations, qualitatively investigating plane and rough systems, singular points, periodic solutions, etc 18 p3128 A66-34966
- Absolute stability criteria of control system with one nonlinear element, using Liapunov functions 18 p3092 A66-35016
- Sensitivity analysis and Liapunov stability, discussing correctly set problem and parametric imbedding within theory of partial differential equations 19 p3326 A66-36010
- Unilateral estimates under conditions of asymptotic stability of solutions to differential equations with unbounded operators 19 p3390 A66-36190
- Liapunov second method and stability theory of autonomous and certain nonautonomous systems 19 p3391 A66-36438
- Electromagnetic instabilities in collisionless plasma obtained, using Liapunov function 19 p3423 A66-36554
- Liapunov method synthesis of time variable nonlinear multivariable systems, deriving simplified control law for tracking of linear noninteracting model 19 p3335 A66-36697
- Model reference adaptive control system synthesis based on Liapunov direct method 19 p3335 A66-36698
- Interpretation of results obtained by Liapunov method, using parallelepiped imbedded in region of asymptotic stability 19 p3337 A66-36717
- Liapunov functions for finite time stochastic stability and analysis of tracking system 19 p3338 A66-36738
- Transformation matrix converting phase variable form into Schwartz form for application to Liapunov function and Hurwitz criterion 19 p3392 A66-36742
- Motion of arbitrary gyrostabilizer in central Newtonian force field, applying Liapunov stability conditions for regular precession 19 p3362 A66-36841
- Conditional stability and boundedness of conditionally invariant sets derived from vector Liapunov function 21 p3755 A66-38538
- Stability of bodies with holonomically constrained moving parts, using method of Liapunov to demonstrate dependence of

motion stability on potential function of generalized coordinates

[AIAA PAPER 66-101] 21 p3827 A66-38695  
Dynamical system stability examined using direct method of Liapunov, noting application to periodic solutions 21 p3718 A66-39104

Existence of q-ary uniform convolutional codes where q is any prime-power, noting error-correcting ability comparable to familiar maximal-length block codes 21 p3704 A66-39138

Synthesis of optimal Liapunov-Bellman function, noting sequential solution method for independent variables and method using first-order partial differential equation 21 p3758 A66-39281

Normal solvability of Dirichlet problem for Bitsadze elliptic system, noting conditions under which homogeneous problem has nonzero regular solutions 22 p3940 A66-40446  
Liapunov function and Meyer-Kalman-Yakubovich lemma used to obtain frequency domain stability criteria for linear plant with both monotone increasing and odd monotone increasing nonlinear feedback functions 22 p3940 A66-40529

Stability analysis of inertial guidance platform control system with saturation and Coulomb friction nonlinearities, using Liapunov method 23 p4089 A66-41319

Existence and uniqueness theorems in Poincare-Liapunov theory for multipoint control boundary value problems 23 p4085 A66-41539

Perron theorem, Liapunov functions and stability analysis of certain perturbed systems 23 p4085 A66-41552

Nonlinear methods to describe stability motion of solids with liquid-filled cavities 23 p4059 A66-41982

Equations describing stability in Liapunov sense with respect to permanently existing perturbation 24 p4230 A66-42217

Asymptotic stability of linear systems, using matrix analysis 24 p4187 A66-42375

Book on dynamic stability theory using Liapunov second method 24 p4237 A66-42612

Quadratic Liapunov functional derivation for time-delay system 24 p4232 A66-42845

#### LIBRATION

Space probe at Trojan libration point of Earth-Sun system 14 p2384 A66-27890

Stability of spacecraft motion in Earth-Moon system near equilateral libration point 16 p2810 A66-31252

Spacecraft mission to libration centers of Earth-Moon system for collecting meteoroids and photographic program carried out for establishing presence of material at centers 18 p3236 A66-34955

#### LIBRATIONAL MOTION

Routh criterion concerning existence of periodic solutions around triangular libration centers is shown to be valid only at first order [AIAA PAPER 65-681] 01 p0134 A66-10235

Nonlinear resonance effect on attitude librations of undamped rigid gravity gradient stabilized satellite in circular Earth orbit 01 p0143 A66-10811

Material elasticity effects on planar librational motion of rigid satellite under action of gravity 01 p0144 A66-10812

Solar influence on libration point satellite motion for 2500 days in vicinity of Earth-Moon system [AIAA PAPER 65-88] 02 p0288 A66-11556

Lunar physical libration constants determination based on position of crater Mesting A with respect to lunar limb 02 p0293 A66-12265

Lunar topographical asphericity, lunar coordinates, absolute and relative, harmonic analytical interpolation, formations, stratigraphy and optical librations 07 p1139 A66-18265

Limiting periodic solutions around triangular libration centers and Routh criterion 13 p2184 A66-25806

Space probes and Earth-Moon libration points 13 p2186 A66-26012

Cislunar libration point as place of departure, rendezvous and parking for lunar operation 14 p2390 A66-28450

Uniqueness of equilibrium attitudes for Earth-pointing satellites 16 p2806 A66-31541

Gravity gradient stabilization of near-Earth satellite with extensible boom and libration damping with combined lossy spring and magnetic hysteresis rods 18 p3244 A66-33862

Tesseral perturbations of repeating ground track synchronous satellite orbits in gravitational potential 18 p3233 A66-34595

Lagrange-Laplace theory of lunar physical librations extended to include reduced estimate of mechanical ellipticity of lunar equator 19 p3460 A66-35791

Book on methods in astrodynamics and celestial mechanics including libration points, satellite motion, orbit determination, optimization, optimal control, etc 19 p3460 A66-35887

Theory and application of motion associated with equilibrium configurations of dynamical systems applied to astronomy and space dynamics 19 p3461 A66-35888

Three-body model including low thrust forces used to generate artificial libration points or assure stability of five Lagrangian libration points in Earth-Moon space [AIAA PAPER 65-682] 19 p3461 A66-35889

Effect of Sun perturbations on motion near Earth-Moon equilateral libration points [AIAA PAPER 65-683] 19 p3461 A66-35890

Satellite motion under influence of longitude-dependent terms of geopotential in reference frame rotating with satellite mean motion, noting tesseral harmonics effect and dynamical and librational resonances 19 p3470 A66-36388

Long-period orbits in vicinity of equilateral equilibria in restricted problem studied by method similar to method explaining frequency pulling in electronics 20 p3654 A66-37799

DODGE satellite will be capable of two- and three-axis gravity-gradient stabilization at near synchronous altitude, using moment-of-inertia distributions and libration damping 21 p3820 A66-38860

Lagrange libration points in plane of two mutually gravitating heavy masses applied to theory of SYNCOM lunar satellites 22 p3979 A66-40176

Dumbbell librations of satellites in elliptic orbits of small eccentricity determined via WKBJ approximation 24 p4272 A66-42158

Normal modes of libration and response to perturbing torques of satellite with attitude stabilized in all libration angles by wire arrangement 24 p4283 A66-42769

#### LIDAR

Airborne laser-radar light detection and ranging /LIDAR/ systems applied to detection of clear air turbulence /CAT/ 05 p0697 A66-15297

Laser radar as instrument to obtain operational meteorological information 10 p1540 A66-21067

Optical instrumentation radar for real-time positional data on high-speed cooperative targets 13 p2023 A66-25654

Atmospheric observation with advanced light radar, noting equipment characteristics, molecular scattering mechanism, etc 13 p2122 A66-26133

High powered Q-switched ruby laser /LIDAR/ for meteorological application, noting system equations, design, operation, etc 13 p2122 A66-26548

Optical communication using laser techniques 14 p2234 A66-26918

Laser Doppler velocimeter for measuring localized flow velocities in liquids 14 p2306 A66-27053

Radio location by coherent light with quantum structure 14 p2242 A66-28157

Coherent transmission of optical radar from laser source and use of RF subcarriers placed on optical beams for wideband communications purposes 14 p2244 A66-28404

Precision automatic tracking using CW He-Ne laser, noting performance and application 14 p2245 A66-28448

Atmospheric exploration with lidar, noting high resolution and sensitivity 15 p2530 A66-28600

Airborne laser radar investigation of clear air turbulence 15 p2533 A66-28928

Optical radar scanning system, using ruby laser source for meteorological studies 15 p2450 A66-28929

Submillimeter and millimeter radar and LIDAR astronomy contribution to solar

system communications, and planetary, and lunar surface studies 15 p2595 A66-29002

Measurement of distance to Moon by optical radar, discussing ruby laser/photomultiplier apparatus and procedure 16 p2647 A66-30291

Cloud height measurement by optical radar systems 17 p2949 A66-32884

Lidar detection of backscatter from upper atmosphere 17 p2875 A66-32929

Gallium arsenide diode laser as pulsed IR source for experiment and design considerations for radar indication of cloud height and visibility 18 p3066 A66-33616

Optical techniques in laser detection systems 20 p3516 A66-37439

Detecting concentration of nitric oxide in metastable state in upper atmosphere, using giant-pulse Raman laser sources 24 p4203 A66-43022

#### LIE GROUP

Group classification of solutions to Hopf equation according to type of viscosity coefficient 08 p1209 A66-19476

Left almost periodic function defined on topological group G is not necessarily right almost periodic even if g is Lie group 18 p3127 A66-34461

Partly invariant solutions of equations admitting Lie group and application to gas dynamics 23 p4086 A66-42024

#### LIFE

S ABIOTIC GENESIS

S BIOGENESIS

S EVOLUTION

S EXTRATERRESTRIAL LIFE

S FATIGUE LIFE

#### LIFE DETECTOR

Martian life-detection instruments and experiments, examining biological criteria and visual, organic, chemical and metabolic tests 02 p0183 A66-11608

Future of environmental biology, discussing space research on living organisms in extraterrestrial environment 04 p0470 A66-14069

Detection of microbial life on near planets by measuring physical parameters 06 p0810 A66-15909

Biosyllektes, device for collecting microorganisms in interplanetary space or upper atmospheric layers 06 p0814 A66-15914

Automated life detection on Martian environment based on metabolism, reproduction and chemistry 06 p0818 A66-16323

Extraterrestrial life detection and life support systems in manned space travel, noting electronic equipment necessary for it 08 p1175 A66-18727

Search for terrestrial life at kilometer resolution, using Tiros and Nimbus meteorological satellite photographs 10 p1605 A66-21209

Spectral reflectance of selected vegetation, animal integuments and minerals for life detection on Mars 10 p1608 A66-21520

Approaches for analyzing possible life forms on other planets, noting detection of microorganisms or enzymes, radio contact and retracing life in laboratory 13 p2009 A66-25798

Pasteur Probe assay of asymmetry of D, L amino acids in detection of Martian life 15 p2447 A66-30025

Book on extraterrestrial biology covering origin processes of life, planets, life detection, etc 16 p2639 A66-30874

Life detection instrument incorporating metabolism and growth experiments including detection of metabolism of radioactive substrates, photosynthesis, etc 18 p3062 A66-34368

Processing of planetary soil samples for detection of extraterrestrial life 18 p3062 A66-34370

Life detection on Mars by visual techniques, discussing imaging devices, filters, shutters and microscopy 18 p3063 A66-34371

Mass spectrometry and gas chromatography in analysis of organic compounds present in extraterrestrial bodies to provide information on existence of life 18 p3059 A66-34373

Mars probe instrument package design for biological exploration 19 p3287 A66-35572

Automated biological laboratory with initial

- missions to Mars, noting functions operation and necessary instrumentation 24 p4167 A66-42671
- Extraterrestrial life detection on Mars and limitations on terrestrial observations and flyby and landing 24 p4167 A66-42673
- missions Wolf Trap Mars microorganism detection, assuming photosynthetic and respiration cycles in inorganic biochemical compounds 24 p4168 A66-42676
- LIFE SCIENCE**
- Possibility of life originating in different forms in various parts of universe as response to changing environmental conditions 01 p0017 A66-10300
- Prevalence and diversity of life in Cosmos, tracing divergent evolution in response to variety of environment 01 p0017 A66-10303
- Papers on experimental and theoretical aspects of exobiology 02 p0181 A66-11601
- Bibliography of current aspects of exobiology dealing with solar system, life detection system, origin of life and life in universe 02 p0182 A66-11612
- Migration of north and south poles by angular displacement of Earth mass, explaining geographical distribution of flora and fauna, past and present 05 p0667 A66-14730
- Chemical evolution studied by finding and reconstructing chemical reactions that might have occurred among primeval molecules on surface of Earth 05 p0629 A66-15017
- Nucleic acid molecule reproduction discussing probability of life development under favorable environmental circumstances 06 p0952 A66-15915
- Text on evolution, interpreting functions of body organs in terms of chemical processes and tracing development of complex organic molecules 10 p1487 A66-22065
- RCA life sciences paper on microscale medical sensors, adaptation theory, logic techniques and human factors engineering 11 p1647 A66-22297
- Mars environmental conditions, life organism detection, evaluation and limiting effects 11 p1771 A66-22715
- Life sciences and space research, Volume 4, International Space Science Symposium, Argentina, May 1965 19 p3283 A66-35567
- Origin of constituents of nucleic acid and protein molecules, noting biological molecules synthesis under conditions similar to those prevailing in prebiotic Earth, following Oparin-Haldane hypothesis 20 p3507 A66-38029
- Book on natural evolution including origins of universe, stellar and planetary evolution, beginnings of life on Earth and development of intelligence and technical civilizations among galactic communities 24 p4163 A66-42347
- NASA Biosatellite Program exploring dynamic space flight effects on terrestrial organisms and Earth diurnal rotation effect on biological rhythm 24 p4168 A66-42675
- LIFE SUPPORT SYSTEM**
- SA CLOSED ECOLOGICAL SYSTEM
- SA PRESSURIZED CABIN
- SA PRESSURIZED SUIT
- Program for engineering development of integrated spacecraft environmental control and life support systems and solution of man-machine integration problems [SAE PAPER 650813] 01 p0021 A66-10820
- Physiological-ecological investigations of *Chlorella* cultures as link in closed ecological system 01 p0018 A66-10981
- Animal and human test of manned spacecraft life support system consisting of closed system with recirculating air loop, examining potassium superoxide-potassium hydroxide chemistry 02 p0183 A66-11492
- Thermal control in advanced integrated life support system design to accommodate four-man crew on one-year Earth orbit mission 02 p0185 A66-11631
- Heat rejection from space radiator of power system used as energy source when integrated with life support system 02 p0186 A66-11642
- Tests of advanced life support and environmental control systems in manned space laboratory 02 p0186 A66-11646
- Apollo space suit design discussing construction, purpose and operating conditions of liquid-cooled life support system 03 p0328 A66-12631
- Electrolysis-Hydrogenomonas bacterial bioregenerative life support system for manned space flight of long duration 06 p0815 A66-15929
- Alkali metal superoxide applied by Soviet as active chemical for space cabin air revitalization 06 p0819 A66-16830
- Life support closed cycles for missions to outer space lasting 12 months or longer, considering recovery and replenishing of water, food and oxygen from wastes 07 p0998 A66-17229
- Zero-gravity effect on opossum fetus observed by TV system in proposed satellite 08 p1176 A66-18726
- Extraterrestrial life detection and life support systems in manned space travel, noting electronic equipment necessary for it 08 p1175 A66-18727
- Drinking water reclamation from urine by thermoelectrics, including operational theory and data for working models 08 p1176 A66-18730
- Oxygen recovery from metabolic carbon dioxide for spacecraft environment 08 p1177 A66-18821
- Recovery of reusable products of human excretory wastes in closed-loop life support systems for long-duration manned spaceflight [AICE PREPRINT 19B] 10 p1491 A66-21185
- Chemical analysis of permanent and trace organic gases in 30-day manned experiment, using gas chromatography 12 p1811 A66-25011
- Integration of life support system and propulsion system for manned interplanetary space missions 13 p2012 A66-25246
- Integrated space suit, suit loop and backpack system for intravehicular operation on interplanetary missions 13 p2013 A66-25277
- Algatron, device for life support systems in space, providing potable water, oxygen supply, stabilizing human wastes by algal photosynthesis 13 p2015 A66-25702
- Thermal integration of electric power for use in life support system to reduce total electrical power requirements [AIAA PAPER 64-722] 13 p2004 A66-26617
- Regenerative life support system for four-man crew on long duration tests, noting biological constraint parameters 17 p2862 A66-32138
- Carbon dioxide control for manned spacecraft, discussing regenerative methods for eliminating system weight dependence on mission duration 17 p2863 A66-32141
- Ideal operation of portable life support system /PLSS/ requires anticipatory response to astronauts changing heat dissipation needs 17 p2863 A66-32152
- Life support subsystem for recovering breathable oxygen by water vapor electrolysis 17 p2866 A66-32194
- Aerospace life support - Conference, American Institute of Chemical Engineers, Houston, February 1965 17 p2866 A66-32667
- Water electrolysis unit designed as flight prototype to support four-man crew for one-year mission with 90-day resupply intervals [AICE PREPRINT 47B] 17 p2867 A66-32671
- Manned spaceflight analytical instrumentation uses design tradeoff of reduction in size with loss of versatility 17 p2867 A66-32677
- Suitability of oxygen-helium atmosphere for manned space missions proven by 56-day human exposure at 258 mm Hg total pressure 18 p3057 A66-33768
- Major and minor constituents of oxygen-helium atmosphere to which humans were exposed for 56 days 18 p3057 A66-33769
- Human renal response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33770
- Human blood enzyme response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33771
- Exercise performance and cardiovascular response of man exposed for 56 days to oxygen-helium atmosphere 18 p3057 A66-33772
- Respiratory effects of 56-day human exposure to oxygen-helium atmosphere 18 p3058 A66-33774
- Bite-size foods included in feeding study of man exposed for 56 days to oxygen-helium atmosphere 18 p3061 A66-33775
- Nutritional evaluation of feeding bite-size foods to man exposed for 56 days to oxygen-helium atmosphere 18 p3061 A66-33776
- Lunar Exploration System for Apollo /LESA/, discussing life support, power, fuel, communications systems, mission objectives and base evolution concept phases [SAE PAPER 660449] 18 p3093 A66-33895
- Apollo LEM ECS and main subsystems design emphasizing maintenance of pressure, temperature, relative humidity and oxygen at safe levels 18 p3062 A66-33956
- Life support requirements encountered in manned space flights, considering cycle involving oxygen, food and water in terms of process criteria 19 p3485 A66-36231
- Weight and size optimization of flight type cryogenic storage supply system of oxygen and hydrogen for fuel cell operation and life support in manned spacecraft 19 p3292 A66-36233
- Physical and psychological aspects of man in space, examining oxygen supply, temperature extremes, meteorites, radiation and effects of confinement, isolation and sensory impoverishment 19 p3287 A66-36645
- Two-gas regenerative life support system for pressure, thermal and humidity control, water reclamation, atmospheric circulation, carbon dioxide and trace contaminant removal [AIAA PAPER 65-501] 20 p3510 A66-38172
- Storage, dumping and regeneration techniques in air, water and food needed to keep astronauts alive 22 p3857 A66-40022
- Cleaning techniques for zip gun or hand-held maneuvering unit and environmental life support system or ventilation control module used for astronaut White walk in space 22 p3886 A66-40039
- Life support systems for crew comfort and safety, considering thermal and radiation environmental control, carbon dioxide removal, cryogenic gas storage, etc 22 p3857 A66-40129
- Book on problems of return from space including heat protection, materials, development testing, life support, design, simulation and other related activities 22 p3988 A66-40875
- Tests of advanced life support and environmental control systems in manned space laboratory simulator 24 p4168 A66-42779
- Onboard spacecraft generation system extracts necessary breathing oxygen from ambient air, using electrochemical cell that separates oxygen from inert gases and impurities 24 p4162 A66-42956
- Regenerative air conditioning systems of spacecraft cabins for long missions, analyzing principal parameters of gas mixtures for life requirements 24 p4169 A66-43142
- Physicochemical methods of creating life support systems in spacecraft cabins 24 p4169 A66-43143
- Life support system in spacecraft cabins based on biological circulation of substances 24 p4166 A66-43144
- Safety and survival in manned space flights, discussing space suits, escape, life preservation after soft landing, etc 24 p4169 A66-43145
- LIFETIME**
- SA PLASMA LIFETIME
- SA SATELLITE LIFETIME
- Rotating mirror arrangement with tungsten light source for minority carrier lifetime measurements on semiconductors 03 p0369 A66-12611
- Lifetime of semiconductor devices determined from noise levels 06 p0860 A66-17195
- Transition probabilities and lifetimes in ionized argon gas lasers 13 p2102 A66-26207
- Fluorescence lifetime measuring technique employing pulsed or modulated RF discharges applied to emission of second positive and first negative systems of nitrogen 14 p2337 A66-27974
- Fluorescent lifetimes of neodymium,

ytterbium and samarium incorporated in ordered perovskite-type compounds determined, noting crystal structure potential for laser 14 p2367 A66-27976

Life expectancy of form C dry reed switch as function of operating environment 15 p2460 A66-28992

Lifetime measurement for minority carriers injected into germanium by electron bombardment 15 p2567 A66-29409

Lifetime of semiconductor devices determined from noise levels 19 p3315 A66-35553

Effective charge carrier lifetime in silicon p-i-n junction detectors determined, using transit time for carriers produced by incident radiation 19 p3318 A66-35913

DC-photodecay method for investigating minority-carrier lifetimes in silicon crystals 21 p3736 A66-38747

Coverage dependent evaporative lifetimes of various metals and oxygenated W ribbon filaments at high temperatures 22 p3934 A66-40097

**LIFT**

SA DRAG

SA GROUND EFFECT

SA INTERFERENCE LIFT

SA JET LIFT

Problem of operational flexibility in Mars landing mission, discussing use of lifting vehicles 13 p2191 A66-25273

Aerodynamic lift and moment during unsteady flow of ideal incompressible fluid around lattice of thin bent profile 16 p2690 A66-31620

Prediction of drag due to lift of plane wings at subsonic speeds, based on correlation of wind tunnel measurements in terms of viscosity effect on lift curve slope 16 p2632 A66-31664

Minimum of maximum overload in braking of vehicle in atmosphere, examining aerodynamic lift on basis of Pontryagin maximum principle 22 p3986 A66-40465

**LIFT AUGMENTATION**

SA DOWNWASH

Flight experiments to assess stalling behavior and handling problems arising in design, maintenance and operation of suction wing for high lift [AIAA PAPER 65-750] 03 p0319 A66-12586

Boundary layer control for improvement of lift at lower angles of attack by carrier-based supersonic aircraft [AIAA PAPER 65-751] 03 p0321 A66-13055

Boundary layer control high lift system for high speed aircraft, using ejector for momentum augmentation and air bleed from propulsion system [AIAA PAPER 64-589] 05 p0610 A66-15070

V/STOL aircraft engine technology, discussing engine configuration, lift augmentation, thrust deflection, efficiency parameters, etc 06 p0943 A66-17023

Direct lift control as landing approach aid by providing more rapid means of changing and controlling flight path than conventional methods [AIAA PAPER 66-14] 08 p1167 A66-18985

Jet drag solutions for symmetrical struts of various shapes, thickness ratios and slot widths in quiescent and uniform streaming flow 12 p1800 A66-25005

**LIFT COEFFICIENT**

Theoretical and experimental analysis of structural, functional and design characteristics of air cushion vehicles at zero speed, examining lift coefficient, viscosity effect, static tests, etc 01 p0011 A66-10490

Advances attributable to XB-70 program including aerodynamic concepts, structural material, design, systems and equipment development [SAE PAPER 650798] 01 p0012 A66-10844

Lift coefficient in two-dimensional smoke wind tunnel noting symmetrical, cambered and leading double-edge slot wing section 03 p0317 A66-13216

STOL for high speed aircraft, discussing aerodynamic parameters, lift coefficient, increase methods, etc 09 p1327 A66-20245

Breguet 941 STOL aircraft design and performance, noting maximum lift coefficient and single-shaft power plant 10 p1483 A66-21716

Effects of nonlinearities in lift and pitching moment curves on longitudinal motion of aircraft, comparing approximate analytical method with computer calculations 13 p1995 A66-26285

Short takeoff and landing for high speed aircraft, discussing aerodynamic parameters of lift coefficient of flap system, lift-drag ratio and thrust 18 p3052 A66-33971

STOL flying possibilities and limitations, considering aircraft generating high lift by using fixed wing and airfoil features 23 p4016 A66-41774

Comparison of lifting characteristics of profile with air ejection onto slotted and unslotted flaps, examining dependence on jet impulse coefficient 23 p4010 A66-41795

First-and second-order theory for uniform shear flow past airfoil, obtaining expressions for pressure, lift and moment coefficients 23 p4011 A66-41879

**LIFT DEVICE**

SA HIGH LIFT DEVICE

Rolls-Royce RB 108 lift-jet engine design, characteristics and V/STOL research 05 p0745 A66-15298

Glide slope direct lift control of carrier landings, discussing trim change with actuation and longitudinal stability and control 07 p0986 A66-17272

Jet engine technology, including spinoff from lift jet, propulsion systems, cost estimates, etc 16 p2791 A66-31280

Inlet/door performance characteristics of VTOL lift-engines studied in full-scale wind tunnel tests [AIAA PAPER 66-655] 18 p3048 A66-34222

**LIFT DISTRIBUTION**

Circulation distribution for swept-back wing of finite span and large aspect ratio in subsonic flow by asymptotic method 07 p0981 A66-18033

Idealized ground effect wing, with tips close to ground, assumed to be semicircular lifting line in transverse plane, considering minimum induced drag 12 p1800 A66-25006

Electrical analogy for wing in unsteady supersonic flow, determining distribution of lifting power for various aspect ratios 13 p1990 A66-25405

**LIFT-DRAG RATIO**

Configuration synthesis and optimal utilization of supersonic favorable interference to obtain high lift-drag ratios [AIAA PAPER 65-752] 03 p0315 A66-12732

Lateral maneuver capability of high lift-drag ratio used to extend period of daylight landings from orbit 03 p0390 A66-12774

Maneuvered reentry of vehicle with aerodynamic lift into planet atmosphere, using motion equations and considering reentry trajectories as minor circles 03 p0432 A66-13129

Prediction technique for impulse required to supplement aerodynamic rotation of satellite orbit plane [AIAA PAPER 66-59] 06 p0956 A66-17085

Reference-point results applied to variations in laminar heat transfer to total vehicle over range of vehicle attitudes and associated trajectories [AIAA PAPER 66-28] 07 p0980 A66-17890

STOL for high speed aircraft, discussing aerodynamic parameters, lift coefficient, increase methods, etc 09 p1327 A66-20245

Slender profile of infinitely thin supersonic wing that provides minimum mean heat-transfer coefficient at given lift-drag ratio 09 p1328 A66-20754

Parametric investigations of supersonic long-haul aircraft, discussing operational profile, optimal lift-drag ratio, takeoff weight, civilian and military aircraft 10 p1482 A66-21371

Lift-drag ratio, specific impulse, aspect ratio and weight of payload and power plant considered for STOL aircraft 10 p1483 A66-21398

Boundary layer effect on lift and drag characteristics of hypersonic lifting bodies 10 p1480 A66-21409

Ground proximity effect on maximum lift-drag ratio for wing with uniform spanwise circulation, considering vortex model 11 p1636 A66-23253

Aerodynamic characteristics of rectangular plates in hypersonic flow of rarefied gas

differing in aspect ratio, thickness and angles of attack, determining maximum lift-drag ratio 12 p1798 A66-24442

Maximum lift/drag ratio wing for supersonic environment 13 p1991 A66-25634

Hypersonic lift-drag ratio and landing modes in manned entry vehicle design 15 p2605 A66-28742

L/D ratio for gliding recovery of first stage of launch vehicle, using stage separation conditions as parameters 16 p2807 A66-30348

Lift-to-drag ratio attainable by slender, homothetic body at hypersonic speeds, assuming Newtonian pressure distribution and constant skin-friction coefficient 17 p2838 A66-32348

Extremization of products of powers of functionals as applied to flat top wings for maximizing lift drag ratio in hypersonic flow 17 p2842 A66-33242

Lift, drag and static pitching measurements on lifting bodies at simulated hypersonic cold-wall conditions [AIAA PAPER 66-467] 18 p3046 A66-33651

Elastomeric ablative thermal shield material to meet system requirements for lifting reentry vehicles having lift-drag ratio of 0.5 to 1.5 18 p3240 A66-33801

Atmospheric reentry trajectory of space vehicle at orbital velocities and constant lift-drag ratio 18 p3244 A66-33879

Lift and drag of supercavitating isolated hydrofoil or hydrofoils in cascade, noting characteristics of flat plate and circular arc foils 18 p3100 A66-34642

Wall effect removal on supercavitating flow, estimating effects due to tunnel ducts and boundary layer blocking 18 p3101 A66-34643

Flow analysis of swept back blades in water tunnel, noting flow patterns, surface pressure distribution, lift-drag ratio, etc 18 p3049 A66-34649

Similarity laws for bodies maximizing lift-to-drag ratio at hypersonic speeds, considering longitudinal and transversal contours 19 p3276 A66-36245

Glide range with variable lift drag ratio expressed in power series of speed 20 p3492 A66-37428

Wind tunnel testing of delta-like lifting bodies at low, supersonic and hypersonic speeds, noting lift to drag ratios and off-design performance of caret wave-rider wings [ICAS PAPER 66-24] 23 p4007 A66-41011

Optimal redistribution of lifting surface between wing and stabilizer-elevator unit ensuring minimum reduction of lift-drag ratio 23 p4011 A66-41796

Optimization of lift-drag ratio of power law half-bodies in hypersonic viscous flows, considering interrelation between body shape and skin friction 23 p4012 A66-41915

**LIFT FAN**

Aircraft control power requirements provided by lift fan propulsion system for V/STOL flight, noting gas power transfer [SAE PAPER 650831] 01 p0130 A66-10830

Fan-wing combinations for three-dimensional flow solutions investigated to determine V/STOL aerodynamic characteristics [AIAA PAPER 65-85] 05 p0606 A66-15076

Tip turbine lift-fan system with single rotor for thrust augmentation of gas generator for advanced V/STOL aircraft [AIAA PAPER 65-708] 05 p0611 A66-15163

Lift fans for advanced V/STOL aircraft, describing performance improvement parameters 06 p0807 A66-17020

Fan-wing combinations for three-dimensional flow solutions investigated to determine V/STOL aerodynamic characteristics [AIAA PAPER 65-85] 14 p2274 A66-27415

Lift fan propulsion system using 62.5-inch lift fans flight tested in XV-5A aircraft from hover to subsonic flight regions [AIAA PAPER 66-739] 22 p3972 A66-40628

Balance bridging techniques using air supply lines for powered lift-fan model testing [AIAA PAPER 66-751] 22 p3893 A66-40637

**LIFT FORCE**

Lift force of airfoil section determined for sudden change in angle of attack, analyzing

randtl vortex positions 03 p0314 A66-12526  
 Formula for determining takeoff distance  
 of aircraft, taking into account lifting force,  
 air and motion resistance and transition to  
 larger angle of attack 11 p1637 A66-22849  
 Lifting systems and motion of slender  
 profile at arbitrary distance from liquid or  
 solid boundary, using kernel degeneration  
 method to reduce singular equation to  
 Fredholm equation 13 p2067 A66-26531  
 Stabilizing methods for hypersonic aircraft,  
 noting effect of aircraft characteristic  
 parameters on magnitude of balancing  
 coefficients of lifting 14 p2223 A66-27680  
 Lift engine technology, noting effect on  
 operational transport aircraft design, VTOL  
 capabilities, low speed control, 17 p2844 A66-32732  
 Unsteady state lift and moment action on  
 lattice of profiles moving in incompressible  
 fluid, determining suction originating at  
 leading edges of profiles 23 p4009 A66-41723  
 Single air flow acceleration and deviation  
 for propulsion and lift of high speed  
 aircraft, analyzing long-range flight paths  
 [ICAS PAPER 66-41] 23 p4122 A66-42070  
**LIFTING BODY**  
 Manned lifting body sizing, discussing  
 system requirements, constraints and  
 relationship to parametric vehicle design  
 data [AIAA PAPER 66-47] 06 p0958 A66-16259  
 Use of lifting upper stage to achieve large  
 offsets during ascent to orbit [AIAA PAPER 66-60] 06 p0960 A66-17108  
 Lifting body with controllable radial force,  
 examining acceleration and deceleration,  
 equation of motion, target hitting accuracy  
 improvement via force variation, 11 p1733 A66-23338  
 Optimum autopilot design for  
 maneuverable lifting 11 p1733 A66-23342  
 Dynamic programming method for  
 approximate solution of gliding flight and  
 minimum time to climb problems in  
 boundary value theory 11 p1778 A66-23349  
 Analogy between impulsive flow over  
 circular cylinders and flat plates, and  
 separated flow about lifting bodies moving  
 at high angles of attack in subsonic and  
 supersonic range [AIAA PAPER 65-395] 12 p1795 A66-23575  
 Meteorological environment considerations  
 in terminal flight region relating to all-  
 weather land recovery operations of lifting  
 reentry vehicles [AIAA PAPER 66-360] 12 p1907 A66-24492  
 Vertical profile of wind velocity  
 determined, using lifting sensors for  
 prelaunch rocket operations [AIAA PAPER 65-15] 12 p1883 A66-24698  
 Use of lift to increase payload of  
 unmanned Martian landing capsule,  
 discussing approach corridor and capsule  
 design 13 p2191 A66-25271  
 Equations for translatory motion of lifting  
 body moving at hypersonic speed,  
 considering Earth sphericity, noting effect  
 of centrifugal forces 13 p2193 A66-26448  
 Structural and heat shield designs for  
 lifting entry vehicles for orbital missions  
 analyzed for effects of wall thickness and  
 weight on vehicle size and total  
 weight 14 p2393 A66-28025  
 Oscillatory trajectories in atmospheric  
 entry of lifting vehicles at subcircular  
 speeds and constant angles of attack with  
 initial conditions deviating from equilibrium  
 glide 17 p3016 A66-33065  
 Lift, drag and static pitching  
 measurements on lifting bodies at simulated  
 hypersonic cold-wall conditions  
 [AIAA PAPER 66-467] 18 p3046 A66-33651  
 Similarity laws for bodies maximizing lift-  
 to-drag ratio at hypersonic speeds,  
 considering longitudinal and transversal  
 contours 19 p3276 A66-36245  
 Lifting wings in supersonic regime,  
 analyzing flow separation at leading edges  
 [ICAS PAPER 66-20] 22 p3847 A66-40670  
 Motion of solid body with rotating  
 flywheels rotating at constant velocities  
 relative to inertial space and  
 body 22 p3948 A66-40682  
 Use of lift to increase payload of  
 unmanned Martian landing capsule,

discussing approach corridor and capsule  
 design 23 p4132 A66-41113  
 Use of lifting upper stage to achieve large  
 offsets during ascent to orbit  
 [AIAA PAPER 66-60] 23 p4132 A66-41114  
 Optimization of lift-drag ratio of power law  
 half-bodies in hypersonic viscous flows,  
 considering interrelation between body  
 shape and skin friction 23 p4012 A66-41915  
**LIFTING REENTRY**  
 Controlled ballistic, steady lift and variable  
 lift reentry of winged  
 spacecraft 04 p0584 A66-13526  
 Comparison of adaptive and nonadaptive  
 control systems for lifting entry vehicles  
 [AIAA PAPER 66-48] 06 p0960 A66-17100  
 Rheolectric analogy using apparent mass  
 to obtain static and dynamic stability  
 derivatives for lifting-body reentry vehicles  
 [AIAA PAPER 66-58] 08 p1303 A66-18991  
 Manual guidance system for atmospheric  
 entry of lifting reentry  
 vehicles 10 p1554 A66-21930  
 Reentry scattering due to equilibrium  
 incidence without using Allen  
 hypothesis 16 p2796 A66-30315  
 Motion equations and Pontryagin maximum  
 principle applied to space vehicle reentry  
 trajectory optimization through independent  
 control of lift and drag 16 p2809 A66-30884  
 Viscous aerodynamic contributions to  
 forces and moments on front face of blunt  
 lifting reentry vehicle in producing  
 trajectory error [AIAA PAPER 66-464] 16 p2631 A66-31471  
 Lifting reentry test phases and effect of  
 pilot performance on miss distance in first  
 manned Gemini flight, discussing spacecraft  
 control 17 p3016 A66-32685  
 Trajectory control scheme effect on  
 performance of lifting entry vehicles  
 [AIAA PAPER 66-407] 17 p3016 A66-32746  
 Elastomeric ablative thermal shield  
 material to meet system requirements for  
 lifting reentry vehicles having lift-drag ratio  
 of 0.5 to 1.5 18 p3240 A66-33801  
**LIFTING ROTOR**  
 Stopped and slow rotor aircraft  
 configuration for fundamental limitations on  
 forward flight speed of compound  
 helicopters [SAE PAPER 650806] 01 p0012 A66-10847  
 Annular vortices method applied to  
 determine aerodynamic characteristics of  
 lifting propeller in axial and oblique  
 flows 23 p4010 A66-41785  
**LIFTING SURFACE**  
 Improved numerical procedure for  
 harmonically deforming lifting surfaces from  
 supersonic kernel function method  
 [AIAA PAPER 66-78] 08 p1163 A66-18995  
 Kernel function procedure for solving  
 oscillatory lifting surface problem at  
 subsonic speeds, using least squares  
 method 08 p1165 A66-19149  
 Subsonic aerodynamic loading on  
 harmonically oscillating nonplanar lifting  
 surfaces in kernel-function  
 formulation 21 p3694 A66-38733  
 Supersonic aerodynamic problem of wing-  
 body interaction and solution within lifting-  
 surface theory, using analog method  
 [ICAS PAPER 66-22] 23 p4008 A66-41254  
 Optimal redistribution of lifting surface  
 between wing and stabilizer-elevator unit  
 ensuring minimum reduction of lift-drag  
 ratio 23 p4011 A66-41796  
 Reverse flow and deformation optimization  
 theories applied to subsonic aeroelasticity of  
 lifting surface in harmonic oscillation, using  
 numerical integration and computer  
 programs 24 p4157 A66-42343  
**LIGHT**  
 SA AIRPORT LIGHT  
 SA COHERENT LIGHT  
 SA EXTRAGALACTIC LIGHT  
 SA GLARE  
 SA LAMP  
 SA LUMINESCENCE  
 SA MERCURY LIGHT  
 SA PHOTON  
 SA POLARIZED LIGHT  
 SA QUARTZ LIGHT  
 SA RUNWAY LIGHT  
 SA SUNLIGHT  
 SA ULTRAVIOLET LIGHT  
 SA XENON LIGHT  
 SA ZODIACAL LIGHT

Spatial structure for second harmonic  
 generated in anisotropic medium by finite-  
 aperture light beam 08 p1233 A66-18969  
 Role of light in chemical and biochemical  
 evolution noting photosynthetic reactions  
 depending on chlorophylls, pigment system,  
 etc 17 p2853 A66-32102  
**LIGHT, SPEED OF**  
 Wave attenuation with phase velocity  
 greater than speed of light in infinite  
 plasma layer between ideal metallic  
 plates 02 p0268 A66-11785  
 Second postulate of special theory of  
 relativity proved by existence of short  
 period Cepheids 05 p0759 A66-14888  
 Velocity of light determined from  
 photometric distance comparison, using  
 invar gauges 08 p1256 A66-19344  
 Lorentz-invariant Markov process in  
 relativistic phase space 12 p1914 A66-24406  
 Velocity of light determined from  
 photometric distance comparison, using  
 invar gauges 19 p3400 A66-36052  
 Feasibility of improved accuracy in light  
 velocity measurement in vacuum by using  
 superconducting parallelepiped  
 hyperfrequency cavity 19 p3360 A66-36253  
 Time contraction physically explained for  
 objects moving with velocities significant  
 with respect to velocity of  
 light 21 p3817 A66-39600  
 Augmented special relativity theory to  
 account for Einstein effects, with extension  
 to general scalar field theory and notes on  
 corpuscular light and galactic-centered  
 reference frame 23 p4090 A66-41273  
**LIGHT ABSORPTION**  
 Sedimentation rates of metallic particles in  
 cyclohexane medium measured by light  
 absorption 01 p0069 A66-10750  
 Pulsed laser-created plasmas by light  
 absorption by skin effect 03 p0403 A66-12975  
 Electric field effect on light absorption by  
 silicon throughout region of phonon-assisted  
 indirect transitions 03 p0412 A66-13150  
 Laser digital devices, examining quenching  
 of gain and optical  
 absorption 05 p0693 A66-14826  
 Light scattering in spherical nebula of  
 great optical thickness 05 p0765 A66-15417  
 Wooten method for measurement of true  
 light absorption in aerosols, making it  
 unnecessary to make separate light  
 scattering measurement 06 p0906 A66-17032  
 Comparison of properties of mode and  
 nonmode GaAs diodes, discussing emission  
 spectra oscillations and absorption  
 constant 07 p1042 A66-17334  
 Displacement of absorption band edge into  
 long wave region by phonon-caused  
 damping 07 p1105 A66-18372  
 Mechanism for indirect phototransition in  
 semiconductors near natural absorption edge  
 when interacting with current  
 carriers 07 p1105 A66-18373  
 Particle distribution and motion in field of  
 force, discussing density profile, energy  
 dissipation, Coulomb charge shielding for  
 local thermodynamic equilibrium and free  
 orbital motion 08 p1261 A66-18743  
 Light pulse absorption in gas and  
 measurement of temperatures attained  
 noting hydrodynamic, breakdown and  
 radiative transfer mechanisms and wave  
 velocities 08 p1319 A66-19276  
 Atmosphere of Mars as absorbing, ascribing  
 red color to selective absorption in  
 atmospheric layer 08 p1294 A66-19328  
 Change in photoconductivity and  
 photoelectromagnetic effect of gallium  
 arsenide single crystals caused by constant  
 illumination of spectral  
 compositions 09 p1412 A66-19997  
 Spin-magnetophonon interaction effect on  
 light absorption in  
 semiconductor 09 p1426 A66-20199  
 Accuracy in determination of light  
 absorption coefficient of semiconductors  
 with reflection coefficients of 0.2 to  
 0.5 09 p1431 A66-20943  
 Retention of semiconductor properties by  
 gallium arsenide after irradiation by fast-  
 neutron flux 10 p1589 A66-22167  
 Transmission factor of rectilinearly  
 polarized light as affected by plasma  
 oscillations in granular films of  
 gold 13 p2163 A66-25440  
 Photoabsorption power due to sodium

interband, using orthogonalized plane wave evaluation of matrix elements in oscillator strengths 14 p2365 A66-27753  
 Accuracy in determination of light absorption coefficient of semiconductors with reflection coefficients of 0.2 to 0.5 15 p2557 A66-28531  
 Light dispersion and absorption by impurity centers in solids calculated via two-particle Green function method, assuming weak electron-phonon interaction 15 p2559 A66-28632  
 Resonant absorption of monochromatic light in system with intermediate energy level 15 p2516 A66-29355  
 Electron vibration spectra of light absorption in molecular crystals, taking oscillation frequency changes as principal mechanism of exciton-phonon interaction 16 p2780 A66-31178  
 Light absorption coefficient for indirect photon transitions during Coulomb interaction of electrons at high electron densities 16 p2787 A66-31766  
 Electric field effect for free carrier absorption, determining coefficient for acoustic phonon 17 p2976 A66-32264  
 Diffuse reflection by planetary inhomogeneous atmosphere with albedo for single scattering decreases exponentially with optical depth 18 p3230 A66-34149  
 Light absorption by free current carriers role in kinetic equations of semiconductor laser/radiation system 18 p3119 A66-34691  
 Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 19 p3441 A66-35781  
 Resonant absorption of monochromatic light in system with intermediate energy level 20 p3604 A66-37359  
 Effective brightening of laser radiation propagating in strongly absorbing medium 22 p3930 A66-39770  
 Light absorption by optically pumped atoms undergoing magnetic resonance, noting modulation amplitudes and modulation frequency limitation for primary interaction 22 p3930 A66-39807  
 Optical pumping on He 4 atom in metastable level, examining modulation of light in absorption in longitudinal and transverse beams and obtaining magnetic resonance curves 22 p3930 A66-39808  
 Magnetic resonance in He 3 ground states examined through interaction with metastable atoms in gas discharge, observing transfer of transverse magnetization by collision 22 p3931 A66-39809  
 Photoabsorption cross section of atomic hydrogen by molecular hydrogen flow through discharge tube 23 p4098 A66-41245  
 Monograph on absorption, scattering and attenuation of light and IR radiation in atmosphere 23 p4087 A66-41272  
 Absorption coefficient of light in semiconductors in crossed electric and magnetic fields, examining conditions for Franz-Keldysh effect occurring in magnetic field 24 p4256 A66-42524

**LIGHT ADAPTATION**

**SA VISUAL ACCOMMODATION**

Human eye adaptation to dark and light, noting threshold dependence on previous history of illumination 04 p0461 A66-13790  
 Light effect on rhythmic excretion of water and electrolytes in humans 09 p1335 A66-20534

**LIGHT AIRCRAFT**

Flight characteristics and test program of CL-84 light tilt-wing V/STOL Army support vehicle 07 p0986 A66-17271  
 Supercharging turbojet engine for light aircraft compared to piston and turbojet engines 10 p1591 A66-21393  
 Lift-drag ratio, specific impulse, aspect ratio and weight of payload and power plant considered for STOL aircraft 10 p1483 A66-21398  
 Light aircraft lateral stability augmentation system for wing leveling, noting operation and pilot performance [SAE PAPER 660220] 13 p1996 A66-26397  
 Aeroelastic stability of light aircraft, examining appearance of structural nonlinearities in global vibration test for determining critical flutter speed 17 p3023 A66-32331

British Executive and General Aviation /BEAGLE/ and development of Beagle B.206 S twin-engine executive aircraft 22 p3847 A66-39686

**LIGHT AMPLIFIER**

**SA LASER**

High speed streak camera using electronic control circuits, light amplifier and time calibrator 02 p0230 A66-11816  
 Cathode ray tube measurements indicate that noise in cathodoluminescence is mainly caused by shot noise of primary beam 02 p0206 A66-12161  
 Light flow amplification in inhomogeneous layer taking nonlinearity into account 05 p0692 A66-14725  
 Waveguide coupling between adjacent parallel fibers as means of transferring radiation from one element to another 05 p0693 A66-14827  
 Spontaneous emission noise properties of pair of pulsed ruby laser amplifiers 10 p1542 A66-21310  
 Nonlinear amplification of light pulse passing through laser operating at saturation regime 10 p1543 A66-21963  
 Optical length variations in laser amplifiers determined during pumping and interferometry 13 p2092 A66-25999  
 Light frequency multipliers for nonlinear optical effects at various wavelengths, considering focusing, laser beam finite divergence, air breakdown, stimulated Raman emission, etc 13 p2096 A66-26146  
 Light pulse shape variation of laser with modulated Q-factor during nonlinear amplification 14 p2307 A66-27183  
 Coefficient of light amplification in gas discharge 15 p2515 A66-29203  
 Regenerative helium-neon laser with amplification coefficient of 1000 15 p2516 A66-29352  
 Coefficient of light amplification in gas discharge 17 p2935 A66-33052  
 Regenerative helium-neon laser with amplification coefficient of 1000 20 p3576 A66-37357  
 Laser amplifier theory using Fabry-Perot interferometer and Laplace transform for obtaining transient solutions in addition to steady state solutions 21 p3748 A66-39224  
 Nonlinear amplification of light pulse passing through laser operating at saturation regime 21 p3749 A66-39542  
 Spectral hole burning and cross relaxation effects on steady state gain saturation of laser amplifier with inhomogeneously broadened linewidth 22 p3931 A66-40098  
 Radiative power amplification of He-Ne laser with nearly confocal resonators 23 p4078 A66-41453  
 Linearly and circularly polarized fields in laser amplifier interaction with axial magnetic field, emphasizing combination tone production 23 p4079 A66-41624  
 IR GaAs laser amplifier with gains as high as 2000, output powers of 150 mw and saturation occurring with current increase at low light levels 24 p4223 A66-42562  
 Light pulse shape variation of laser with modulated Q-factor during nonlinear amplification 24 p4224 A66-42727

**LIGHT COMMUNICATION DEVICE**  
 Economical feasibility requirements for optical maser communications systems 02 p0189 A66-11301  
 Laser beam modulation methods assessed for making use of capability of laser for carrying multitude of signals simultaneously 02 p0191 A66-11692  
 Electrodeless excitation of discharge in helium-neon gas laser tube applied to voice transmission 05 p0696 A66-14924  
 Transmission of large number of instrumentation channels over parallel pulse-modulated light beams, using electro-optical mosaic sources and detectors 06 p0824 A66-15970  
 Laser communications link security against interception, examining frequency bandwidth for minimum SNR 06 p0891 A66-16650  
 Optimum threshold and associated error probability for detecting binary optical signals 06 p0833 A66-16663  
 Search via laser receivers for interstellar communications 06 p0892 A66-16669

Parameter dependence of intermediate frequency voltage indicated during establishment of optimum conditions for optical receivers and merit of subcarrier mixing 12 p1832 A66-23980  
 Optical communication for Mars exploration with outline of laser modulators and antennas 13 p2021 A66-25251  
 Optical guides stressing lens type beam waveguide 13 p2022 A66-25538  
 Solar noise in optical communications, background radiation dependence on detector aperture, noise power and application to GaAs diodes and gas lasers 13 p2024 A66-25833  
 FM laser and optical heterodynes in optical communication systems 13 p2093 A66-28004  
 Multiple scattering effects on propagation of coherent optical signals studied for laser communications application 15 p2448 A66-28580  
 Communication systems at microwave and optical frequencies for future Mars missions 18 p3067 A66-33793  
 System design analysis of laser methods of deep space communication, examining local heterodyne system /LHS/, direct detection system /DDS/ and transmitted reference system 19 p3300 A66-35666  
 Book on laser receivers covering noise performance, atmospheric effects, detection techniques, hardware and systems available, optical communication in visible and IR spectrum, etc 19 p3375 A66-36060  
 Optical communication systems, discussing available equipment, transmission characteristic, lack of long distance operation reliability, etc 24 p4174 A66-42805

**LIGHT ELEMENT**  
 Collisional excitation in Van de Graaff accelerator of beams of light elements producing light emission in 2700-6600 angstrom range 21 p3776 A66-39396

**LIGHT EMISSION**  
 Second harmonic light generation, stressing saturation effects occurring at high laser power levels, solving nonlinear coupled Maxwell equations 02 p0239 A66-11443  
 Emission factor of radiating inhomogeneous layer determined by Abel integral equation from intensity profile, using analog computer 03 p0398 A66-12524  
 Lasing in p-type GaAs in which population inversion is brought about by avalanche breakdown of high resistivity region in material 03 p0378 A66-13008  
 Beat signal dependence on angular spread of oscillations in light waves heterodyning with incoherent light source 06 p0889 A66-15898  
 Stimulated emission in indium arsenide shows excitation threshold low and light emission highly directional 06 p0893 A66-17026  
 Light emission and photovoltaic effect of GaP diodes near bandgap 07 p1004 A66-17319  
 Anisotropy of balanced photoelectromagnetic emf in p-type germanium sample in which normal to illuminated surface coincides with crystallographic axis 09 p1413 A66-20002  
 Light emission associated with growth defects from reverse biased gallium phosphide p-n junctions 10 p1577 A66-21556  
 Forced emission from electron-excited cadmium selenide 10 p1544 A66-22174  
 Photoelectric observations and orbital solutions of BV 342, obtaining light element and light curve data 11 p1769 A66-22534  
 Laboratory duplication of processes exciting airglow, noting green line of oxygen atoms 11 p1699 A66-23116  
 X-ray produced auroral light emission in air and excitation of second positive and first negative bands in nitrogen 11 p1765 A66-23152  
 Film scanning system using GaAs light-emitting diode and phototransistor light detector 11 p1709 A66-23476  
 InAs laser emission, discussing radiative transitions, coherent emission from InAs diodes, recombination mechanisms in IR radiation spectra, etc 13 p2089 A66-25065  
 Copper diffused gallium arsenide p-n junctions, explaining current-voltage characteristics, light emission and capacitance of diodes at 300 and 77 degrees K 13 p2161 A66-25186

- Laser action in gallium antimonide diodes, examining emitted light spectrum vs injected current, temperature effect, radiative efficiency, etc 13 p2100 A66-26184
- Correlations and intensity fluctuations in light from individual lasing and nonlasing modes of CW GaAs laser and threshold noise change in laser emission 13 p2102 A66-26210
- Absolute flux measurement for pulsed and triggered lasers requiring only quantum receivers 13 p2104 A66-26375
- Gamma photon flux from solar Na 22 disintegration emitted by Sun after chromospheric eruption 13 p2176 A66-26760
- Light output of alpha particles in crystalline and vapor anthracene as function of pressure and temperature 14 p2296 A66-27796
- Short-lived oscillation in light emitted in active aurora 14 p2286 A66-27985
- Coupling efficiency evaluation in light emitting diodes 15 p2514 A66-29032
- Liquid hydrazine decomposition process to determine what chemical or physical changes may be occurring that cause breaks in burning rate/pressure curves, measuring flame temperature and light emission 15 p2570 A66-29610

- Modulation of laser light with composite Fabry-Perot resonator, using more than three multiple reflecting plates 05 p0698 A66-15836
- Light modulation at microwave frequencies noting single-sideband suppressed-carrier modulation, traveling wave modulation, etc 07 p1003 A66-18328
- Coherent excitation of mercury resonance state by irradiation with light modulated at Larmor frequency 08 p1233 A66-19089
- Gadolinium molybdenate as ferroelectric host in pulsed laser, noting light modulation and crystal domain 11 p1713 A66-23207
- Light beam deflection due to linear temperature gradients across electro-optic modulator crystals 11 p1737 A66-23431
- Balanced mixer for heterodyning light of two different frequencies from independent sources to obtain intermediate frequency in microwave region 12 p1890 A66-24143
- Transverse wave FM phototube system for detection of microwave-frequency modulated

light, noting design, operation and application 12 p1838 A66-24558  
 Neodymium doped YAG crystal and lithium meta niobate as CW laser materials and potassium tantalum niobate as optical modulator material 13 p2164 A66-25518  
 Intensity modulation of light using acoustic standing waves in megacycle range and requiring no high voltages 13 p2091 A66-25540  
 IR and visible helium-neon laser modulation using Faraday rotation in YIG 14 p2305 A66-26881  
 Retardation produced by 45 degree y-cut low voltage light-amplitude modulator and effect of wave-normal ordinary and extraordinary ray directions 14 p2334 A66-27588  
 Optimum processing of photocell output to produce Poisson photoelectron flux 14 p2242 A66-28156  
 Detection of very low levels of modulation on laser beam to determine performance of microwave light modulators 15 p2518 A66-29682  
 Demodulation method in which phase modulation of laser beam is converted to amplitude modulation by autocorrelation 16 p2717 A66-30616  
 Helium-neon laser modulation by positive and negative voltage pulses 16 p2720 A66-31559  
 Retardation-type laser modulators, examining driving power, transmission and dynamic range 17 p2935 A66-32820  
 Laser light modulation by Pockels or Kerr effect for application to telecommunications system, examining electrical birefringence modulation 19 p3304 A66-36262  
 Low-distortion modulation of IR and submillimeter waves, using free-carrier absorption in pair of crossed reverse-biased junction diodes 20 p3528 A66-37452  
 Traveling-wave phase modulation of coherent light propagating in anisotropic medium 22 p3933 A66-40867  
 10.6 micron output of carbon dioxide-He laser modulated, using Bragg diffraction from longitudinal acoustic waves in Te 24 p4219 A66-42251  
 GaAs crystal as electro-optic modulator at 10.6 microns due to small carrier absorption, freedom from interband transitions and high resistivity 24 p4222 A66-42553  
 Electro-optic light modulation using Pockel and Kerr effects in crystals for communications applications, using lasers 24 p4225 A66-42811  
 Carbon disulfide traveling wave Kerr cells with identical microwave and dielectric constants, noting light modulator construction at microwave frequencies 24 p4185 A66-42814  
 Horizontal deflection in TV display produced by Bragg reflection of laser light by ultrasonic waves in water 24 p4212 A66-42816

**LIGHT PRESSURE**

Absolute energy and power measurements from electromagnetic pressure in optical wavelength range 08 p1256 A66-19285  
 Dust particles in laser cavity observed for angular stabilization and constant velocities 13 p2105 A66-26594  
 Momentum transfer caused by focusing laser giant pulse on surface in vacuum investigated for Be, C, Al, Zn, Ag and W 19 p3373 A66-35418

**LIGHT PROBE**

Potential distribution in epitaxial p-n semiconductor measured via moving light spot, determining deposition depth 07 p1106 A66-18382  
 Photoelectric observations and orbital solutions of BV 267, obtaining new light elements, system light change and orbital solutions 11 p1769 A66-22533  
 Amplitude and phase of complex Kerr magneto-optic coefficients measured, describing technique and results 17 p2958 A66-32623  
 Self-focusing and self-trapping of intense light beams in nonlinear medium examined, using approximations of geometrical optics and accounting for diffraction effects 20 p3602 A66-37372

**LIGHT SCATTERING**

**SA ATMOSPHERIC SCATTERING**

Interference effects at thin transparent cylindrical glass fibers exposed to coherent light from He-Ne laser 01 p0081 A66-10368  
 Surface roughness of metallic powder particles determined by light scattering, considering iron particles 01 p0069 A66-10747  
 Effect of incomplete and inaccurate optical information on particle size distribution function, considering transparency and scattering pattern 01 p0097 A66-10758  
 Pore formation in decomposition of solid solutions of bivalent impurities in sodium chloride crystals by studying light scattering in these crystals 01 p0125 A66-10777  
 Two-dimensional laser deflection using Fourier optics 01 p0083 A66-10897  
 Use of Brillouin scattering for optical beam modification, spatial distribution of acoustic energy and coherent sound of great intensity 03 p0376 A66-12421  
 Angular distribution of diffusely reflected light flux as function of scattering indicatrix, survival probability of light quantum and conditions of medium illumination 04 p0541 A66-13415  
 Free photon path distribution during passage through thick plane-parallel light scattering layer 04 p0541 A66-13416  
 Plasma electron concentration, using nonlinear light scattering on geometrical optical path 04 p0554 A66-14295  
 Angular width and intensity of light from two lasers that cause plasma to oscillate and in turn are scattered by induced fluctuations 04 p0533 A66-14328  
 Light scattering theory and generation of second harmonic in plasma in external magnetic field 04 p0555 A66-14333  
 Local electron temperature and electron density in theta pinch measured by means of scattering of laser beam 04 p0555 A66-14334  
 Thomson scattering measurements of magnetic annular shock tube plasmas using Q-switched ruby laser light beam 05 p0680 A66-14707  
 Optical properties of light scattering layer with negative absorption coefficient, discussing layer reflection and transmission 05 p0715 A66-14726  
 Nonlinear Maxwell equation for optics of many-particle system, noting Raman scattering from electron plasma 05 p0695 A66-14905  
 Light beams used as plasma probes, considering scattering effect of refraction 05 p0726 A66-15248  
 Solutions for integral equation associated with equation of radiative transfer for isotropic scattering and complete redistribution in frequency cases 05 p0762 A66-15276  
 Formulas for light passage through planetary atmospheres of finite optical thickness, taking into account polarization 05 p0765 A66-15415  
 Structural changes in radiation field following quantum reemission after photoexcitation of atom when true absorption is low 05 p0765 A66-15416  
 Light scattering in spherical nebula of great optical thickness 05 p0765 A66-15417  
 Photometric measurements of twilight brightness for upper atmospheric temperature determination 05 p0674 A66-15528  
 Variation of scattering cross section with beam intensity for ruby laser light on atomic hydrogen 05 p0698 A66-15864  
 Radiation absorption and scattering by small spherical solid carbon particles in wavelength range 0.2 to 40 mu calculated by classical Mie theory 06 p0911 A66-16261  
 Granularity and radial structure in circular Fraunhofer diffraction fringes produced by lycopodium powder scattering of monochromatic coherent light 06 p0891 A66-16443  
 Laser-beam scattering by individually introduced charged polystyrene spherical particles and droplets of naphthalene and water in combination 07 p1043 A66-17473  
 Diffusive reflection of light from and passage through optically thick atmosphere with nonspherical indicatrix 07 p1080 A66-17921  
 Angular dependence of radiation intensity

scattered from plane diffuse surface illuminated by wideband collimated light 07 p1081 A66-18039  
 Diffraction velocimeter detecting and measuring transverse movement of surface by sensing light backscattered by it when laser illuminated 07 p1044 A66-18333  
 Brillouin scattering of light by phonons and phonon maser in derivation of conservation theorems from basic equations 07 p1045 A66-18397  
 Apparatus for fluoridation of hydroxyl and oxygen contaminated fluoride compounds, obtaining optically clear crystals with no Tyndall scattering for laser application 07 p1047 A66-18488  
 Numerical Neumann solution to scalar equation of transfer in homogeneous layer of optical thickness 08 p1255 A66-18780  
 Nonharmonic effect on dispersion of light by impurity centers of solid body 08 p1273 A66-19256  
 Atmospheric attenuation of light with average turbulence conditions 08 p1248 A66-19319  
 Mars atmospheric optical thickness and scattering from photometric observation 08 p1294 A66-19327  
 Difference between values for atmospheric pressure at Martian surface when obtained by photometry or by spectroscopy, due to nonconsideration of light scattering by aerosol particles 08 p1295 A66-19331  
 Optical turbulence simulation with small transparent solid bodies immersed in index-matching liquids 08 p1186 A66-19702  
 Atmospheric optics noting attenuation, reflectance, flux and optical radiation 09 p1398 A66-20274  
 Lower atmospheric density measurements through light scattering from Q-spoiled ruby laser beam, using optical radar detector 09 p1373 A66-20398  
 H-alpha double limb observed in spectroheliograms is instrumental and not solar phenomenon 09 p1455 A66-20404  
 Mie scattering and absorption cross sections for spherical absorbing particles as function of complex refractive index 09 p1405 A66-20512  
 Spectral distribution of light scattered by density fluctuations in dense monatomic one-component fluid 09 p1404 A66-20960  
 UV color and flux at 2200 and 2600 angstroms measured for A and B stars, using rocketborne photometers 10 p1602 A66-21096  
 Dynamical and light scattering properties of small dust grains orbiting Earth 10 p1529 A66-21154  
 Quantum theory of interaction of electromagnetic waves in plasma considered in terms of light-light scattering and plasma-laser beam interaction 10 p1558 A66-21173  
 Comparison of microwave scaling method and optical simulation technique for obtaining radar cross sections 10 p1502 A66-21630  
 Diffusion of light by plasma electrons produced in laboratory for very small effective diffusion area 10 p1566 A66-21712  
 Internal diffuse radiation field computed in finite homogeneous isotropically scattering slab illuminated by parallel rays of radiation 10 p1556 A66-21923  
 Soviet and foreign papers on plasma diagnostics by scattering of laser beams at plasma electrons 10 p1569 A66-21990  
 Mutual conversion of direct and inverse problems of light scattering by soft-particle system, noting transparency data determining particle spectrum 10 p1553 A66-22029  
 Pore formation in decomposition of solid solutions of bivalent impurities in sodium chloride crystals by studying light scattering in these crystals 11 p1749 A66-22289  
 Elongation of characteristic curve of polarization for interstellar particles due to surface molecular scattering 11 p1769 A66-22535  
 Atmospheric aerosol size distribution from scattered light measurements by rocketborne equipment 11 p1697 A66-22565  
 Illuminance of Earth shadow at three wavelengths by numerical integration, accounting for light attenuation, ozone absorption and extinction, Rayleigh

scattering and refractive beam divergence 11 p1770 A66-22570

Optical diffraction velocimeter, using backscattered laser light to measure relative velocity between light source and surface 11 p1706 A66-22958

Transverse motion modification of longitudinal frequency spectrum resonances of light scattered from plasma 11 p1745 A66-22973

Laser scattering by bound charged particles 11 p1713 A66-23080

Propagation of narrow beam of light in turbid medium with strongly extended scattering 12 p1913 A66-23777

Diffusive reflection of light from and passage through optically thick atmosphere with nonspherical indicatrix 12 p1913 A66-23882

Radiation field in plane-parallel semiinfinite medium illuminated by high-directivity beam bounded from above by mirror surface whose reflection is calculated for various scattering indicatrices 12 p1914 A66-24245

Brillouin scattering by gases as experimental test of kinetic theory away from hydrodynamic regime 12 p1917 A66-24585

Dual-and multiple-beam interferometry by wave front reconstruction from surfaces of standard engineering components, applicable to structural dilatation problems 12 p1884 A66-24967

Light diffusion of Martian atmosphere measured by spectroscopic evaluation of polarization variation from disk center to edge 13 p2181 A66-25461

Physics of quantum electronics - Conference, San Juan, Puerto Rico, June 1965 13 p2093 A66-26141

Nonlinear light scattering in pressurized methane, noting displacement of spectral line from laser frequency 13 p2132 A66-26148

Extension of three-field mixing theory to include effects of convective nonlinearities on excitation in plasma, using correlation function of spectral densities for interpretation of thermally enhanced light-by-light scattering 13 p2132 A66-26151

Nonlinear optical effects in plasma, optical mixing of three light beams and scattering of light-by-light, noting dominant Raman scattering 13 p2132 A66-26152

Cross section for inelastic scattering of electromagnetic radiation by electron density fluctuations in anisotropic solids, using laser sources, investigating Landau and collision damping of plasmons 13 p2132 A66-26153

Light coupling with phonons, magnons and plasmons, deriving wave equations and coupling constants, observing Raman effect in spin systems and in plasmas, noting second harmonic generation 13 p2132 A66-26154

Stimulated Brillouin scattering in quartz analyzed, noting amplification, Stokes wave generation and ruby gain 13 p2097 A66-26165

Velocity and lifetime of microwave thermal phonons in liquids and solids determined by spectrum of light scattering from laser illuminated sample 13 p2133 A66-26166

He-Ne laser homodyne spectrometer observation of broadening of spectral profile of light scattered from carbon dioxide near critical temperature and density due to density fluctuations 13 p2133 A66-26168

Laser radiation coherence property deterioration and molecular scattering during propagation through turbulent atmosphere 14 p2236 A66-27131

Angular divergence effect of light beam on illuminance of turbid scattering medium 14 p2326 A66-27542

Photometric determination of extinction coefficient for optical scattering in turbid medium 14 p2326 A66-27544

Effect of incomplete and inaccurate optical information on particle size distribution function, considering transparency and scattering pattern 14 p2326 A66-27857

Multiple scattering effects on propagation of coherent optical signals studied for laser communications application 15 p2448 A66-28580

Optical beam scattering of gas laser for measurement of photoelastic constants and

application to lithium niobate 15 p2512 A66-28692

CAT detection from Doppler shift in laser light backscattered from atmospheric aerosol 15 p2500 A66-28930

Light diffraction by random fluctuation of refractive index of plasma 15 p2552 A66-29330

Two-quanta absorption and scattering loss in powerful laser 15 p2516 A66-29350

Statistical analysis of light fields created by superposition of laser light and chaotic light 15 p2519 A66-29815

Homogeneous nucleation of water vapor determined by laser beam scattering from cloud 16 p2716 A66-30121

Scattering of light from pulsed ruby laser by plasma jet, noting cross section, electron-phonon interaction, etc 16 p2716 A66-30139

Cooperative interactions between ions and electrons in forward scattering of ruby laser beam from plasma 16 p2716 A66-30153

Scattered light spectrum of thermal sound waves used to provide velocity and absorption data about hypersonic waves in several liquids 16 p2745 A66-30300

Mutual conversion of direct and inverse problems of light scattering by soft-particle system, noting transparency data determining particle spectrum 16 p2747 A66-30848

Recording of light-induced light scattering using laser beam, calculating cross section of photon-photon scattering 16 p2748 A66-31175

Reflection and refraction of light waves at boundary of nonlinear dielectric 16 p2655 A66-31556

Granularity characteristics of scattered light from helium-neon laser directed onto moving surface 16 p2720 A66-31725

Color and light intensity gradient of residual light scattered and refracted into umbra of Earth shadow measured during lunar eclipse 17 p2999 A66-32068

Nonlinear scattering of ruby laser beam by plasma at second and third harmonic 17 p2967 A66-32433

Earth surfaces reflecting and polarizing properties in aerial reconnaissance 17 p2918 A66-32611

Upper atmospheric light scattering of vertically fired ruby-laser pulse 17 p2922 A66-33348

Electron temperature and concentration in DC plasma arc determined from Thomson scattering of laser radiation 18 p3118 A66-33840

Minimization technique for light scatter due to diffuse mirrored birefringent coatings used in performing photoelastic studies by fringe multiplication 18 p3257 A66-34563

Soviet and foreign papers on plasma diagnostics by scattering of laser beams at plasma electrons 18 p3150 A66-34967

CW He-Ne laser measurement of light scattering in crystals noting laser output, performance and crystal imperfections 19 p3373 A66-35402

Plasma diagnostics by Thomson scattering of laser beam, investigating difficulties from particle scattering, absorption, etc 19 p3405 A66-35412

Cooperative scattering of laser light by thiatron plasma 19 p3373 A66-35489

Directional distribution of light reflected from roughened surfaces with measurements made of plane-polarized components of reflected light as well as of mixed radiation 20 p3598 A66-36941

Ultrasonic light diffraction, deriving line intensity in form of quadratures with parametric dependence 20 p3601 A66-37147

Two-quanta absorption and scattering loss in powerful laser 20 p3576 A66-37355

Continuous wave gas laser as light source in scattered light static photoelasticity 20 p3577 A66-37443

Light scattering influence on effective value of extinction coefficient considered as function of optical parameters of medium and of angular characteristics of source and receiver 21 p3760 A66-39361

Particle spectrum determination by inversion of scattering data for high concentrations of sol 21 p3760 A66-39364

Ground state resonance, noting absence of

Doppler broadening of signals in forward scattered light 22 p3931 A66-39810

Light reflection from shock waves clarified through propagation in shock tubes, using gas laser 22 p3898 A66-40012

Screening effect of meteoritic particles, ice grains and ice-coated dust particles entrained in outgoing gases of comets, determining particle size and numbers from momentum/energy balance 22 p3983 A66-40697

Daytime sky brightness relationship to atmospheric anisotropic light scattering 22 p3917 A66-40960

Monograph on absorption, scattering and attenuation of light and IR radiation in atmosphere 23 p4087 A66-41272

Crystal defects and performance in ruby laser, measuring coherence function of light and output energy and crystal homogeneity 23 p4077 A66-41291

Invariant imbedding and scattering of light in one-dimensional medium with moving boundary, noting relaxation of photon emission and Doppler frequency shift 23 p4087 A66-41540

Complete Rayleigh scattered field within homogeneous plane parallel atmosphere, noting scalar transfer equation extension 23 p4065 A66-41813

Visibility and small ion density correlated by comparing light scattering with ion attachment processes on airborne scatters 23 p4065 A66-41842

Ruby laser light scattering measurements of electron and ion temperatures of hydrogen and deuterium plasmas produced in theta pinch devices 24 p4222 A66-42558

Configurations for realization of multiple laser light scattering using microwave acoustic waves and two Porro prisms 24 p4224 A66-42636

Optical heterodyne receiver antenna properties, noting effective aperture of capture cross section vs directional tolerance and detection of doppler shifts in liquid scattered coherent light 24 p4174 A66-42809

Nonlinear optics emphasizing parametric oscillation, self-focusing and trapping of laser beams and stimulated Raman, Rayleigh and Brillouin scattering, using Maxwell equations and electric dipole approximation 24 p4225 A66-42810

Acousto-optical deflection and modulation devices, considering specific geometries and scattering-efficiency-bandwidth products 24 p4174 A66-42812

**LIGHT SOURCE**

Super-radiance source of improved spectral composition with integral radiation directing means especially suitable for use in solar simulators 02 p0214 A66-11234

Photochemical studies of oxygen-ozone and carbon dioxide equilibria with bromine UV lamp 04 p0473 A66-13397

Silicon avalanche light sources for photographic data recording 05 p0677 A66-14831

Triangular resonator for coherent light sources, considering natural oscillations and energy withdrawal 06 p0893 A66-16883

Advantages of gas lasers as light sources in aerodynamic research 06 p0893 A66-16944

Interferometers 06 p0893 A66-16944

Conventional flow visualization using laser light source [AIAA PAPER 66-127] 06 p0870 A66-17104

Electro-optical system measuring spectral response of photosensitive material or device and output under arbitrary light spectrum as in silicon solar cell 07 p0997 A66-18485

Light source having absolute spectral energy distribution for standardizing star tracker calibration 08 p1252 A66-19501

Laser application to streak photography methods of time resolved flow visualization for transient flows 10 p1536 A66-21752

Reflector-light source requirements for homogeneous format illumination in night aerial photography 13 p2081 A66-26005

Photoelectron counts of photomultiplier illuminated by gas laser light source 13 p2102 A66-26211

Phase locking of one laser to another by direct injection of first laser beam into second laser cavity 13 p2105 A66-26593

Monograph on lasers including gas lasers, ruby lasers, giant-pulse techniques, oscillation modes, etc 14 p2305 A66-26961  
 Lateral shearing interferometer with gas-laser light source for testing large optical systems 14 p2307 A66-27320  
 Well shielded ceramic capillary spark source, thermocouple radiation detector and silicon p-n junction diode testing 14 p2293 A66-27329  
 Laboratory simulation of solar radiation under varying atmospheric conditions 14 p2327 A66-28135  
 Hologram reconstruction obtained by illuminating hologram plate with common two-cell flashlight 15 p2502 A66-29033  
 Near-Bose-Einstein probability distribution of photoelectron counts produced by He-Ne gas laser narrow band Gaussian light source operating slightly below oscillation threshold 16 p2717 A66-30645  
 High voltage pulsed electrodeless discharge in rare gas as light source for ruby and Nd glass laser excitation and observation of output characteristics 16 p2720 A66-31448  
 Coherent gas laser light to meet requirements of streak photography for time-resolved flow visualization 17 p2935 A66-32959  
 Small-order vibration displacements measurement by Michelson interferometer, using CW laser source 17 p2926 A66-33037  
 High temperature light source with substantially continuous spectral emission for UV absorption spectroscopy approximating black body in visible and near UV region 19 p3353 A66-35314  
 Partially coherent light, noting distinction between narrow-band coherent and incoherent sources 20 p3575 A66-36935  
 Continuous wave gas laser as light source in scattered light static photoelasticity 20 p3577 A66-37443  
 Spectral distribution of light emission of exploding wire systems measured by high-speed drum camera and rotating shutter 20 p3603 A66-37742  
 Schlieren photographs of plasma discharges in parallel plate rail tube, using pulsed ruby laser as light source 23 p4104 A66-41510  
 Theta pinch discharge as spectroscopic light source in highly ionized gas spectroscopy 24 p4241 A66-42393

**LIGHT TRANSMISSION**

SA DIFFRACTION  
 SA FIBER OPTICS  
 SA ILLUMINATION  
 SA OPTICAL COUPLING  
 SA VISIBILITY

Propagation of light in universe with inhomogeneously distributed matter, considering presence of component uniformly spread in space /Intergalactic gas/ 01 p0135 A66-10281  
 Total reflection technique to achieve effective high absolute photocathode sensitivity 01 p0078 A66-10857  
 Parametric fluctuations of spatially restricted light beam in turbulent atmosphere 02 p0191 A66-11838  
 Optical scintillation frequency noting propagation of electromagnetic and acoustic waves in turbulent atmosphere 02 p0262 A66-12207  
 Multiple light filter narrowing emission bands of ruby laser with multiplex resonator 03 p0378 A66-12627  
 Propagation of optical waves through atmosphere, considering attenuation of optical waves and noise generation 04 p0545 A66-13756  
 Measurement of elasto-optic performance of solids in Bragg diffraction devices 04 p0531 A66-13958  
 Deflection of light rays by gravitational lenses 05 p0757 A66-14526  
 Semiconductor application to coherent optical transducers and spatial filters 05 p0647 A66-14822  
 Molecular anisotropy of propagation of intense light beam, noting Raman and Brillouin effects 05 p0696 A66-15106  
 Light waveguide for general lens-like media, ideal lenses and continuous media with square-law index variation 05 p0634 A66-15178  
 Statistics of beam waveguide light-ray propagation extended to include correlations

between displacements of different lenses 05 p0634 A66-15179  
 Oscillation growth of ray about wavy axis of lens light guide noting spectrum of waves, mechanical stiffness of guide and ray amplitude 05 p0634 A66-15181  
 Transmission through tapered quartz tube in laser near field 05 p0697 A66-15481  
 Second harmonic light generated on reflection of giant-pulse laser beam from surface of silver mirror 06 p0921 A66-16072  
 Design of intentional bends of beam waveguide, giving relations between waveguide parameters and radius of curvature of guide axis 06 p0846 A66-16093  
 Phase perturbation of optical beams due to atmospheric turbulence, using modulated interferometer to produce Doppler beats between two coherent beams 06 p0909 A66-16434  
 Photon trapped wave effect for developing optical waveguides in which optical beam creates waveguide as it propagates 06 p0892 A66-16662  
 Amplitude and phase fluctuations of plane monochromatic light wave propagating in turbulent medium 06 p0910 A66-16777  
 Velocity of light determined from photometric distance comparison, using invar gauges 08 p1256 A66-19344  
 Average transfer function from statistics of wave-front distortions in light propagating through atmosphere 08 p1256 A66-19705  
 Low loss transmission medium for optical frequencies consisting of thin wall dielectric tube separating internal high density gas from external low density gas 08 p1235 A66-19839  
 Optical radiation absorption and attenuation by atmosphere polluted with carbon dust, including transmission coefficient calculation 09 p1402 A66-20313  
 Transmission of IR radiation from flames through various carbon dioxide pathlengths 09 p1471 A66-20509  
 Statistical analysis of light beam propagation in weakly deformed circular mirror tube 09 p1347 A66-20776  
 Mechanical interpretation of problem of passage of light through curved light conductor 09 p1387 A66-20790  
 Irregularities of iris type beam waveguide, noting transmission loss during principal lightwave propagation 11 p1712 A66-22736  
 Cosmological effects in anisotropic inhomogeneous cosmological models including Riemannian geometry, light propagation, gravitational field, etc 11 p1772 A66-22778  
 Weakly focusing transparent media properties and guided transmission of coherent light beams with relatively small loss 11 p1657 A66-23091  
 Irregular bends and lens displacements effect on wavelength and modes in laser waveguide 11 p1713 A66-23103  
 Directional fluctuations in light waves propagating from edge of solar disk caused by atmospheric turbulence 12 p1913 A66-23775  
 Transverse beam width and phase constant of nonsquare law media for light propagation in imperfect lenslike media requiring repeater 13 p2127 A66-25539  
 Random variations in beam waveguide components and effects on light propagation 13 p2024 A66-25939  
 Intense light pulse propagation in optical media, noting polarized nature of transient oscillations, phase and amplitude distortion and two-level composition of medium 13 p2098 A66-26171  
 Light reflection from dielectric films of continuously varying refractive index 14 p2356 A66-26966  
 Atmospheric turbulence effects on laser beam propagation, noting beam cross section, phase variation, AM and FM, etc 14 p2235 A66-27035  
 Transmission spectra, electroluminescence-brightness variations with applied frequency and voltage and physical properties of ZnS thin films 14 p2361 A66-27315  
 Quantitative assessment of deterioration that light beam undergoes on passing through turbulent

atmosphere 15 p2448 A66-28579  
 High amplitude LF current and optical transmission oscillations in CdS single crystals under high electric field and monochromatic illumination near fundamental absorption 15 p2558 A66-28613  
 edge 15 p2558 A66-28613  
 Light transmission through optical diffraction lattice consisting of medium in EM field of laser beam 15 p2511 A66-28626  
 Statistical analysis of ray oscillation suppression in light waveguide, using Liouville theorem 16 p2746 A66-30596  
 Light propagation through Schwarzschild singular sphere, solving problem of visual image of emitting surface of gravitating sphere as seen by observer 16 p2748 A66-31171  
 Misinterpretation of theories of light, noting no clear-cut and simple distinction or opposition between theories of Newton and Huygens 16 p2749 A66-31722  
 Linear instability of laser propagation in fluid with coupling between light and medium 18 p3120 A66-35034  
 Light deflection by solar activity 19 p3455 A66-35249  
 Amplitude and phase fluctuations of plane monochromatic light wave propagating in turbulent medium 19 p3399 A66-35374  
 Design principles of waveguide systems applicable to electromagnetic wave transmission by reflection and refraction 19 p3319 A66-36033  
 Velocity of light determined from photometric distance comparison, using invar gauges 19 p3400 A66-36052  
 Trajectories of light rays through medium subjected to acoustic waves examined knowing that acoustic waves in laser medium function as optical waveguide 20 p3580 A66-38238  
 Normal incidence reflectivity and transmissivity coefficient measurements in Ge thin epitaxial films 20 p3623 A66-38397  
 Self-induced divergence of continuous wave He-Ne laser beams when traversing transparent liquid, noting nonlinear effect in propagation of light 21 p3748 A66-39164  
 Statistical analysis of light beam propagation in weakly deformed circular mirror tube 22 p3947 A66-39835  
 Mechanical interpretation of problem of passage of light through curved light conductor 22 p3931 A66-39849  
 Irregularities of iris type beam waveguide, noting transmission loss during principal lightwave propagation 23 p4078 A66-41474  
 Split angle, total internal reflection and Wollaston prism-digital light deflection techniques 24 p4174 A66-42815  
 Transmittance of gaseous air components for 1850 angstrom radiation 24 p4234 A66-42818  
 Edser-Butler band amplitude dependence on modulating effect of interference grating 24 p4212 A66-42819  
 Optical constants of triple, symmetrical and absorbing thin film used with layer thickness to determine complex transmission factor 24 p4258 A66-42994

**LIGHTHILL METHOD**

LF solutions for dipoles in semiinfinite media found not to be valid for entire range of frequencies 06 p0826 A66-16032  
 Lighthill integral transform methods in hodograph transformation theory of plane compressible transonic shock-free potential flows around airfoil sections in solution space of Chaplygin equation [ICAS PAPER 66-26] 23 p4007 A66-41008

**LIGHTING**

**S AIRCRAFT LIGHTING**

**LIGHTNING**

Lightning discharges investigated by oscillographic method in field laboratory at Pirkuli in 1963 01 p0096 A66-10191  
 Ionizing radiation as potential lightning hazard, noting lightning protection device for medical and industrial buildings 03 p0423 A66-13266  
 Schumann resonances of Earth ionosphere cavity and excitation by lightning flashes 04 p0474 A66-13427  
 Atmospheric radio noise bursts arising from radiation fields of electrical discharge in LF band at Bangalore, India 04 p0475 A66-13428

- Nucleation of ice formation in supercooled clouds as result of lightning-initiated sound waves 04 p0542 A66-13674
- Noise from terrestrial lightning discharges as source of interference to satellite radio reception 05 p0633 A66-14955
- Electrical structure of thunderstorms, particularly weak portion of squall line thunderstorm complex, using aircraft photography, radar data, etc 06 p0905 A66-16270
- Checking and calibration of aircraft compasses, discussing compass base at Dublin Airport and effect of lightning strikes 07 p1032 A66-17675
- Amplitude distributions of radio noise at ELF and VLF related to amplitude distribution of lightning discharges 08 p1184 A66-19403
- Lightning and static electricity discharges effects on helicopter design and performance, noting blade and rotor hub protection, fuel ignition, etc 11 p1638 A66-23259
- Electrical discharge theory of cosmic atmospheric phenomena, relating lightning, novae and quasars 12 p1950 A66-24394
- Lightning discharge radiating sferics near Gulf of Mexico and west coast of U.S. 17 p2923 A66-33358
- Photometric studies of lightning with correlated photographs of discharge channels to determine photoelectric pulse profile characteristics 18 p3129 A66-34018
- Frequency distribution of atmospherics emitted by multiple lightning discharges 20 p3553 A66-38075
- Electric component of radiation field from same flashes recorded with histograms of product of field strength and distance, showing concentration around mean values 20 p3553 A66-38076
- Cathode ray oscillograph-directional antenna recordings of electromagnetic pulses from lightning discharges 20 p3553 A66-38081
- Physical properties of lightning return stroke analyzed by several time-integrated and time-resolved spectroscopy techniques 20 p3555 A66-38384
- Lightning flash mechanisms and electric field strengths in clouds 21 p3759 A66-38533
- Chondrules origin, discussing possible production by lightning in primitive Laplace type nebula 22 p3981 A66-40477
- IMB**
- S LUNAR LIMB**
- LIMESTONE**
- Compressional wave velocity in limestones, marbles and single crystal of calcite under hydrostatic pressure to 20 kbar 19 p3351 A66-36387
- LIMITER**
- SA POWER LIMITER**
- Regenerative frequency converters used as signal limiters, determining characteristics from equivalent circuit of semiconductor diode 02 p0199 A66-11758
- Spectrum of phase-manipulated signal at output of ideal amplitude limiter 04 p0501 A66-14405
- Low level garnet limiter with operating range greater than one octave, using conductivity change due to impact ionization in n-type germanium, noting volt-ampere characteristic 06 p0851 A66-16459
- Phase-advance stabilization of servocontrol systems by use of limiters controlled by error signal 08 p1199 A66-18671
- Two basic semiconductor limiters design and performance as microwave duplexing devices 14 p2253 A66-27529
- Octave band all-pass filter with electronically tunable limiter 15 p2463 A66-29037
- Microwave limiter device, based on impact ionization of deep levels in silicon 17 p2897 A66-33461
- Equilibrium of toroidal magnetically confined plasma, using segmented circular aperture limiter 23 p4102 A66-41484
- LIMITER AMPLIFIER**
- Optimal pulse shape determined for signal which gives maximum response energy in ideal limiter filter system 07 p1001 A66-17354
- P-I-n diode coaxial attenuators and levelers noting design, performance parameters and application 12 p1831 A66-23812
- LINCOLN EXPERIMENTAL SATELLITE**
- /LES/**
- Lincoln experimental satellite program in antenna pointing, solid state repeaters, RF power generation and magnetic torquing of spin axis [AIAA PAPER 66-271] 12 p1821 A66-24744
- LINE**
- S DELAY LINE**
- S FORCE LINE**
- S FRAUNHOFER LINE**
- S H-ALPHA LINE**
- S H-BETA LINE**
- S LOOP**
- S PIPELINE**
- S SIGHT LINE**

- S TRANSMISSION LINE**
- LINE CURRENT**
- Magnetohydrostatic cavity formed around system of line currents in infinitely conducting atmosphere 14 p2279 A66-28394
- Boundary of magnetic field of two arbitrary line currents immersed in plasma at uniform pressure 15 p2553 A66-29687
- Field boundary of two line currents immersed in streaming plasma treated by conformal transformation 22 p3956 A66-40386
- Chapman-Ferraro hollows for system of parallel line currents enveloped by stratified corpuscular flux 22 p3975 A66-40806
- LINE SHAPE**
- Resonant frequency equation for line segment with reactive loads at both ends, using Chebyshev principle 02 p0199 A66-11754
- Transition probabilities and line-shape parameters for three argon lines in wall-stabilized Ar arc containing trace of H 08 p1261 A66-18766
- Green function method in theory of dispersion and absorption of electromagnetic radiation in semiconductor, considering resonance line shapes 09 p1411 A66-19961
- Optical linewidth study of energy transfer between impurity ions and homogeneous broadening and lineshape changes in optical transitions 13 p2098 A66-26176
- Actual line shape expected from accelerating radiating ion, errors due to Lorentzian approximation and results for ion laser transition in rare gas 16 p2716 A66-30181
- Catalog of neutral H-line profiles at 21 cm wavelength noting intensity, radial velocity, line widths, etc 19 p3460 A66-35792
- LINE SPECTRUM**
- SA SPECTRAL LINE**
- Line widths of some gallium-substituted polycrystalline garnets prepared at liquid-helium temperature 01 p0121 A66-10561
- Coronal spectrum of eclipse of February 15, 1961 studied at constant height as function of heliographic latitude from circular slit spectrograph 02 p0286 A66-11354
- Quiet chromosphere and corona noting line intensity and coronal electron and kinetic temperature 03 p0420 A66-12841
- Profiles of intense resonance lines and variation from center of limb of solar disk 03 p0427 A66-12917
- Line broadening from Stark effect and Doppler effect for plasma 04 p0553 A66-14193
- Laser radiation absorbed along slant paths, spectral line overlapping and center line shift with pressure 07 p1041 A66-17295
- Line intensities of first negative bands of nitrogen molecular ion measured as function of bombarding electron energy and gas pressure 09 p1404 A66-20377
- Observed line spectra of nine quasi-stellar radio sources representation for single temperature, electron density and ionization level 09 p1456 A66-20416
- Range of importance of molecular impurities on nitrogen vibrational relaxation determined, using spectroscopic sodium line reversal techniques 11 p1741 A66-23218
- Profiles of intense resonance lines and variation from center of limb of solar disk 14 p2380 A66-27266
- Organic flame temperatures and burning velocities at various fuel-air ratios measured, noting band intensity, effect of diluents, etc 14 p2413 A66-27723
- Intensities of optically thick lines emitted by hydrogen-like ions in steady state plasma for various electron temperatures and densities 16 p2758 A66-30276
- Flare observations in H-alpha line, line and continuous spectra of flares, and optical characteristics of proton flares 17 p2993 A66-32364
- Electron scattering interpretation of ionization, emission and absorption line spectra of quasi-stellar object 17 p3004 A66-32928
- Pressure broadening of microwave lines in semiclassical treatment obtained as limit of quantum impact theory and its limitations 20 p3602 A66-37640
- XUV C, Ti, Mn, Fe, Ni, Cu, Zn and Ar line spectra and continuum radiation spectra in plasmas produced by focused ruby laser beam 22 p3954 A66-39812
- LINEAR ACCELERATOR**
- Linear accelerator for micrometeoroids operated in radially stable mode and variable frequency for hypervelocity impact studies 01 p0053 A66-10852
- Vehicle angular velocity determined, using configurations with only linear accelerometers and no gyroscopes for inertial navigation 08 p1224 A66-19488
- RF losses in lead and niobium investigated for possibility of constructing superconducting linear accelerator 09 p1416 A66-20026
- 1 g rotating linear acceleration vector producing compensatory nystagmus, noting effects when rotation axis was vertical and horizontal 11 p1643 A66-22579
- Electrons from linear accelerator directed in collimated beam at normal incidence upon thick targets of various materials, obtaining energy spectra of retrofugal electrons 13 p2136 A66-26280
- Vestibular neuronal response to rotating linear acceleration vectors, noting generation of compensatory ocular nystagmus 17 p2858 A66-32177
- LINEAR ARRAY**
- Linear antennas and characteristics regarding maximum power, directivity, height, sleeve and conical dipoles and current distribution 04 p0491 A66-13402
- Electro-optical signal processors for phased linear array antennas, discussing time and spatial delay multiplexing 05 p0648 A66-14832
- Field of linear array consisting of coaxial spherical antennas, each representing pair of hemispheres separated by narrow clearance with applied voltage 05 p0651 A66-15880
- Multiple-feed system for microwave focusing objective, discussing array factors 06 p0827 A66-16042
- Transient condition effects on radiation resistance and expansion in linear antennas 09 p1352 A66-20348
- Potential analog synthesis of linear arrays and radiation pattern representation as function of single complex variable 09 p1356 A66-20605
- Inaccuracy in normalized space factor of nonuniformly excited and spaced linear antenna array expressed in terms of Poisson sum formulation 11 p1663 A66-22555
- Long-baseline radio interferometer for radio astronomy, combining wideband signal and one-dimensional linear array to restrict spatial response in two dimensions 11 p1704 A66-22562
- Pattern synthesis method for linear array using integral mean of Fourier approximation 12 p1841 A66-24628
- Bilinear transformation reduces linear uniformly spaced array to examination of rational fraction on imaginary axis of complex plane 13 p2029 A66-25202
- Mutual and self-impedance of linear antennas in interface between dielectric layers computed, noting cases of symmetric and antisymmetric excitations 14 p2256 A66-27914
- Eigenvalues design method for nonuniformly spaced arrays that will approximately any required radiation pattern 15 p2463 A66-29026
- Equivalent linear antenna substitution for antenna with plane aperture in statistical

analysis of antennas 17 p2879 A66-31861  
 Haar theorem for synthesis of  
 nonuniformly spaced linear discrete antenna  
 arrays 17 p2886 A66-32389  
 Radiation characteristics of circular  
 aperture and linear antenna with partially  
 coherent illumination 18 p3074 A66-33536  
 Radiation pattern of linear nonequidistant  
 antenna array 19 p3311 A66-35307  
 Broadband signals effect on far-zone field  
 of linear arrays studied in terms of energy  
 radiation pattern 19 p3320 A66-36402  
 Optimal discrete binary system of  
 electrical control of beam position of phased  
 linear antenna array 21 p3712 A66-39251

**LINEAR CIRCUIT**  
 Current status of linear integrated  
 circuits 01 p0048 A66-11143  
 Topological rules for impedance functions  
 of linear reciprocal  
 networks 02 p0208 A66-11906  
 Topological analysis for networks  
 containing nonreciprocal components and  
 mutual inductance 02 p0208 A66-11907  
 Optimal amplitude frequency and transient  
 process characteristics in linear loops of low  
 pass filter type 02 p0209 A66-12268  
 Linear circuit for degenerate parametric  
 amplification, using analog computer  
 elements 03 p0332 A66-12425  
 Invalidity of overall noise bandwidth for  
 receivers using linear or square law  
 envelope detectors for predetection of  
 signal to noise ratio 03 p0332 A66-12430  
 Impedance matrix of single three-pole and  
 two-stage amplifier determined by Kron  
 method 03 p0348 A66-12497  
 General linear time-invariant networks  
 analyzed in time and frequency  
 domain 03 p0349 A66-13022  
 Linear integrated circuits discussing  
 differential and operational amplifiers,  
 development, use, capabilities, new  
 techniques, special designs and  
 reliability 03 p0347 A66-13340  
 Digital computer calculation of linear  
 transistor amplifier performance from two-  
 port y-parameter  
 measurements 05 p0645 A66-14587  
 Iterative procedure for analyzing linear  
 electrical networks by digital  
 computer 05 p0638 A66-15127  
 Gain-bandwidth limitations and optimum  
 design of noninverting frequency converters  
 comprised of parametric conductance in  
 parallel with parametric capacitance pumped  
 in time-quadrature 07 p1017 A66-18348  
 Low-cost fast development capability of  
 master-dice technique for custom linear  
 integrated circuits 08 p1196 A66-19523  
 Circuit design techniques for linear  
 integrated circuits, noting manufacturing  
 methods, achievement of monolithic  
 construction, etc 11 p1670 A66-23243  
 Linear cycle set factorization, showing that  
 uniqueness of canonical procedure is  
 incorrect and introducing new cycle division  
 algorithm 11 p1679 A66-23247  
 Field effect transistor application to linear  
 amplifier and attenuator  
 circuits 11 p1673 A66-23470  
 Insulated gate field effect transistors in  
 HF-UHF linear amplifiers 11 p1673 A66-23471  
 Digital and RF/linear circuits compared  
 noting monolithic, hybrid and thin film  
 circuit limitations, phase locked loop design,  
 etc 12 p1830 A66-23756  
 Optimal amplitude frequency and transient  
 process characteristics in linear loops of low  
 pass filter type 12 p1848 A66-23872  
 Monolithic silicon-transistorized integrated  
 amplifier for use as stabilized gain block  
 element in linear circuit  
 realizations 12 p1842 A66-24656  
 Optically coupled linear circuit techniques,  
 discussing GaAs p-n junction diode,  
 noncoherent light emitters and silicon p-n  
 junction photosensors 13 p2036 A66-25521  
 Distributional study of real frequency  
 behavior of passive  
 systems 13 p2055 A66-26094  
 HF transistor circuit design, noting effect  
 of bias frequency and temperature on y and  
 h parameters 14 p2261 A66-28369  
 Power gain and stability of linear active  
 two-port networks with circuit design  
 equations based on terminal  
 parameters 14 p2268 A66-28371

Multiport linear networks in which pumped  
 variable capacitances shunt and interconnect  
 several ports, exemplifying with varactor  
 parametric amplifier, impedance  
 transformer, coupler, etc 17 p2890 A66-32907  
 Linearizer for constant temperature hot-  
 wire anemometer, detailing linearization  
 circuit 19 p3357 A66-35806  
 Continuous group and infinitesimal  
 transformation in linear dynamic system  
 application, considering linear  
 network 20 p3539 A66-38148  
 Three amplifier and oscillator  
 configurations analyzed for controlling  
 location of dominant poles of feedback  
 circuit within possible realizable  
 region 23 p4050 A66-41612

**LINEAR EQUATION**  
 SA NONLINEAR EQUATION  
 SA REYNOLDS EQUATION  
 SA SIMULTANEOUS LINEAR EQUATION  
 Approximate solution for differential  
 equations, using algorithm applied to  
 boundary value problem involving linear  
 equation 01 p0091 A66-10164  
 Solution to linear difference and  
 differential equation with variable  
 coefficients 01 p0092 A66-10173  
 Error estimates for some finite difference  
 methods of solving ordinary linear  
 differential equations 01 p0092 A66-10315  
 Qualitative-quantitative analysis of  
 solutions of second order ordinary linear  
 homogeneous differential equations and two  
 derivatives 01 p0093 A66-10403  
 Volterra integral equation used in alpha  
 operational method for solution of linear  
 differential equations 01 p0093 A66-10404  
 Linear differential equation solution  
 nonfluctuation and boundedness estimate in  
 connection with integral  
 inequalities 01 p0094 A66-10650  
 Asymptotic behavior of solution to system  
 of differential equations with random  
 limited coefficients 01 p0095 A66-10733  
 Cauchy problem for linearized Boltzmann  
 equation in kinetic theory of  
 gases 01 p0107 A66-11011  
 Nonlinear difference schemes for  
 hyperbolic equation applied to solution of  
 one-and multidimensional transport and  
 quasi-linear equations 01 p0095 A66-11013  
 Existence and formal uniqueness theorem  
 of partial linear differential equations with  
 Cauchy conditions on characteristic multiple  
 hyperplane 01 p0095 A66-11075  
 Wave solutions to linearized quasi-  
 hydrostatic equations for adiabatic  
 nonviscous flow on equatorially oriented  
 beta plane 02 p0254 A66-11982  
 Cauchy problem for infinite order linear  
 differential equation 02 p0250 A66-12019  
 Fragnen-Lindelof type theorems for  
 second-order linear elliptic equation,  
 examining Dirichlet problem solution in  
 infinite region 02 p0250 A66-12100  
 Stability analysis of adiabatic flow of  
 incompressible fluid without equation  
 linearization and by constructing functional  
 from hydrodynamic fields 02 p0220 A66-12170  
 Zeros of solutions of second-order linear  
 differential equation, discussing Sturm  
 comparison theorem 04 p0538 A66-13363  
 Linear theory of optimum variable thrust  
 rendezvous trajectories with power limit  
 propulsion system 04 p0575 A66-13457  
 MHD equations linearized by Newton  
 iteration method, describing weak  
 perturbation propagation 04 p0574 A66-13841  
 Qualitative and quantitative solution of  
 linearized approximations to boundary layer  
 equations, noting free jet and wall-slot  
 injection into moving stream  
 [ASME PAPER 65-APMW-6] 04 p0512 A66-14212  
 Iterative process to refine solution to  
 system of linear  
 equations 04 p0540 A66-14392  
 Transformation and equivalence of higher  
 than second order homogeneous linear  
 differential equations 05 p0708 A66-15153  
 Linearized equation and energy principle  
 for plasma stability  
 problems 05 p0726 A66-15254  
 Stress and strain analysis of sandwich  
 plates, formulating and solving problem of  
 bending for transversally isotropic layers  
 and light core 06 p0964 A66-16477

Correct solvability of Cauchy problem for  
 parabolic systems with coefficients  
 satisfying Dini condition 06 p0902 A66-16534  
 Properties of linearized system of  
 equations of perturbed motion and  
 application to motion of center of mass of  
 space vehicle 06 p0957 A66-17169  
 Second-order linear partial differential  
 equation transformed to normal form,  
 obtaining invariant representation without  
 Ricci calculus 07 p1055 A66-17301  
 Approximate method determining  
 nonstationary thermal fields in solid bodies  
 with thermal capacity and  
 thermoconductivity coefficient depending  
 linearly on temperature 07 p1148 A66-17399  
 Stability in small of two types of extremal  
 systems with modulating action, using linear  
 difference equation with periodic  
 coefficients 07 p1013 A66-17429  
 Perturbation method in theory of dynamic  
 stability of systems with distributed  
 parameters, discussing linear Hamiltonian  
 equation in separable Hilbert  
 space 07 p1056 A66-17606  
 Solution of linear differential equations  
 with quasi-periodic coefficients by method  
 of accelerated  
 convergence 07 p1058 A66-17908  
 Asymptotic behavior of solutions of  
 ordinary linear differential equations  
 involving continuous complex valued  
 functions 07 p1058 A66-17913  
 Improving estimates of solutions of linear  
 perturbed-motion equations of mechanical  
 systems with variable  
 coefficients 07 p1060 A66-18188  
 Evolutionary graphs to solve systems of  
 linear equations 08 p1246 A66-19635  
 One type of infinite-order differential  
 equation with polynomial coefficients of  
 increasing power 08 p1246 A66-19707  
 Second-order linear equations with  
 nonnegative characteristic form in analysis  
 of first boundary value  
 problem 09 p1397 A66-20734  
 Monte Carlo linear extrapolation of  
 multivariable functions, introducing  
 truncation procedure which saves on  
 machine time and serves for variance  
 reduction 10 p1549 A66-21215  
 Hypergeometric solutions of second-order  
 linear ordinary differential equation with n-  
 regular singular points 10 p1550 A66-21305  
 Qualitative and quantitative solution of  
 linearized approximations to boundary layer  
 equations, noting free jet and wall-slot  
 injection into moving stream  
 [ASME PAPER 65-APMW-6] 10 p1523 A66-21470  
 Digital computer solutions to rigorous  
 linear equations system for current density  
 by enforcing boundary conditions at discrete  
 points in scattering body 10 p1497 A66-21589  
 Theorems and corollaries describing  
 bounds for quadratic Liapunov  
 functions 10 p1551 A66-21918  
 Transcendence and algebraic independence  
 of values of E-functions representing  
 solution to third-order linear differential  
 equation 10 p1552 A66-21986  
 Linear ODEs in canonical form with after-  
 effect in functional space of continuous  
 functions 11 p1676 A66-22644  
 Discrete ordinate technique for solution of  
 distribution function of linearized Boltzmann  
 equation, with application to Couette  
 flow 11 p1692 A66-22923  
 Approximation of function of many  
 variables by linear  
 methods 11 p1723 A66-23313  
 Approximate oscillatory solution of second  
 order linear equations, with application to  
 Bessel equation 11 p1724 A66-23425  
 Stress function solution in dynamic linear  
 theory of homogeneous incompressible  
 elastic bodies 12 p1962 A66-23998  
 Linear differential equation solution  
 nonfluctuation and boundedness estimate in  
 connection with integral  
 inequalities 12 p1903 A66-24021  
 Cauchy problem for infinite order linear  
 differential equation 12 p1903 A66-24024  
 Best linear unbiased (BLU)/ estimator for  
 large class of error correlation  
 models 12 p1904 A66-24197  
 Majorants of solutions of first boundary  
 problem for second order linear elliptic

equations 12 p1904 A66-24238  
 Statistical derivation of linear viscoelastic equations, relating stresses to minor deformation 12 p1969 A66-24355  
 Acceleration potential method for solving linear problems of wing hydrodynamics above interface between fluids differing in density, for arbitrary Froude number 13 p2067 A66-26530  
 Linear differential system for rendezvous with target in elliptical orbit 14 p2391 A66-27471  
 Solution of linear system of equations based on determinants 14 p2324 A66-28137  
 Asymptotic estimates of characteristic values of differential equation with periodic coefficients 15 p2524 A66-28507  
 Linear normal form of system of real differential equation, noting disappearance of difference between Hartman and Sternberg hypotheses 15 p2525 A66-28511  
 Multiple characteristics of square systems of linear partial differential equations with constant coefficients, obtaining formal series solutions for systems 15 p2527 A66-29061  
 Linear integral operators applied to singular differential equations and to computations of compressible fluid flows 16 p2683 A66-30241  
 Bending stresses in cylindrical shell with rigid circular inclusion examined under axial tension and internal pressure [AIAA PAPER 66-525] 16 p2813 A66-30526  
 Riemann-Hilbert boundary value problem for elliptic systems of linear partial differential equations of first order 16 p2733 A66-30651  
 Asymptotic behavior of solution to ordinary differential equation, noting transformation to nearly diagonal system of first order 16 p2733 A66-30741  
 General theory of linear integral equations with power kernel 16 p2734 A66-30746  
 Transformation and equivalence of homogeneous linear differential equations of higher than second order, examining equivalence of regular equations with dimension 16 p2734 A66-30778  
 Correct solvability of Cauchy problem for parabolic systems with coefficients satisfying Dini condition 16 p2735 A66-30972  
 Asymptotic behavior of solutions of ordinary linear differential equations involving continuous complex valued functions 16 p2736 A66-30976  
 Quasi-linear equations for inhomogeneous plasma in magnetic field applied to pumping of energy of Langmuir oscillations 16 p2762 A66-31176  
 Extension of problem of singular perturbation for linear scalar constant coefficient differential-difference equation with single retardation to several retardations, noting degenerate equation solution 16 p2737 A66-31230  
 Downrange radar and optical data reduction used for evaluation of ejection velocities of ballistic missile penetration aids at deployment 16 p2804 A66-31464  
 Generalized star-mesh transformation in network theory obtained using fact that Kirchhoff rules, Maxwell rules, Mason rules and Coates formulas can be obtained from each other 17 p2899 A66-32053  
 Generalized solutions to second-order linear or quasi-linear uniform parabolic equation 17 p2947 A66-32664  
 Boundedness of solutions to nearly differential equations with random arguments 17 p2947 A66-32712  
 Textbook on differential equations with deviating arguments, covering existence theorems, linear equations, stability theory, boundary value problems, etc 17 p2947 A66-33188  
 Solution method for use when linear combinations of given approximate solutions are used for representing exact solution of general ordinary linear homogeneous differential equation 18 p3125 A66-33627  
 Sufficient conditions for boundedness of solutions of linear system of differential equations with variable coefficients 18 p3126 A66-33929  
 Minimal element determination for certain set related to interpolation of second-order linear ordinary differential

equations 18 p3126 A66-33954  
 Evolutionary graphs to solve systems of linear equations 18 p3127 A66-34173  
 Solution for inhomogeneous differential linear equation in integral form obtained from Wronskian 18 p3128 A66-34701  
 Graphical analysis of extremal control system stepwise adapted to process with extremal characteristic located between two first-order linear operators 19 p3324 A66-35582  
 Transcendence and algebraic independence of values of E-functions representing solution to third-order linear differential equation 19 p3390 A66-36191  
 Homogeneous linear differential equations, examining stochastic processes for perturbations causing discontinuous solutions and for perturbations acting on entire bounded intervals 19 p3390 A66-36334  
 Contact problem for elastic rectangle solved by reducing problem to solution of quasi-fully regular infinite set of linear algebraic equations with bounded free terms 19 p3476 A66-36837  
 Mean value theorem for curves arising in solution of ordinary differential equation by series method 20 p3590 A66-37525  
 Linear homogeneous third-order differential equations, examining existence, uniqueness and asymptotic behavior of nontrivial nonoscillatory solutions and existence criteria for oscillatory solutions 20 p3591 A66-37608  
 Pulsation properties of stellar models representing RR Lyrae stars obtained, using adiabatic and nonadiabatic linearized pulsation equations 20 p3652 A66-37613  
 Cylindrical shells strengthened by stringers and formers calculated, using double trigonometric series 20 p3670 A66-37672  
 Well-posed BVP for linear partial differential system and relation of weak solution with two Banach spaces 21 p3754 A66-38458  
 Boundary layers with coupled heat and mass transfer for large enthalpy per unit mass of injected material, based on linearity of perturbation equations 21 p3834 A66-38704  
 Approximate method for determining damping factors of mechanical oscillatory systems with many degrees of freedom described by linear differential equations of n-th order with constant coefficients 21 p3770 A66-38971  
 Periodic flows of orientable anisotropic fluids tending to be unoriented at rest considered through linear equations which predict resonance phenomenon 21 p3727 A66-39173  
 Plane supersonic flow with Mach reflection represented by shock wave interaction, noting integral equation obtained from linearized shock equations 22 p3897 A66-39696  
 Reinforced cylindrical shell stability under axial compressive force, using linear and quasi-linear formulation 22 p3990 A66-40146  
 Linear theory of micropolar elasticity, noting all components of asymmetric stress tensor are determined and motion of media is fully described when deformation and microrotation vectors are known 22 p3995 A66-40566  
 Book on numerical processes in differential equations including initial value and boundary value problems 22 p3941 A66-40620  
 Impulse response of second-order time varying systems of differential equation obtained without knowledge of independent solutions of associated homogeneous equation 23 p4086 A66-41694  
 Linear perturbation theory of flow due to convection of entropy and vorticity in nonuniform flow field, noting sound generation 23 p4062 A66-42051  
 Generalized solution to linear second-order parabolic equation showing that first boundary value problem has unique solution, obtaining estimates of Holder norms of solutions 24 p4231 A66-42233  
 Book on asymptotic methods of integrating linear differential equations with varying coefficients, emphasizing equations for oscillatory processes 24 p4231 A66-42613  
 Hilbert parametrix method of solving linear BVPs for second-order elliptic PDEs, using Green functions 24 p4232 A66-42740

Asymptotic behavior of solution to system of differential equations with random limited coefficients 24 p4232 A66-42749  
 Single second-order oblique derivative problem with elliptic operator 24 p4232 A66-42830  
 Linear second-order partial differential equations of elliptic type analyzed, using maximum principle and barrier functions 24 p4233 A66-43065  
 Numerical solution of linear boundary value problems 24 p4233 A66-43201  
**LINEAR FILTER**  
**SA WIENER FILTER**  
 Self-contained orbital navigation system using Earth-horizon measurements in 14-16  $\mu$  carbon dioxide absorption band, using Kalman linear filter theory 01 p0100 A66-10024  
 Recursive space navigation applied to navigating in near orbit of planet by measuring directions to known landmarks 01 p0100 A66-10025  
 Linear filtering concepts in imaging and optical data processing systems, including three-dimensional photography obtained by wave front reconstruction 02 p0240 A66-11453  
 Stochastic differential equations specifying dynamical structure of filters generating posterior probability distribution when inputs are time functions 03 p0351 A66-13259  
 Nonsteady optimum-filtering problems where useful and noise signals are related to white noise by different equations 04 p0505 A66-13979  
 Linear smoothing method minimizing mean-square error in time series where signal statistics are unknown and noise is additive, deriving filter 05 p0653 A66-14600  
 Power spectral density analysis, reviewing signal wave, time, rate and system parameters [ISA PREPRINT 1.5-3-65] 05 p0683 A66-15508  
 Communications and control systems that require faithful transmission of amplitude-modulated signals through linear filters 06 p0823 A66-15964  
 Finite wide-sense stationary sequence followed by another sequence corresponding to linear filtering without delay, minimizing mean square error 06 p0828 A66-16116  
 Recovery of continuous signal from samples taken at periodically varying rate, determining optimum mean-squared realizable filter and error 06 p0829 A66-16195  
 Optimum linear separation of random message from additive white noise of given spectral height realized as unity feedback system 06 p0832 A66-16449  
 Nonlinear optimal filtration problem solved, using quasi-orthogonal representations of random functions 07 p0104 A66-17432  
 Optimal filter in solution of linear mean square estimation problem when process statistics are undefined 12 p1848 A66-24249  
 Algebraic conditions of controllability and observability and relation between two Riccati-type matrix equations, deriving one from optimal regulation and second from optimal linear filtering 12 p1854 A66-24339  
 Optimum linear filtering of integrated signal in white noise, deriving expression for minimum mean square error 13 p2023 A66-25664  
 Lumped-constant filters whose bandpass depends only on one parameter of transmission coefficient, having lower bandpass for given transient process delay time 15 p2464 A66-29120  
 Linear stochastic filtering theory assessing Kalman-Bucy filter and equivalence with Kolmogorov-Wiener problem 15 p2473 A66-29377  
 Feedback realization of continuous-time optimal filter, with application in redundant signal mixing 15 p2474 A66-29382  
 Synthesis of linear digital recursive filters, noting application to arbitrary amplitude frequency transfer function synthesis 15 p2475 A66-29772  
 Effect of modifying digital filter weights derived on least squares error basis through multiplication by certain weighting functions 16 p2859 A66-30535  
 Nonstationary problem of linear filtering in presence of additive noise solved by computer simulation 16 p2869 A66-30762

Optimum estimate of nonlinear process in presence of non-Gaussian noise and disturbances, deriving algorithm for correcting approximation 19 p3323 A66-35340

Linear least-squares filtering problem in geometrical interpretation 19 p3318 A66-35731

Linear filtering technique for estimation of azimuth alignment of inertial guidance system in presence of disturbances with no measurement noise 19 p3398 A66-36689

Automatic tracking radar control via nonstationary filter, noting design principle and operation 20 p3536 A66-36866

Graphic solution for factoring higher-order polynomials of response function resulting from analysis of linear filter networks 21 p3756 A66-38672

Horizon sensor data processing with compensation for statistical properties of errors, noting application of optimal filtering theory 21 p3766 A66-38882

Kalman filter divergence control, noting analytical and empirical modification methods 21 p3766 A66-38883

Simulation experiments to describe effects of measurement function nonlinearity and ambiguities when linear filters are applied in distant planet satellite orbit parameter estimation 21 p3766 A66-38885

Apollo inertial navigation system estimation, using statistical filtering to reduce computation 21 p3767 A66-38886

Optimum realizable linear filter role in some communication problems, considering detection and continuous estimation 22 p3879 A66-40716

Maximum a posteriori /MAP/ interval estimation for state vector of random process, solving fixed delay filtering and deriving error matrix 22 p3868 A66-40718

Reentry filtering prediction and smoothing in application of satellite and spacecraft trajectory estimation techniques [AIAA PAPER 65-319] 23 p4132 A66-41098

## LINEAR PREDICTION

Linear estimation for log Weibull distribution from random sample of ordered failure time 01 p0091 A66-10120

Recursive procedure based on orthonormalization for discrete sample least mean square error estimation of non-Markovian random process 05 p0706 A66-14614

Parameter evaluation of delta modulation encoding techniques for image communication applications by computer simulation 20 p3513 A66-37201

Linear prediction theory for maximum load tolerance of oscillator and lossless embedding required to induce oscillation 20 p3540 A66-38288

## LINEAR PROGRAMMING

### SA DUAL CONTROL PROBLEM

### SA NONLINEAR PROGRAMMING

Solution to linear programming problems, using iterative method 01 p0050 A66-10170

Selection of maximum number of constraints for which solution can be obtained for problems of linear or nonlinear programming and approximation of functions 01 p0051 A66-10707

Nonlinear optimal design problem reduced to linear programming problem for worst-case circuit design 05 p0656 A66-14626

Research and Development Effectiveness /RDE/ computerized planning program, utilizing analytical techniques in management of research and development resources 08 p1322 A66-19461

Gradient systems of differential equations for solution of linear and quadratic programming problems on analog computer 08 p1188 A66-19687

Stochastic linear programming as activity analysis model for determination of maximal profit operations for companies 09 p1349 A66-20635

Integer linear programming to design combinatorial network of threshold gates capable of evaluating partially specified Boolean function 10 p1517 A66-21698

Selection of maximum number of constraints for which solution can be obtained for problems of linear or nonlinear programming and approximation of functions 11 p1675 A66-22619

Linear graphs theory as part of topology

solving problems in circuitry, psychology, linear programming, matrices, network theory, etc 11 p1675 A66-22627

Alternative method of determining incentive fee schedule for government contracts, based on linear programming and system reliability 12 p1888 A66-24669

New algorithm for quadratic programming problems with application to control, determining input requiring minimum time from initial state to target 13 p2046 A66-25341

Gomory method of linear programming [PST PAPER NT-148] 14 p2324 A66-27836

Iteration method of general linear programming on digital computer, using penalty functions, compared to equilibrium problem of mechanical system 16 p2669 A66-30759

Tucker linear programming concept of combinatorial equivalent matrices extended to network synthesis 16 p2739 A66-31721

Optimal solution method for linear program in which second member and several constraint matrices depend linearly on one parameter 18 p3127 A66-34389

Gradient systems of differential equations for solution of linear and quadratic programming problems on analog computer 18 p3073 A66-34673

Gomory all-integer linear programming algorithm based on lexicographical ordering principle and relation to cost function 19 p3309 A66-35876

Reliability-maintainability cost tradeoff via dynamic and linear programming, discussing states, alternatives within states, transition rates and expected costs 20 p3568 A66-37911

Product form of inverses of sparse matrices, discussing geometrical interpretation and Gauss-Jordan method 24 p4233 A66-43203

## LINEAR RECEIVER

Minimum noise of linear receiver in formulas of Heffner and Nyquist 08 p1183 A66-19112

## LINEAR SYSTEM

### SA NONLINEAR SYSTEM

Best stabilizing control for linear system under given class of perturbations 01 p0050 A66-10354

Existence of explicit stable difference scheme in correct Cauchy problem for linear systems of partial differential equations with constant coefficients 01 p0094 A66-10654

Gradient method of solving terminal control problems in linear automatic control system 01 p0051 A66-11012

Statistical probability problems of optimal control for linear systems 01 p0051 A66-11183

Existence and uniqueness of solution for second boundary value Neumann problem in linear flow theory 02 p0296 A66-11242

Disturbance signals used to synthesize optimal structure of rapid action automatic systems 02 p0206 A66-11311

Linear quartz crystal temperature sensing element for digital data presentation 02 p0228 A66-11516

System coefficient matrices and finite number of derivatives are sufficient conditions for controllability of linear time-variable systems 02 p0208 A66-11901

Stability of single-frequency solutions to quasi-linear autonomous systems with two degrees of freedom 02 p0262 A66-12175

Quartz thermometer measuring temperatures automatically and directly on digital display, using quartz wafer with linear coefficient cut 03 p0367 A66-12373

Monograph on boundary problems for linear parabolic systems with complex coefficients 03 p0386 A66-12456

Three independent systems of matrix equations for solving transfer function of multiparameter linear system handling by human operator 03 p0328 A66-12699

Plotting of radius of controllability sphere for linear dynamic systems bounded with respect to control actions and having fixed time of motion 03 p0350 A66-13042

Plotting in phase space controllability region for unstable linear system of differential equations 03 p0350 A66-13043

Textbook employing signal analysis theory in treating linear systems and communication theory including Fourier series, Fourier and Laplace transforms,

convolution integral, etc 03 p0336 A66-13073

Motion stability of linear continuous systems noting influence of various forces 03 p0438 A66-13094

Optimization of linear servosystem comprising ideal proportional, integral and differential control regulator and order system 03 p0350 A66-13095

Optimal fixed time constant-energy regulator for linear plants with perturbations operating within bounding hypersurface 03 p0350 A66-13176

Linear system using differential circuits for indirect measurement of perturbations 04 p0503 A66-13771

Analytical design of controller for stabilization of linear system with random delay in form of intermittent Markov process 04 p0504 A66-13973

Pontryagin maximum principle to solve zeroing problem for nonsteady linear systems optimum in integral sense 04 p0504 A66-13978

Time domain and frequency domain analysis of linear time invariant systems applied to radar return signal analysis 04 p0506 A66-14108

Response of linear and nonlinear devices to noise calculated by constant time-varying parameters, covariance, integral transform and characteristic function methods 04 p0485 A66-14110

Steady states of mechanical system using perturbation method, assuming primary and secondary oscillators are tuned to single pulse, each involving Duffing type nonlinearity 04 p0545 A66-14169

Viscoelastic contact problem for linear materials and quadratic surfaces of bodies [ASME PAPER 65-APMW-36] 04 p0594 A66-14236

Generalized convolution theorems of periodic functions based on Fourier series formalism used to study processes in linear systems 04 p0506 A66-14402

Error effect in a priori information on sequential estimate variance of linear system states, noting optimal filter synthesis 05 p0653 A66-14601

Time-varying linear differential systems, discussing minimum time identification via scalar valued transform of Zadeh 05 p0654 A66-14607

Synthesis method for linear time-varying systems, discussing integral formulation and approximation functions 05 p0654 A66-14609

Controllability and observability matrices in time-variable linear systems 05 p0655 A66-14618

Composite state vector method for linear time-varying system 05 p0655 A66-14619

Relative stability of linear feedback systems noting Hurwitz, Nyquist and Mikhailov stability criteria 05 p0707 A66-14623

Approximation formulas for minimum and maximum roots of nth order polynomials 05 p0707 A66-14624

Absolute stability of multiply connected pulse systems containing linear continuous portion, pulse elements in phase and nonlinear elements with time dependent characteristics 05 p0658 A66-15331

Stability of linear stochastic distributed parameter dynamical systems by differential integral equations [ASME PAPER 65-WA/APM-12] 05 p0717 A66-15434

Sufficient condition for existence of admissible control for optimization systems [ASME PAPER 65-WA/AUT-12] 05 p0710 A66-15607

Transfer function identification of linear time-varying system with input and output signals available in sampled data form [ASME PAPER 65-WA/AUT-16] 05 p0659 A66-15620

Output moments of linear system determined in terms of corresponding moments of input and input-output relationship of average correlations and spectra, defining nonstationary processes 06 p0902 A66-16188

Maximization of output voltage of linear time-invariant system noting effect of input admittance, assuming input pulse is equal to zero 06 p0860 A66-16190

Vector equation  $F/X/$  equals zero solved

by transforming nonlinear algebraic equation into nonlinear differential equation 06 p0865 A66-16746

Linear system impulse response approximation, determining time-scaling factor via orthonormal Laguerre functions 06 p0866 A66-16748

Least squares technique for identification of linear time-invariant plant in sampled data system corrupted by additive noise 06 p0866 A66-16750

Optimal control of distributed parameter systems governed by systems of linear partial differential equations 06 p0866 A66-16964

Linear time-invariant systems, noting relation between transient response duration and differential equation coefficients 06 p0867 A66-16990

Criterion of nonrigorous hyperbolicity for equation system with nondiagonal quasi-linear partial derivatives after putting system in diagonal quasi-linear form for relativistic MHD 06 p0921 A66-17058

Complete resolution of concentrated load of limiting contour, determining spectrum of functional linear operator attached to interior region 06 p0967 A66-17061

Optimum transient response of linear systems with rational transfer functions 07 p1013 A66-17402

Optimal program control for minimization of finite state vector norm of linear system with two types of sets of permissible controls 07 p1013 A66-17425

Correlation matrix of natural thermal noise put forward for arbitrary passive linear system described by Lagrange equations and thermal equilibrium 07 p1013 A66-17431

Amplitude modulated carrier frequency signal circuit analyzed, showing open loop linear pulse system 07 p1014 A66-17439

Linear vibratory system response to random impulses, describing nonstationary white noise and mean square resonance 07 p1143 A66-17731

Resolving matrix of normal system of ordinary linear differential equations in complex independent variable for multiply connected fields 07 p1057 A66-17835

Stationary queue length Poisson distribution in single channel service system, considering reliability of device 07 p1003 A66-17862

Existence of logarithm for nonsingular square matrix, uniqueness for linear ordinary differential equation systems, logarithms of operators and spectral mapping 07 p1058 A66-17966

Characteristics of pulsed wave at output of linear system with pulsed rectangular wave input 07 p1016 A66-18071

Existence and uniqueness of piecewise-continuous solution to two-dimensional linear first order hyperbolic system with discontinuous coefficients 07 p1060 A66-18100

Asymptotic stability of periodic solutions of nonautonomous quasi-linear systems with two degrees of freedom 07 p1016 A66-18187

General performance indices for time and frequency response for free motion of linear discrete control systems 07 p1016 A66-18280

Distortions of linear system reactions with change in amplitude-frequency and phase-frequency characteristics 08 p1183 A66-19102

Root hodograph method for determining amplitude and phase frequency characteristics of dynamic linear systems 08 p1202 A66-19692

Partial-fraction expansion of transfer matrix, using Lagrange interpolation formula 08 p1246 A66-19738

Dynamic programming in linear vector system and application in switching system 09 p1393 A66-19909

Linear system induced amplitude-frequency and phase-frequency distortions 09 p1361 A66-20296

Weighting function and frequency response determination of linear system with N degrees of freedom, using convergent series solution 09 p1396 A66-20636

Necessary and sufficient condition for matrix distribution to have positive-real Laplace transform 09 p1396 A66-20641

Stability of characteristic indices of limiting solutions of linear

systems 10 p1549 A66-21236

Nonresonant solid state magnetic, semiconductor and dielectric devices, noting operation characteristics, control parameters, etc 10 p1509 A66-21418

Equations of linear automatic control systems decomposed asymptotically 10 p1518 A66-21979

Dynamic characteristics of linear plant determined under noise conditions, allowing for error in input-signal measurement 11 p1673 A66-22202

Stability of linear time-lag systems with stochastic parameters examined, deriving sufficient condition for asymptotic stability 11 p1674 A66-22224

Optimum control in nonlinear automatic control systems and linear systems with distributed parameters 11 p1674 A66-22352

Synthesis of time-optimal control for third-order linear discrete objects 11 p1676 A66-22754

Accuracy and optimality of estimates of discrete pulse transfer function of linear unsteady plant 11 p1677 A66-22758

Model of spectrotron with external feedback in dynamic behavior analysis, considering control pulse and transient process 11 p1677 A66-22761

Amplitude calculation of forced mass vibrations in damped linear mechanical system from column matrices of oscillation modes of eigenfrequencies 11 p1783 A66-23018

Linear quadrupoles, wave and operating parameters, transfer loss and phase coefficient for mismatched network 11 p1677 A66-23063

Linear system dynamics, discussing time function vector space, spectral coefficients, orthonormal and transfer functions, parameter variation, Fourier approximation, etc 11 p1679 A66-23269

Automata theory and control theory analytically compared for general and linear systems and tolerance 11 p1680 A66-23275

Existence and uniqueness of minimum effort control for wide class of effort functions, using generalization of Neustadt problem 11 p1681 A66-23424

Complete controllability of particular plant 11 p1682 A66-23455

Circuit theory reciprocity theorem for dynamic linear systems with gyroscopic coupling for steady state response 12 p1912 A66-23611

Response of logarithmic frequency characteristics of dynamic linear systems to small parameter variations 12 p1848 A66-23780

Stability of linear stochastic distributed parameter dynamical systems by differential integral equations [ASME PAPER 65-WA/APM-12] 12 p1914 A66-23989

Statistical probability problems of optimal control of linear systems 12 p1848 A66-24016

Existence of explicit stable difference scheme in correct Cauchy problem for linear systems of partial differential equations with constant coefficients 12 p1903 A66-24023

Properties helping design of linear sampled data systems containing periodically time-varying components like parametric amplifiers 12 p1848 A66-24139

Linear distributed parameter systems with bounded input in minimization of difference between desired response and obtainable response 12 p1849 A66-24251

Invariant hyperplanes for linear dynamical systems, discussing geometric properties and relation to controllability and observability 12 p1849 A66-24256

Optimal control and stability for stochastic systems, viewing linear diffusion models based upon Gaussian-Markov process as finite dimensional linear system driven by white noise 12 p1854 A66-24637

Absolute and relative stability of linear control systems containing transport or distributed lag 12 p1855 A66-24643

Response to multiple random excitation of system with multiple degrees of freedom, connecting spectral density matrix of generalized coordinates with corresponding generalized forces 12 p1972 A66-25004

Noise factor of linear receiving systems in

quantum and classical regions, noting role of dual push-pull amplifier and frequency converter 13 p2020 A66-25226

Matrix solution of limit problems of linear system of ordinary differential equations 13 p2117 A66-25414

Functional analysis demonstrating existence and uniqueness of displacement field, providing solution for linear viscoelasticity problem for medium having behavior satisfying coercivity condition 13 p2195 A66-25463

Linear power amplification with switching techniques, using pulse width modulation 13 p2036 A66-25522

Mathematical methods for examining stability of linear and nonlinear systems, with survey of stability criteria 13 p2118 A66-25581

Asymptotically stable linear system controlled by scalar random input 13 p2048 A66-25849

Dynamic programming for stochastic systems applied in designing controller for transferring linear system from initial to final position in specified time interval 13 p2048 A66-25852

Control system design, analyzing sensitivity of system performance to parameter variations by obtaining time domain measure of sensitivity 13 p2050 A66-26062

Optimum control of linear systems in presence of random disturbances, noting choice between cost design and cost variance methods 13 p2051 A66-26066

Components of gradient of performance criterion in adaptive control systems, employing correlation technique by use of time delay 13 p2051 A66-26067

Multiparameter sensitivity matrix analysis of linear feedback multiloop systems 13 p2053 A66-26082

State-variable feedback decoupling of multivariable linear plants with cross coupling between various input-output pairs 13 p2053 A66-26083

Markov parametric algorithm for effective construction of minimal realizations of linear state-variable finite-dimensional dynamical systems from input-output data 13 p2053 A66-26084

Satisfaction approach to synthesis and control of linear systems 13 p2055 A66-26097

Stability limits of linear system of k-th-order with periodic coefficients 13 p2055 A66-26340

Approximating probability characteristics of mismatch for steady mode of operation of astatic servosystem with modulation 13 p2056 A66-26480

Lagrange equation approach to linear aeroelasticity in modern aircraft from structural and aerodynamic data 13 p1997 A66-26696

Effect of relay response time on dynamic properties of automatic system incorporating linear group and relay element with pure delay 14 p2264 A66-27358

Restrictions placed on transfer function of linear system with input and output coordinates in presence of given plant in control loop 14 p2265 A66-27522

Stability of nonlinear control systems, noting Hermitian matrix for linear system of ordinary differential equations and analogous problem for difference equations 15 p2525 A66-28513

Mean square asymptotic stability of linear system described by nth order equation with random coefficients 15 p2537 A66-28964

Letov problem and analytical construction of optimal controller from motion equations of linear servosystem 15 p2469 A66-29045

Stability of variable-structure control systems, noting two-stage motion in linear system stabilization and image point impingement on switching surface 15 p2471 A66-29161

Destabilization of linear system with N degrees of freedom without damping subjected to nonconservative forces 15 p2609 A66-29251

State variable determination for linear time invariant plants with known parameters, noting noise suppressing characteristics of technique 15 p2471 A66-29329

Absolute stability of multiply connected

pulse systems containing linear continuous portion, pulse elements in phase and nonlinear elements with time-dependent characteristics 15 p2475 A66-29976

Optimization of linear control systems when placing step limitations on control, using functional analysis 16 p2668 A66-30751

Synthesis problem of optimum dynamic characteristics of multivariate linear control systems with random input signals 16 p2668 A66-30752

Cause and effect interdependence in linear system, noting distribution theory and double Laplace transform 16 p2670 A66-31024

Analytical design method for synthesis of feedback controller for multivariable linear control systems, considering transfer function 16 p2671 A66-31111

Pole-zero method to determine frequency response of second-order linear control systems with phase-advance signal shaping 16 p2671 A66-31157

Tabulated data method for synthesizing third order linear transfer functions, using chain of inverted L-sections of passive resistor-capacitor elements in conjunction with single operational amplifier 16 p2671 A66-31203

Simulation of fourth order type I linear system, using one-operational amplifier and two-terminal network consisting of four resistors and four capacitors 16 p2672 A66-31385

Linear system damping while using minimum control intensity treated as functional analysis problem 16 p2672 A66-31504

Periodic and quasi-periodic solutions to differential equations describing pulsed systems 16 p2738 A66-31709

Maximum increase in system error due to computer round-off errors for closed loop linear sampled data system 17 p2900 A66-32075

Variation of mean square error of linear system with time, applying parameter perturbation process to random or deterministic input 17 p2901 A66-32289

Dynamic programming applied to synthesis of linear optimal or suboptimal multivariable control systems in which control-signal vector depends only on certain prescribed state variables 17 p2901 A66-32291

Sequential linear estimation when measurement function is nonlinear, not considering system dynamics, applied to space trajectories 17 p2946 A66-32456

Stability analysis of linear dynamic system in form of rigid straight shaft having several stable mathematical pendulums 17 p2958 A66-32607

Viscoelastic contact problem for linear materials and quadratic surfaces of bodies [ASME PAPER 65-APMW-36] 18 p3249 A66-33589

Necessary and sufficient conditions for existence of classical normal and quasi-normal modes in damped linear dynamic systems [ASME PAPER 65-WA/APM-25] 18 p3134 A66-33592

Reduction of Gilchrist two-equation set for free oscillations in conservative quasi-linear systems with two degrees of freedom 18 p3134 A66-33602

Sensitivity of eigenvalue to changes in matrix, noting development of computational formula 18 p3127 A66-34077

Exact evaluation of responses of feedback control system with time delay to deterministic input 18 p3090 A66-34081

Piecewise linear system modeling via topological techniques, using flowgraph method for network synthesis 18 p3090 A66-34247

Linear system induced amplitude-frequency and phase-frequency distortions 18 p3091 A66-34959

Equivalent systems with identical accuracy at fixed moment of time through transfer function of steady state correcting device 18 p3091 A66-34988

Plotting of radius of controllability sphere for linear dynamic systems bounded with respect to control actions and having fixed time of motion 18 p3092 A66-35005

Plotting in phase space controllability region for unstable linear system of

differential equations 18 p3092 A66-35006

Transient and steady state responses of linear systems under oscillation and PAM 19 p3303 A66-35834

Equations of linear automatic control systems decomposed asymptotically 19 p3324 A66-35857

Optimal control of time-varying linear systems subject to additive noises and load disturbances, based on exact plant equations 19 p3325 A66-35877

Iterative solutions to high-speed actions, noting reduction to successive problems of maximization of linear form from finite state 19 p3325 A66-35931

Monotonic stability of motion for neutral linear solution 19 p3400 A66-35932

Sensitivity points method for linear systems based on structural interpretation of logarithmic sensitivity functions, introducing sensitivity dipole 19 p3327 A66-36015

Synthesis of automatic control systems for linear plants with variable parameters satisfying specified performance criteria 19 p3328 A66-36024

Stability of characteristic indices of limiting solutions of linear systems 19 p3389 A66-36183

Stability and sensitivity of terminal linear feedback control systems 19 p3334 A66-36668

Gain specification of linear controller for large launch booster, using new application of linear control theory 19 p3471 A66-36687

Rigid body rotational attitude control in three dimensions with linear transformation as output variable, noting advantages, applications and results 19 p3471 A66-36693

Linear optimal control in systems with uncertain parameters, noting application to design of compensating network for flexible booster for uncertain value of first bending mode 19 p3471 A66-36696

Rapid parameter identification system for linear time-invariant plant with only input and output measurable 19 p3336 A66-36709

Design synthesis of adaptive control system for linear discrete plants with time varying parameters, noisy measurements and statistical and deterministic disturbances 19 p3337 A66-36711

Optimization criterion capable of simultaneously considering different performance aspects applied to linear second-order control system with acceleration, velocity and displacement feedback loops 19 p3337 A66-36714

Sequential estimation on states of linear systems disturbed by white noise, determining relations between covariance matrices 19 p3338 A66-36736

Horowitz root-locus compensation method extended to analysis and design of high-gain linear control systems with variable coefficients 19 p3338 A66-36741

Forced modes of automatic continuous system with linear controlled plant with variable dynamic properties and learning model self-adjusted by search modulation 20 p3536 A66-36878

Linear system with given structure identified from measured input and output time histories of frequency responses including curve-fitting, equation of motion and set of equations of motion methods 20 p3537 A66-36885

Optimum transformation of linear system with minimal rms error from given point to fixed delta-environment of another given point 20 p3537 A66-36890

Equivalent transfer function of linear two-channel system of automatic control, discussing system stability dependence on cross links 20 p3537 A66-36891

Transient processes in linear automatic control systems dependent on parameters which appear when differential equations of analyzing system are transformed by Laplace-Karson method 20 p3537 A66-36892

Optimal control analysis of system behavior described by linear stochastic differential equations 20 p3537 A66-36893

Indirect testing of dynamic systems involving maximum measure of parameter values from minimum test points, noting dependency of error propagation on system structure 20 p3521 A66-37210

Linear system providing maximum signal

to noise ratio for given parameters of correlation function of incoming quasi-harmonic signal mixed with white noise 20 p3515 A66-37379

Plane linearly polarized electromagnetic wave diffraction on several spheres forming linear system, showing solution of boundary value problems 20 p3603 A66-37754

Group theory of invariance of finite linear state-variable transformations generating new linear dynamic system and application to electric network 20 p3539 A66-38147

Linear elliptic partial differential systems, eigenvalue and boundary value problems - Johns Hopkins University, Lectures, March-May 1965 21 p3754 A66-38457

Interior regularity theorem for linear elliptic matrix differential operator 21 p3754 A66-38459

Optimal control problem for linear systems with phase constraints 21 p3717 A66-38540

Equations of transient motion of linear systems solving methods including analytical, progressive and shock-spectra for application to aircraft, packaging, etc 21 p3824 A66-38572

Dynamic instability in linear vibrating system when linked to unlimited energy reservoir 21 p3825 A66-38577

Free vibration of composite system analyzed, using Rayleigh-Ritz method 21 p3825 A66-38583

Feedback control system behavior, examining influence of values of structural parameters and variations in domain of complex variable 21 p3718 A66-38806

Eigenvalue problems with monotonic operators and error estimation for operator equations with continuous homogeneous operators in semiordeered normalized vector space 21 p3757 A66-38942

Movchan theorem for stability of continuous systems, considering example of vibrating string and derivation of stability criterion for nonlinear elasticity 22 p3990 A66-40134

Decomposition of system of linear differential equations, using asymptotic techniques of Krylov and Bogolubov 22 p3940 A66-40459

Development of family of standard polynomials with adjustable damping, noting first- and second-degree numerators 22 p3884 A66-40514

Reduction principle applied to nominal stability, determining perturbation function for case where equations of perturbed motion are autonomous and characteristic equation of linear system has double zero root 22 p3941 A66-40796

Stability of trivial solution to system of linear differential equation with distributed delay, determining majorant of solutions to Cauchy problems 22 p3941 A66-40797

Analytical design of controllers for linear autonomous systems of arbitrary order 23 p4048 A66-40969

Sufficient conditions for linear time optimal control system on compact real intervals in Euclidean n space 23 p4049 A66-41536

Bang-bang principle in problem of epsilon-stabilization of linear control systems extended to systems of arbitrary dimension 23 p4051 A66-41874

Inequality, derived from entropy law, for irreversible processes of nonequilibrium thermodynamics, with attention to viscoelastic materials 24 p4293 A66-42136

Rotor instability factors, noting difficulty of applying linear theory to actual damping forces in rotor 24 p4287 A66-42269

Asymptotic stability of linear systems, using matrix analysis 24 p4187 A66-42375

Analytical method based on Taylor series to substitute linear control system for nonlinear control system 24 p4188 A66-42482

Optimal control problem formulated for linear constant-coefficient system subjected to class of amplitude bounded load disturbances 24 p4189 A66-43205

## LINEAR TRANSFORMATION

Transformation of equivalent nth order linear differential equations 03 p0388 A66-13154

Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 06 p0862 A66-16522

Pulse compression by dispersive gratings on crystal quartz, describing ultrasonic method and wave transformation of frequency-swept radar 06 p0857 A66-16958

Linear and antilinear transformations for real and complex Hilbert space 07 p1058 A66-17963

Rapidly convergent iterative unique determination of linear steering function for desired orbit conditions 08 p1289 A66-18826

Linear perturbation theory computation of target errors in lunar impact trajectories due to random injection 08 p1289 A66-18828

Optimization of high resolution radar based on mathematical results regarding linear transformation of signals and ambiguity functions 12 p1819 A66-24601

EPr and normal EPr matrices, noting linear transformation on vector space 14 p2320 A66-27113

Minimum effort control problem in rotund reflexive Banach space and extension to Hilbert space under bounded linear transformation 14 p2266 A66-27631

Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 16 p2670 A66-30832

Group theory of invariance of finite linear state-variable transformations generating new linear dynamic system and application to electric network 20 p3539 A66-38147

Matrix displacement method applied to anisotropic plate and shell theory, including parallelogram and triangular configurations under bending, membrane forces and shear strains 21 p3831 A66-39352

Piecewise linear transformations to simplify multiple threshold rules in statistical decision theory of pattern recognition systems 23 p4040 A66-41595

**LINEAR VIBRATION**

Progress in mechanics of linear vibrations - Symposium, Paris, April 1965 21 p3823 A66-38560

Recent progress of mechanics of linear vibrations - Symposium, Paris, April 1965 21 p3824 A66-38571

Mechanics of linear vibrations - Symposium, Paris, April 1965 21 p3824 A66-38576

Dynamic instability in linear vibrating system when linked to unlimited energy reservoir 21 p3825 A66-38577

Shell immersion in moving fluid under vibrations which can be damped or amplified, analyzing instability due to fluid constituting energy reservoir 21 p3825 A66-38578

Haag general synchronization theory for oscillating systems with one degree of freedom applied to boundary value problems for multivibrating systems 21 p3774 A66-39607

**LINEARITY**

SA NONLINEARITY

Linearity, stress, strain, time and birefringence relations in plastic model materials, using Hooke law 20 p3668 A66-37498

**LINEARIZATION**

SA BERNOULLI EQUATION

Quasi-linearization used to determine orbits from observational data such as angular data, range and range rate 02 p0288 A66-11547

Quantum theory for noise in steady state of laser oscillator above threshold, comparing semiclassical and quantized linear theories 13 p2091 A66-25650

Differential approximation linearization technique compared with Galerkin method 16 p2732 A66-30265

Distribution function, harmonic and statistical linearization methods applied to study forced oscillations in nonlinear oscillatory system 17 p2959 A66-32801

Motion equations for large-amplitude transverse vibrations of tensioned string and necessary conditions for linearization 17 p2959 A66-33033

Ignition conditions determined based on linearization of initial nonlinear equations 19 p3477 A66-35742

Suboptimal adjoint-vector control theory for linearization of feedback control systems

independent of nominal trajectory 20 p3535 A66-36849

Approximate method of integrating linearized equation for laminar boundary layer to establish relations of velocity distribution with friction stress 20 p3546 A66-37679

Comparison variables transformation of linearized perturbation initial value problems for nonlinear ordinary first-order differential equation 21 p3756 A66-38817

**LING-TEMCO-VOUGHT MILITARY AIRCRAFT**

S A-7 AIRCRAFT

S F-8 AIRCRAFT

**LINK**

SA CROSS LINKING

SA DATA LINK

Jump conditions at point of contact for corresponding cases of sliding and rolling contact in plane motion 21 p3769 A66-38476

Graph theory and enumeration of basic kinematic chains and mechanisms 23 p4097 A66-41978

**LIOUVILLE EQUATION**

Structural classification of global master equation by means of projector operator formalism 01 p0105 A66-10320

Kinetic processes in simple plasma, using linear Liouville equation for N-body particle distribution and expanding solution as power series 05 p0727 A66-15259

Equations of motion of turbulent gas and formulation of simple model of turbulence from classical Liouville equation and aerodynamics of rarefied gas 06 p0802 A66-16537

Solution to Liouville equation, obtaining expression for singlet distribution function for system under arbitrary perturbation from equilibrium, leading to solution of linear Boltzmann equation 06 p0912 A66-16633

Couette flow, Neumann-Liouville series expansion convergence for various flow regimes and related Fredholm integral equation solutions 07 p1020 A66-17964

Two-time probability distribution function, autocorrelation function, Liouville equation and fluctuation theory of plasma kinetics 13 p2156 A66-26885

Equations of motion of turbulent gas and formulation of simple model of turbulence from classical Liouville equation and aerodynamics of rarefied gas 15 p2482 A66-29973

**LIOUVILLE THEOREM**

Transformation of error ellipsoid in motion of material point, with selection of invariant parameters 06 p0954 A66-16423

Statistical analysis of ray oscillation suppression in light waveguide, using Liouville theorem 16 p2746 A66-30596

**LIPID**

SA FATTY ACID

Ion exchange in phospholipid monomolecular films 12 p1805 A66-23917

Sulfur compounds analysis in lipid extracts from Orgueil meteorite support concept of low temperature environment on parent body and differ from petroleum 20 p3648 A66-37304

**LIPID METABOLISM**

Mechanism of in vivo rbc damage by oxygen, noting effect on canine erythrocytes 03 p0326 A66-13348

Nature of particles involved in lipid synthesis in yeast 06 p0822 A66-16566

Cytoplasmic alterations and fat vacuole formation in pneumocytes of guinea pigs exposed to severe hypoxia in low pressure chamber 08 p1175 A66-18769

Effects of alpha glycerophosphate and of palmitoyl-coenzyme A on lipid synthesis in yeast extracts 15 p2429 A66-28616

High oxygen at reduced pressure effect on metabolism of radioactive acetate in rats 15 p2430 A66-28658

Acceleration stress-induced changes in fat metabolism, level of circulating glucose and corticosterone level in rats 15 p2431 A66-28868

Lysosomal enzymes in rats exposed to 100 percent oxygen to determine possibility of accelerated in vivo lipid peroxidation 17 p2857 A66-32169

**LIPSCHITZ CONDITION**

First order nonlinear partial differential

equation discussing global locally-Lipschitzian solutions via Jacoby theorem extension 06 p0901 A66-16006

Uniform structure for Lipschitz condition on functions between sets, extensions to nonmetric spaces and fixed point theorem for uniform spaces 07 p1059 A66-17969

Existence and uniqueness theorems for invariant-imbedding nonlinear ODE systems for absorption loss rate satisfying Lipschitz condition 07 p1059 A66-17972

General convergence theorem for gradient method of minimizing functions with Lipschitz continuous first partial derivatives, noting role of steepest descent algorithms 11 p1724 A66-23402

Sufficient conditions for optimal stochastic control of diffusion processes governed by vector equations satisfying local Lipschitz conditions 11 p1682 A66-23459

Quasi-linear boundary value problems solved with Galerkin convergence method 12 p1902 A66-23863

Optimal control for stochastic differential equation system, noting existence and uniqueness of solution for coefficients satisfying Lipschitz condition 19 p3325 A66-35983

**LIQUID**

SA ORGANIC LIQUID

Liquids used in manometers for pressure and pressure difference measurement in rarefied gases, considering cadmium boron tungstate, polymethylsiloxanes, etc, noting lack of toxicity, low viscosity, etc 03 p0371 A66-13204

Itinerant oscillator model of liquids covering classical velocity autocorrelation function of atom and neutron scattering experiments 04 p0547 A66-13809

Book on kinetic theory of simple liquids including equilibrium properties, time-dependent system, Markov processes, Brownian motion, transport coefficients, etc 08 p1209 A66-19463

Specific heat of liquids with constant volume determined, using pycnometer cell, obtaining formula for specific heat in terms of measurable thermal parameters 13 p2077 A66-25354

Nonlinear optical polarization of gases and liquids, stressing second degree contribution in macroscopic electric field 13 p2132 A66-26147

Angular emission properties of stimulated Raman radiation from liquids, noting two classes of radiation 13 p2097 A66-26159

Multiple stimulated Brillouin emission exhibited by liquids exposed to pulsed ruby laser, noting scattering events, Stokes orders identification and iteration mechanism 13 p2097 A66-26164

Complex dielectric constants of lossy liquids measured by transmission measurements in X-band waveguide 13 p2082 A66-26342

Liquid phase compression in closed cycle gas turbine by using particular working fluids for application to nuclear power stations [ASME PAPER 66-GT-111] 14 p2411 A66-27005

Variational principle for steady flows of ideal liquid and sufficient conditions for nonlinear stability under finite perturbations 17 p2913 A66-33168

**LIQUID AMMONIA**

Organic and liquid ammonia electrolyte systems in combination with active anode materials to achieve high energy output battery system [AIAA PAPER 64-750] 13 p2007 A66-26651

**LIQUID ATOMIZATION**

Mathematical models to explain parametric dependence of specific charge of liquid droplets produced by electrical spraying through metallic capillary at high potential [AIAA PAPER 66-252] 10 p1522 A66-21458

Vaporization and atomization theoretically calculated to be controlling parts of combustion process in determining rocket combustion instability [AICE PREPRINT 28D] 22 p3971 A66-39879

Combustion of atomized liquid fuels, noting optimum value of atomization fineness affecting completeness of combustion 24 p4293 A66-42208

## LIQUID BREATHING

Liquid breathing effects on dogs in hyperbaric chamber 21 p3699 A66-38447

## LIQUID COOLING

Liquid cooling of thin film resistors including use of nucleate boiling 02 p2023 A66-11921

Liquid cooling on semiconductor devices noting natural convection, nucleated boiling, forced convection and forced convection with boiling 02 p2023 A66-11922

Apollo space suit design discussing construction, purpose and operating conditions of liquid-cooled life support system 03 p0328 A66-12631

Heat pipe performance, emphasizing heat carrying and waste heat dissipation functions, construction and materials testing 05 p0616 A66-15543

Heat pipe characteristics covering performance analysis and experimental results such as heat transfer rate, life tests, working liquid selection, etc 05 p0616 A66-15544

Direct-immersion liquid cooling of modularized microelectronic systems on system-wide basis 06 p0841 A66-15973

High power phase shifter for phased array systems, using temperature compensated garnet along with dielectric liquid cooling technique 07 p1007 A66-17507

Saturated vapor spherical bubble collapse in uniformly subcooled liquids 08 p1320 A66-19559

Design and application of dry, dielectric and water-cooled dummy loads 12 p1829 A66-23537

High field liquid-neon-cooled superconducting electromagnet for cryogenic solid state research 20 p3601 A66-37106

Water-circulation-cooled space suit, discussing heat dissipation mechanism, body temperature maintenance, metabolic rates, astronaut comfort, etc 20 p3509 A66-38164

One-dimensional heat flow equation for liquid nitrogen end-cooled ruby laser rod 20 p3581 A66-38386

## LIQUID DROP

Thermal radiation absorption by droplet or spray during ignition and combustion of atomized liquid fuels 01 p0164 A66-10899

Electrohydrostatic boundary equations solving two- and three-dimensional axisymmetric situation and sessile drop problem 04 p0545 A66-13808

Fuel drop ignition, discussing parametric extension of quasi-flame surface theory to higher reaction orders and arbitrary stoichiometric ratios [AIAA PAPER 66-70] 06 p0970 A66-16415

Mass and momentum transfer between droplets and turbulent medium in which they move 06 p0972 A66-16896

Flow separation, wake configuration and droplet motion in purified systems shadowgraphically analyzed 10 p1524 A66-21808

Quasi-steady spherically symmetric burning of monopropellant liquid droplet in stagnant atmosphere 14 p2412 A66-27560

Cavity depth for waterdrop impacts against water, discussing apparatus, equation for cavity depth, effect of gravitational potential energy, liquid surface behavior, etc 15 p2477 A66-28716

Convective diffusion of material from single drop moving in liquid medium at low Reynolds numbers, using quasi-stationary approximation 16 p2689 A66-31516

Liquid water and nitrogen drops vibrating in natural frequencies above hot plate on vapor cushion analyzed by photographic techniques and used to simulate atomic nuclei fission 18 p3262 A66-34377

Homogeneous nucleation of liquid drops in supersaturated vapors, noting kinetic treatment for heating of growing clusters and irreversible thermodynamics of nonisothermal nucleation 19 p3477 A66-35566

Freezing of supercooled water drops to determine dependence of heterogeneous nucleation on temperature and on duration of supercooling 19 p3394 A66-36384

Chemical etch pitting techniques, determining dislocations in crystal structure caused by liquid droplet impacts, calculating stress distribution due to collision 20 p3547 A66-37806

Solids erosion by repeated liquid impact at relatively low velocities to determine impact pressure and load 20 p3586 A66-37807

distribution Reaction rates of decomposition burning of small spheres of liquid 20 p3626 A66-38043

hydrazine Distance/time records, drag coefficients and Reynolds numbers of single freely-falling drops of pentane, heptane and benzene burning in cold atmosphere 20 p3626 A66-38044

Cloud and fog droplet spectra rearrangement due to external conditions calculated from distribution function of water content 20 p3594 A66-38374

Charge transfer between water drops relevance to radiation problem and efficiency of conversion of electrostatic to electromagnetic energy 22 p3942 A66-39679

Aerodynamic breakup of liquid drops in flow behind plane shock wave analyzed via high speed photography, noting experimental setup, parameter variation, etc 22 p3899 A66-40198

Liquid drop flow in twisted fan-shaped nonisothermic jet allowing change in viscosity coefficient in flow field, using boundary layer equations 23 p4055 A66-41567

Drop bursting by surface forces such as electric fields and fluid environments with larger viscosity 23 p4060 A66-42018

Atomization of water drops by high speed airstreams, noting dependency on time 23 p4016 A66-42053

## LIQUID-FILLED SHELL

Unsteady motion of rotating fluid in cavity neglecting viscous dissipation 01 p0058 A66-10485

Temperature distribution and thermal stresses in liquid-filled cylindrical shell 07 p1143 A66-17397

Pressure wave propagation velocity in horizontal liquid-filled flexible tubes 07 p1146 A66-18277

Approximation method of calculating axisymmetric oscillations of shells of revolution filled with liquid 08 p1308 A66-18891

Small axisymmetric oscillations of fluid inside elastic cylindrical shell with elastic bottom determined by reducing problem to internal Neumann problem for circular cylinder 09 p1368 A66-20756

Oscillations of cylindrical shell filled with incompressible fluid of variable depth 10 p1614 A66-21328

Asymptotic solution to motion of solid containing cylindrical or spherical cavities filled with viscous liquid 12 p1863 A66-24356

Small oscillations of pendulum with spherical cavity filled with viscous incompressible liquid 12 p1882 A66-24357

Lagrange equations of motion for solid body with liquid-filled cavities derived, using Hamilton-Ostrogradskii principle of least action 13 p2127 A66-25628

Axially symmetric oscillations of elastic spherical shell partially filled with liquid, considering shell as joined hemispheres with or without same thickness 14 p2400 A66-27682

Spin angular velocity stability of gyroscope with incompressible fluid-filled cavity as function of three degrees of freedom 14 p2277 A66-28051

Parametric oscillations of cylindrical shell filled with liquid of variable depth 15 p2607 A66-28768

Steady and unsteady perturbed motion effect on solid body containing cavity filled with liquid in analyzing dynamic stability of mechanical systems 15 p2539 A66-29152

Liapunov methods of studying motion stability of solid bodies with liquid-filled cavities 15 p2539 A66-29155

Theoretical and experimental analysis of Korotkoff sounds at diastole which are interpreted as dynamic instability induced by application of pressure cuff 19 p3286 A66-36431

Liquid instability of vibrating partially filled elastic tank, emphasizing resonant breathing mode and frequency response 20 p3672 A66-38153

Monograph on dynamics of body with liquid-filled cavities associated with practical problems of rocket technology such as

seismic stability of liquid propellant tank 21 p3831 A66-39287

Nonlinear methods to describe stability motion of solids with liquid-filled cavities 23 p4059 A66-41982

## LIQUID FLOW

### SA WATER FLOW

Rheology of liquids discussing viscometers, models for prediction and industrial and biological application 03 p0355 A66-12601

Flow of non-Newtonian liquids in cylindrical pipes containing cylindrical parallel cores moving longitudinally at constant speed 03 p0358 A66-13099

Wave flow of thinly layered fluid on vertical plane, noting fluid-gas interface stress 04 p0510 A66-13821

Liquid-phase viscosity effect on disruption of hydrodynamic stability of bubble boiling in large liquid volume 04 p0599 A66-14441

Approximation method of calculating axisymmetric oscillations of shells of revolution filled with liquid 08 p1308 A66-18891

Hydrodynamic problem of nonviscous liquid flow past two spheres solved, using new method of solution 10 p1525 A66-21919

Expansion parameters of liquids expelled into vacuum as related to orbital perturbations arising from liquid venting and impingement on adjacent hardware 10 p1481 A66-21947

Visualization technique for solving three-dimensional liquid flow problems, using small particles suspended in and moving with liquid 11 p1682 A66-22206

Coaxial capacitor for measuring density of fluids in both liquid and gaseous phase over wide range of temperatures and pressures 11 p1707 A66-22961

Stability of vertical water jet examined by imposing audiofrequency disturbances 13 p2060 A66-25133

Taylor-Helmholtz instability between liquid of constant shear and vacuum 13 p2068 A66-26682

Mechanics of contained fluids in subgravity 14 p2275 A66-27558

Pressure in sealing groove and increase time due to pumping action of moving wall applied to force cylinder of translational motion, considering liquid in groove laminar 14 p2225 A66-27688

Liquid flow with viscosity changing under effect of nonisothermicity 15 p2478 A66-29222

Motion of non-Newtonian liquid through two coaxial curved pipes, noting relation between pressure gradient and outflow rate, curvature effect and secondary flow 15 p2479 A66-29397

Fringing effect on sensitivity of magnetic flow meter 17 p2926 A66-32874

Gravitational stability of laminar liquid layer flowing down inclined plane and heated from below 17 p2914 A66-33172

Differential equation system describing nonsteady state motion of liquid in open channel 18 p3097 A66-33932

Book on mechanics of liquids and gases 18 p3102 A66-34731

Velocity profile measurements in turbulent liquid jets via photography, noting calculation of flow turbulence characteristics 18 p3114 A66-34894

High strain rate deformation of solids under liquid impact examined via photographic methods 20 p3588 A66-37802

Outflow of liquid from cylindrical tank through central outlet for cases where effect of gravity is small, noting distortion of liquid surface [AICE PREPRINT 17D] 22 p3897 A66-39885

Marangoni flow, motion of liquid surfaces under influence of surface tension gradients, explaining high fluxes obtained in boiling heat transfer 22 p3999 A66-40303

Steady liquid flow between rotating coaxial cylinders with arbitrary dependence of viscosity on temperature 22 p3902 A66-40814

Viscoelastic properties of liquids under steady flow determined experimentally in frequency range 5-75 mc/s, using internal reflection of pulse of shear wave at surface of fused quartz bar 23 p4066 A66-41159

Approximation method for wall effect in cavitation flow around bodies in water tunnel, examining effect of solid boundary

- on resistance factor 23 p4056 A66-41727
- Instantaneous shear stress at liquid flow boundary, measuring turbulence and velocity fluctuation in close proximity of pipe wall 24 p4194 A66-42415
- Fragmentation of liquid jet in gaseous medium at high velocities 24 p4196 A66-42868
- LIQUID GAS**
- Low temperature physics - International Conference, Columbus, Ohio, August-September 1964 09 p1413 A66-20004
- Viscosity of liquid nitrogen and oxygen measured as function of temperature and pressure 14 p2276 A66-27642
- Sound velocity measurements in liquid argon, liquid oxygen and liquid nitrogen 14 p2336 A66-28276
- Density, viscosity, surface tension, vapor pressure and vapor liquid equilibria data of liquid ozone-fluorine mixtures considered as Newtonian fluids 23 p4119 A66-41244
- LIQUID-GAS MIXTURE**
- Cold neutron scattering by hydrogen in liquid argon, calculating scattering cross section and length for monatomic liquid 04 p0548 A66-13810
- Violent bubble behavior in liquids contained in vertically vibrated tanks caused by water hammer type of resonance [AIAA PAPER 66-86] 06 p0875 A66-17099
- Bubble coalescence in longitudinally vibrated liquid column 07 p1025 A66-18173
- Shock phenomena with mixtures of water and nitrogen in two-phase supersonic tunnel [AIAA PAPER 66-87] 07 p0984 A66-18453
- Liquid-gas coexistence curve shape near critical point, allowing for volume and temperature deviations and for mathematical singularities 08 p1316 A66-18796
- Atomization of liquid-spray particles in Venturi scrubber, investigating acceleration by high-speed photography 08 p1208 A66-19422
- Relationship between shock wave phenomena during collapse of cavitation bubbles in water and temperature and gas content of water 13 p2060 A66-25091
- Violent bubble behavior in liquids contained in vertically vibrated tanks caused by water hammer type of resonance [AIAA PAPER 66-86] 16 p2685 A66-30913
- Relationship between shock wave phenomena during collapse of cavitation bubbles in water and temperature and gas content of water 21 p3723 A66-38516
- LIQUID HELIUM**
- Ultrahigh vacuum chamber with liquid-helium-cooled liner for space environment simulation 08 p1202 A66-18926
- Superfluid basic theory noting Josephson tunneling, liquid helium kinetic theory, quantized vortex lines, etc 09 p1415 A66-20005
- Superfluid hydrodynamics and kinetic theory of superfluids, noting relation of macroscopic concepts of Bardeen-Cooper-Schrieffer theory to microscopic characteristics 09 p1415 A66-20006
- Strong coupling cell theory of liquid helium, noting heat capacity 09 p1391 A66-20011
- Acoustic impedance of liquid He 3 under vapor pressure 09 p1391 A66-20012
- Acoustic impedance of liquid He 3 under pressure of up to 12.5 atm 09 p1391 A66-20013
- Heat capacity measurements of liquid He 3 to improve precision in determination of effective mass ratio 09 p1392 A66-20014
- Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 10 p1525 A66-21965
- Interaction between vortices and solid surface manifested as pulling away of freely suspended disk in rotating liquid helium 2 from suspension head, performing additional rotational motion, determining vortex slip coefficient 12 p1865 A66-24879
- Acoustically induced cavitation in liquid helium analogous to unfiltered air-saturated water 14 p2334 A66-27663
- Effect of temperature changes on flux-jumping behavior of niobium stannide superconducting solenoids in superfluid helium 15 p2560 A66-28686
- Logarithmic decrements of quartz crystal driven in torsional vibration mode at resonant frequency determined as function of temperature in liquid helium 15 p2537 A66-28869
- Text on experimental low temperature physics covering experimental techniques, liquid helium, superconductivity and electronic properties in metals 15 p2566 A66-29320
- Liquid filled electrostatic generation, noting charge transporting and insulating function of liquid helium 17 p2848 A66-31814
- Electrically cryopumped system for liquid helium transfer continuously at low flow rates 20 p3542 A66-37105
- Impurity conduction effect on electron donor recombination cross section in n-type germanium and silicon at liquid helium temperatures 21 p3801 A66-39001
- Characteristics of efficient semiconductor lasers in UV portion of spectrum obtained at both liquid helium and nitrogen temperatures, using pulsed electron beam excitation on ZnS crystals 21 p3747 A66-39114
- Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 21 p3731 A66-39544
- Interaction between vortices and solid surface manifested as pulling away of freely suspended disk in rotating liquid helium 2 from suspension head, performing additional rotational motion, determining vortex slip coefficient 23 p4053 A66-41086
- Integral method derivation of thermoconductivity coefficient of cylindrical semiconductor immersed in liquid He and superheated by Joule heating 24 p4255 A66-42494
- LIQUID HELIUM 2**
- Turbulent effects in liquid He 2 stationary flow 09 p1365 A66-20015
- Damping of small amplitude vibrations of fine wire as probe of onset and development of critical flow phenomena in He 2 at moderate Reynolds numbers 09 p1365 A66-20016
- Vorticity growth when steady heat current is applied to liquid He 2 in narrow tube 09 p1366 A66-20017
- Superfluid critical velocity in He 2 isothermal gravitational flow in narrow channels 09 p1366 A66-20018
- Critical velocities and supercritical velocity dissipation effects in isothermal flow of liquid He 2 in narrow channels 09 p1366 A66-20019
- LIQUID HYDROGEN**
- Materials for use as rolling-contact bearing lubricants in liquid hydrogen environment [ASLE PREPRINT 65-LC-9] 02 p0238 A66-12255
- Liquid hydrogen flow system startup of full scale simulated nuclear rocket engine 03 p0391 A66-12350
- Saturn Launch Vehicle Program technical equipment and engineering techniques for solving structural, propulsion, launch and control problems 06 p0959 A66-16496
- Model simulating energy distribution process /thermal stratification/ within liquid hydrogen stored aboard moving rocket to avoid pump cavitation [AIAA PAPER 64-426] 08 p1279 A66-18809
- Platinum resistance thermometers with interchangeable characteristics for liquid hydrogen measurements, discussing standardization and calibration 08 p1226 A66-19598
- Ultrasonic velocity of compressed fluid hydrogen between 15 and 100 degrees K and in normal and parahydrogen of saturated liquid between 14.5 and 32.2 degrees K 09 p1392 A66-20081
- Liquid hydrogen tank level in space measured by applying known impulse and determining resulting acceleration of container 11 p1706 A66-22957
- Liquid hydrogen flow system performance during startup transient of nuclear rocket measured in full-scale simulated engine system, approximating in-flight exhaust conditions 12 p1911 A66-23699
- Tank design, optimization program and testing for effect on storage penalties associated with liquid hydrogen for hypersonic aircraft 14 p2394 A66-28026
- Impact of propellant heating on nuclear spacecraft insulation and pressurization systems design 18 p3240 A66-33816
- Current status of technology of using liquid hydrogen in manned aircraft systems [AIAA PAPER 66-671] 18 p3162 A66-34443
- Hydrogen pumping by means of phenomenon of hydrogen absorption by solid layer of carbon dioxide condensed at temperature of 20.4-14 degrees K 19 p3400 A66-36099
- Fluid hydrogen slush, discussing advantage of reduced evaporation loss during storage and handling, refrigeration and density 20 p3625 A66-37074
- Heat of fusion and density of solid and slush hydrogen at pressures to about 400 atm 20 p3625 A66-37081
- Nuclear radiation and liquid hydrogen effect on environmental mechanical properties of phenolic asbestos, glass and linen resins 20 p3587 A66-37097
- Childdown rate and equilibrium heat-leak storage loss measurements in liquid hydrogen storage dewars 20 p3541 A66-37101
- Heat exchangers for liquid hydrogen conversion to ambient temperature hydrogen gas, using water heat source 20 p3677 A66-37102
- Heat transfer coefficients over range of Reynolds numbers for solid-vapor mixture of parahydrogen discharge below triple point pressure 20 p3679 A66-37511
- RL10 pump-fed rocket engine modified for fluorine-hydrogen application [ASME PAPER 66-MD-74] 21 p3806 A66-38501
- Heating environment for space vehicle, examining wind and incident radiation effects on heat transfer to liquid hydrogen, insulation surface thermal properties and optimization of insulation system 22 p3986 A66-39777
- Testing for mechanical properties of materials at liquid hydrogen temperatures, noting liquid transfer system and safety regulations [AICE PREPRINT 22B] 22 p3886 A66-39890
- Liquid hydrogen tank insulation constructed of honeycomb core containing polyurethane foam for S-II booster 22 p3997 A66-39892
- Thermal conductivity of formed-plastic composite insulation systems for liquid hydrogen storage tank [AICE PREPRINT 22D] 22 p3997 A66-39893
- LIQUID INJECTION**
- SA FUEL INJECTION**
- Liquid injection thrust vector control noting general requirements, injectant metering point, stream solidity collimators, secondary flow, metering configuration and nozzle back pressure 02 p0180 A66-11972
- Thermodynamic analysis of MHD generator with vapor liquid injector 03 p0323 A66-12831
- Increased heat of ablation and performance of injection cooling by addition of surface active agent [ASME PAPER 65-WA/HT-49] 05 p0792 A66-15660
- Solid propellant rocket engine omniaxis liquid injection thrust vector control system, using function generator in signal-summing feedback loop to control flow in servovalves and increase motor reliability 14 p2226 A66-27700
- Liquid film cooling of small diameter throat tubes 18 p3263 A66-34385
- Vaporization of liquid fuel injected in heated horizontal circular pipe for straight and swirl air flow, noting increased rate of vaporization in swirl airflow for increased heat supply 18 p3265 A66-34490
- Thermodynamic analysis of MHD generator with vapor liquid injector 19 p3282 A66-36773
- Penetration distance for secondary liquid injection into supersonic airstream, emphasizing jet flow far from injection orifice 20 p3548 A66-38151
- Mass transfer and hydrodynamics of gas jet injection into liquid surface, deriving empirical equations for hollow truncated point formed around injection point 21 p3836 A66-38958
- LIQUID LASER**
- Theoretical optical resonator for laser with rare earth liquid solutions as active components 10 p1543 A66-21970

Coupled wave formalism, giving unified description of parametric down conversion of light, stimulated Brillouin and Raman effects, etc, stressing exponential character of gain 13 p2132 A66-26156

Recirculation of liquid through cell and external heat exchanger to solve problem of repeated flashing in europium chelate lasers 21 p3747 A66-39108

Trivalent neodymium in selenium oxychloride, inorganic liquid laser without limitations of europium chelates and matching in threshold and output neodymium-doped crystals 21 p3747 A66-39110

Performance characteristics of room temperature liquid laser, using trivalent ion neodymium-doped selenium oxychloride 21 p3747 A66-39111

Theoretical optical resonator for laser with rare earth liquid solutions as active components 21 p3749 A66-39549

### LIQUID LEVEL

Four major methods of liquid level control in tanks 01 p0069 A66-10866

Cryogenic problems in temperature and level sensing discussing thermocouples, resistance sensors, vapor and gas bulb thermometers and level gauges and probes 01 p0070 A66-10955

Bubble level for sensing local vertical of attitude stabilized satellite 08 p1223 A66-18816

Ultrasonic echo method of level measuring and monitoring in which acoustic pulse is emitted by vertical transducer and reflected from surface of liquid or gas 10 p1535 A66-21337

Oscillation stability criteria for simple surge tank obtained from second method of Liapunov 10 p1523 A66-21497

Liquid hydrogen tank level in space measured by applying known impulse and determining resulting acceleration of container 11 p1706 A66-22957

Method for measuring amount of liquid remaining in tank under near-zero-g conditions based on relation between gas ullage, volume and pressure 13 p2000 A66-25693

Fluid content measurement in storage tanks under zero-g conditions discussing gas law system, trace material, capacitive panel and RF methods 19 p3340 A66-35611

Fluid amplifier application to process control including turbulence amplifiers, logic function performance, etc [ASME PAPER 66-MD-8] 21 p3697 A66-38477

VECO 32A11 thermistor element for temperature and liquid level sensing in hazardous gases such as Freon 12 21 p3740 A66-39388

### LIQUID-LIQUID INTERFACE

#### SA SURFACE TENSION

Velocity distribution in laminar viscous liquid-into-liquid jet 01 p0057 A66-10407

Expansion of plane nonisothermal jet of liquid dropping into space filled with same liquid at different temperature 01 p0059 A66-11019

Surface instabilities discussing stability of movement of nonrigorous planar surface of liquid layer when subjected to motion in direction perpendicular to its face 03 p0354 A66-12537

Acceleration potential method for solving linear problems of wing hydrodynamics above interface between fluids differing in density, for arbitrary Froude number 13 p2067 A66-26530

### LIQUID MERCURY

#### S MERCURY /METAL/

#### LIQUID METAL

#### SA MERCURY /METAL/

Liquid metal embrittlement noting stress and intergranular corrosion, hydrogen embrittlement and behavior of silver chloride crystal 02 p0243 A66-11698

Shaft seals to contain liquid metals in mechanisms exposed to space environment 03 p0374 A66-13108

Electrophoretic motion of dielectric particle determined from flow rate of liquid metals and semiconductors near infinite plane 05 p0733 A66-14688

Transient quenching method of determining critical heat flux and transfer

coefficients in film and nucleate boiling liquid metals, specifically magnesium [ASME PAPER 65-HT-49] 05 p0785 A66-14757

High temperature electromagnetic transducers applied as sensors for physical variables, including mechanical displacement and liquid metal flow and level 05 p0676 A66-14775

Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 05 p0689 A66-15611

Minimum heat transfer levels and vapor formation in boiling liquid metals 06 p0972 A66-16843

Experimental assembly using liquid gallium cycle for testing electromagnetic pumps and flow meters 06 p0918 A66-16847

Heat transfer coefficients in liquid metal concurrent flow double pipe heat exchangers 07 p1150 A66-17582

Surface heat flux removal by lithium-sodium-mercury spray cooling, noting vaporization mechanism 07 p1151 A66-17586

Liquid metal condensation, noting two-phase turbulent condensation mechanism and determining heat transfer coefficients 07 p1152 A66-17592

Cavitation damage in high-temperature liquid metal pumps for Rankine cycle space power plants studied in water model 07 p1038 A66-18175

Boiling heat transfer in liquid metals including boiling instability, superheats, two-phase flow, forced convection, heat flux, etc 08 p1316 A66-18684

Hydrogen solubility in liquid niobium at high temperatures and partial pressures 08 p1241 A66-19377

Russian monograph on MHD of liquid metals, discussing application for transport and technological treatment of metals, molten salts and slags 08 p1266 A66-19566

Cavitation damage in alkali liquid metals predicted from properties of water, aviation gasoline and sodium-potassium eutectic 08 p1211 A66-19721

First-order perturbation analysis of free convection of liquid metal from isothermal vertical finite plate extended to uniform heat flux 10 p1619 A66-21054

Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 10 p1539 A66-21502

Thermionic energy-conversion diode using liquid metal as electron oscillator 11 p1640 A66-23404

Chemical behavior of metallic elements predicted by periodic table, noting formation of liquid and solid metallic solutions, binary and complex metallides and nature of chemical bond 12 p1896 A66-24897

Electron bombardment thrusters using liquid mercury cathodes, noting lifetime, propellant and power efficiency, feed system, temperature limits, etc [AIAA PAPER 66-232] 13 p2172 A66-25172

Nonrotating MHD liquid-metal power system, noting nozzle and separator configuration 13 p1998 A66-25527

Space power systems using liquid metal /LM/ working fluids in boiling-condensing cycle, specifically condensing-ejector LMMHD power system 13 p1998 A66-25528

Electrical analogy for turbulent liquid metal heat transfer in noncircular duct entrance region, solving Fourier equation, determining fluid boundary conditions, temperature distribution, etc 13 p2210 A66-26717

Two-phase flow and material attrition problems for Rankine cycle liquid metal power plants [ASME PAPER 66-GT/CLC-4] 14 p2224 A66-26979

DC liquid-metal MHD generator tested with cold NaK to determine power efficiency 14 p2225 A66-27408

Forced convection heat transfer in symmetrical ducts when fluid is liquid metal, examining new prediction methods for engineering analysis and design 16 p2824 A66-30304

Large quantities of high-purity carbides and carbide solid solutions produced by auxiliary metal bath in carbon tube furnace 16 p2723 A66-30638

Thermal emf of metallic liquid couples measured as function of thermal difference between junctions and alloys composition, noting correlation between thermodynamic and thermoelectric properties of alloys 16 p2781 A66-31410

Longitudinal magnetic field reduction of growth rate of gravitational type acceleration instability of liquid metal by vapor 17 p2967 A66-32452

Effect of temperature, pressure and initial wall treatment on thermal resistance at stainless steel-liquid metal interface 17 p3036 A66-32845

Centrifugal pump for liquid metal power-transmission in flight control systems [ASME PAPER 66-FE-20] 17 p2932 A66-33273

Kinetic theory of liquid viscosity made tractable by using approximation of perturbation of radial distribution function of monatomic liquid by nonuniform flow field 17 p2940 A66-33335

Forced convection heat transfer for liquid metal flow in rectangular channels with prescribed wall heat fluxes and heat sources in fluid stream 17 p3038 A66-33468

Critical heat flux for boiling water, sodium and rubidium, correlating burnout data for liquid metals only and as relation for metallic and nonmetallic fluids 18 p3262 A66-34376

Accelerated cavitation damage in liquid sodium and mercury of stainless steels and superalloys under consideration for use in liquid metal power conversion systems 19 p3380 A66-35804

Drag coefficient of turbulent flow of electrically conducting liquid metal in MHD channels of round cross section 19 p3407 A66-36098

Oxygen role in oxidation/reduction reaction and polyoxide formation mechanisms associated with refractory metal corrosion by liquid alkali metals 19 p3383 A66-36135

Welding and annealing procedures for fabrication of Nb alloy liquid metal loop and operation in boiling alkali metals 19 p3370 A66-36139

Thermodynamics of MHD converter cycles with previously mixed liquid metal used as working body, discussing thermal, electrical and energetic efficiency 20 p3496 A66-36986

Simultaneous measurement of heat conductivity, heat capacity and thermal diffusivity of solid and liquid metals at high temperature 20 p3678 A66-37120

Resistance and heat transfer coefficient relation theoretically determined for flow of electrically conducting liquid in magnetic field 20 p3679 A66-37614

NaK-77 suitability for 1000-F liquid-metal hydraulic flight control systems 22 p3852 A66-40498

Steady state flow of liquid metal in MGD channel of rectangular section, noting magnetic field effect on resistance factor 23 p4106 A66-41729

Nozzle design using liquid metal vapor condensation Mach number as design parameter 24 p4294 A66-42786

### LIQUID METAL COOLED REACTOR /LMCR/

Liquid metals as coolants or working fluids in nuclear auxiliary power systems for extended space missions 11 p1735 A66-23267

Performance efficiency and weight considerations for liquid MHD power conversion [AIAA PAPER 64-760] 13 p2008 A66-26660

Applicability of refractory metals to solid propellant rockets, lifting and guidance structure for glide reentry vehicles and liquid metal containment for nuclear space power systems 19 p3382 A66-36105

### LIQUID NITROGEN

Two-phase flow and heat transfer for boiling liquid nitrogen in horizontal tubes 01 p0165 A66-10909

Dynamic measurements of speed of pumping by activated charcoal cooled to liquid nitrogen temperatures to evaluate cryosorption 02 p0261 A66-11591

Cold wall space simulating installation and technique for cooling wall with liquid

- nitrogen 02 p0216 A66-11895  
 Film boiling of saturated nitrogen flowing upward in vertical heated tube, noting annular-flow regime change to vapor matrix [ASME PAPER 65-WA/HT-26]  
 Multistage cryogenic trapping system 05 p0793 A66-15677  
 Cooling design, operation and application 07 p1032 A66-17665  
 Shock wave attenuation experiment by liquid nitrogen injection 08 p1210 A66-19594  
 Liquid nitrogen dilution effect on LOX impact sensitivity of selected materials 10 p1590 A66-21951  
 Superhigh vacuum creation in OGRA-1 facility, using titanium sputtered liquid nitrogen-cooled copper surfaces 12 p1922 A66-24218  
 Axisymmetric liquid nitrogen turbulent jet propagating under supercritical pressure in gaseous nitrogen medium 12 p1864 A66-24446  
 Liquid nitrogen-cooled shield against oil vapor contamination of proton accelerator in vacuum chamber 19 p3381 A66-35814  
 Dimensional and experimental analyses of helium bubble motion in liquid nitrogen 20 p3545 A66-37104  
 Fine structure in direct absorption edge of cleaved type IIA diamond determined from reflectance data obtained from 5.5 to 11.5 eV at room and liquid-nitrogen temperatures 20 p3622 A66-38248  
 One-dimensional heat flow equation for liquid nitrogen end-cooled ruby laser rod 20 p3581 A66-38386  
 Man rating requirements of space environment simulation laboratory, consisting of two large chambers with floors which can be cooled by liquid nitrogen down to 92 degrees K 22 p3892 A66-40239  
 Superhigh vacuum creation in OGRA-1 facility, using titanium sputtered liquid nitrogen-cooled copper surfaces 22 p3957 A66-40582
- LIQUID OXIDIZER**  
 Hypergolic ignition of composite solid propellants, examining oxidizer concentration, heat flux and exothermic reactions 22 p3969 A66-39871  
 Ablation velocity, rocket motor working conditions and combustion instabilities for hybrid rockets, using solid fuel and liquid or gaseous oxidizer 24 p4261 A66-42695
- LIQUID OXYGEN /LOX/**  
**SA FLUORINE-LIQUID OXYGEN /FLOX/**  
**SA LOX-HYDROGEN ENGINE**  
 Liquid oxygen density as function of temperature and pressure 08 p1280 A66-19428  
 Contamination control in missile systems, considering rocket engine cleanliness as equality control parameter 09 p1432 A66-19954  
 Liquid nitrogen dilution effect on LOX impact sensitivity of selected materials 10 p1590 A66-21951  
 Nonmonotonicity in sensitivity test data, noting results of liquid oxygen impact tests on Mylar-aluminum-Mylar laminate bonded to polyester foam 12 p1958 A66-23648  
 Gaseous hydrogen and liquid oxygen combustion and heat transfer in small rocket chamber 14 p2375 A66-28104  
 LOX-compatible packaging films for maintaining cleanliness of supercleaned components 17 p2943 A66-32203  
 Liquid oxygen purity control for onboard breathing equipment by IR absorption spectrophotometry and gas chromatography 17 p2866 A66-32233  
 Axial pressure gradient change with geometry in combustion chambers formed by cylindrical and conical sections, using rocket motors burning LOX and JP-5A 19 p3450 A66-35624  
 Ignition and controlled burning of liquid oxygen-liquid methane mixture, evaluating use as rocket monopropellants [AICE PREPRINT 28E] 22 p3969 A66-39880  
 LOX characteristics for on board breathing equipment including contaminants noxious to people, clogging of equipment, explosiveness and possible use of contaminated LOX 22 p3858 A66-40504
- LIQUID PHASE**  
 Hydrogen bonding kinetics in free radical liquid-phase reactions 21 p3702 A66-38520  
 Triplet states of liquid benzene and toluene studied, using biacetyl phosphorescence
- sensitization 23 p4032 A66-42077
- LIQUID POTASSIUM**  
 Potassium condensing tests of horizontal multitube convective and radiative condensers operating at vapor temperatures from 1250 to 1500 degrees 05 p0786 A66-14932
- LIQUID PROPELLANT**  
**SA AEROZINE**  
 Machine computation of thermodynamic properties of hydrazine from 32 degrees F to 1.02 times critical density 03 p0414 A66-12760  
 Drop-weight sensitivity of explosive liquids tested with impact apparatus, showing increase with temperature [CI PAPER WSCI-65-28] 05 p0788 A66-15139  
 Immiscibility and rapid interface reaction rate as cause of disruption in nitrogen tetroxide-hydrazine impinging jets [CI PAPER WSCI-65-20] 05 p0743 A66-15145  
 Droplet combustion fronts in hydrazine-nitrogen tetroxide system determined from kinetics of vapor decomposition, noting two-flame front model [CI PAPER WSCI-65-21] 05 p0743 A66-15146  
 Hypergolic ignition of light hydrocarbon fuels with fluorine-oxygen /flox/ mixtures [CI PAPER WSCI-65-23] 05 p0743 A66-15147  
 Specific impulse of solid and liquid propellants to increase performance 09 p1433 A66-20801  
 Overpressure of liquid propellant explosion in vacuum and atmosphere 14 p2370 A66-27451  
 Probability model for defining explosive yield and spill of liquid propellant 14 p2371 A66-28442  
 Yield and combustion physics of liquid propellant explosions determined from analytic charts 14 p2371 A66-28443  
 Ignition and combustion mechanism of liquid propellant consisting of aliphatic alcohols and mixed acid, using calcium and potassium permanganates as catalysts 17 p2989 A66-32458  
 Flox-light hydrocarbon combinations desirable as liquid rocket propellants due to high specific impulse, hypergolicity and cooling properties [AIAA PAPER 66-581] 18 p3159 A66-33809  
 Test for space storability of liquid propellants by suitably coating storage tanks [AIAA PAPER 65-534] 19 p3448 A66-35613  
 Thermodynamic properties and solubilities of He molecular nitrogen, molecular oxygen, Ar and nitrogen trioxide in liquid nitrogen tetroxide 19 p3449 A66-36368  
 Liquid methane fueled propulsion system for SST application, noting increased payload capacity, propellant characteristics and design criteria for storage within aircraft [AIAA PAPER 66-685] 20 p3625 A66-37259  
 Monograph on dynamics of body with liquid-filled cavities associated with practical problems of rocket technology such as seismic stability of liquid propellant tank 21 p3831 A66-39287  
 Small liquid propulsion systems testing in space environment simulator with high vacuum and low pumping capacity 22 p3890 A66-40226  
 Liquid methane as fuel for SST propulsion in terms of cost, combustion heat and cooling capacity 24 p4261 A66-42240
- LIQUID PROPELLANT ROCKET ENGINE**  
**SA HYDROX ENGINE**  
 Reliability prediction for rocket engines based on initial-failure-symptom and failure-cause estimates and uses experienced development efficiencies and effort 01 p0129 A66-10083  
 Convective heat transfer behavior of 90 percent hydrogen peroxide studied with reference to possible use as rocket propellant 01 p0164 A66-10903  
 Parameter relationship governing construction of models for combustion of liquid fuels in rocket engines 02 p0279 A66-11707  
 Unsteady boundary layer flow of multicomponent gas mixtures, investigating combustion instability in liquid and hybrid rocket motors [AIAA PAPER 65-41] 03 p0444 A66-12796  
 Oscillations in liquid fuel rocket combustion chambers covering LF and HF theory, stability requirements and optimal performance criteria 04 p0594 A66-14463  
 Flight tests and observations with S-IV stage of Saturn I carrier rocket, discussing design, reliability, developmental problems and difficulties 05 p0770 A66-14674  
 Short-circuiting gas metal-arc welding of high nickel alloys for manufacture of liquid rocket engine components with aerospace quality 05 p0686 A66-14691  
 Combustion instability in liquid propellant rocket motors causing pressure fluctuations [CI PAPER WSCI-65-22] 05 p0788 A66-15144  
 Test method evaluating explosive sensitivity, due to shock, of materials immersed in oxygen difluoride for application to rocket propulsion systems [CI PAPER WSCI-65-34] 05 p0743 A66-15150  
 Quasi-linear partial differential equations of transients in liquid rocket engine propellant feed system solved, determining transient pressure ratio [ASME PAPER 65-FE-23] 06 p0942 A66-16217  
 Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion [AIAA PAPER 66-109] 06 p0969 A66-16256  
 Liquid chemical propulsion rocket engines development problems, specifically propulsion system for Titan rocket 08 p1280 A66-18572  
 Coupling of conversion process and internal field related to effect of injector design on unstable burning of liquid propellant rocket motors 08 p1282 A66-19136  
 Design and development of first liquid-fueled stage of Diamant launch vehicle 10 p1611 A66-21256  
 Propellant injection distribution effect on transverse modes of liquid rocket engine instability [AIAA PAPER 65-613] 12 p1977 A66-23587  
 Metals for liquid propellant rocket systems in terms of environments in which performance is required 13 p2109 A66-25778  
 Relation between pressure-type fuel supply system and pressure variation in combustion chamber of rocket engine 14 p2373 A66-27382  
 Longitudinal wave histories in liquid rocket motor 14 p2374 A66-27450  
 Dynamic differential equation relating perturbations in feeding system with transient states in combustion chamber of liquid fuel rocket engine 17 p2989 A66-31388  
 Longitudinal instability in liquid rockets analyzed by digital computer assembling of coupled structural and fluid systems [AIAA PAPER 66-472] 17 p3016 A66-32765  
 Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion [AIAA PAPER 66-109] 17 p3037 A66-33237  
 Ignition of liquid propellant rocket engines, discussing propellant flow, pressure and mixture ratio 18 p3163 A66-34186  
 Computer-simulated mathematical model of thermal environmental effects on expulsion system design parameters for liquid-propellant gas-generator rocket engine [AIAA PAPER 66-686] 18 p3163 A66-34228  
 Combustion instability in MMH-NTO liquid rocket engine as affected by propellant mixture ratio, injection velocity, droplet size and distribution and chamber pressure [AIAA PAPER 66-603] 18 p3164 A66-34432  
 Combustion stability development with storable propellants for liquid rocket engines, showing coupling between technology and engine system [AIAA PAPER 65-614] 19 p3448 A66-35609  
 Axial pressure gradient change with geometry in combustion chambers formed by cylindrical and conical sections, using rocket motors burning LOX and JP-5A 19 p3450 A66-35624  
 Calibration device for flow and volume meters for liquid rocket engine propellant 20 p3561 A66-38066  
 Liquid rocket POGO oscillations caused by closed-loop interaction between longitudinal structural mode of vibration and propulsion system 20 p3629 A66-38154  
 Project Scorpio USAF Cellular Combustion Chamber Program for cost reduction and injection pattern simplification in liquid propellant rocket engines 20 p3629 A66-38256

Storable metallized liquid propellants for rocket engine systems, noting gains in specific impulse and/or propellant density 20 p3626 A66-38258

RL10 pump-fed rocket engine modified for fluorine-hydrogen application [ASME PAPER 66-MD-74] 21 p3806 A66-38501

Liquid-propellant rocket engine design and propellant types 22 p3971 A66-40121

Liquid rocket propulsion system weldment design and quality requirements, noting efficiency parameters 22 p3924 A66-40257

**LIQUID SLOSHING**

Experimental study of damping of planar wave motion in vicinity of resonance 01 p0059 A66-10644

Coupling method for determining natural oscillations of ideal incompressible liquid in vessel consisting of two regions 01 p0059 A66-11017

Violent bubble behavior in liquids contained in vertically vibrated tanks caused by water hammer type of resonance [AIAA PAPER 66-86] 06 p0875 A66-17099

Mechanical model for representing moment of inertia and fuel sloshing in baffled cylindrical missile tanks 08 p1205 A66-18834

Damping of liquid oscillations in cylindrical tanks, determining rigid and flexible baffle loss coefficients, baffle efficiency and maximum bending stress [AIAA PAPER 66-97] 08 p1207 A66-19000

Piezoelectric acceleration sensors and fluid interaction with spherical shell container undergoing translational oscillatory motion 08 p1228 A66-19769

Parametric requirements for eliminating coupling between bending, sloshing and control in large liquid-propelled elastic space vehicles 10 p1612 A66-21941

Nondimensional theoretical and experimental pressures and forces acting on flat ring baffle under sloshing conditions 10 p1525 A66-21952

Composite motion stability for partially filled cylinder rotating at constant velocity and resting on elastic supports 11 p1779 A66-22233

Sloshing motion control of liquid-vapor interface in spacecraft fuel tanks, using dielectrophoresis 16 p2684 A66-30466

Violent bubble behavior in liquids contained in vertically vibrated tanks caused by water hammer type of resonance [AIAA PAPER 66-86] 16 p2685 A66-30913

Flexible baffle effect on nature and magnitude of damping and sloshing motions of liquid propellants over wide range of conditions 16 p2685 A66-30915

Liquid sloshing effect on axisymmetric vibrations of liquid-filled cylindrical shell 16 p2819 A66-31139

Fluid hydrogen slush, discussing advantage of reduced evaporation loss during storage and handling, refrigeration and density 20 p3625 A66-37074

Particle size distribution, aging effects, terminal velocity measurements and production techniques of slush hydrogen investigated as potential upgraded spacecraft fuel 20 p3676 A66-37075

Three superconducting niobium stannide liquid level sensors tested in triple point slush or liquid hydrogen for capability of detecting liquid-vapor interface 20 p3557 A66-37076

Propellant sloshing in tanks of guided missile, giving mathematical description and numerical and experimental results in Coralie stage 21 p3818 A66-38642

Stability problems of solid body with liquid filler, noting small partial damping of liquid 21 p3770 A66-38972

Coefficients of equations of perturbed motion of body containing ideal incompressible liquid 21 p3770 A66-38973

Coupling between spin-stabilized rocket motion and propellant sloshing tested in zero gravity environment [AICE PREPRINT 17C] 22 p3897 A66-39887

Planar and rotary sloshing motion of liquid, using analytic mechanical model that consists of mass point constraint to parabolic surface 22 p3993 A66-40361

**LIQUID SODIUM**

Heat transfer to in-line turbulent flow of NaK through unbaffled bundle of circular

rods 05 p0783 A66-14737

Transient heat transfer from liquid sodium spray impinging on vertical plate 07 p1151 A66-17587

**LIQUID-SOLID INTERFACE**

Energy distribution in cavitation bubble collapsing at interface between liquid and solid approximated by localized explosion in ideal gas 06 p0870 A66-16200

Transient heat transfer from liquid sodium spray impinging on vertical plate 07 p1151 A66-17587

Stabilizing effect of surface active agents on wave formation in contaminated falling liquid film 07 p1023 A66-18125

Liquid titanium reaction with nonmetallic refractory ceramics, Ti melting behavior and electron-probe microstructural analysis 08 p1236 A66-18759

Surface phenomena on interface between liquid metals and various refractory compounds, determining surface energy and angle of contact 08 p1238 A66-18898

Internal wave ripples from fluid impacts on base of stably stratified fluid region, calculating particular case of single ripple in viscous fluid 11 p1693 A66-23009

Energy distribution in cavitation bubble collapsing at interface between liquid and solid approximated by localized explosion in ideal gas 13 p2064 A66-25916

Mathematical analysis of thermal wave technique for linear kinetics from viewpoint of solid-liquid interface motion 18 p3265 A66-34508

Ion propulsion engine with replenishable liquid-film-protected tungsten electrode, discussing construction and mass loss rate vs temperature [AIAA PAPER 65-378] 20 p3629 A66-38167

**LIQUID SURFACE**

Liquid surface instability caused by sliding detonation and shock waves of gas mixture 01 p0060 A66-11192

Dynamics of axisymmetric liquid free surface following stepwise acceleration change 16 p2684 A66-30502

Linearized problem of oblique incidence of weightless flow of ideal gas on surface of heavy liquid, using eigenvalues and eigenfunctions of integral equation 19 p3342 A66-36470

Outflow of liquid from cylindrical tank through central outlet for cases where effect of gravity is small, noting distortion of liquid surface [AICE PREPRINT 17D] 22 p3897 A66-39885

**LIQUID-VAPOR EQUILIBRIUM**

Thermal events in diurnal breathing cycle and vapor loss reduction in volatile liquid storage [AICE PREPRINT 11C] 10 p1521 A66-21181

Liquid-vapor phase equilibria of neon-normal hydrogen system 20 p3676 A66-37087

Low temperature liquid-vapor equilibrium in neon-oxygen system at pressures up to 5000 psi from 63 to 152 degrees K 20 p3601 A66-37088

Hydrodynamic equations for liquid with intrinsic rotation applicable to suspensions and liquid/vapor systems 21 p3728 A66-39312

**LIQUID-VAPOR INTERFACE**

Physical mechanisms of instabilities altering two-phase flow pattern of liquid film 01 p0165 A66-10907

Localization caused by capillary effects in gas-liquid interface such as epidermis and wicks depends upon gas phase unsaturated with liquid vapor 03 p0355 A66-12779

Wave flow of thinly layered fluid on vertical plane, noting fluid-gas interface stress 04 p0510 A66-13821

Phase change across interface of suddenly pressurized binary liquid-vapor system [ASME PAPER 64-WA-AV-1] 04 p0597 A66-14026

Heat transfer during film condensation of liquid metal vapor, discussing thermal resistance effect of condensation coefficient [ASME PAPER 65-HT-29] 05 p0784 A66-14748

Ultrasonic wave effect on mass transfer rate of selected fluid liquid phase in capillary 08 p1210 A66-19680

Heat transfer during film condensation of liquid metal vapor, discussing thermal resistance effect of condensation coefficient [ASME PAPER 65-HT-29] 11 p1784 A66-22182

Thickness of laminar liquid film draining

from vertical surface analytically determined by assuming evaporation rate is known constant [ASME PAPER 65-HT-39] 11 p1785 A66-22189

Load capacity of condensing vapor-lubricated long self-acting journal bearing, examining two-phase and single-phase regions [ASME PAPER 65-LUBS-5] 12 p1888 A66-24554

Sloshing motion control of liquid-vapor interface in spacecraft fuel tanks, using dielectrophoresis 16 p2684 A66-30466

Localization of gas-liquid interface by capillary effects, noting error in adverse acceleration equation 16 p2685 A66-30917

Shape and stability of liquid-gas interface in annular tank in force field determined by numerical integration of boundary value problem and eigenvalue [AIAA PAPER 66-425] 16 p2689 A66-31488

Longitudinal magnetic field reduction of growth rate of gravitational type acceleration instability of liquid metal by vapor 17 p2967 A66-32452

Nozzle cooling and infiltrant loss from infiltrated refractory metal composites at high gas propellant temperature 19 p3385 A66-36157

Three superconducting niobium stannide liquid level sensors tested in triple point slush or liquid hydrogen for capability of detecting liquid-vapor interface 20 p3557 A66-37076

Entry problem of thin symmetric wedge impinging normally on free surface of compressible inviscid liquid, neglecting gravitational effects 20 p3547 A66-37981

Static and dynamic behavior of liquid-vapor interface during weightlessness [AICE PREPRINT 17A] 22 p3897 A66-39886

**LITHERGOLIC PROPELLANT**

Calculation of performance data of seven lithergic propellant combinations with determination of principal thermodynamic coefficients 20 p3626 A66-38015

**LITHIUM**

Level-crossing spectroscopy with electric field, Stark shift of 3P term of lithium subject to electric and magnetic field 03 p0395 A66-13133

Ion-pairing process in nickel and lithium doped germanium 04 p0565 A66-14270

Reflex arc in lithium vapor analyzed, using spectrographic, mass spectrometric and probe measuring techniques 04 p0554 A66-14293

Pseudopotential method for determining temperature-dependent electric resistance of lithium, neglecting free electron approximation and examining electron-phonon interaction 04 p0566 A66-14316

Heat pipe characteristics covering performance analysis and experimental results such as heat transfer rate, life tests, working liquid selection, etc 05 p0616 A66-15544

Lithium transformation by plastic deformation from bcc to fcc lattice analyzed by measuring damping of free torsional oscillations of samples, noting role of internal friction 05 p0740 A66-15822

Absolute cross section for single ionization of lithium ions by electron impact over 75.6 to 800 ev electron energy range 07 p1084 A66-18425

Schottky and Langmuir laws verification by thermionic emission of lithium aluminosilicate with respect to current limitation caused by space charge 13 p2163 A66-25436

Lithium/calcium ratio of five F giant and six G giant stars 13 p2183 A66-25611

Lithium-hydrogen bipropellant arc jet 14 p2374 A66-27426

Regression rates of metallized hybrid fuel systems applied to lithium hydride butyl rubber-fluorine-oxygen system, oxidizer flow, etc 15 p2569 A66-29289

Atmospheric decay of rocket-released Li due to diffusion, wind and chemical reaction 16 p2697 A66-31008

Cosmic ray produced lithium and calcium in iron meteorites 18 p3236 A66-34890

Drift rate and precipitation of lithium ion in germanium as affected by resistivity, acceptors, carrier lifetime and copper diffusion 19 p3442 A66-35914

Lithium-drifted germanium detector

resolution and efficiency as function of temperature for gamma rays 19 p3359 A66-35915

Fine and hyperfine structure of term in 3p level of lithium studied by level-crossing spectroscopy technique, determining fine structure separation 19 p3443 A66-35989

Corrosion tests on eight refractory metals and alloys in liquid lithium and cesium vapors 19 p3383 A66-36136

Ephemeral-corrosion tests of refractory metals in molten lithium between 2000 and 3000 degrees F 19 p3383 A66-36138

Excitation of lithium-like ions by electron impacts, with computation of cross sections for resonance and nonresonance transitions 19 p3409 A66-36326

Adsorption of lithium on /110/, /111/ and /112/ planes of single-crystal tungsten in field-emission projector, measuring work function dependence on concentration 20 p3618 A66-37558

Lithium use in silicon solar cell for radiation resistance improvement, noting preservation of minority carrier lifetime 20 p3502 A66-37775

Fabrication methods for lithium drifted surface barrier silicon detectors, discussing lithium diffusion, stain etching, preparation for and final etch 20 p3535 A66-38417

Nonisotropic nonequilibrium lithium plasma flow through nozzle with allowance for friction and heat transfer 21 p3694 A66-39088

Lithium transformation by plastic deformation from bcc to fcc lattice analyzed by measuring damping of free torsional oscillations of samples, noting role of internal friction 23 p4113 A66-41387

Nonaqueous lithium-nickel halide batteries capabilities and limitations, explaining methods of selection and evaluation of solvent, solutes and combinations for electrolytes 23 p4021 A66-41752

Lithium ion drift and density distribution in electric field of Si p-n junction 24 p4253 A66-42359

Lithium cleavage of unsaturated vicinal di-tert-phosphines producing lithium diphenylphosphide 24 p4170 A66-42889

**LITHIUM ALLOY**

Continuous optical second-harmonic generation using ND/YAG laser and crystal of single-domain lithium niobate 06 p0889 A66-16378

Electronic packaging weight reduction by using magnesium-lithium alloy 19 p3376 A66-35327

**LITHIUM ALUMINUM HYDRIDE**

Synthesis of complex lithium aluminum hydride, lithium hexahydroalenate, having hydrogen to aluminum ratio greater than four 11 p1649 A66-22400

Combustion and performance characteristics of lithium aluminum hydride/hydrogen peroxide hybrid rocket [AICE PREPRINT 34D] 22 p3969 A66-39878

**LITHIUM CHLORIDE**

Lithium chloride power plant theory and technology, noting application to critical weapons systems 23 p4021 A66-41758

**LITHIUM COMPOUND**

Complex permittivity and permeability of lithium aluminum ferrite in cavity resonator determined, using perturbation theory 01 p0123 A66-10590

Phase transitions in lithium niobate and tantalate, discussing ferroelectricity 07 p1092 A66-17221

Sunspot spectra, determining lithium abundance and ratio of Li 6/Li 7 isotopes 07 p1136 A66-17736

Sequence of crystallization during heat treatment of ternary system of lithium aluminosilicate glasses 12 p1900 A66-24860

Mechanical properties of lithium silicate glasses at different stages of crystallization and relation to microstructure 12 p1900 A66-24862

Density, microhardness, elastic constants and surface strength relation to microstructure of lithium aluminosilicate glass crystallized under various conditions of heat treatment 12 p1901 A66-24863

Parametric oscillator theory applied to tunable coherent optical parametric oscillation in lithium

niobate 13 p2096 A66-26145

Electro-optic effect and elastic wave propagation in single-domain ferroelectric lithium tantalate 13 p2170 A66-26589

Cis- and trans-beta-bromostyrene reaction with lithium diphenylphosphide in tetrahydrofuran producing cis- and trans-beta-styryldiphenylphosphine, discussing proton magnetic resonance and configuration retention 14 p2232 A66-27498

Optical beam scattering of gas laser for measurement of photoelastic constants and application to lithium niobate 15 p2512 A66-28692

Phase transitions in lithium niobate and tantalate, discussing ferroelectricity 17 p2976 A66-31992

Parametric oscillator threshold with single mode optical masers and observation of amplification in lithium niobate 17 p2935 A66-32716

Thermodynamics of molten lithium nitrite galvanic cell, noting emf temperature dependence 20 p3503 A66-38189

**LITHIUM COOLED REACTOR EXPERIMENT /LCRE/**

Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 05 p0689 A66-15611

Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 10 p1539 A66-21502

**LITHIUM FLUORIDE**

Spectroscopy of lithium fluoride crystals activated with uranium trioxide for laser action, showing anomalous fluorescent decay under high intensity pumping 13 p2092 A66-25997

Thermal energy storage using solar Brayton cycle cavity receiver with lithium fluoride heat storage [AIAA PAPER 64-727] 13 p2006 A66-26636

Ionized electron centers in irradiated lithium fluoride crystals investigated by observing emission and absorption spectra 15 p2568 A66-29641

Impurity absorption of LiF crystals in vacuum UV 15 p2568 A66-29729

Ultrasonic attenuation changes due to dislocation formation during yielding of magnesium, molybdenum and LiF 16 p2726 A66-31458

Isotope shifts for zero-phonon absorption lines associated with radiation induced color centers in lithium fluoride single crystals 18 p3154 A66-33921

UV transmittance of LiF and BaF under various storage conditions 18 p3134 A66-34001

Ultrasonic attenuation in lithium fluoride from liquid helium to room temperature, finding anharmonic attenuation of slow transverse mode to vary with frequency 19 p3447 A66-36398

**LITHIUM HYDRIDE**

Constrained variation method in molecular quantum mechanics, presenting wave function, degree of constraint and energy loss values for lithium hydride molecule 13 p2130 A66-25372

Collision integrals calculated for interactions Li-H, Li-Li, H-H and H-H plus in LiH system 16 p2766 A66-31612

High temperature high-density plasma from single solid particle of lithium hydride suspended in vacuum, using ruby laser irradiation 19 p3432 A66-36596

Perturbation theory of constraints applied to variational calculation on ground state of lithium hydride molecule, using 28-term wave function 22 p3947 A66-39925

**LITHOLOGY**

Epitaxial, diffusion and photolithographic processes in manufacture of semiconductor component 10 p1514 A66-22056

**LITHOSPHERE**

**S EARTH SURFACE**

**LITTLE JOE II LAUNCH VEHICLE**

Nitrogen powered hydraulic attitude control system of Little Joe II solid propellant launch vehicle for flight testing escape mechanism used on Apollo 20 p3499 A66-37314

**LIVER**

Protein synthesis in liver of adrenalectomized and hypophysectomized rats exposed to centrifugation stress 13 p2010 A66-25899

Age effect on liver glycogenesis in rats exposed to acceleration stress 17 p2860 A66-32555

**LMCR**

**S LIQUID METAL COOLED REACTOR /LMCR/**

**LOAD DISTRIBUTION**

Strains and internal force in bending of two coupled orthotropic plate strips of different rigidity under effect of uniformly distributed loads 01 p0152 A66-10406

Fabrication, testing and experimental results for rigid-vinyl plastic monocoque domes subjected to external pressure loads 01 p0156 A66-10918

Beam forced vibration with harmonically time-variant motion produced by uniformly distributed load, assuming one boundary condition is nonlinear 01 p0157 A66-10926

Equations for rotational motion of satellite and rods with end loads as stabilizer, considering rods elastic deformation caused by load bending oscillations 02 p0295 A66-11651

Resonant frequency equation for line segment with reactive loads at both ends, using Chebyshev principle 02 p0199 A66-11754

Rationalized method for beam deflection under concentrated loading 02 p0299 A66-11796

Nonlinear boundary value problem solution as applied to effect of uniformly distributed pressure and concentrated load on spherical dome 02 p0301 A66-12174

Stress repetitions as design parameter for pavements, considering traffic load on roads 02 p0216 A66-12220

Load partition in double-lap butt joints for bearing type connections including expressions for stress-strain relationship and bolt shear deformation 02 p0302 A66-12242

Optimizing fatigue life of flexibly mounted rolling bearings, discussing shaft and housing structure 03 p0373 A66-12929

Elasticity determined for axial fir-tree-type connections of turbine blade roots 03 p0440 A66-13201

Lambda method for numerical solution of rectangular plate problem under wide range of loadings and boundary conditions 03 p0440 A66-13270

Quadrature solution to one-dimensional problem for helicoidal shell with given load and desired force distributions, moments and displacements 04 p0588 A66-13564

Stress concentration of various intensities in quasi-half-plane and other semilinear regions 04 p0589 A66-14144

Donnell-type nonlinear theory for instability of cylindrical shell subjected to axisymmetric moving loads with constant velocity [ASME PAPER 65-APMW-35] 04 p0594 A66-14235

Steady state and transient response of arbitrary tapered distributed RC networks with lumped load terminations 05 p0651 A66-14574

Book on minimum structure weight and effect on design, with application to planar and three-dimensional structures 05 p0774 A66-15064

Telescope components and subassemblies, covering structural element analysis techniques on experimental basis 05 p0680 A66-15208

Astronomical telescope, discussing support mechanism design for constant mirror shape 05 p0680 A66-15209

Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end [ASME PAPER 65-WA/APM-19] 05 p0777 A66-15441

Exact solution for Green function of open spherical shell subjected to harmonically oscillating concentrated load and any consistent boundary conditions [ASME PAPER 65-WA/APM-24] 05 p0778 A66-15446

Lubricant effect on fatigue life of

stationary ball on flat contact subjected to oscillatory normal load  
[ASME PAPER 65-WA/CF-3]

05 p0690 A66-15622

Optimal design for lightweight structures, considering material properties, shape and interaction forces

06 p0963 A66-16474

Crack propagation in quasi-brittle solid deformed by external load, using thermodynamic laws

06 p0965 A66-16491

Complete resolution of concentrated load of limiting contour, determining spectrum of functional linear operator attached to interior region

06 p0967 A66-17061

Infinitely-long thin elastic circular cylindrical shells loaded along segment of generatrix by arbitrarily distributed loads

07 p1143 A66-17627

Plane disk design calculations for uniform strength under asymmetric and axisymmetric load

07 p1038 A66-18096

Asymptotic solution to elasticity theory problem for hollow isotropic cylinder of finite dimensions and small thickness under axisymmetric load distributed over entire surface

07 p1144 A66-18183

Fatigue testing machine with two shaft-rotation speeds for HF and LF testing

07 p1147 A66-18388

Two-dimensional problem of disturbance propagation in elastic plate under concentrated load moving along boundaries at constant speed, pressure and stress-strain pattern

08 p1305 A66-18598

Error estimates in application of linear plate theory to deflection and stress determination as function of boundary conditions, correlation between geometric plate parameters and load

08 p1305 A66-18599

Nonuniform load distribution among transistors of multitransistor circuit in parallel connection

08 p1190 A66-18772

Minimum rigidity of ribs ensuring cylindrical shell stability under external load determined, using matrix

08 p1308 A66-18887

Series solution for deflection of rectangular plate subjected to concentrated load at arbitrary location, using Green function

08 p1310 A66-19161

Stress-strain state of shell having one end clamped and other under concentrated bending moments and concentrated force acting along generatrix solved by integral equation

08 p1314 A66-19579

Antisymmetric disk loading effect on distribution of induced rotor

09 p1327 A66-20252

Deflection of thin circular plate under eccentric loading using complex variables, obtaining expressions in series

09 p1467 A66-20581

Electromagnetic scattering from conducting object controlled by loading portions of surface with impedances, distributed or lumped

10 p1499 A66-21610

Stressed state of spherical shell weakened by square aperture with rounded corners, under uniform internal

11 p1779 A66-22238

Takeoff load distribution predetermination for commercial transport craft based on appropriate weight ratios

12 p1800 A66-23784

Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end

[ASME PAPER 65-WA/APM-19]

12 p1961 A66-23979

Bending of cylindrical shell clamped at one end and reinforced by elastic ring at free end, with vertical forces uniformly distributed acting over

12 p1964 A66-24044

Effect on long shell of circumferential and uniformly distributed load /due to explosion/ at constant rate along shell

12 p1964 A66-24048

Effect of external or internal static pressure on natural frequencies of unstiffened, cross-stiffened and sandwich cylindrical shells

13 p2194 A66-25142

Stressed state of isotropic elastic medium with two circular holes solved, using approximation method for concentrated loads

13 p2202 A66-26417

Shells produced by rotation of second-order curves about axis of symmetry evaluated for symmetric and antisymmetric loads

13 p2202 A66-26418

Shell with positive curvature and zero moment state examined, determining sufficient condition for secondary potential load

13 p2203 A66-26420

Elimination of stress concentrations at holes in plates, noting selection of compensating reinforcement

13 p2204 A66-26434

Differential equilibrium equations for shallow shells of constant curvature under effect of concentrated load, using Fourier transform

13 p2205 A66-26440

Effect of stress concentrations on load carrying capacity of brittle materials of nonuniform microstructure, considering iron plates with holes

13 p2205 A66-26441

Approximate solution for stress-strain concentration in plate with central circular orifice during uniaxial tension by distributed load calculated, using Timoshenko method

13 p2207 A66-26495

Stresses in concentric and eccentric compound rings

13 p2207 A66-26499

Stress and deformation in cross section of beam during complex loading, using steepest-descent method

14 p2400 A66-27685

Axially loaded cylindrical structures analyzed for optimum weight construction consistent with cost constraint, emphasizing beryllium-aluminum alloys

14 p2406 A66-28023

Tension shell theory applied to Voyager mission, noting equations for lateral loading for entry at zero angle of attack, shear and bending of wall role, etc

14 p2407 A66-28027

Problem of rectangular plate clamped all round transformed into generalized plane stress problem for

14 p2409 A66-28396

Central deflection of simply supported centrally loaded rhombic plate with formula depending on first coefficient obtained in mapping of rhombus

14 p2409 A66-28397

Mass forces for infinite elastic space expressed by generalized functions

15 p2615 A66-29852

Maximum load of thin walled I-beam producing beam surface buckling calculated and total stresses defined

16 p2815 A66-30675

Transverse cut-out effect on fatigue strength of rotating shaft under constant bending load, noting fatigue stress concentration factor

16 p2815 A66-30679

Energy feedback adaptive control system for elimination of effects of load inertia variations in servomechanisms

16 p2670 A66-30812

Hollow metallic O rings used for sealing as thin shells under axisymmetric loading

17 p3020 A66-32002

Radial loading effect on vibration frequencies of thin spherical shells

17 p3024 A66-32362

Large deflections of symmetrically loaded shallow membrane shells of revolution, considering existence of boundary layer near edges and using asymptotic analysis

17 p3025 A66-32480

Plane elasticity theory problem for curve with mixed boundary conditions having radial load distribution

17 p3028 A66-32784

Donnell-type nonlinear theory for instability of cylindrical shell subjected to axisymmetric moving loads with constant velocity

[ASME PAPER 65-APMW-35]

18 p3248 A66-33574

Exact solution for Green function of open spherical shell subjected to harmonically oscillating concentrated load and any consistent boundary conditions

[ASME PAPER 65-WA/APM-24/]

18 p3248 A66-33576

Stress analysis of junction of thin elastic shells of revolution, considering axisymmetric wind and sinusoidal load distributions

18 p3253 A66-33804

Snapping of shallow simply supported sinusoidal arch under sinusoid step pressure load, using motion equations and infinitesimal stability analysis

18 p3257 A66-34591

Complex loading problems in plastic flow theory solved by analogy with elastic solutions in elastoplastic

19 p3473 A66-35755

theory

External and internal loads and environment effects on space vehicle, especially motor case, noting stresses, structural design, fatigue behavior, safety, etc

19 p3474 A66-36313

Elastic deformation of unbounded transversely isotropic body with internal plane-circular slot under slot surface load

19 p3476 A66-36839

Solids erosion by repeated liquid impact at relatively low velocities to determine impact pressure and load

20 p3586 A66-37807

Steel testing at 580 degrees C during stress relaxation with repeated load increases

21 p3827 A66-38616

Complex load effect on shell buckling, determining compliance tensor components during stability loss

22 p3989 A66-39820

Residual stresses and strains for cases with/ without secondary plastic deformations during unloading under nonuniform heating

22 p3990 A66-40144

Stressed state near round opening in orthotropic cylindrical shell solved for various loading and boundary conditions by Bubnov-Galerkin variational method

22 p3990 A66-40145

Deformation of aluminum single crystals during constant load tensile test

22 p3935 A66-40201

Centricity effect on magnitude of discontinuity stresses in unsymmetrically loaded shells of revolution, discussing results of numerical calculations

22 p3993 A66-40366

Buckling of stiffened cylindrical shells under various loads and load combinations, noting optimization procedure for elastic stability

22 p3996 A66-40673

[ICAS PAPER 66-13] Membrane of constant strength subjected to load uniformly distributed in horizontal plane, using yield condition of maximum principal normal stress

22 p3996 A66-40708

Creep analysis of stress-strain-time relation in metal with complex loading

23 p4136 A66-40998

Longitudinal and tangential local and strip loads effect on magnitude of forces, moments and displacements in circular cylindrical shell

23 p4139 A66-41788

Stresses in shells under arbitrarily concentrated loads calculated numerically

23 p4142 A66-41958

Power series solutions to homogeneous shallow shell equations for point load concentrated on vertex of shell

24 p4285 A66-42145

Plastic theory of structures for collapse under highly localized loading

24 p4286 A66-42152

Certain tensorial character of concentrated loads

24 p4289 A66-42288

Torsion of elastic rectangular bar with similarly distributed external tangential loads applied at both ends

24 p4289 A66-42436

LOAD FACTOR

SA SHOCK LOAD

SA TRANSIENT LOAD

Weight and load factor modification of V/STOL aircraft design when aircraft is used as weapon system

01 p0011 A66-10186

Crack initiation and propagation in aluminum sheets, noting ductile fracture and load limit for design purposes

01 p0156 A66-10920

C-5A aircraft design load criteria for landing gear of large aircraft that must operate from semi-improved airfields

[AIAA PAPER 65-711]

01 p0013 A66-10948

Thin homogeneous shell stability loss under arbitrary loading, noting equations for stress and deflection functions

02 p0297 A66-11395

Minimum weight circular plate under two independent systems of loading, noting Tresca yield condition

04 p0587 A66-13487

Linear isotropic strain-hardening applied to load-deformation characteristics of cylindrical shells under internal pressure, obtaining Tresca yield criterion and stress profiles

07 p1147 A66-18349

Fuel cell considered from viewpoint of fuel costs, noting hydrocarbon fuel for application with low load factor and instant

starting 07 p0997 A66-18478  
 Effect of load mismatch on laser output, determining nonlinear dependence of equivalent negative conductance as function of oscillation amplitude in laser resonator cavity 09 p1386 A66-20435  
 Load factor estimation for flights in turbulent conditions by replacing exact transfer function with equivalent statistical model 10 p1482 A66-21385  
 Effect of conventional ammunition on aluminum honeycomb paneling, noting reduction of load-bearing and peel-strength properties 13 p2196 A66-25599  
 Bending moment of thin nonlinearly elastic plates, noting dependence of coefficient of moment concentration on external load and material properties 13 p2203 A66-26429  
 Lubrication parameters with respect to experimental values and reproducibility 14 p2305 A66-28465  
 Plastic strain effect on fatigue strength of aircraft skin sheets with hole subjected to constant loading, noting stress concentration at hole 16 p2815 A66-30678  
 Optimum parameters of three-layer plates and shallow shells filled with reinforced and nonreinforced foam plastic under compression 16 p2817 A66-31048  
 Transport aircraft economics of load factor and wasted seat problem 17 p2846 A66-32795  
 Shaft-rotor system with bearing configuration such that load-deflection relation at rotor is nonlinear and radially symmetric, noting harmonic whirl and free undamped vibrations 17 p2930 A66-32892  
 Aircraft taxi loads, discussing runway transfer function, random profiles, analog mathematical model, analog taxi simulation program and peak count [AIAA PAPER 66-469] 18 p3050 A66-33652  
 Bending behavior under lateral loads and stretching effects due to in-plane forces described by two uncoupled differential equations governing circular plates 18 p3253 A66-33803  
 Technological approaches to use of aircraft on undeveloped or semideveloped field from standpoint of load and terrain roughness 18 p3051 A66-33937  
 Load characteristics and characteristic curves for proportional and bistable fluid amplifier noting output, input and dynamic effects 18 p3054 A66-34133  
 Load level as stability loss condition for bulging of elastoplastic rod in presence of creep 19 p3473 A66-365753  
 Transonic buffeting effects on hammerhead shaped payloads analyzed, using power spectral techniques and wind tunnel tests 20 p3672 A66-38170  
 Safety-factor problem in glider design, discussing limiting load concept in form of extreme load in exceptional cases of operation 21 p3696 A66-38620  
 Load carrying capacities of rotationally symmetric plates and shells for limited anisotropic behavior and different yield stresses in tension and compression 21 p3831 A66-39375  
 Carrying capacity and moment of friction calculated for cylindrical MHD bearing for small magnitude of radial clearance 23 p4074 A66-41736  
 Concentrated forces on shells, discussing load distributions and pressure variations 23 p4142 A66-41957  
 Nonlinear programming problem of yield point load of perfectly plastic structure, using limit analysis theorems, with application to curved beam 23 p4146 A66-41992  
 Reinforced semiinfinite under concentrated loads, noting flange stress magnitude and distribution 24 p4285 A66-42144

**LOAD TEST**

Photoelastic investigation of stresses in cemented joints, particularly scarf and butt bonding 02 p0298 A66-11582  
 Comparative design study of low-disk-loading VTOL concepts including stopped-rotor, tilt-propotor, tilt-wing, transport effectiveness, etc [AIAA PAPER 65-756] 03 p0318 A66-12551  
 Cylindrical squeeze-film gas journal bearing, noting load deflection experiments [ASME PAPER 65-LUB-13] 04 p0527 A66-14246

Breaking strength of plastic metals under impulse loading by measuring axial tensile stresses 05 p0699 A66-14685  
 Design for structural reliability discussing safety factors, probable variations in applied loads, temperatures, materials, geometry and strength 05 p0775 A66-15074  
 Pressure peaks in hydraulic actuator inertia load aggravated in presence of valve overlap, noting cavitation damage [ASME PAPER 65-FE-4] 06 p0808 A66-16213  
 Notched structure load analysis, discussing planar stress distribution in flat bar for various points of application of force 06 p0964 A66-16478  
 Four-point loading bend test on specimen of full plate thickness with sharp notch to 20 percent depth, with ductility criterion as fully plastic angle of bend before fracture 06 p0965 A66-16492  
 Polymeric material deformation under harmonically varying load action, noting steady state regime temperature distribution effects 08 p1243 A66-18879  
 Cylindrical squeeze-film gas journal bearing, noting load deflection experiments [ASME PAPER 65-LUB-13] 12 p1888 A66-24551  
 High temperature structural properties of polybenzimidazole, polyimide and phenolic laminates under different loading conditions 13 p2113 A66-25311  
 High speed tensile testing of materials under destructive loads at high strain rates 13 p2197 A66-26107  
 Static and high strain rate tensile behavior of epoxy, polyester and urethane resins reinforced with 181-S, 184-E and woven roving glass materials and nylon 13 p2114 A66-26111  
 Approximation method for determining limit and breaking load for infinite brittle body weakened by plane crack, noting crack propagation 13 p2203 A66-26423  
 Limit load of flat notched bars subject to tension, discussing rupture force magnitude, plastic strain occurrence, rupture stress and yield limit curves, etc 14 p2398 A66-27394  
 Mechanical strength of plastic buckling of sheet metals under lateral hydraulic loads 15 p2510 A66-29778  
 Structural mounting of large diameter cylindrical missile section in centrifuge for high acceleration environmental testing 16 p2677 A66-30458  
 Loading of thin ring airfoil in unbounded spherical source flow field, calculating vortex distribution, strength, etc [ASME PAPER 66-FE-3] 17 p2914 A66-33259  
 Complex load action on elastic-plastic structures in light of limit analysis, discussing safety criterion 21 p3826 A66-38591  
 SH-3A airframe fatigue test facility for automatic simulation of helicopter flight and landing loads 22 p3992 A66-40251  
 Automated minimum weight structural design for various load conditions, integrating matrix displacement analysis and operations research 22 p3995 A66-40490

**LOAD TESTING MACHINE**

Calibration problem of load-measuring instruments solved, using automatic digital voltmeter [ASTME PREPRINT IQ66-705] 12 p1882 A66-24412  
 Strain gauge load measuring transducer operating in bending mode and based on elastic properties of epoxide glass fabric laminate 12 p1884 A66-24985  
 Calibration method for tensile testing apparatus for testing elongated high modulus fibers and graphing of typical load elongation curves 17 p2943 A66-32400

**LOADING**

SA AERODYNAMIC LOAD  
 SA AXIAL LOAD  
 SA BLAST LOADING  
 SA COMPRESSION LOADING  
 SA CRITICAL LOADING  
 SA CYCLIC LOAD  
 SA DUMMY LOAD  
 SA DYNAMIC LOAD  
 SA EDGE LOADING  
 SA GUST LOAD  
 SA HUGONIOT EQUATION OF STATE  
 SA IMPACT LOAD  
 SA RANDOM LOAD

SA STATIC LOADING  
 SA STRESS AND LOAD  
 SA TRANSIENT LOAD  
 SA VIBRATORY LOADING  
 SA WING LOADING

Surface roughness and loading effect on actual contact surface of metals 01 p0079 A66-11062  
 Minimization of radar cross section of thin cylinder by central loading, calculating backscatter field 05 p0632 A66-14842  
 Machine part design by limit loads and Mohr circles, using trial and error dimension minimization 14 p2397 A66-27389  
 Equilibrium equations for closed circular cylindrical rib-reinforced shells under arbitrary loading 16 p2819 A66-31138  
 Loading considerations in design of large helicopters for transport of externally suspended cargo 17 p2845 A66-32741  
 Flying qualities and aircraft control during tandem rotor helicopter external sling load operations 17 p2846 A66-32742  
 Load carrying capacity of circular plates under antisymmetric load 17 p3029 A66-32806

**LOADING APPARATUS**

Helicopter airframe fatigue testing noting fail-safe design, crack detection, loads applied, test facilities and techniques, etc 17 p3027 A66-32737  
 Heavy equipment short-range transportation with crane-type helicopters, noting correlation between lift capacity and aircraft weight 17 p2845 A66-32739  
 Static perturbation technique used in analysis of stability relationship to shape of equilibrium surface for finite-dimensional problems 22 p3992 A66-40202

**LOADING MOMENT**

Approximation method for momentary peak shaft loads, computing starting and stalling torques of power transmission system 02 p0238 A66-12266  
 Optimum speed control of automatic system, noting nonlinear mechanical characteristics of slave motor and speed dependence of load moment 06 p0863 A66-16531  
 Symmetric bending of circular orthotropic plate of systematically variable thickness for different types of loading 15 p2613 A66-29435  
 Rigorous solutions for loadings applied at apex of spherical shell, noting cases of concentrated radial and tangential force, concentrated moment about polar and planar axis, etc 20 p3670 A66-37761  
 Side forces and moments on Tomahawk sounding rocket with and without spin at high Reynolds number and Mach 5 [AIAA PAPER 66-754] 23 p4008 A66-41329

**LOADING RATE**

Rockwell hardness test discussing standardization by cycle control and equipment modification 03 p0439 A66-13158  
 Two-parametric classification of load cycles on construction elements connected with fatigue limit tests and service life 06 p0964 A66-16483  
 Instantaneous strength, rigidity and strain characteristics of reinforced plastics surface-heated on one side 12 p1899 A66-24041  
 Metal behavior during hypervelocity cratering, noting momentum and energy equations for impulsive loading, including anisotropic stress and strain rate tensors, etc 17 p3022 A66-32013  
 Longitudinal and circumferential inertial effects on dynamic response of cylindrical shell to time-varying loads 17 p3025 A66-32470  
 Fatigue damage accumulation in materials at high temperatures under variable loads, noting calculation of fatigue life 18 p3254 A66-34230  
 Fatigue curve for one type of loading determined from stress variation during cyclic deformation and fatigue curve from other type of load application 18 p3254 A66-34231  
 Load-supporting capacity of vertical plasma cylinder contained by axial pinch effect analyzed for applications to bearings with electrically conducting lubricants 23 p4101 A66-41293  
 Elastodynamic buckling of circular cylindrical shells, unstiffened and longitudinal stringers-stiffened 23 p4147 A66-42000

## LOADING WAVE

Shock wave, plane loading and unloading wave propagation in prismatic rod with variable cross section and curvilinear stress-strain relation 17 p3031 A66-33329

## LOCALIZATION

## SA SOUND LOCALIZATION

Effects of physical location of visual stimuli on intentional response time /IRT/ 02 p0183 A66-12075  
Total complexions for isolated assembly of N quasi-independent localized systems with equally spaced energy levels 03 p0444 A66-12610

Localized diffusion of phosphorus in silicon used to produce deep p-n junctions with Gaussian P distribution 08 p1268 A66-18678

## LOCKHEED XV-4A AIRCRAFT

## S AIRCRAFT

## LOCKHEED L-2000 AIRCRAFT

Thermal management of Lockheed L-2000 supersonic transport heat sources and sinks, considering flight profile, aircraft configuration and heat transfer modes [ASME PAPER 65-AV-40] 09 p1329 A66-20298  
Operation and maintenance of Lockheed L-2000 double delta SST aircraft with high thrust engine and large delta wings, designed to meet civil aviation requirements [SAE PAPER 660295] 15 p2427 A66-29832

## LOCKHEED MILITARY AIRCRAFT

## S C-5 AIRCRAFT

## S C-141 AIRCRAFT

## S F-104 AIRCRAFT

## S P-3 AIRCRAFT

## LOCOMOTION

## SA ASTRONAUT LOCOMOTION

Simulated fish propulsion analysis of boundary layer transition and vortex chain shedding 13 p2071 A66-26725  
Dolphin body design for integrating resistance and propulsion mechanisms 19 p3279 A66-36050

## LOG PERIODIC ANTENNA

Log-periodic dipole antenna array and conical logarithmic spiral antenna design and performance 04 p0491 A66-13404

Sampling of independent orthogonally polarized antenna output to increase signal levels at least 10 decibels over one-antenna systems 04 p0481 A66-13729

Wideband annular-zone directional antenna, with individual radiators arranged in log-periodic concentrated groups on ring fed by conical line 08 p1190 A66-18682

Log periodic Yagi-Uda dipole antenna array and extension of frequency bandwidth 14 p2256 A66-27920

One-port log-periodic circuits, determining conditions for which phase of input reflection coefficient varies linearly with logarithm of frequency 19 p3324 A66-35717

## LOG SPIRAL ANTENNA

Log-periodic dipole antenna array and conical logarithmic spiral antenna design and performance 04 p0491 A66-13404

Vector potential representation of planar logarithmic spiral antenna field 14 p2259 A66-28159

## LOGARITHM

Existence of logarithm for nonsingular square matrix, uniqueness for linear ordinary differential equation systems, logarithms of operators and spectral mapping 07 p1058 A66-17966

Logarithmic pulse storage device, basic characteristics and choice of parameters as function of pulse length and measurable frequency range 09 p1356 A66-20773

Range fluctuation of high energy mesons including effect of logarithmic increase of ionization loss derived, using analytical solution, considering effects of bremsstrahlung, pair, etc 18 p3222 A66-35209

Logarithmic pulse storage device, basic characteristics and choice of parameters as function of pulse length and measurable frequency range 22 p3873 A66-39832

## LOGARITHMIC RECEIVER

Technique for controlling logarithmic amplitude response /LAR/ and regulating logarithmic amplifiers under industrial conditions 01 p0035 A66-10219

Logarithmic region of planar triode with Maxwellian distribution of initial velocities of electrons 02 p0205 A66-11974

Automatic gain control of emitter current to increase dynamic range and calculate

amplitude characteristics of transistorized resonance amplifier 04 p0496 A66-13914

Logarithmic amplifier with pulse-length discrimination followed by high-pass filter for reducing adverse effects of distributed clutter in radar receivers 08 p1180 A66-18712

Transistorized logarithmic amplitude converter for recording pulses of radiation detector, automatic switching of conversion scale permits amplitude measurements 13 p2077 A66-25321

Technique for controlling logarithmic amplitude response /LAR/ and regulating logarithmic amplifiers under industrial conditions 17 p2880 A66-31902

Automatic gain control of emitter current to increase dynamic range and calculate amplitude characteristics of transistorized resonance amplifier 20 p3532 A66-37872

amplitude characteristics of transistorized resonance amplifier 20 p3532 A66-37872

## LOGIC

## SA BOOLEAN ALGEBRA

## SA FLUID LOGIC

## SA THRESHOLD LOGIC

## SA TRANSISTOR LOGIC

Convergence, oscillation, functional stability and reliability of m-by-1 homogeneous polyfunctional nets under iteration 10 p1517 A66-21691

RCA life sciences paper on microscale medical sensors, adaptation theory, logic techniques and human factors engineering 11 p1647 A66-22297

Neural, threshold, majority and Boolean logic techniques compared for reliability and efficiency in adaptive machines and data handling systems 11 p1659 A66-22300

Digital simulation languages, discussing history, input format, effectiveness, programming error diagnostics, etc 12 p1826 A66-23826

Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581

Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581

Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581

Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581

Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581

Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581

Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581

and logic and circuit

form 02 p0205 A66-11941  
Turbulence amplifier system noting principles and application 02 p0180 A66-11963

Computer logical gates for characteristics of large systems as local guidance control and regulation systems of plants 03 p0348 A66-12603

Digital integrated circuits discussing current mode logic, resistor, diode and complementary transistor logic circuits, crossover method, power dissipation, testing, standardization and limiting factors 03 p0347 A66-13341

Oscillograms and circuit diagrams of counter in which storage of preceding state is performed by trigger with direct coupling by means of unित्रons 04 p0490 A66-13917

Diffusion and film techniques combined in design and fabrication of complex integrated computer logic circuits on small die 05 p0643 A66-14571

Adaptive logic network structure matched to relationships in input environment, defining task network has to learn, using switching functions 05 p0653 A66-14599

Transistor astable multivibrators for solid state logic elements for use in digital control and indication 05 p0647 A66-14770

Reliability and fault-masking in n-variable two-input and multiple input NOR trees discussing system, function and signal-state reliability measures 05 p0648 A66-14928

Active two-input pure fluid OR-NOR gate fabrication by logic binary-to-decimal converter [ASME PAPER 65-WA/AUT-13] 05 p0624 A66-15606

Fluidic devices, discussing design, equivalence to logic circuits, fluid amplifier application to build flip-flops, etc 06 p0809 A66-16794

Reliability of logical elements and systems with given probabilities of individual elements 07 p1013 A66-17387

Alloying technique through doped diffused layer for production of high speed silicon tunnel diodes for logic circuits and memory functions 08 p1188 A66-18653

System designing with all-magnetic logic circuits based on resistance shift register circuit 08 p1187 A66-19101

Ternary-pentary majority algebra, Boolean-to-majority function conversion, and derivative identities 08 p1188 A66-19672

Digital fluid amplifiers and application, noting breadboard miniaturization 09 p1332 A66-20321

Integrated circuit for switching-type high-efficiency power supply with feedback regulation 09 p1354 A66-20566

Coincidence detector circuit provides complement of exclusive OR, restores signal level and has high fan-out 09 p1359 A66-20920

Integrated circuit gate ring counters, noting flip-flop variety comparison 11 p1677 A66-23178

Silicon monolithic Semiconductor Memory Integrated Device /SMID/ memory system and memory storage element 12 p1827 A66-23834

Redundancy method based on circuit failure asymmetries for reliability improvement in digital circuits 12 p1842 A66-24668

Reliability improvement through redundancy at various system levels in analog systems 12 p1844 A66-24733

MOS FETs in microelectronics, including digital arrays and logic gates 12 p1845 A66-24847

Periodically operating gate circuit with negative feedback for sampling in micro- and millisecond range 12 p1847 A66-24938

Harmonic linearization of logic law control systems, deriving complex equivalent transmission coefficient for nonlinear part of circuit with variable structural elements 13 p2045 A66-25299

Various methods of implementing minimized logic circuits entirely with NAND gates 13 p2047 A66-25361

Integrated circuits with propagation delays in nanosecond range, noting emitter coupled logic circuit 13 p2036 A66-25534

Gating circuit concept, using carrier frequency approach, applied to inverter,

- converter and cycloconverter  
circuits 13 p2043 A66-26296
- Approaches to microelectronics, application of microelectronics to telecommunication equipment, noting logic circuits, radio relay, etc 13 p2043 A66-26316
- Optimum design of emitter follower transistor logic /ETL/ circuits and comparison with various other logic circuits 14 p2263 A66-27023
- Integrated circuit as exclusive-OR gate or as linear amplifier, using transistor or tunnel diode shunted by resistor 14 p2263 A66-27051
- Diode gate design, using bridge circuit to eliminate spurious gating signals 14 p2267 A66-27802
- Automatic speech analyzer capable of detecting frequencies of three primary voice formants 14 p2296 A66-27864
- Adaptive method for synthesis of circuit of majority decision elements which realizes given logical function 14 p2268 A66-28043
- Dynamic logic chassis analyzer /DLCA/, diagnostic tool for isolating faults to circuit board or component level in programmer test station /PTS/ and component test station /CTS/ ground support equipment 14 p2260 A66-28266
- Thin film hybrid packaging method for series of computer logic circuits designed to operate at 100-mc clock rate 14 p2260 A66-28267
- Dielectric-tape TV camera for panoramic scanning application in meteorological satellite, discussing subject logic and control system design 14 p2262 A66-28418
- Optimal scientific satellite PFM encoding system circuit design and digital data processing 14 p2244 A66-28429
- Automatic systems for diagnostic medical tests onboard spacecraft, using algorithms given in matrix form 15 p2444 A66-29462
- Automatic device for reversible hypothermia in living organism, considering parameters of physiological functions, included in logic circuits 15 p2444 A66-29498
- Diode transistor logic /DTL/ circuit stage delay and transistor speed parameters 16 p2668 A66-30125
- Characteristic parameter selection and transient performance capabilities of integrated logic microcircuit 17 p2880 A66-32057
- MOS transistors in integrated switching circuits to obtain desirable characteristics of pentode vacuum tubes and bipolar transistors 17 p2882 A66-32109
- Integrated high speed diode-transistor-logic gate /DTL/ design, discussing stray capacitance, resistors, diode combination and switching transistors 17 p2883 A66-32121
- Integrated circuit design optimization, using modified direct coupled transistor logic NOR gate 17 p2883 A66-32122
- Computer assemblies packaging analysis for optimum logic gates and inputs as function of leads 17 p2883 A66-32124
- Current-mode logic gates in building differential amplifier for memory-core readout 17 p2884 A66-32127
- Monolithic silicon integrated circuit used for current-mode logic of RCA Spectra 70/45 and 70/55 computers 17 p2886 A66-32512
- Developmental memory using monolithic-ferrite integrated arrays of magnetic storage elements provides cost and power savings 17 p2886 A66-32516
- Logic circuit construction problems in multicore magnetic elements with magnetic flow switching 17 p2878 A66-33495
- Analog computer and logic circuitry combination for variable frequency signal production, noting application to adaptive control systems 18 p3089 A66-33561
- Carrier travel time in transistor region where changeover from neutral region to depletion layer takes place 18 p3076 A66-33936
- Fluid interaction devices, noting induction and turbulence amplifiers, impact modulators, logic gates, inverters, etc 18 p3054 A66-34131
- Acoustic sensitivity and logic circuitry of fluidic turbulence amplifiers for application to laminar jet streams 18 p3056 A66-35012
- Tuning of power amplifiers without standard servoloop and electromechanical variable RF element, for application to transceiver 19 p3324 A66-35515
- Silicon-on-sapphire batch-fabrication of computer logic and memories, describing SOS diode matrix 19 p3314 A66-35526
- Changing of PCM telemetry, from individual, integrated bipolar and/or MOS logic elements to complex MOS subsystems 19 p3317 A66-35700
- Trainable nonlinear function generator using threshold logic elements for pattern classifiers 19 p3338 A66-36737
- Pneumatic control system based upon dual membrane relay permitting all fundamental logic operations 19 p3282 A66-36808
- Realization of arbitrary storage structures using newly developed pneumatic logic system as elements 19 p3310 A66-36809
- Homogeneous microelectronic structures using integrated circuit technology for fabrication of logical and sequential facilities 19 p3323 A66-36821
- Space control system using digital SUBORDINATE OR logic blocks to add optimum response capability to maneuver commands 20 p3662 A66-37229
- Ternary-pentary majority algebra, Boolean-to-majority function conversion and derivative identities 20 p3522 A66-37264
- Fluid logic and amplification - International Conference, England, September 1965 20 p3500 A66-37642
- Operation principles of turbulence amplifiers, considering application to low cost automation, using conventional pneumatic valves and cylinders 20 p3502 A66-37655
- Oscillograms and circuit diagrams of counter in which storage of preceding state is performed by trigger with direct coupling by means of unitrons 20 p3522 A66-37875
- Integrated electronic arrays, examining fabrication, logical design, application and packaging 21 p3710 A66-38828
- Miniaturization of logic components for modular and monolithic integrated circuits in computer design 21 p3708 A66-39624
- Boolean algebraic analysis of AND, OR, NAND and NOR functions in electronic integrated circuits 21 p3720 A66-39625
- Design formulae and comparative tables of three n-input universal logic circuits 22 p3883 A66-39727
- Design principles and block diagrams of self-adaptive universal logic circuit with trainable elements 22 p3883 A66-39728
- Digital computer program for static worst case design of diode transistor logic 22 p3870 A66-40396
- Complementary symmetry flip-flop and similar transistor micropower digital logic circuit design 23 p4048 A66-41144
- Structural diagram for loading of potential element transistors operating in complex logic circuit 23 p4041 A66-41397
- Performance modeling procedure to determine characteristics of integrated logic devices 24 p4177 A66-42100
- Lasers applied to logic, memory, input-output and data transmission-linkages parts of computers 24 p4225 A66-42804
- Controllable threshold circuit using interconnection simple toroids for all-magnetic logic to select signal paths 24 p4189 A66-43178
- Tabular minimization procedure for ternary switching functions in obtaining minimal irredundant function form, using limited set of reduction rules 24 p4177 A66-43186
- Multifunction monolithic thin film compatible diode-transistor logic circuits for data processing 24 p4178 A66-43187
- LOGIC NETWORK**
- Logical and computing devices, discussing construction of homogeneous functional structure using integral circuits 04 p0494 A66-13704
- Pneumatic logic elements for sequential control of machines and individual processes 07 p0991 A66-17416
- System reliability by analyzing reliability of components in connection with operation of logic structures 08 p1187 A66-19447
- Modular system of logic for nuclear detectors onboard Vela satellite 09 p1463 A66-19969
- Fluid mechanics, fluidic devices and systems, noting design, manufacturing techniques and application 09 p1332 A66-20317
- Digital and RF/linear circuits compared noting monolithic, hybrid and thin film circuit limitations, phase locked loop design, etc 12 p1830 A66-23756
- Associative parallel processor using word and bit logic and sequential-state-transformation mode, with application to picture processing and pattern recognition 12 p1827 A66-23830
- Near minimal set of tests detecting all single faults in combinational logic net, using shortcut methods 13 p2040 A66-25804
- Integrated circuit binary counters using majority logic current mode gate element 14 p2255 A66-27803
- Logical and computing devices, discussing construction of homogeneous functional structures using integral circuits 15 p2454 A66-28545
- Realization of numerical counters with micrological elements, discussing flip-flop and memory elements 16 p2656 A66-30964
- Papers on RCA computer progress 17 p2877 A66-32510
- MOS transistor suitability to integrated logic networks, using arrays of many identical elements with superimposed connections 17 p2901 A66-32514
- Nonlinear operational amplifier with high power switching devices, noting volt-ampere characteristics 18 p3086 A66-34494
- Intermittent connection testing for digital logic module 20 p3523 A66-37949
- Fluid amplifier application to process control including turbulence amplifiers, logic function performance, etc [ASME PAPER 66-MD-8] 21 p3697 A66-38477
- SESIAC, electronic machine for statistical simulation consisting of stochastic generator, containing no equations or tabulated functions, only random pulse sources and logic networks 23 p4053 A66-41604
- LOGICAL DESIGN**
- Integrated circuit current switching logic element fabrication, using transistors and standard isolation techniques 05 p0643 A66-14570
- Switching circuit theory and logical design - IEEE Annual Symposium, University of Michigan, Ann Arbor, October 1965 05 p0637 A66-14926
- Book on unified treatment of switching theory, emphasizing synthesis and analysis aspects of switching circuits 06 p0861 A66-16198
- Area boundaries and design implications of mutually stable logical element characteristics 07 p1014 A66-17435
- Iterative procedure for determining linear separability of Boolean function and threshold functions for logical switching circuit design 07 p1059 A66-17971
- Russian monograph on algorithm of machine search for logical natural derivation of investigated formulas from initial formulas via propositional calculus 07 p1004 A66-18464
- Redundant microelectronic system and reliability 11 p1661 A66-22272
- Infinite automata theory and structural logical design of digital machines 11 p1659 A66-22707
- Flow of data and control information from apparatus to computer and use of microprogrammed controller 12 p1827 A66-23829
- Self-diagnosable DX-1 computer design to achieve maximum operational availability 12 p1828 A66-23843
- PERT statistical design of logic systems, discussing expected delays, critical timing paths, timing slack between various inputs and probability of achieving specific output by given time 14 p2284 A66-27232
- Computer design of programmable decommutator for multiformat PCM telemetry data 14 p2246 A66-28432
- Book on automatic communication switching systems, logic, logical switching components, storage elements, relay centers, etc 15 p2465 A66-29644
- Program for calculating and designing diode switching circuits consisting of AND and OR gates, where interrelationship of input variable is determined by single switching function 15 p2453 A66-29867

Optimum dimensioning of diode transistor logic /DTL/ circuit equipped with silicon epitaxial planar transistor BSX20 operating in saturated mode 16 p2668 A66-30124

Turtle, microcircuit logic or transistor resistor transistor logic /TRTL/ for integrated circuits 17 p2883 A66-32117

Characteristics of pneumatic logical elements including membrane-type elements, noting design and construction in Eastern Europe 19 p3280 A66-35723

Binary adder and other pneumatic logic elements producing any two-valued function of three two-valued input parameter by proper arrangement of input jet nozzles 20 p3496 A66-36862

Cascade free jet logical element interactions and application to multiple-parameter logical function 20 p3496 A66-36863

Logical element geometry effect on fluid flow in turbulent reattachment device 20 p3501 A66-37645

Digital computer program for static worst case design of diode transistor logic 22 p3870 A66-40396

Minimization of logical functions in normal disjunctive form, using Gavrillova method and ALGOL 60 algorithm 22 p3941 A66-40541

Logical processing units and interconnection networks design noting reliability, fault diagnosis, computer coordination of data and control processes, etc 22 p3871 A66-40728

Saturn computer design and fault simulation on IBM 7090 22 p3871 A66-40744

**LOGISTICS**

SA MAINTENANCE

SA SPACE LOGISTICS

SA TRANSPORTATION

Digital simulation of scheduling logistic support by helicopter, using Backtrack techniques 12 p1858 A66-24683

Mathematical models for logistics planning providing complete analysis of requirements through computer simulation 14 p2245 A66-27122

Titan II operational base management, organization and responsibilities, noting logistic requirements, concurrency problems, etc 14 p2416 A66-27123

Military air cargo transport technology and logistic systems 15 p2620 A66-29793

Mathematical model used by Army Missile Command for establishing priorities for reliability and logistics improvement 20 p3684 A66-37886

VTOL operational availability computer simulation model, studying initial and tradeoff design, maintenance, logistics, manpower and flight operational requirements 20 p3543 A66-37909

Locating general drop zone and desired impact point, identifying receiving unit and dropping supplies for aerial delivery systems 22 p3850 A66-40615

**LOMMEL FUNCTION**

Fresnel gain of aperture antenna, developing rigorous analytical formula for circular aperture antennas with parabolic tapered illumination 05 p0651 A66-15837

**LONG PERIOD EFFECT**

Climatic conditions at Earth surface, relation to long-term planetary trends in atmospheric circulation 05 p0712 A66-15221

Cell voltages and Coulomb efficiency in oxygen electrodes and hydrogen and hydrazine fuel cells for long duration discharges 08 p1172 A66-19652

Long duration flight physiological data on ducks and chickens in closed ecological systems, including oxygen and food requirements and carbon dioxide output 15 p2435 A66-29452

**LONG RANGE NAVIGATION**

SA LORAN

SA LORAN C

Automatic star trackers for long range aircraft navigation, discussing instrumentation methods and use of pulse code modulation for sensor design 02 p0257 A66-12029

Ground-based radio aids and self-contained aids for long range navigation 02 p0258 A66-12040

VLF radio propagation conditions and phase delays in design of long range

navigation aids 02 p0259 A66-12053

Future trends in long range aircraft navigation 02 p0260 A66-12058

Long distance air navigation across North Atlantic 07 p1063 A66-17444

Evaluation of four different types of Doppler radar as long range self-contained navigation aid 07 p1065 A66-17689

Long range navigation in jet operations, discussing problems and limitations 07 p1065 A66-17670

Universal long range radio navigational system, discussing purpose and function of ground-based system 07 p1065 A66-17671

DECTRA long range navigational aid, DECTRA airborne receiver and Omnitrac computer 07 p1068 A66-17702

Up-dating of self-contained navigational aids such as Doppler, inertial and Doppler/inertial systems 07 p1070 A66-17717

MOA/BOAC Doppler/Loran A trials 1963-64, discussing navigational accuracy during transatlantic flights 07 p1072 A66-17759

Accuracy of navigation techniques for North Atlantic flights evaluated, based on Loran A and Doppler/GM compass automatic dead reckoning system 07 p1072 A66-17760

Safety and economic factors which determine navigational requirements in long range traffic area 07 p0988 A66-17764

Automatic Astro Tracker as part of long-range aircraft navigation complex heading reference system 07 p1075 A66-17786

Flight evaluation of long range inertial navigation and steering in autopilot and manual operation 07 p1076 A66-17791

Astronavigation applied to piston aircraft and supersonic jets, advantages and shortcomings 07 p1076 A66-17797

Air collision risk and traffic control in long-range air traffic systems as basis for safe procedural separation standards 09 p1401 A66-20431

All-weather operations, head-up displays, long range navigational aids - Symposium, International Federation of Air Line Pilots Associations, Rotterdam, October 1965 17 p2951 A66-33198

Separation standards and navigation in long-range air traffic control region 17 p2954 A66-33213

Worldwide civilian-aircraft navigation system based on VLF radio using ground stations or satellites 17 p2954 A66-33214

Doppler navigation system accuracy improvement and evaluation of inertial navigator with steering 17 p2954 A66-33215

Deetra long-range navigational system giving area coverage position fixing for multiplicity of North Atlantic transocean routes 17 p2954 A66-33216

Efficient and accurate orbit prediction for very long periods of time using analytic perturbation technique in conjunction with multistep methods 19 p3462 A66-35899

[AIAA PAPER 65-692]

Safe separation standards estimation for analyzing long-range air traffic systems, emphasizing flying errors observation in operational conditions 21 p3760 A66-38452

Costing of parallel route systems for supersonic traffic, examining diurnal traffic patterns, sensitivities to fuel requirements, sonic bang avoidance and layout of track systems 21 p3761 A66-38453

**LONG WAVE RADIATION**

Equations for reflecting effect of underlying surfaces on long wave radiation fluxes in free atmosphere 01 p0062 A66-10761

Solar radiation measurements made in four stations from 1957 to 1963 show dependence of atmospheric long-wave radiation on water-vapor pressure and cloudiness 04 p0542 A66-13818

Long-wave recombination radiation of germanium associated with optical transitions involving photon emission and current carrier heating 04 p0568 A66-14348

Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation 06 p0924 A66-16515

Ascending and descending fluxes of long wave radiation in free winter atmosphere as affected by temperature stratification, water-vapor distribution and clouds 07 p1029 A66-17923

Radiometersonde observations of atmospheric IR irradiance, noting measurement results with improved equipment 09 p1369 A66-19869

Silicon recombination radiation, describing long wave IR radiation effect and photon energy gain via conversion into short wave radiation 09 p1431 A66-20896

Effects of long-wave radiation exchange near Earth surface, extrapolating air temperature measurements to ground to estimate surface temperature, obtaining equivalent black body temperature of ground 11 p1702 A66-23155

Ascending and descending fluxes of long wave radiation in free winter atmosphere as affected by temperature stratification, water-vapor distribution and clouds 12 p1869 A66-23884

Long wave radiation and total radiation balance at Earth surface in Arctic region, based on Stefan-Boltzmann formula 12 p1869 A66-24202

Normally incident plane electromagnetic wave scattering by circular cylinder coated with radially stratified sheath 14 p2238 A66-27587

Equations for reflecting effect of underlying surfaces on long wave radiation fluxes in free atmosphere 14 p2285 A66-27860

Long-wave recombination radiation of germanium associated with optical transitions involving photon emission and current carrier heating 14 p2368 A66-28245

Observational data obtained in determinations of photographic positions of satellites, noting long wave vibrations of images role in position error 20 p3517 A66-37835

Long-wave radiative heat transfer between clouds and free atmosphere as basic factor in weather forecasting 20 p3594 A66-38371

**LONGITUDE**

SA PLANETARY LONGITUDE

SA SOLAR LONGITUDE

Method for calculating longitude dependence of geomagnetically trapped electrons at low altitude, based of scattering and energy loss due to atmospheric interactions 20 p3640 A66-38324

**LONGITUDINAL CONTROL**

Flight evaluation of various longitudinal handling qualities involving parameters and region of pilot acceptance [AIAA PAPER 65-780] 03 p0322 A66-13067

Automatic system ensuring landing in absence of visibility and atmospheric turbulence by controlling motion of aircraft leveling out, consisting of time-dependent input signal shaping device and amplifiers 12 p1909 A66-24321

Flight control system design for high performance aircraft, particularly longitudinal transient response handling qualities 19 p3278 A66-35509

Short period longitudinal aerodynamics of reentry vehicle flight control system, using sensitivity techniques 19 p3396 A66-35510

**LONGITUDINAL STABILITY**

Wind tunnel research of deep stall aerodynamic characteristics of T tail analyzed as preliminary design guide [AIAA PAPER 65-737] 03 p0317 A66-12547

Reduced stiffness responses of airplane to longitudinal control, noting elevator flutter and stick-fixed dynamic longitudinal stability [AIAA PAPER 65-784] 03 p0320 A66-12594

Experimental fixed and moving-base flight simulator investigation of generalized aircraft longitudinal pilot induced oscillations [AIAA PAPER 65-793] 03 p0352 A66-12596

Effect of canard foreplane on longitudinal long-period perturbed motion of aircraft depends on change in hinge moments with Mach number change 04 p0458 A66-14152

Parametric response of elastic columns discussing longitudinal inertia effects, analytic stability criteria and results [ASME PAPER 65-WA/APM-13] 05 p0777 A66-15435

Quasi-linear partial differential equations of transients in liquid rocket engine propellant feed system solved, determining transient pressure ratio [ASME PAPER 65-FE-23] 06 p0942 A66-16217

Parametric response of elastic columns, discussing longitudinal inertia effects,

analytic stability criteria and results  
[ASME PAPER 65-WA/APM-13] 12 p1961 A66-23985

Text on longitudinal static stability of low-speed aircraft including effect on pilot, flight test, pitch maneuverability, etc 14 p2222 A66-26792

Longitudinal instability in liquid rockets analyzed by digital computer assembling of coupled structural and fluid systems [AIAA PAPER 66-472] 17 p3016 A66-32765

Oscillatory motion of angle of attack for space vehicles entering Earth atmosphere at hypersonic speeds from satellite orbits 17 p3016 A66-32893

Longitudinal motion of piloted aircraft during rapid dropping of concentrated loads in comparison of numerical solution with flight data 17 p2848 A66-33076

Exact analytic solution, in confluent hypergeometric functions, to problem of stability of conical shell under uniformly distributed longitudinal compressive forces 18 p3252 A66-33709

Reduced stiffness responses of airplane to longitudinal control, noting elevator flutter and stick-fixed dynamic longitudinal stability [AIAA PAPER 65-784] 19 p3279 A66-36485

Wind tunnel research of deep stall aerodynamic characteristics of T tail analyzed as preliminary design guide [AIAA PAPER 65-737] 19 p3280 A66-36491

Linearized motion equations for low-altitude flight pitching stability of aircraft with control surface 21 p3696 A66-38937

Three-dimensional parachute dynamic stability theory 22 p3845 A66-40593

**LONGITUDINAL STABILITY AND CONTROL**

Aerothermoelasticity effect on longitudinal stability and control of winged aerospace vehicles [AIAA PAPER 64-489] 05 p0775 A66-15075

Glide slope direct lift control of carrier landings, discussing trim change with actuation and longitudinal stability and control 07 p0986 A66-17272

Response of hypersonic aircraft to abrupt control displacements, determining vehicle characteristics, design and operational parameters 09 p1330 A66-20739

Spacecraft longitudinal and lateral stability along reentry trajectory during deceleration period determined, using equations of motion 17 p2846 A66-32897

**LONGITUDINAL WAVE**

Longitudinal wave decay in inhomogeneous plasma may vary with distance 01 p0109 A66-10257

Longitudinal elastic wave of finite amplitude propagation in isotropic solid 01 p0057 A66-10421

Four-plasmon decay effects for longitudinal waves show broadening of noise spectrum 09 p1407 A66-19964

Longitudinal elastic wave of finite amplitude propagation in isotropic solid 11 p1736 A66-22606

Wave propagation during gyroresonance interaction, noting nonlongitudinal characteristics of waves generated in magnetosphere between beams of charged particles 13 p2072 A66-25462

Longitudinal wave decay in inhomogeneous plasma may vary with distance 13 p2148 A66-25974

Stability criteria of system with negative differential conductivity showing generation of longitudinal waves, noting amplitude buildup increment 14 p2358 A66-27085

Longitudinal and transverse waves transformation in nonuniform plasma 17 p2969 A66-32543

Quasi-linear hyperbolic equations governing one-dimensional longitudinal wave propagation in viscoelastic material 17 p3032 A66-33502

Longitudinal wave propagation in plasma waveguide, observing lower and higher modes 18 p3072 A66-34567

Two-stream instability for longitudinal waves in plasma traversed by ion beam 18 p3148 A66-34909

Longitudinal sound waves attenuation in superconductor with spatially dependent energy gap by Green function method applied to ultrasonic attenuation in type II superconductor 21 p3795 A66-38548

Microwave plasma diagnostics using

longitudinal radio wave propagation 21 p3790 A66-39068

Longitudinal wave in cylinder of viscoelastic material for case of small frequencies, obtaining propagation equations by using stress-strain relations, compatibility conditions and motion 22 p3996 A66-40703

Stability criteria of system with negative differential conductivity showing generation of longitudinal waves, noting amplitude buildup increment 22 p3967 A66-40841

Monochromatic longitudinal wave amplification by charged particle beam in nonlinear plasma, noting amplitude dependence on coordinate 24 p4243 A66-42520

**LOOP**

SA CIRCUIT

SA CLOSED LOOP SYSTEM

SA RING

SA SERVO LOOP

Acquisition behavior of phase-locked loops analyzed by treating loop as first-order loop with slowly varying dependent bias 12 p1856 A66-24648

Divergent vertical helicopter oscillations due to pilot presence in collective control loop and physiological response of pilot to oscillations 17 p2843 A66-32719

**LOOP ANTENNA**

Radiation from dielectric coated cylindrical core loop antenna surrounded by lossy plasma sheath 01 p0040 A66-10552

Circular filament of electric current in unbounded magnetotonic medium, measuring radiation resistance for constant current distribution 05 p0633 A66-15122

Current distribution on L-band loop antenna composed of four quarter-circular sections 06 p0850 A66-16446

Russian text on diffraction and radiation of waves 08 p1257 A66-19755

Transient processes in thin open-loop and closed-loop antennas studied by method that takes transmission line processes into account 08 p1199 A66-19759

Current distribution along circular loop antenna, obtaining backscattering patterns as function of rotation angle 10 p1510 A66-21592

Matrix analysis of scattering from conjugate-matched antenna 11 p1662 A66-22541

Electromagnetic scattering by circular wire loops loaded with lumped impedances, obtaining solution to integral equation by Fourier series 14 p2247 A66-26863

Impedance integral evaluation for antenna loop immersed in conducting medium 14 p2256 A66-27923

Radiation pattern of dielectric coated cylindrical core loop antenna in lossy plasma sheath 15 p2452 A66-29712

Normalized self-and mutual admittances of two identical bare circular loop antennas in air or conducting medium evaluated, obtaining single integral equation for current distribution 19 p3321 A66-36405

Broadening frequency bandwidth of full-wave directive loop antennas employing reflectors and directors 20 p3531 A66-37727

Cardioid whip-loop receiving antenna system using only passive circuitry to bring normal and abnormal components of VLF sky waves into phase with each other 22 p3872 A66-39732

Propagation and radiation of radio waves from dielectric coated prolate spheroidal core loop antenna surrounded by plasma sheath 24 p4184 A66-42745

**LOLAN**

Signal simulator for testing Loran A and Loran C airborne receivers in laboratory, using digital simulator circuits to test dynamic response of tracking circuits 23 p4088 A66-41253

**LOLAN C**

Loran C system and technique of ground stations for giving ships fixes 02 p0257 A66-12037

Loran C navigational system considering sky waves and future of Loran D system 02 p0258 A66-12043

Loran C navigation system using pulsed hyperbolic radio signals, noting factors influencing range and accuracy 02 p0258 A66-12045

Airborne hyperbolic coordinate converter for Loran C signals, noting flight testing 02 p0258 A66-12047

Flight testing of FAA-Lear Siegler receiver/converter airborne system with Loran-C hyperbolic navigation system 07 p1069 A66-17706

Microminiature Loran-C Receiver/Indicator for analog-to-digital conversion, using integrated circuit technology 10 p1555 A66-22047

Direct frequency comparison of atomic hydrogen masers in different places and conditions by simultaneous monitoring of Loran C signals 12 p1890 A66-21445

Loran C receiving equipment using microcircuits, noting error 17 p2955 A66-33220

Central Telecommunications Laboratory 882 P arithmetical airborne computer 20 p3523 A66-38013

Photographic integration process using Loran-C pulses for precise synchronization of timing signals at any point in continental U.S. 22 p3862 A66-39733

**LORENTZ**

Actual line shape expected from accelerating radiating ion, errors due to Lorentzian approximation and results for ion laser transition in rare gas lasers 16 p2716 A66-30181

**LORENTZ FORCE**

Traveling fields in interaction of ionized gases with electromagnetic field currents checking Lorentz force and magnetic induction 03 p0404 A66-12980

Lorentz force maximization in continuous-flow Hall current plasma accelerators, using either axial electric field and radial magnetic field or radial electric field and slanted magnetic field 08 p1263 A66-19154

Nonrelativistic force in simple magnetizable fluid derived from thermodynamic information about energy and power 12 p1915 A66-24651

Voltage drop in direction of current flow produced in superconducting alloys by current perpendicular to magnetic field explained by assuming Abrikosov filaments move under influence of Lorentz force 13 p2168 A66-26022

Temperatures, Lorentzian widths and drift velocities of excited neutral and ionic species in argon-ion laser, noting thermal equilibrium achievement 15 p2512 A66-28695

Nonlinear terms of electromagnetic field in ionized gas reduced to linear system and single nonlinear equation 15 p2547 A66-29648

Nonlinear flux flow in type II superconductor, noting resistance characteristics 16 p2768 A66-30135

Mean Lorentz force field of electrically conducting medium in turbulent motion affected by Coriolis force 16 p2763 A66-31349

Spatial charge region, excess electron concentration, capacitance and conductivity in semiconductor layer with Lorentz forces acting on carrier determined as functions of surface potential and applied electromagnetic field 19 p3442 A66-35819

Microinstability-driven losses in energetic proton plasma formed by single transit of 600-keV hydrogen ion beam through magnetic mirror field 19 p3421 A66-36543

**LORENTZ GAS**

Kinetic theory of Lorentz plasma in rotating magnetic fields and electromagnetic fields based on Boltzmann equation 01 p0113 A66-10640

Electron distribution function of homogeneous Lorentzian plasma calculated by successive approximation method 01 p0115 A66-11077

Self-modulation and Luxembourg effect in electromagnetic wave propagation in isotropic and homogeneous Lorentz plasma 01 p0031 A66-11083

Theoretical model of isolated Lorentz line of IR absorption by gases applied to atmospheric optics and spectroscopy problems 08 p1248 A66-19307

Microinstability limitations of DCX-1 energetic plasma from gas dissociation and Lorentz force dissociation 10 p1568 A66-21826

Relaxation of isotropic distribution of test particles in homogeneous background gas, including nonzero temperature effects 11 p1741 A66-23390

Minimum internal energy calculation of

anisotropic oxygen polarizability and Lorentz correction in barium titanate crystal 11 p1758 A66-23408

HF and LF alternating electric fields effect on weakly ionized argon, temperature modulation and production of harmonics 13 p2141 A66-25447

Nonlinear interaction between two modulated electromagnetic waves propagating in homogeneous anisotropic Lorentz plasma 14 p2344 A66-27941

Approximation method for thermal diffusion factor of almost Lorentzian gas mixture with better convergence properties than Chapman-Enskog approximation 16 p2824 A66-30119

Nonlinear effects in homogeneous Lorentz plasma, calculating anisotropies of electron distribution function 17 p2963 A66-31842

Experimental study of isotropic term of acoustic radiation intensity in gas 18 p3136 A66-34724

Theoretical model of isolated Lorentz line of IR absorption by gases applied to atmospheric optics and spectroscopy problems 19 p3400 A66-36043

**LORENTZ TRANSFORMATION**

Uniqueness of gravitation theory developed by method of classical Lorentz covariant field theory 01 p0107 A66-11095

New tests for invariance of vacuum state under Lorentz group 04 p0546 A66-13456

Lorentz-invariant theories of gravitation analyzed, using astronomical tests for comparing results predicted by theories with general relativity formulas 05 p0716 A66-15088

Lorentz-invariant Markov process in relativistic phase space 12 p1914 A66-24406

Traveling wave interaction in nonlinear medium Lorentz transformation 13 p2163 A66-25434

Potential equations in homogeneous isotropic moving media derived, using Minkowski theory 14 p2340 A66-27040

Basic premises of tetrad formulation of general relativity theory and relationship to generalized Lorentz transforms 14 p2332 A66-27212

Lorentz-equivalence generalization in substratum theory 15 p2593 A66-28652

Lorentz-covariant theory of gravitation constructed with linear field equations 15 p2542 A66-29332

Irreducible unitary representations of restricted Lorentz group on manifolds of time-, light- and spacelike 4-vectors, obtaining plane-wave solutions of Klein-Gordon equation 15 p2528 A66-29622

Lorentz invariant space-time gravitational field theory, Maxwellian gravitokinetic field of potential and kinetic components and precession of orbit of Mercury analyzed by Einstein restricted theory of relativity 16 p2802 A66-31011

Energy pulse tensor formulation of law of conservation of energy in interacting electromagnetic field, using complete inhomogeneous Lorentz group 18 p3135 A66-34579

Lorentz transformation of thermodynamic quantities, noting application of formalism of statistical mechanics, validity of Planck-Einstein equations for total energy and momentum 22 p3997 A66-39806

Radiation in relativistically moving anisotropic plasma medium, noting Lorentz type transformation of plasma electron volume density 23 p4105 A66-41638

**LOSS**

S ENERGY LOSS

S HEARING LOSS

S LEAKAGE

S OHMIC LOSS

S PLASMA LOSS

S TRANSMISSION LOSS

**LOUDSPEAKER**

Design technique for large capacity acoustic instrument 14 p2296 A66-28036

**LOW ALTITUDE**

Decreased flying ability of pilots in simulated low altitude high speed flight from 0.4 to 0.9 Mach 12 p1809 A66-23928

Linearized motion equations for low-altitude flight pitching stability of aircraft with control surface 21 p3696 A66-38937

**LOW ASPECT RATIO WING**

Flow past slender bodies of revolution or

low aspect ratio wings with finite span or cross-sectional area 04 p0454 A66-13517

Subsonic flow near trailing edge of low aspect ratio delta wing 04 p0454 A66-13518

Matrix scheme using two-way spline curves for interpolating low aspect ratio lifting surface mode deflections for use in aeroelastic calculations 05 p0774 A66-15058

Aircraft with wings of low aspect ratio 09 p1329 A66-20556

Low aspect ratio wing moving above interface of two fluids of different density, replacing value of velocity potential by value obtained at large distance downstream from wing 13 p2068 A66-26539

Theoretical nonlinear method for calculating aerodynamic forces on low-aspect-ratio wings at high angles of attack and wide range of Mach numbers 20 p3491 A66-36907

Downwash angles behind rectangular wings of small aspect ratio calculated at subsonic velocities according to nonlinear theory 23 p4010 A66-41781

**LOW DENSITY GAS**

Introductory book on hypersonic aerodynamics covering continuum flow of inviscid nonheat-conducting perfect gas and real gas, viscous and low density effects in hypersonic flow 02 p0176 A66-11875

Neutral atomic beam used to measure total ionization cross section of argon atoms incident on low density argon gas 07 p1083 A66-18421

Single and double Langmuir probe for low density plasma, noting measurement of electron temperature and density 10 p1535 A66-21514

Interferometer apparatus used in combination with Fabry-Perot etalon to study properties of low density air streams 11 p1709 A66-23298

Tenuous hydrogen plasma injection into axial magnetic cusp field at entrance of long solenoid 13 p2147 A66-25749

Spectral energy distribution and Doppler broadening of Rayleigh light scattered from hydrogen and argon gas at low density, using Fabry-Perot interferometer 13 p2133 A66-26169

Argon flow through long tube compared with Weber theoretical model, applying classical continuum equations 14 p2274 A66-27444

Plasma stability analysis, discussing low density fluid equations, variational principle and sufficiency condition at moderate densities, electric field effect, etc 15 p2554 A66-29746

Supersonic section of nondissipative sectional low density plasma accelerator, calculating two-dimensional cold plasma flow 17 p2964 A66-31894

Anomalous electron diffusion and ion acceleration measured in steady state low-density weakly-turbulent plasma subjected to crossed E and B fields 18 p3149 A66-34913

**LOW DENSITY WIND TUNNEL**

Rarified gas dynamics in space flight and hypersonic low density wind tunnel of Goettingen Aerodynamics Research Facility 07 p1017 A66-17479

Low density plasma jet wind tunnel for investigation of low density high-enthalpy high-speed flow 09 p1364 A66-20253

Pressure distribution and low density effects on sharp flat plates and sharp and blunt cones measured in hypersonic wind tunnel 11 p1634 A66-22930

**LOW FREQUENCY**

Filtering properties of frequency-stability transport circuits of molecular beam generator, noting design considerations for high efficiency 09 p1353 A66-20442

Lumped-circuit LF general three-resonator filter in rectangular wave guide using inductive susceptances as coupling elements 10 p1514 A66-21911

Charge sheath role at discharge wall in determining boundary conditions for LF wave in low pressure discharge, using hydrodynamical model 12 p1923 A66-24571

5 kw LF power amplifier with improved frequency response, noting design and operation 12 p1843 A66-24682

Drift instabilities in thermionic plasmas, noting excitation of LF oscillations with finite perturbation amplitude around

cathode ion sheath 13 p2145 A66-25729

LF spectrum measurements of radio source 3C84, including plot of flux density vs frequency 14 p2384 A66-27846

Shear relaxation time of monatomic fluids for liquid and dense gas phases calculated, using LF viscosity data and estimates of HF elastic moduli 14 p2277 A66-27977

LF wave in cylindrical plasma in magnetic field where ion beam is flowing and modes are nonaxisymmetric 15 p2553 A66-29629

LF resonances in mixed state of pure niobium, noting line shape and damping decrease 16 p2770 A66-30186

Chain code method of eliminating LF drift disturbance error in calculation of impulse-response function of time-invariant system 24 p4187 A66-42368

**LOW LEVEL TURBULENCE**

Vertical velocity fluctuations in nocturnal low level jet examined by sonic anemometers 04 p0541 A66-13666

Low altitude turbulence model for aircraft gust load estimation related to meteorological parameters, terrain conditions and height [AIAA PAPER 65-14] 09 p1400 A66-20741

Severely turbulent airflow at low levels over United Kingdom 11 p1730 A66-23015

Low level wind jets at White Sands Missile Range 17 p2949 A66-33339

**LOW PASS FILTER**

Integral restrictions on time delay of linear phase low pass matching networks with prescribed parasitic loads 02 p0208 A66-11909

Optimal amplitude frequency and transient process characteristics in linear loops of low pass filter type 02 p0209 A66-12268

Filter techniques for high-speed diode switches designed to suppress troublesome switching transients 06 p0842 A66-15974

Distributed stepped impedance low-pass prototype filter, giving impedance values for filters with Chebyshev equal-ripple characteristics 06 p0844 A66-16082

Band stop filters, discussing insertion loss vs frequency characteristics for large and small dissipation and arbitrary number of resonators 06 p0845 A66-16088

New low-pass filter with attenuation by dissipation, noting reflection and attenuation vs frequency 06 p0846 A66-16098

L-band waffle-iron filter fabrication and modifications for high power characteristics 06 p0847 A66-16100

Circuit network in designing low pass filters with minimum attenuation requirements in stopbands and optimum transient behavior, using Schussler technique and iterative process 07 p1008 A66-17751

Schussler-elliptic low pass filters, discussing solution of approximation problem for low pass filters with good transient response 08 p1198 A66-19748

Seven-stage RL feedback amplifier with 500-mc low-pass bandwidth and 52 db gain, employing frequency compensation technique 11 p1671 A66-23244

Optimal amplitude frequency and transient process characteristics in linear loops of low pass filter type 12 p1848 A66-23872

Dielectric layers of alternating low and high dielectric constant used as filters in millimeter wave, IR and optical regions 12 p1831 A66-23906

Optimum realizable transmitter waveforms for high-speed data transmission, noting application to low pass filter channel 13 p2019 A66-25146

Asymmetrical property of binary pseudorandom noise generators, noting Gaussian probability density function in output of low pass filter 17 p2894 A66-33110

Ideal integrator compared with low pass filters 18 p3076 A66-33835

Pulse-shaping networks with frequency-band limitation, noting approximation of idealized networks with echo equalizers 19 p3306 A66-36656

Low-pass filter characteristics, particularly phase and group delay and magnitude characteristics, considering various network types 21 p3709 A66-38671

Steady state and transient response characteristics of class of low pass filters noting transmission properties, frequency

and time domain considerations, etc 21 p3713 A66-39271  
 Surface effects at interface between linear and nonlinear media representing transmission lines of low pass filter type 22 p3861 A66-39656  
 Low pass elliptic function filter fabricated from RC network and low gain voltage amplifier 23 p4050 A66-41611

## LOW PRESSURE CHAMBER

Growth of ice crystals freely falling in atmosphere and form when produced by cloud element coagulation analyzed, using low pressure chamber 01 p0097 A66-11105  
 Solar simulator with pumping setup to obtain low pressure atmosphere for simulated space environment, noting construction, operation and results 13 p2057 A66-25495  
 Aerospace medical advances in Polish military aviation and pilot testing procedures and equipment, particularly low pressure chamber and centrifuge 14 p2271 A66-28365  
 Low atmospheric pressure and oxygen-rich environment effect on characteristics of uninterrupted long-term exposure to toxic gases of space cabin atmospheres, noting animal testing 16 p2642 A66-30623  
 Man-rating of low-pressure chambers at Crew Systems Division and Structures and Mechanics Division of NASA Manned Spacecraft Center /MSC/ at Houston 19 p3289 A66-35842

## LOW SPEED HANDLING

Aerodynamic characteristics of fixed-geometry double delta wing SST, noting low speed handling improvement due to vortex flow [AIAA PAPER 64-591] 05 p0610 A66-15069  
 F5D-1 aircraft delta wing modification, describing wind tunnel and flight test results with ogive wing 06 p0802 A66-16805  
 VTOL control power requirements under low speed flight conditions for randomly disturbed mechanical system 09 p1330 A66-20736  
 Double-delta supersonic air transport low-speed operational characteristics, noting wind tunnel tests and design parameters 13 p1991 A66-25760  
 Low speed handling with special reference to super stall, emphasizing rate of change of angle of attack and flight trials of BAC 111 and VC10 aircraft 19 p3280 A66-36748

## LOW SPEED STABILITY

Stability and control characteristics of STOL aircraft in low speed landing approach portion of flight regime [AIAA PAPER 65-715] 01 p0013 A66-10952  
 Boundary layer control high lift system for high speed aircraft, using ejector for momentum augmentation and air bleed from propulsion system [AIAA PAPER 64-589] 05 p0610 A66-15070  
 Text on longitudinal static stability of low-speed aircraft including effect on pilot, flight test, pitch maneuverability, etc 14 p2222 A66-26792  
 Stability and control characteristics of STOL aircraft in low speed landing approach portion of flight regime [AIAA PAPER 65-715] 16 p2635 A66-31591

## LOW SPEED WIND TUNNEL

Low speed wind tunnel design and testing including V/STOL aircraft, helicopters, reentry vehicles, etc 20 p3540 A66-37009

## LOW TEMPERATURE ENVIRONMENT

Fluids and elastomers for low temperature heat transfer and hydraulic systems [ASLE PREPRINT 65-LC-7] 02 p0249 A66-12256  
 Microwave emission from InSb, measuring energy generated at low temperatures and intense electric and magnetic fields 07 p1103 A66-18218  
 Commercial fuel cells, noting biochemical, regenerative and low temperature carbon monoxide fuel cell 07 p0996 A66-18476  
 Occurrence of supernumerary fogbows at subfreezing temperatures, noting interval of appearance and possible formation mechanism 09 p1400 A66-20733  
 Low temperature resistivity of yttrium-based alloys containing small amounts of rare earth metals, deriving exchange integrals from resistivity data 09 p1430 A66-20846

Practical Philips cycle for low temperature refrigeration, noting equal coefficient of performance to that of ideal Carnot cycle under isothermal conditions 09 p1472 A66-20879

Combined cryostat/oven and specimen transfer device for tensile testing, noting design, operation and results 11 p1683 A66-22699

Plastic deformation of Charpy specimens under plane stress-strain conditions, noting low temperature brittle fracture behavior, effects of notch geometry and loading, etc 12 p1969 A66-24532

Test program evaluating protective clothing and safety equipment for personnel working in Saturn booster at minus 100 F in oxygen-rich or deficient environment, noting problems with communications, visibility, breathing, etc 12 p1810 A66-24958  
 Fluids and elastomers for low temperature heat transfer and hydraulic systems [ASLE PREPRINT 65-LC-7] 12 p1901 A66-24992

Low temperature transport properties of hydrogen, deuterium and HD, noting quantum phase shift, intermolecular potentials, etc 14 p2414 A66-27973

Resistance anomaly in n-type InSb at very low temperatures, noting experimental results 16 p2768 A66-30140

Laminar boundary layer of low temperature plasma on isolator walls in channel of MHD generator in presence of transverse magnetic field 16 p2758 A66-30327  
 Refrigerated mass spectrometer inlet serving also as low temperature reactor and rough separative device for compounds stable only at very low temperatures 16 p2645 A66-30420

Optical phonon production, showing existence of electric field strength range at low temperature scattering in which phonon emission results in electron stoppage 20 p3577 A66-37376  
 Minimum changes in viscosity of liquid lubricants with temperature, discussing low temperature lubricating oils [ASME PAPER 66-MD-68] 21 p3743 A66-38497

Cryogenic, flame and nuclear radiation temperature effects on pressure transducers, noting zero and sensitivity shifts and thermal gradients 21 p3740 A66-39427

Man rating requirements of space environment simulation laboratory, consisting of two large chambers with floors which can be cooled by liquid nitrogen down to 92 degrees K 22 p3892 A66-40239

High energy density Zn/O battery system, noting good low oxygen pressure and low temperature performance characteristics 23 p4022 A66-41759

Gas chromatography analysis of ambient gas and vapor effects on semiconductor and solid state devices at low temperatures 24 p4179 A66-42095

## LOW TEMPERATURE PHYSICS

### SA CRYOGENICS

Phase diagram from thermodynamic data of complex solution of nitric acid and nitrogen tetraoxide at low temperature 01 p0163 A66-10626

Superconducting critical field curves for tin, indium and mercury below one degree K, with entropy difference linear in temperature for free electron gas 02 p0271 A66-11480

Silver bonded diode for parametric amplifiers improves performance when cooled at liquid nitrogen temperature 02 p0198 A66-11520

Temperature dependent component in low temperature thermoelectric power of doped n-germanium observed in liquid helium region, noting negative magnetoresistance 04 p0570 A66-14369

One- and two-dimensional superconductivity, discussing effect of thermodynamic fluctuations on off-diagonal long-range order 05 p0718 A66-15865

Low temperature alpha radiation and subsequent isothermal recovery effects on electron structure of gold, relating resulting failures to Frenkel defects 07 p1048 A66-17303

Single injection measurements in n-type

silicon at liquid-helium temperatures under transient conditions, using pulse measurements 07 p1107 A66-18414

Anomalies in low temperature properties of noble metal alloys such as thermoelectric power and nonmonotonic behavior of resistivity with temperature 08 p1274 A66-19362

Book on theory and measuring techniques for electrical resistance of metals at low temperatures and cryogenics 09 p1388 A66-19976

Low temperature physics - International Conference, Columbus, Ohio, August-September 1964 09 p1413 A66-20004

Effect of static magnetic field on millimeter wave absorption in superconducting aluminum at reduced temperature 09 p1416 A66-20025

Low temperature physics LT9 - International Conference, Columbus, Ohio, August 1964 09 p1424 A66-20075

Thermoelectric power of actual ferromagnetic metals over wide temperature range, examining effect of alloying and solute magnetic ions 09 p1425 A66-20080

Low temperature chromatographic separation of hydrogen isotopes based on interaction with alumina surface electric fields 11 p1650 A66-23209

Low temperature techniques in satellite communications systems, noting maser, cooled parametric amplifier and trend toward closed-cycle refrigerators 13 p2042 A66-26104

Effect of temperature on cyclic minimum creep rate and other phenomena associated with cycle dependent deformation from 77.4 to 295 degrees K [ASME PAPER 66-MET-7] 14 p2395 A66-26975

Text on experimental low temperature physics covering experimental techniques, liquid helium, superconductivity and electronic properties in metals 15 p2566 A66-29320

Heat capacity of high purity beryllium measured at temperatures below 30 degrees K 16 p2775 A66-30727

Thermal ionization for low temperature plasma confined in magnetic field, examining magnetic field effect on ionization 16 p2762 A66-31166

Textbook on specific heats at low temperatures, including electronic, magnetic and lattice contributions of solids, gases and liquids, calorimetry, refrigeration, internal energy, etc 16 p2748 A66-31313

Thermal expansion and electrical resistivity measurements below 400 degrees K on niobium and two niobium alloys containing tungsten 16 p2725 A66-31454

Inverse Compton X-ray and gamma ray flux due to high energy electron interaction with cosmic blackbody radiation at 3.5 degrees K 17 p2992 A66-31914

Elementary processes in low-temperature plasma 18 p3143 A66-34029

Quantum corrections to second virial coefficient for low-temperature gas 21 p3836 A66-39175

Book on low temperature techniques and common cryogenic systems 24 p4238 A66-43161

## LOW THRUST PROPULSION

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 01 p0100 A66-10026

Perturbation solutions of differential equations of motion for low-thrust rocket trajectories 02 p0288 A66-11546

Low thrust spiral trajectory of satellite of variable mass 02 p0288 A66-11551

Linear theory of optimum variable thrust rendezvous trajectories with power limit propulsion system 04 p0575 A66-13457

Fehlberg integration method used to calculate optimum interplanetary transfer orbits at low thrust acceleration 04 p0576 A66-13527

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 14 p2328 A66-27419

Recovery of interplanetary vehicles by low thrust braking outside atmosphere 14 p2391 A66-27472

Low-thrust engine spacecraft control during boost phase, independent of velocity vector determination, by stabilizing osculating orbit plane relative to planetocentric coordinate system 15 p2534 A66-28490

Low thrust space flight mechanics and optimal control of low thrust engine spacecraft 15 p2596 A66-29157

Matching planetocentric and heliocentric low-acceleration trajectories in analysis of propulsion system 15 p2598 A66-29297

Trajectory energy requirements for low-thrust flights throughout solar system using nuclear-electric propulsion [AIAA PAPER 66-497] 16 p2805 A66-31495

Bibliography of programmed low-thrust trajectories and optimal low-thrust trajectories 17 p3001 A66-32350

Low-power electric propulsion systems characteristics and design [AIAA PAPER 66-578] 18 p3165 A66-34445

Microrocket technology utilizing solid, liquid and gaseous propellants for spacecraft control, including performance measurement techniques [AIAA PAPER 65-620] 20 p3629 A66-38149

Asymptotic solution for optimum power-limited orbit transfer 21 p3811 A66-38736

Low-thrust rockets for spacecraft attitude control, noting subliming solid rockets 21 p3807 A66-38800

Optimum parameters for low-thrust propulsion system with energy storage for specific maneuver 21 p3808 A66-38974

**LOWER ATMOSPHERE**

Simultaneous lower atmosphere observations with radar and aerological measurements by airborne meteorograph and electrometeorograph 02 p0253 A66-11273

Vertical profile of refractive index in lower atmospheric layer measured by modified A-22-IV radio probe on captive balloon 02 p0253 A66-11274

Vertical and horizontal turbulent diffusion in lower atmospheric layer as two-layer problem 04 p0513 A66-13442

Electrical effect of large meteorite moving in lower atmosphere 04 p0577 A66-13846

Spectra of vertical turbulent thermal fluxes and momenta in lower atmospheric layer, including review of relevant literature sources 09 p1398 A66-19893

Lower atmospheric density measurements through light scattering from Q-spoiled ruby laser beam, using optical radar detector 09 p1373 A66-20398

IGY and IGC data on atmospheric washout of radioactive fission products by precipitation 14 p2376 A66-27540

Air-temperature and wind profiles in atmospheric boundary layer and dependence upon stability criteria of ground layer 16 p2741 A66-30772

Wind velocity spectra and correlation functions statistically analyzed in ULF range for lowest levels of atmosphere 16 p2742 A66-30773

Lower atmospheric diurnal variations in air temperature, directional wind velocity and gradients during clear anticyclonic weather 16 p2742 A66-30774

Cosmic ray neutron flux as function of altitude measured near Earth surface, using boron trifluoride detectors 17 p2992 A66-31974

Solar radiation control for changing meteorological conditions in lower atmospheric layer 20 p3594 A66-38373

**LOWER IONOSPHERE**

Time dependency effect on effective recombination coefficient in lower ionosphere 02 p0223 A66-12115

Book on lower ionosphere physics noting radio wave propagation, ionospheric currents, solar radiation and flares, ion kinetics, electron collision frequencies, etc 04 p0515 A66-13835

Lower ionospheric wind effect on geomagnetic field variation 05 p0668 A66-14935

Lower ionospheric characteristics determined by VLF radio waves propagated over long distances by multiple reflections between Earth and D region 09 p1370 A66-19973

Excitation, internal reflection and limiting

polarization of whistler waves in lower ionosphere, establishing reciprocity relation between incident waves from above and below 11 p1651 A66-22369

Anomalous ionization of lower ionosphere at medium latitudes during worldwide geomagnetic storm result in increased radio wave absorption in ionosphere 11 p1696 A66-22416

Lower ionosphere ionization for quiet and disturbed Sun calculated for comparison of experimental and theoretical values for electron concentration and effective recombination 11 p1696 A66-22417

Time dependency effect on effective recombination coefficient in lower ionosphere 14 p2286 A66-28074

Vertical drift of charged particles effect on electron density profile as cause of seasonal variations in ionospheric absorption 15 p2490 A66-29944

Macroscopic equations describing effect of negative ions on diffusion of electrons and positive ions in lower ionosphere 17 p2917 A66-32255

Nitric oxide distribution in lower ionosphere calculated from reaction coefficients and mass spectrometric measurements of density 17 p2922 A66-33354

Meteorite atomic ions in lower ionosphere 17 p2922 A66-33355

Partial reflections utilizing different amplitudes of ordinary and extraordinary backscattered waves for electron number densities and collision frequency measurement in lowest ionosphere 22 p3906 A66-39949

Computer calculations from Sen-Wyller expression for specific absorption of radio wave in lower ionosphere 22 p3906 A66-39954

Long VLF path propagation measurements, determining characteristics of lower ionosphere, noting role of phase and amplitude variations during solar flares 22 p3907 A66-39959

Effective recombination coefficient in lower ionosphere, deriving expression for dependence of dissociative recombination on temperature and solar distance 24 p4201 A66-42758

**LOX**

**S LIQUID OXYGEN /LOX/**

**LOX-HYDROGEN ENGINE**

Reliability design concepts in cryogenic fluid systems in Saturn S-IV stage propulsion system, noting hydrogen and LOX tank pressurization systems 01 p0129 A66-10079

Applicability of liquid hydrogen-oxygen technology to development of European launch vehicles 02 p0295 A66-11671

Base thermal environment measured on flight tests of eight-engine LOX/RP-1 propelled Saturn I booster [AIAA PAPER 65-212] 14 p2391 A66-27873

**LRV**

**S LUNAR ROVING VEHICLE /LRV/**

**LUBRICANT**

SA GAS LUBRICANT

SA GRAPHITE

SA GREASE

SA HIGH TEMPERATURE LUBRICANT

SA OIL

SA SOLID LUBRICANT

Sliding friction tests at ultrahigh load of eight greases and 18 dry lubricants and various base materials [ASLE PREPRINT 65-LC-23] 02 p0237 A66-12249

Materials for use as rolling-contact bearing lubricants in liquid hydrogen environment [ASLE PREPRINT 65-LC-9] 02 p0238 A66-12255

Physical properties of new class of lubricants, methyl alkyl silicones, illustrating exceptional lubricating ability [ASLE PREPRINT 65-LC-4] 02 p0238 A66-12261

Fuels and lubricants with thermally stable molecular structure and antioxidants to meet requirements of supersonic transport 03 p0414 A66-13221

Density and viscosity changes of lubricants in contact due to pressure changes in concentrated-contact lubrication [ASME PAPER 65-LUB-4] 04 p0527 A66-14240

Partial porous metal bearings performance

during steady state operation with full film of lubricant, determining pressure distribution [ASME PAPER 65-WA/LUB-3] 05 p0689 A66-15526

Lubricant effect on fatigue life of stationary ball on flat contact subjected to oscillatory normal load [ASME PAPER 65-WA/CF-3] 05 p0690 A66-15622

Gold thin films of 1800 angstroms to be used as lubricants were vapor-deposited on Ni, Ni-Cr and Ni-Re substrates in vacuum 06 p0884 A66-15937

Aircraft turbine lubricant technology for high Mach number engines especially SST, noting stability, autoignition, coking, toxicity, etc [SAE PAPER 660071] 09 p1434 A66-20156

Means of assessing aviation turbine lubricant quality, considering specification, maintenance, operational factor and equipment strip approach [SAE PAPER 660074] 09 p1434 A66-20159

Solid and dry-film lubricants, tabulating kinetic coefficients of friction, noting particle size, viscosity, costs, wear life, application, etc 12 p1885 A66-24099

Physical properties of new class of lubricants, methyl alkyl silicones, illustrating exceptional lubricating ability [ASLE PREPRINT 65-LC-4] 12 p1889 A66-24989

Structural changes in metal surface layers under boundary friction conditions in presence of surface active lubricant additives 13 p2086 A66-25884

Nonstructural materials for space utilization including lubricants, sliding electrical contacts and dielectrics 14 p2319 A66-28006

Metal flow, friction and lubricant performance during stamping of thin titanium alloy blanks 14 p2304 A66-28202

Thermal stability, adhesion prevention, stress and die wear reduction and air pollution of industrial lubricants 14 p2304 A66-28207

Grease lubricants for aerospace application, determining physical properties and testing them at 400 degrees F and under high vacuum [ASLE PAPER 66AM 3C2] 16 p2711 A66-30409

Lubricant selection for lunar missions and manned spacecraft based on compatibility with oxygen-rich environment, propellant, anodic coatings and sliding friction behavior in vacuum [ASLE PAPER 66AM 7A2] 16 p2712 A66-30415

Sliding friction tests at ultrahigh load of eight greases and 18 dry lubricants and various base materials [ASLE PREPRINT 65-LC-23] 16 p2713 A66-30571

Differential thermal analysis for study of thermal decomposition of organic lubricant system 17 p2928 A66-31899

Vapor deposited gold thin films to obtain adhesion and durability between film and substrate essential as lubricants in high vacuum 17 p2929 A66-31979

Operating lifetime of porous bearings, discussing dependence on quality of impregnating lubricant 17 p2930 A66-33143

**LUBRICATING OIL**

Laboratory, component and engine tests for lubricant properties of J-79 jet engine including elastomer volume swell, oxidation-corrosion, lubricity, etc [SAE PAPER 650816] 01 p0078 A66-10821

Disengaging gear lubrication through heat dissipation as factor in Ryder rating of rocket lubricant [ASLE PREPRINT 65-LC-16] 02 p0237 A66-12253

Polyolefin fluids with wide viscosity range compared with petroleum oils and existing synthetic lubricants for extreme temperature application [ASLE PREPRINT 65-LC-1] 02 p0238 A66-12259

Lubricant film thickness in elastohydrodynamic range measured as function of speed in rolling configuration for mineral oils and esters 07 p1040 A66-18292

High activity of alkali metal salts of carboxylic acids and substituted phenols as synergists for arylamine antioxidants in ester-type synthetic lubricating oils 11 p1711 A66-23123

Simulation of lubricating oil circulation in aviation turbine engines by constructed model, noting change of viscosity, acid number and electrical conductivity at high temperatures 12 p1803 A66-23751

Constant oil monitoring system using electric conductivity tester for extending oil life in gas turbine engines [SAE PAPER 650814] 12 p1935 A66-23844

Vacuum effects on lubricants and bearing materials due to reduced ambient pressure and low concentration of oxidizing gases 12 p1885 A66-24383

Polyolefin fluids with wide viscosity range compared with petroleum oils and existing synthetic lubricants for extreme temperature application [ASLE PREPRINT 65-LC-1] 12 p1888 A66-24986

Oil cushion resilience in hydrodynamic bearings, examining effect on dynamic behavior of unsymmetrical shaft with one disk 12 p1889 A66-24999

Friction and lubrication of polymers 13 p2087 A66-26304

Lubrication parameters with respect to experimental values and reproducibility 14 p2305 A66-28465

Jet oil lubrication and scavenging technique for 20 mm high speed ball bearing [ASLE PAPER 66AM 1B4] 16 p2710 A66-30402

Ball bearing life operating in vacuum with molybdenum disulfide and oils as lubricant [ASLE PAPER 66AM 7A3] 16 p2712 A66-30416

Disengaging gear lubrication through heat dissipation as factor in Ryder rating of rocket lubricant [ASLE PREPRINT 65-LC-16] 16 p2713 A66-30574

Detection and causes of fretting corrosion, discussing prevention via lubrication, effects of load, surface finish, material hardness, friction coefficient, vibration, etc 18 p3117 A66-34400

Spectrometric oil analysis for assessing failure probability of turbojet-engine oil-wetted parts 19 p3355 A66-35524

Additives effect on antioxidant stability and antiabrasion characteristics of lubricating oils used in jet and turboprop engines 20 p3575 A66-38445

Minimum changes in viscosity of liquid lubricants with temperature, discussing low temperature lubricating oils [ASME PAPER 66-MD-68] 21 p3743 A66-38497

Jet oil lubrication and scavenging technique for 20 mm high speed ball bearing [ASLE PAPER 66AM 1B4] 22 p3928 A66-40657

**LUBRICATION**

SA BOUNDARY LUBRICATION

SA SELF-LUBRICATING MATERIAL

SA SPACE ENVIRONMENTAL LUBRICATION

SA SPACECRAFT MECHANISM LUBRICATION

Gas-lubricated bearing equations derived that are valid for wide range of temperature and Mach numbers 04 p0526 A66-14156

Microirregularity lubrication to improve reliability of liquid lubricated rotary shaft face seal [ASME PAPER 65-LUB-11] 04 p0527 A66-14244

Prandtl mixing-length theory used to predict performance of journal bearings operating in turbulent regime [ASME PAPER 65-LUB-17] 04 p0528 A66-14249

Aircraft turbine engine oil drain practices, discussing engine design and materials and minimum and maximum drain time [SAE PAPER 660073] 09 p1434 A66-20158

Pressure distribution of viscous electrically conducting fluid in lubricating layer of cylindrical bearing 12 p1887 A66-24425

Microirregularity lubrication to improve reliability of liquid lubricated rotary shaft

face seal [ASME PAPER 65-LUB-11] 12 p1888 A66-24550

Liquid solid film lubrication of hydrodynamic bearings, including effects of solid particles in liquid base lubricant [ASLE PAPER 66AM 5DE] 16 p2711 A66-30412

Gyroscopic rotor vibrations excited by effect of lubrication layer in sliding bearings and stabilized with intervening elastodamping supports, taking into account moment of inertia of rotor 17 p3027 A66-32605

Steady-state and dynamic characteristics of full circular bearing and centrally loaded arc bearing presented in design charts for turbulent lubrication analysis [ASME PAPER 66-LUBS-4] 17 p2931 A66-33178

MHD lubrication flow in thrust bearing, noting fluid inertia effect on load capacity and flow rate [ASME PAPER 66-LUBS-8] 17 p2931 A66-33181

Surface roughness effects in hydromagnetically lubricated externally pressurized bearings and hydromagnetic squeeze film between two circular plates [ASME PAPER 66-LUBS-9] 17 p2931 A66-33182

Split-inner-race ball bearings design for use as thrust bearings on aircraft gas turbines [ASME PAPER 66-LUBS-10] 17 p2931 A66-33183

Turbulent hydrodynamic lubrication theories and solution of Constantinescu equation for finite-length journal bearing [ASME PAPER 66-LUBS-11] 17 p2931 A66-33184

Eigenvalues and eigenvectors obtained by numerical solution of special Hill equation in lubrication theory [ASME PAPER 66-LUBS-13] 17 p2932 A66-33185

Performance of hydrodynamic, hydrostatic or hybrid bearings determined by numerical solution of Reynolds lubrication equation for incompressible fluid films [ASME PAPER 66-LUBS-4] 17 p2932 A66-33186

Aircraft turbine engine oil drain practices, discussing engine design and materials and minimum and maximum drain time [SAE PAPER 660073] 20 p3628 A66-37255

Lubrication review, 1964 24 p4217 A66-42579

**LUBRICATION SYSTEM**

Process fluid lubrication of system bearings 01 p0079 A66-10867

Mercury lubricated hybrid bearings for lubrication requirements of mercury Rankine Silent Compact Auxiliary Power /SCAP/ system [ASLE PREPRINT 65AM 3A3] 07 p1039 A66-18288

Friction stresses in turbulent lubrication film and dependence on Reynolds number and pressure distribution studied, using mixing-length hypothesis [ASLE PREPRINT 65AM 3A1] 07 p1039 A66-18289

Pressure distribution, surface temperature and deformation profile in conjunctive region of lubricated cylindrical disks rolling or sliding on their peripheral surfaces [ASLE PREPRINT 65AM 4A3] 07 p1039 A66-18290

Thermal elastohydrodynamic lubrication of rolling and sliding cylinders, noting correlation with film thickness and friction experimental data [ASLE PREPRINT 65AM 4A2] 07 p1040 A66-18291

High temperature bearing lubricant requirements for jet engine lubrication systems [SAE PAPER 660072] 09 p1383 A66-20157

Cermet face seals for inert gas environment sealing shaft of liquid-metal pumps employing conventional lubrication system [ASLE PREPRINT 65AM 4C4] 10 p1540 A66-22039

Operation, maintenance and installation of friction and nonfriction bearings, noting characteristics, problems, etc 11 p1711 A66-22951

Experimental friction and lubrication system parameters including load coefficient, oil volume, friction coefficient and bearing temperature characteristics, in mathematical terms 15 p2505 A66-28523

Wear and grease lubrication effects in matched aircraft spline specimens subjected to oscillatory motion 16 p2713 A66-30572

Spherical squeeze-film hybrid bearing with small steady-state radial displacement treated by perturbation method [ASME PAPER 66-LUBS-5] 17 p2931 A66-33179

**LUBRICATION TESTING MACHINE**

Lubricant testing for supersonic aircraft, examining temperature requirements, viscosity, evaporation characteristics, etc 10 p1539 A66-21399

Four-ball wear tester to evaluate solid lubricant dispersions including molybdenum disulfide 14 p2302 A66-27774

Lubricant testing system optimizing with respect to machine ability and cost [ASLE PAPER 66AM 5D2] 16 p2711 A66-30411

Measuring wear life and friction coefficient of dry film and solid film lubricants and plastic materials in ultrahigh vacuum 22 p3923 A66-40216

**LUCITE**

Gauge, using spherical Lucite shell as active element for measuring peak pressures in strong shock waves, designed for underground nuclear explosion 13 p2083 A66-26557

**LUMINESCENCE**

SA CHEMILUMINESCENCE

SA ELECTROLUMINESCENCE

SA FLUORESCENCE

SA LIGHT

SA LUNAR LUMINESCENCE

SA PHOSPHORESCENCE

SA PHOTOLUMINESCENCE

SA THERMOLUMINESCENCE

Cathode ray tube measurements indicate that noise in cathodoluminescence is mainly caused by shot noise of primary beam 02 p0206 A66-12161

Rare earth chelates preparation, luminescence behavior and laser action 05 p0741 A66-15833

Injection luminescence in InAs diodes 07 p1094 A66-17315

Phonon series in cadmium sulfide single crystal emissions at low temperature range 10 p1583 A66-22025

Sensitized and unsensitized phosphorescence and energy transfer properties of series of aliphatic alpha diketones in fluid solution 12 p1916 A66-23620

Laser-generation-type luminescence CdS-CdSe crystals exposed to double photon excitation from ruby laser 14 p2308 A66-27647

Meteor luminescence during atmospheric motion, obtaining radiation coefficient as function of cross sections of particle excitation and pulse transfer processes 15 p2596 A66-29143

Relation between nonlinear luminescence quenching and concentration of luminescence centers in laser crystal 15 p2515 A66-29204

Absorption, excitation, and emission spectra of TI-activated NaI single crystals at liquid helium temperatures 15 p2566 A66-29347

Physics of luminescent ionic crystal - Conference, Lvov, Ukrainian SSR, January-February 1964 15 p2568 A66-29728

Phonon series in cadmium sulfide single crystal emissions at low temperature range 16 p2776 A66-30844

Red and blue flashes in silicate luminescence excited by low-energy proton and lunar reddening by solar-ion excitation 16 p2802 A66-30930

Relation between nonlinear luminescence quenching and concentration of luminescence centers in laser crystal 17 p2936 A66-33053

Spectral distribution of ruby luminescence yield, noting absorption coefficient and excitation band 17 p2938 A66-33509

Quantitative analysis of transient luminous phenomena on lunar surface and relation to solar electromagnetic or corpuscular

excitations 19 p3457 A66-35446  
 Terrestrial aureole structure in daylight, twilight and night and explanation for luminous particles observed in wake of Voskhod spacecraft 19 p3347 A66-35646  
 Organic laser systems including luminescence for achieving laser action, fluorescent and phosphorescent systems and chemistry and spectroscopic properties of rare earth chelates 20 p3576 A66-36970  
 Absorption, excitation, and emission spectra of TI-activated NaI single crystals at liquid helium temperatures 20 p3615 A66-37352  
 Photoconductive and luminescent behavior of undoped cadmium sulfide single crystals at room temperature under laser excitation 21 p3748 A66-39165  
 MHD analysis of luminescence and widening of tail of Finsler 1937 V Comet passing through solar corpuscular stream containing frozen-in magnetic field 21 p3814 A66-39277  
 Stimulated emission, absorption spectra and luminescence of neodymium-activated YAG crystals in pulsed laser 21 p3748 A66-39306  
 Silicon dioxide complexes and deposition of excess oxygen at dislocations and structural defects, examining creation of microplasma breakdown of silicon p-n junctions 22 p3965 A66-40320  
 Spectral distribution of ruby luminescence yield, noting absorption coefficient and excitation band 24 p4249 A66-42123  
 Luminescence spectra of meteorites of different classes using proton excitation, giving estimates of radiation conversion efficiency 24 p4273 A66-42363  
 Radiation of giant pulses of superluminescence by highly excited active medium of Nd glass with rapid cut-in of amplification 24 p4224 A66-42755

**LUMINESCENT INTENSITY**  
**SA LIGHT INTENSITY**  
 Short period fluctuations in intensity of auroral luminescence and relation to geomagnetic fluctuations 01 p0065 A66-11166  
 Sudden decrease in brightness of Encke comet in 1964 07 p1134 A66-17520  
 Anodic luminescence in electrochemical oxidation of silicon crystal 09 p1410 A66-19897  
 Possible luminescence effects on Mercury 12 p1945 A66-23558  
 Space correlation of main emission lines for night sky emission spectra and altitude distribution of sodium luminescence 15 p2495 A66-30060  
 Spectrographic investigation of luminescence of carbon monoxide and dioxide excited by collisions with accelerated ions 17 p2961 A66-33403  
 Rapid secular decrease in absolute brightness and commensurability effects with mean motion of Jupiter studied in evolution of short periodic comets 17 p3013 A66-33407  
 Secular brightness changes in periodic comets and relation to solar activity 17 p3013 A66-33408  
 Luminescent surfaces and structures for information display, discussing cathode ray tube, image intensifier for night vision, spectral emission, etc 19 p3312 A66-35338  
 Minerals responsible for thermoluminescence of meteorites identified and radiation age derived 19 p3465 A66-36386  
 Intensity measurements on molecular oxygen Herzberg I system emitting in afterglow of microwave discharge, noting dependence of transition moment on internuclear distance 20 p3555 A66-38208  
 Scattering and transformation of electromagnetic waves during critical fluctuations in nonequilibrium plasma 21 p3789 A66-39065  
 Air flow luminescence front propagation in electromagnetic shock tube measured, using phase synchronized high-speed photography 21 p3790 A66-39080  
 Single crystal wurtzite CdS luminescence as function of exciting intensity, noting shift of overlapping band structure of green-edge emission indicative of electron-hole recombination 24 p4219 A66-42250

**LUMINOSITY**  
**SA STELLAR LUMINOSITY**

Luminosity distribution of radio galaxies in terms of flux density 02 p0292 A66-12189  
 Aircraft illumination utilizing electroluminescent panels 11 p1640 A66-22666  
 Fast auroral waves differ from flaming aurora in which waves of luminosity appear to converge toward magnetic zenith 15 p2484 A66-28820  
 Intergalactic photon density estimated based on luminosity function of galaxies 18 p3186 A66-34812  
 Observed regularities of contrast characteristics of human visual system in photopic luminance region examined by psychophysics of response/stimulus peak-to-peak measurements of spatial sine wave patterns 21 p3700 A66-39129

**LUMINOUS INTENSITY**  
 Space shift between electron density and luminous intensity of plasma in stationary striation by microwave resonator 03 p0372 A66-13282  
 Visibility conditions for fibrous structure of auroral arcs and bands 04 p0516 A66-13863  
 Appearance frequency and brightness distribution of band and other auroral forms 04 p0516 A66-13864  
 Sky scanner to record luminance distribution over entire sky vault 06 p0883 A66-16948  
 Mount Bezovec meteor expedition /1961/ observations on luminosity function of visual Persels and sporadic meteors 07 p1135 A66-17634  
 Isophotometric representation of solar corona, using photographs of equal density 07 p1136 A66-17735  
 Validity of Kirchhoff law for apparent local spectral emittance and absorbance and total flux calculations for spacecraft cavities [AIAA PAPER 65-135] 08 p1316 A66-18793  
 Radial inhomogeneity, temperature dependence and ion and atom concentration of growing luminous cloud from arc discharge 08 p1266 A66-19771  
 Faraday effect method for measuring magnetic fields of extremely short duration and device for observing slightly luminous phenomena 14 p2290 A66-26824  
 Sky luminance distribution for upper and lower sky at various levels 15 p2484 A66-28831  
 Solar eclipse coronal isotopes, noting spectrum in region of maximum visual sensitivity, ellipticity figures, Ludendorff coefficient, luminosity gradients, etc 15 p2593 A66-28867  
 Nonlinear diffusion equations in electron beam excited plasma noting two- and three-body recombination, radial distribution of electron density, light intensity, etc 15 p2555 A66-29761  
 Spectroscopic data from argon and nitrogen supersonic plasma jets, noting line width, intensity, temperature, etc 16 p2763 A66-31189  
 Velocity dependence of meteor luminous efficiency evaluated, using statistical analysis [AIAA PAPER 66-515] 16 p2805 A66-31482  
 Galactic evolution examined, using luminosity and volume emissivity diagrams 18 p3178 A66-34760  
 Solar altitude relationship to scene luminance for aerial photographs determined by photographic photometry 19 p3358 A66-35816  
 Pinhole photometric observation of umbra intensity profiles of large sunspot 21 p3808 A66-38469  
 Electric field domain motion in Ge samples with Au and Sb impurities, noting temperature and illumination effect on V-I characteristics 22 p3964 A66-40312  
 Image intensifier application as aid to visual acquisition of weak luminous moving targets against night sky 23 p4071 A66-41676  
 Height-luminosity distribution of auroral hydrogen beta emission measured with rocket mounted photometer 23 p4065 A66-41690

**LUNAR ATMOSPHERE**  
 Lunar atmosphere and hydrosphere, predicting dimensional correlation for craters and maria of primordial lunar life, noting dark and smooth appearance 02 p0181 A66-11606  
 Shear strength of idealized granular media

in vacuum, in conditions simulating environmental pressure of lunar surface layer 14 p2288 A66-28180  
 Lunar magnetosphere, Moon-solar wind interaction, X-ray flux measurement and possible hazards to astronauts 18 p3231 A66-34357  
 IMP satellite data on lunar magnetospheric MHD wake and interaction with solar wind 18 p3231 A66-34358  
 Solar wind disturbance detected by ground facility and Explorer XVIII while behind Moon 22 p3983 A66-40562

**LUNAR BASE**  
 Manufacture of propellants by aerogel carbothermal process involving reduction of silicates with methane and/or carbon [SAE PAPER 650835] 01 p0053 A66-10831  
 Nuclear lunar base power plant based on SNAP-8 components 13 p2004 A66-26606  
 Lunar base nuclear power plant and communications and command requirements, noting alternative power source 16 p2649 A66-30537  
 Lunar Exploration System for Apollo /LESA/, discussing life support, power, fuel, communications systems, mission objectives and base evolution concept phases [SAE PAPER 660449] 18 p3093 A66-33895  
 Meteorological observations of Earth from lunar surface 19 p3455 A66-35286

**LUNAR CINEMATOGRAPHY**  
 Lunar facsimile camera, noting large angular field coverage and electromechanical scanning system with optically narrow instantaneous field 19 p3356 A66-35675

**LUNAR COMMUNICATION**  
 Spacecraft and ground equipment design of lunar orbiter telecommunications system 04 p0477 A66-13580  
 S-band tracking and communication system to connect 15 ground stations with large parabolic antennas and Apollo command module and lunar excursion module 07 p1018 A66-18391  
 Lunar communication satellites, discussing satellite relay, librational, random, and synchronous satellite design, lunar orbits, etc [AIAA PAPER 66-315] 12 p1823 A66-24781  
 Design of Apollo project lunar-based telemetry system for transmitting experiment data to Earth for one year 19 p3300 A66-35671

**LUNAR COMPOSITION**  
 Role of solar furnaces in production of water on Moon [ASME PAPER 65-WA/SOL-2] 05 p0661 A66-15633  
 Surface of Moon composed of solid material with different physical properties from terrestrial rock 09 p1453 A66-20173  
 Bronzite and hypersthene chondrites, evaluating lunar or asteroidal origin 12 p1948 A66-23903  
 Tekites, approximate age and probable lunar origin 14 p2383 A66-27823  
 Rapid remote sensing method using IR spectrum matching for determining material composition from both terrestrial and extraterrestrial sources 18 p3111 A66-34013  
 Chemical reactor on-site manufacture of propellant oxygen from metallic silicates found on Moon [AICE PREPRINT 46C] 22 p3977 A66-39895

**LUNAR CRATER**  
 Age of craters and relative rate of formation on Mars and Moon 01 p0136 A66-10438  
 Catalog of all craters in third lunar quadrant recognizable on photographs and having diameter greater than 3.5 km 02 p0286 A66-11465  
 Volcanic sublimates and secondary impact craters of Llamana Volcano, Hawaii, with reference to lunar craters 02 p0288 A66-11500  
 Lunar crater-diameter-depth relationship from Ranger VII photographs in excellent accord with terrestrial impact crater parameters 02 p0291 A66-12186  
 Inapplicability of Baldwin relation for determining causes of lunar crater formation 05 p0764 A66-15332  
 Origin and nature of three structures in 235-mi diameter lunar crater photographed by Ranger VII 07 p1133 A66-17456

Structural analysis of lunar crater  
Alphonsus, using Ranger IX  
photographs 09 p1455 A66-20397  
Lunar dust depth in Mare Cognitum  
determined by comparing Ranger VII  
photographs with laboratory crater  
photographs 11 p1770 A66-22571  
Origin of lunar craters from statistical  
analysis of distribution over lunar surface,  
reviewing Fleder theory 12 p1949 A66-24033  
Comparison of cratering on Earth and  
Moon, resulting from high velocity impact of  
solid objects upon planetary  
masses 12 p1949 A66-24199  
Baldwin formula for diameter and depth of  
lunar ring mountains and craters in sea of  
clouds, noting Ranger VII  
photos 14 p2379 A66-27182  
Circularity index of lunar craters indicate  
two populations as shown by frequency  
distribution curve 15 p2597 A66-29257  
Number density of all observable lunar  
craters as function of diameter and of time,  
examining meteoroidal impact  
hypothesis 15 p2598 A66-29262  
Lunar crater filling by dust or lava in  
stochastic model based on impact  
formation 15 p2598 A66-29263  
Statistical test of randomness applied to  
lunar crater data, noting distribution and  
density 15 p2598 A66-29264  
Frequency distribution of secondary lunar  
craters determined from Ranger VII  
photographs, hypothesizing that part of  
these depressions are subsidence  
formations 15 p2598 A66-29265  
Inapplicability of Baldwin relation for  
determining causes of lunar crater  
formation 15 p2603 A66-29974  
Volcanic origin of lunar and Martian  
craters, noting distribution, diameters,  
etc 18 p3225 A66-33625  
Similarity in frequency distribution of  
Martian and lunar craters with terrestrial  
volcanic craters 18 p3226 A66-33626  
Randomness tests of lunar crater  
distribution based on data from relatively  
small regions or most recent craters, results  
indicate internal origin 18 p3233 A66-34573  
Geographic and topography features of  
lunar crater Caramuel based on 1965  
photographs 18 p3239 A66-35245  
Peculiarities of dispersion of matter  
resulting from meteorite impact on lunar  
surface as explanation of concentric nature  
of structure of crater 19 p3455 A66-35284  
Ranger VII, VIII and IX lunar probes  
scientific results on texture of maria, crater  
rays, crater classification, mare ridges, rilles,  
lineaments and bearing strength of mare  
floor 19 p3457 A66-35441  
Terrestrial calderas, defined as basins of  
subsidence larger than volcanic craters,  
associated pyroclastic deposits and possible  
lunar application 19 p3458 A66-35450  
Softened appearance of certain large lunar  
craters explained by ash flow  
theory 19 p3458 A66-35451  
Early lunar cratering, circumterrestrial  
swarm as hypothetical origin of  
planetesimals 20 p3655 A66-38026  
Volcanic vs meteoritic origin of lunar  
craters, discussing survival advantages in  
lunar landing 22 p3980 A66-40398  
Baldwin formula for diameter and depth of  
lunar ring mountains and craters in sea of  
clouds, noting Ranger VII  
photos 24 p4279 A66-42722  
Impact theory of crater formation on  
surfaces of Moon and Mars not as consistent  
with evidence as endogenous cratering  
theory 24 p4280 A66-43028  
**LUNAR CRUST**  
Moon shape related to distribution of  
continents and maria and relationship  
between shape and inertia  
moments 10 p1605 A66-21203  
Note on paper discussing lunar shape and  
internal structure in connection with  
inhomogeneity of density distribution,  
showing incompatibility of hypothesis with  
measurements 10 p1605 A66-21210  
Thermal conductivity equation solved for  
four combinations of concentration of  
radioactive elements in lunar crust, using  
result for crust thickness  
estimate 20 p3648 A66-37151

**LUNAR DISK**  
Lunar profiles determined from  
photographs of annular solar eclipses of 1962  
and 1963 20 p3655 A66-38021  
**LUNAR DUST**  
Lunar dust layer with protons in solar  
wind displacing atoms in grains, thus  
sintering dust through diffusion into porous  
structure 03 p0429 A66-13338  
Depth of lunar dust estimated by  
comparison with laboratory craters overlain  
by various thicknesses of sand, including  
Ranger VII photographs 06 p0955 A66-16783  
Strength of overlay of granular material on  
Moon estimated from Ranger VII  
photographs, showing fairly steep slopes  
covered with dust 06 p0955 A66-16784  
Lunar dust depth in Mare Cognitum  
determined by comparing Ranger VII  
photographs with laboratory crater  
photographs 11 p1770 A66-22571  
Structure and coherency of lunar dust  
layer, considering corpuscular radiation such  
as solar wind and meteorite  
bombardment 12 p1952 A66-24892  
Dust layers on lunar  
maria 23 p4128 A66-41309  
**LUNAR ECHO**  
Radio communication between U.S.S.R. and  
Great Britain via passive Earth satellite  
Echo II and Moon signal  
reflection 07 p1001 A66-17345  
Combined Faraday polarization and Doppler  
frequency measurements of lunar radar  
echoes of Earth magnetospheric  
wake 08 p1296 A66-19401  
Multifrequency radar as remote sensor for  
exploration of Earth and Moon surfaces,  
examining variation of backscattering with  
change in wavelength 09 p1341 A66-19868  
Relationship between geometric optic and  
autocorrelation approach to lunar and  
planetary radar echoes for Gaussian  
autocorrelation function 09 p1341 A66-19870  
Lunar radar scattering behavior indicates  
wide range of structure sizes on  
Moon 09 p1452 A66-20124  
Total radar cross section of Moon has  
much larger value in decimeter region than  
at shorter wavelengths 09 p1452 A66-20125  
Radar scattering maps of Moon created by  
delay-frequency analysis of lunar radar  
echo 09 p1452 A66-20126  
Angular dependence of mean power  
backscattered from Moon and Venus  
indicates greater smoothness of Venus  
surface 09 p1452 A66-20127  
Radio reflectivity measurements have  
provided more data on lunar surface than  
radar observation 09 p1452 A66-20128  
Radar cross polarization measurements for  
target surface property determination,  
noting application to lunar  
studies 12 p1819 A66-24603  
Vector scatter theory for backscatter of  
circularly polarized waves from Moon and  
Venus 22 p3866 A66-40174  
**LUNAR ECLIPSE**  
Radio emission of Moon during lunar  
eclipse 08 p1298 A66-19459  
Partial and total lunar eclipses from 1964  
to 2163 10 p1606 A66-21265  
Electrical and mechanical features of  
millimeter-wave antenna facility, including  
measurement of lunar surface during eclipse  
of December 1963 11 p1770 A66-22551  
Illuminance of Earth shadow at three  
wavelengths by numerical integration,  
accounting for light attenuation, ozone  
absorption and extinction, Rayleigh  
scattering and refractive beam  
divergence 11 p1770 A66-22570  
Radio emission intensity measurements of  
Moon at 1.8 cm during lunar eclipse of June  
25, 1964 12 p1945 A66-23507  
Three-color photometric study of  
atmospheric extinction by dust particles  
from lunar eclipse photoelectric  
measurements of Mare Crisium  
region 13 p2185 A66-25810  
Luminescence in December 1964 lunar  
eclipse, noting brightness measurement  
results in Mare Nubium  
region 16 p2800 A66-30644  
Observations of lunar radio eclipses at mm  
wavelengths 16 p2806 A66-31542  
Color and light intensity gradient of  
residual light scattered and refracted into

umbra of Earth shadow measured during  
lunar eclipse 17 p2999 A66-32068  
Earth shadow enlargement during lunar  
eclipse, noting contacts of lunar formations  
with shadow 17 p3000 A66-32341  
Solar eclipse observations by orbiting  
spacecraft will provide data on solar  
atmosphere, Earth upper atmosphere and  
role of multiple  
scattering 17 p3001 A66-32349  
Radio emission of Moon during lunar  
eclipse 18 p3232 A66-34488  
IR measurements on eclipsed Moon,  
discovering hot spots on lunar  
surface 19 p3457 A66-35448  
Radio emission intensity measurements of  
Moon at 1.8 cm during lunar eclipse of June  
25, 1964 20 p3646 A66-37020  
Terrestrial penumbra density variation  
with solar activity during lunar eclipses in  
11-year cycle 22 p3976 A66-39857  
Photoelectric observation of Moon during  
total lunar eclipse of June 24-25, 1964,  
noting bluing of color B-V before Mare  
Imbrium enters umbra 22 p3976 A66-39858  
Correlation between lunar eclipse  
brightness and interplanetary plasma flux,  
examining lunar  
luminescence 23 p4131 A66-41862  
**LUNAR EFFECT**  
Lunar-diurnal variation of cosmic ray  
intensity based on observations of neutron  
and meson component 02 p0281 A66-11336  
Lunar inequality on time of perihelion  
passages of Earth 04 p0576 A66-13481  
Effect of Moon phase and celestial latitude  
on lunar modulation of geomagnetic  
activity 10 p1529 A66-21157  
Lunar influence in terrestrial meteor rates  
investigated for unusual periodicities by  
spectral analysis of meteor rate  
data 11 p1775 A66-23140  
Variations of zodiacal light and airglow,  
suggesting correlation with solar and lunar  
cycle 14 p2283 A66-27096  
Lunar modulation of geomagnetic activity  
from 1884 to 1959 analyzed using magnetic  
character figure, noting relation to solar  
activity 24 p4201 A66-42598  
**LUNAR ENVIRONMENT**  
Lunar atmosphere, terrain and  
temperature 09 p1454 A66-20286  
Space suit for thermal, radiation and  
exposure protection for man on  
Moon 14 p2231 A66-28413  
Lunar environmental effects and logistics  
problems in industrial chemical processing  
of lunar resources  
[AICE PREPRINT 46A] 22 p3977 A66-39894  
Design and operational performance  
criteria for adequate simulation of thermal  
environment of spacecraft at lunar  
surface 22 p3888 A66-40209  
**LUNAR EVOLUTION**  
Equilibrium shape of Moon, assuming  
homogeneity computing mean rotation  
configuration and pertinent single parameter  
equilibrium shapes 07 p1133 A66-17304  
Thermal history of Moon and development  
of surface, discussing nearly simultaneous  
formation of maria 19 p3458 A66-35452  
Hypothesis concerning evolution of lunar  
surface, discussing infall of surface dust and  
bombardment by  
planetesimals 19 p3460 A66-35793  
Lunar origin, tidal evolution of Earth-Moon  
system, thermal background of lunar  
interior, figure and composition of Moon  
and radial density profile 20 p3647 A66-37038  
Statistical petrographic analysis of  
meteorite and carbonaceous chondrite  
evolution on Moon and Mars from rocket  
photographs 23 p4132 A66-42075  
**LUNAR EXCURSION MODULE /LEM/**  
Navigation, guidance and control systems  
to meet basic trajectory and crew safety  
requirements of LEM 01 p0102 A66-10043  
Measurement schedules effect on work  
load of astronaut performing navigation  
function, stressing tradeoff between number  
of measurements and accuracy  
level 01 p0102 A66-10044  
Design requirements for LEM, describing  
stabilization and control elements of abort  
system 01 p0140 A66-10046  
Apollo extension systems, developing  
technology for long-term manned space  
mission 02 p0293 A66-11509

LEM integrated guidance and control system consisting of digital computer, inertial measuring unit and various navigational sensors 02 p0255 A66-11628

Lunar landing research vehicle used for simulated lunar landings on Earth 04 p0585 A66-13636

LEM mission and pilot role in spacecraft control including guidance and control systems, retromaneuvering, landing-site inspection, etc 05 p0713 A66-15166

Two-stage /descent and ascent/ Lunar Excursion Module control system for landing gear, ascent stage, liftoff from lunar surface, etc 07 p1140 A66-17280

Apollo and LEM mission simulators, noting computer complex providing real time simulation, mathematical models, telemetry, display equipment, aural effects, etc 07 p1018 A66-18331

Apollo lunar landing spacecraft design noting command, service, lunar excursion module, etc 08 p1300 A66-18553

Design and program for Apollo Lunar Excursion Module, noting propulsion, guidance, control, ground support, etc 08 p1300 A66-18554

Man, system and vehicle simulation program for landing and docking phases of Apollo lunar landing mission 08 p1202 A66-18577

High efficiency lightweight DC-DC power converter with step-width modulating preregulator for use in Apollo Lunar Excursion Module 08 p1169 A66-19496

Functional electronic block used to breadboard molecular circuits of prototype lunar TV camera for Apollo Lunar Excursion Module /LEM/ 08 p1196 A66-19524

System and mission requirements of Lunar Mobile Laboratory, noting design and operation characteristics 09 p1364 A66-20160

Measurement schedules effect on work load of astronaut performing navigation function, stressing tradeoff between number of measurements and accuracy 10 p1554 A66-21953

Hybrid computer simulation of lunar excursion module and maneuvers with orbiting command service 12 p1828 A66-23839

Design of electronics packaging for LEM, considering reliability, low-weight, integration, control, etc 12 p1847 A66-24956

Reactivity of titanium alloy oxidizer tank with nitrogen tetroxide oxidizer under vibration analyzed for LEM when subjected to impact 13 p2111 A66-26222

Full-scale and model test for dynamic effects of LEM landing 14 p2393 A66-28019

Integrated checkout of Apollo payloads, command module, lunar excursion module and service module 14 p2271 A66-28423

Apollo Manned Space Flight Network /MSFN/ tracking and communications systems for tracking lunar spacecraft 15 p2450 A66-28748

Guidance and navigational system hardware for Apollo Command Module and LEM 18 p3132 A66-33877

Apollo LEM ECS and main subsystems design emphasizing maintenance of pressure, temperature, relative humidity and oxygen at safe levels 18 p3062 A66-33956

LEM Data Reduction System that performs concurrent data processing and telemetry conversion on computer time-shared arrangement 19 p3299 A66-35662

VHF communications system for S-band transmission link 20 p3515 A66-37228

Acceptance checkout system for checkout assistance to Apollo CSM and LEM facilities during countdown, discussing system configuration variability, composition and operation 20 p3543 A66-37579

Maintainability program for lunar excursion module considering prelaunch, inflight and lunar launch operations 20 p3574 A66-37962

Trajectories for manned lunar landing, discussing various mission alternatives in planning and realized stages and Apollo project characteristics 20 p3656 A66-38032

Manual steering, hybrid guidance system, in-flight computations and trajectory for automatic descent and landing system for LEM 21 p3768 A66-38899

LEM program at RCA, discussing history, management, lunar landing, rendezvous,

tracking antenna, radar, etc 21 p3714 A66-39515

LEM program history and management in RCA, discussing Apollo mission studies and initial assignments 21 p3822 A66-39516

Attitude, translation and descent engine control for attitude and position control of LEM 21 p3808 A66-39518

Mechanical and thermal requirements of attitude, translation and descent engine controls of Lunar Excursion Module /LEM/ 21 p3808 A66-39519

Lunar Excursion Module /LEM/ reliability program, discussing engineering, manufacturing and techniques of design and qualification testing of electronic components 21 p3714 A66-39520

Communications subsystem providing S-band link between LEM and Earth and VHF link between LEM and Command Module 21 p3714 A66-39521

Erectable antenna for S-band communication between LEM and Earth 21 p3714 A66-39522

LEM rendezvous radar for tracking transponder on lunar surface or on Command Module 21 p3714 A66-39523

Cassegrain monopulse tracking antenna for LEM and Command Module rendezvous guidance 21 p3714 A66-39524

Solid state frequency multipliers for LEM landing and rendezvous 21 p3715 A66-39525

Lunar Excursion Module rendezvous radar and transponder receivers 21 p3715 A66-39526

Full-scale and model test for dynamic effects of LEM landing 24 p4283 A66-42771

Onboard calculation for navigation and guidance of Apollo mission vehicle [AGARDOGRAPH 105] 24 p4236 A66-43125

**LUNAR EXPLORATION**

Legal problems in organization and establishment of manned Lunar International Laboratory noting exploitation of lunar lands, sovereignty, communications, etc 03 p0447 A66-13077

Structural dynamic load and instability problems in launch vehicles and spacecraft in lunar exploration emphasizing reliability, crew safety and mission success 04 p0585 A66-13549

Apollo unified S-band system covering station locations, uplink and downlink spectrums, spacecraft gross parameters, theory of operation, etc 04 p0478 A66-13589

Space flight posture of U.S. at completion of AES program and alternate approaches for further lunar exploration and exploitation [SAE PAPER 650833] 05 p0760 A66-15015

Extravehicular mobility unit /EMU/ to be worn by astronauts on Apollo lunar landing mission 08 p1176 A66-18584

Lunar crater distribution measurement from Ranger VII photographic data analysis, deriving approximate expression for secondary distribution 08 p1297 A66-19417

Layman book on lunar exploration including topographical data, lunar water, food, shelter and travel, space suits, working conditions, etc 10 p1609 A66-21900

Fuel cells compared with other power systems for space application [AIAA PAPER 64-723] 13 p2005 A66-28618

Cislunar libration point as place of departure, rendezvous and parking for lunar operation 14 p2390 A66-28450

Titan III guidance and navigation system modification for lunar mission application 14 p2329 A66-28451

Soviet space research in 1965 including Moon and planets, magnetosphere, radiation belt, upper atmosphere, space vehicle dynamics, etc 15 p2599 A66-29897

U.S. space research in 1965 including lunar missions, Venus and Mars projects, manned space flights, meteorological satellites, etc 15 p2599 A66-29899

Projected rotary-percussive drilling system for obtaining lunar surface samples within specified payload and size requirements, considering drive systems 18 p3094 A66-34139

Steepest descent method of trajectory optimization for computing lunar and interplanetary transfer missions, noting terminal constraints 20 p3651 A66-37391

Luna X measurement of fields, radiation and micrometeorites near

Moon 22 p3980 A66-40377

**LUNAR EXPLORATION SYSTEM FOR APOLLO /LESA/**

Lunar Exploration System for Apollo /LESA/, discussing life support, power, fuel, communications systems, mission objectives and base evolution concept phases [SAE PAPER 660449] 18 p3093 A66-33895

**LUNAR FAR SIDE**

Photographic data relative to hidden face of Moon from Russian probe Zond III on July 20, 1965 10 p1608 A66-21755

Lunar basins and lunar lineaments on far side of Moon from analysis of Zond III photographs 22 p3982 A66-40544

**LUNAR FLIGHT**

Three-body problem of cislunar space flight, noting effect of solar gravitational field on spacecraft trajectory 16 p2804 A66-31332

Simultaneous observation of two trial distances of stars, stellar occultation, etc, for determining position of space vehicle during mission from Earth to Moon 20 p3597 A66-38014

**LUNAR GEOLOGY**

**SA SELENOGRAPHY**

Lunar rock petrography by X-ray diffraction system in soft-landed unmanned spacecraft 01 p0067 A66-10312

Moon structure, origin, morphology and surface properties of polarization, radio and radar wavelength-emission, etc 05 p0767 A66-15758

Propellant extraction from lunar material, giving cost analysis of manufacture and use in Earth-Moon space flight with expendable and reusable tankers 10 p1610 A66-21943

Text on lunar geology /selenology/, discussing photographic methods, lunar craters, ring-structures, soil, faulting, tectonic synthesis, maria origin, etc 14 p2381 A66-27490

Lunar and asteroidal meteorites 14 p2382 A66-27603

Results and goals of lunar geological studies from Ranger and Luna satellite observations of surface 16 p2806 A66-31701

Thermal history, chemical composition and interior of Moon evaluated from Ranger VII, VIII and IX and terrestrial photographs 19 p3456 A66-35438

Mechanism for selenological processes assuming lunar surface is anorogenically molded and crater pattern stems from reactivation of anorogenic zones 19 p3464 A66-36312

**LUNAR GRAVITATION**

Clairaut theorem of normal gravity at surface and configuration of Moon 03 p0427 A66-12918

Approximate value of mass of Moon calculated, using noncalculus derivation of Newton modification of Kepler third law 08 p1296 A66-19380

Clairaut theorem of normal gravity at surface and configuration of Moon 14 p2380 A66-27287

Lunar models of figure, density distribution and gravity field from Earth telescope data 21 p3812 A66-38822

Tracking data for Lunar Orbiter I producing first estimate of overall gravitational field of Moon, noting spacecraft will not impact on Moon before completing photographic mission 22 p3979 A66-40302

**LUNAR GRAVITATIONAL EFFECT**

Tracking geometry and dynamics of lunar satellite, estimating orbital elements and lunar gravitational field parameters through Earth-based range and range rate observations [AIAA PAPER 66-39] 07 p1139 A66-18448

Testing lunar surface vehicles under simulated lunar gravity conditions, discussing mobility test article configurations and gravity simulator designs [SAE PAPER 660144] 12 p1858 A66-24534

Lunar origin hypothesis suggesting capture in gravitational field of Earth following storage in solar system 13 p2188 A66-26366

Langley Lunar Landing Research Facility for flight tests of landing vehicle and simulation of lunar gravity field 21 p3821 A66-38900

**LUNAR LANDING**

**SA SOFT LANDING**

- Lunar landing research vehicle used for simulated lunar landings on Earth 04 p0585 A66-13636
- Simulation study of human performance in manual control tasks in orbital rendezvous and lunar landing 06 p0818 A66-16245
- Soviet space program, development of proton booster and proton and electron satellites and likelihood of Russia winning Moon race 06 p0955 A66-16802
- Man in Project Apollo including module to module docking, lunar landing, maneuvering, eentry, etc 07 p1140 A66-17279
- Man, system and vehicle simulation program for landing and docking phases of Apollo lunar landing mission 08 p1202 A66-18577
- Extravehicular mobility unit (EMU) to be worn by astronauts on Apollo lunar landing mission 08 p1176 A66-18584
- Iterative guidance law for Saturn launch vehicle for lunar landing, examining trajectory optimization 08 p1253 A66-19539
- International cooperation in space law in connection with future space laboratories and lunar and Martian landings 09 p1473 A66-20558
- Jodrell Bank observations of landing phase and TV signals of Luna 9 soft landing 12 p1948 A66-23915
- Lunar landing spacecraft analysis and Surveyor reliability data acquisition 13 p2192 A66-25506
- Informed guesses as to mode of landing of Luna IX, based on data available through news media 14 p2392 A66-27896
- Simulated lunar landing maneuver of Apollo spacecraft, determining pilot control problems and handling qualities 16 p2743 A66-30886
- Guidance control technique for soft automatic lunar landing 16 p2743 A66-30887
- Legal question of Moon ownership, discussing international implications of manned landing 19 p3480 A66-35733
- Radar-updated inertial navigation of continuously-powered space vehicle during deboost phase of flight prior to lunar landing 20 p3596 A66-37221
- Surveyor vernier propulsion system, discussing design of thrust chamber, propellant tank assemblies, functions of VPS, etc [AIAA PAPER 66-593] 20 p3629 A66-37632
- Trajectories for manned lunar landing, discussing various mission alternatives in planning and realized stages and Apollo project characteristics 20 p3656 A66-38032
- Performance capabilities of Surveyor spacecraft lunar landing TV system operating in mode that reduces RF power requirements for lunar distances 20 p3562 A66-38383
- Guidance, navigation and two phases of targeting of Saturn V lunar landing mission, analyzing launch, boost to orbit and iterative guidance 21 p3768 A66-38898
- Apollo mission evolution, with particular reference to lunar descent, landing, takeoff and rendezvous performed by LEM 21 p3822 A66-39517
- Landing dynamics analysis of ability of Moon surface to support Luna IX landing capsule 22 p3981 A66-40518
- Book on space navigation guidance and control covering manned lunar landing guidance, pulse torquing and inertial measurement units, computer utilization, control systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43122
- Navigation, guidance and control system instrumentation for Apollo manned lunar landing mission [AGARDOGRAPH 105] 24 p4236 A66-43124
- LUNAR LANDING MODULE**
- Surveyor midcourse guidance treated by minima and maxima theory, noting terminal phase 19 p3397 A66-35600
- Langley Lunar Landing Research Facility for flight tests of landing vehicle and simulation of lunar gravity field 21 p3821 A66-38900
- LUNAR LANDING SITE**
- Lunar landing site selection by Earth-based manual control, using televised landing area picture 01 p0104 A66-10682
- Accuracy of spacecraft landing location on lunar surface determined from postarrival tracking, considering effect of various mission-dependent parameters [AIAA PAPER 65-694] 19 p3462 A66-35901
- LUNAR LAUNCH**
- Moon launch pads at Cape Kennedy noting structural and functional groups, crawlerway, propellant facilities, etc 01 p0054 A66-10862
- Siting of manned lunar launch facilities 09 p1365 A66-20699
- LUNAR LIMB**
- Preliminary drawings of lunar limb areas from 30 degrees north latitude to north pole 02 p0287 A66-11496
- Preliminary drawings of lunar limb areas from 30 degrees south latitude to south pole 02 p0288 A66-11497
- LUNAR LUMINESCENCE**
- Energy sources of lunar luminescence noting effects of solar wind, corpuscular radiation, electromagnetic radiation and radioactivity 07 p1139 A66-18090
- Determination of lunar luminance to set video gain of Ranger TV cameras 08 p1222 A66-18733
- Estimation of ozone concentration at altitudes of 44 to 102 km from nighttime geophysical rocket measurements of atmospheric brightness 08 p1221 A66-19796
- Statistical correlation between transient lunar luminescence and sunspot number distribution 11 p1775 A66-23193
- Lunar surface luminescence and variations in light flux with solar activity 12 p1948 A66-23943
- Model explaining negative polarization of moonlight at small lunar phase angles 12 p1949 A66-24235
- Visibility of lunar luminescence, noting favorable possibilities at new Moon, dark eclipses and far side and energy sources for luminescence 13 p2188 A66-26350
- Luminescence in December 1964 lunar eclipse, noting brightness measurement results in Mare Nubium region 16 p2800 A66-30644
- Lunar luminescence and photographic observation techniques, noting solar activity effect 17 p3006 A66-33010
- Profiles of isophotes and relative intensities for Aristarchus region of Moon taken during total eclipse on December 19, 1964 18 p3237 A66-35048
- Estimation of ozone concentration at altitudes of 44 to 102 km from nighttime geophysical rocket measurements of atmospheric brightness 21 p3733 A66-38792
- Terrestrial penumbra density variation with solar activity during lunar eclipses in 11-year cycle 22 p3976 A66-39857
- Correlation between lunar eclipse brightness and interplanetary plasma flux, examining lunar luminescence 23 p4131 A66-41862
- LUNAR MAGNETIC FIELD**
- Imp-I observation of magnetic wake of Moon or Earth 11 p1697 A66-22424
- Statistical-probability determination of lunar-solar daily and seasonal magnetic variations and geomagnetic effects 12 p1951 A66-24463
- Lunar magnetosphere, Moon-solar wind interaction, X-ray flux measurement and possible hazards to astronauts 18 p3231 A66-34357
- IMP satellite data on lunar magnetospheric MHD wake and interaction with solar wind 18 p3231 A66-34358
- LUNAR MAP**
- SA SELENOGRAPHY**
- Horizontal and vertical control system for determining three-dimensional coordinates in lunar charting by aeronautical chart and information center 08 p1293 A66-19263
- Statistical comparison of lunar maps of U.S. Army with Baldwin maps, determining true precision of individual values on both maps 13 p2177 A66-25119
- Reduction of measures for position on single lunar photograph to determine refraction-free photographic coordinates 15 p2603 A66-29969
- Selenographic measures on Yerkes Lunar Photograph No. 1170, noting refraction-free coordinate 15 p2603 A66-29970
- Solid selenographic coordinates computation, using librations for lunar photographs 15 p2603 A66-29971
- Lunar charting for project Apollo 16 p2743 A66-30669
- Lunar mapping in far IR, including hot spots during total eclipse of December 19, 1964 16 p2698 A66-31225
- Radio measurements of Moon, particularly IR, showing brightness-temperature maps of new, half-and full Moon 19 p3458 A66-35453
- LUNAR MARE**
- Lunar maria surface features and formation from Ranger VII photographs 03 p0424 A66-12455
- Moon shape related to distribution of continents and maria and relationship between shape and inertia moments 10 p1605 A66-21203
- Possible origin of lunar maria, suggesting they may be scars of mechanical damage wrought on lunar hemisphere by disruptive tides of Earth 14 p2384 A66-27900
- Lunar surface roughness in Mare Cognitum analyzed spectrally and compared with two terrestrial areas 14 p2387 A66-28336
- Indigenous organic matter on Moon by comparing Gilvarry and Sagan theories 17 p3005 A66-33006
- Model formulation of fine structure of lunar topography in Mare Cognitum based on Ranger VII satellite photographs 19 p3456 A66-35439
- Ranger VII, VIII and IX lunar probes scientific results on texture of maria, crater rays, crater classification, mare ridges, rilles, lineaments and bearing strength of mare floor 19 p3457 A66-35441
- Thermal history of Moon and development of surface, discussing nearly simultaneous formation of maria 19 p3458 A66-35452
- LUNAR MOBILE LABORATORY /MOLAB/**
- Apollo extension systems for lunar and planetary mission 02 p0288 A66-11510
- Data handling and telemetry requirements for manned scientific traverse, discussing MOL instrumentation and data parameters 04 p0478 A66-13591
- Space flight posture of U.S. at completion of AES program and alternate approaches for further lunar exploration and exploitation [SAE PAPER 650833] 05 p0760 A66-15015
- System and mission requirements of Lunar Mobile Laboratory, noting design and operation characteristics 09 p1364 A66-20160
- Testing lunar surface vehicles under simulated lunar gravity conditions, discussing mobility test article configurations and gravity simulator designs [SAE PAPER 660144] 12 p1858 A66-24534
- Human physiological and psychological characteristics effects on design of mobile lunar laboratory 17 p2904 A66-32944
- /MOLAB/ Digital computer optimization program, determining minimum weight fuel cell primary power system for MOLAB 20 p3496 A66-37156
- LUNAR OBSERVATORY**
- Communications of Arizona Lunar and Planetary Laboratory, Volume 3 09 p1455 A66-20291
- Lunar astronomical research, establishment of lunar observatory and mathematical model for analysis of logistics implications 14 p2390 A66-28410
- Lunar motion and shape, reviewing observational and theoretical work of various observatories and laboratories 17 p2998 A66-32024
- LUNAR OCCULTATION**
- X-ray source identified from Aerobee rocketborne Geiger counters, noting lunar occultation of Crab Nebula 02 p0282 A66-11360
- Metropolitan area man-made VHF/UHF noise in 200 to 500-mc frequency range 03 p0333 A66-12568
- Spectra of lunar occultations of emission source 3C 273 08 p1297 A66-19449
- X-ray source identified from Aerobee rocketborne Geiger counters, noting lunar occultation of Crab Nebula 10 p1598 A66-21101
- Radio sources observation during immersion phase of lunar occultation 13 p2183 A66-25608
- Radio source location by observing occultation of source by Moon 16 p2806 A66-31582

Lunar occultation and identification of MSH 19-27 radio source, noting computer analysis of brightness distribution 18 p3225 A66-33549

Spectra of lunar occultations of emission source 3C 273 18 p3232 A66-34478

Brightness distribution of 3C444 radio source obtained from lunar occultation 18 p3235 A66-34658

**LUNAR ORBIT**

Computation of approximate coordinates of Moon with estimation of accuracy over time interval of 50 years 02 p0292 A66-12235

Tidal de-spin of Mercury and Moon noting solar torque on planets 03 p0426 A66-12892

Variation of Earth-Moon distance and inclination angle of orbital planes during period of tidal evolution 03 p0427 A66-12920

Onboard lunar orbital navigation system simulation, using minimum variance estimation 08 p1249 A66-18818

Motions of perigee and node and distribution of mass in Moon determined by treating Sun, Earth and Moon as point masses 08 p1296 A66-19352

Inertial reference unit to provide attitude and thrust maneuver measurements for Lunar Orbiter spacecraft 08 p1253 A66-19529

Space probes and Earth-Moon libration points 13 p2186 A66-26012

Variation of Earth-Moon distance and inclination angle of orbital planes during period of tidal evolution 14 p2380 A66-27269

Variation in Earth-Moon distance as result of meteoritic impact 15 p2597 A66-29261

Semianalytical solution of motion of satellite in lunar orbit, considering perturbations due to lunar and Earth gravity and solar attraction 15 p2604 A66-30016

Secular variations of lunar orbit due to tidal friction 17 p3005 A66-33005

AIMP-D spacecraft mission analysis, determining launch conditions and trajectory shaping for attaining lunar orbit, noting errors, flight path angle, etc [AIAA PAPER 66-535] 18 p3226 A66-33665

Dynamical system of two degrees of freedom, with application to restricted problem and lunar theory 18 p3234 A66-34654

Brown lunar theory interpretation of observed lunar motion and associated rectangular-to-polar lunar coordinate transformations 18 p3234 A66-34655

Lagrange-Laplace theory of lunar physical librations extended to include reduced estimate of mechanical ellipticity of lunar equator 19 p3460 A66-35791

Lunar orbit evolution caused by tidal friction in Earth and Moon interiors 22 p3985 A66-40956

**LUNAR ORBITER**

Systems design analysis of lunar survey viewfinder /LSV/ consisting of pointing and tracking telescope for high-resolution lunar surface survey 20 p3558 A66-37225

U.S. Lunar Orbiter program 20 p3663 A66-38063

Trajectory optimization as part of real time flight operations in Lunar Orbiter program 21 p3765 A66-38866

Tracking data for Lunar Orbiter I producing first estimate of overall gravitational field of Moon, noting spacecraft will not impact on Moon before completing photographic mission 22 p3979 A66-40302

**LUNAR PERTURBATION**

Lunar physical libration constants determination based on position of crater Mestling A with respect to lunar limb 02 p0293 A66-12265

Lunar-solar perturbation effect on satellites with eccentric orbits, noting lifetimes on perigee heights 16 p2802 A66-30923

Brown lunar theory interpretation of observed lunar motion and associated rectangular-to-polar lunar coordinate transformations 18 p3234 A66-34655

**LUNAR PHASE**

Model explaining negative polarization of moonlight at small lunar phase angles 12 p1949 A66-24235

Interrelation between lunar phase and occurrence of precipitation larger than 10.0 mm per day in northern Germany 16 p2742 A66-31113

Variation of geomagnetic activity with

phase of Moon tested for statistical significance, noting fluctuations at lunar period 22 p3982 A66-40555

**LUNAR PHOTOGRAPH**

Ranger television system designed to transmit close-up pictures of lunar surface to Earth 02 p0189 A66-11364

Zond III photographs of lunar far side taken July 20, 1965 noting Oceanus Procellarum, Mare Orientale and thalassoids 04 p0578 A66-14023

Ranger lunar probe photograph analysis, crater size and shape measurements and dominant topographic features, including camera and command systems 07 p1132 A66-17208

Origin and nature of three structures in 235-mi diameter lunar crater photographed by Ranger VII 07 p1183 A66-17456

Structural analysis of lunar crater Alphonsus, using Ranger IX photographs 09 p1455 A66-20397

Ephemeris time determined by photographic observation of Moon 10 p1606 A66-21261

Data processing procedures used on flights of Rangers VII, VIII and IX, evaluating lunar photographs 11 p1775 A66-23079

Reduction of measures for position on single lunar photograph to determine refraction-free photographic coordinates 15 p2603 A66-29969

Selenodetic measures on Yerkes Lunar Photograph No. 1170, noting refraction-free coordinate 15 p2603 A66-29970

Solid selenodetic coordinates computation, using librations for lunar photographs 15 p2603 A66-29971

**LUNAR PHOTOGRAPHY**

Photographic determination of dependence of topocentric coordinates of Moon on geocentric coordinates 03 p0366 A66-13031

Long-focus horizontal telescope with coelostat for photographing position of Moon 05 p0681 A66-15217

Ranger Block III television system for lunar surface photography 06 p0958 A66-15934

History, background and purpose of Ranger missions to Moon, including spacecraft, television subsystem, testing and calibration 07 p1139 A66-18360

Lunar surface shape and altitude determination via stereophotogrammetric processing of telescopic Moon photographs 07 p1036 A66-18482

Stereoscopic camera system design for use on lunar orbiting vehicle including illumination, lunar albedo, resolution and signal to noise ratio 08 p1222 A66-18734

Zond III photographic survey of far side of Moon 09 p1463 A66-19904

Light-colored rays radiating from some lunar craters, hypotheses advanced and Ranger VII photographs 11 p1771 A66-22770

Design parameters of astronomical camera for lunar charting 12 p1876 A66-23644

Image dissector for lunar observation in conjunction with Earth-based telescope, noting efficiency of resolution contrast sensitivity 12 p1883 A66-24678

Lunar photographs received from Luna IX 13 p2177 A66-25137

Large-scale photography and mapping problems in lunar photogrammetry 13 p2182 A66-25601

Photometric method for deriving lunar surface elevation information from single picture 13 p2183 A66-25603

NASA Lunar Orbiter program to place unmanned spacecraft into orbit around Moon 13 p2078 A66-25604

Frequency distribution of secondary lunar craters determined from Ranger VII photographs, hypothesizing that part of these depressions are subsidence formations 15 p2598 A66-29265

Surveyor I data analyzed, noting lunar photographs, topography and instrumentation 15 p2599 A66-29657

Monographs from Lunar and Planetary Laboratory of University of Arizona, 1965 15 p2603 A66-29968

High resolution lunar satellite photography capable of 1-ft ground resolution [SMPT PREPRINT 98-63] 16 p2707 A66-31152

Lunar photographs of Ranger VII analyzed,

noting lunar surface 16 p2806 A66-31700

Photographic atlas of Moon, particularly Ranger VII transmissions and Pic-du-Midi ground observation, with discussion of lunar physical and dynamic properties 16 p2807 A66-31747

Lunar photography with 74-inch reflector of Helwan Observatory, detailing original negatives 17 p3006 A66-33018

Lunar photometric brightness variational function based on JPL study of Moon topology 18 p3235 A66-34656

Luna IX photographs indicate lunar surface composition of weakly cohesive poorly sorted fragmental material of unknown source 22 p3978 A66-40017

Cathode ray tube device for digital video processing of Ranger pictures 23 p4071 A66-41677

**LUNAR PROBE**

SA EXPLORER XXXIII SATELLITE

SA LUNIK IX LUNAR PROBE

SA PIONEER SPACE PROBE

SA RANGER VII LUNAR PROBE

SA RANGER VIII LUNAR PROBE

Lunar photographs received from Luna IX 13 p2177 A66-25137

Informed guesses as to mode of landing of Luna IX, based on data available through news media 14 p2392 A66-27896

Hypothesis that Luna IX rocket exhaust during soft landing caused formation of shallow crater visible in Ranger VII lunar probe photographs 15 p2593 A66-28681

Luna IX imaging system and analysis of pictorial data of lunar surface 15 p2498 A66-28741

Celestial mechanics covering two-body problem, planetary and asteroid theory, interplanetary trajectories, lunar probe, spherical harmonics, etc 17 p2997 A66-32019

First Soviet automatic station Luna IX to land on Moon, discussing flight stages and reproductions of lunar surface images transmitted to Earth 17 p3004 A66-32958

Lunar figure and orbit parameters measured by optical location method 19 p3455 A66-35285

Ranger VII, VIII and IX lunar probes scientific results on texture of maria, crater rays, crater classification, mare ridges, rilles, lineaments and bearing strength of mare floor 19 p3457 A66-35441

Auxiliary autonomous piggyback detector and recorder system for spacecraft failure detection following touchdown 19 p3315 A66-35676

Luna X measurement of fields, radiation and micrometeorites near Moon 22 p3980 A66-40377

**LUNAR PROGRAM**

Scientific and industrial reasons for manned lunar missions 04 p0576 A66-13576

Equipment design and weight estimates for lunar production of oxygen and water 22 p3977 A66-39896

**LUNAR RADIATION**

Heat flux from lunar emission incident on surface in circular orbit as function of orbital parameters [AIAA PAPER 64-336] 03 p0425 A66-12756

Intensity estimation for lunar X-rays excited by high energy terrestrial electrons from solar stream induced geomagnetic cavity 09 p1442 A66-20388

Lunar X-ray detectability, noting generation by solar wind electron bombardment and flux intensity 09 p1459 A66-20885

Ozone number densities in 30 to 75 km altitude determined at night by rocket measurements of lunar UV radiation absorption in various bands 15 p2492 A66-30030

Red and blue flashes in silicate luminescence excited by low-energy proton and lunar reddening by solar-ion excitation 16 p2802 A66-30930

**LUNAR RAY**

Ranger VII and VIII photography shows nature of lesser lunar ray systems, including images of crater Delambre and Bonpland J 08 p1293 A66-19265

Light-colored rays radiating from some lunar craters, hypotheses advanced and Ranger VII photographs 11 p1771 A66-22770

**LUNAR ROVING VEHICLE /LRV/**

Lunar-surface fixed shelter and roving

- vehicle designed for lunar exploration 02 p0289 A66-11618
- Preliminary mobility tests of scale model lunar roving vehicle [SAE PAPER 660147] 07 p1017 A66-17250
- One-man lunar Rover craft design and performance, considering bipropellant rocket powered platform kinesthetically controlled by astronaut 08 p1303 A66-18822
- Apollo extension system /AES/ for lunar surface exploration [SAE PAPER 660145] 08 p1296 A66-19390
- System design technique for extraterrestrial vehicles which maximizes effectiveness of complex system operating in partially defined environment 13 p2057 A66-25247
- Unmanned lunar roving vehicle power requirements, comparing radioisotope thermoelectric generator and solar cell/battery systems 23 p4017 A66-41104
- Isotope power systems for lunar roving vehicles noting fuel, radiation shielding, performance, weight, etc 23 p4024 A66-41770
- LUNAR SATELLITE**
- Tracking geometry and dynamics of lunar satellite, estimating orbital elements and lunar gravitational field parameters through Earth-based range and range rate observations [AIAA PAPER 66-39] 07 p1139 A66-18448
- Lunar communication satellites, discussing satellite relay, librational, random, and synchronous satellite design, lunar orbits, etc [AIAA PAPER 66-315] 12 p1823 A66-24781
- High resolution lunar satellite photography capable of 1-ft ground resolution [SMPT PREPRINT 98-63] 16 p2707 A66-31152
- Lagrange libration points in plane of two mutually gravitating heavy masses applied to theory of SYNCOM lunar satellites 22 p3979 A66-40176
- LUNAR SCATTERING**
- Dependence of mean scattered power on scattering geometry and wavelength in terms of scale roughness and rms slope of components for bistatic scattering 10 p1499 A66-21612
- Specular returns and diffuse scattering from Moon and ocean bottom 16 p2653 A66-30932
- Lunar line waveguide parameters calculated for inner conductor displacement and ratio of radii 19 p3311 A66-35301
- LUNAR SEISMOGRAPH**
- Velocity distribution of P and S waves in lunar interior, based on elastic wave propagation in rocks and P and S wave distribution in upper Earth layer 10 p1607 A66-21287
- Interior structure of Moon and planets studied by geophysical seismic methods 20 p3647 A66-37039
- LUNAR SHADOW**
- Photoelectric observation of Moon during total lunar eclipse of June 24-25, 1964, noting bluing of color B-V before Mare Imbrium enters umbra 22 p3976 A66-39858
- LUNAR SHELTER**
- Lunar-surface fixed shelter and roving vehicle designed for lunar exploration 02 p0289 A66-11618
- Lunar shelter design and support system imposed by lunar environment [SAE PAPER 650834] 05 p0660 A66-15016
- LUNAR SOIL**
- Environmental test criteria for lunar and planetary soils, discussing particle size, clay, hydrothermal alteration, cohesion, adhesion, vacuum and temperature effects, etc 14 p2387 A66-28179
- Shear strength of idealized granular media in vacuum, in conditions simulating environmental pressure of lunar surface layer 14 p2288 A66-28180
- Mechanical properties of lunar dust, consolidated lunar conglomerates and lunar rocks described by macrorheological constants 16 p2805 A66-31483
- Solar energy vs electrical or nuclear power for recovery of water, oxygen and various chemicals from lunar soil [AICE PREPRINT 46B] 22 p3977 A66-39897
- LUNAR SPACECRAFT**
- SA APOLLO SPACECRAFT
- Apollo manned space flight program including mission profile, spacecraft and constituent systems 01 p0143 A66-10799
- Lunar orbiter objectives, mission and spacecraft configuration, detailing inertial reference unit 04 p0543 A66-13581
- Classical spectroscopic binary star orbit determination techniques to provide orbital elements for lunar satellite tracked by Earth-based Doppler radar [AIAA PAPER 66-40] 08 p1298 A66-19727
- Electronic predictor instruments for dynamic control and simulation and possible application to lunar spaceship 13 p2048 A66-25896
- Series power switch for orientation and position computer of small lunar-orbit spacecraft designed to reduce weight and cost 17 p2878 A66-33122
- Next-generation lunar transports for multiman crew landing [SAE PAPER 660443] 17 p3017 A66-33158
- Terminal guidance system instrumentation for Surveyor project lunar soft-landing spacecraft 18 p3132 A66-33881
- Classical spectroscopic binary star orbit determination techniques to provide orbital elements for lunar satellite tracked by Earth-based Doppler radar 18 p3234 A66-34596
- Symbolic programming digital computer techniques, hardware interfacing and system errors in simulation of lunar midcourse guidance and navigation systems 20 p3543 A66-37250
- Microbiological decontamination of lunar spacecraft during mechanical integration and assembly 22 p3857 A66-40044
- LUNAR SURFACE**
- SA SELENOGRAPHY**
- Lunite model based on astronomical and radar data of radio wave reflectance from lunar surface, showing dependence of reflection coefficient on wavelength 01 p0135 A66-10274
- Martian surface age calculated from rate of meteorite infall in analogy to lunar case 01 p0136 A66-10440
- Apollo extension systems for lunar and planetary mission 02 p0288 A66-11510
- Radar backscattering for tenuous surface layer on Moon 04 p0577 A66-13895
- Bearing strength of lunar surface, optical properties suggest rock particles which maintain high porosity by interparticle adhesion 06 p0955 A66-16788
- Directional radiative characteristics of conical cavities and relation to reflective characteristics of Moon 07 p1136 A66-17729
- Lunar surface ideal for thermal neutron, molecular and atomic beam measurements 08 p1287 A66-18768
- Coefficients of expansion into spherical harmonics of Moon surface as presented by selenodetic control system of USAF 08 p1217 A66-19264
- Lunar crater distribution measurement from Ranger VII photographic data analysis, deriving approximate expression for secondary distribution 08 p1297 A66-19417
- IR spectrophotometry of Moon and Galilean satellites of Jupiter, noting surface properties, thermal radiation and albedo increase with wavelength 08 p1298 A66-19458
- Lunar and planetary surfaces investigated from thermal radiation standpoint 09 p1451 A66-20114
- Surface of Moon composed of solid material with different physical properties from terrestrial rock 09 p1453 A66-20173
- Lunar atmosphere, terrain and temperature 09 p1454 A66-20286
- Lunar X-ray detectability, noting generation by solar wind electron bombardment and flux 09 p1459 A66-20885
- Intensity Remote measurement of trace amounts of vapors in lunar and planetary atmospheres as indicator of biologic and geologic surface conditions 10 p1608 A66-21532
- Lunar and planetary terrain roughness in terms of curvature statistics, based on Ranger VII and Bonita Lava Flow contour map analysis [AIAA PAPER 65-389] 10 p1610 A66-21955
- Lunar spectral reflectivity distribution determined by comparison of lunar spectra with solar spectrum and spectra of early star classes 12 p1945 A66-23506
- Nondispersive X-ray spectrometer for remote geochemical analysis of lunar or planetary surfaces 12 p1878 A66-23694
- Luna 9 TV photographs of Moon 12 p1948 A66-23916
- Radar maps of Moon and planets using bistatic continuous wave mode of radar operation between orbiting spacecraft and ground station 12 p1825 A66-24891
- Neutron analysis techniques for determining hydrogen presence on lunar or planetary surfaces, based on measurement of gamma radiation 14 p2233 A66-28105
- Reflection spectra of rock powders compared with Stratoscope II spectrum of Mare Tranquillitatis 14 p2386 A66-28128
- Radar cross section of Earth surfaces as affected by wavelength, with reference to probing lunar surfaces 15 p2448 A66-28572
- Hypothesis that Luna IX rocket exhaust during soft landing caused formation of shallow crater visible in Ranger VII lunar probe photographs 15 p2593 A66-28681
- Objections to Gehrels model explaining observations on wavelength dependence of optical properties of lunar surface 15 p2597 A66-29260
- Surveyor I data analyzed, noting lunar photographs, topography and instrumentation 15 p2599 A66-29657
- Diffusely reflecting surfaces for simulating brightness of lunar surfaces, noting pronounced rise of reflectivity at small phase angles 16 p2802 A66-30929
- Lunar photographs of Ranger VII analyzed, noting lunar surface 16 p2806 A66-31700
- Characteristics of lunar radio emission considered, taking into account averaging effect of antenna radiation pattern 17 p2999 A66-32237
- Lunar surface layer radioactivity from diffusion of radon and thoron 17 p3004 A66-32942
- First Soviet automatic station Luna IX to land on Moon, discussing flight stages and reproductions of lunar surface images transmitted to Earth 17 p3004 A66-32958
- Lunar structural lineaments as boundary conditions for convection theory 17 p3007 A66-33235
- Thermal energy calculations from circular and elliptical spots in area of crater Aristarchus to support volcanic origin 18 p3228 A66-34099
- IR spectrophotometry of Moon and Galilean satellites of Jupiter, noting surface properties, thermal radiation and albedo increase with wavelength 18 p3232 A66-34487
- Nature of lunar surface - IAU/NASA Symposium, Goddard Space Flight Center, Greenbelt, Maryland, April 1965 19 p3456 A66-35437
- Lunar and Planetary Laboratory of University of Arizona, summarizing conclusions concerning lunar surface 19 p3457 A66-35440
- Ranger VII, VIII and IX lunar probes scientific results on texture of maria, crater rays, crater classification, mare ridges, rilles, lineaments and bearing strength of mare floor 19 p3457 A66-35441
- Lunar surface, discussing radar scattering, optical scattering, thermal and photographic data, etc 19 p3457 A66-35442
- Hypervelocity projectile impact cratering from Ranger photographs of lunar surface 19 p3457 A66-35443
- Optical photometric properties of lunar surface, discussing brightness effects, solar wind, albedo, reflectivity, backscatter, chemical composition, ion bombardment effects, etc 19 p3457 A66-35444
- Polarized light study of lunar surface dust composition 19 p3457 A66-35445
- Quantitative analysis of transient luminous phenomena on lunar surface and relation to solar electromagnetic or corpuscular excitations 19 p3457 A66-35446
- IR measurements on eclipsed Moon, discovering hot spots on lunar surface 19 p3457 A66-35448
- Lunar surface radar observation techniques and results on dielectric constant of surface material, surface undulations, reflectivity, roughness, etc 19 p3458 A66-35449
- Thermal history of Moon and development

- of surface, discussing nearly simultaneous formation of maria 19 p3458 A66-35452
- Hypothesis concerning evolution of lunar surface, discussing infall of surface dust and bombardment by planetesimals 19 p3460 A66-35793
- Mechanism for selenological processes assuming lunar surface is anorogenically molded and crater pattern stems from reactivation of anorogenic zones 19 p3464 A66-36312
- Lunar spectral reflectivity distribution determined by comparison of lunar spectra with solar spectrum and spectra of early star classes 20 p3646 A66-37019
- Role of radiative transfer in mechanism of heat flow in lunar surface, noting magnitude of contribution to transfer 20 p3648 A66-37260
- Vacuum upwellings of simulated basalt and granite magma, showing correlation with lunar surface by photometry 20 p3655 A66-38025
- Viscosity distribution within Moon analyzed, using Navier-Stokes and continuity equations, abnormal inertia moment explained, maria and continent distribution examined for understanding internal state of Moon 20 p3656 A66-38030
- Energy reflected from subsolar point on Moon determined, noting energy balance and radiated energy 20 p3656 A66-38052
- Origin of tektites with Moon considered most likely extraterrestrial source 22 p3656 A66-38059
- Behavior of postulated lunar surface materials due to environmental high vacuum, examining micrometeoroid impact and solar radiation effect 21 p3810 A66-38506
- Statistical method for determining preferential directions shown by lunar surface formations known as lunar grid system 21 p3811 A66-38637
- Luna IX photographs indicate lunar surface composition of weakly cohesive poorly sorted fragmental material of unknown source 22 p3978 A66-40017
- Conceptual analytical method for simulating lunar surface environment, using computer program for parametric curves 22 p3888 A66-40210
- Volcanic vs meteoritic origin of lunar craters, discussing survival advantages in lunar landing 22 p3980 A66-40398
- Landing dynamics analysis of ability of Moon surface to support Luna IX landing capsule 22 p3981 A66-40518
- Photographic evidence from Luna IX indicating Moon may have surface made up largely of fine rock particles 22 p3982 A66-40522
- Translunar communication using pumice-like outer layer as propagation medium 23 p4036 A66-41151
- Lunar domes defined, observed and listed 23 p4128 A66-41209
- Dust layers on lunar maria 23 p4128 A66-41309
- Penetrating radiation measurement on Moon surface obtained by Luna IX spacecraft 23 p4128 A66-41410
- Magnetic spherules in silurian and permian salt samples suggest constant meteoric influx useful in determination of lunar surface age 24 p4198 A66-42435
- LUNAR SURFACE VEHICLE**
- Standard vehicular systems for operation on lunar surface with model of lunar exploration program [SAE PAPER 650838] 02 p0216 A66-12224
- Remote extraterrestrial surface navigation, discussing image-tube based stellar field acquisition system parameters 04 p0543 A66-13590
- Scale model testing of lunar surface vehicles in simulated low gravity field [SAE PAPER 660148] 07 p1017 A66-17251
- Lunar and terrestrial vehicle wheels, frame, steering, suspension, electrochemical energy converters, electric traction power systems and vehicular propulsion [SAE PAPER 660150] 07 p1018 A66-17867
- Locomotion energy requirements for lunar surface vehicles, noting parameters affecting requirements, resistance factors, etc [SAE PAPER 660149] 12 p1858 A66-24530
- Testing lunar surface vehicles under simulated lunar gravity conditions, discussing mobility test article configurations and gravity simulator designs [SAE PAPER 660144] 12 p1858 A66-24534
- Dynamic analysis of lunar surface vehicle including power spectral density terrain definition, vehicle velocity limiting criteria and nonlinear analysis of vehicle freedom to pitch, bounce and roll 14 p2393 A66-28022
- Human and man/system requirements to provide criteria for choosing alternative mission and lunar surface roving vehicles design concepts 17 p2903 A66-32170
- Mobility aids for wheeled surface vehicles and flyers for Apollo lunar surface exploration 19 p3340 A66-35963
- Movable platform and differential throttle control configurations for lunar manned flying vehicle 24 p4284 A66-42954
- LUNAR TEMPERATURE**
- Thermal anomalies found in IR lunar observations attributed to lunar roughness on centimeter scale 01 p0138 A66-10884
- Nonuniform cooling of lunar surface detected by IR scanning during total eclipse 02 p0285 A66-11302
- Heat flux from lunar emission incident on surface in circular orbit as function of orbital parameters [AIAA PAPER 64-336] 03 p0425 A66-12756
- Central lunar temperature measured at 1 mm wavelength as time and phase function during total eclipse 05 p0763 A66-15290
- Radio emission of Moon during lunar eclipse 08 p1298 A66-19459
- Radiometric mapping and determination of lunar brightness temperature at 3 mm wavelength 09 p1455 A66-20389
- Electrical and mechanical features of millimeter-wave antenna facility, including measurement of lunar surface during eclipse of December 1963 11 p1770 A66-22551
- Observations of lunar radio eclipses at mm wavelengths 16 p2806 A66-31542
- Radio emission of Moon during lunar eclipse 18 p3232 A66-34488
- IR pyrometry of lunar surface 19 p3457 A66-35447
- Thermal conductivity equation solved for four combinations of concentration of radioactive elements in lunar crust, using result for crust thickness estimate 20 p3648 A66-37151
- LUNAR TIDE**
- Lunar tidal effect on oxygen green line in night airglow at Honolulu from 1961 to 1963 05 p0668 A66-14801
- Least squares method to determine diurnal lunar tide fluctuations from observations of Pulkovo, Greenwich and Tokyo Time Services 06 p0954 A66-16426
- Lunar tide calculated by analysis of perturbations in inclinations of two nearly polar satellites 06 p0877 A66-16781
- Possible effects of oceans on atmospheric lunar tide 07 p1061 A66-17363
- Phillips frequency-dependence rule for sporadic E extended for better statistical coincidence with lower frequency data 11 p1695 A66-22372
- Lunar tidal effect on daily and monthly variation of polarized sky light 12 p1874 A66-24844
- Lunar tidal variations in monthly median noon critical frequency in American zone during low solar activity 14 p2285 A66-27727
- Classical theory of tidal oscillations of plumb line acting under solar and lunar tidal forces 15 p2596 A66-29142
- Annual variations in atmospheric lunar tides attributed primarily to vertical shear of zonal wind systems 16 p2698 A66-31112
- Lunar semidiurnal tides in ionosphere over Puerto Rico determined from electron density profiles for heights between 150 and 300 km 17 p2923 A66-33362
- Lunar tidal effects on noon real-height F2 electron density profile data from two-year interval 22 p3908 A66-39967
- Lunar tidal variations, geopotential velocity and calculation of Love number 24 p4198 A66-42246
- LUNAR TOPOGRAPHY**
- SA SELENOGRAPHY**
- Lunar topographical asphericity, lunar coordinates, absolute and relative, harmonic analytical interpolation, formations, stratigraphy and optical librations 07 p1139 A66-18265
- Moon shape related to distribution of continents and maria and relationship between shape and inertia moments 10 p1605 A66-21203
- Note on paper discussing lunar shape and internal structure in connection with inhomogeneity of density distribution, showing incompatibility of hypothesis with measurements 10 p1605 A66-21210
- Layman book on lunar exploration including topographical data, lunar water, food, shelter and travel, space suits, working conditions, etc 10 p1609 A66-21900
- Moon shape determined by measuring distance from lunar surface points to lunar center of mass, using optical laser radar 11 p1774 A66-22964
- Photometric method for deriving lunar surface elevation information from single picture 13 p2183 A66-25603
- Lunar topography and cartography, noting application to lunar atlas preparation, absence of magnetic field, etc 17 p2999 A66-32132
- Harmonics of absolute lunar elevations, discussing stability criteria and spherical harmonic analysis of geometric figure of Moon 17 p3006 A66-33019
- Lunar photometric brightness variational function based on JPL study of Moon topology 18 p3235 A66-34656
- Model formulation of fine structure of lunar topography in Mare Cognitum based on Ranger VII satellite photographs 19 p3456 A66-35439
- Lunar models of figure, density distribution and gravity field from Earth telescope data 21 p3812 A66-38822
- Lunar basins and lunar lineaments on far side of Moon from analysis of Zond III photographs 22 p3982 A66-40544
- LUNAR TRACKING**
- Systems design analysis of lunar survey viewfinder /LSV/ consisting of pointing and tracking telescope for high-resolution lunar surface survey 20 p3558 A66-37225
- Optimal correlation of tracking data determining Surveyor I location 23 p4129 A66-41780
- LUNAR TRAJECTORY**
- SA EARTH-MOON TRAJECTORY**
- Solution to boundary value problems associated with artificial satellite, lunar impact trajectory and interplanetary trajectory 04 p0579 A66-14445
- Russian book on three-dimensional problem of reaching Moon, covering power optimized trajectories, initial velocity minimum, lunar orbit, perturbation factors, etc 06 p0954 A66-16563
- Linear perturbation theory computation of target errors in lunar impact trajectories due to random injection errors 08 p1289 A66-18828
- Sensor requirements for midcourse guidance phase of spacecraft on lunar trajectories, with attention to optical measurements and statistical combining for trajectory estimates [AIAA PAPER 64-234] 12 p1910 A66-24692
- LUNEBERG LENS**
- Spherical radar reflectors with high-gain omnidirectional response, noting structure, efficiency and achievement of isotropic response 10 p1503 A66-21642
- LUNG**
- S PULMONARY CIRCULATION**
- S PULMONARY FUNCTION**
- LUNIX IX LUNAR PROBE**
- Jodrell Bank observations of landing phase and TV signals of Luna 9 soft landing 12 p1948 A66-23915
- Luna 9 TV photographs of Moon 12 p1948 A66-23916
- Lunar photographs received from Luna IX 13 p2177 A66-25137
- Luna IX imaging system and analysis of pictorial data of lunar surface 15 p2498 A66-28741
- Luna IX photographs indicate lunar surface composition of weakly cohesive poorly sorted fragmental material of unknown source 22 p3978 A66-40017
- Landing dynamics analysis of ability of Moon surface to support Luna IX landing capsule 22 p3981 A66-40518
- Photographic evidence from Luna IX indicating Moon may have surface made up

largely of fine rock  
 particles 22 p3982 A66-40522  
**TUTETIUM COMPOUND**  
 Electric resistivity of solid phase of  
 lutetium hydrogen system noting action of  
 hydrogen atom 01 p0127 A66-11090  
**LUXEMBOURG EXPERIMENT**  
**S LANGMUIR PROBE**  
**LYMAN ALPHA RADIATION**  
 Extreme UV solar spectrum analysis  
 between Lyman alpha lines of H-I and C-VI,  
 using rocket  
 spectrography 02 p0286 A66-11356  
 Scattered Lyman alpha radiation  
 measurements near Earth and in  
 interplanetary space by Zond I, using NO-  
 filled photon counters with LiF  
 windows 10 p1596 A66-21049  
 Extreme UV solar spectrum analysis  
 between Lyman alpha lines of H-I and C-VI,  
 using rocket  
 spectrography 10 p1597 A66-21079  
 UV radiation from galaxies, radio sources,  
 quasi-stellar objects and Seyfert galaxies,  
 examining Lyman alpha

fluxes 10 p1598 A66-21098  
 Lyman alpha ionization of nitric oxide and  
 ion molecule reactions accounting for ionic  
 nitric oxide content of D and E  
 regions 16 p2694 A66-30705  
 Altitude distribution of atmospheric  
 molecular and atomic hydrogen, showing  
 results of Lyman alpha absorption  
 measurements 17 p2919 A66-32995  
 Lyman alpha airglow observations indicate  
 diurnal variation of atomic hydrogen in  
 thermosphere and exosphere with  
 abundance change with solar  
 activity 19 p3349 A66-36349  
 Barium ion concentration computed from  
 Ba II 4554 angstrom line and Lyman alpha  
 radiation intensity in lower  
 chromosphere 20 p3646 A66-37013  
 Magnetospheric phenomena related to  
 geomagnetic tail noting F region, polar  
 auroras and solar Lyman alpha radiation  
 scattering in night sky 24 p4203 A66-43029  
**LYMAN BETA RADIATION**  
 Ratio of average transmission coefficients

of L-beta and H-alpha and reabsorption in  
 hydrogen pulsed  
 discharge 01 p0111 A66-10390  
**LYMAN SPECTRUM**  
 Wing broadening in plasma of hydrogen  
 Lyman-alpha line by local electron and  
 quasi-static ion fields calculated, considering  
 impact theory of electron collisions,  
 quadrupole and dipole interactions and  
 existent asymmetries 03 p0405 A66-13138  
 X-ray photographs of Sun using Fresnel  
 zone plate camera mounted on Skylark  
 rocket, noting Lyman C-VI emission line in  
 solar spectrum 10 p1607 A66-21291  
 Physical process effect on structure of H  
 II regions, noting ionization, Lyman  
 continuum spectral distribution and  
 radiative transfer frequency dependence on  
 absorptive processes 17 p3003 A66-32655  
 Quasi-stellar radio sources correlated for  
 prediction of Lyman lines relative strengths  
 and optical depth of nebulas beyond Lyman  
 continuum, using simple  
 models 23 p4130 A66-41807
